even be proud of. It is copied directly from the manuscript list in the possession of Mr. Mason, the chairman of the Lecture Committee, who did most of the arranging and corresponding with the various lecturers:

Rev. Mark Hopkins, D.D., Williamstown	Tuesday, Dec. 21, 1852
Rev. John Pierpont, Medford	Tuesday, Dec. 28, 1852
Hon. Josiah Quincy, Jr., Boston	Tuesday, Jan. 4, 1853
Hon. Horace Greeley (Lecture), New York Charles Thurber, Esq. (Poem), Worcester	Tuesday, Jan. 11, 1853
Rev William Mountford, Gloucester	Tuesday, Jan 18, 1853
Richard H. Dana, Jr., Esq., Boston	Tuesday, Jan. 25, 1853
Edwin P. Whipple, Esq, Boston	Tuesday, Feb. 1, 1853
Rev. Theodore Parker, Boston	Tuesday, Feb. 8, 1853
Oliver Wendell Holmes, M.D., Boston	Tuesday, Feb. 15, 1853
Hon. John J. Gilchrist, Charlestown, N. H	Wednesday, Feb. 23, 1853
Hon. John G. Palfrey, Cambridge	Tuesday, Mar. 1, 1853
Rev. Samuel Osgood, New York	Tuesday, Mar. 8, 1853

The first three lectures were given in the Calvinistic Congregational Church, but the remaining nine were delivered in the hall of the new town house, as the following extract from the *Sentinel* of January 7, 1853, shows:

ATHENÆUM LECTURES.—The remaining nine lectures of the course will be in the New Town Hall, which will be first used for that purpose on Tuesday evening, Jan. 11th. A lecture will then be delivered by the HON. HORACE GREELEY, of the New York *Tribune*, and a poem by CHARLES THURBER, ESQ., of Worcester. We anticipate seeing the elegant and spacious hall filled with an audience of the intelligent citizens of the neighboring towns, as well as of our own, to enjoy the rich intellectual treat which may be expected on the occasion.

These anticipations were fully realized, for the audience that evening was the largest of any during the course, numbering about nine hundred and fifty.

That the course of lectures, as a whole, was a success, financially as well as intellectually, is shown by the following, taken from the "First Annual Report of the Board of Directors of the Fitchburg Athenæum."

The average attendance upon the lectures was about 750; the largest number present at any one time was probably 950, which was on the evening of the first lecture in the new Town Hall. About 725 tickets were sold for the whole course, and about 950, in all, for single evenings. The gross proceeds of the lectures amounted to $630.69, the expenses of the course to $411.25, leaving a surplus of $219.44 to be applied to the uses of the Library.

From this same report we also learn that five hundred and fifty books were purchased during the year and about forty-five donated; and these, with the four hundred and thirty-five volumes in the library transferred from the Fitchburg Library Association, made a total of over a thousand volumes, which, thirty-five years ago, might well be considered a very good-sized library.

At any rate, it is certain that the officers and members of the Fitchburg Athenæum had every reason to be fully satisfied with the results of the association's first year of existence.

Lack of space forbids our speaking at greater length of the Athenæum and its work. For several years more it continued in a prosperous condition, and in 1858 had a membership of one hundred and sixty, and a library of about fifteen hundred volumes.

The time was then near at hand for the establishment of a free town library; the Athenæum, as had been the case with the library associations preceding it, had fulfilled its mission and was soon to be absorbed by a library of larger scope and greater permanency.

THE FITCHBURG PUBLIC LIBRARY.—In 1851 the Legislature enacted a law which provided that any town or city, so desiring, might appropriate a sum, not exceeding one dollar for each ratable poll, for the establishment of a free public library.

At the time when preparations were making for the organization of the Athenæum, in 1852, some of the citizens were rather in favor of changing the plan and organizing a town library, as provided for by the statute of the preceding year. There was much uncertainty, however, as to whether the town would vote the money at that time or not, and the idea was not pushed.

By 1859 the town of Fitchburg was ready to take measures to secure a free public library. It must be admitted that Fitchburg was rather slow in taking action on this matter. Our neighbor, Leominster, had a public library some three years before ours was established.

The subject was debated by the citizens of Fitchburg more or less, but no decisively favorable public action was taken in regard to it until the spring of 1859.

The warrant for the annual town-meeting that year was given March 26th, and was the longest warrant since Fitchburg's incorporation. It contained thirty-two articles, the twenty-fifth of which was as follows:

Art. 25.—To see if the Town will appropriate the amount allowed by law for the establishment of a Free Town Library, or act anything thereon.

The sentiment of the citizens seeming to be in favor of establishing a free library, the shareholders of the Athenæum held a meeting March 31, 1859, to consider the expediency of presenting their library to the town. After much discussion it was decided in the negative, by a vote of twenty-five to fourteen.

Annual town-meeting day in 1859 was April 11th. It was a dull, disagreeable day, but as the citizens were more than ordinarily interested in the municipal proceedings, there was a good attendance. Every one of the thirty-two articles was acted upon in the course of the day, and the people doubtless left the town-house with the firm conviction that they had done a good day's work. And so they had; for, by voting "to appropriate the sum authorized by law for the establishment of a Free Town Library" (this sum being one thousand, eight hundred and thirty-one dollars in the case of Fitchburg), they pledged their money and best efforts to found and perpetuate an institution which has proved to be a great blessing, and whose usefulness and value will increase as the years roll on.

At this meeting the citizens also chose the first board of trustees of the Fitchburg Public Library,

consisting of the following gentlemen: Goldsmith F. Bailey, Joseph W. Mansur, Dr. James R. Wellman, Dr. Jabez Fisher, Dr. Thomas R. Boutelle, Thornton K. Ware, Hanson L. Read, Moses G. Lyon and John J. Piper.

May 10, 1859, occurred the annual meeting of the shareholders of the Fitchburg Athenæum; and at this meeting it was voted "to instruct the president and treasurer to sell all the property of the institution, aside from the money in the treasury (about seventy-five dollars), to the town of Fitchburg for four hundred dollars." The town subsequently authorized the purchase of the property for the sum named, and thus came into possession of some sixteen hundred volumes, which made quite a nucleus for the public library. Several members of the Athenæum very generously relinquished their proportion of the sale, to the amount of $166.84, so that the books really cost the town less than two hundred and fifty dollars.

There was also in town another collection of books, about two hundred in number—the Agricultural Library—which the trustees purchased on very favorable terms.

The trustees entered upon their work with zeal. It was decided to continue the library in the room previously occupied by the Athenæum, in the town-house (corresponding closely to the present offices of the city auditor and mayor), and it was somewhat enlarged by the addition of the room adjoining in the rear. Mr. Daniel Stearns, who had been connected with the Athenæum as its secretary, was appointed the first librarian of the public library, and during the summer and autumn of 1859 the books were placed on the shelves and catalogued, new books purchased and all arrangements perfected; and about the middle of November the following notice appeared in the *Sentinel:*

FITCHBURG PUBLIC LIBRARY.

All persons wishing to avail themselves of the privileges of the Fitchburg Public Library are requested to open their accounts at once, as it will be impossible to do so in Library hours after the Rooms are open for the delivery of books.

The Library will be open for the purpose of opening accounts with such as may desire it, until further notice, during the regular Library hours, viz.,—

From 2 to 5 and 7 to 8 P. M. on Tuesdays and Thursdays, and from 2 to 5 and 7 to 9 P. M. on Saturdays, holidays excepted.

☞ Notice will be given of the time of opening for the delivery of books.

D. STEARNS, Librarian.

Fitchburg, Nov. 16, 1859.

The first donation to the library was $100 from Thomas Mack, of the firm of C. F. Hovey & Co., of Boston. Mr. Mack was born in Fitchburg, and has, on several occasions, remembered his native town in a similar manner. This generous sum was used for the purchase of the "Encyclopædia Britannica." Seventy-five volumes were presented by Hon. Eli Thayer, of Worcester, and various citizens of Fitchburg donated books. The trustees purchased 1200 volumes; so that in all there were over 3500 books on the shelves before the library was opened.

By the last of November, 1859, everything was completed, and the following appeared in the *Sentinel:*

THE FITCHBURG PUBLIC LIBRARY will be open for the delivery of books on THURSDAY, Dec. 1, 1859, at 2 o'clock P. M.

D. STEARNS, Librarian.

It is quite evident that the people of the town freely availed themselves of the privileges offered them, for in the *Sentinel* of December 23, 1859, it was stated that during the three weeks that the library had been open, 2775 volumes had been delivered and 1937 returned. Over 1200 persons had opened accounts. It was further stated that the hours were insufficient, and "while the present demand continues" the library would be kept open every evening, except on Sundays and holidays.

The number of books in the library at that time was given as 3783.

Since then the number of volumes has steadily increased, and the figures, at intervals of five years, as given in the Trustees' reports, are 6244 in 1865, 8053 in 1870, 10,676 in 1875, 12,481 in 1880, 16,146 in 1885 and at the present time there are upwards of 19,000 volumes on the shelves in the handsome and commodious Wallace Library and Art Building.

The number of persons taking out books has increased from fourteen hundred and twenty-five in 1860, to about nine thousand in 1888.

Since the founding of the library four catalogues have been issued, viz., in 1859, 1873, 1881 and 1886. The last is in itself quite a large volume. Much time and care were devoted to its preparation by a gentleman skilled in such work, and it is a very complete and accurate catalogue. Supplements have also been printed, in the intervals between the issuing of the catalogues, giving the list of books added from time to time.

As before stated, Daniel Stearns was the first librarian, being appointed to the position by the trustees in November, 1859. The names and terms of service of the librarians succeeding Mr. Stearns are as follows: Benjamin P. Todd, from April, 1861, to April, 1862; John M. Graham, from April 1862, to April, 1865; Charles N. Fessenden, from April, 1865, to September, 1866; Henry Jackson, from September, 1866, to January, 1873; Prescott C. Rice, from January, 1873, to the present time.

The control of the library has, from the beginning, been vested in a board of trustees, chosen annually by the citizens while Fitchburg was a town, and by the mayor and aldermen since the city form of government was adopted. The number of trustees was nine at first, but later was increased to twelve, the present number.

It is worthy of note that one of the present trustees was also a member of the first board chosen in 1859—Judge Thornton K. Ware. Judge Ware has more-

over served as a trustee every year since 1859, save one, from April, 1861, to April, 1862, and since 1875 has been chairman.

In 1861, Rev. William P. Tilden, then pastor of the Unitarian Society here, presented to our library a model of a full-rigged ship of war, of his own construction. It was a fine and very perfect piece of workmanship, and for years occupied a conspicuous and honored place in the library-room. In 1885 it was transferred to the "Relic Room" in the Wallace Library and Art Building, where it continues to attract attention and elicit admiration.

In 1861 the town voted to authorize the trustees to invite the officers and soldiers from this town serving in the army to donate any trophies they might obtain and wish to present to the library for preservation, and in response thereto a number of flags, swords, muskets, shells, etc., were sent by Fitchburg men, and are now to be seen, together with other similar ar icles since contributed (including the elegant sword, sash and belt presented to Colonel Edwin Upton by the enlisted men of the Twenty-fifth Regiment) in the relic room.

A sum of money sufficient for the maintenance and suitable increase of the Fitchburg Public Library has been annually appropriated by the town and city.

Hon. William H. Vose, at the time of his death in 1884, left the sum of one thousand dollars to the city of Fitchburg, the income thereof to be paid annually to the trustees and used "for the purchase of periodicals or other reading matter for the reading-room."

The library remained in the rooms first occupied until the latter part of 1879, when it was removed to more commodious quarters provided for its accommodation in the extension built just previously on the rear of the City Hall building. Here it remained until the summer of 1885, when it was removed to its present elegant and spacious abode in

THE WALLACE LIBRARY AND ART BUILDING.—Early in 1884 one of our most prominent and benevolent citizens, seeing and appreciating the fact that our public library was sorely in need of more ample and fitting accommodations, was prompted by his public-spirited benevolence to make to the city of Fitchburg a most generous proposition.

Before the City Council, in joint convention assembled, on the evening of Tuesday, March 25, 1884, appeared Judge Ware, who said that he was present at the request of Hon. Rodney Wallace, who, before his departure for the South, a few days previous, had left with him the following communication to be presented to the City Council:

To His Honor the Mayor, and the City Council of the City of Fitchburg:

GENTLEMEN:—The subscriber has felt for a long time that a building, with proper appurtenances, for our Public Library here in Fitchburg was much needed and makes the following proposition, viz.:

I propose to convey by proper deed to the city of Fitchburg my lot of land situated at the corner of Main Street and Newton Place, and to expend, with the advice and approval of the Trustees of the Public Library, within the next two years, a sum not less than forty thousand dollars ($40,000) in erecting a building on said lot; said building to be under the care and management of the Board of Trustees of the Public Library for the time being, and to be used for a Free Public Library, Reading Rooms and Art Gallery, and for no other purpose.

And it is understood that the city government, accepting these donations for the above purposes, shall assume and bear the current expenses of said building, grounds and appurtenances, after the Library Building shall have been completed and furnished.

If the above proposition is accepted, I shall proceed to carry out the same as soon as it can conveniently be done.

RODNEY WALLACE.

Fitchburg, March 17, 1884.

This was a most complete and gratifying surprise to the members of the city government, and also to all the citizens of Fitchburg when they learned of it, as they very quickly did.

The following order, introduced by Mayor Davis soon after the reading of the above communication, was unanimously adopted:

Ordered, That the city of Fitchburg accepts the donation of Hon. Rodney Wallace of the lot of land on the corner of Main Street and Newton Place, and the Library building to be erected by him thereon, upon the conditions and in accordance with the terms and provisions contained in his written communication and proposal to the Mayor and City Council; and places on record its profound appreciation of the public spirit and munificence of the donor, and its recognition of the incalculable benefits which will result to his fellow-citizens and their descendants and successors for all time from this noble gift.

On motion of Alderman Joel a committee, consisting of Mayor Davis, Alderman Joel and Councilmen Flaherty and Parkhill, was appointed to prepare a set of resolutions, thanking Mr. Wallace for his munificent gift; and at a subsequent meeting appropriate resolutions, prepared by this committee, were read and placed on the records, and a copy forwarded to Mr. Wallace.

At a meeting of the trustees of the Public Library, held April 7, 1884, a resolution was adopted, expressive of their hearty appreciation of Mr. Wallace's action, and their desire to co-operate, in every way, with the generous donor in carrying out the details of his proposed undertaking; and a committee, consisting of Rev. Philip J. Garrigan, Henry A. Willis and Lewis H. Bradford, was authorized to present a copy to Mr. Wallace.

On the lot of land donated to the city for the library building stood a mansion-house, for many years familiar to our eyes. For a considerable time it was the residence of Dr. Charles W. Wilder, and later of Otis T. Ruggles, Esq. This house was sold at auction May 5, 1884, and soon moved to the lower part of the city.

Work was begun on the foundation of the new library building on June 10, 1884, and from that date to the completion of the edifice, early in the summer of 1885, was continued without intermission, and every portion of the work (which, by the way, was mainly done by Fitchburg mechanics and artisans) was done in a most thorough manner.

The following is a somewhat detailed description of this handsome and substantial building as it stands to-day.

It is built of Trenton pressed brick, with brown

sandstone trimmings and is in the Greek style of architecture. Its frontage on Main Street is seventy-four feet, its depth sixty-five feet, and there is a central front projection, six by twenty-five feet.

The front entrance is approached by a wide walk of pressed brick and a flight of twelve steps of dressed granite, between ornamental buttresses of the same material. The front doors are placed in a recess eleven feet wide and six feet deep. Over this recess is a heavy double arch, supported on either side by two columns of polished red granite with carved capitals. Above the arch are three square-headed, single-light windows and the name of the building in raised letters—the word "WALLACE" above the middle window, and the words, "LIBRARY AND ART BUILDING" just under the three windows. Still above are three circular windows, set in sandstone and round sandstone columns with carved foliage capitals occupying the spaces between the windows. The whole projection is surmounted by a gable with modillion and dentil cornice, all of copper. In the frieze of this cornice is inscribed "1884," the date of erection, with scroll-work either side of the inscription.

In the window over the doors of the main entrance is the city seal, an exquisite piece of work, upon a plate of Venetian and antique glass, of two thicknesses, and five feet in diameter; and in the lower corners of this window are panels of glass emblematic of art and literature.

Passing through the front doors one enters the entrance hall, floored with Italian marble and wainscoted with Italian and Tennessee marbles, relieved by rosettes of French red. The ceiling is handsomely frescoed in oil. This hall is lighted by a large brass chandelier.

From the entrance hall one passes into the waiting-room, which is finished in oak and frescoed in neutral tints. Around the sides are placed oak seats, upholstered in brown leather.

The delivery counter is beneath the arch opening into the main library room. This book-room is twenty-six by seventy feet and sixteen feet in height. It is well filled with neat oaken cases, to hold the many thousand volumes, and at either end of the room are large fire-places of brick, sandstone and marble. Connected with this room, at its southwest corner, is a small room for the librarian's use, and next to that is the elevator, which runs from the basement to the upper story.

On the left of the waiting-room is the room for books of reference, and on the right the reading-room for magazines. Both of these apartments are simply, yet elegantly, finished in oak, handsomely frescoed, and contain large fire-places. All the furniture is of oak. Connected with, and in front of, the reference-room is a small, well-furnished apartment for the use of the assistant librarian.

Returning to the entrance hall, one sees, on the east side, two staircases,—one leading downward to the basement, where is located the public reading-room, which is furnished with a large number of daily and weekly newspapers. In the basement are also the boiler-room and two large apartments used for working-rooms and storage purposes. The other staircase leads upward to the Art Gallery, and is made entirely of marble in the same style as the entrance hall.

Ascending this really palatial stairway, one comes to the upper vestibule, whose high, arched ceiling is most artistically and elegantly frescoed. It is lighted by a magnificent chandelier, of eight burners, made of brass, copper and oxidized silver.

On the right of the vestibule is the Trustees' Room, which is handsomely frescoed, carpeted, finished in mahogany and heated by an open fire-place. All the furniture in this room is of mahogany. Adjoining it is a toilet-room for the use of the trustees.

From the vestibule a door leads directly into the Art Gallery, a room thirty-three by forty-four feet, and thirty-two feet in height. It is lighted entirely from above by corrugated glass panels in the ceiling and windows of the same glass on the four sides of the monitor roof.

The wood-work of the ceiling is frescoed in dark olive and bronze, and the general effect of the cove beneath is a gold scroll upon a light blue background. In the cove are four large paintings, one on each side of the room—"Apollo Musagetes," "Old Masters," "Arts and Sciences" and "Modern Art."

The fresco painting of this room is of the pure German Renaissance style, and is remarkably rich and harmonious in color effect. The dado is a dark olive, relieved by a band of gilt, and the walls for the oil paintings are a Pompeiian red, surmounted by a frieze of rich color and handsome design. Upon these walls already hang thirteen large and valuable oil paintings, the works of well-known artists. These were all presented to the Art Gallery, most of the donors being citizens of Fitchburg. Two were presented by Thomas Mack, Esq., of Boston, and one each by the late Robert Graves, Esq., of New York, W. G. Beaman, the artist, of Boston and R. Lovewell, the artist, of Chelsea.

At the sides and in the rear of the Art Gallery are four smaller rooms. The west room is devoted to photographs, and contains a valuable collection of about three hundred photographic copies of works of art in European galleries, selected for the library some years ago, by Miss Eleanor A. Norcross, a set of fifty photographic copies of works of art in the Corcoran Art Gallery, Washington, D. C., presented by the Corcoran Art Gallery, beside other photographs that have been purchased or presented.

The east room is devoted to engravings and water colors, and is already quite well filled with works of various artists. Among the many pictures in this room may be mentioned an "artist's proof" engrav-

ing, "The Jersey Beauties," by Douglass, presented by Henry Hale, Esq., of New York; a water color, "Gathering Sea Weed, Pacific Coast," by F. A. McClure, presented by Dr. D. B. Whittier, of Fitchburg; and a pastel, "Woodland Solitude," by our own townsman, Mr. E. H. Rogers, presented by Hon. Rodney Wallace, who is also the donor of many of the paintings, pictures, etc., that adorn the walls in various portions of the library building.

Of the two rooms in the rear of the Art Gallery, one is used for the exhibition of drawings and other art work by the pupils in our public schools, of which a very creditable display may now be seen there, and the other is the "Relic Room," filled with interesting and valuable antiquities and curiosities, collections of minerals, coins, etc., all of which have been donated.

The works of art, relics, etc., in the Art Gallery and the rooms adjoining are worthy of a much more extended description than is allowed by the limits of this history.

All these rooms are open to the public on Wednesday and Saturday afternoons, and are much frequented and enjoyed by our citizens, as well as by strangers visiting the city.

The library is open for the delivery of books from 9 A.M. to 9 P.M. every week-day, and the reading-rooms are open during the same hours, and also Sunday afternoons.

The present librarian, Mr. Prescott C. Rice, has held the position since January 1, 1873, and is aided efficiently by two assistants, Miss Florence R. Dwinnell, assistant librarian, and Mr. George E. Nutting.

The Wallace Library and Art Building was dedicated July 1, 1885. The main library room (the book-cases and delivery counter not being at that time placed in position) was used for the exercises, which were attended by a large assemblage of invited guests and citizens of Fitchburg. Mayor Alonzo Davis presided.

Rev. S. L. Blake, D.D., pastor of the Calvinistic Congregational Society, invoked the divine blessing, after which Mr. Wallace formally presented the building to the City Council in the following words:

Mr. Mayor and Gentlemen of the City Council:

In March, 1884, I made to your honorable board a proposition as follows:

To convey to the city, by deed, this lot of land and, with the advice and approval of the Trustees of the Public Library, to expend, within two years, not less than forty thousand dollars in erecting a building on said lot, to be under the management of the Trustees for the time being, and used for a Free Public Library, Reading Rooms and an Art Gallery, and for no other purpose. The City Government in accepting this shall assume and bear the current expenses of the same.

All this was accepted with the kindest expressions.

Plans were prepared and received the approval of the Trustees, and June 10th work was commenced upon the foundations of this building. The best materials of all kinds were selected, the best mechanics employed, and more faithful service could not have been rendered had each man employed been the sole owner of the building.

Our best thoughts have been given to have the building adapted to the purposes for which it was intended, and I have found pleasure in giving it my personal attention. No pains or expense have been spared to make the building first-class in all respects, and it is nearly or quite fire-proof.

Cost of building	$70,000
Cost of furniture	2,000
Cost of land	12,500
Total	$84,500

In the hands of the City Government and under the management of the Trustees, I have perfect confidence that the building will be well cared for, and, as a home for the Library, Works of Art and Free Reading Rooms, it will be of increasing value to our people. With pleasure and the most earnest wish that to many of our people these rooms may prove to be a place of rest and profit, and help make the journey of life more pleasant and useful, I now present to you the deed of this property and keys of the building.

Mayor Davis, in receiving, as the representative of the city, the deed and keys, responded thus:

Mr. Wallace: The city council, in behalf of the citizens of Fitchburg, accept your munificent gift and return their sincere and heartfelt thanks. You have more than fulfilled your promises to the council in March, 1884. Through your great generosity this community will attain higher degrees of moral and mental worth. May your life be spared many years to witness the noble results you desire.

Ex-Governor John D. Long then delivered an eloquent and impressive dedicatory address, the original manuscript of which is now in the "Relic Room."

Mr. Ray Greene Huling, principal of the Fitchburg High School, then read a poem written for the occasion by Mrs. Caroline A. Mason.

Remarks were then made by Hon. Henry B. Peirce, Secretary of State, representing the Commonwealth.

Interesting addresses followed, given by Judge William S. Shurtleff, of Springfield; George E. Towne, Esq., of Boston; and Professor Henry M. Tyler, of Northampton.

This closed the exercises, which were interspersed with choice musical selections, rendered by the Russell orchestra.

The day of the dedication of this beautiful and valuable building will ever be regarded as among the most memorable in the history of Fitchburg.

CHAPTER XLIII.

FITCHBURG—(*Continued.*)

MANUFACTURING.

FITCHBURG has for many years been a manufacturing place of considerable note, and the varied products of her mills, factories and great machine-shops have to-day a reputation which, in many cases, is by no means limited to the United States.

The origin of all these industries, of which our city is now so justly proud, can be traced back to that unmitigated nuisance of the early settlers of the town, the north branch of the Nashua; and to Amos and Ephraim Kimball, who had the temerity, in 1750, to build a dam across this obnoxious stream, belongs the honor of being the pioneer manufacturers of what is now Fitchburg.

They built this dam just above the location of the present "Stone Mill" dam. At first it was frequently

carried off by freshets, but in a few years a more substantial dam was built of logs and V-shaped. Here the Kimballs erected a saw and grist-mill, which was in operation for many years thereafter.

It was forty-four years before a second attempt was made to build a dam across the stream, and one of the daring Kimball family had a hand in the building of it.

In 1794 the son of Ephraim Kimball (who was also named Ephraim) and Jonas Marshall built the second dam, near the present site of the Pitts Mill, on West Main Street, and erected on this water privilege a saw-mill, and soon afterward clothiers' works and a trip-hammer were built a few rods below it.

Soon after the close of the Revolutionary War a fulling-mill and clothiers' works, a carding-machine and works for grinding scythes were established on the water privilege of the elder Kimball.

No further attempt was made during the rest of the century to utilize the water power, and the above-named concerns seem to have constituted the "manufacturing establishments" of Fitchburg up to the year 1804. In that year the third dam was built, and will be spoken of under "paper manufacture."

This was certainly a very small beginning, but it taught the people here that possibly the river was good for something after all, and that they might make it do enough work for them to pay for all the bridges it had carried away.

Cotton Manufacturing.—In 1807 there was another Ephraim Kimball (this time a grandson of the first Ephraim) on hand to build a dam, which was the fourth, across the river. On this site was erected a cotton-factory, now a part of the brick mill in Factory Square.

This was the third cotton-factory erected in the State, and was built and operated by a company of about thirty persons, including the workmen, who were obliged to take shares. The building was of brick, and thirty by sixty feet in size.

For a time the company did not prosper, but in a few years improved machinery was put in, and the business began to be lucrative. Unfortunately, however, the company had neglected to secure a proper title to the whole dam, and trouble soon began. The builder of the dam owned the land on the opposite side of the stream, and the line between his property and that of the company ran in the middle of the river. He had lost money in building the dam and demanded four hundred dollars of the company to cover his loss. No notice was taken of this demand, whereupon he informed the company that half of the dam belonged to him, and offered to sell it to them for twelve hundred dollars. This offer being refused, he sold a part of the land and the title to his half of the dam to sundry persons, who immediately began to erect works on the bank across the stream. They freely used the water, and finally cut away their half of the dam. The cotton company, then in the enjoyment of a prosperous business, had to suspend operations, and became involved in a lawsuit, which was finally decided against them, with heavy damages.

The result of all this was that in 1816 the company failed, and the property was sold for about one-third of its value to Messrs. Putnam & Perkins, who operated it as a cotton factory until 1822, when they sold it to Messrs. Town & Willis, who converted it into a woolen-mill; and its history as such for the following sixty-five years will be given under woolen manufacture.

In 1887 the Parkhill Manufacturing Company purchased the property, enlarged the building and put in cotton machinery, thus restoring to the first cotton factory built in Fitchburg its original industry.

The second attempt at cotton manufacture in this town was made by Captain Martin Newton, in 1810, in a small building near the site of the present "Stone Mill." He succeeded so well that in 1812, with Solomon Strong and Jonathan Flint, he built a cotton factory on what was afterwards called Newton's Lane. Here cotton manufacture was profitably carried on for over a quarter of a century. Later the building became a part of the Atherton estate, and was used for manufacturing of various kinds. It is now owned by the Putnam Machine Company.

The "Red" or "Rollstone" Mill was built in 1813 by John and Joseph Farwell and Nehemiah Giles, on the site of the Kimball & Marshall saw-mill, previously mentioned. Cotton cloth was made here.

In 1816 the mill was bought by Putnam & Perkins, who soon sold it to General Ivers Jewett, who, in 1833, sold it to Town & Willis. This firm continued the manufacture of cotton goods in this mill, and in 1834 secured Mr. Levi Sherwin to manage the business. Mr. Sherwin bought one-quarter interest in the mill in 1843, and the other three-quarters in 1857. In 1867, after having had the active management of the mill for thirty-three years, Mr. Sherwin sold it to Mr. Hiram W. Pitts, of Leominster.

Mr. Pitts built the present substantial brick mill to take its place in 1876. He died a few years ago, and, since 1882, his son, Mr. B. M. Pitts, has operated the factory, which is known as the Fitchburg Cotton Mill, or, perhaps, better as the Pitts Mill.

Cotton and carpet warps, batting, twine, etc., are produced. There are five buildings, the largest being the brick structure erected in 1876, which is fifty by one hundred feet and three stories high. It is well equipped with machinery, which is run mainly by water-power; but there is steam-power in readiness to use when the water is too low to be of service.

The cotton-mill built on Phillips' Brook, about 1815, was afterward operated by Perkins & Baldwin. It was swept away in 1850 by the flood caused by the giving way of the Ashburnham reservoir.

Just above Perkins & Baldwin's factory a small cotton-mill was built by Colonel Ivers Phillips about

1845. It was soon converted into a flannel-mill, and, in 1850, was swept away by the flood. It was rebuilt and burnt in 1852. Soon afterwards a mill was erected on the same site, and used by Colonel Phillips for the manufacture of hosiery, etc., and, since 1861, has been operated as a woolen-mill by various parties.

The "Stone Mill," on Laurel Street, was built by Oliver Fox, in 1826. It was operated as a cotton-mill for a time by Mr. Fox, but he soon leased it to Percy Atherton; still later it was run by other persons and used continuously as a cotton-mill until 1868, when it was purchased by Joseph Cushing, who has since operated it as a flour and grain-mill and elevator.

A curious fact in relation to the construction of this massive building is, that no derrick was used to place the huge blocks of granite in position. The blocks were all hauled up an inclined plane by oxen.

The Fitchburg Duck Mill in South Fitchburg, now owned by David Nevins, was built about 1848, and was formerly the property of George Blackburn & Co. Cotton duck is made here and the salesrooms are in Boston.

The Parkhill Manufacturing Company is by far the largest cotton manufacturing establishment in town.

In the autumn of 1879 John Parkhill, Arthur H. Lowe and Thomas R. B. Dole formed a partnership and purchased the building long owned and operated by the late Hon. Alonzo Davis as a chair shop. The firm put in thirty looms, and began the weaving of colored cotton goods in February, 1880.

In 1882 the firm was dissolved, and the Parkhill Manufacturing Company incorporated with a capital of one hundred thousand dollars. Since then their business has enlarged wonderfully. In 1882 an addition, one hundred and thirty-five by thirty-five feet, and two stories high, was built; in 1883 a third story was added; during the next two years another building, one hundred and fifty by fifty-five feet, three stories high, and a new engine-house were built; in 1887 a new dye-house, one hundred and forty by fifty-five feet, two stories high, and an immense steam chimney were put up, and the factory of the Fitchburg Woolen Mill Company purchased, as has been previously stated.

This thriving company, of which John Parkhill is president and Arthur H. Lowe treasurer, now operates about one thousand looms, employs about five hundred hands and produces something like nine million yards of cloth annually. The *Toile du Nord* goods made here have a justly celebrated reputation.

Early in 1888 the company built a causeway from their Circle Street mills across the pond to Rollstone Street, the intention being to fill up most of the pond, and utilize the made land, as the interests of the company may indicate.

The success of this corporation caused the starting of the two following important cotton-mills in Fitchburg.

The Cleghorn Mills, incorporated in 1885 with a capital of one hundred thousand dollars, are located near River Street, and include a brick building, one hundred and seventy by sixty feet, and four stories high, and an annex of wood of the same dimensions, two stories high.

These mills went into operation in December, 1885, employ over two hundred hands and produce fine dress goods. Andrew Cleghorn is president and A. H. Lowe treasurer.

The Orswell Mill, the latest addition to the cotton industries of Fitchburg, was incorporated in 1886 with a capital of two hundred and twenty-five thousand dollars. The mill was built in 1886, and is three hundred and forty-six by seventy-eight feet, and four stories high. It has a capacity of twenty thousand spindles, is now in full operation, and produces a fine quality of cotton yarn. Warren M. Orswell is president and manager and Walter F. Stiles, treasurer.

Woolen Manufacture.—This was early begun here, though in a small way. In 1793 Ephraim Kimball had a carding-machine and fulling-mill near his saw and grist-mill, and close by were clothiers' works, where cloth was dyed, fulled and sheared.

The first woolen-mill put into operation here was the brick building, which, as before stated, was originally a cotton-factory, and was converted into a woolen-mill in 1822.

The following concise history of this enterprise, written just previous to his death, in 1884, by Hon. William H. Vose, for thirty-five years manager, and for many years treasurer of the company, is well worth preserving here:

In 1822 Samuel Willis and Abial J. Town purchased the Brick Cotton-mill in the centre of the then village of Fitchburg, and founded what has ever since been known as the Fitchburg Woolen-Mill. They furnished it with two sets of cards and the necessary looms, spinning jennies and finishing machinery for the manufacture of cassimeres made exclusively from fine wool. Subsequently Paul Farnum and Daniel Kimball (commission merchants of Boston) became owners in part, Abial J. Town, Samuel Willis, Paul Farnum and Daniel Kimball constituting the Company, and having an equal interest in the business.

In 1834, the mill and machinery having been injured to some extent by fire, an addition was made to the main building, other necessary buildings erected, the water-power improved by a new dam and the capacity of the mill increased to three sets of narrow cards with Goulding's improved Condensers and Spinning-Jacks, whereby the process of first carding the wool into *rolls* and then converting the rolls into *roping*, on what was called a *Billy*, was dispensed with, and the wool was taken from the Condenser to the Jacks, without any intervening process, and spun into yarn.

The improvements in woolen machinery by Goulding marked an era in the progress of the manufacture of woolens in New England.

The writer was employed in this mill in 1828–29 as a spinner on a Jenny of 80 spindles. The yarn was wound (as spun) on the spindles in "cops," and then "warped" on "warping-bars," consisting of a wood frame with pins in the sides, or posts, on which the female operatives extended the yarn by passing to and fro as many times, and using as many pins as would give the required length to the warp, after which the warp was "sized" in a tub and drawn through a metal tube by hand to press the sizing out, and then stretched out in the sun, or in a warm room, to dry, and was then ready to be drawn into the harness and reed for the loom.

Later this primitive process has been superseded by the "Dresser," as now practised, by which the yarn is warped, sized and dried by one continuous process.

After the enlargement of the mill in 1834 the proprietorship continued unchanged until the death of Mr. Willis, in 1843, when the interest belonging to his estate was purchased by Porter Piper, and the interest of Paul Farnum was bought by William B. Towne. The Company, as thus constituted, continued until 1848, when the interest of Porter Piper was bought by William H. Vose, the present treasurer and manager. William B. Towne died in 1853, when Roby R. Safford became the owner of the one-fourth belonging to his estate. In 1855 Abial J. Town, the senior member, and one of the pioneers of the Company, died, and his interest was purchased by Daniel Kimball and William H. Vose, two of the surviving partners.

In 1860 Daniel Kimball and William H. Vose bought the interest of R. R. Safford, and became sole owners.

In 1864 Daniel Kimball sold one-half of his interest to two of his sons, Daniel Kimball, Jr., and Herbert W. Kimball; and William H. Vose sold one-half of his to his only son, George F. Vose, and the ownership became as follows, viz.: Daniel Kimball, one-fourth; William H. Vose, one-fourth; Daniel Kimball, Jr., one-eighth; George F. Vose, one-fourth; Herbert W. Kimball, one-eighth.

In 1861–62 the mill was enlarged and new machinery put in, increasing its capacity to five sets, and other improvements added, materially increasing its capacity and value.

In 1866 William H. and George F. Vose purchased the several interests of the Kimball family and became sole owners.

In 1867 George F. Vose died and his interest was purchased by Rodney Wallace, Rufus S. Frost and Paul R. Hazeltine, and the ownership became as follows: William H. Vose, one-half; Rufus S. Frost, one-eighth; Rodney Wallace, one-fourth; Paul R. Hazeltine, one-eighth.

Paul R. Hazeltine died in 1878 and William H. Vose purchased the interest of his estate in the Company, making the several interests in the following proportions, viz.: William H. Vose, five-eighths; Rodney Wallace, one-quarter; Rufus S. Frost, one-eighth.

The Company has never, from the outset, failed to meet every obligation; has always maintained a high reputation for the character of its goods—having never used any cotton, shoddy or flocks in them—and for integrity and honorable dealing. Its members have been prominent amongst the business men of the community, connected with its financial institutions, and most of them honored, at various times, with positions of public trust and responsibility.

The invariable and continued success of the Company affords an example of what may be accomplished by careful, prudent and economical management of a comparatively small mill, with constant supervision of the details of its business, without making haste to be rich.

After Mr. Vose's death the mill was managed for a year by his grandson, William V. Lowe, who was succeeded by Mr. Marcien Jenks, and in 1887 the property was sold to the Parkhill Manufacturing Company.

In 1823 a brick mill was built by Tyler, Daniels & Co., near the location of the present mill of the George W. Wheelwright Paper Company. It was later owned by various parties, who operated it as a woolen-mill. Samuel Slater, a noted mill-owner in those days, purchased it about 1830, and although, on account of his death soon after, it was in his possession but a short time, it was for many years thereafter known as the "Slater Mill." It was pulled down some twenty-five years ago. Hon. Joseph W. Mansur, one of the prominent men of Fitchburg thirty years ago, was one of its latest owners and occupants.

In 1832 Hollis Hartshorn built a brick woolen-mill, nearly half a mile below the Slater mill. It was in operation for only a few years, being burnt in 1836.

Between 1861 and 1865 four woolen manufacturing concerns were started here, all in the westerly part of the town. Two of them were in Rockville and located on Phillips' Brook. One was the hosiery-mill previously spoken of as belonging to Col. Ivers Phillips. In 1861 it was fitted up as a woolen-mill, and has since been run as such by various individuals. It has been enlarged and additional buildings have been erected For some years the plant has been known as the Berwick Mills, and is operated by James McTaggart, Jr. The mills consist of three buildings, the main one being of brick and wood, forty by one hundred feet, and three stories high, and equipped with suitable machinery. It is run by water-power, but steam-power is in readiness to use if the water gets too low.

During the summer of 1888 Mr. McTaggart erected, close by the mills, a fine brick building, forty by fifty feet, to be used for a spinning room, and put into it three new Bassett & Jones operators.

The mill just below this was for some time occupied by Whitman & Miles, but in 1863 was converted into a woolen-mill. It became known as the Baltic Mill, and was for some years operated by James Phillips, Jr. In January, 1886, James McTaggart, Jr., acquired possession of it, and ran it in connection with the Berwick Mills. During the summer of 1888, however, it was not running.

In 1864 Alvah Crocker, Charles T. Crocker, George F. Fay and others built a woolen-mill near the junction of Westminster and Sanborn Roads, in West Fitchburg, to which the name of Beoli Mill was given.

In 1865 Jeremiah Booth & Co. began the manufacture of woolen goods in a brick mill on West Street, and continued there about ten years.

The only woolen manufacturers now doing business here are James Phillips, Jr., and James McTaggart, Jr. Of the mills operated by the latter we have already spoken.

Mr. Phillips ranks among the heavy woolen manufacturers of New England. He began business about 1872, in partnership with Edward M. Rockwell.

In 1872 Messrs. Rockwell & Phillips purchased the Beoli Mill, which at that time contained but twelve looms. In 1875 Mr. Phillips became the sole owner, and since then the business has increased vastly, and the greatly enlarged mills, which are now widely known as the Wachusett Mills, contain 150 broad looms, give employment to some 400 hands and produce worsted coatings and suitings of well known excellence, to the value of over $1,000,000 annually.

For some years he operated the Baltic Mill, as has been before stated.

About 1875 Mr. Phillips began to run the mill previously occupied by J. Booth & Co. It was known as the Booth Worsted Company until 1882, when the Star Worsted Company was organized with a capital of fifty thousand dollars—James Phillips, Jr., president, and George N. Proctor, treasurer. This com-

pany has since continued to run the same mill on West Street—now known as the Star Worsted Mill. Worsted yarn is here made to the value of about four hundred thousand dollars annually, all of which is used by the Wachusett Mills and the Fitchburg Worsted Company. The Star Mill gives employment to one hundred and twenty-five hands.

The Fitchburg Worsted Company was incorporated in 1880 with a capital of two hundred and fifty thousand dollars—James Phillips, Jr., president, and George N. Proctor, treasurer. The brick mill in South Fitchburg, formerly owned by George Blackburn & Co., was purchased and enlarged, and has since been used by this company for the manufacture of fine worsted suitings. The mill contains two hundred and fifty narrow looms and employs nearly four hundred operatives. The value of the annual product is about one million dollars.

The cloth made at the Wachusett Mills and the Fitchburg Worsted Company's mill is all of high grade, and is considered equal to any manufactured in the United States.

The goods made at the Berwick Mills, operated by James McTaggart, Jr., are likewise of excellent quality, and embrace a fine line of fancy cassimeres for men's wear.

CHAIR MANUFACTURING.—This industry was begun here about 1816, by Levi Pratt. He built two dams on Sand Hill Brook, and at the northerly dam erected a saw-mill, and at the southerly a small shop for the manufacture of chairs. This shop was on the present easterly portion of the Pratt Road, near the house where Andrew Pratt now lives. In this shop and in a larger one, built in 1833, he made chairs for over thirty years.

John D. Pratt, afterward in company with Alonzo Davis, manufactured chairs here at an early period, his shop being located at the old Punch Brook Dam, near Academy Street.

In 1845 Alonzo Davis came to Fitchburg, and in company with Augustus Rice began the manufacture of chairs in Newton's Lane. The business was soon removed to the "Newton Factory," adjoining. Mr. Rice retired from the firm and John D. Pratt and Hiram Wood became partners with Mr. Davis. Still later this firm was dissolved and Mr. Davis formed a partnership with Mr. Pratt's sons, Henry T. and Charles E. Pratt.

In 1855 increase of business necessitated the construction of a new factory, which the firm built on what was known as "Tuttle's Flat." It was of brick, one hundred and fifty by forty feet, and four stories high. Here, the firm of A. Davis & Co. carried on the chair business until 1864, when Mr. Davis became sole proprietor. He continued the business until 1877, when the depression in trade made it unprofitable, and he closed the concern, which, till then, had been a source of profit to himself and a credit to the manufacturing interests of Fitchburg. In 1879 he sold the property to the Parkhill Manufacturing Company.

At this time there is but one corporation engaged in this industry here—the Walter Heywood Chair Manufacturing Company. This is a representative establishment, one of the largest in the country and widely known in foreign lands.

The founder of this company was Walter Heywood, who came to Fitchburg in 1841. In company with Leander P. Comee he built the Heywood & Comee block, and for a time the firm dealt in dry goods and groceries in the store now occupied by Leander Sprague & Co.

In 1844 the firm hired a part of the "Red Mill" on West Street, and began to make chairs. Ten hands were employed at first. The business increased, and two years later was removed to the upper portion of Alvah Crocker's building just erected on the site now occupied by the Fitchburg Steam Engine Company's shop.

December 7, 1849, this building was entirely destroyed by fire, and soon afterward the firm of Heywood & Comee was dissolved.

Mr. Heywood, by no means dismayed, secured temporary accommodations for the business; and as soon as Mr. Crocker completed the erection of a new building, one hundred and thirty by forty feet, three stories high, on the site of the one burned, he hired the whole of it. The business prospered, and in 1852 Messrs. Alton Blodgett, Lovell Williams and George E. Towne were admitted as partners; and soon afterward the firm leased land belonging to Mr. Crocker, in the rear of the chair-shop, and erected two large buildings thereon.

In 1856 a foreign trade was opened, which, later, extended to nearly every country in the world.

In 1864 George H. Spencer was admitted as a partner.

May 31, 1869, the Walter Heywood Chair Company, with a capital of $240,000, was organized as a stock company, under a special act of the Legislature.

The prosperity of the new company was, however, doomed, in the near future, to meet with a serious check. On the night of July 21, 1870, a fire broke out, which proved to be the most disastrous and costly in the history of Fitchburg, even up to the present time. By it was laid in ruins the entire establishment of this company, as well as several other buildings. The property loss amounted to over $120,000, of which $90,000 fell on the Walter Heywood Chair Company. Their insurance was $52,500.

This was a severe, but by no means a fatal, blow. Very soon after the fire the members of the company began to look about for a new site, and shortly purchased some nine acres of land on River Street, where the erection of the present commodious and well-appointed buildings was immediately entered upon and prosecuted with vigor.

The plant consists of three large main buildings of

brick, two stories high, with an attic. Two of these structures are each three hundred feet long and fifty feet wide, and the third is the same length, but ten feet narrower. All of them are located on the westerly side of River Street, ranging one behind another. Some three hundred men are employed in these shops.

There is also a handsome brick building, just north of the shops, used for office purposes, besides numerous lumber sheds, stock-houses, etc. A railroad track, a quarter of a mile long, owned by the company, connects their premises with the main line of the Hoosac Tunnel Route.

The company also own mills in Barton, Vt., where chair stock is prepared.

This corporation successfully weathered the long-continued depression in trade which began soon after the new buildings were occupied, and at the present time has a large and firmly-established business.

In 1874 Mr. Towne sold his interest to Hiram A. Blood.

The founder, Walter Heywood, died in 1880, and, in order to settle Mr. Heywood's estate, the company, in 1885, sold out to a new corporation, composed of the surviving members of the old company, known as the Walter Heywood Chair Manufacturing Company, which company carries on the business at the present time, Lovell Williams being the president and George H. Spencer, superintendent and treasurer.

Soon after 10 o'clock on the night of April 6, 1888, fire broke out in the shop next to River Street, the eastern of the three main buildings, and for a time threatened to outrival the fire of 1870. The building was used as a paint and varnish-shop, and burnt fast and furiously; and but for the heroic exertions of the entire Fitchburg Fire Department and the aid of a strong west wind, which blew the flames away from the other two huge buildings close behind it, the entire establishment would have been destroyed. As it was, the paint-shop was mainly destroyed, the loss being twenty-five thousand dollars. It was rebuilt of its former dimensions during the summer of 1888.

FURNITURE MANUFACTURING.—In connection with chair-making comes very naturally the manufacture of furniture.

Fitchburg has but one establishment devoted to this industry exclusively. The business is conducted by Carmi M. Parker, under the name of Parker & Co. Mr. Parker began the manufacture of furniture in Merrimac, N. H., and in 1880 came to Fitchburg, where he has since carried on the same business in a large factory, formerly occupied by the American Rattan Company, in Newton Place.

The machinery is run by steam, and about forty hands are employed, most of whom are skilled workmen. House and office furniture is here manufactured from the various ornamental and durable woods, and is of excellent quality and finish. Mr. Parker has a salesroom, under the name of the Fitchburg Furniture Company, on Main Street.

Mr. Parker has already built up a thriving business, and his factory has made a place for itself among the longer established manufacturing interests of the city.

Furniture is made to some extent by Mial Davis, at his North Street mills; and the Charles A. Priest Lumber Company make the manufacture of school furniture one of their specialties, at their factory on Rollstone Street.

SHOE MANUFACTURING.—Shoes have, of course, been made here on a small scale since the earliest period of our history as a town.

The first individual, however, to use machinery in the manufacture of shoes in Fitchburg was Elijah M. Dickinson. He began to make them by hand in Marlboro' in 1842. Twelve years later he removed to Fitchburg, and continued the business in a shop at the corner of Main and Laurel Streets. He soon removed to a shop that he built on Oliver Street. Here he remained about six years, when, needing more room for his increasing business, he hired the factory in Newton's Lane, formerly the property of Captain Martin Newton, but then owned by Shepard F. Atherton.

Here he first began to use machinery, and soon built up a flourishing business, and after remaining in this factory for some ten years, he moved into a building on Summer Street, owned by the Simonds Manufacturing Company.

During the last few years of his stay in Newton's Lane, Mr. Dickinson was in partnership with Henry D. Goodale, the firm-name being E. M. Dickinson & Co. Nathaniel Corning succeeded Mr. Goodale as partner about the time of the removal of the business to Summer Street. In 1876 Edgar F. Belding succeeded Mr. Corning, the firm-name remaining E. M. Dickinson & Co. This partnership continued some eight years, during which the firm, in 1881, erected the present substantial brick factory on the corner of Main and North Streets. The firm of E. M. Dickinson & Co., as at present constituted, consists of Mr. Dickinson and his son, Charles P. Dickinson, who has been associated with his father since about 1878.

The firm manufactures a fine grade of misses' and children's shoes, and employs about one hundred and twenty-five hands. The capacity of the factory is one thousand five hundred pairs per day, and the firm's trade is largely in the West and Northwest.

The Sole-Leather Tip Company, located in this building, is also owned and operated by this firm. Several million pairs of sole-leather tips are annually produced by this company, which are purchased by shoe manufacturers all over the United States and in Canada.

Mr. Edgar F. Belding, formerly a partner with Mr.

Dickinson, began to manufacture shoes on his own account in November, 1885. His business is carried on in the name of E. F. Belding & Co., and occupies the two upper floors of the Fitchburg Steam Engine Company's building. Children's and misses' shoes of a fine grade are here made at the rate of seven hundred pairs per day, and employment is furnished for some eighty hands.

Mr. Belding intends soon to erect a new factory which will double his present capacity and afford better facilities for carrying on his rapidly increasing business.

He was one of the first to make and introduce sole-leather tips, and in 1884 the Fitchburg Sole-Leather Tip Company was incorporated with a capital of thirty thousand dollars, Henry A. Willis being president and E. F. Belding, treasurer and manager. The company does an extensive business in this line, selling their sole-leather tips for children's, misses' and youths' shoes to many of the leading shoe manufacturers of this country. The company owns valuable patented machinery expressly designed for the manufacture of these tips.

Paper Manufacturing.—This has been and still is one of the two largest industries of Fitchburg.

The first paper-mill in town was built by Thomas French in 1804, and stood on the site now occupied by the Rollstone Machine Co.'s works on Water Street. Mr. French also built a dam across the stream at this point. It was the third dam and was constructed in 1804.

General Leonard Burbank was the owner of the mill, which went into operation in 1805; and as long as it remained standing it was known as the Burbank Paper Mill, though it was afterward owned by Crocker & Gardner and still later by Alvah Crocker. For over twenty years it was the only paper-mill in town.

Alvah Crocker was the founder of the paper-making industry here, though he did not build his first mill until 1826. This mill was erected in what was then a swamp, difficult of access, as there was at that time no road along the river. It occupied the site of Rodney Wallace's present middle mill. Mr. Crocker expended considerable money on this spot, the dam alone costing fifteen hundred dollars; and in addition to the natural disadvantages of the place, he had other great difficulties to contend with.

Soon after his mill was built it was badly damaged by a freshet, and before long, to keep up with the times, he had to change from hand-labor to machinery, involving an expense of some ten thousand dollars. He was owing several thousand dollars on his original investment in the dam and mill, and to cap the climax, the commission house in Boston that had taken his paper in exchange for rags, chemicals, etc., informed him that he was in debt to them some four thousand dollars, and refused him further credit.

With his characteristic indomitable pluck, Mr. Crocker worked day and night, opened separate accounts with his paper customers and exerted himself to the utmost to pay his debts, both principal and interest. The success of his arduous toil is well known.

Mr. Crocker was a true business man in every sense of the word—honest, clear-headed and possessed of great foresight. The majority of so-called business men do not look beyond their own particular line of business, and the advancement of their own interests.

Fitchburg has been blessed in the past, and is blessed at the present time, with some men who have broader views—who see that whatever advances the public good will be sure, sooner or later, to help them also. Among such the name of Alvah Crocker stands out prominently, and will be long remembered.

As an instance of his way of doing, the following is worthy of preservation. In 1834 the town of Fitchburg employed Mr. Crocker to secure a road along the Nashua River to the Westminster line. The landholders on the route of the proposed road refused to part with their land on terms which Mr. Crocker considered just and favorable to the interests of the town. He therefore bought the whole strip of land along the river to the Westminster line himself, and gave to the town what was needed for the Westminster river road. He did this at considerable personal expense, both of money and time, but it proved to be the basis of his financial success, for since then most of the paper-mills of Crocker, Burbank & Co., have been built on this land.

The building of the Fitchburg Railroad is another example of his far-seeing sagacity.

In 1851 Gardner S. Burbank came to Fitchburg, and went into partnership with Mr. Crocker, thus founding the well-known firm of Crocker, Burbank & Co. Charles T. Crocker was admitted to the firm in 1855, and George F. Fay and Samuel E. Crocker in 1863. Mr. Burbank retired from the firm in 1866, and in 1874 Alvah Crocker died. The business was carried on by the surviving members, under the same firm-name, until about 1879, when two new members were admitted—George H. Crocker, son of Samuel E. Crocker, and Alvah Crocker, son of Charles T. Crocker.

Since 1872 the office of the firm has been in the brick building formerly occupied by the Fitchburg National Bank.

During the first twenty years of its existence this firm acquired the control of a number of large paper-mills, of which the following, taken from Mr. Eben Bailey's sketch of Fitchburg in the "History of Worcester County," published in 1879, is a brief history:

The Snow Mill, or Upper Mill, was built in 1839 by Samuel S. Crocker. Benjamin Snow, Jr., bought it in 1847, and Benjamin Snow, Jr., and Samuel Whitney sold it in 1862 to Crocker, Burbank & Co. The Cascade Mill was built about 1847. It was owned in that year by Samuel A. Wheeler, George Brown and Joel Davis. It was afterward bought by Franklin Wyman, E. B. Tileston and Jonathan Ware, who sold it to Crocker, Burbank & Co. in 1863. The Upton Mill, on the road

to William Woodbury's, was built in 1851 by Edwin Upton and Alvah Crocker, and came into the possession of Crocker, Burbank & Co. in 1859. The Lyon Mill was built in 1853 by M. G. & B. F. Lyon, and bought of Moses G. Lyon by Crocker, Burbank & Co. in 1869. The Hanna Mill was built by George and Joseph Brown about 1852. It was afterward owned by Samuel Hanna, who bought it in 1853 and sold it in 1860 to Crocker, Burbank & Co. The Whitney Mill, in Rockville, was built by Whitney & Bogart in 1847. It was afterward owned by Crocker, Burbank & Co., then by Samuel Whitney and later by William Baldwin, Jr., who sold it in 1868 to Crocker, Burbank & Co. The Stone Mill, below the Snow and Cascade Mills, was built in 1854. One-half of it was owned for some time by Samuel A. Wheeler and Joel Ames, and the other half by Alvah Crocker. Crocker, Burbank & Co. came into possession of one-half in 1864, and Alvah Crocker sold the remaining half to Crocker, Burbank & Co. in 1871.

The Snow Mill was destroyed by fire, October 15, 1884, the loss being thirty-five thousand dollars. All the other mills are in operation at the present time, and produce about thirty tons of book, card and newspaper every twenty-four hours.

As is seen by the above list of mills belonging to this firm, there were other persons here engaged in the manufacture of paper prior to 1860. Prominent among them was the firm of Jesse Lyon & Sons. One of their mills came into the possession of Crocker, Burbank & Co., and the other became the basis of the Fitchburg Paper Company.

December 31, 1864, Rodney Wallace, Benjamin Snow, Jr., and Stephen Shepley bought this paper-mill, and the Kimball scythe-shop near by, and began the manufacture of paper under the firm-name of the Fitchburg Paper Company. Stephen E. Denton was soon after admitted to the firm and took charge of the business at the mill.

In July, 1865, Mr. Shepley sold his interest to Messrs. Wallace and Snow. Mr. Denton died in June, 1866. January 7, 1869, Mr. Wallace bought Mr. Snow's interest, and January 23d of the same year purchased the interest of Mr. Denton's estate of Mrs. Denton. Since then Mr. Wallace has been sole proprietor of the Fitchburg Paper Company.

He soon made improvements in his mill whereby its product was increased from one ton of paper per day to two tons. In 1876 he built a substantial stone dam, and two years later erected a new brick mill just below the old one, thereby increasing the product to about six tons of paper per day.

In 1887 he built another large brick mill, near the junction of Phillips' Brook with the Nashua, and the present capacity of the three mills is over twenty tons of hanging, card, coloring and lithographing paper per day.

Quite a village has sprung up around the two older mills. Just across the river are the tracks of the Fitchburg Railroad, and Mr. Wallace has a freight station of his own, where all the raw material is received and the finished product shipped.

The office of the Fitchburg Paper Company is in the Fitchburg Savings Bank block. Mr. Wallace's two sons, Herbert I. and George R. Wallace, are actively associated with him, as is also his brother, William E. Wallace, in the management of the extensive business and attending to the office duties.

The mill of the George W. Wheelwright Paper Company, on Fourth Street, was built in 1864, by George W. Wheelwright & Son, and was for some years known as the Rollstone paper-mill.

The present company was incorporated in 1880 with a capital of one hundred thousand dollars, and manufactures news, card, book and staining paper. The capacity of the mill is about five tons per day.

The office of the company is on Devonshire Street, Boston.

The mill of the Falulah Paper Company is located on Scythe-shop road, South Fitchburg. The company consists of Seth L. and Albert N. Lowe. The mill occupies the site of the Richardson scythe-shop, and was built by the Snow Paper Company in 1884. It came into the possession of the Falulah Paper Company in October, 1886.

Manilla paper is made at this mill at the rate of some three tons per day.

IRON INDUSTRIES.—By far the greater portion of the manu acturing companies here are engaged in the production of machinery. Though not begun as early as some of the other industries, it has taken deep root here; and within the last forty years has developed wonderfully.

The steam-engines and machinery made in Fitchburg have, we may truthfully say, an almost world-wide reputation.

It will be impossible to enter fully into the history and details of our many machine-shops, steam-engine manufactories, foundries, etc., in this limited sketch, but an attempt will be made in the following pages to give some idea of our great interests in this line of manufacturing.

The founders of the iron business here were two brothers, John and Salmon W. Putnam, who, in 1838 removed their business from Ashburnham to Fitchburg. The firm of J. & S. W. Putnam hired a room, twenty by thirty feet, in the old Burbank Paper Mill, then owned by Alvah Crocker, and began, in a small way, an industry that has since then become so large and important as to give to Fitchburg the name of the "Machine City."

Their business at first was mainly repairing, and furnished employment for themselves only; soon they began to make new machinery for various mills, and were obliged to hire an apprentice, and soon after a journeyman was engaged. The firm then began to make gear-cutting machines after the model of one devised by John Putnam; and this machine is now, nearly a half century later, made by the Putnam Machine Company with very slight change in its mechanism.

Their business rapidly increased, requiring, from time to time, an addition to their floor-room; and, in 1845, Alvah Crocker erected for them a brick building, one hundred and fifty by forty feet, they occupy-

ing the lower floor and Heywood & Comee the upper portion.

On the night of December 7, 1849, this building, as has been before stated, was entirely destroyed by fire, and the machine and chair-making industries of Fitchburg came very near being snuffed out together in their infancy. The firm of J. & S. W. Putnam lost twelve thousand dollars, the accumulation of over ten years of hard work, and had no insurance; but two weeks after the fire the brothers were at work again under a temporary covering of boards.

They paid all their debts and the next year the firm made, as it were, a new start in a building erected for them by Mr. Crocker, and now occupied by the Union Machine Company.

About this time Charles H. Brown and Benjamin Snow, Jr., were admitted as partners, and the firm-name became J. & S. W. Putnam & Co.

The Putnam Machine Company.—In 1854 the firm of J. & S. W. Putnam & Co. was increased by the addition of four new members—Messrs. Charles Burleigh, John Q. and Sylvester C. Wright and Danvers A. Tenney; and, on August 10, 1854, these eight individuals were organized as a partnership under the name of the Putnam Machine Company. Four years later, in 1858, the company was incorporated as a stock company, with a capital of forty thousand dollars. In 1866 the capital was increased to one hundred and sixty thousand dollars.

In 1855 the company began the manufacture of steam-engines. In that year Charles H. Brown brought out a new engine, which was patented by himself and Charles Burleigh. The patent was assigned to the Putnam Machine Company, and the engine, known as the "Putnam" Engine, has since been, and still continues to be, manufactured by the company.

In 1866 it became evident that larger accommodations were imperatively needed. Accordingly, the company purchased about twenty-six acres of land, including the Atherton estate in Newton's Lane, and in July, 1866, began the erection of the extensive shops, foundries, etc., now occupied by the company. These buildings were completed during the next two years at a cost of over $200,000, and were admirably arranged for carrying on the company's large business.

The main machine-shop, extending along Putnam Street from Main Street nearly to the tracks of the Fitchburg Railroad is a one-story brick building, 625 feet long and 48 feet wide. In it are seven different departments, each being devoted to the manufacture of special kinds of machinery, but there is no partition throughout its entire length. Along the centre of the shop are thirty-five iron columns which support the main line of shafting, which runs all the machinery in the building. Power is furnished by three large cut-off steam-engines of the company's own manufacture.

Connected with the Main Street end of the main shop is the office of the company, a handsome brick building of two stories, with a Mansard roof. From the east side of the main shop project five wings, twelve feet square, used as offices for the foremen of the various departments; and from the west side extend seven wings, six being 52 by 36 feet, and the seventh 52 by 44 feet, used for the setting up of the machinery made in the seven corresponding departments.

This extensive building is lighted by about three hundred large windows, and there are five hundred gas-burners ready for use when needed. It is heated by over six miles of steam-pipe, and has a floor-room of 37,000 square feet. In a word, the works, which were built from plans designed by S. W. Putnam, could not have been more conveniently or effectively arranged.

Along the west side of the main shop is a roadway with which each of the seven wings communicates by means of large folding doors, so that heavy machines can easily be loaded upon trucks by powerful cranes.

West of the roadway are located the iron and brass foundries, pattern-shops, store-houses, &c. At the extreme southern end of the main shop is the blacksmith-shop, with its forges and heavy hammers.

At the time of the incorporation of the company Salmon W. Putnam was chosen president and manager, and continued to conduct the large business with great sagacity and ability for nearly fourteen years. His death occurred February 23, 1872, and was deeply felt by the community as well as the company. The senior member, John Putnam, though not active in the management of the affairs of the company, was for many years a director and one of the largest stockholders. He was daily at his place, where he was a most energetic and skillful workman up to the time he retired from business, in 1886. Many improvements in the machinery made by the company are due to his ingenuity and skill. He died July 31, 1888, aged nearly seventy-eight years, and his funeral was attended by the officers and employés of the Putnam Machine Company, whose works were closed during the day.

On the death of S. W. Putnam, in 1872, the presidency of the company was offered to John Putnam, but he preferred to continue his work in the field where he had for so many years searched for mechanical secrets rather than to accept an office, the duties of which would involve such a radical change, and he used his influence to have the presidential chair of the company given to Charles F. Putnam.

At the present time the management of the business is vested in S. W. Putnam's four sons,—Charles F., Henry O., Salmon W. and George E. Putnam,—and the works are in full and prosperous operation.

Besides steam-engines a very great variety of machines is made by the company, including lathes, drills, bolt-cutters, gear-cutters, planers, car-wheel borers, shafting, water-wheels, wheel-presses, hangers,

pulleys, &c.; in fact, all kinds of machinery known as machine-shop and special railroad tools.

To show how far their products go, it may be here stated that the first two machine-shops built in China were entirely furnished with machinery made by the Putnam Machine Company. And it is also worth noting that it was the fortune of this company to make the rock-drills, air-compressors and other machinery which rendered possible the completion of that vast engineering feat, the Hoosac Tunnel.

The Putnam Tool Company, with works on Walnut Street, was established in 1882 with Salmon W. Putnam, president, and George E. Putnam, treasurer, and manufactured railroad and machine tools. March 18, 1886, it was consolidated with the Putnam Machine Company.

At the present time the four Putnam brothers and their mother hold a controlling interest in the company, which is officered as follows: President, Charles F. Putnam; Vice-president, Salmon W. Putnam; Treasurer, Henry O. Putnam; General Superintendent, George E. Putnam.

Each of the seven special departments of manufacture has an able man at its head as foreman. Over five hundred hands are employed, many of whom are skilled workmen who have grown old in the employ of the company.

A New York house is maintained as an exhibiting and distributing establishment.

The Fitchburg Steam-Engine Company.—The business of this company was founded in 1871, under the name of the Haskins Machine Company, and is carried on in a substantial brick building on Water Street, occupying the site of the Heywood chair-shop, burnt in 1870.

John F. Haskins organized this company and went into the building as soon as it was completed, and on April 4, 1872, he gave a grand ball in honor of the dedication of the building to the uses of the Haskins Machine Company. Mr. Haskins was full of fun and frolic and, though now a resident in lands across the ocean, is well remembered by many Fitchburg people.

The company manufactured the Blake Patent Pump and the Ellis Vapor Engine chiefly.

In 1875 Hale W. Page, Frederick Fosdick and Charles Fosdick purchased the entire concern, together with its good-will, and changed its name to the Fitchburg Steam Engine Company. Mr. Page was president of the company until his death, May 17, 1887, when Frederick Fosdick was chosen to the position. The officers of the company at the present time are: President, Frederick Fosdick; Superintendent, Charles Fosdick; Treasurer, William E. Sheldon; Secretary, William J. Clifford.

This company employs about sixty hands, most of whom are skilled workmen, and manufactures horizontal and vertical automatic cut-off engines, electric light engines, boilers, shafting, hangers, pulleys, etc.

A specialty has been made of the manufacture of the "Fitchburg" steam-engine, the great merits of which have been everywhere acknowledged.

The products of this company, and particularly their engines, have a wide reputation, and are in use all over the United States. A large foreign trade has also been established, which extends to Central and South America and most of the European countries.

Careful personal supervision of, and strict attention to, the details of the business, on the part of the Fosdicks, have brought to the company its present well-deserved prosperity.

Both brothers are active and prominent in public affairs, Frederick Fosdick having served as mayor of Fitchburg in 1886–87, and Charles Fosdick as president of the Common Council in 1886.

C. H. Brown & Co.—The founder of this well-known steam-engine manufacturing firm came to Fitchburg in 1849; and to him may be ascribed the establishment of the steam-engine business of Fitchburg, which now forms so great a factor in the manufacturing interests of the city.

Soon after coming here Mr. Brown bought one-third interest in the firm of J. & S. W. Putnam; and before long he introduced a new feature into the firm's business,—the making of steam-engines, and took entire charge of this department.

In 1855, as before stated, he brought out the "Putnam" engine, which was built under his supervision until 1859, when poor health compelled him to give up active work for a time; and he soon sold his interest in the Putnam Machine Company.

After four years' rest Mr. Brown again began business, in a small way, in Newton's Lane. It soon began to increase, and in 1866 he hired one-half of the second story of the building occupied by the Fitchburg Machine Works, on Main Street (at that time called Summer Street).

In 1871 he invented a new engine, since well-known as the "Brown" Automatic Cut-off Steam-Engine. Its great merits and points of superiority over other engines were soon appreciated by the trade, and it was not long before it became evident that better facilities and larger accommodations were necessary in order to supply the demand.

At this time, and for some years previous, the business was carried on under the firm-name of C. H. Brown & Co., Elbridge G. Stanley being Mr. Brown's partner.

In 1873 the firm purchased a large lot at the corner of Main and Willow Streets, and erected thereon a commodious and substantial brick building, which has been occupied by C. H. Brown & Co. since 1875.

The present firm consists of Charles H. Brown and his three sons, Charles H. Brown, Jr., Frank E. and John F. Brown.

So large and constant is the demand for the "Brown" engine that the firm manufactures that

exclusively, employing some sixty hands and turning out the engines at the rate of four per month, on the average; and, as soon as built, these engines are sent to purchasers in various parts of the United States and Canada, and also in many foreign countries.

The Fitchburg Machine Works.—The foundation of the business of this company was laid in 1864, by James L. Chapman, who, in the spring of that year, came to Fitchburg and formed a partnership with Sylvester C. Wright, for the manufacture of machinists' tools. This was in "war times," and machinery was very scarce and hard to obtain. The firm's outfit was quite meagre, consisting of an old chain lathe from the "Stone Mill;" an old chain planer from a blacksmith and machine-shop in Townsend; a second-hand Gould shaping-machine bought in Newark, N. J.; an old pattern-maker's lathe and second-hand engine lathe from a shop in Newton's Lane.

This was all the firm could secure, and, with this collection of machines, they started business in the Atherton building, and began to make their own patterns.

In about a year the firm removed to the corner of Main and Laurel Streets, where I. C. Wright & Co.'s hardware store now is. Here, with more room and improved machinery, they prospered. Hale W. Page and Artemas R. Smith were admitted as partners, and thirty hands were employed.

February 2, 1866, the firm moved to the present location of the Fitchburg Machine Works. The building belonged to Sylvanus Sawyer, and stood on what was then called Summer Street. At first the firm hired only the easterly half of the building, but soon bought out Mr. Sawyer and occupied all the building, excepting the portion leased to Charles H. Brown.

January 1, 1867, a stock company was organized, including the four members of the firm and Eugene T. and Lowell M. Miles, Augustus Whitman and Jared Whitman, Jr., under the name of the Fitchburg Machine Company, and for ten years the business was carried on by this company.

In 1877 this company was dissolved and a new one organized under the laws of general copartnership. The name adopted for the new company was the Fitchburg Machine Works, and its members were Sylvester C. Wright (superintendent), James L. Chapman (treasurer), Walter Heywood, Harrington Sibley and Joseph S. Wilson.

On the death of Mr. Wright, in December, 1880, Mr. Chapman became superintendent as well as treasurer, and since then has had entire charge of the business.

This company manufactures all kinds of metal-working machinery, including lathes of different varieties and sizes, iron planers, milling machines, shaping machines, drill presses, etc., and employs some fifty hands.

The products of this company have a well-established reputation, and their purchasers are distributed over a wide extent of territory.

The Simonds Manufacturing Company.—The extensive buildings occupied by this company are situated at the corner of Main and North Streets.

Their business was started in 1864 in the scythe shop of Abel Simonds at West Fitchburg. Mr. Simonds, who, since 1832, had manufactured scythes and edge tools in West Fitchburg, gave up business in 1864 and leased the shop to the new firm. His long experience had made him well versed in the working of steel, and he seems to have handed his knowledge down to his sons.

The firm started under the name of Simonds Brothers & Co., and was composed of George F. and Alvin A. Simonds and Benjamin Snow, Jr. Machine knives, mower and reaper sections, etc., were manufactured and a prosperous business soon established.

In 1868 the Simonds Manufacturing Company was incorporated with a capital of one hundred and fifty thousand dollars, and the works were moved from West Fitchburg to their present location. Here the same line of manufacture was continued until 1878, when, on account of a consolidation of the mowing-machine knife and reaper section interests by Western manufacturers, the company sold that department of their business, and began the manufacture of saws by an entirely new method of tempering and straightening. They entered the field in competition with many old established saw manufacturing firms, but the superiority of their product, in every respect, soon enabled them to build up a large business, and that, too, at prices in advance of all competitors.

The company's branch works at Chicago and San Francisco have been maintained for some years.

The officers of the company are: George F. Simonds, president; Daniel Simonds, vice-president and treasurer; Edwin F. Simonds, manager of the Chicago works; John Simonds, manager of the San Francisco works.

The inventive genius of George F. Simonds has brought into the possession of this company many valuable patents covering their processes of manufacture and radical improvements in the adjustment of circular saws, etc.

About two hundred hands are employed at the shops here.

A speciality is made of the "Simonds" saw, covered by many patents, a circular-saw unequaled in uniformity and quality of temper, and in its adjustment—facts abundantly attested by the wide sale and universally acknowledged superiority of this saw. Various other kinds of saws are also made by the company, such as crescent-ground, cross-cut saws, straight-ground gang, mill, mulay and drag-saws, band-saws, etc.

The "Simonds" knives, planer knives, etc., and every description of pattern knives are also manufactured by this company and have a very large sale.

The Simonds Rolling-Machine Company.—On Willow Street, close by the Simonds Manufacturing Company's buildings, are the works of the Simonds Rolling-Machine Company.

This is a comparatively new enterprise, and is wholly due to the inventive genius of George F. Simonds, who, early in 1884, had his attention drawn, by an incident, to the possibility of moulding metal articles of circular shape to any given form, while rotating them on their axes between two surfaces moving in opposite directions. Experiments were made with putty balls between wooden surfaces, and so satisfactory were the results that a substantial machine was constructed, which successfully rolled various small articles, such as spheres, small projectiles, machine handles, etc.

The result of this was the incorporation, in November, 1886, of the Simonds Rolling-Machine Company, of Boston, with a capital of four hundred thousand dollars, and George F. Simonds president. This company has purchased all the patents granted to Mr. Simonds in the United States and Canada, relating to the forging of metal articles by rolling.

Patents on this new process of metal-working have been secured throughout the principal countries of the world; and, early in 1886, the Simonds Steel and Iron Forging Company, Limited, with a capital of £150,000 was organized in London, England, by some of the leading British manufacturers.

The works of the Simonds Rolling-Machine Company, located in this city, are for experimental purposes mainly, and about sixty skilled workmen are engaged in testing and developing the capabilities of the machine, which seem to be without limit. The products are turned out with marvellous rapidity, and in accuracy and quality are far superior to those made by any other known process.

As an evidence of the importance of this mechanical discovery, it may be stated that at the last annual meeting of the American Institute of Mining Engineers, held in Boston in February, 1888, the members of the Institute came in a body to Fitchburg on February 23d, expressly to witness the work of this machine.

Companies are now being organized to manufacture under these patents in all the large cities of the United States and Canada, and without doubt this process will soon supersede all others in the manufacture of many articles.

Fitchburg is justly proud of the fact that a son of hers conceived and perfected this important and valuable invention.

The works here are as yet only in embryo, so to speak, and very little manufacturing of products for sale is done. There are, however, a few articles made for sale to a limited extent, such as various kinds of axles, projectiles, machine tool-handles, spindles, etc.

The Union Machine Co.—This company, whose works are on Water St., was incorporated in 1867, with a capital of $60,000, and at first manufactured machinists' tools. In 1870 the manufacture of hose-carriages and steam fire-engines of the "Jucket" pattern was begun, and continued several years.

The making of paper-machinery was begun about 1873, and since then the company has made this line of work a specialty.

In 1876 the company transferred its stock, etc., to Crocker, Burbank & Co., who put in new machinery, and continued to build paper-machinery under the old name of the company.

In 1887 a stock company was formed, with these officers: John Burney, president; Samuel E. Crocker, treasurer; Emmons Crocker, secretary. This company also retained the name of Union Machine Co., and put in new machinery. It ranks to-day among the best establishments of this kind in the country.

Special attention is paid to the manufacture of large Fourdrinier and cylinder paper-machines, and the company also makes rag and Jordan engines, screen-plates, and all other kinds of paper-mill machinery.

This line of machinery is also made by several other concerns in town, as a department of their business.

Francis Sheldon & Co. carry on business as millwrights, and also manufacture rag-engines, cylinder-washers, rag-cutters and dusters for paper-mills.

Ezekiel Davis, who owns the shop formerly operated by Alfred White, in Rockville, makes paper-mill bars and bed-plates and rag-cutter-knives, besides all varieties of machine-knives.

Hardy & Pinder make patent cast-metal screen-plates, used in paper-making.

The Rollstone Machine Company.—This company, whose works are near those of the Union Machine Company, was also incorporated in 1867 and has always made wood-working machinery, and has built up quite a large business. Machines made by this company are in operation in almost all sections of the United States.

George L. Stearns is manager and Henry F. Coggshall treasurer.

In addition to wood-working machinery, this company manufactures the following: The C. F. Smith system of ice-making and refrigerating machines; the E. N. Gates system of hot water heating for dwellings, and the Hodges' Universal Angle Union, for plumbers' use, in connection with steam, water or gas-works.

Beside this company, the following firms and individuals manufacture wood-working machinery:

A. D. Waymouth & Co., who, for the last forty years have made the well-known Waymouth Lathe. Their shop is in Newton Place, and they are the sole manufacturers of A. D. Waymouth's new patent self-adjusting and self-centreing lathe for wood-turning.

Charles W. Wilder makes Wilder's Patent Turning Lathe, which was invented by him, and does all kinds of wood-turning at his shop on Water Street.

C. H. Cowdrey secured improvements on the original Waymouth lathe and makes lathes of his pattern, and also shafting, pulleys, etc., at his shop on Main Street.

The Fitchburg Adjustable Saw-table Company make saw-tables and adjusters of acknowledged superiority at their shop in Newton Place.

Franklin S. Lovell has machine works on Boutelle Street, where he manufactures saw-mill, grist-mill and wood-working machinery. He also makes C. M. Flint's patent saw-mills, as well as gingham machinery, dynamos and various kinds of electrical machinery.

The Burleigh Rock-Drill Company.—Charles Burleigh, the inventor of the rock-drill bearing his name, came to Fitchburg in 1850, and soon became a member of the firm of J. & S. W. Putnam. Later he was prominently identified with the Putnam Machine Company. His death occurred May 28, 1883.

When work was begun on the Hoosac Tunnel all the rock-tunnelling had to be done by hand. It was slow work, and the danger arising from lack of ventilation increased as the work advanced. About 1865 the late Alvah Crocker, it is said, applied to Mr. Burleigh to devise some description of power-drill to complete the tunnel, which at that time it seemed almost an impossibility to finish with the methods then employed.

The result of Mr. Burleigh's study of this difficult problem was the invention by him of the Burleigh Rock-Drill and Patent Air-Compressor, a combination which was capable, not only of drilling holes from three-fourths of an inch to five inches in diameter, to a depth of thirty feet, at a rate of from two to ten inches per minute, according to the nature of the rock, but also of thoroughly ventilating the tunnel at the same time, thus obviating this great and fatal source of danger.

These machines have produced a complete revolu tion in the work of rock-tunnelling. By means of them the completion of the Hoosac Tunnel was rendered possible, and since then large use has been made of them, both in this country and abroad. Among the many great engineering feats, where the use of these machines was indispensable, may be mentioned the Sutro Tunnel, Hell Gate, Brooklyn Bridge and several of the great tunnels in Europe.

In 1867 the Burleigh Rock-Drill Company was incorporated, with a capital of $150,000, to make and sell these machines, of which the world is the market.

In connection with this company is the Burleigh Tunnel Company, incorporated in 1869, with a capital of $50,000.

Boiler Manufacturing.—David M. Dillon, of Fitchburg, was the first person to make boilers of steel, and though laughed at by other boiler-makers for trying such an experiment, the success he has made of it and the wide and constantly increasing sale of his boilers have caused a smile to settle on the genial countenance of Mr. Dillon, showing the truth of the adage, "He who laughs last, laughs best."

He started his business in 1870, in a shop at the corner of Main and West Streets. The people in that previously quiet neighborhood strenuously objected to the noise produced. So, after remaining there two years, Mr. Dillon, finding that he needed more room, and being naturally of an accommodating disposition, moved his works to a shop he had built on Crocker Street, where, for the past sixteen years, he has carried on his rapidly increasing business.

Boilers are also made to some extent by the Burleigh Rock-Drill Company and the Fitchburg Steam-Engine Company.

Of the several other varieties of iron industries not yet mentioned, we have space to speak of none in detail, except the foundries. A few other iron and steel products made here, that may be mentioned briefly, are files, manufactured by Hon. Eli Culley, who has carried on this business here since 1868; agricultural implements, by R. A. Leonard & Son; steel horse-collars and boiler-makers' tools, by Alexander Thompson; pneumatic and hydraulic machines, by the Fitchburg Manufacturing Company; water-motors, by C. A. Sawyer & Co.; electric machinery, by Irving W. Colburn; small tools, models, etc., by C. S. Tolman, H. P. Tyrrell and the Fitchburg Novelty Works; brass finishing, by A. W. Hubbard; and keys, etc., by S. W. Galpin. Lack of space forbids further enumeration.

Several residents of Fitchburg, not yet mentioned, have, by their inventions, done much toward the building up of the machinery business here. Among them are the following: Louis D. Bartlett, inventor and perfector of the Bartlett Automatic Cut-off Steam-engine; Sylvanus Sawyer, inventor of machinery to split rattan into chair cane, and also known for his improvements in rifled cannon projectiles and in the manufacture of jewelers' lathes, etc.; Horace F. Hodges, inventor of Hodges' Universal Angle Union and other ingenious devices; and George E. Bowers, inventor of Bowers' dynamos.

FOUNDRIES.—Besides those connected with the Putnam Machine Company, there are at present in town four foundries,—three iron and one brass.

The one longest established is now operated by the firm of Heywood, Wilson & Co. It is located at the lower end of Main Street, and has always been known as

The Fitchburg Foundry.—This was established by Asher Green about fifty years ago, and for nearly thirty years was located on Water Street, opposite the site now occupied by the Union Machine Company.

Mr. Green was alone at first but, later, David Ware was in company with him, and, for a time, his son, J. S. Green, was associated with them.

In 1860 Mr. Green retired and sold his interest to Waldo Wallace, and the business was carried on under the name of Wallace, Ware & Co., until 1864, when Mr. Wallace became sole proprietor.

In 1866 George Wheelock and Joseph S. Wilson bought half the interest, and, upon Mr. Wallace's death the same year, Walter Heywood and Harrington Sibley purchased the other half. The business was carried on for about two years under the name of Heywood, Wheelock & Co.

In 1868 the present foundry buildings were erected and the business removed thereto; and, about the same time, Mr. Wheelock sold his interest to Hale W. Page, and the name of the firm became Heywood, Wilson & Co. Mr. Page left the firm in 1875, and Mr. Heywood died in 1880, and at the present time the business is carried on by Messrs. Wilson & Sibley, who have retained the firm-name of Heywood, Wilson & Co.

The second oldest foundry is located on Crocker Street, and has always been known as

The Rollstone Foundry.—It was established nearly forty years ago by the firm of Davis, Page & Co., consisting of Joel Davis, Hale W. Page and Artemas R. Smith. After a time, Mr. Davis retired, and the firm became Smith, Page & Co., and, still later, Smith & Page.

On July 21, 1870, the fire which destroyed the Heywood chair-shop also entirely ruined this foundry, causing a loss of twelve thousand dollars. A large brick building was immediately erected on the same site, and the business was carried on by Smith & Page until Mr. Smith's death, in March, 1875.

In 1875 Lyman H. Goodnow removed from Worcester to Fitchburg and became an equal partner with Mr. Page in the business; and, in 1877, Mr. Goodnow became, and has since continued to be, the sole proprietor of the Rollstone Foundry. Mr. Goodnow makes a specialty of the manufacture of large fly-wheels and iron fronts for buildings.

On the night of October 17, 1885, this foundry was again badly damaged by fire, the loss amounting to over fifteen thousand dollars; but the building was soon repaired, and the foundry in operation again.

M. J. Perault's Iron Foundry is on Water Street. The business was started in 1883, by Marshall & Farnsworth, for the manufacture of fine castings.

In July, 1884, Mr. Perault, who had been foreman of the Fitchburg Foundry since 1871, bought the establishment, and has since successfully carried it on.

Brass foundries have been in existence here for over thirty years. In 1858 Messrs. Levi Stevens and George Wheelock had a brass foundry near the Rollstone Foundry. A year or two later the firm dissolved, Mr. Wheelock taking charge of the old foundry and Mr. Stevens starting a new one at the corner of Main and Laurel Streets.

About 1869 Sargent & Earls operated a brass foundry for a year or two in Newton's Lane.

At the present time the only brass foundry in town is that of William A. Hardy, on Water Street.

Mr. Hardy was formerly with Mr. Stevens, and later, in company with George Wheelock, succeeded Mr. Stevens in operating the Laurel Street foundry, under the firm-name of W. A. Hardy & Co.

About 1872 Mr. Hardy became sole proprietor, and removed the business to his present location, where he has since successfully conducted it. He makes a specialty of machinery castings, and is the inventor of Hardy's Patent Car Axle Boxes, and enjoys a considerable share of railroad patronage.

A number of manufacturing establishments have been carried on in Fitchburg, which, for various reasons, have been discontinued, or have removed from town. A few of them have been of importance in the business interests of the place in years past, and are worthy of mention in some detail; and as many of them were engaged in the manufacture of iron and steel products, they come most appropriately under the present head of iron industries.

SCYTHE MANUFACTURING.—This long established and, at one time, very important industry has been extinct here only about ten years.

It was begun in 1796 by John & Joseph Farwell, who had a scythe-shop near the present corner of River and Main Streets. Here they made scythes for a quarter of a century, or so, and the Farwell scythe acquired a considerable reputation.

About 1830 John T. Farwell and Alpheus Kimball started a scythe-factory just below A. Crocker & Co.'s paper-mill, and began to make scythes of the Farwell pattern. Two years later Mr. Farwell left the firm, and the business was carried on by Mr. Kimball, who later took his three sons, Alpheus P., William and John W. Kimball, into partnership, under the firm-name of A. Kimball & Sons. After the death of Alpheus Kimball, about 1860, the business was conducted, from 1860 to 1862, by W. & J. W. Kimball, and after 1862 by William Kimball alone, who sold the shop in December, 1864, to the Fitchburg Paper Company.

Soon after Mr. Farwell dissolved his partnership with Mr. Kimball, he went into company, in 1832, with Abel Simonds, the firm-name being J. T. Farwell & Co.

This firm built a new scythe-factory farther up the river, above the junction of Phillips' Brook and the Nashua. Mr. Farwell retained the right to the Farwell pattern, and the firm manufactured these well-known scythes for about twenty years. During a portion of this time Leonard C. Sanborn was also a partner.

After Mr. Farwell retired Mr. Simonds continued to make scythes and edge-tools, his son, Joseph F. Simonds, being in company with him part of the time, until 1864, when he gave up business and rented the shop to the new firm of Simonds Bros. & Co.

About 1846 Alpheus P. Kimball, in company with John L. Chandler, built a scythe-factory in South Fitchburg, on what is now Scythe-shop road, on the

site of the present mill of the Falulah Paper Company. Here scythe-making was carried on by the firm of A. P. Kimball & Co. for a few years. Mr. Kimball soon sold his interest, and for a time the shop was run by Mr. Chandler, in connection with other partners, under the firm-name of J. L. Chandler & Co.

In 1852 Captain Edwin Richardson took the shop, and manufactured scythes there for about twenty-five years.

It is evident from the above brief account that scythe-making was at one time an important industry here. Official statistics of 1855 show that during that year there were made in Fitchburg seven thousand nine hundred and twenty-five dozen scythes, valued at sixty-two thousand and seventy-two dollars, and that fifty-eight hands were employed in the three scythe factories.

The Whitman & Miles Manufacturing Company.—Among the earliest manufacturers of edge-tools in Fitchburg were Albert G. Page and Alfred White. The firm of Page & White began business in Rockville, where the Berwick Mills now stand, about fifty years ago, and was the origin of the above-named company, one of our most valuable manufacturing establishments, now, unfortunately, not numbered among the industrial firms of Fitchburg.

Page & White made edge-tools of various kinds. After a few years Mr. White retired from the firm, and began business for himself in a large shop in Rockville, farther up on Phillips' Brook, and built up a prosperous business in the manufacture of engine bars and plates, rag-cutter and trimming-knives, shingle-knives, etc. For a time he was in company with Masa Willis, but during a considerable period was alone. He died September 13, 1885, and the business established by him is now carried on by Ezekiel Davis, formerly of the Whitman & Miles Manufacturing Company.

After Mr. White's withdrawal from the firm, Mr. Page formed a partnership with Messrs. F. Stiles and William E. Taylor, under the firm-name of A. G. Page & Company, and continued business at the same shop.

About 1847 this firm was dissolved, and Edward Aldrich became Mr. Page's partner, and the business was carried on by Page & Aldrich until 1852, when a new firm, Page, Whitman & Company, was established, still retaining the old shop. This firm was composed of Mr. Page, Augustus Whitman and Calvin Foster, and made a specialty of the manufacture of socket chisels, planing and paper-knives.

In 1856 this firm was dissolved, and Mr. Whitman and Eugene T. Miles took charge of the establishment under the firm-name of Whitman & Miles. Business prospered, and in 1864 the Whitman & Miles Manufacturing Company was incorporated, and the works removed to new and commodious shops in West Fitchburg. A very large and rapidly increasing business was carried on here for about twelve years, mowing-machine knives being the principal product.

The company had a branch establishment in Akron, Ohio, and in 1876 the Whitman & Barnes Manufacturing Company was formed, and the Whitman & Miles Manufacturing Company consolidated with it. The works were removed to Akron, and Fitchburg thus lost a valuable and prosperous corporation.

The American Rattan Co.—This company was incorporated in 1852, with a capital of $46,800, and manufactured chair-cane from rattan. Previously, this kind of work had been done by hand, but this company put in the machines which had recently been invented by Sylvanus Sawyer and his brother, Addison, for splitting cane.

For many years the American Rattan Company was one of the most prosperous and profitable manufacturing concerns in the United States. The works were in Newton's Lane.

After twenty-three years of prosperity, due largely to the able management of Moses Wood, who was president of the company from its incorporation till his death, in 1869, and also its treasurer from 1855, the company was consolidated in 1875 with the Wakefield Rattan Company, of Boston, and in April, 1878, the business was entirely removed from Fitchburg.

Some idea of the importance of this company may be obtained by stating the value of its products in different years and noting the remarkable increase.

From official statistics we find that the value of the chair-cane produced by the American Rattan Company in 1855 was $50,000; in 1865, $212,500; in 1875 $340,000.

The loss of this company, and of the Whitman & Miles Manufacturing Company—two of our heaviest and most prosperous concerns—coming, one so soon after the other, increased, in no small degree, the business depression then existing in Fitchburg.

The Buckeye Mowing-Machine Company.—This company began business here about 1864, occupying two large wooden buildings in West Fitchburg, near the junction of Depot road and Westminster river road. In connection with it was the Bay State Horse-Rake Company. Mowing-machines, horse-rakes and laundry-machines were here manufactured and a prosperous business was built up.

In 1865 official statistics show that eight hundred and fifty mowing-machines were made here during that year, valued at one hundred and twenty-five thousand dollars. The product was greater a few years later.

September 15, 1873, one of the large buildings occupied by this company was destroyed by fire and the other considerably damaged, the loss being fifteen thousand dollars. The works were rebuilt, and in 1876 were purchased by Richard A. Leonard, who continued the manufacture of mowing-machines and also made packing cases there until January 29, 1886,

when both buildings were burnt. Soon afterward the mowing-machine business was removed to Worcester, Mr. Leonard continuing the making of packing cases and agricultural implements in a new factory opposite the site of the old shops.

Many other industries have been carried on here in the past that are now extinct in Fitchburg. A few of them may be mentioned, as follows: Tanneries were early established here, and the one operated by Caldwell & Sprague a half-century ago nearly, located near the old V. & M. R. R. engine-house, was quite an important concern. Bellows were made here to a considerable extent during the first half of the present century by various individuals, prominent among whom was Dea. Abel Thurston. Hats were also formerly made here. Parts of piano-fortes were made by Hale W. Page; fan blowers, sewing-machines, etc., by C. P. Marshall; vises by the New England Vise Co.; hoop-machines by the American Hoop-Machine Co. Prior to the discovery of petroleum a large number of candles were made here by John P. Sabin. During the war cannon, cannon-balls and bomb-shells were made here to a considerable extent.

THE GRAIN BUSINESS.—Grist and saw-mills were the first concerns in the manufacturing line started in Fitchburg. We have already spoken of the mill built by the Kimballs about 1750, where for many years the grain for miles around was ground.

From about 1800 to 1822 there was a grist-mill run in connection with the Farwell scythe shop, near the corner of the present Main and River Streets.

A little later Sheldon & Pillsbury's grist-mill was built, on the site now occupied by the Star Worsted Company's mill on West Street. In a few years this mill acquired considerable reputation for bolting flour in a superior manner, and grain was brought to it from places quite distant. It was equipped with two runs of stones, a corn-cracker and flour-bolter, and in 1835, according to Mr. Torrey, the average amount of flour made at this mill was five barrels per day; and Mr. Torrey was of the opinion that during the year 1836 the production would be doubled.

The mill erected about 1836 by Captain Levi Pratt on River Street was, for a time, used by him for the manufacture of powder kegs, but for many years the site has been occupied as a flour and grain-mill. Several parties have carried on this industry there in years past, among them Franklin McIntire and Ira Carleton and the Fitchburg Flour Company. In 1881 Charles P. Washburn purchased the property; and in 1883 Frederick F. Woodward bought one-half interest, since which time the mill has been successfully operated by the firm of Washburn & Woodward.

In 1884 a store-house, one hundred by thirty feet, was built to accommodate their increasing business. The firm possesses every facility for carrying on their large wholesale and retail trade in flour, grain, meal, etc. A branch track connects their mill with the main line of the Fitchburg Railroad close by.

Let us now return to the Kimball saw and grist-mill. On the site occupied by it was built, in 1826, the "Stone Mill," which, for over forty years, was operated as a cotton-mill. In 1868 Joseph Cushing bought the property, and since then the firm of J. Cushing & Co. has carried on the flour and grain business there. Mr. Cushing's son, Milton M. Cushing, was in partnership with him, but died some years ago.

A very large business is done here, the mill having a grinding capacity of several thousand bushels of corn per day. A track, some six hundred feet long, connects the establishment with the main line of the Fitchburg Railroad. This track was built in 1871, and on September 2d, of that year, the completion of the "Joe Cushing Railroad," as it was called, was the occasion of quite a jollification.

In connection with his mill Mr. Cushing has several large store-houses, and, by a rather singular coincidence, he has, just across the stream, a saw-mill and lumber-yard. So the first manufacturing industry in Fitchburg is, at the present time, exactly reproduced on the identical site, though on a vastly greater scale.

THE LUMBER BUSINESS.—As before noted, Fitchburg has had saw-mills located on the various streams and brooks within the limits of the town since the earliest period of its history; and the lumber business has always been an important item in the industries of the place.

It would be useless to try to give, in detail, the history of this business; so we shall content ourselves with simply a brief mention of the more important concerns of this kind that have existed here in the recent past, or are in operation now.

Some twenty years ago the Fitchburg Lumber Company carried on quite an extensive business at their yards on Water Street. The company was incorporated in 1868, with a capital of $200,000, but was not able to go through the financial depression that came a few years later.

Alvah A. Beckwith operated an extensive lumber business, and sash and blind shop on Rollstone Street, over a score of years ago; and after his death, December 17, 1868, the business was carried on by the Beckwith Lumber Company until 1878, when the property was leased by Charles A. Priest, who subsequently purchased it.

Mr. Priest was formerly with the Fitchburg Lumber Company, and operated their yard on Water Street after the company gave up business, until he leased the property of the Beckwith Lumber Company. After purchasing it he greatly enlarged the buildings, and established a prosperous business. He died in September, 1887, since which time the concern has been carried on by the C. A. Priest Lumber Company. The plant is now quite exten-

sive, and a large business is done in lumber and in the manufacture of doors, sash, blinds, stairs and all kinds of builders' finish. A specialty is made of the manufacture of school furniture.

For some years Lorenzo Barker had a lumber-yard and sash and blind factory on North Street. The property afterward came into the hands of Deacon Mial Davis, who greatly increased the facilities for business, and he now operates it as a steam mill, manufacturing doors, sash, blinds and all kinds of house finish. Mr. Davis also deals largely in lumber.

William A. Garno has a steam saw-mill on Lunenburg Street, where a considerable business is done in getting out lumber and making doors, blinds, etc.

Frederick A. Beckwith, son of A. A. Beckwith, has a lumber establishment in Newton Place, and does a large business in building materials, house finish, etc.

Arthur F. Goodfellow has a genuine old-style saw-mill on Wanoosnac Brook, near the Old Turnpike road, where he turns out a large supply of boards.

Of J. Cushing & Co.'s lumber yard and saw mill we have already spoken.

W. C. Johnson has a lumber yard in connection with his other business on Water Street.

Soap and Candle Manufacturing. — This industry dates back to an early period in the history of Fitchburg, for, prior to 1800, there was a soap shop on the site now occupied by Crocker Block, to which tradition says the name "Old Potash" was applied.

At the present time there is but one soap manufactory in town,—that of Cowdin & Walker. Their business has been long established, having been begun by John P. Sabin over forty years ago. Mr. Sabin was for a time in company with Cahill Tolman and S. H. Evans in the "Old City." The firm carried on the grocery business, and also made soap and candles on a small scale.

About 1847 Mr. Sabin began the manufacture of these articles by himself, in South Fitchburg, and speedily built up a thriving business.

Prior to the use of kerosene a large amount of candles was made here. Official statistics show that in 1855 ten tons of tallow candles, twenty-five tons of hard soap and six hundred pounds of soft soap were manufactured here, the aggregate value being eight thousand dollars. In 1865 the production of candles in Fitchburg was only three thousand pounds.

Natt Cowdin became a partner with Mr. Sabin in the soap business about 1860, the firm name being J. P. Sabin & Co. Some years ago Mr. Sabin retired from the business, and for the past twenty years or so Mr. Cowdin, in company with C. C. Walker, has carried on the concern, the firm name being Cowdin & Walker. A considerable business is done here, chiefly in soft-soap. Mr. Sabin died May 14, 1885.

In 1859 Charles Davis began the manufacture of soap in a shop on West Street. He soon formed a partnership with George H. Phelps, and in the course of a few years the firm moved into a new shop on Boutelle Street.

About 1871 Mr. Phelps sold his interest to Mr. Davis who then formed a partnership with his brother, Joel Davis, under the firm name of C. Davis & Co. For several years following the firm did not run the shop, but leased it to A. B. Gibbs & Co., and later to James Mitchell. C. Davis & Co. operated the shop from 1875 to 1882, when the business was given up. Charles Davis died October 29, 1885.

The firm of S. M. Brown & Co. had, for several years, a soap shop on Townsend Street near Pearl Street, but about 1881 the firm removed the business to a location near the Westminster depot.

In 1875 the value of the products of the three soap and candle factories in the city was over twenty-seven thousand dollars.

The Fitchburg Railroad Car Shops.—These are located in what is now called East Fitchburg and are in process of construction at the present time.

The plans prepared provide for six large buildings. Four of them range side by side, each being one hundred by four hundred and eighty feet, and covering about an acre of ground. The one nearest the river is to be the paint shop, the next the passenger car shop, the next the freight car shop and the easterly one the car repairing shop. Each of these immense buildings will be divided by two fire-proof cross walls into three sections.

Of the two other structures, which run at right angles to the four above-mentioned, one is to be the wood-working shop, sixty by three hundred feet, and the other, parallel with it, is to be the machine shop, sixty by four hundred feet. The wood-working shop will be two stories high and the other five buildings one story. The foundations will be Rollstone granite and the structures will be built of brick made at the yards of Edwin A. Goodrich, in this city.

The buildings will be substantial, well-proportioned structures and a credit to the Fitchburg Railroad and the city for which the corporation was named.

Brick Manufacturing.—Edwin A. Goodrich owns and operates three brick-yards in Fitchburg—one on Summer Street, one at South Fitchburg, and the Pound Hill yard, in the northwesterly part of the township. He makes several million bricks annually and has a well-established and prosperous business.

Bakeries.—These have been in existence here for over a century. The first mention of this industry occurs in relation to David Gibson, who, about 1781, built a bake-shop on the site where now stands the house which belonged to the late Ebenezer Torrey, Esq.

For the last sixty years or more there has been a bakery where the steam bakery of H. B. Boutelle now stands, on Circle Street (originally Baker's

Street). For many years this shop was carried on by William M. Pride. It is now under the proprietorship of Henry P. Boutelle, who employs steam-power in the manufacture of bread, crackers, etc., and does a large business, both in this city and in surrounding towns.

Other bakeries in town are operated by James Brock, Horton & Raymond and Phelps & Cooper. Herbert N. Rugg does considerable fancy baking of cake, etc., in connection with the manufacture of confectionery.

GRANITE QUARRYING.—Fitchburg, possessing as it does an almost inexhaustible supply of good granite near the city, in the shape of Rollstone Hill, has made the quarrying and working of granite one of her staple industries.

For many years this source of profit and employment was comparatively unused; during the past seventy-five years, however, extensive quarries have been opened and worked on this hill.

Among the earliest to engage in this business was Samuel A. Wheeler. Fitch Downe, who died recently, was for some years a granite contractor and worker.

For many years Mr. Wheeler did a large and important business in granite. Most of the time he was in company with others. In 1844 Charles Davis was his partner, and the firm furnished the Rollstone granite of which the Fitchburg Railroad Station in Boston is built, beside filling other large contracts. He was also in company with Joel Davis at one time.

Most of the dams and the stone-work of the bridges across the north branch of the Nashua, in Fitchburg, were built by S. A. Wheeler & Co., and still stand as a testimonial to the firm's thorough workmanship.

During the latter part of his business life his son, S. A. Wheeler, Jr., was his partner. Mr. Wheeler died August 30, 1883.

Wells R. Bardwell is another of the old-time stone-workers. He was at one time a member of the firm of Childs, Bardwell & Co., granite workers, on West Street.

The well-known granite firm of former years, Davis, Ames & Co., later Joel Ames & Co., should also be mentioned.

At the present time the following individuals and firms work quarries on Rollstone: Frederick A. Hale, Sylvester P. Litchfield and F. A. McCauliff & Co. There are also several parties engaged in working granite and as granite contractors, as follows: Henry E. Ames, George Hamilton, Daniel O'Connor, William T. Shattuck and George A. Terrell.

Large amounts of granite are annually taken from Rollstone and used for under-pinning and building purposes, paving blocks, flag and curb-stones, monuments, etc. The quarries are worked nearly all the year.

In this connection may be mentioned the industry of marble-working.

The firm of Hartwell & Reed, on Main Street, carries on one of the longest established marble-works in the country. The business was begun by Isaac Hartwell in 1831. Some twenty years later George Reed became his partner. Mr. Hartwell died some years ago, and the business is now carried on by Mr. Reed and his son, Edward H. Reed, the old firm name being retained.

THE FITCHBURG GAS COMPANY was organized in 1852, with a capital of sixty thousand dollars, and has since continued to manufacture gas for the illumination of our streets and dwellings. The company, of which Hon. Rodney Wallace is president, and Henry F. Coggshall treasurer, has gas-works near the railroad, a short distance southeast of the depot, with two gasometers of sixty-five thousand and twenty-eight thousand cubic feet respectively, and maintains about twelve miles of street-mains.

THE WACHUSETT ELECTRIC LIGHT COMPANY was incorporated in 1883, with a capital of one hundred thousand dollars, to furnish electricity for lighting purposes. The principal streets in the city are now illuminated by electric lights.

The central station of the company is on Water Street, and is furnished with a two hundred and seventy-five horse-power engine and the usual accompaniments. The capacity is upwards of one hundred and fifty Thompson-Houston arc lights.

Beside street-lights the company furnishes light for many of the stores in town, and, in the near future, proposes to furnish electric power for mechanical purposes. Arthur H. Kimball is superintendent.

There is space to speak of only a few more of the many other industries here that have not yet been mentioned. Though they may seem to be small when compared with some of the great corporations in town, yet they are all of importance to the prosperity of Fitchburg.

The few we shall mention are the American Pruning Company, the Fitchburg Carbonized Stone and Pipe Company, the Fitchburg Enamel Works, Fitchburg Pipe Covering Company, Fitchburg Spirit-Level Company, J. T. Smith, manufacturer of clothes-dryers, towel-racks, etc.; J. Joel and W. J. & F. C. Wheeler, cigar manufacturers; Marshall & Farnsworth, pulley-covering makers; H. B. Adams, S. G. Cushing and the Novelty Turning Company, manufacturers of all kinds of wood-turning, organ materials, etc.; C. L. Tenney, pattern and model-maker; Jonas Whitney, for about half a century a manufacturer of organ materials; S. N. Weston, reed manufacturer; Cyrus Tolman, maker of emery grinders, saw arbors, etc.; besides numerous carriage-makers, carpenters and building contractors, blacksmiths, etc., etc.

A volume might easily be written on this one subject of the mechanical industries of Fitchburg; but want of space compels the writer to omit much and condense what is written. The intention has been to treat all fairly, and it is hoped that this result has been accomplished.

CHAPTER XLIV.

FITCHBURG—(*Continued.*)

COMMERCIAL HISTORY.

In a sketch limited as this is we can expect to give only the briefest mention of the more important commercial enterprises which make Fitchburg a business centre of considerable note. It is true that the numerous large manufacturing establishments, which have been dwelt upon at some length in a previous chapter, are the mainstay of Fitchburg's prosperity; but her business-houses, banks and various other commercial organizations are also of great importance, though in a somewhat different way.

It seems proper to begin this chapter with a brief account of the railroad corporations, which unquestionably have been the most important factor in developing our natural resources and mechanical and commercial interests. Each one of these corporations is deserving of a more extended notice, but such would be beyond the scope of the present history.

Transportation Facilities.—Fitchburg is an important railroad centre. In a previous chapter the opening of the Fitchburg Railroad, in 1845, has been spoken of. It was followed three years later by the Vermont and Massachusetts, and about the same time the Cheshire Railroad was put in operation. A few years later the Fitchburg and Worcester Railroad was constructed, and still later the Boston, Clinton and Fitchburg Railroad commenced operations. Of late years railroad consolidation has been the rule, and the roads centreing in this city are no exception to it.

The Fitchburg and Worcester, and Boston, Clinton and Fitchburg are now divisions of the great system operated by the Old Colony Railroad Company, and give direct communication between this city and Worcester, Boston and all the cities of Southern Massachusetts, with close connections for New York City and the South.

The Fitchburg Railroad has grown into the great "Hoosac Tunnel Route," having leased the Vermont and Massachusetts Railroad, purchased of the State its great "bore," the Hoosac Tunnel, and railroads this side of and beyond the Tunnel, and now controls and operates about three hundred and fifty miles of road, most of which is double-tracked. This line gives the citizens of Fitchburg quick and direct communication not only with Boston and the central and western parts of Massachusetts, but also with Chicago, St. Louis and all the great Western cities. It forms one of the trunk lines between the West and the seaboard, and offers great advantages to shippers of freight.

The Cheshire Railroad is intact at the present time, though probably, at no distant date, it will be absorbed into the Fitchburg system. This road is operated from Bellows Falls, Vt., to South Ashburnham, Mass., and reaches Fitchburg over the tracks of the Vermont and Massachusetts Division of the Fitchburg Railroad. In connection with the Central Vermont Railroad, it offers a through line to all points in Vermont and Canada and is the shortest line from Boston to Lake George. Considerable Western freight comes over this road from the Central Vermont and Grand Trunk Railroads.

Over fifty passenger trains arrive daily at the Union Depot in this city, and heavy freight trains are almost constantly passing through, and it must be evident from this account, brief as it is, that the people of Fitchburg have no reason to complain of the facilities afforded them for traveling and transportation.

In addition to the steam railroads, we have a horse-railroad, recently put into operation by

The Fitchburg Street-Railway Company.—This company was incorporated April 10, 1886, with a capital of $60,000. Work was at once begun, and so rapidly was track-laying prosecuted, that the road began business July 1, 1886, and has proved a paying enterprise and a great convenience to the public. Henry A. Willis, Esq., is president of the corporation. The road is three and a half miles in length, extending from Sanborn Road, in West Fitchburg, through Westminster, River, Main and Summer Streets to the Fitchburg Park, near the Lunenburg line. Extensions have been authorized, and will be made before long, to Waite's Corner, in West Fitchburg, and the city farm in South Fitchburg. The road is well supplied with first-class cars, and upwards of forty good horses are owned by the company.

Banks.—There are at the present time in Fitchburg eight financial institutions—four national and four savings banks.

The Fitchburg National Bank.—This is the oldest in town and has previously been spoken of as the Fitchburg Bank, chartered in 1832. It was reorganized in 1865 under the National Banking Act. It has a capital of two hundred and fifty thousand dollars and a surplus of one hundred and forty thousand dollars. The bank began business in a small granite building which, in 1853, was replaced by a brick banking-house, where business was carried on until 1871. In that year the bank removed to its present commodious, and even palatial, quarters in the Fitchburg Savings Bank Block. Since 1871 the old brick bank building has been used by Crocker, Burbank & Co. as an office.

Hon. Ebenezer Torrey was officially connected with this bank from its commencement—the first twenty-seven years as cashier and after 1860 as president. Francis Perkins was the first president, and served until his death, in 1859. Mr. Torrey was elected his successor and held the office until his death, September 3, 1888. October 22, 1888, Brigham N. Bullock was elected president and H. G. Townend, cashier.

The Rollstone National Bank.—This bank, as stated in a previous chapter, was chartered in 1849 as the

Rollstone Bank. It was reorganized into a national bank in 1865, and has a capital of two hundred and fifty thousand dollars and a surplus of one hundred and forty thousand dollars. Its first banking house was a small granite building, standing on the site now occupied by the present handsome Rollstone Bank block, which was erected in 1869. Since 1869 the bank, in connection with the Worcester North Savings Institution, has occupied well-appointed and commodious banking rooms on the ground floor of this block.

Hon. Moses Wood was the first president of this bank and served until his death, in 1869. Alvah Crocker was then chosen president and served until January, 1873, when Henry A. Willis succeeded him. Mr. Willis still holds this position and has thus been officially connected with this bank for over thirty years, being cashier from 1858 up to the time he was chosen president. Wilbur B. Tenney has been cashier since 1881.

The Safety Fund National Bank.—This bank was organized April 17, 1874. Its capital is $200,000 and surplus $34,500. Business was begun July 1, 1874, in the second story of Belding & Dickinson's Block, and in March, 1875, was removed to its present location in Crocker Block. This substantial and handsome block was erected by Hon. Alvah Crocker, under an agreement for a twenty years' lease of the banking rooms to the Safety Fund National Bank.

The first president was Henry Allison, and the first cashier Frederick F. Woodward. In 1883 Mr. Woodward went into the grain business, and resigned his position as cashier. He was succeeded by George K. Tapley, who held the position until his removal to Springfield, early in 1888, to engage in other business. Joel G. Tyler, who has been identified with this bank, as book-keeper, since September, 1882, was appointed acting cashier until April 30, 1888, when the present cashier, Walter S. Jenks, was elected.

Mr. Allison has held the position of president up to the present date. Previous to the organization of this bank he was connected with the Fitchburg National Bank for some ten years, and has, therefore, had an experience of twenty-five years in banking.

The Wachusett National Bank.—This bank was incorporated May 20, 1875, chiefly through the efforts of Hiram A. Blood. Its capital at the start was $500,000, but was subsequently reduced one-half, leaving its present capital $250,000 and a surplus fund of $250,000. Business was begun June 1, 1875, in the rooms lately vacated by the Safety Fund Bank in Belding & Dickinson's Block. January 1, 1876, the business was removed to their present banking-rooms in the new Wachusett Bank block, at the corner of Main and Day Streets.

At the present time Omon H. Lawrence is president and George E. Clifford, cashier of this bank.

The Fitchburg Savings Bank.—This is by far the oldest savings bank in town, and was incorporated February 12, 1846, and went into operation on the 3d of the following June. Its business was done in the Fitchburg Bank building until 1871. In that year the Savings Bank erected the Fitchburg Savings building, the largest and most costly business block in the city. The Savings Bank has since then occupied spacious apartments on the same floor with and adjoining those of the Fitchburg National Bank.

Its first officers were Francis Perkins, president, and Ebenezer Torrey, treasurer, the same officers as the Fitchburg Bank had. At the present time Hon. Thornton K. Ware is president, Charles J. Billings, treasurer and Andrew Jewett, assistant treasurer. Deposits, October 31, 1888, $2,372,453.45. Number of depositors, 5888.

Worcester North Savings Institution.—This bank was incorporated May 26, 1868; organized June 13, 1868; began business July 6, 1868. Hon. Moses Wood was its first president and Henry A. Willis, first treasurer. Its banking-rooms are in the Rollstone National Bank building, in connection with the Rollstone National Bank. Since Mr. Wood's death Augustus Whitman, Benjamin Snow and Lowell M. Miles have served in the office of president. Mr. Miles resigned in 1886, and Hon. Amasa Norcross was elected to the office, and holds it at present. Henry A. Willis is still the treasurer, and Benjamin F. Wallis is assistant treasurer. Deposits, July 1, 1888, $2,593,309.15. Number of depositors, 6795.

The Fitchburg Co-operative Bank.—This savings institution was incorporated October 27, 1877, as "The Fitchburg Co-operative Saving Fund and Loan Association," but July 1, 1883, this name was changed, by legislative enactment, to the simpler one given above.

There is not space to give in detail the method of conducting business in this institution, but it is certain that its good influence has been very marked, for many persons have been induced by it to begin the saving of money in a small way. It has tended to encourage industry, economy and thrift, and well deserves the prosperity it has had in the last ten years.

Dr. Jabez Fisher has been its president from the beginning. George E. Clifford was treasurer during the first four years of its existence, and was succeeded by Charles F. Baker, who has since held the position. Joseph F. Simonds has acted as secretary during the life of the bank. His office is in a room of the Rollstone Bank building, and monthly meetings of the shareholders are held there for the transaction of business.

The Fidelity Co-operative Bank.—Early in the year 1888 the idea of starting a second co-operative bank in town took shape, and April 23, 1888, the Fidelity Co-operative Bank was organized. At that time George E. Clifford was chosen president and Frank

D. Page treasurer. The bank started with one hundred and forty-nine charter members and one thousand seven hundred shares subscribed for. It has a room for meetings and the transaction of business in Crocker block, and is a thriving institution.

The Fitchburg Post-Office.—The Fitchburg post-office was established July 1, 1811, and on that date the first postmaster, Jacob Willard, was appointed. He was succeeded January 1, 1813, by Calvin Willard, who seems to have held the position until November 7, 1825, when David Brigham was appointed.

In those early days the post-office was kept in private dwellings. In 1827, when Mr. Brigham was postmaster, the office was in the "Abram Dole house" for a time, and soon afterward was removed to a dwelling-house, further down what is now Main Street. This house now stands in Wesleyan Place, in the rear of the old Methodist Church, and a trace of its former use can now be found in the letter drop, in what was once the post-office room. A wheel about two feet in diameter, provided with alphabetical divisions for holding letters, was all the equipment used.

The next postmaster was Mark Miller, appointed by President Jackson, October 9, 1834. He removed the office to his book-store and printing-office, opposite the tavern, which occupied the site of the present Fitchburg Hotel. Mr. Miller soon resigned his position, and left town.

January 21, 1835, Nathaniel Wood was appointed, and held the position upwards of sixteen years. During his service the post-office was twice moved—in 1835 to a building nearly opposite the present *Sentinel* office, and about 1846 to Shepley's book-store, in the Torrey & Wood block. Call-boxes were first used in the early part of Mr. Wood's service.

May 3, 1851, Goldsmith F. Bailey, Mr. Wood's law partner, was appointed, and held the position two years. He retained the same location as his predecessor, and Mr. Shepley was his assistant.

May 4, 1853, President Pierce appointed John Todd postmaster. The office was soon after removed to much better quarters in the new town-hall building. Mr. Todd's assistant was Charles G. Giles. On account of his removal to New York, Mr. Todd resigned, and January 21, 1857, Joseph W. Mansur was appointed postmaster by President Buchanan. He was re-appointed February 21, 1861, but soon after was removed by President Lincoln. Mr. Giles remained his assistant for a while and was succeeded by Henry Allison.

In 1860 the postmaster's salary was $1727.26 per year.

September 4, 1861, Thornton K. Ware, Esq., was appointed by President Lincoln. His assistant was John W. Kimball. Mr. Ware was re-appointed, but was soon afterward removed by President Johnson, who appointed Colonel George E. Goodrich to the position October 16, 1866. Colonel Goodrich was re-appointed March 3, 1871, and February 24, 1875. His assistants were Alfred A. Marshall and Charles E. Wallace.

November 18, 1872, the post-office was removed to its present location in John M. Carpenter's building at the corner of Main and Church Streets. It was formerly the "Trinitarian Church," but was purchased by Mr. Carpenter in 1871 and entirely remodeled for the use of the post-office.

February 10, 1879, President Hayes appointed General John W. Kimball postmaster and he was re-appointed February 7, 1883. He retained Mr. Wallace as his assistant through his eight years of service.

In 1882 extensive alterations were made whereby much-needed space was added to the post-office accommodations. During the repairs the office was removed to a store in Spaulding's Block, corner of Main and Grove Streets.

In November, 1884, the free delivery service was begun with five carriers. Many of the call boxes, which were no longer needed, were removed, thus giving more room for the business of the office.

October 1, 1885, the special letter delivery service was begun.

The present postmaster, Frederick A. Currier, was appointed February 22, 1887, after a spirited but good-natured contest by four candidates. Mr. Currier retained Charles E. Wallace as assistant postmaster and nearly all the clerks and letter-carriers. An additional carrier was appointed September 1, 1887, and two more August 1, 1888, making eight carriers employed at the present time.

There are about fifty street letter boxes, so distributed as to accommodate as large a number of people as possible.

The business of the Fitchburg Post-office is shown by the following items from the returns of the office for the fiscal year ending June 30, 1888, which were kindly furnished the writer by Mr. Currier: $24,914.19 received from sale of stamps, postal cards and stamped envelopes; gross receipts from all sources $26,222.50; 15,886 money orders and postal notes issued or paid, amounting to $102,625.29; 6761 registered letters or packages handled; 1,917,045 pieces handled by the carriers; 3716 letters advertised; 938 special delivery letters delivered, and 716 special delivery stamps sold.

There is also a post-office in West Fitchburg. John F. Shea, the present postmaster, has held the position since November, 1885.

THE FITCHBURG BOARD OF TRADE.—This is the older of the two mercantile organizations in the city, and was formed in May, 1874. In 1876 the Board of Trade moved into its present rooms in the Post-office building.

THE MERCHANTS' ASSOCIATION.—This is the younger and at this time the more active of our two trade or-

ganizations, and its membership includes about every merchant in town. It was organized March 24, 1886, and Daniel Cross, the senior merchant in business here, was its first president. Regular monthly meetings are held. John F. Bruce is now its president.

TELEPHONE EXCHANGE.—The Fitchburg Exchange of the New England Telephone and Telegraph Co. has been established nearly ten years. The use of the telephone was introduced here by Eliot L. Caldwell, who was manager of the Exchange, 1880–82. The central office is now at 162 Main Street, and F. E. Bowker is manager. This Exchange includes, besides Fitchburg, the towns of Leominster, Ashby, Lunenburg and Townsend, and there are some three hundred subscribers.

THE FITCHBURG MUTUAL FIRE INSURANCE COMPANY.—This company was incorporated March 22, 1847, organized June 29th, and began business September 1st of the same year. Its first president was Hon. Nathaniel Wood, who held the position during the next twenty-six years, and was also its treasurer for twenty-four years.

For nearly twenty-five years the company's office was in the Torrey & Wood block; but soon after the completion of the Fitchburg Savings Bank block, the office was removed to the fine suite of rooms at present occupied by the company in that building. Hon. Amasa Norcross is now president, and Edward P. Downe, secretary.

THE MASSACHUSETTS MUTUAL AID SOCIETY.—This is strictly a Fitchburg institution, as far as its officers and management are concerned, though its certificates are now spread over a wide extent. It was among the first mutual benefit societies started in this State, and was incorporated February 17, 1879; and its first certificate was issued March 26, 1879. It is a purely mutual association. It has an emergency fund of over $5,000, over 2,500 outstanding certificates in force, representing nearly $5,000,000 of insurance, and has paid about $200,000 on account of death claims. Its membership has grown steadily, and the society has a high standing in insurance circles. From the first, it has been managed by prominent business men in this city. Henry A. Willis, its first president, served five years. He was succeeded by Henry F. Coggshall, who served three years. Henry A. Goodrich succeeded him and still holds the office. Festus C. Currier has held the office of secretary since the society was incorporated, and his efficient work has contributed greatly to its prosperity.

THE UNITED STATES MASONIC ACCIDENT ASSOCIATION.—This association, incorporated September 1, 1887, insures only Masons between twenty-one and sixty years of age. Its membership, at the present time, is about five hundred. Hon. Eli Culley is president; General John W. Kimball, vice-president; Charles S. Perry, secretary, and Joel G. Tyler, treasurer.

HALL'S COMMERCIAL BUSINESS COLLEGE.—This was recently started in town by Mr. A. O. Hall, who secured rooms in Wixon's block for the purpose. The present regular college year began September 4, 1888, with a good attendance. Instruction is given by Mr. Hall and competent assistants in book-keeping, banking, commercial law, short-hand, type-writing, telegraphy, &c., and the college has already made a very prosperous start.

The foregoing comprise the most important financial and commercial institutions and organizations at present existing in the city, and are all that we have space to mention in this chapter.

We will now briefly take up the business houses in the most important lines of trade in Fitchburg. It is, of course, not expected that a complete directory of all who are engaged in the different branches of trade will be given in the succeeding pages, but only a brief account of the business houses that have, for a considerable length of time, been identified with the commercial interests of the town and city.

GENTLEMEN'S FURNISHINGS.—We will begin with this line of trade because one of its representatives, Daniel Cross, is, as has been before stated, the senior merchant in active business in Fitchburg. Mr. Cross was born in Swanzey, N. H., and came to Fitchburg in 1833, when about twenty years of age. He established his business as a merchant tailor, in a small building where the City Hall now stands. At that time the only merchants in business here were Kimball & Farwell, dry goods and groceries, in the lower story of the present *Sentinel* building; E. F. Bunnell, dry goods, on the corner of what are now Main and Central Streets; and Silas H. Goodnow, who had a jewelry store in the same building with Mr. Bunnell.

In 1834 Mr. Cross removed to rooms over the store of Kimball & Farwell, where he remained eight years. He then moved into Heywood & Comee's Block, across the street, and was in the store now occupied by John F. Bruce & Co. until about 1876, when he took possession of his present commodious store in the Stiles Block.

Mr. Cross bears his years remarkably well, and is still as active as ever. He was the first president of the Merchants' Association, and in January, 1888, the Association tendered him a complimentary dinner.

Henry A. Goodrich, senior member of the firm of H. A. Goodrich & Co., ranks next in this line. A sketch of Mr. Goodrich appears in another portion of this volume. Mr. W. L. Humes is now the junior partner.

Three merchants, now in the same line of business in Fitchburg, received their training as salesmen in Mr. Goodrich's store, viz.: E. H. Spencer, A. J. Litchfield and Elijah Stebbins, Jr.; and not a few of his former salesmen have made names for themselves in other cities, notably E. B. Sears, now in the fur business on Summer Street, Boston; Robert Brooks, head salesman with Max Stadler & Co., New York;

and J. R. Wood, now furnishing salesman in Chicago, Ill.

The other leading dealers in gentlemen's furnishings in town, in the order of their establishment, are E. H. Spencer, Farnsworth Brothers, Albee & Lyons, Edward Connor, Litchfield & Stebbins, U. E. Cleveland, the Globe Clothing Store, H. E. Goodere and H. F. Leonard.

DRY-GOODS.–James F. Stiles is now the senior merchant in active business in this branch. He was born in Cavendish, Vt., and came to Fitchburg in March, 1841. After spending three years in the employ of Thomas C. Caldwell, the grocer, he went into the dry-goods business for himself. For the first two years he occupied the store in the Torrey & Wood block, where R. R. Conn's jewelry-store now is; he then removed a little farther up street, to what is now Warren Upton's market, and soon afterward moved across the street to the store next to the *Sentinel* building and under the Calvinistic Congregational Church. Here he remained ten years, when he removed to Central block, where he had his store until January 1, 1876, when he moved into his present well-appointed and commodious store in the Stiles block, which he built the year previous.

Leander Sprague ranks next to Mr. Stiles. For a few years he was in partnership with Mr. Stiles, under the firm-name of J. F. Stiles & Co. About 1852 the firm of L. Sprague & Co. was formed, consisting of Mr. Sprague and Timothy S. Wilson. The firm occupied a store in the Heywood & Comee block, and their business has been carried on there since. Mr. Wilson retired from the firm some years later, and for the last twenty years and more the firm has consisted of Mr. Sprague and Mr. Francis H. Colburn. In addition to dry-goods, this firm has, from the beginning, dealt largely in carpets, crockery &c.

Andrew B. Sherman started in the dry-goods business here in 1855. A sketch of Mr. Sherman is given elsewhere, to which the reader is referred.

The "L. J. Brown Store," latterly the leading dry-goods house in Fitchburg, was established by Luther J. Brown. For an account of it under his management the reader is referred to a sketch of Mr. Brown in another portion of this volume.

Since October 1, 1884, it has been managed by Frank I. Nichols and William A. Frost, under the firm-name of Nichols & Frost. This firm now owns the whole establishment, and carries on a very large and prosperous business.

Among the leading dry-goods stores, which have been more recently established in town, may be mentioned those of L. U. Hammond, E. G. Stowe, Girard & Irish, E. J. Moore & Co., the Boston Dry-Goods Store (E. E. Staples), Chamberlain, Huntress & Co., the Northern Supply Company, and J. L. Clark, in the city proper, and H. J. Lacey, G. A. Whitney and M. A. Shea & Co., in West Fitchburg.

GROCERIES.—The oldest store in the city at this time is that occupying the first story of the *Sentinel* building, and, as far as the writer can learn, it has always been occupied as a grocery store. For some years previous to 1835, Kimball & Farwell had a grocery and dry-goods store there. In April, 1835, David F. McIntire and Thomas C. Caldwell took the business, and the latter continued there until October, 1884,—a half-century, lacking six months. He then sold out to Warren S. Harris, and removed to Dorchester, where he still resides, though his familiar face is frequently seen in Fitchburg. Mr. Harris kept the store until the spring of 1888, when he disposed of it, W. M. Gray, of Gardner, being the purchaser. The passer-by now sees on the building a brilliant sign, recently put up, bearing this inscription:

T. C. CALDWELL GROCERY.

W. M. GRAY, PROPRIETOR.

Two of the leading grocers in town now, M. N. Benjamin and E. M. Read, received their business training at the hands of Mr. Caldwell.

The grocery business now conducted by S. D. Baldwin, under the Calvinistic Church, has been long in existence, having been established, in 1837, by his father, Joseph Baldwin, one of the old-time grocers, who died a few years ago.

The store of H. J. Lacey (who deals in groceries as well as dry-goods) in West Fitchburg, known as the "Old Baldwin Store," has also been long established.

The oldest established groceryman still in active business here is Mr. Henry A. Hatch, who began business in 1844, in the old Rollstone block, occupying that portion which is now George H. Chapman's shoe-store. In 1870 he built Hatch's block, at the corner of Main and Prichard Streets, where his business has since been carried on. For some years past, Perley Holmes has been in partnership with Mr. Hatch, under the firm-name of H. A. Hatch & Co., but in the spring of 1888 the partnership was dissolved, though Mr. Holmes still remains in the store.

There are now thirty-seven grocers in business here. Beside those we have mentioned a few may be noted as having been established for a goodly number of years and having a large family trade, viz.: Josiah Spaulding, J. F. Bruce & Co., A. L. Williams, & Co., C. R. Conn, J. A. Joslin, G. H. & T. Cutler, W. P. Guy, C. A. Cross, (wholesale), Daniel Boyle and T. H. W. Rice & Co.

MEATS AND PROVISIONS.—There are at the present time thirty meat and provision markets in Fitchburg. William C. Emory is the senior in this line, having been in the business here upwards of thirty years. Lowe Brothers & Co., however, represent the oldest established business. This firm and the branch house of Armour & Co. are wholesale dealers. Among other provision dealers who have been established in business here for a considerable number of years may be mentioned H. W. Emery, G. H. Ran-

del, J. F. Jaseph, H. P. Blood, W. W. Lamb and Frank A. Wood.

HARDWARE. — The hardware firm of Wright, Kendall & Co. was formed about 1857, and consisted of Isaac C. Wright, L. J. Kendall and J. H. Fairbanks. Mr. Wright is still in the same business and at the head of the large hardware firm of I. C. Wright & Co., the other members of the firm being M. B. Damon and R. D. Gould.

George B. Knowlton was for some time in the hardware store of Waldo Wallace, but for upwards of twenty years has been in business for himself, and for some years past has carried on a large hardware business in one of the fine stores in the Fitchburg Savings Bank Block. The other important houses in this line in town are those of A. B. Lawrence & Co., and Baker Brothers & Co.

For some thirty-five years or more, Lyman Patch has manufactured tinware and dealt in stoves at his present store in the old Town & Piper Block.

The foregoing comprise some of the more important and most numerously represented commercial interests of Fitchburg, and we will close this chapter with a mere mention of a few of the longest established houses in some of the lines of business not yet alluded to.

E. W. Willis & Co. represent the oldest furniture house, the business having been founded in 1845 by Sidney D. Willis.

Martin Webber has been in this line since 1876, and the Fitchburg Furniture Company has had a retail store here since 1884.

J. F. D. Garfield is the senior in the coal business, having begun it in April, 1864. Two years later the firm of Garfield & Proctor was formed. Recently the Garfield & Proctor Coal Company was incorporated and continues to carry on business at the old stand. Of the other eight coal dealers now in town A. R. Ordway and G. E. Waite & Co. have been the longest established.

Of the four confectionery manufacturers Herbert N. Rugg is the senior, his business having been established in 1871.

Among the booksellers and stationers Baker Brothers represent the longest established business—that of Stephen & Charles Shepley, founded in 1845. J. E. Thompson is the leading one among the other seven dealers in stationery, etc.

J. C. Sanborn keeps a well-stocked and attractive art store and W. A. Dunn deals largely in pictures and picture-frames in addition to stationery.

Of the twelve druggists in town Colonel H. G. Greene and W. A. Macurda have been the longest established—both having begun business for themselves in 1868. The "Old City" drug store, of which Colonel Greene is proprietor, and the "J. B. Lane" drug store, of which W. D. Curtis is now proprietor, are the two oldest in town. H. F. Rockwell, A. H. Burgess and H. A. Estabrook may be mentioned as having been in this line for some years.

J. C. Moulton is the oldest established photographer in the city, having been in business here since 1848. Kimball Brothers have been in this line for some years, and E. E. Howard has been more recently located here.

Samuel P. Durant takes the lead among the house painters, having been in the business some thirty-five years.

R. R. Conn, watch-maker and jeweler, is the oldest in his line, having begun business here in 1855. James H. Fairbanks, Oran S. Rice and L. N. Wilbur have been the longest established of the other seven jewelers in town.

George H. Chapman is the senior in the boot and shoe trade in Fitchburg, and Horace Hayward, who is in his employ, has probably been connected with this line of business longer than any other person in town.

S. G. Frost is the veteran harness-maker and Peter B. Howard the veteran hair-dresser.

The following are also seniors in their respective lines of business: J. Cushing & Co., flour and grain; S. A. Childs, real estate; Charles Mason, insurance; George Reed, marble-work; F. A. Beckwith, lumber; George Robbins, plumbing; J. E. Grant, mason; Silas Whitney, jobber.

Doubtless some individuals and firms have been omitted in the foregoing who deserve mention; but it must be borne in mind that it is impossible, in the space allotted to this department, to speak of all. The writer has endeavored to use his best judgment in selecting and to be impartial, and to give to readers of this work, outside of Fitchburg, a fair representation of the commercial interests of the city.

CHAPTER XLV.

FITCHBURG—(*Continued.*)

HOTELS, PUBLIC BUILDINGS AND BUSINESS BLOCKS.

THERE are at present ten hotels in Fitchburg, and two of them—the Fitchburg Hotel and American House—occupy the sites of early taverns. Over a century ago, Cowdin's tavern stood where the American House now is. The Fitchburg Hotel site has not been so long occupied for this purpose, but there has been a public-house there since early in the present century.

The American House was built in 1845 by David Boutelle and the easterly wing was erected in 1856. The property has passed through the hands of several individuals since then. Geo. H. Cole & Son conduct the business at present.

The Fitchburg Hotel was built about 1850 by the Fitchburg Hotel Company, of which Colonel Ivers Phillips was president. Dana L. Fuller now owns the hotel property and F. W. Judkins is the proprietor.

The location of the present National House is a comparatively old tavern site. The base of one of the original granite pillars in front bears the date 1831, in which year the house was erected. In those days it was known as the "upper tavern," while the house where the Fitchburg Hotel now is was called the "lower tavern." For some years the "upper tavern" had the name of Washington Hotel, and Daniel Moulton was proprietor. After a time the name was changed to Rollstone House, and within a few years another change has been made, and it is now the National House. P. J. Kehoe is the present proprietor.

The remaining hotels are of much more recent origin and are as follows: Citizens' House, Derby House, Drury House, Emory House, Hotel Westmoreland, Manchester House and Old Colony House,

Of most of the public buildings in the city more or less mention has already been made in preceding portions of this sketch. Only a brief summary of them will therefore be given in this chapter.

The finest and in every sense the most valuable public edifice in the city is the Wallace Library and Art Building, Hon. Rodney Wallace's gift to Fitchburg. It has been fully described in the section on "Libraries." It is located on Main Street nearly opposite Monument Park—one of the best situations in town—and is easily accessible to citizens in all parts of the city.

Plainly visible from the front windows of the library is the County Court House, a granite building of noble proportions standing in the rear of Monument Park. It was built in 1871 at a cost of about one hundred and twenty-five thousand dollars.

In the vicinity of these two fine buildings is the post-office, on Main Street, a neat brick edifice. The post-office and a small news-room occupy the lower floor, and in the upper portion of the building are the rooms of the Board of Trade and the Park Club, and also several offices.

A little farther up Main Street is the City Hall building, standing on the south side of the street. It is a large brick structure erected in 1852, the entire upper story of which is devoted to a hall—the largest in the city—while on the first floor are the various city offices. A police station occupies part of the basement.

On the north side of Main Street, near Prichard Street, is Whitney's Opera House building, which contains the only theatre in town. Andrew Whitney built and owns this block. The lower story is devoted to stores and the theatre occupies the upper portion. The auditorium has a seating capacity of about one thousand. This theatre was first opened to the public October 20, 1881, and has enjoyed a good patronage since.

Among other public buildings mention may be made of the fine Union Passenger Station, the High School building, on High Street, the County Jail, a handsome and substantial brick structure, in South Fitchburg, and the Almshouse, also in South Fitchburg, a pleasantly located and well-conducted public charitable institution maintained there since 1828.

Most of the business blocks have been spoken of in the early part of this sketch. By far the handsomest and most costly building in town is the Fitchburg Savings Bank block, which was built in 1870–71 by the Fitchburg Savings Bank. It is situated on Main Street, nearly opposite the City Hall building, and has a frontage on the street of one hundred and eight feet. The front is built of Fitzwilliam granite and is four stories high. The ground floor is divided into four stores, as commodious and well-appointed as any in Worcester County. On the second floor, which is reached by a wide entrance and stairway in the centre of the block, are the banking rooms of the Fitchburg National and Fitchburg Savings Banks, the office of the Fitchburg Mutual Fire Insurance Company, and several law-offices. The two upper stories are occupied by the Masonic organizations in town. Their lodge-room and apartments are among the finest in the State.

The cost of this magnificent block was nearly two hundred thousand dollars.

The Rollstone National Bank building is a fine brick and freestone structure, four stories high, on Main Street, near the railroad station. On the ground floor are the banking-rooms of the Rollstone National Bank, and the Worcester North Savings Institution, and the large dry-goods store of A. B. Sherman. In the upper portion, the Odd Fellows and Grand Army Post have commodious lodge-rooms and apartments.

This block was built in 1869 at a cost of sixty thousand dollars.

There are many other business blocks in town, among which may be mentioned Central, Goodrich, L. J. Brown, Belding's, Crocker, Hatch's, Wachusett Bank, Opera House, Stiles', Torrey & Wood, Wixon's, Union, Cushing's, Coggshall & Carpenter's and Dickinson's blocks.

The ground floor of the Fitchburg Hotel and of the American House wing is in each case used for mercantile purposes.

CHAPTER XLVI.

FITCHBURG—(*Continued.*)

CITY DEPARTMENTS.

In this chapter will be given a short account of the various departments maintained by the city for the benefit and protection of the citizens.

Fitchburg Water-Works.—The Water Department dates back to the year 1870, when the first Board of Water Commissioners was appointed. Previous to this time the people had obtained water from wells or springs, and the only public action of

the town had been to establish the town pump, sundry reservoirs for use at fires and to authorize the establishment of two public watering troughs, which, however, were not erected for some years.

During the six years preceding 1870, the subject of furnishing the town with an abundant supply of pure water was pretty thoroughly discussed. April 11, 1864, the town appointed Alvah Crocker, Lucius Aldrich, Alpheus P. Kimball, Charles Burleigh and James B. Lane a committee to ascertain "the best method of furnishing its more elevated streets with a proper supply of water in case of fires, and hydrants to conduct and distribute the same."

Nothing was heard from this committee until the annual town-meeting, April 9, 1866, when a report was made to the effect that they had secured an act of incorporation, and purchased land covering the necessary sites for dams, etc. This land comprised about one hundred and seventy-five acres in the vicinity of Scott, Shattuck and Falulah Brooks, and the price paid for it by the committee was $6612.70. The report also presented a plan providing for two reservoirs, having a storage capacity of about three hundred million gallons and estimates in regard to the cost of laying the necessary mains.

This report was accepted and ordered to be printed together with the act of incorporation. By this act the five members of the committee were made a corporation under the name of the Pearl Hill Water Company, to furnish the inhabitants of Fitchburg with pure water. No further action was taken by the town in regard to the report or the act of incorporation.

At this same meeting, April 9, 1866, a committee of twenty-five was raised to take the whole matter into consideration and report at an adjourned meeting. May 7, 1866, this committee reported, recommending that a committee of five be appointed, and authorized to employ an engineer to make a survey, and present to the town plans and estimates. The report was accepted, and Eugene T. Miles, Dr. Alfred Hitchcock, Louis D. Bartlett, Abel F. Adams and Rodney Wallace were appointed as the committee.

August 25, 1866, this committee made an elaborate report, in which provision was made for two reservoirs on Falulah Brook, and estimates of the cost of the necessary mains and two reservoirs were given, varying from $116,000 to $153,000, according to the height of the dams. This report was accepted, and the subject indefinitely postponed.

April 8, 1867, it was voted to print this report, at an expense not exceeding $100, and circulate it among the citizens.

May 6, 1867, the selectmen and fire engineers were authorized to purchase Durant Pond for fire purposes, but no action was ever taken in regard to it.

The selectmen in 1868 tried in vain to secure water supply for public watering troughs; but in 1869 the town purchased water rights of Daniel Messinger, and voted, August 30th, that the selectmen be authorized to purchase land for storage purposes. The land was bought and pipe provided, but not until it was too late in the season to begin work, and nothing further appears to have been done about it.

November 2, 1869, the subject of a general water supply was again brought before the town, and a committee, consisting of Hon. Alvah Crocker, Hon. Ebenezer Torrey and Moses G. Lyon, Esq., was appointed to obtain from the Legislature a charter for supplying the town with pure water.

March 19, 1870, an act was approved, by virtue of which the three above-named gentlemen were made a corporation, under the name of the Fitchburg Water Company, to provide the town with a water supply, and specifying that the town might at any time, within one year from the passage of the act, assume all the rights and privileges of the corporators, by a majority vote in town-meeting.

April 25, 1870, the town refused to accept this charter by a vote of 236 to 226. A week later a motion to reconsider this vote was lost, 334 to 309. The vote was very close, which encouraged the friends of the measure and forced its opponents to take active means to defeat it.

June 18, 1870, Messrs. Salmon W. Putnam, Walter Heywood, Joseph Cushing, Lyman Patch and Dr. Thomas Palmer were appointed a committee to examine "Meeting-House Pond," in Westminster, and authorized to make a survey if it seemed to them feasible to secure water rights there. On the 16th of the following July this committee reported that water rights could not be obtained there upon any terms that would justify making a survey.

August 6, 1870, the question again came before the town. A preliminary resolution "that this Town is in favor of the introduction of water from some source," was introduced and carried by a vote of one hundred and ninety-six to six. A ballot was then taken on the question whether the town would assume the provisions of the charter, which was carried in the affirmative by a vote of four hundred and nineteen to one hundred and twenty-six.

In accordance with the provisions of the act, the selectmen appointed the first Board of Water Commissions, consisting of Jabez Fisher, Joseph Cushing, Alpheus P. Kimball, Thomas Palmer and Lucius Aldrich, and this board was duly organized August 17, 1870.

April 5, 1871, a contract was signed with George H. Norman, of Newport, R. I., for the construction of the water-works. As soon thereafter as the weather would permit work was begun, and at the end of the season Overlook and Marshall reservoirs were completed, about nine and a half miles of cement-lined water-mains laid, and seventy-one gates and ninety-four hydrants set. Hydrant water was first used at a fire on Summer Street, January 5, 1872.

In the early part of 1872 a second contract was made with Mr. Norman for water-main extension. This contract was completed before winter, and on December 1, 1872, there were a little over fourteen miles of water-mains laid, and one hundred and thirty hydrants set.

Mr. Norman's work was well done, and the Water Commissioners were entirely satisfied with the manner in which both his contracts had been carried out.

The total cost of the Water-Works up to the time when Fitchburg assumed the city form of government is shown by the following summary:

Amount of George H. Norman's contract, 1871	$180,508 76
Amount of George H. Norman's contract, 1872	35,741 68
Discount on bonds	9,605 82
Maintenance, land, service-pipe, etc	61,566 12
Total cost to January 6, 1873	$287,422 38

A sufficient account has already been given, in the section on the history of the city, of the extension of the water supply during the past fifteen years. Statistics of this department, November 30, 1887, show the following: Fourteen miles of cement mains, twenty-one miles of iron-mains, twenty-seven miles of service-pipe, two hundred and fifty-six hydrants, five hundred and forty-five meters, two thousand nine hundred and seventy-eight families, stores, manufactories, etc., supplied with water, and a total cost of the works to date of $621,701.32.

Two more reservoirs have been constructed since 1873—Scott and Falulah—making four in all, with a total capacity of over 300,000,000 gallons. The height of these several reservoirs above the tracks of the Fitchburg Railroad at Water Street is: Scott, 450 feet; Overlook, 405 feet; Falulah, 236 feet; and Marshall, 216 feet.

The Board of Water Commissioners, as at present constituted, consists of three members. The term of service is three years, and one member is elected in January of each year by the City Council in joint convention. The members of the board for 1888 are Charles H. Brown, Thomas C. Lovell and Samuel D. Sheldon.

Thomas C. Lovell, the present superintendent of the water-works, has held the position since 1875, and has also been city engineer since 1880. Arthur W. F. Brown has held the position of water registrar since January, 1885. Both these officers are elected by the Board of Water Commissioners.

FITCHBURG FIRE DEPARTMENT.—Most of the facts in the following account of the Fire Department are taken from a very instructive pamphlet entitled, "The Fire Service of Fitchburg," which was published early in 1888 by the Fitchburg Firemen's Fund Association.

The first fire-engine, as was stated in a previous chapter on the early history of the town, was purchased by vote of the town in 1823, and was located on what is now Day Street. A few years later a second engine was purchased—probably the old "Fitchburg"—and was located in a house on what is now Academy Street. These two "tubs" appear to have answered the purpose of the town for several years.

About 1835 a new engine was purchased, and the "Fitchburg" given to the youth of the town, who formed a company and, by the aid of subscriptions from the citizens, ran it for some years. This was in the boyhood days of some of our present citizens who belonged to this company, and can relate pleasing reminiscences of the by-gone days when they attended "firemen's musters," or carried the "whiskey-pan," which was as much an essential to the proper working of the "Department" as were the buckets with which the old hand-machine was fed with water.

About 1845 two more engines were bought, which were built exactly alike and were the pride of their respective companies. One of them was called "Conqueror, No. 1," and was located on West Street, and the other, "Washingtonian, No. 2," replaced the old machine on Day Street.

In the spring of 1851 what was then considered a very extravagant purchase was made. A new and large engine was bought, costing $1500, of which amount the town paid $1000, and $500 was subscribed by the citizens. This was named "Mazeppa, No. 3," and a new engine-house was built for its accommodation in Factory Square. One of the old machines had been placed in West Fitchburg and another in Crockerville, so that at the time the act establishing a Fire Department in the town of Fitchburg was approved, in April, 1851, the fire apparatus of the town consisted of five hand-engines, named as follows: Conqueror, No. 1; Washingtonian, No. 2; Mazeppa, No. 3; Alert, No. 4, West Fitchburg; Veteran, No. 5, Crockerville.

In accordance with the provisions of the Act relating to Fire Departments, the selectmen of Fitchburg, on April 12, 1851, appointed the first Board of Engineers of the Fitchburg Fire Department. It consisted of twelve members, as follows: Kilburn Harwood, Ebenezer Torrey, Jonas A. Marshall, John H. Wheeler, Chedorlaomer Marshall, John Caldwell, John Clark, Alpheus Kimball, Ivers Phillips, Levi Sherwin, Salmon W. Wilder and Alvah Crocker. One week later this board was duly organized by the choice of the following officers: Kilburn Harwood, chief engineer; Ivers Phillips, first assistant engineer; Jonas A. Marshall, second assistant engineer; John Caldwell, third assistant engineer; Ebenezer Torrey, clerk of the board.

No special changes occurred in the apparatus for some years, except that the name of engine No. 2 was changed from Washingtonian to Fire King. In 1858 Alert, No. 4, was put out of service and a new engine, Undine, No. 4, was purchased at a cost of ten hundred and twelve dollars. In the same year a small hose-carriage, made by Charles Fessenden, was pur-

chased at a cost of two hundred and forty-three dollars. About this time also the first hook-and-ladder truck was bought.

In 1859 the first horses were bought for the use of the department.

In 1865 the first steam fire-engine, Wachusett, No. 1, was purchased at a cost of about four thousand dollars, and a year or two later a second steamer, Rollstone, No. 2, costing nearly five thousand dollars, was bought; and in 1869 steamer Wanoosnac, No. 3, costing four thousand dollars, was bought and placed in its new brick house in West Fitchburg. The hand-engines were gradually replaced by hose-carriages built by the Union Machine Company of this city.

In 1870 the Gamewell fire-alarm was introduced at an expense of eight thousand dollars. It was a two-circuit repeater, and strikers were placed on three bells in town,—the Unitarian, Baptist and Rollstone Church bells. In 1888 a new system was ordered, which was put up during the summer of 1888. It is a six-circuit repeater of the Gamewell pattern.

Firemen's musters have frequently been held in Fitchburg, and on October 10 and 11, 1871, one of the largest musters ever held in New England occurred here.

The apparatus in service at the present time consists of two steam fire-engines, one two-horse hose-reel, one two-horse hose-wagon, two one-horse hose-reels, two two-wheeled hose-tenders, two two-horse hook-and-ladder trucks, one exercise sleigh, and one large sled for Hook-and-Ladder No. 1, in active service; and one second-class steamer, one two-horse hose-reel and two two-wheeled hose-tenders in reserve.

The department has in service 7,960 feet of rubber-lined cotton hose, 1,550 feet of linen hose, and 150 feet of old leather hose.

The value of this department is, and has been, fully appreciated by our citizens, and ample provision is willingly made for all its needs. At the present time, the numerous hydrants in all parts of the city, the forty fire-alarm boxes, and the promptness and efficiency of the engineers and firemen, render it difficult for a fire to get much headway in Fitchburg. In the following table are given statistics in regard to the fires with which the department has had to contend during the last quarter century where the damage was $10,000 or over:

Date.	Property.	Loss.
Jan. 2, 1865	Paper-mill of Crocker, Burbank & Co	$20,000
Oct. 8, 1865	Vt. & Mass. R. R. repair-shop	13,000
June 13, 1869	Lorenzo Barker's lumber-yard	13,000
July 21, 1870,	Heywood Chair Co.'s chair-shop	90,000
	Alvah Crocker's buildings	19,000
	Smith, Page & Co., iron-foundry	12,000
March 7, 1871	Paper-mill of Crocker, Burbank & Co	18,000
March 6, 1872	American Rattan Co.'s stock house	14,000
Feb. 3, 1873	L. B. Farnsworth's clothing store	16,000
Sept. 15, 1873	Buckeye Mowing-Machine Co.'s shop	15,000
July 9, 1876	County Jail at South Fitchburg	40,000
Oct. 15, 1884	Crocker, Burbank & Co.'s "Snow Mill,"	35,000
Oct. 17, 1885	L. H. Goodnow (Rollstone Iron Foundry)	15,560
Oct. 26, 1885	L. A. Lowe & Co.'s pork-packing establ'mt	24,657
Jan. 29, 1886	"Buckeye Shops"	11,700
April 6, 1888	Walter Heywood Chair Mfg. Co. (1 bldg.)	25,000

The Board of Engineers consists, at the present time, of a chief, four assistants and the superintendent of the fire alarm, who are chosen annually by the City Council in convention in November. The members of the Board for 1888 are, David W. Tinsley, chief; Geo. H. Kendall, first assistant; Boardman Parkhurst, second assistant; James N. Whiting, third assistant; Geo. E. Wellington, fourth assistant; and John W. Rand, superintendent of the fire-alarm telegraph. There are upwards of sixty firemen attached to the several companies.

December 12, 1879, the Fitchburg Firemen's Fund Association was incorporated for the purpose of mutual aid and relief in cases of accident or injuries received by its members while discharging their duties as firemen. Every member of the department belongs to it, and the funds in the treasury now amount to about $1500. Frank C. Foster, foreman of Hose 1, is now its president.

The following is a list of those who have served as chief engineers since the department was organized: Kilburn Harwood, 1851; John H. Wheeler, 1852–54; James B. Lane, 1855; Alpheus P. Kimball, 1856–59; Lucius Aldrich, 1860–64; Francis Sheldon, 1865–66; Eugene T. Miles, 1867; Lucius Aldrich, 1868–73; Geo. H. Manchester, 1874–76; A. J. Green, 1876–77; Geo. Reed, 1877–84; David W. Tinsley, 1884 to the present time.

Police Department.—About 1839 there was organized in Fitchburg a "Society for the Detection of Thieves." Ebenezer Torrey was then president, Samuel Willis, treasurer, and Asa Partridge, secretary, of this society. There was a standing committee of twelve members and a "pursuing committee," also numbering twelve. This society lasted some time, and did good work in breaking up several bands of thieves.

Up to the year 1869 all police work in Fitchburg was done by a few constables and private enterprise; but on September 23, 1869, a Police Department was regularly organized, consisting of a chief and five police officers. Charles E. F. Hayward was the first chief of police.

During the first six months of the existence of this department one hundred and thirty-one arrests were made, and during the next year (ending March 31, 1871) three hundred and ninety-one arrests were made, showing conclusively the need of a police force.

Under the city form of government the chief of police and members of the department are appointed annually in January by the mayor and aldermen. For 1888 the police force consists of Sumner P. Lawrence, chief; Asahel Wheeler, captain; and fourteen patrolmen. This is by no means a large force considering the population of the city; but it is in an excellent state of discipline and has always proved amply sufficient to maintain public order.

Fitchburg has always been singularly free from crimes of a serious nature, and the number of arrests made annually is not much larger now than it was fifteen years ago, though, in the meantime, the city has nearly doubled in population.

During the past few years the temperance sentiment has predominated among our citizens, and the police officers have done good work in suppressing the sale of intoxicating liquor.

The following is a list of those who have served in the office of chief of police since the organization of the department: Charles E. F. Hayward, 1869–71; M. Edwin Day, 1872; Russell O. Houghton, 1873–74; Alpheus P. Kimball, 1875; Aaron F. Whitney, 1876–81 and 1883–85; William Gilchrist, 1882; Charles H. D. Stockbridge, 1886–87; Sumner P. Lawrence, from January, 1888, to the present time.

Highway Department.—Enough has been said in the chapters on the history of the town to show that from the very first the people of Fitchburg have had more than ordinary difficulties to contend with in keeping their streets, bridges, etc., in a tolerable state of repair. The selectmen had charge of all these affairs up to January, 1873; and since then five sub-committees, appointed annually from among the members of the Board of Aldermen and Common Council, have had the general charge of the various portions of the work of the Highway Department. A superintendent of streets is elected annually by the City Council, who has the immediate control and direction of all the work done in the Highway Department.

The following is a list of those who have held the position of superintendent of streets since Fitchburg became a city: George W. Holman, 1873–74; Joel Davis, 1875–77; F. W. Aldrich, 1878–82; Abram G. Lawrence, 1883–86; Thomas Larkin, Jr., from January, 1887, to the present time.

Poor Department.—The selectmen acted as overseers of the poor up to within a few years of our incorporation as a city. During the last few years of town government a Board of Overseers, consisting of three members, was chosen at the annual town-meeting. Under the city form of government, the Board consists of the mayor and president of Common Council, *ex officio*, and three members chosen in January by the City Council, in the same way as the water commissioners are chosen.

The Board for 1888 is as follows: Hon. Eli Culley, mayor; Henry F. Rockwell, president of the Common Council; Samuel S. Holton, Isaac C. Wright and Aaron F. Whitney.

The city farm is very pleasantly located in South Fitchburg, and has, for several years, been under the efficient supervision of Mr. Norman B. Stone, superintendent, and Mrs. E. T. Stone, matron. The value of the city farm and personal property thereat is now over thirty-three thousand dollars, and there are between fifty and sixty inmates.

CHAPTER XLVII.

FITCHBURG—(*Continued.*)

ORGANIZATIONS AND SOCIETIES.

In this section will be given short accounts of the most important of the many organizations and societies of various kinds at present existing in the city.

The organization in which the people of Fitchburg take the most pride is

The Fitchburg Military Band.—The origin of this band dates back to January 4, 1868, when eight gentlemen met in an unfinished room in the then new Belding & Dickinson's block, and organized "The Musical Club." Through the efforts of these gentleman was organized, on March 26, 1868, the Fitchburg Cornet Band, with thirty-three members, and Mr. George Rich, leader and director.

The first public appearance of this band was on May 27, 1868, with the Fitchburg Fusiliers. During the balance of that year thirty-one engagements were filled. The band prospered and improved until Mr. Rich left his position, January 16, 1871.

March 11, 1871, Ira W. Wales, of Abington, was elected leader of the band, but held the position only about a month, and on April 19th, owing to some trouble or other, it was voted to discharge the leader and disband the organization; but on the 3d of the following May nine of the members met and re-organized the band, and chose Mr. Rich leader. For some reason matters did not go on satisfactorily, and in the latter part of 1871 the band went to pieces and came near utter extinction. Five plucky members were resolved to have a band in Fitchburg if it were a possibility, and through their efforts Mr. Warren S. Russell, a gentleman of well-known musical ability, was secured as leader. The band was again re-organized January 11, 1872, and under the faithful and skilful management of Mr. Russell, attained almost the highest rank among the musical organizations in New England. In the course of a few years the name of the band was changed to the "Fitchburg Military Band."

For thirteen years this band filled engagements for the summer at Lake Pleasant, near Greenfield, Mass., and was one of the chief attractions of the place. During the two past seasons it has been engaged to furnish music for the Carnival Club at Cottage City, Martha's Vineyard, for the entire summer, and has won the highest praise of the many musical critics there assembled.

In March, 1884, the city, and especially the Fitchburg Military Band, suffered a very great loss in the death of Mr. Russell, who was then in the prime of life. His funeral occurred March 18, 1884, and was very largely attended. Business was generally suspended in town during the afternoon of that day, and

all united to pay honor to the dead musician. Mr. D. W. Reeves, always a warm friend of Mr. Russell, was present at the funeral, with his well-known American Band of Providence, R. I., whose members voluntarily tendered their services for the sad occasion gratuitously, and there were many beautiful floral tributes from musical organizations throughout New England.

After Mr. Russell's death the business management of the band was put into the hands of a committee of five, chosen annually by the active members, from both active and honorary members. In June, 1884, this committee, very fortunately, secured as leader and director Mr. G. A. Patz, formerly leader of the celebrated Gilmore's Band, of Boston, and under his leadership our band has maintained its former high standing, and become widely known and appreciated. The band has a very large and complete library, containing the works of all the noted composers.

In the spring of 1888 some changes were made in the band, and at the present time all the active members of the organization are residents of Fitchburg. Mr. J. L. Miller was chosen agent and treasurer, and the general management of the business of the band was placed in the hands of a committee of three. At the present time the band consists of G. A. Patz, leader, and twenty-three active members, each one of whom is a musician skilled in the use of his own special instrument. Connected with the band is an orchestra of high standing, and named, out of respect to the former director, the Russell Orchestra.

December 27, 1887, the band suffered a serious loss in the death of Charles A. Dadmun, who played the tuba and was the efficient agent and treasurer of the organization.

The Fitchburg Military Band is now one of the permanent institutions of the city, and is held in the highest esteem by our citizens, who, by their generosity, have enabled the organization to maintain its high reputation; and the fine open-air concerts which the band gives from the band-stands on the Upper and Lower Commons during the early summer and autumn evenings, as often as engagements permit, amply repay the citizens for all they have done to assist the band.

Edwin V. Sumner Post 19, Grand Army of the Republic.—This was organized as an encampment August 16, 1867. It was later called a post, and the name Edwin V. Sumner was adopted September 8, 1868.

Charles H. Foss was elected the first commander; since then thirteen members have held the position, the present commander being Charles H. Glazier.

The post has been active in all good works, and by means of the fund that has accumulated during the last twenty years has accomplished much for the relief and benefit of its members, the amount expended for relief and sick benefits, from its organization to the present time, being about ten thousand dollars. In order to maintain and increase its fund for this charitable work the post has held fairs, had lecture courses, etc., which have always been well patronized by our citizens.

At the time of the establishment of the Soldiers' Home in Chelsea, a few years ago, it gave more than any other post, in proportion to its numbers and means,—$1,083.18.

In 1883 the post moved into its present elegant and commodious rooms in the Rollstone National Bank building. At some future time the members hope to have a building of their own; and with this idea in view, the Edwin V. Sumner Building Association was incorporated a few years since for the purpose of holding real estate, and now owns a "cottage" in the city.

Upon the roster of Post 19 are about five hundred and thirty names, and the present membership is about two hundred and fifty.

This post has always been rated high at department headquarters, and has had its share of State and National honors. Two department commanders of Massachusetts have been taken from its ranks,—John W. Kimball and Charles D. Nash—and a commander of the Department of Ohio, Daniel C. Putnam, a native of Fitchburg.

In the latter part of 1877 the post appointed a committee to consider the matter of inviting the ladies to form a Relief Corps, and as a result the Edwin V. Sumner Relief Corps, No. 1, was organized in January, 1878, and has since then effectually aided the post on many occasions.

In July, 1883, Clark S. Simonds Camp, No. 28, Sons of Veterans, was organized, and one of its past captains, Colonel Nathan C. Upham, of this city, has already attained prominence in the State and National organizations.

There was, for a short time, in Fitchburg an organization which may fairly be regarded as the origin of the present widespread and powerful Grand Army of the Republic. Its name was

Taylor Union, No. 1, Army and Navy Veterans.—One evening in the latter part of May, 1865, five army veterans—Richard Tucker, Robert Elliott, W. A. Hardy, S. W. Harris and W. S. Hersey—met casually on Main Street, and in the course of conversation the subject of forming an association for taking care of sick or disabled comrades was broached. The result was that a few nights later a meeting was held in Washington Hall, and the "Army and Navy Veterans' Union" was organized. At a subsequent meeting it was voted to change the name to "Taylor Union, No. 1, Army and Navy Veterans," in remembrance of George C. Taylor, Company B, Fifteenth Regiment, who fell at Ball's Bluff, and was the first Fitchburg volunteer killed in battle.

This organization was chartered January 2, 1866, with twenty-one charter members.

During 1865–66 some eighteen unions were organized in towns in this vicinity—Leominster, Gardner, Templeton, etc.

A purchasing agent from Illinois was in Fitchburg during the latter part of 1865, and became much interested in Taylor Union. He carried a copy of its by-laws home with him, and soon after sent for five more copies; and in February, 1866, Dr. Stephenson, of Illinois, suggested the formation of the Grand Army of the Republic. Whether or not the idea was obtained from the copies of the by-laws sent there is not known, but it is, to say the least, a remarkable coincidence.

Taylor Union naturally gave way to this new and stronger association and became merged in the present Edwin V. Summer Post 19.

A "Dorcas Union" was also instituted in 1866, and was probably the origin of the present Relief Corps.

THE WORCESTER NORTH AGRICULTURAL SOCIETY was organized in 1852 and includes the city of Fitchburg and the towns of Leominster, Sterling, West Boylston, Princeton, Lunenburg, Ashburnham, Westminster, Gardner, Templeton and Royalston, in Worcester County, and the town of Ashby, in Middlesex County, though persons in any part of the State may become members.

This society formerly owned fair grounds on Summer Street comprising some thirty acres of land, and provided with a half-mile track, suitable exhibition buildings, sheds, etc. The annual fair is still held on these grounds the last Tuesday and Wednesday in September, though for the past year or two the property has been owned by

THE FITCHBURG PARK COMPANY, which was organized May 18, 1887, with a capital of eleven thousand dollars, for the purpose of purchasing these grounds and improving them for use as a park.

THE FITCHBURG AGASSIZ ASSOCIATION.—This is Chapter 48 of the National Association, and was formed in January, 1886, by the union of four chapters of the Agassiz Association and the Young American Industrial Society. It is doing a good work among the young people in the city, by training them to become careful observers of natural phenomena. Many valuable papers, on various scientific subjects, have been prepared by the members, and some have been published. In April, 1888, this Association began the publication of a monthly journal, *The Scientist.*

THE YOUNG MEN'S CHRISTIAN ASSOCIATION was organized in October, 1886, and, December 27, 1886, took possession of their present convenient and pleasant rooms in Twitchell's block. The membership is upwards of three hundred, and the association is doing much good among the young men of the city. A monthly organ is published, *The Beacon Light.* Some twenty years ago there was a Young Men's Christian Association, which flourished for a time, but disbanded after a few years' existence.

THE FITCHBURG BENEVOLENT UNION was organized March 6, 1876, and incorporated February 10, 1886, and includes in its membership many of the benevolent and philanthropic citizens of Fitchburg. It is entirely unsectarian, and its object is to distribute charity wisely and to help the poor to help themselves.

THE FITCHBURG HOME FOR OLD LADIES sprang from the "Ladies' Union Aid Society," and was made a corporation in 1883. A house on the corner of Summer and Beacon Streets was purchased and furnished for a home and was opened for use in June, 1886. The bequest of Mrs. Elizabeth Boutelle Robinson, a life-member of the corporation, who died in August, 1885, rendered it possible to purchase this house. The president of the corporation, Dr. A. W. Sidney, has also done much to establish the home.

THE UNION AID HOSPITAL OF FITCHBURG was incorporated March 26, 1885. The need of a hospital in this city has been evident for some years, and the object of this corporation was to arouse public sentiment and accumulate enough money to start a hospital on a small scale. The late Gardner S. Burbank appreciated this need and left an ample sum, which, at some future time, will establish here a large hospital.

THE FIREMEN'S RELIEF ASSOCIATION has been spoken of in the chapter on city departments.

Of the many other organizations existing in Fitchburg for the public good or social intercourse we have space merely to mention the names of a few.

The Park Club and Windsor Club are both social organizations; the Chapin Club, a social and literary society connected with the First Universalist Church; the Arlington Club, social and beneficial; Fitchburg Congregational Club; French Literary Club; Fitchburg Harvard Club, composed of graduates of Harvard College residing in the city; Railroad Men's Relief Association; Railroad Men's Christian Association; Fitchburg Teachers' Association and the Fitchburg Woman's Suffrage League.

TEMPERANCE ORGANIZATIONS. — *The Fitchburg Woman's Christian Temperance Union* began its existence in January, 1875, and has ever since kept up its practical temperance work, which, though quietly done, has proved very effective. Among the most important results achieved by the Union was the formation, in January, 1876, of

The Fitchburg Reform Club.—By invitation of the Union, Dr. Henry A. Reynolds visited Fitchburg and organized this club, its object being to reclaim men who were addicted to the use of liquor and make them respectable citizens. This work the club has faithfully performed during all the years of its existence, and with a fair degree of success.

The Fitchburg Young Woman's Christian Temperance Union was organized in November, 1885. It is composed of young ladies belonging to the various religious societies in the town and accomplishes much in aid of the temperance cause.

The other temperance societies and orders in Fitch-

burg are the Unity Temperance Society, connected with the First Parish; St. Bernard's Temperance Lyceum; St. Bernard's Total Abstinence and Mutual Aid Society; Monadnock Temple of Honor, No. 17; Aquarius Council, No. 10, Select Templars; Falulah Lodge, No. 11, I. O. of G. T.; Henry A. Reynolds Lodge, No. 81, I. O. of G. T.; Wendell Phillips Division, Sons of Temperance and Silver Spray Temple of Honor, No. 3.

SECRET SOCIETIES.—Five of the largest and most wide-spread strictly secret organizations have flourishing representative bodies in this city,—the Masons, Odd Fellows, Knights of Pythias, American Mechanics and Red Men.

Masonry is represented by the following four bodies:

Aurora Lodge, F. and A. M., instituted June 9, 1801, at Leominster, and removed to Fitchburg March 17, 1845.

Charles W. Moore Lodge, F. and A. M., instituted October 9, 1856.

Thomas Royal Arch Chapter, instituted at Princeton December 21, 1821, and removed to Fitchburg November 13, 1847.

Jerusalem Commandery, K. T., instituted October 13, 1865.

The Odd Fellows also have four organizations in town.

Mount Rollstone Lodge, No. 98, I. O. O. F., instituted December 12, 1845.

Pearl Hill Degree Lodge, No. 47, Daughters of Rebekah, I. O. O. F., instituted October 14, 1885.

King David Encampment, No. 42, I. O. O. F., instituted October 18, 1870.

Grand Canton Hebron, No. 4, Patriarchs Militant, instituted March 4, 1886.

The Knights of Pythias have the two following organizations:

Alpine Lodge, No. 35, K. of P., instituted March 12, 1879.

Red Cross Division, No. 7, Uniform Rank, K. of P., instituted January 11, 1887.

The Order of United American Mechanics, a strictly American secret organization, is represented in town by Wachusett Council, No. 21, O. U. A. M., instituted February 21, 1883.

The Improved Order of Red Men is represented by Nashua Tribe, No. 37, I. O. R. M., instituted February 23, 1887.

The Masons have very fine lodge apartments in the Fitchburg Savings Bank Block; the Odd Fellows' lodge-rooms are in the Rollstone National Bank building; the Knights of Pythias hold their meetings in Pythian Hall, Crocker Block; and the American Mechanics and Red Men hire Pythian Hall of Alpine Lodge, K. of P., and use it as a council chamber and wigwam respectively.

An organization of the Ancient Order of Hibernians was incorporated in Fitchburg in June, 1869.

Fraternal Insurance and Mutual Benefit Orders.—Of these there are a great many in Fitchburg, and we have space only to mention their names, as follows:

Fitchburg Associates, No. 22, N. M. R. A.; Fitchburg Lodge, No. 797, K. of H.; Roumania Lodge, No. 312, K. and L. of H.; Overlook Council, No. 972, A. L. of H.; Fitchburg Council, No. 777, Royal Arcanum; Castle Fitchburg, No. 195, Knights and Ladies of the Golden Rule; Local Branch, No. 390 and Sisterhood Branch, No. 595, Order of the Iron Hall; Plymouth Colony, No. 97, United Order Pilgrim Fathers; Watatic Lodge, No. 31, New England Order of Protection; Union Assembly, No. 170, Royal Society of Good Fellows; Shakespeare Lodge, No. 121, Sons of St. George; Georg Loge, No. 538, German Order of Harugari; Society St. Jean Baptiste de Fitchburg; Wachusett Division, No. 191, Brotherhood of Locomotive Engineers; W. A. Foster Lodge, No. 216, Brotherhood of Locomotive Firemen; Fitchburg Lodge, No. 1, Brotherhood of Section Masters, and E. A. Smith Division, No. 146, Order of Railway Conductors.

No attempt has been made in this chapter to give a complete list of the multitudinous societies in town; but we have tried to speak of all the more important organizations, which is all there is room for in this history.

CHAPTER XLVIII.

FITCHBURG—(*Continued.*)

PROFESSIONAL.

THE pastors of the various religious societies in Fitchburg have already been spoken of in the ecclesiastical history and no further mention of them will be made in this chapter. There remain the dentists, lawyers and physicians to be spoken of and we shall give only a mere catalogue of those now in practice here, with perhaps a brief account of some of the more prominent lawyers and physicians of past time.

DENTISTS.—Dr. Thomas S. Blood is the senior dentist in town. He was born in Sterling, June 23, 1810; studied dentistry in Worcester with his brother, Dr. Oliver Blood, who was the first dentist settled in that town; at the same time took a course at the Harvard Medical School, where he graduated in 1838; practised dentistry for a short time at Nantucket and in New York City; came to Fitchburg in 1840, and since then has been in active practice here.

Dr. Blood has always been identified with temperance work in Fitchburg and has been, in years past, quite closely connected with our educational affairs.

Dr. Thomas Palmer began the practice of dentistry in Fitchburg in 1844. He soon afterward built the

brick "octagon house" on Main Street, where he has since lived and been engaged in the active practice of his profession. For the past sixteen years his son, Dr. Joseph W. Palmer, a graduate of Harvard College in the class of 1872, has been associated with him under the name of Palmer & Palmer.

The other dentists in town who have begun practice more recently are Drs. F. B. Joy, A. E. Horton, E. G. Dwyer, F. A. Damon and the firms of Parker & Ross and Stone Brothers.

LAWYERS.—Of the many legal practitioners who have lived and practised in Fitchburg in past time, we have space to speak of but four of the most prominent.

Hon. Nathaniel Wood was born in Holden, Mass., August 29, 1797; graduated at Harvard College in the class of 1821; studied law in Boston, and was admitted to the bar; came to Fitchburg, and in February, 1827, formed a partnership with Ebenezer Torrey, and for many years the firm of Torrey & Wood took high rank among the prominent legal firms of the Worcester County bar. Mr. Wood, however, attended to most of the legal business. In 1848 Goldsmith F. Bailey became a partner with Mr. Wood under the firm-name of N. Wood & Co.

Mr. Wood was for fifty years prominent in the town affairs and business interests of Fitchburg. He was often chosen moderator at town-meeting; was postmaster for sixteen years; president of the Fitchburg Mutual Fire Insurance Company twenty-six years, and its treasurer twenty-four years, besides holding other positions.

In politics Mr. Wood was a Democrat, and was elected to the lower branch of the Legislature in 1839, '47 and '50. He was once chosen Senator, and in 1841 was the candidate of his party for Congress.

Mr. Wood was a strong Unitarian, and took an active interest in the First Parish during his long life in Fitchburg. He died August 3, 1876, after an illness of nearly two years.

Hon. Ebenezer Torrey was born in Franklin, August 16, 1801; graduated at Harvard College in the class of 1822; came to Fitchburg and studied law with John Shepley, then a leading lawyer here, but who soon after removed to Maine. Mr. Torrey was admitted to the bar in 1825, and two years later entered into partnership with Nathaniel Wood. Mr. Wood conducted most of the firm's cases in court, while Mr. Torrey turned his attention more particularly to financial matters, and acquired a very high reputation as a safe and skilful financier. His connection with our banking interests has been already spoken of. For thirty successive years Mr. Torrey was town or city treasurer, declining further re-election in January, 1874.

In 1829 he was chosen a director of the Worcester Mutual Fire Insurance Company, which position he continued to hold during the rest of his life; and from 1879 was president of the same company.

Mr. Torrey, in politics, was opposed to his partner, Mr. Wood. He was a strong Whig, and later, as strong a Republican. He was in the lower branch of the Legislature in 1831 and 1847, and in 1849 was one of the five Senators elected at large from Worcester County. In 1853 and 1854 he was a member of the Governor's Council.

Mr. Torrey was a life-long Unitarian, and to the last a most constant attendant at the First Parish Church, in which he took great interest.

He died September 3, 1888, after a few days illness, leaving a widow, a daughter, the wife of Hon. Hiram A. Blood, of this city, and a son, George A. Torrey, of Boston, corporation counsel for the Fitchburg Railroad Company.

Hon. Charles H. B. Snow was a son of Dr. Peter S. Snow, and was born in Fitchburg, August 7, 1822; graduated at Harvard College in the class of 1844; studied law with Torrey & Wood, and was admitted to the bar in 1848; was for some years a law-partner with Hon. Amasa Norcross, but for the last eleven years of his life was with Judge Thornton K. Ware, under the firm-name of Ware & Snow.

Mr. Snow was elected to the Legislature, and was State Senator from this district at the time of his death. He was prominent in the educational interests of his native town, and her chosen centennial celebration orator. He was a very active and zealous member of Christ Church.

He died, September 18, 1875, after four months' illness, leaving his aged parents, a widow and two daughters.

Hon. Goldsmith F. Bailey was born in East Westmoreland, N. H., July 17, 1823, and his widowed mother removed with her family to Fitchburg three years later. In 1845 he began the study of law, completing his course with Torrey & Wood. In 1848 he was admitted to the bar, and became a partner in the firm of N. Wood & Company. He was Representative from Fitchburg in 1856, and State Senator in 1857 and 1859. In the fall of 1860 he was chosen by the Republicans of the Ninth Congressional District to represent them in Congress. But that terrible disease, consumption, had fastened itself upon him. He went to Florida, and on his return took his seat in Congress during the extra session. In December, 1861, he went back to Washington, but was soon obliged to return to Fitchburg, where he died, May 8, 1862. His widow, who was one of the well-known Billings family, of Woodstock, Vt., is now the wife of Hon. Rodney Wallace, of Fitchburg.

The senior lawyer at present living in Fitchburg, though not now in active practice, is Charles Mason, Esq.

Mr. Mason was born in Dublin, N. H., June 3, 1810; graduated at Harvard College in 1834, came to Fitchburg in September, 1842, and has since resided here; has practised law and latterly has been interested in insurance business; was secretary of the Fitchburg

Mutual Fire Insurance Company, 1864–69; representative to the Legislature in 1849 and 1851, and a member of the Constitutional Convention in 1853.

He has always been deeply interested in education, and was for some years chairman of the School Committee of the town. He was also active in starting and sustaining the Fitchburg Athenæum. He has preserved a very complete collection of town and city reports and documents, from which much of this present history has been compiled.

The firm of T. K. & C. E. Ware consists of Judge Thornton K. Ware and his son, Charles E. Ware.

Judge Ware is a native of Cambridge; graduated at Harvard in 1842; came to Fitchburg in 1846; has been in partnership with Hon. C. H. B. Snow and George A. Torrey; was representative in 1850 and 1854; postmaster, 1861–66; justice of the Police Court since it was established and a trustee of the Public Library since its establishment, with the exception of one year, and chairman of the trustees since 1875. He is president of the Fitchburg Savings Bank and a director of the Fitchburg National Bank.

Charles E. Ware is a native of Fitchburg; graduated at Harvard in 1876, and has been associated with his father since July, 1879.

The firm of Norcross, Hartwell & Baker consists of Hon. Amasa Norcross, a native of Rindge, N. H., the first mayor of Fitchburg; representative in 1858–59 and 1862; State Senator, 1874; representative to Congress, 1876–82. He has been prominent in financial and educational interests, and in many other public positions.

The second member of this firm, Hon. Harris C. Hartwell, is a native of Groton; graduated at Harvard in 1869; since 1874 a partner with Mr. Norcross; representative, 1883–85, and State Senator, 1887–88; city solicitor of Fitchburg from 1877 to 1886.

The third member, Charles F. Baker, Esq., is a native of Lunenburg; graduated at Harvard in 1872; in the office of Norcross & Hartwell since 1875, and became a member of the present firm January 1, 1887.

Hon. David H. Merriam is a native of Essex, N.Y., where he was born July 3, 1820; came to Fitchburg in July, 1829; in 1847 began the study of law with Torrey & Wood; representative in 1861; provost marshal of the Ninth District of Massachusetts 1863–65; special justice of the Fitchburg Police Court since 1868; city solicitor of Fitchburg 1874–6; mayor in 1877 and 1878.[1]

The other lawyers in town are Stillman Haynes, Esq., a native of Townsend, who has practised here since 1868, and served several years on the School Board; Charles S. Hayden, Esq., a native of Harvard, read law with Wood & Torrey, and has practised here since 1871, and has been special justice of the Fitchburg Police Court since 1879; Samuel L. Graves, Esq., a native of Groton, graduated at Amherst in 1870; read law with Wood & Torrey, and has been in practice here since 1873; Harrison Bailey, Esq., a native of Fitchburg, graduated at Amherst in 1872, and at Harvard Law School in 1874, read law with George A. Torrey, Esq., and has practised here since 1874; James H. McMahon, Esq., a native of Ireland, read law with E. B. O'Connor, of Boston, and James M. Woodbury, of Fitchburg, has practised here since September, 1877; Edward P. Pierce, Esq., a native of Templeton, graduated at Harvard Law School in 1877; has practised here since; in 1882 formed a partnership with James A. Stiles, Esq., under the firm-name of Pierce & Stiles, Mr. Stiles, having an office of the firm in Gardner. Mr. Pierce has been city solicitor of Fitchburg since January, 1887; Thomas F. Gallagher, Esq., a native of Lynn, graduated at University of Notre Dame, Indiana, in 1876, read law with Hon. William D. Northend in Salem; has been in practice here since December, 1881; Charles H. Blood, Esq., a native of Fitchburg, graduated at Harvard in 1879, read law with Attorney-General Marston and at Boston University Law School, in practice here since 1883, and since 1884 has been in partnership with David K. Stevens, Esq., under the firm-name of Blood & Stevens, Mr. Stevens maintaining an office of the firm in Boston; Charles A. Babbitt, Esq., began practice here in the spring of 1888.

PHYSICIANS.—A brief mention will be made of a few of the former physicians of the town, which will be followed by a summary of those now in practice here and an account of medical organizations in this vicinity.

Dr. Thaddeus McCarty was the first settled physician, and came here from Worcester prior to the Revolution. He was a skilful physician, but remained here only a few years, returning to Worcester in 1781.

Dr. Jonas Marshall settled here soon after the Revolution on the same farm now occupied by his grandson, Mr. Abel Marshall. He practised here many years.

Dr. Peter Snow succeeded Dr. McCarty, coming here in 1782. For over forty years he was a leading physician here, and also held important town offices.

Dr. Peter S. Snow, eldest son of the above, began practice in 1815, but retired in 1831 on account of poor health. For many years thereafter he was a valuable member of the School Committee. He died here November 25, 1884, aged ninety-two.

Dr. Jonas A. Marshall was for forty years a physician here, and served the town also for twenty-four successive years as town clerk. He died in Charlestown, February 25, 1887, aged nearly eighty-seven years.

Dr. Thomas R. Boutelle graduated at the Medical Department of Yale College in 1819, and soon began practice in New Braintree; removed to Leominster

[1] Mr. Merriam died October 11, 1888.

in 1824, and to Fitchburg in 1833, where he practised the rest of his life. He was a physician of high standing, and was honored with many offices in medical and other organizations. During the War of the Rebellion he was chairman of the Relief Committee of the town, and labored incessantly for the comfort of soldiers' families. He died, universally lamented, July 13, 1869, aged seventy-four years.

By far the most widely-known and remarkable member of the medical profession ever settled in Fitchburg was Dr. Alfred Hitchcock. He graduated at the Dartmouth Medical College, and later received a diploma from the Jefferson Medical College, Philadelphia. He settled in Ashby in 1837, but at the written request of many prominent citizens of Fitchburg, came here in April, 1850, and spent among us the balance of his useful life.

As a practitioner of medicine and surgery Dr. Hitchcock had no peer in this vicinity, and his medical brethren far and near sought his services in all doubtful and severe cases. Of what he did in the war period we have not space to tell; we can only say that during the whole course of the war nearly one-quarter of his time was given to the care of the sick and wounded Massachusetts soldiers in the field and at home.

Dr. Hitchcock was prominent also in public affairs, and held various offices of trust, which we have not space to enumerate. Perhaps the most important was his position in the Executive Council of the State, to which he was elected three times in succession,—in 1861–62–63. He was also on the Board of Overseers of Harvard College from 1857 to 1865.

In addition to his skill, knowledge and good judgment, Dr. Hitchcock possessed those finer qualities of mind and heart characteristic of the true gentleman. He was entirely free from dogmatism and pride of the schools, and his uniform gentleness and courtesy endeared him to the people of Fitchburg—rich and poor. His death occurred March 30, 1874, at the age of sixty years, five months and thirteen days. His funeral at the Rollstone Church, April 3d, was very largely attended.

Dr. Alfred Miller graduated at the Vermont Medical College, and began practice in Ashburnham in 1845. In 1863 he removed to Fitchburg to remain permanently.

He was a good physician and genial gentleman, and was prominent in school matters. He was also a Representative to the Legislature from this city at one time.

He died, universally regretted by the citizens of Fitchburg, November 15, 1877, aged sixty-two years.

All the above-named physicians were members of the Massachusetts Medical Society, with the exception of the very first, who practised before the society came into existence.

We will now give a brief summary of those physicians now in active practice here who are

Members of the Massachusetts Medical Society.—Dr. Levi Pillsbury is the senior practising physician in Fitchburg. He graduated at the Dartmouth Medical School in 1842, and settled here May 1, 1844; is at present a member of the United States Examining Board for Pensions.

Dr. George Jewett graduated at the Berkshire Medical College in 1847, and continued his studies for a time at the Harvard Medical School, being a pupil of Dr. Jacob Bigelow. He practised in Templeton and Gardner, and came to Fitchburg in 1858; was surgeon in the army, and from 1864 to 1886 was examining surgeon for pensions; is at present vice-president of the Massachusetts Medical Society. He is a trustee of the Public Library, beside holding other public offices.

Dr. George D. Colony graduated at Dartmouth College in 1843; studied medicine with Dr. Amos Twitchell, of Keene, N. H.; graduated from the Medical Department of the University of Pennsylvania in 1846, and immediately began practice at Athol; removed to Fitchburg in May, 1861, where he has since continued in active business.

Dr. Austin W. Sidney began practice as an eclectic physician in Sterling in 1860; came to Fitchburg in 1866; later took a course at the Dartmouth Medical School, graduated there, and joined the Massachusetts Medical Society. He is president of the Old Ladies' Home corporation.

Dr. Charles H. Rice graduated at the Harvard and Dartmouth Medical Schools; settled in Fitchburg in 1866; is surgeon of the Sixth Regiment, M. V. M., a member of the School Committee, and a trustee of the Public Library; was city physician 1873–75.

Dr. Frederick H. Thompson graduated at the Harvard Medical School in 1870; settled in Lancaster; removed to Fitchburg in May, 1874; was city physician in 1877, and has been on the School Committee and a trustee of the Public Library; was surgeon on General Kimball's staff in 1877–78.

Dr. Dwight S. Woodworth graduated from the College of Physicians and Surgeons in 1876; has practised in Fitchburg since; was city physician 1879–81, and 1884–86; is prominent in various fraternal orders; has been medical director of the Massachusetts Mutual Aid Society for some years; and on the School Board, 1879–82.

Dr. Ernest P. Miller, son of Dr. Alfred Miller, graduated at Harvard College in 1872 and at the Harvard Medical School in 1876, and has practised in Fitchburg since; has been medical examiner since 1877 and was city physician in 1880 and 1883; is one of the United States Examining Board for Pensions.

Dr. Herbert H. Lyons graduated at Boston College in 1878 and at the Harvard Medical School in 1881; has practised in Fitchburg since September, 1881; is the third member of the United States Examining Board for Pensions in this city.

Dr. Atherton P. Mason, a native of Fitchburg, graduated at Harvard College in 1879 and at the Harvard Medical School in 1882; has been in practise in Fitchburg since March, 1884; is secretary of the Worcester North District Medical Society.

Dr. John D. Kielty, a native of Fitchburg, graduated from the College of Physicians and Surgeons, Boston, in 1883, and from the Bellevue Hospital Medical College, New York, in 1884, and in June, 1884, began practise in Fitchburg. He has been city physician since January, 1887.

Dr. Clarence W. Spring graduated at Dartmouth College in 1880 and at the Harvard Medical School in 1884. He began practise in Fitchburg in February, 1885.

Dr. Eustace L. Fiske graduated at the Harvard Medical School in 1886 and began practise in Fitchburg in September, 1888.

Dr. Emerson A. Ludden graduated at the Albany Medical College in March, 1888, and settled in Fitchburg the following September.

Dr. Henry W. Pierson, though not a member of the Massachusetts Medical Society, is a regular physician and has been in practise in West Fitchburg since 1884.

Homœopathic Physicians.—Dr. Daniel B. Whittier studied at the Harvard Medical School and later at the New York Homœopathic College in 1863. He soon settled in Fitchburg, where he has since been in active business. He has been president of both the State and County Homœopathic Societies, and has served the city as a member of the School Committee.

Dr. Hollis K. Bennett graduated at the Pennsylvania Medical University. He practised in Hartford, New York, and in Whitehall, and came to Fitchburg in October, 1872, where he has since continued to practise. Dr. Bennett is a member of all the principal homœopathic societies.

Dr. Ellen L. Eastman graduated at the Boston University Medical School in 1880. She began practise in Fitchburg, but, in 1884, removed to Wollaston. In the autumn of 1887 she returned to this city and resumed practice here.

Dr. J. Everett Luscombe graduated at the Boston University Medical School in 1885, and settled here the same year; is a member of the Worcester County Homœopathic Medical Society.

Dr. Oliver L. Bradford formerly practised in Andover, but removed to Fitchburg some years ago.

Dr. Hubbard H. Brigham is an eclectic physician, a graduate, in 1855, of the Worcester Eclectic Medical College. He has practised in Fitchburg since 1845.

There are also three French physicians in town.

MEDICAL SOCIETIES.—The Worcester North District Medical Society was chartered by the president and councillors of the Massachusetts Medical Society May 28, 1858, and organized on the 5th of the following June. Dr. William Parkhurst, of Petersham, was elected its first president.

Its membership comprises all Fellows of the Massachusetts Medical Society practising in Fitchburg and towns in the northern part of Worcester County and in the towns of Ashby, Shirley and Townsend, in Middlesex County.

Meetings are held at Fitchburg on the fourth Tuesday of January, April, July and October, the annual meeting being in April. The society now has over forty members.

The Fitchburg Society for Medical Improvement was organized in July, 1874, and includes in its membership Fellows of the Massachusetts Medical Society residing in Fitchburg and towns adjoining.

This society holds meetings the third Tuesday of each month at the houses of the members. It is the hope and intention of the society, in conjunction with the district society, to obtain rooms, in the near future, and fit them up for the purpose of holding both local and district meetings therein, and also for accommodating the library of the district society.

The Worcester North Eclectic Medical Society was organized in July, 1861. Meetings are held at Fitchburg on the last Tuesday of each month, the annual meeting being held in July.

CHAPTER XLIX.

FITCHBURG—(*Continued.*)

LITERARY AND ARTISTIC.

AMONG the residents or natives of Fitchburg who in the past have had a name for literary work, we shall mention in this chapter only two.

Rev. Asa Thurston was born in Fitchburg in 1787. He took a course of study at Yale College and the Andover Theological Seminary, and in 1819 sailed for the Sandwich Islands as a missionary. He remained there till his death, March 11, 1868, and the value of his life-work for humanity can never be estimated. He compiled a valuable dictionary and grammar of the Hawaiian language.

Hon. Rufus Campbell Torrey was a younger brother of Hon. Ebenezer Torrey. He was for some years a resident of Fitchburg, editing a newspaper and teaching in the Fitchburg Academy. In 1836 he wrote the "History of Fitchburg." He afterward removed to Alabama, and became prominent as a lawyer. He died in Claiborne, Alabama, September 13, 1882.

Several natives and residents of Fitchburg, now living elsewhere, deserve at least a passing notice in this chapter.

Mary Caroline (Underwood) Dickinson, now of New York, was born in Fitchburg. She was a teacher in the schools here, later in Boston and New

York. Her literary work is well known, but cannot properly be given in detail in this sketch.

James Ripley William Hitchcock is a native of this town and a son of Dr. Alfred Hitchcock. He graduated at Harvard in 1877. He is now the art critic of the *New York Tribune* and resides in New York City. His journalistic work is widely and favorably known.

Ray Greene Huling, principal of the Fitchburg High School, 1875–86, wrote and published a valuable pamphlet entitled "The Teachers and Graduates of the Fitchburg High School, 1849–1883, preceded by some Mention of Teachers in the Fitchburg Academy, 1830 to 1848." Mr. Huling is now principal of the New Bedford High School.

There are a few writers of prose and verse now living in Fitchburg still to be mentioned.

Caroline Atherton Mason is a native of Marblehead, the youngest daughter of Dr. Calvin and Rebecca (Monroe) Briggs, of that historic old town.

Her poetical talent began to develop before she reached the age of twenty. She contributed regularly to the *Salem Register* under the signature of "Caro;" and in that paper and under that signature appeared the verses of hers which since have been known throughout all English-speaking countries—the words of the song "Do They Miss Me at Home?" These words were appropriated and set to music by parties who thereby realized a handsome sum.

She also early contributed to other papers, and in 1852 published, through Phillips, Sampson & Co., Boston, a volume of her poems, to which much favor was accorded.

Soon after the death of her father, in 1852, she, with the rest of the family, removed to Fitchburg, and in 1853 she was married to Charles Mason, Esq. Since 1857 Mr. and Mrs. Mason have lived in their present residence, "Laurel Hill," one of the sightliest and best located situations in town. They have one son, a practising physician of this city and the writer of this "History of Fitchburg."

Mrs. Mason has been a welcome contributor to most of the leading magazines and many religious and secular papers. Her poems have been widely copied and two of them were, not long ago, set to music in England.

Though her work has been chiefly in verse, she has written to some extent in prose. An anonymous Sunday-school story, "Rose Hamilton," published in 1859; a serial, "Letty's Pathway; or, Following On," which appeared in the *Boston Recorder* in 1866, and occasional short stories or sketches in various periodicals, comprise her work in prose.

For many years she has promptly and willingly responded to the numerous calls made upon her to furnish poems for occasions, both public and private, in Fitchburg; and the poems she has written relating to Fitchburg and its citizens would almost make a volume.

Mrs. Mason has published none of her poems in book-form since 1852, though often urged to do so.

Martha Downe Tolman is a native of Fitchburg and a daughter of Deacon Nathan and Mary (Downe) Tolman.

Miss Tolman's first published verses appeared in the *Well Spring*, a Sunday-school paper published in Boston. Since that time she has written verses and articles in prose for various papers and magazines.

Miss Tolman is also the author of two books. The first, entitled "Fabrics," was published in 1871 by A. D. F. Randolph & Co., of New York. She was very unfortunate in the printing of this book, which, owing to the inability of the publishers to personally attend to the proof-reading of it at that time, appeared with a generous sprinkling of typographical and other errors.

D. Lothrop & Co., of Boston, afterwards published other editions of "Fabrics," and the book was reprinted in London by Messrs. Ward, Lock & Tyler.

In 1873 Miss Tolman's second book, "Finished or Not," was published by D. Lothrop & Co. Each of these books inculcates, in the form of a pleasing story, some of the great truths of life and our duties toward humanity.

Her style is pure and racy, and at the same time instructive. She appeals to the higher nature of the reader, and teaches the lesson of living for others.

Beside her literary work, Miss Tolman is interested in local philanthropic work. She is a member of the Fitchburg Benevolent Union, and secretary of the corporation of the Old Ladies' Home.

Charles Mason, Esq., has written considerable on educational topics from time to time, and his book on the "National and State Governments" has been used as a text-book in schools and academies.

In 1852 Mr. Mason was invited to deliver the address at the centennial celebration of his native town, Dublin, N. H. He prepared and delivered the address, which was printed in the "History of Dublin, N. H."

Henry A. Willis, Esq., who was born in Fitchburg November 26, 1830, is the author of "Fitchburg in the War of the Rebellion," published in 1866, and has also contributed various articles to the papers on matters of local historical interest.

William A. Emerson, a native of Douglas, has written two local histories,—the "History of Douglas," published in 1879, and "Fitchburg, Past and Present," published in 1887. To the latter the writer of this present history is indebted for many facts. Mr. Emerson is an artist and wood-engraver, and each of his well-written books is embellished by his art.

Eben Bailey, a native of Fitchburg, wrote the sketch of Fitchburg in the Worcester County History, published in 1879 by C. F. Jewett & Co. He has also written various interesting and valuable local historical articles for papers and magazines.

ARTISTIC.—Miss Eleanor A. Norcross, a native of

Fitchburg, is a daughter of Hon. Amasa Norcross. She graduated at Wheaton Seminary; taught drawing one year in the public schools of Fitchburg; went abroad and studied painting two years in Paris with Alfred Stevens, and exhibited a portrait in the Salon in 1886. In the summer of 1888 she again went abroad to pursue further her studies in painting.

To Miss Norcross was entrusted the selection of a collection of photographs for the Fitchburg Public Library. She has done good work in painting, and owns a fine collection of works of art, a portion of which is, during her absence abroad, loaned to the Public Library, and may be seen in the Art Gallery.

Mr. Eugene H. Rogers was born in Holden in 1853; was educated in the public schools of his native town and of Worcester. He early began to cultivate his natural artistic talent, studying by himself and receiving instruction from his father, also an artist.

In 1878 Mr. Rogers came to Fitchburg, where he has since had his studio. His work has been chiefly in crayon and oils, and he has acquired considerable reputation, especially in the former class of work. The appreciation of his skill is by no means limited to Fitchburg. His pictures may be seen in the art stores of Boston and other cities, and readily find purchasers.

Mrs. S. Augusta Fairbanks is a native of Fitchburg and a daughter of C. P. Dean; educated at Kimball Union Academy, Meriden, N. H., and Worcester Academy; for several years a teacher in the public schools here; later she received private instruction in painting and drawing from J. J. Enneking and F. Childe Hassam, and in 1883–84 attended the Julian School in Paris. She has of late given private instruction in drawing and painting at her studio in Fitchburg.

Mr. S. Herbert Adams, son of Samuel M. and Nancy A. Adams, was born in West Concord, Vt., in 1858, and came with his parents to Fitchburg in 1863. He manifested a strong desire "to make pictures" at a very early age, and a drawing teacher was provided for him. In 1883 he graduated with high honors at the Massachusetts Normal Art School. After teaching two years he went to Paris in 1885 to carry out his long-cherished idea of devoting all his attention to sculpture. He is still in Paris, under the instruction of the eminent sculptor, M. Antonin Mercié. He has already made a reputation for himself and had several portrait busts accepted at the Salon. Competent critics affirm that his work would be a credit to older artists.

Miss Martha M. Adams, sister of the above, is also a native of West Concord, Vt. She was educated in the public schools of Fitchburg, and studied art at the Normal Art School, Boston; has also been a pupil of Vonnoh, T. O. Longerfelt and Juglaris.

Miss Adams has taught art in several institutions, and in September, 1886, began her duties as teacher of drawing in the Girls' High School, Boston.

We have already spoken of William A. Emerson, artist and wood engraver. C. Herbert Herrick is also engaged in the same artistic pursuits.

The other artists and teachers of drawing and painting in town are Miss Adelaide R. Sawyer, Miss Addie M. Farrar, Mrs. H. T. Barden, Mrs. J. W. Green and Miss Susie E. Stewart.

Mr. William Briggs has, for some years, been the teacher of drawing in the public schools of Fitchburg.

CHAPTER L.

FITCHBURG—(*Continued.*)

JOURNALISM IN FITCHBURG.

A LARGE number of newspapers have been published in Fitchburg within the past sixty years, and in this chapter it is proposed to give an account of the most important.

James F. D. Garfield, Esq., wrote for "Fitchburg, Past and Present," a very full and accurate chapter on this subject, and the writer of this present history takes this opportunity to render his acknowledgments to Mr. Garfield for permission to make use of the information therein contained, in the preparation of this essential portion of our history.

The first newspaper published in town was the *Fitchburg Gazette*, the first number of which appeared on or about October 19, 1830. It was started by two young men, Jonathan E. Whitcomb and John Page. Their printing-office was in a small wooden building, just below the entrance to the old Fitchburg Hotel. The *Gazette* was printed on paper made by Alvah Crocker, was about twenty-two by twenty-eight inches in size and the subscription price was one dollar and a half per year.

This paper lived about three and a half years, during which time there were several changes in its proprietorship.

In May, 1834, there appeared from the same printing-house a new paper, the *Worcester County Courier*, printed by George D. Farwell and edited by William and Rufus C. Torrey. At the same time there were two more papers in town, printed in Mark Miller's printing-office, nearly opposite the old Fitchburg Hotel. The names of these papers were the *Christian Messenger*, a religious weekly, edited by Mr. William Cushing, and the *Massachusetts Republican*, edited by Mr. Miller. The first of these two was started in April, 1834, and lived three months, and the second was started May 16, 1834, and came to an untimely end at Mr. Miller's departure from town in the fall of the same year.

The *Courier* was thus left the sole survivor and continued to be published till June 28, 1836, when its suspension was announced.

Mr. John Garfield immediately purchased the

former *Courier* office, and the next week a slightly smaller paper was issued, called the *Fitchburg Worcester County Courier*. Mr. William S. Wilder was engaged as editor, and the paper flourished until the winter of 1838, when, during Mr. Garfield's absence from town, the editor converted the paper from a neutral to a Democratic sheet. This appears to have been disastrous, for the publication of the *Courier* ended March 9, 1838. Mr. Garfield continued to occupy the office for job-printing and for a few months issued a small weekly paper called the *Times*.

During the four or five months preceding December, 1838, there was no paper published in town; but on the 20th of December, 1838, a new and prosperous era was begun in the journalism of this town by the starting of

THE FITCHBURG SENTINEL.—On the date abovementioned the first number of this newspaper appeared. John Garfield printed it, and Ezra W. Reed was the editor. In politics it was neutral.

About this time there were in town several writers who contributed to the columns of the *Sentinel* enlivening and spicy articles. Prominent among them was a lad of sixteen, who afterward became well-known as an author and poet. This was Augustine Joseph Hickey, an apprentice in the *Sentinel* office. He was born in 1823, and, owing to a separation between his parents and the death of his mother soon after, was placed in an orphan asylum in Boston at an early age. In 1839 John Garfield, of Fitchburg, then proprietor of the *Sentinel*, took him from this asylum, and he went to work in the printing-office. He soon developed an extraordinary love for books, and began to write anonymously for the *Sentinel*. He soon wrote a poem, entitled "Slander," which was duly printed in the paper. This poem had a Latin quotation prefixed, and was signed "Julian."

"About this time one Patterson, an employé of the woolen-mill, under the signature of 'Syphax,' criticised 'Conrad,' another local literary light, for misquoting Byron, whereupon 'Julian' took a hand in the discussion, creating an unusual interest for several weeks."

Hickey wrote the communications signed "Julian," and his intimate friend, Goldsmith F. Bailey, copied them and dropped them into the post-office; so the identity of "Julian" was wholly unknown even to the proprietor of the *Sentinel*. These communications showed a considerable amount of genius and learning, and were generally ascribed to some of the professional, educated men in town at that time.

When about twenty-one years of age Mr. Hickey left Fitchburg and went to Boston, and not long after removed to New York City, where he remained the rest of his life.

His mother, who was the daughter and heiress of a wealthy French family, but was disowned after her clandestine marriage to Mr. Hickey, left her son a dying request that he should assume her maiden name, and in accordance with this request his name was changed, by act of the New York Legislature, to Augustine J. H. Duganne.

He soon became a prominent writer both of prose and poetry, and a mere list of his productions would fill considerable space.

He was very active during the war and raised several regiments. He was colonel of the One Hundred and Seventy-sixth New York Regiment, went to the front, was captured, and for some time held prisoner by the rebels.

Colonel Duganne died at his home in New York, October 20, 1884.

Let us now return to the *Sentinel*. It continued to prosper and was published by Mr. Garfield until March, 1841, when William J. Merriam purchased the office and paper. During his proprietorship the *Sentinel* was twice enlarged, and in February, 1849, the office was removed to its present location, in what is now known as the *Sentinel* building and was then owned by Crocker & Caldwell.

In December, 1850, Elisha and John Garfield bought out Mr. Merriam. In September, 1852, Mr. James F. D. Garfield bought John Garfield's interest and, with his brother, Elisha, published the paper until October, 1860; and for the following three and a half years Elisha Garfield conducted the business alone. In April, 1864, John Garfield again purchased half the interest, and in September, 1864, became sole owner of the paper. Six months later Mr. James M. Blanchard became his partner and continued so until March, 1867, when Mr. Charles C. Stratton, who has ever since been connected with the paper, succeeded him as partner.

In January, 1870, Mr. Bourne Spooner bought one-third of the interest, and in January, 1871, Mr. Garfield sold his interest to Messrs. Stratton & Spooner. In March, 1873, the Sentinel Printing Company was formed, and Mr. John E. Kellogg admitted as partner in the new firm. In July, 1873, Mr. Thomas Hale, formerly editor of the Keene *Sentinel*, purchased Mr. Spooner's interest and continued a member of the firm for about two years. Since 1875 Messrs. C. C. Stratton and J. E. Kellogg have constituted the Sentinel Printing Company, and have conducted both the weekly and daily *Sentinel*.

During all these years the paper prospered and was enlarged as occasion required; and early in 1873 the proprietors resolved to make a venture, which proved to be entirely successful, by starting the *Fitchburg Daily Sentinel*. This has always been an evening paper, and the first number was issued May 6, 1873, and its size was twenty-one by thirty inches. Since then it has been enlarged three times, and is now twenty-seven by forty-four inches, the same size as the weekly edition. The *Daily Sentinel* has made a prominent place for itself, and has a large circulation in town and many subscribers outside of Fitchburg.

We will now speak of a few of the many papers that have been started since the publication of the *Sentinel* was begun.

In January, 1845, the *Wachusett Independant* was started. The first issue was dated January 18, 1845, and was printed by E. R. Wilkins in Mark Miller's old printing-office. William S. Wilder, formerly of the *Courier*, was the editor. The office was soon removed to the building now called the Citizens' House, and was the first printing-office established in that part of the town. The *Independant* lived only six months.

January 21, 1852, appeared the first issue of the *Fitchburg News*, Dr. Charles Robinson, editor and publisher. It was printed in an office in the old Rollstone block, formerly occupied by the *Fitchburg Tribune*, a paper published by Mr. George A. White for a few months in 1847.

Under Dr. Robinson's management the *News* prospered, but in January, 1853, he sold the paper to the firm of Rollins & Knowlton, of Winchendon, and its publication was suspended during the following June. Dr. Robinson soon removed to Lawrence, Kansas, and later became Governor of Kansas.

March 31, 1852, appeared the first number of the *Fitchburg Reveille*, a semi-weekly paper, printed in an office in the upper story of Central Block. Mr. John J. Piper was editor and publisher, and for nearly seventeen years he conducted the *Reveille* with signal success and made it well-known as a stanch Republican newspaper. It was three times enlarged, and in April, 1869, was a thirty-two column paper, twenty-seven by forty-one inches. Up to October, 1861, it was a semi-weekly, but after that was issued weekly.

John J. Piper died February 3, 1869, and the publication of the *Reveille* was continued by his two brothers, Joseph L. and Henry F. Piper, who soon after removed the office to the new Rollstone National Bank building. In May, 1874, J. L. Piper retired and the paper was conducted by H. F. Piper alone till May, 1875, when Frank L. Boutelle became a partner. The firm of Piper & Boutelle was dissolved in August, 1876, and the *Reveille* was for a few months longer published in the old Rollstone Block Printing Office by Col. Ezra S. Stearns, who at that time published the *Daily Chronicle* there. February 15, 1877, the publication of both papers was suspended. The existence of the *Reveille* covered a period of almost a quarter of a century, and during the major portion of this time it was a prominent paper not alone in Fitchburg, but also in Worcester County, and its decline and suspension were much regretted.

In March, 1857, appeared the first issue of a small monthly advertising sheet called *The Inkstand*. It was published at the furniture store of Sidney D. Willis and was continued only a few months. Mention is made of it because it was the pioneer of the large number of advertising papers that have been printed here since.

In January, 1881, the *Fitchburg Tribune* was started by William M. Sargent. It was a weekly paper of good appearance and was printed in an office in Goodrich Block. A daily edition was begun in the following March, which will be noticed further on. The *Tribune* was continued under several different proprietors until February, 1885, when Albert G. Morse, then the publisher, changed the name to *Fitchburg News*. In May, 1885, Mr. Joseph H. White became the publisher of the *News* and continued it until February, 1886, when he changed it to a monthly paper with the name *Monthly Visitor*. Mr. White has continued its publication, but the name of the paper now is the *Ladies' Home Visitor*.

In December, 1880, Thomas C. Blood started an advertising paper, called the *Fitchburg Enterprise*. Since then it has been published about once in three months. It is well patronized by advertisers, and contains some interesting reading matter in each issue. The paper is printed at the *Sentinel* office, and about three thousand copies are struck off each time.

In June, 1885, Hubert C. Bartlett began the publication of a monthly paper, devoted to temperance, health and the home, and having the name *United States Monthly*. This paper has continued to be published since, and has done good work for the temperance cause. It is a well printed and ably conducted sixteen-page paper, and since February, 1887, its price has been twenty-five cents per year.

Since September, 1887, the Young Men's Christian Association have issued a small monthly paper, devoted to the work of the association. Its name is *The Beacon Light*.

The Parish Helper is a little monthly published in the interests of the parish of Christ's Church, and was started in October, 1887.

Good Luck is the name of a sixteen-page monthly paper, started in the autumn of 1887. It is chiefly devoted to advertising.

The Scientist is the title of an eight-page monthly, issued by Chapter 48, Agassiz Association of Fitchburg. The first number appeared in April, 1888. E. Adams Hartwell, A.M., and Mr. William G. Farrar are the editors.

The five last-named publications were the only ones, beside the weekly and daily *Sentinel*, published in Fitchburg until recently, when the *Evening Mail* was started.

Daily Papers in Fitchburg.—The first attempt to start a daily paper here was made in October, 1854. *The Fitchburg Daily* was the name given it by the publishers, Messrs. Plaisted & Baxter. It was printed in the office in Rollstone Block, was eighteen by twenty-four inches in size, and had an existence of just three days.

The next venture in this line was the *Fitchburg Daily Sentinel*, which has previously been sufficiently noticed.

November 24, 1875, appeared the first number of

the *Fitchburg Daily Press*. This was an evening paper published by Piper & Boutelle, in connection with the *Reveille*. Its size was twenty-one by thirty-one inches. It lived less than a year, the last issue being early in August, 1876.

The *Fitchburg Evening Chronicle* took the place of the *Press*, being issued from the *Reveille* office under the editorship of Colonel Ezra S. Stearns, who continued to conduct both this paper and the *Reveille* until February 15, 1877, when both papers were suspended, as has been previously stated.

In March, 1881, Mr. W. M. Sargent, publisher of the *Fitchburg Tribune*, began the publication of a daily paper, the *Daily Evening Tribune*. It was eighteen by twenty-five inches in size, and in the following summer was enlarged to twenty-two by thirty inches.

Mr. Sargent sold his interest in the paper to J. W. Ellam, of Clinton, in July, 1882, who continued both daily and weekly. He was succeeded by Mr. E. A. Norris, in April, 1883, who published both editions until September, 1884, when Albert G. Morse became the publisher. Mr. Morse discontinued the *Daily Tribune* in February, 1885.

The first issue of *The Evening Mail*, the new daily paper, appeared October 3, 1888. It is a well-printed and very readable sheet, a trifle smaller than the *Sentinel*.

It is published by the *Evening Mail* Company, of which Mr. H. L. Inman, formerly of the *Keene Observer*, is president; Dr. G. D. Colony, treasurer; and M. F. Jones, secretary.

The company has purchased the plant of J. H. White, on Day Street, added new presses, type, etc., and hopes to make the new daily a permanent and prosperous enterprise.

Politically, *The Evening Mail* will be independent

CHAPTER LI.

FITCHBURG—(*Continued.*)

CEMETERIES.

It seems fitting to close this sketch with a chapter on the cemeteries of Fitchburg,—the "resting-places" where have been laid the mortal remains of those men and women whose energy and good works have contributed so largely to the growth and prosperity of the town.

It is a matter of regret that sufficient attention is not devoted to caring for and beautifying our cemeteries. At least two of them are finely located and capable of being made much more attractive.

Let us once more return to the past and note briefly the provisions made by the early settlers of Fitchburg in regard to the interring of the dead.

During the first three years of its corporate existence there was no burying-ground within the limits of Fitchburg, the dead being carried to the graveyard in Lunenburg, nearly seven miles distant. December 12, 1764, however, the town took steps towards securing a burying-ground of its own by choosing Amos Kimball, Ephraim Kimball and Thomas Dutton a committee "to provide a Bueering-yard." This committee did not report until November 21, 1765, when the report was accepted. March 3, 1766, this vote was reconsidered, and the town voted "to accept one acre of land of Amos Kimball for a Buering-yard." This spot is now known as the South Street Cemetery, and has not been used as a burial-place for many years. For over a quarter of a century it was the only cemetery in town, and in it are the tombstones erected over the graves of many of the early citizens of prominence in the town.

Although the town voted to accept Deacon Kimball's gift in 1766, the deed of the land does not appear to have been passed over until the latter part of 1769. In the mean time the town voted, May 11, 1767, to purchase an acre of land belonging to Thomas Cowdin "lyeing on the north side of the Meeting-house for a buering-yard." On December 16, 1767, it was voted "to give back the deed of the acre of land deeded to the town by Thos. Cowdin for a burying-yard." The few bodies there buried were exhumed and reinterred in the spot given the town by Deacon Kimball.

In 1775 Solomon Steward was chosen to dig graves. May 13, 1800, the town voted to purchase of Jacob Upton an acre of land for a burying-ground. This was used as a cemetery by the people in the westerly part of the town for many years. It is located not far from the present Dean Hill School-house, and is now pretty well overgrown with trees.

In the latter part of 1800 a committee was chosen to select a place for a new burying-ground in the middle of the town. In accordance with the recommendation of this committee, the town purchased, within a year or two, the plot of ground which now forms the easterly end of Mount Laurel Cemetery. Additional land has been appropriated to burial purposes from time to time, and this cemetery now covers nearly the whole hill, forming a veritable city of the dead overlooking the city of the living. More care and a larger outlay of money would make this naturally picturesque situation still more beautiful and attractive.

In 1806 the town voted to purchase a two-wheeled hearse, and in 1808 voted to build a hearse-house.

In 1856 the town purchased of Charles Gerry, Silas Hosmer and Levi Downe about fifty acres of land situated on Mt. Elam Road, in the southerly part of the town, at a cost of a little over two thousand dollars. Work was soon begun upon clearing and laying out the grounds, and at the present time Forest Hill Cemetery, as it is named, is an attractive and well-kept burial-place.

St. Bernard's Cemetery, on St. Bernard Street, in the easterly part of the town, is owned by St. Bernard's Parish, and has been in use for some years.

There are several small burying-grounds in various parts of the township, which have not been used for burial purposes for many years.

In concluding this sketch, the writer desires to express his thanks to all who have, in any way, assisted him in its preparation. To the librarian of the Fitchburg Public Library, Mr. Prescott C. Rice, and his assistants, the writer feels especially indebted for their uniform courtesy and efforts to aid him in collecting material from the manifold resources of the library.

The sketch is necessarily condensed and incomplete. Doubtless some facts of importance and deserving of mention have been inadvertently omitted; for, to condense the history of a place like Fitchburg, for a period of a century and a quarter, into the space allowed in this volume, without making some omissions, would be almost an impossibility.

It is to be hoped that the writer's intention of giving, in the foregoing, a fair account of the history of Fitchburg, from its incorporation to the autumn of 1888, has been accomplished, and that the future historian of the city may obtain from it numerous facts never before published, which are well worth elaborating in the more ample space that will be given to the "History of Fitchburg" which, sooner or later, must be forthcoming.

BIOGRAPHICAL.

ALVAH CROCKER.

Alvah Crocker, of Fitchburg, Mass., was born at Leominster October 14, 1801. His father, Samuel Crocker, was born March 22, 1774, and his mother (*née* Comfort Jones) on the 23d of August, 1777. Mrs. Crocker was a descendant of the celebrated Adams family, and inherited all its self-reliance and independence of character. Nobly struggling under adverse circumstances, and unwilling to receive assistance not absolutely necessary, she aided to nurture the children in habits of honest industry, and to accustom them to exertion, not only from necessity, but also from choice. Such an education as they received proved to be a greater instrument of temporal success than large fortunes in the hands of numberless children of luxury and ease.

From this sensible and energetic mother young Alvah derived his most prominent characteristics.

In his father the spiritual element was more pronounced than the secular, and revealed itself in a remarkably unselfish, devoted and consistent life. An earnest Christian, of the Baptist denomination, he rarely entered into conversation without introducing the subject of religion.

With such a nature, developed under such influences, worldly success was simply a question of time to the aspiring boy. Its beginnings, like those of most American monarchs of industry, were sufficiently humble.

His father's occupation was that of a vatman, in the employ of Nichols & Kendall. He himself was sent to work in the mills at the early age of eight years. Being of studious turn, and eager to avail himself of every opportunity of acquiring useful knowledge, he gladly utilized the privilege of access to Mr. Nichols' library, and stored up in his memory, for future use, many facts and principles; thus laying, broad and deep, the foundation for a coming superstructure of imposing grandeur and usefulness.

Having once tasted "the Pierian spring," Alvah Crocker's thirst became insatiable. All his energies were taxed, that he might earn and accumulate enough money to defray the expenses of a coveted collegiate education: a plan in which he received no encouragement from his father. At the age of sixteen he had saved the sum of fifty dollars, with which he entered Groton Academy. There he remained for several months until necessity obliged him to resume labor for the acquisition of further funds. He did not, however, relinquish his studies, but prosecuted them in the evening as diligently as he attended to business during the day, and triumphantly kept pace with his class in the academy.

In 1820 the persistent youth went to work in a paper-mill at Franklin, N. H., and three years afterward removed to Fitchburg, Mass., where he entered the employ of General Leonard Burbank, who was the pioneer of the paper manufacture in that section of the State. The mill was situated where the works of the Rollstone Machine Company are now located, and in the midst of surroundings marvelously different from those which encircle the latter establishment.

Conscious of his own powers and laudably ambitious to create, direct and acquire on his own account, he next determined to embark in independent enterprises. In 1826, aided by borrowed capital, he erected a paper-mill in a birch swamp in that part of West Fitchburg subsequently known for many years as Crockerville.

Hopeful, prudent and pertinacious, he never lost courage, but toiled with unflagging energy and zeal until he had accomplished his purposes. From this epoch until 1830 life was a continuous struggle to meet his many obligations. The times were hard; he was in debt; a freshet injured his mill; the mode of paper manufacture changed from manual to mechanical; machinery was required for successful competition with his rivals, and the necessitated outlay demanded increased capital. Difficulties gathered

Printing & Engraving Co Boston.

Charles Walker.

thick and fast; but courage and force carried him safely through all.

Keen to perceive in what measures his own interests lay, and prompt to act upon clear convictions, Mr. Crocker soon abandoned the practice of consigning his products to commission merchants for sale, and took the whole of affairs into his own hands. Sending his paper by his own teams into Boston, he also sold it directly to customers. In truth, his financial situation was such as to demand the clearest foresight and the shrewdest economy. He was still owing twelve thousand dollars of the sum borrowed for the original investment, and also four thousand dollars to his commission merchants; ten thousand dollars more must be obtained for the purchase of machinery to put him on equal terms with his competitors. The great majority of men would have despaired under such circumstances; but his strength was equal to the burden, and the possibility of failure was not allowed to number in the factors of his calculations. The capital desired was secured, business prospered, debts were paid, the shoals and rocks were passed, and his bark rode gallantly on the deep waters.

Continuous prosperity and enlarging business induced Mr. Crocker to build additional paper-mills, and also to increase and diversify his activities by entering into the construction of railroads. In 1850 the firm of Crocker, Burbank & Co. was organized. This firm—of which the son of Mr. Crocker is a prominent member—owns, at the present time, seven paper-mills, and produces about fifteen tons of paper daily. The Snow, or Upper Mill, was built in 1839, and, after passing through several hands, came into possession of Crocker, Burbank & Co. in 1862. The Cascade Mill was erected in 1847, and was purchased by the firm in 1863. The Upton Mill was built in 1851, and was purchased in 1859. The other mills belonging to the firm were built in the following order,—the Whitney Mill in 1847, the Hanna Mill in 1852, the Lyon Mill in 1853 and the Stone Mill in 1854, and were purchased, respectively, in 1868, 1860, 1869 and 1871.

Of brilliant practical endowments, public-spirited, and prone to large undertakings, Mr. Crocker clearly identified his private interests with the welfare of his adopted town. He thoroughly understood that whatever would increase the population, the wealth, or the resources of Fitchburg, would directly or indirectly be of service to each of its citizens, and would amply repay the expenditure of time and money in cordial, intelligent co-operation. The town had entered upon a career of substantial prosperity about the year 1833, and was proud of its mills, its academy, its newspapers, its three churches, and prouder still of a goodly number of wise and enterprising men. The immense advantages of railroad transportation were more or less appreciated, and by none more truly than by Mr. Crocker, who bent all his disciplined energies to the construction of a railroad from Fitchburg to Boston. This was in 1834, at which time he prepared the way for himself, and for many others, to distinction and fortune. Being employed by the town of Fitchburg to build a road farther up the Nashua Valley, he found the land-owners on the proposed extension opposed to it, and demanding exorbitant prices for the ground required; but, nothing daunted, he bought the whole Nashua Valley as far as the Westminster line at the prices asked, gave the necessary land for the new road, and reaped for himself and the public the benefits afforded by new and improved means of communication.

Such services as these very properly commend him who renders them to the good graces of his fellow-citizens, and distinguish him as a fitting repository of public trusts. The sharp-sighted electors of Fitchburg, with these convictions, elected Mr. Crocker to the lower house of the Massachusetts Legislature in 1835. His beneficent action in that body justified the sagacity of his constituents. In 1836 he voted for the subscription by the State of one million dollars to the completion of the Western Railroad. But for his zealous advocacy, it is more than probable that the subscription would not have been made—certainly not at that time. Returning home, he began to arouse the people of Fitchburg and the contiguous towns to the incalcuable importance of direct railroad communication with Boston, and did not cease to agitate the subject until his wishes were realized in the finished structure. His abiding conviction was that Northern Massachusetts must have communication by rail with the tide-water, or pale into utter insignificance. At first he aimed simply to secure a branch road from either Worcester or Lowell; but wider knowledge impelled him in 1842 to boldly advocate an independent route from Fitchburg to Boston. His pecuniary resources were laid under liberal contribution for necessary surveys, and both the routes he then selected have since been followed by railroads.

In 1842 Mr. Crocker was again elected to the popular branch of the Legislature, and again toiled with wonted zeal and efficiency for the accomplishment of his favorite project. A charter was finally obtained, in the presence of much ridicule and opposition, and work on the Fitchburg Road was speedily begun. While the new enterprise was in progress of construction, he went to England to buy iron and other materials, and in different ways to foster its interests. His interest in the progress of the work, from the hour that the first pick was struck into the earth until its completion, was unfailing, and on the 5th of March, 1845, he enjoyed the pleasure of riding into Fitchburg on the first locomotive that ever passed over the road. That was one of his proudest and happiest journeys. His election as first president of the railroad company fittingly followed. In June the same year he resigned his office to enter upon the

presidency of the Vermont and Massachusetts Railroad Company, which he continued to hold until the completion of the road to Brattleboro', Vermont.

Mr. Crocker's financial condition at this time was one of soundness and healthful growth.

The fortitude, the heroism, the generalship of former years had brought him rich substantial reward. The construction of the Fitchburg Railroad, in particular, greatly benefited both himself and the town. The massive stone depot, built on the completion of the road, was placed on land owned by him in what was known as Old City. This was contrary to the expectation of a large number of people, who had supposed that it would be located on higher ground, and that, because of the heavy grade, the road could not be extended farther to the West. The citizens of the upper part of the town had also desired to have the depot in their neighborhood, and were by no means pleased with its location in the Old City.

"Crocker, you can never get your road out of Fitchburg," his friends were wont to remark. But little was said in reply. He quietly continued to labor, and in less than three years work was commenced on the Vermont and Massachusetts Railroad from Fitchburg to Greenfield. The latter artery of social and commercial life was duly perfected; and, as we have seen, he had the honor of being its first president, and held that office two years.

Mr. Crocker was afterward largely engaged in railroad operations in different parts of the State, and was especially interested in the Troy and Greenfield Railroad and in completion of the Hoosac Tunnel. In their behalf he delivered several hundred lectures in the years 1847 and 1848, and probably did as much or more than any other man in Massachusetts to make the piercing of the Hoosac Mountain an engineering and transportational success. When the latter work fell into the hands of the State he was one of the commissioners charged with its administration. Nothing likely to conduce to the public good seems to have escaped his notice. He was prominent in bringing before the citizens of Fitchburg the importance of a complete system of water-works, and contributed in no small degree to the embodiment of his own recommendations. He also raised buildings for the manufactures diverse from his own specialty, and thus established new branches of industrial art in the town, thereby adding to its population, wealth and resources.

The leading ambition of Mr. Crocker's life, so far as corporate growth is concerned, was, however, less in Fitchburg than in Turner's Falls. The prosperity of the latter town was what he desired more than that of any other. Without loving the first less, he loved the latter more. He wished to see it rival Lowell, Holyoke and other manufacturing cities in size and commercial importance, and even to excel them; and to that end he spared nothing in his wonderful genius and manifold resources. While searching for a more direct route between Miller's Falls and Greenfield than the one pursued by the Vermont and Massachusetts Railroad, he had been called to observe the magnificent water-power possessed by the Connecticut River at Turner's Falls. Charmed by its natural advantages, and perceiving the possibilities of a great manufacturing city around the spot, he conceived the project of converting possibility into actuality, and, with the characteristic promptitude and decision, threw himself into its execution. Thenceforward this gigantic scheme took almost exclusive possession of his mind. In company with other capitalists, whom he invited to join him, he organized the Turner's Falls Company in 1866. The new corporation purchased the rights and franchises of an old organization, known as "The Proprietors of the Upper Locks and Canals on the Connecticut River, in the County of Hampshire," and proceeded to carry out their plans. They also purchased largely of the lands in Montague, lying on the river front, near the falls. A dam having a fall of thirty feet and a capacity of thirty thousand horse-power, was next constructed, and the water-power thus rendered available for use.

From 1866 until the time of his death the daring projector worked hard for the prosperity of the new town, spending large sums of money in the promotion of its interests, and enlisting the aid of others in the great undertaking.

What Mr. Crocker would have achieved in the wise and energetic prosecution of his plans at Turner's Falls, had his life been spared, is matter of probable conjecture. Reasoning from the great results he had effected in the few years devoted to the task, he would doubtless have left it a splendid monument of his genius and creative power. But in the midst of his hopes and ambitions, and while contriving and striving to compass his end, he was suddenly cut down, and the realization of his schemes devolved upon his associates. The plan of a public library and of similar beneficent institutions had taken definite shape in his mind, and was prevented from passing into concrete form by his lamented death. There are two banks in Turner's Falls,—the Crocker National Bank and the Crocker Institution for Savings,—both of which he was instrumental in organizing. In the Crocker National Bank, his son, Charles T. Crocker, is a director, and of the Savings Institution he is a trustee.

Mr. Crocker was also one of the originators of the Rollstone Bank at Fitchburg, in 1849, and held the office of director from that time to the day of his death. In 1870 Mr. Crocker was elected president of the bank. Throughout the whole of these terms of valuable service he labored incessantly for the adoption of measures intended to develop the resources of Northwestern Massachusetts. His conspicuity in this particular suggested the propriety of his being chosen to fill the unexpired term in Congress of the Hon. William B. Washburn, who had been elected Governor of

P. Toney

Eugene T. Miles.

the State. Mr. Crocker—a Republican in politics—was accordingly elected to the vacant post, and took his seat in the National House of Representatives on the 2d of January, 1872. He was re-elected to the Forty-third Congress,—receiving 14,919 against 4,588 cast for his Democratic competitor,—and served from January 14, 1872, until December 26, 1874, on which day he died, very unexpectedly, at the age of seventy-three years, two months and twelve days. The ordinary bound of human life had been passed, and yet there were strong probabilities of fruitful years to come. But on the 19th of December—a week preceding his decease—he was seized by a peculiar kind of cold, epidemic at Washington, and left the capital for the home in which he was so soon to die. The funeral services were celebrated at Christ Church, in which an appropriate sermon was delivered by a former pastor, the Rev. Henry L. Jones, of Wilkesbarre, Pa.

Mr. Crocker was married three times. His first wife, *née* Abigail Fox, and he were united on August 14, 1829. She died August 21, 1847, leaving five children. Miss Lucy A. Fay became his second wife on the 9th of April, 1851, and died on the 29th of January, 1872. On the 20th of November of the same year he was again married, to Miss Minerva Cushing. Of his four daughters and one son, children of his first wife, only one daughter and the son are now living.

EBENEZER TORREY.

Ebenezer Torrey was born at Franklin, Mass., August 16, 1801, and died at Fitchburg September 3, 1888. He was the son of John and Sally (Richardson) Torrey. He fitted for college at the academies at Leicester and Lancaster, Mass., and entered Harvard University at the age of seventeen years, graduating in 1822. He then went to Fitchburg and studied law with John Shepley, a leading member of the Worcester County bar, and was admitted to the bar in 1825. In 1827 he formed a partnership with the late Nathaniel Wood, which continued for nearly fifty years, and was one of the leading firms of lawyers in the county. In 1832, upon the incorporation of the Fitchburg Bank, Mr. Torrey was chosen cashier, and, although he still continued his connection with the firm of Torrey & Wood, he devoted the greater part of his time to the business of the bank. In 1859 he was elected president of the bank, which office he retained during the remainder of his life.

The Fitchburg Savings Bank commenced business in 1846. Mr. Torrey was its first treasurer, and afterwards became its president. In 1831 he was chosen a director of the Worcester Mutual Fire Insurance Company, and served in that position during the remainder of his life, having been elected president of the company in 1879. He was treasurer of the town and city of Fitchburg continuously from 1840 to 1874, inclusive, when he declined a re-election, and was the first treasurer of the Cushing Academy of Ashburnham. In 1831 and 1847 he represented the town of Fitchburg in the Legislature, and in 1849 was one of the five Senators from Worcester County. In 1852 he was chosen a Presidential elector, and voted for Gen. Winfield Scott. In 1853 he served in the Executive Council with Governor Clifford, and during the succeeding year with Governor Emory Washburn. In 1825 he married Frances Houghton, of Fitchburg, who died in 1831, leaving two daughters, the elder of whom was the wife of George A. Cunningham, of Boston, and the younger is the wife of Hiram A. Blood, of Fitchburg. In 1832 he married Sarah Arnold, of Uxbridge, who, with their only son, George A. Torrey, of Boston, survives him.

In the words of Rev. Mr. Pierson, who preached his funeral discourse, "The key-note of Mr. Torrey's character was personal honor and uprightness. He was a man to be depended upon. You could trust him in all relations and emergencies. His life and action moved on like clock-work—the regulation and routine of good habits. From early manhood to old age he scarcely took an extended vacation. More than many men he seemed to have the capacity for continuous work. His was a busy, active, industrious life.

"Another secret of Mr. Torrey's sanity of mind and body was his commingled intelligence and humor. He had at once wisdom and wit. This humor was not occasional with him. It was habitual. It was ingrained in his temperament. He saw the ludicrous as well as the sublime side of things. He chose the sunny, rather than the shady paths of life."

EUGENE T. MILES.

Hon. Eugene Temple Miles, second mayor of the city of Fitchburg, familiarly known in Fitchburg as Captain Miles, was born in Framingham, Mass., August 26, 1826. He was the son of Jonas M. and Anstis (Kendall) Miles.

His father, Dea. Miles, was a resident of Shrewsbury for many years, but the family were temporarily residing in Framingham at the above-named date. The name of Miles, or Myles, as it frequently appears upon the ancient records, belongs to a family of honorable mention in the annals of the Commonwealth. John Miles, the emigrant ancestor, was a resident of Concord as early as 1637, and in that town, or immediate vicinity, he was succeeded by his son Samuel, while his grandson Samuel removed in 1729 to Shrewsbury, from whom the deceased was the fifth generation in descent, and the seventh generation since the emigration to New England.

In early manhood Mr. Miles was several years in the hardware trade in Worcester, as clerk, and for a short time the junior partner of Poole & Miles. In January, 1856, he removed to Fitchburg, where he continued to reside until his death. During the first few months of his residence here he was associated in business with A. G. Page at West Fitchburg, but in

July of the same year (1856) Mr. Page sold his interest to Augustus Whitman, and the firm of Whitman & Miles entered upon a long and highly successful career. The business, as is well known to all our resident readers, was the manufacture of cutting-knives, including a variety of edge tools and kindred wares. Under skillful management the business constantly increased until an annual business of from $100,000 to $250,000 has been done, and in a few instances the larger sum has been exceeded.

In 1869 extensive branch works were established in Akron, Ohio, and in 1864 the firm was succeeded by a stock company, but the name was little changed, and the name of the deceased has been honorably and prominently connected with the business for twenty years, being president of the company from the date of its incorporation until his death.

He was connected with a number of other manufacturing companies in Fitchburg, and also at Akron, Ohio.

Large and intimate as have been his business connections with Fitchburg, Mr. Miles has been intimately associated with the civil and monetary affairs of the town for many years, and has frequently been chosen to positions of responsibility and trust.

He was a member of the Board of Selectmen in 1864, '65, '66 and '72, and mayor of the city in 1875. He was one of the directors of the Fitchburg National Bank, and one of the trustees of the Fitchburg Savings Bank.

He was also president of the Worcester North Agricultural Society, and a member of the State Board of Agriculture, and one of the vice-presidents of the Fitchburg Board of Trade since its organization.

In all these positions of trust he evinced rare good judgment and executive ability. It has been remarked by a gentleman who knew him intimately, that whatever he did, he did well.

In habits of thought he was rapid but exact, and much of his influence and ability to put into successful operation what would be mere day-dreams in the minds of others were the result of a faculty of swiftly weighing and passing judgment upon questions of moment that claimed his attention. His impulses were generous and lofty, his manners urbane, and his treatment of his associates kind and considerate.

Captain Miles was an earnest supporter of the Union Army during the late war; ever ready to aid the soldiers and their families.

He enlisted early in the war, but the health of his partner failed, which left the sole management of a very extensive business entirely to his care, compelling him to resign his commission as captain of Company A, Fifty-third Regiment of Massachusetts Volunteers, before the regiment left its quarters in New York for active service in the field. At the close of the war he was captain of the Fusileers one year.

His labor in connection with the soldiers' monument and the beautiful square in which it stands, and the admirable report which in behalf of the committee he made at the time it was formally presented to the city, are subjects of record, and will long remain an enduring inscription to his memory, announcing at once his patriotic interest in the work, and his ability to give efficient shape to lofty impulses.

In the very meridian of his manhood and in the midst of usefulness he was called from the scenes of this life. He died very suddenly at his residence on Blossom Street, June 26, 1876. Better known to all the citizens of Fitchburg, both rich and poor, than almost any other man, and bound up as he was with so many of the mercantile interests of the city, his loss was severely felt.

His characteristics were a devotion to the welfare of his adopted city, honesty of official life as well as integrity in business affairs of every description, and the exercise of those estimable qualities that go to make up the companion and friend; and it may be truly said of him that in his death the poor man, the soldier and the soldier's family lost a sincere friend.

GARDNER S. BURBANK.

The subject of this sketch was born in Montpelier, Vt., July 22, 1809. He was a son of Silas and Bathsheba (Egery) Burbank, and the youngest of a family of eleven children.

Mr. Burbank was educated in the schools of his native town, but at a comparatively early age entered upon an occupation that seems to have been hereditary in the family—that of paper-making.

His grandfather, Abijah Burbank, lived in Millbury, Mass., and erected and operated in that town the first paper-mill in Worcester County, and one of the first built in this State. Almost all of Abijah Burbank's children and grandchildren were paper manufacturers. General Leonard Burbank, who operated the first paper-mill in Fitchburg, was his grandson and a cousin of Gardner S. Burbank.

Gardner S. Burbank began paper-making in Montpelier, Vt., but in 1827 went to Millbury, Mass., where, for seven years, he was associated with his uncle, General Caleb Burbank, in the paper business. He then went to Worcester, where, for eleven years, he operated a paper-mill, formerly owned by another uncle, Elijah Burbank.

In 1846 he moved to Russell, and formed a partnership with Cyrus W. Field and Marshall Fales. The firm erected a large paper-mill and ran it for about five years, at the end of which time Mr. Burbank, being in poor health, withdrew from the firm, and in October, 1851, came to Fitchburg. He then formed a partnership with the late Hon. Alvah Crocker, at whose earnest solicitation he came to this town, under the name of Crocker & Burbank. C. T. Crocker was admitted to the firm in 1855, and G. F. Fay and S.

L. L. Burbank
Fitchburg

John Putnam

E. Crocker in 1863, and the paper manufacturing firm of Crocker, Burbank & Co. developed into the leading one in Fitchburg during Mr. Burbank's fifteen years' connection with it.

In 1866 he disposed of his interest in the firm and retired from active business; but his sterling integrity and sound judgment made him the recipient of many offices of trust. In addition to many important private trusts, he was a director of the Fitchburg National Bank from 1871 till his death; a director of the Fitchburg Mutual Fire Insurance Company since July, 1875; a trustee of the Fitchburg Savings Bank since June, 1875; and a member of the board of investment of that institution from 1875 to 1885.

Mr. Burbank married, at Auburn, May 23, 1837, Mary Sibley, who died at Worcester December 4, 1839. On May 27, 1841, he married Sarah W. Grout, who survives him. Their three children are all deceased. Edwin H. died August 18, 1855, at the age of thirteen; Mary J. died August 26, 1861, aged sixteen years; and Sarah F., wife of Dr. F. B. Joy, died February 10, 1879, at the age of twenty-nine years.

His modesty led him to decline public positions during his many years of residence in Fitchburg, and the only times that he has consented to be a candidate for public office have been when his name would add strength to the weaker, and what he considered the better, cause. While residing in Russell he represented the town in the Legislature in 1849 and 1850.

Mr. Burbank was always deeply interested in whatever tended to increase the prosperity of Fitchburg, and his wish and decree as to the ultimate disposal of his large property show not only his great regard for the city of his adoption, but also his warm, generous heart and his love for humanity. During his life also he was constantly aiding the poor, the unfortunate and the struggling; but the amount of good he thus accomplished can never be known, as he carefully avoided publicity and sought methods of assisting others which would not meet the public eye.

Many a timely loan has he made to young men who were striving to establish themselves in business, or acquire an education; and oftentimes the only security that could be given was the honor of the recipient.

Mr. Burbank's excellent habits and strong will undoubtedly prolonged his life many years. From early childhood his health was not good, and since middle life has been seriously impaired. He closed his long and useful life on the 7th of February, 1888.

His bequest, so generous and ample, to the city of Fitchburg, which will cause his memory to be blessed for generations to come, cannot be better spoken of than by quoting the following extracts from his will.

After providing for certain bequests, the residue of the property is placed in the hands of trustees, and, after paying some annuities, the income is given to Mrs. Burbank for life. At her decease the following clauses become operative:

"And the remainder of said principal not hereinbefore disposed of under the preceding provisions of this will, I direct my trustees to pay over to the city of Fitchburg, as far as, and as fast as, it is released from the charges and annuities hereinbefore created, for the founding and maintaining of a hospital for the care of the sick. And while I do not wish to embarrass this gift with provisions and restrictions, but desire that the city shall carefully and considerately carry my plan into execution, believing that founders of benevolent institutions like the one I contemplate often create great difficulties by endeavoring to settle in advance the details of the work they have projected, still I wish to indicate, in general terms, two purposes which I desire to have executed.

"First, I desire that a substantial and commodious hospital building shall be erected, and as I trust that my charity may survive and do good to the poor and sick for many generations, and also believe that the City of Fitchburg will in time be a large and prosperous city, I would suggest that the sum of at least $100,000 be devoted to the purchase of the necessary land and the erection of the structure. And I also request and direct that while those who are able to pay for the services rendered them in the hospital may be subjected to such moderate and reasonable charge as is usual in such cases in similar charitable institutions, those, on the other hand, who are in poverty and sickness shall ever be received and cared for kindly and tenderly, 'without money and without price,' and without regard to color or nationality.

"It is by the request of my wife, whose good judgment has so greatly aided me in all the affairs and purposes of my life, that I was led to make the foregoing provision for the foundation of a hospital."

This bequest will be ample to insure to Fitchburg, at some future time, an excellent hospital, which will be at once a lasting memorial to the munificent founder and a great blessing to the community.

JOHN PUTNAM.

John Putnam, the founder of the Putnam Machine Company, and the pioneer of the machine business in Fitchburg, was born in Peterboro', N. H., October 14, 1810.

He was a descendent, in the seventh generation, of John Putnam, who, with his wife, Priscilla, came from Abbot-Aston, near Aylesbury, England, in 1634, and settled in Salem, Mass. John's eldest son, Thomas, first settled in Lynn, but soon removed to Salem Village (now Danvers.) The next in line was Edward, whose son, Elisha, removed in 1725 to Sutton, Mass.

—incorporated ten years before—where he purchased a large tract of land for a farm. Elisha's son, John, spent his life in Sutton, and was a scythe-maker. His son, John, the father of John—the subject of this sketch—was also a scythe-maker.

Mr. Putnam was closely connected in descent with General Israel Putnam, and also with General Rufus Putnam, who was commissioned lieutenant-colonel at the beginning of the Revolutionary War, and superintended the construction of fortifications at Brookline, Roxbury and Dorchester Heights. In August, 1776, he was appointed chief engineer of the Continental Army, with the rank of brigadier-general, and superintended the construction of fortifications at West Point, the most important one—Fort Putnam—being named for him. He enjoyed the confidence and esteem of General Washington.

General Rufus Putnam was one of the earliest settlers of Ohio, and in 1788 founded the city of Marietta, the first permanent settlement made in that State.

John Putnam, during early life, assisted his father at scythe-making. When fourteen years old he became an apprentice at the shop of Loammi Chamberlain, a machinist at Mason Village (now Greenville), N. H., where he served five years, working fourteen hours per day. He had the privilege of four weeks' schooling each year, working before and after school-hours.

After completing his apprenticeship with Mr. Chamberlain he continued in his employ, receiving one dollar per day as wages, and in 1835 he hired a part of his employer's shop and tools and began the manufacture of cotton-machinery. At this time his younger brother, Salmon W. Putnam, then nineteen years old, began working for him as an apprentice.

In 1836 he went to Trenton, N. J., and made arrangements to start a machine-shop there, and on his return to Mason Village he set about making the machinery and necessary tools for his future business. His plan of going to Trenton was, however, destroyed by the panic of 1837, the parties who had agreed to erect a building for him there deciding it was inexpedient to do so.

Mr. Putnam, after storing the machines and tools he had made, sought employment elsewhere and soon obtained a situation as repairer of machinery at Deacon Smith's cotton-factory at East Wilton, N. H. Shortly thereafter the mill was burned and Mr. Putnam obtained another situation in Samuel Wood's cotton-factory in Ashburnham, Mass. After working there some months he hired a room in Mr. Wood's factory, and moving his tools, etc., from their place of storage in Mason Village, set them up there. He then took his younger brother, who was without capital or experience in the business, as an equal partner, and began business under the style of J. & S. W. Putnam.

The tools with which the firm started in 1837 consisted of one 24-inch swing lathe, two small screw-cutting lathes, one chucking and one polishing lathe, an upright drill and gear-cutter, two die-stocks, taps, dies, reamers and mandrels.

After having remained in Ashburnham nearly a year and not being satisfied with their prospects in that place, the brothers removed to the neighboring town of Fitchburg, which then had a population of a little over two thousand inhabitants.

The history of the firm and of its great successor, the Putnam Machine Company, is fully given in the section on Iron Industries in the sketch of Fitchburg.

John Putnam was extremely ingenious and a very skilful workman. Much of the new kinds of machinery made by the firm was devised by him; and from the first and for many years he made all the patterns and forgings used in their business. Gear-cutting machines, new machinery for paper-making, gauge lathes for making bobbins, etc., may be mentioned among his many inventions.

In the early years of the business Mr. Putnam, being the only one competent to superintend the mechanical part of the enterprise, devoted his entire energies to make it a success, denying himself and his family, in a great measure, that he might put every dollar derived from the business back into it. He became so engrossed in its management, never allowing a moment of recreation to himself, that he gave slight heed to the outside and pecuniary part of the business, which he entrusted to his younger brother, Salmon W. Putnam. He did more hard work and furnished more capital toward building up the enterprise than any one else; and the business of the Putnam Machine Company of to-day represents the growth of an enterprise established mainly by his skill and untiring energy through long years of unremitting toil and self-denial.

Soon after the decease of S. W. Putnam, February 23, 1872, the presidency of the Putnam Machine Company was offered to John Putnam; but, having been confined to the mechanical part of the business all his life, and not wishing, at that late day, to assume the responsibilities involved, he declined the position and used his influence to place Charles F. Putnam in the president's chair.

Up to the time of his death Mr. Putnam was a heavy stockholder, and for many years a director in the Putnam Machine Company; and until he retired from business, in 1886, he energetically kept at work with unimpaired skill, and was daily found in his apartment.

Mr. Putnam married, in 1834, Miss Sophronia Chapman, of Cambridge, Mass. She died February 14, 1866, leaving three sons,—John L., H. Marshall and Charles W.,—all of whom follow the business of their father, and two daughters, now Mrs. C. C. Stratton and Mrs. Edward Newitt.

In 1879 he married Mrs. Helen Domett, of Hyde Park, Mass., who survives him.

Mr. Putnam was one of the first members of the

L. H. Brown

Methodist Episcopal Society in Fitchburg. He was always deeply interested in the welfare of the church and contributed generously toward its support. He was trustee from 1858 till his death, July 31, 1888, and one of the largest donors to the building fund for the handsome and substantial Methodist Church recently erected in this city; and his pledge of two thousand dollars was at once the incentive and nucleus around which gathered the means that insured its erection; and he afterwards made liberal contributions to the same worthy object.

Mr. Putnam was one of our oldest citizens, and much respected for his great mechanical skill, his strict integrity and his pleasant, unostentatious manners. At the time of his death he was nearly seventy-eight years old; he had been a resident of Fitchburg for just half a century, and lived to see the machine business of this place increase from the accommodations of the twenty by thirty room that he and his brother hired in 1838, in the "Burbank Paper-Mill," to its present enormous proportions.

LUTHER JULIUS BROWN.

Luther J. Brown was born in the town of Eden, Vermont, on December 31, 1827, and was the oldest of a family of four children. His parents were Luther H. and Bersheba (Shattuck) Brown.

His early education was acquired in the district schools of his native town and at the academy in Johnson, Vt.; and later he was a student at Appleton Academy, New Ipswich, N. H. He was fond of study and fitted for college, but financial reverses obliged him to give up his intention of obtaining a collegiate education.

His father kept a dry-goods and grocery store in Eden, and for a time the young man was engaged in this store, where he gained his first experience in mercantile business.

In May, 1843, his mother died, and in June, 1845, the family removed to Manchester, N. H. During the greater part of this interval of two years young Brown was in Hyde Park, in the employ of Noyes Brothers, who kept a large country store. In Manchester he worked in one of the mills and was also employed part of the time in a hardware store.

In 1850, when twenty-three years of age, Mr. Brown went to Boston and became a clerk in the large wholesale and retail dry-goods house of Brett, Ellis & Co., located on Federal Street. He remained in their employ several years and acquired a thorough and valuable knowledge of the business. For a year he had charge of a branch store of the firm in Natick.

In August, 1855, Mr. Brown came to Fitchburg to locate permanently, as it proved. He very soon formed a copartnership with A. B. Sherman in the dry-goods business, and the firm, whose store was in the building next below the present Rollstone Bank block, enjoyed a flourishing trade. The partnership lasted about three years. During this period he married, January 13, 1856, Miss Sarah P. Harding, of East Medway, who, by her tact, courtesy and ability, contributed essentially to the marked success which ere long crowned her husband's mercantile life in Fitchburg.

In 1860 Mr. Brown formed a partnership with Charles Kimball, of Haverhill. The firm of Kimball & Brown occupied a store located on the spot where now stands the handsome structure known far and near as the "L. J. Brown Block."

It was about this time that Mr. Brown performed a feat that attracted widespread attention. In the fall of 1860 there was a sharp and spirited contest over the Representative to Congress from this district, which resulted in the election of Hon. Goldsmith F. Bailey, of Fitchburg, over Hon. Eli Thayer, of Worcester. Mr. Brown favored Mr. Thayer and entered into an agreement with Mr. Silas Ruggles, a druggist here, who favored Mr. Bailey, that the one favoring the defeated candidate "should wheel in a barrow from his place of business in Fitchburg to the hotel in Leominster a well-known gentleman of the 'colored persuasion,' named Ben. Franklin." Mr. Brown's candidate being defeated, in accordance with the agreement, he began his arduous task at one o'clock Thursday afternoon, November 8, 1860. Over a thousand people were present to see him start and the Leominster Band furnished music. Mr. Brown accomplished the journey of five miles in two hours and a quarter, with but seven rests, which was doing pretty well, as the negro weighed one hundred and sixty-five pounds. About a thousand people welcomed Mr. Brown on his arrival at Leominster. In the evening Mr. Brown gave a supper to some twenty-five of his friends. The fulfilment of this novel bet created quite a sensation at the time.

In 1862 Mr. Brown bought Mr. Kimball's interest in the firm, and in April of that year commenced business on his own account, having his wife and a boy to assist him. He soon built up a large trade, purchased the building and enlarged it at five different times. In 1882 he built the present handsome brownstone front.

Mr. Brown began with dry-goods and cloak-making, but dress-making was soon added. The carpet department was established in 1882 and the millinery parlor the year following. At the time of his death over fifty people were employed in the store.

Mr. Brown's death, September 29, 1884, was keenly felt by the citizens and was a severe loss to the city. The sincere grief of the community was evinced by the profusion of mourning emblems visible on every side.

Private funeral services were held at the family residence on Blossom Street early in the afternoon of October 1st. Later in the day public services were held in Christ Church (Episcopal), under the direction of Jerusalem Commandery, K. T., and King

David Encampment, I. O. O. F. Thousands of people passed through the church to look for the last time on the face of the dead merchant. The floral offerings of friends, employés and organizations were profuse and elegant.

All the places of business throughout the city were closed for the day at noon out of respect for the deceased.

Mr. Brown was a thorough business man. In addition to his large establishment here he had, for three years, a branch store at Shelburne Falls. His prominence was, however, by no means confined to his special line of trade. He held many positions of trust and honor. He was a director in the Wachusett National Bank from its organization in 1875; vice-president of the Worcester North Savings Institution, and trustee since its incorporation; president of the Wachusett Electric Light Company from its organization, and the first president of the Old Ladies' Home. He represented Fitchburg in the Legislature in 1878–79. He was a prominent Mason and Odd Fellow, and a vestryman of Christ Church.

Mr. Brown's social qualities gained him many warm personal friends; he was of a benevolent disposition, and always ready to aid any worthy object. The hall in his block was freely opened for all meetings—political, religious or temperance—and for several years he furnished the hall, warmed and lighted, for meetings of the Railroad Men's Christian Association.

He was active in whatever tended to promote the growth and prosperity of Fitchburg, and it is safe to say that the death of no other citizen could have produced a profounder sensation or more sincere sorrow than did that of Mr. Brown.

CHARLES BURLEIGH.

Mr. Burleigh was born in Waterville, Me., August 30, 1824, and was one of a large family.

He attended the schools of his native town, and early showed a natural aptitude for mechanical pursuits. When a boy, he entered the shop of Mr. William Brown, a blacksmith of the town, where he was employed in ironing carriages and doing similar work, displaying great aptness and ingenuity.

He worked here until he was eighteen years old, when, from a youthful love of adventure, and desire to look abroad, he left home for a whaling voyage of three years, during which time he visited all quarters of the globe.

Soon after his return from the voyage he went to East Boston, where, for several years, he was in the employ of Otis Tufts.

In 1850 he married, and in October of the same year came to Fitchburg, where he continued to reside until his death, which occurred May 28, 1883.

Immediately after arriving in Fitchburg he entered the employ of J. & S. W. Putnam & Co., and soon became a member of the firm; and when the Putnam Machine Company was organized, four years later, he became one of the stockholders, and continued to be largely interested in the company during the rest of his life. For more than twenty years he was a director in the company.

For several years prior to 1869 he was one of the superintendents of the Putnam Machine Company, but his other important business interests outside the works obliged him to give up the position.

About 1865 Mr. Burleigh, appreciating the difficulties that were being encountered in the effort to complete the Hoosaic Tunnel by the use of hand-drills, applied himself to the arduous task of perfecting a power-drill, former efforts in this direction having proved wholly unsuccessful. The result was the Burleigh Rock-drill and Air-compressor, and to these two machines the successful completion of this great work may unquestionably be ascribed.

In 1867 Mr. Burleigh founded the Burleigh Rock-drill Company, with a capital of $150,000, to manufacture these machines and place them on the market; since then they have found a ready sale in nearly all portions of the world, and have made a most important addition to the machinery interests of Fitchburg. These machines have since been used for the successful completion of various difficult engineering feats, and their advent marked a new era in the history of the development of mines. In connection with these two important inventions Mr. Burleigh's name has become widely known.

Mr. Burleigh made many valuable inventions, and various improvements in other departments of mechanics, and secured a large number of patents.

Later in life he became interested in railroads, and was a director of the Boston, Clinton, Fitchburg and New Bedford Railroad for several years previous to its consolidation with the Old Colony Railroad, and after the disasters of 1877 he rendered signal service in saving the common stock from wreck, and in placing the preferred stock on a basis which secured to the creditors who accepted it more than the full amount of their claims.

He was also one of the promoters of the New York and Boston Inland Railroad.

His large business interests caused him to be intimately connected with banking organizations in town, and he was a director of the Wachusett National Bank from its organization.

Charles Burleigh was, in the true sense of the word, a self-made man. He possessed an acute, well-furnished mind, and had acquired a large fund of information on a wide range of subjects, especially those connected with mechanical and mining industries. The position he achieved in the various spheres of usefulness was not the result of accident or chance, but the legitimate fruit of a life of hard work, patient industry and untiring perseverance.

It may justly be said of him that he did not trifle

David Encampment, I. O. O. F. Thousands of people passed through the church to look for the last time on the face of the dead merchant. The floral offerings of friends, employés and organizations were profuse and elegant.

All the places of business throughout the city were closed for the day at noon out of respect for the deceased.

Mr. Brown was a thorough business man. In addition to his large establishment here he had, for three years, a branch store at Shelburne Falls. His prominence was, however, by no means confined to his special line of trade. He held many positions of trust and honor. He was a director in the Wachusett National Bank from its organization in 1875; vice-president of the Worcester North Savings Institution, and trustee since its incorporation; president of the Wachusett Electric Light Company from its organization, and the first president of the Old Ladies' Home. He represented Fitchburg in the Legislature in 1878–79. He was a prominent Mason and Odd Fellow, and a vestryman of Christ Church.

Mr. Brown's social qualities gained him many warm personal friends; he was of a benevolent disposition, and always ready to aid any worthy object. The hall in his block was freely opened for all meetings—political, religious or temperance—and for several years he furnished the hall, warmed and lighted, for meetings of the Railroad Men's Christian Association.

He was active in whatever tended to promote the growth and prosperity of Fitchburg, and it is safe to say that the death of no other citizen could have produced a profounder sensation or more sincere sorrow than did that of Mr. Brown.

CHARLES BURLEIGH.

Mr. Burleigh was born in Waterville, Me., August 30, 1824, and was one of a large family.

He attended the schools of his native town, and early showed a natural aptitude for mechanical pursuits. When a boy, he entered the shop of Mr. William Brown, a blacksmith of the town, where he was employed in ironing carriages and doing similar work, displaying great aptness and ingenuity.

He worked here until he was eighteen years old, when, from a youthful love of adventure, and desire to look abroad, he left home for a whaling voyage of three years, during which time he visited all quarters of the globe.

Soon after his return from the voyage he went to East Boston, where, for several years, he was in the employ of Otis Tufts.

In 1850 he married, and in October of the same year came to Fitchburg, where he continued to reside until his death, which occurred May 28, 1883.

Immediately after arriving in Fitchburg he entered the employ of J. & S. W. The position he achieved in the various spheres of usefulness was not the result of accident or chance, but the legitimate fruit of a life of hard work, patient industry and untiring perseverance.

It may justly be said of him that he did not trifle

Charles Burleigh.

Rodney Wallace

with the work he had in hand, but entered upon his every-day life thoroughly equipped for the struggle, and he fought hard and long for success, always using unimpeachable methods to attain the desired end.

RODNEY WALLACE.

Rodney Wallace was born in New Ipswich, N. H., December 21, 1823, the son of David and Roxanna Wallace. At the age of twelve he left his home to work for a farmer for the sum of forty dollars for the first year, with the privilege of attending school eight weeks in the winter. At the age of eighteen he was driving freight teams from various places in New Hampshire and Vermont to Boston, and in 1843, at the age of twenty, he entered the employ of Dr. Stephen Jewett, of Rindge, N. H., and traveled through five of the New England States selling Jewett's medicines, then well-known and celebrated. He remained here until 1853, when he came to Fitchburg and formed a copartnership with Stephen Shepley, known as Shepley & Wallace. The firm were wholesale dealers in books, stationery, paper and cotton waste, and continued under that name and the name of R. Wallace & Co. until July 1, 1865. On this day the firm was dissolved and the business divided, Mr. Wallace taking the cotton waste department, which he still carries on.

The business has grown, and now he handles about one-quarter of a million dollars' worth of waste a year.

December 31, 1864, Stephen Shepley, Benjamin Snow and Rodney Wallace bought the Lyon Paper-Mill and Kimball Scythe-Shops, at West Fitchburg, and began the manufacture of paper under the name of the West Fitchburg Paper Company, which name has been retained to the present time. Mr. Wallace purchased the interest of his partners, and in January, 1869, became sole proprietor of the property. Since becoming sole owner he has added largely to the original plant, erected many dwellings, a depot and two new mills, complete with all the most modern improvements, and now produces thirty thousand pounds of paper every twenty-four hours.

Since 1864 he has been president and director of the Fitchburg Gas Company; a director of the Putnam Machine Company since the same year; a director of the Fitchburg National Bank since 1866; a partner in the Fitchburg Woolen-Mill Company since 1877; and a trustee of Smith College, Northampton, since 1878. He is a director of the Fitchburg Mutual Fire Insurance Company; a trustee of the Fitchburg Savings Bank; a director of the Fitchburg Railroad Company; a director of the Springfield Trust Company; and a large stockholder in the Parkhill Manufacturing Company. Besides these he has had the settlement of several large and important estates.

For politics Mr. Wallace has had but little ambition. He was selectman of the town during the years 1864, '65 and '67.

He was representative to the General Court in 1873, and was unanimously renominated the next year, but declined a re-election on account of ill health. He served as councilor throughout the entire administration of Governor Long, during the years 1880, '81 and '82, and in 1888 was elected to represent the Eleventh District in Congress.

July 1, 1885, was dedicated the Wallace Library and Art Building. This building was erected by Mr. Wallace, at an expense of eighty-four thousand dollars, and presented by him to the city of Fitchburg free from all conditions except that "it should be under the care and management of the Board of Trustees of the Public Library for the time being, and to be used for a Free Public Library, Reading-Rooms and Art Gallery, and for no other purpose." The building is admirably adapted to the use for which it was intended, and is a continuous source of profit and pleasure to all classes of citizens.

Mr. Wallace married, December 1, 1853, Sophia Ingalls, daughter of Thomas Ingalls, of Rindge, N. H. She died June 20, 1871, leaving two sons—Herbert I. and George R. Wallace. They are associated with their father in the management of his business. December 28, 1876, Mr. Wallace married Mrs. Sophia F. Bailey, of Woodstock, Vt.

GEORGE JEWETT, M.D.

George Jewett, M.D., of Fitchburg, Mass., was born in Rindge, N. H., April 28, 1825. The ancestors of the Jewett family, the brothers Maximilian and Joseph Jewett, came to this country in 1638 from Bradford, Yorkshire, England, with about sixty other families, who settled the town of Rowley, Mass. The descendants of these brothers, under various forms of the name, are found in nearly every State and Territory in the Union. The Rindge branch of the family has been identified with the history of the town from its settlement. Many of the family throughout New England, including several near relatives of the subject of this sketch, have chosen the medical profession. His father, Thomas Jewett, M.D., was for many years a highly-esteemed practitioner in Rindge.

George Jewett received his early education in the schools of his native town, at the Appleton Academy, New Ipswich, and at the academy at Hancock, N. H. Being led both by natural preference and paternal example to select the medical profession as his future field of usefulness, he matriculated at the Vermont Medical College in Woodstock, Vt., in 1845. There he attended two courses of lectures. Thence he repaired to the Berkshire Medical School, from which he graduated in 1847. Subsequently he attended another course at Harvard Medical College, in which he had the privileges of hospital practice, under the

tuition of the late eminent Dr. Jacob Bigelow, of Boston.

Dr. Jewett entered upon the practice of his profession in the latter part of the year 1847, at Baldwinsville, Mass., where he resided till the summer of 1853, when he removed to Gardner and practiced successfully in that town for about five years.

In 1858 he sought and found a wider field for energy and skill in Fitchburg, where he now resides. During the war for the preservation of the Union he entered the service of the United States in January, 1862, as assistant surgeon of the Tenth Massachusetts Volunteer Infantry. He was in General McClellan's army through the disastrous campaign of the Peninsula. During the summer, on the banks of the Chickahominy, sickness prevailed to such an extent, that at one time he was the only commissioned medical officer on duty in his brigade. At the battle of Yorktown he received an order to take charge of a hundred wagons, to collect and carry to Yorktown all the sick and wounded left behind on the advance of the army. In this trying and arduous service he removed the sick from the camp to the wagons, sometimes only with the help of a female nurse, being obliged to carry them on his back. On the arrival of the hospital train at Yorktown he was detailed for hospital duty. Soon after he was ordered in charge of hospital steamer "Arrowsmith." In this position his duty brought him much into the company of medical officers of the Navy. He carried the wounded and sick from various camps on the Pamunky and James Rivers to Annapolis, Baltimore and other sanitaria. He was ordered to join his regiment at the commencement of the "seven days' fight" in front of Richmond, and at the battle of Malvern Hill volunteered, with two other medical officers, to remain behind as prisoners of war in care of the wounded. On this occasion Dr. Jewett was selected to surrender the medical stores and supplies which were left by our retreating army, and also the wounded soldiers and medical officers in charge, to General A. P. Hill, of the Confederate Army, by whom they were paroled.

After a great variety of service in the Army of the Potomac he was promoted by Governor Andrew, and commissioned surgeon and major of the Fifty-first Massachusettts Volunteers, General A. B. R. Sprague, of Worcester, commanding, and ordered to the Department of North Carolina. After some months of service in camp he was ordered to duty as post-surgeon at Morehead City, on the coast. After a short service at this point he joined his regiment, which was ordered to Harper's Ferry, there to unite with the army of General Meade, after the battle of Gettysburg. At this period matters began to assume a threatening attitude in New York City, where his regiment was ordered for service, camping at Castle Garden. He was honorably discharged with the regiment at the expiration of the term of enlistment, July 27, 1863, having been in constant active service, in places of danger from disease or battle, during the whole period.

On his return from military service he resumed practice at Fitchburg, and continued therein until the latter part of 1867. He then made an extensive tour, covering portions of Europe, Egypt, Palestine, Turkey, etc., spending considerable time in European hospitals, and returned home in 1868, with enlarged professional knowledge, powers strengthened and disciplined by unwonted contact with men and things, and complete adaptation to the needs of suffering humanity.

Dr. Jewett ranks with the leaders of the medical fraternity in Worcester County, and has acquired an enviable surgical reputation. Zealous and diligent in all that pertains to the science and art of medicine and surgery, he has frequently contributed to the enrichment of medical literature.

Among his writings are a paper on "Surgical Injuries of the Head," that was read before the Massachusetts Medical Society, at its annual meeting in 1877; and also an article on "The Use of the Aspirator in the Bladder," describing an original mode of treatment adopted in the first operation of the kind known in that section of the State. It was published in the *Boston Medical and Surgical Journal.*

Dr. Jewett is a member of the Massachusetts Medical Society, and also of Worcester North District Medical Society, and has been honored in many ways by his associates in the medical profession; he was elected president of the latter society, and, during the years of 1877 and 1878, discharged the duties of this office honorably and well. For many years he has been councilor of the Massachusetts Medical Society, and, in May, 1888, became vice-president of the same.

He was called to the management of the Hospital Cottages at Templeton in June, 1886, and, as the president of this institution, has been untiring in his efforts, and under his able administration of its affairs, the prosperity and usefulness of this institution has been nearly doubled.

At the close of the war he was appointed United States examining surgeon for pensions, which office he still holds. He held for three years a commission as surgeon and major of the Tenth Massachusetts Infantry, resigning in 1872. He has also been much interested in agriculture, especially in the department of horticulture, and was president of the Worcester North Agricultural Society during the years 1878 and 1879. In September, 1874, he was appointed physician of the county jail at Fitchburg, which position he now fills.

Dr. Jewett has also taken much interest in the cause of education. From 1869 to 1876 he was a member of the Board of School Committee, and was mainly instrumental in the establishment of the Scientific Department of the High School.

George Jewett

C. H. Brown

In 1848, November 15th, he was married to Mary E. Sanders, of New Ipswich, N. H. She died in June, 1867, and December 17, 1868, he was married to Mary Brooks, of Roxbury, Mass. Four children of the first marriage, having died in early childhood, sleep with their mother on Laurel Hill. One son, Walter Kendall, born October 12, 1869, is now in the sophomore class at Brown University.

CHARLES H. BROWN.[1]

The leading industries of Fitchburg have had their origin in modest and unpretentious beginnings. The pioneers builded better than they knew. In all instances the foundations were laid in toil, and sustained by self-accumulated capital. The unequal growth of the structures has been measured by the genius and the courage of a generation of whom few remain. The founders were men of enterprise, who displayed a sagacity that met the present and anticipated the future. They have builded a city and given an individuality to its business interests. Others of the present and of the future may follow in the beaten track, reaping the fruit of their industry and sagacity; but few can wear the laurels of the pioneer or share the honors of the founders of our prosperous city. Younger than many, yet associated with some of the earlier and prominent business men of the city, is the subject of this sketch, who has founded an important industry, and whose enterprise has contributed to the material interests of the city.

Charles H. Brown, son of Charles and Nancy (Hall) Brown, was born in Mendon, March 9, 1820. The south part of Mendon, including his native village, now constitutes the thrifty town of Blackstone, in the extreme southeast part of Worcester County. During his childhood and youth his parents resided in Mendon, in Leyden, Lewis County, N. Y., and in Burrillville, R. I. The circumstances of his youth did not permit him to pursue an advanced course of study; yet he enjoyed and fully improved the ordinary school privileges common to the youth of his time. If he was denied many opportunities his early ambition craved, he was trained in habits of industry, and was taught the rigorous lessons of self-reliance. At sixteen years of age he sought and obtained employment in a machine shop near Greenville, R. I. Subsequently he was employed in the manufacture of a variety of machinery in Blackstone, Providence, R. I., Newton, Whitinsville and in Northford and Waterbury, Conn. In this initial work of his life he acquired skill and developed a native ability which have given him a foremost rank among the practical machinists of his time.

In 1846 Mr. Brown removed to Boston and after a brief connection with Otis Tufts he removed to Fitchburg in 1849. Here the mission of his life invited him to renewed effort and enlarged opportunities. The discipline and preparation of early toil were quickly rewarded by the early achievements of a successful career.

At this time he purchased of John and Salmon W. Putnam one-third interest of an established business in repairing and manufacturing machinery. For several years the firm was known as J. & S. W. Putnam & Co., and was highly successful. Having acquired a practical knowledge of the steam-engine while in the employ of Mr. Tufts, a celebrated builder at that time, Mr. Brown early directed his attention to this line of manufacture. In 1850 the first steam-engine built in Fitchburg was constructed after his designs and under his supervision. In 1856 a working model, with substantial improvements, was made and patented by Mr. Brown and Mr. Charles Burleigh. The patent was assigned to the firm and it has been long and favorably known as the "Putnam Engine." Mr. Brown continued in the management of this department of the business of the firm until failing health compelled him to retire, for a season, from active pursuits.

In 1859 he sold his interest in the Putnam Machine Company, which had been incorporated the previous year, and four years later he commenced business in Newton Lane. In 1866 he sought enlarged facilities in the block on Main Street, now occupied by the Fitchburg Machine Works. In 1871 Mr. Brown perfected and invented "The Brown Automatic Cut-Off Engine." This invention has won success. To this time its reputation has been increased and its demand has been enlarged. The secret of Mr. Brown's successful business career is discovered in the unremitted care bestowed upon the minutest detail of the manufacture. In all his work everything conforms to his exacting taste for a finely-finished surface and a comely outline of form and proportion. In 1873 enlarged facilities were again demanded and a spacious building lot on the opposite side of Main and corner of Willow Street was purchased, and the present substantial block was erected and fully occupied in 1876.

Two sons have been admitted to an interest in the business, and the present firm of C. H. Brown & Co. includes Charles H. Brown, Sr., Charles H. Brown, Jr., and Frank E. Brown.

Mr. Brown is a man of positive traits of character. He is zealous and independent. His perception is quick and accurate, his judgment is sound and his intelligence is clear and comprehensive. His opinions are well-matured, and are always expressed with conciseness and precision. Mr. Brown has no ambition for political preferment, yet he has manifested a commendable interest in public and in municipal affairs. He was a member of the Common Council two years immediately succeeding the incorporation of the city, and for many years he has been the efficient chairman

[1] By Ezra S. Stearns.

of the Board of Water Commissioners. He is a director of the Rollstone National Bank.

Mr. Brown married, May 24, 1847, Miss Emeline J. Hubbard, daughter of Harvey Hubbard, of Berlin, Conn. They have four sons, two of whom are in business, as stated; John F. is a graduate of Harvard Law School and has recently been admitted to the bar; and William A. is now a student in Yale College.

JABEZ FISHER, M.D.

Jabez Fisher, M.D., was born in Cambridgeport, Mass., April 30, 1824, where he received only the education afforded by the common schools of the time. Engaging in his youth in mechanical pursuits, he found his development limited thereby, and at the age of twenty-three commenced the study of medicine. In 1850 he received the degree of M.D. from Harvard College, and began practice in his native town. In May, 1851, he removed to Fitchburg, and continued practice there until the autumn of 1855. In the mean time his early love of horticulture and especially the charms of fruit-growing so urged him forward that he bought the farm on which his life since 1856 has been spent. His fellow-citizens, appreciating his abilities, designated him as a candidate of the new American movement, and he was chosen in the election of 1854 as one of the five Senators from Worcester County. At the election of the following year he was again returned, this time by the Republican party. The demands upon his time by legislative service, together with his increasing interest in rural pursuits, determined him to give up the practice of his profession, and he removed to his farm in the autumn of 1856.

Giving his whole time and energies at once to his business, he soon became noted, and an authority in his specialty. After serving two years as secretary he was twice chosen as president of the Worcester North Agricultural Society, and as a delegate of the society to the Massachusetts Board of Agriculture he served two terms of three years each. While a member of that board, and afterward, he was often called upon as a lecturer before farmers' clubs and people interested in fruit-growing. In 1869 he gave a course of lectures on market gardening before the students of the Massachusetts Agricultural College, and again in 1870.

He was one of the first to appreciate the merits of the Concord grape, and, by his successful management, demonstrated its value, and was largely instrumental in extending its cultivation in his region. He was never satisfied with any short of the best results; hence his products were always in demand at the highest prices, and were, in consequence, widely known. He has often said that if there were any profit in his or any other business—especially that which dealt in the luxuries of life—it must be found in furnishing the best. Any one could produce mediocrity, but only skill and care could approach perfection. He had no secrets in his operations. Anything that he had discovered or become possessed of was at the disposal of any one who chose to inquire. He gave an address on grape culture before the Board of Agriculture at its country meeting at Fitchburg in 1874, also one on injurious insects at Hingham in 1878. He was an early investigator and an advocate of what is now denominated commercial fertilization. Reading with avidity the first publications of the great Baron Liebig and others upon this subject, and through his knowledge of chemistry, to which he devoted much attention in connection with the study of medicine, he was able to keep fully abreast of the developments of the time.

His home, which he calls "Pomoland," or Pomona's Land, is beautifully situated on an elevation at the base of Pearl Hill, surrounded by higher land, except a picturesque valley reaching out southeasterly, and lying about a mile and a half north from Fitchburg Centre. The whole place is a type of the man who made it what it is, and will well repay any one the trouble of a visit.

Notwithstanding Dr. Fisher's devotion to his home and pursuits, he has found time to serve his townsmen in various capacities in addition to his legislative experience. He has been upon the School Committee, was one of the first board of trustees of the Public Library, was several times a selectman and once chairman of the board. He was chairman of the Board of Water Commissioners while the original works were being constructed, and served for several years afterward. He has been president of the Fitchburg Co-operative Bank from its organization in 1877, giving to it much thought, and no small portion of its success is to be attributed to his oversight.

In politics he was originally a Liberty party man, then a Free-Soiler, next an American, then a Republican, and when the Republicans halted on the temperance question, a Prohibitionist. He says that he has been a Woman Suffragist since his acquaintance with his mother. He hates shams under any and all circumstances, and his sympathies are ever with the weak and oppressed.

Music has been quite a source of recreation, he having played the organ in church some thirty years. He trained the Fitchburg contingent in preparation for the great Boston Peace Jubilee of 1872 to very good acceptance, and also directed the same chorus for a number of concerts at home.

He has always been much interested in meteorology, and has kept a continuous record since January, 1857, which possesses much value, and is often consulted.

Jabez Fisher married Roxanna Betton October 8, 1845, from which union two children survive, viz.: Mary L., born November 14, 1846, who married James A. Morton January 1, 1874; and Jabez F., born August 30, 1850, who married Clara A. Ber-

Jabez Fisher.

nard August 20, 1879. A second marriage was consummated, February 12, 1860, with Lucy B. Hosmer.

In religious belief he is a Universalist. His years set easily, and he serenely awaits the time when his opportunities will be enlarged and his comprehension clearer.

ELI CULLEY.[1]

Eli Culley, a son of Edward C. and Eliza (Mayall) Culley, was born near Bath, England, February 4, 1840. At the age of fifteen years he came to this country, and found employment in a file manufactory in the city of Lowell. Subsequently he removed to Boston, and while residing there he enlisted in the Forty-third Regiment Massachusetts Volunteers, a nine months' regiment, and a military organization of good repute. He was mustered out with the regiment at the expiration of the term of service, in the autumn of 1863.

Recovering from the debilitating effect of a malarial fever, which was contracted in the service, Mr. Culley removed to Weymouth, and there manufactured files on his own account. In 1868 he removed the business to Fitchburg, and from that time he has been an honored resident of this city. His industry and close application to business have been rewarded, and among his fellow-men he is held in high esteem.

The partiality of his fellow-citizens has found frequent and repeated expression in his election to positions of honor and responsibility. In 1875 he was a member of the Common Council, and was president of the body. In 1877 and '78 he was a member of the Board of Aldermen, and each year he was assigned to important positions on the standing committees.

At the city election in December, 1879, after an animated contest, Mr. Culley was elected mayor, and was re-elected the following year. Succeeding these years of service, his friends did not suffer him to long remain among the retired executive officers of the city.

Again he was elected mayor for the year 1888, and has been chosen for the fourth time and for the year 1889. No other citizen of Fitchburg has been called to the executive chair an equal number of times, and no other has filled all the positions here named. In 1880 Mr. Culley was a member of the House of Representatives.

If briefly narrated, the public service of Mr. Culley has been efficient and honorable. The elements of his successful career are found in his sincerity, the unequivocal expression of his convictions and in his direct methods of speech and conduct. In public affairs and in business he has been industrious, and a life of toil and honest effort has been rewarded with the confidence and esteem of his fellow-men. His success has been earned. Alone in the world at fifteen years of age, his only capital was courage and a willingness to work. Among a nation of strangers he found in our American institutions and our New England customs a welcome denied to the foreigner in every other land. Young Culley appreciated the conditions, and from that hour, in every thought, aspiration and purpose, he was as thoroughly an American as any native born. Mr. Culley is pre-eminently one of the products of a benign and liberal government and the type of a successful career, the counterpart of which is not found elsewhere. The poor boy, unaided by friends and the supporting influences of wealth, seldom succeeds in any other country, and only in America does the invitation to industry, morality and good citizenship extend to the ambitious youth of every land.

In characteristics Mr. Culley is free from ostentation and is frank and direct in his methods. His impulses are quick and generous, his sympathies are universal, and his affections are tender and loyal. While tolerant of the opinion and liberal in his estimate of other men, he adheres closely to his own conclusions, and in his administration of public affairs he has been conservative and safe. Unconsciously these outlines present many traits and elements of a model citizen, and in his success is found an incentive to an honest purpose, to loyalty to friends and to country, and to faithfulness in the discharge of public trusts.

In his domestic relations Mr. Culley has been fortunate and happy. He married, October 5, 1862, Martha A. Redman. They have six children—three sons and three daughters—aged from twelve to twenty-four years.

Mr. Culley became connected with the Masons in 1866, and with the Odd Fellows in 1862, and has been a prominent member of both fraternities. In both organizations he has been honored with the post of District Deputy Grand Master.

[1]By Ezra S. Stearns.

SYLVANUS SAWYER.

Sylvanus Sawyer, an eminent inventor and mechanical engineer, was born in Templeton, Massachusetts, April 15, 1822. The family is of Saxon ancestry, who came to England with William the Conqueror. The name, it is claimed, is derived from the invention and introduction of mills to saw by power, and in America the name of Sawyer has been associated with mills and a variety of manufactures in every generation. The emigrant ancestor, Thomas Sawyer, settled in Charlestown (now Somerville) and removed to Lancaster about 1650. He married Mary Prescott and died 1706. His son, Thomas Sawyer, Jr., born 1648, lived in Lancaster, where he died 1736. In 1705 Thomas Sawyer, Jr., and his son Elias were captured by the Indians and taken to Canada. The mechanical genius of the family secured the freedom of the captives. Here the elder Sawyer observed, on the river where

they were confined, fine seats for mills, and proposed to the French Governor that he would build a mill on condition the captives were released. This arrangement was consummated and the Sawyers returned to Lancaster. Elias Sawyer, a descendant of the generations named, removed to Templeton, where, following the proclivities of his family for mechanical pursuits, he built one of the early mills of the town. His son, John Sawyer, the father of Sylvanus, was a farmer and a lumber dealer, but also owned and conducted a mill. He was a natural mechanic, doing his own carpentering, coopering and stone work, and later he supplemented his facilities for miscellaneous work with a lathe and a forge. In the midst of such influences and surroundings Sylvanus at an early age manifested a predilection for mechanics and invention. With equal aptnesss he designed and made many articles of utility and the playthings and trinkets of youth. One of the results of his earlier studies was a water-wheel which has since been made and sold under another name. This was followed by designs for a reed organ, a screw propeller, a hand car operated by foot-power, a steam-engine and many minor inventions. Having neither means nor experience to utilize the fruits of his early thought, the most of them still slumber in his mind.

In youth his health was feeble, and in search of some light employment he went to Augusta, Me., at the age of seventeen and began work in a gun-smith shop. Ill health compelled him to return home, but he brought with him some knowledge of a trade which found exercise in the manufacture of guns and pistols and some of original design. With such employments and assisting as health permitted in the work on his father's farm, he reached his majority. His early educational advantages were limited, but with habits of study and research and by working out his own problems, aided by a judicious selection of books, he is well equipped for the duties of life and easily excels in his favorite lines of research. In his early experience, in the denial of privileges in his youth and in the many embarrassments in his way, Mr. Sawyer has found an apprenticeship which has given him discipline and courage that has led the way to the substantial achievements of his life.

In 1844, or soon after he had reached his majority, he sought employment in Boston and was employed for a short time in a copper-smith shop. Subsequently he remained a year with Jones & Hobbs, manufacturers of locks and house trimmings. Here he devised improvements in several processes of the manufacture, and to him was entrusted the manufacture of the tools peculiar to the work, and which formerly had been made by specialists at considerable expense. Returning to his home in Templeton, his attention was first called to the cane or rattan business in the winter of 1845–46. Mr. William Wood, a cane-worker of Phillipston, seeking the services of an expert in the manufacture of some tools peculiar to the processes then employed in working the cane, came to Mr. Sawyer for advice and assistance. Comprehending the matter at once, Mr. Sawyer informed his visitor the process then employed was faulty, that all the operations could be performed at once, and with a machine operated by power. To this broad assertion Mr. Wood replied that it could not be done, that the ingenuity of many skilled mechanics had been exhausted, and thousands of dollars had been expended in useless and unproductive experiments. The faith of Mr. Sawyer remained unimpaired. In his mind the problem had been solved already. With a clear conception of the working principles of the future invention, Mr. Sawyer visited the shop of Mr. Wood and witnessed the different operations employed in reducing a stick of cane to the finished product. Beside scouring, straightening, and the slow whittling at the joints, there were eighteen manipulations. While witnessing these slow and laborious operations, to his former conception he added a device for scraping the joints in the strand, instead of whittling them off in the stick, and combining it with the process of gauging. This last device was immediately expressed in a machine which was a success, and which saved annually one hundred dollars on a man's labor. While he was maturing plans and making application of his conception of the more important machine for splitting cane, of which the scraper was to be a sectional part, he made and sold several of these machines for scraping the strand. Having matured the designs, and realizing the need of greater skill and experience as a machinist, before putting them into practical form, Mr. Sawyer sought and obtained employment in the then celebrated steam-engine manufactory of Otis Tufts, in Boston. Here he secured the confidence of his employers and the esteem of his associates, and soon was placed in charge of the most important work, with men under him many years his senior in experience. In this service his ingenuity and his ability to abridge processes found frequent exercise. At the completion of the stipulated term of service, he returned to Templeton to prosecute his invention. At this time, the winter of 1848–49, his elder brother, Joseph B. Sawyer, who was then employed in a mill and machine-shop at Palmer, Mass., for an interest in the patents, proposed to furnish needed funds and to assist in the construction of models and experimental machines. The proposition was accepted. In the autumn of 1849 he returned to Templeton, bringing with him a set of cutting-machines and models of the same, and an experimental scraper. The patent was issued November 13, 1849, and a half-interest was assigned to his brother. The machines were set up for exhibition in the shop of his father. For motive-power, a man was employed to turn a crank.

The scraper made at Palmer proved defective. Undaunted, Mr. Sawyer immediately made new drawings, and at Athol constructed another machine after his

Sylvanus Sawyer

original design. The machines with this scraper were successfully operated until they were worn out beyond repair, and success crowned the issue. The prophecy of Mr. Wood and other cane-workers that this end could not be reached had come to naught. The early experimenters had vainly attempted to cut down and through the hard, siliceous enameled surface of the cane with saws, spurs, loups and dies. The result was that the cutting points, in the passage at fair speed of a stick of cane, became hot, and soon cut off and the saws worn smooth. The invention of Mr. Sawyer, assisted by many mechanical devices, themselves inventions, is founded upon the device of cutting under the enamel and outward, raising the strand so that when the receding edge of the spur or lip, that divides the surface into strands, reaches the surface, the enamel already has been parted without injury to the cutting points. Here is found the key to the situation. This idea dominates all chair cane-cutting machines, including the tubular spurred cutter, as firmly as the Howe method of putting the eye in the point of the needle dominates all cloth-sewing machines of the past and the present. In the spring of 1850 Mr. Sawyer invented another machine for cutting cane, which he judged might have some advantages over his first method. Having constructed an apparatus to test his invention, he put it aside for future consideration. In the mean time many interested parties had been accorded the privilege of examining the new invention, and among these were Levi Heywood, of Gardner, and an uncle, Joseph Sawyer, of Royalston, who subsequently applied for a patent.

Mr. Sawyer immediately proved a priority of invention, and to him a patent was issued June 24, 1851, while the application of his uncle was rejected. As an item of history in connection with these patents it is necessary to add that, upon a modified claim, a patent was issued to the uncle in 1854, which failed to meet the purpose of its design. With his attention continually directed to this business, Mr. Sawyer devised a machine for scouring cane in large quantity by power, which superseded the former process of scouring small quantities with broom, soap and sand. In the autumn of 1850 the brothers, Sylvanus and Joseph B. Sawyer, rented a shop with power in East Templeton, and, with their new machinery, began the manufacture of cane for the use of chair-makers. In 1851 Sylvanus invented a new machine for shaving the strands and trimming the edges with great rapidity. It was subsequently modified and adapted to the tubular spurred cutter mentioned hereafter, and patented December 12, 1854. The enterprise at East Templeton established the merit of the machines, and from a business standpoint they were successful and remunerative. A stock company was organized in April, 1852, known as the American Rattan Company, and the business was removed to Fitchburg. The Sawyer patents were assigned to the corporation, and an extensive business was continued under the superintendence of Mr. Sawyer, who also was one of the directors. About this time a rival company was organized by Levi Heywood and others, and began business, with the Uncle Joseph patents, in Boston. By a vote of a majority of the American Rattan Company the two companies were consolidated. This action was strenuously opposed by Mr. Sawyer and others, and in the end their judgment was sustained by the facts. The machines of the Boston company were of little value, the manufactured cane was comparatively worthless, and an inheritance of debt was the prominent item of the assets which the Boston company brought to the treasury of the American Rattan Company. By this arrangement the stock of the old company was doubled and no material benefits were secured. March 7, 1854, a patent on a tubular spurred cutter was issued to Addison M. Sawyer, the youngest brother of Sylvanus. He had been employed by his elder brothers at Templeton, and subsequently by the American Rattan Company, at Fitchburg.

It appears that each of the three brothers had been conducting experiments in this direction, but Addison claimed and probably was entitled to priority, and to him the patent was issued. A third interest was immediately assigned to the brothers named. In connection with the machines owned by the American Rattan Company, this patent would be valuable, and doubly so, if a shave could be adapted to complete the work; but of little value to the brothers without the company's scraper and such a shave. Mr. Sawyer at once went to the shop in Athol, where he had solved many problems, and there remodeled the shave to meet the new demand. As previously stated, the remodeled shave was patented in 1854. The improvements he introduced at this time included another knife, which reduced the strand for the shaving-knife, and a scraper with a spring weighted block, which pressed the strand upon the cutter. At this time he devised a feeding apparatus for the cutter and a new guide to present the stick of cane centrally to the cutter and other improvements for handling the strands parted by the cutter.

With these improved equipments the three brothers —Sylvanus, Joseph B. and Addison M. Sawyer—resumed business at East Templeton, but they soon sold the business and assigned the new patents to the American Rattan Company. Mr. Sawyer again removed to Fitchburg, and assumed the oversight of the setting up of the new machines and the training of the help in the new processes. In June, 1855, he received a patent on an invention for splitting the rod of cane into sectional strips, removing the strand from each strip and rounding for reeds the triangular part remaining. Having realized his most sanguine expectations, Mr. Sawyer retifed from the active management of the business and directed his attention mainly to other fields of study and investigation. As early as 1853 he had invented improvements in rifled

cannon projectiles, which were patented in 1855, and subsequently were patented in England and in France.

These embrace the placing a coating of lead, or some softer metal than that of which the iron body is composed, on the rear or frusto-conical end of the shell, and the same extended, or not, over the sides of the same, which is expanded laterally by the discharge, and preventing "windage" on the passage of the gas by the projectile, also filling the grooves of the rifling and obviating the necessity of helical projections; and the arrangement in the point of a percussion cap or fuse so as to insure the explosion of the shell on impact and the soldering of the soft metal to the shot.

In 1857 and 1858 Mr. Sawyer, with his brother Addison (to whom an interest in the patents had been conveyed), conducted experiments on his inventions at their own expense, in order to demonstrate the practicability of rifled cannon and projectiles to the United States Ordnance Bureau, the Chief of Ordnance refusing to be at any expense, saying that they had already spent mints of money on these visionary schemes, that the subject was exhausted, and that rifle cannon was impracticable; but after learning of their previous tests, and that they had their own guns and ammunition, he readily ordered a trial and an investigation of Mr. Sawyer's invention, which, after thorough test, proved eminently successful, the Secretary of War (who witnessed two trials) declaring that the practicability of rifle cannon and projectiles had at last been demonstrated. This trial resulted in the ordering of another trial, with heavy ordnance, at Fortress Monroe, before a board of government officers, and a report was submitted recommending in view of the superiority of the Sawyer projectile in accuracy over all others of which official information had been received, and of its simplicity and the certainty of the fuse bursting the shell after penetration, that four field-guns be issued to one or more batteries for practice with the Sawyer projectiles for one year; but before this order was carried into effect the Civil War was upon us, and these experimental guns were turned upon the enemy with great effect. The forty-two-pounders (rifle) columbiads were mounted at Newport News and upon the Rip Raps (Fort Wool), the latter being the only guns there that could reach Sewell's Point Battery, a distance of three and one-half miles, which they did with great accuracy, and made fearful havoc with the railroad iron-clad batteries at the capturing of Sewell's Point, Norfolk, Gosport, etc., and an eighteen-pounder Sawyer rifle did great execution on board the steamer "Fanny."

Notwithstanding the great range and accuracy of the Sawyer guns and projectiles, and the certainty of the operation of their fuse, the ordnance officers did not seem to manifest that enthusiasm that was exhibited by the old artillery officers, and they seemed to rather stand aloof, and look askance upon Mr. Sawyer's invention.

This state of affairs was soon explained by an ordnance officer, who was later on appointed chief of the Ordnance Bureau at Washington, coming forward to compete before the Sawyer board with a projectile that directly infringed the Sawyer patent. They evidently did not mean to have their old ordnance theories overthrown and be left out in the cold. Hence the Chief of Ordnance, of both the army and navy, soon commenced to make, or have made, large quantities of projectiles (principally shells) for the army and navy, the former having his made by a Mr. Knapp, of Pennsylvania, and the latter at the Navy Yard at Washington, and both of them infringing Mr. Sawyer's patents, or, as Government Solicitor Whiting said, "It is an adoption of the Sawyer patent." This action of the chiefs of the Ordnance Bureaus was very unfortunate for Mr. Sawyer, who was accorded little or no credit for his inventions, or for his "practical demonstrations," which were made at a heavy cost to himself of both time and money, and almost practically barred him out from government patronage, except orders from department commanders who insisted upon having the Sawyer guns and ammunition, for whom he made quite a number of batteries of cast-steel guns, with shot and shell, besides longer guns. He appealed to the Assistant Secretary of War, Mr. Watson, and to the Government Solicitor, Mr. Whiting (both former patent lawyers). They admitted that they were using his patents, and stated that under martial law the government had a right to take and use what they pleased by recompensing the owner; "*but this did not apply to officers as individuals,*" and advised him to wait till the war was over and then seek redress, his claim being good for six years thereafter; but Chief Dahlgren, of the navy, died during, or soon after, the war; Chief Dyer died a little later, and Mr. Knapp, who made the "Dyer projectiles" *for him*, followed soon after, so that there was no one left whom he could prosecute for these infringements, or compel the yielding of the credit that belonged to him. In 1861 Mr. Sawyer invented a Fuse Hood for centrating fire upon a time fuse, also a Loading Mandrel for filling case shot, both of which were patented December 24th the same year, and in August, 1862, he and his brother, Addison M., took out a patent jointly for a Combination Fuse, and on December 17, 1862, he bought his brother's interest in his patents.

In 1864–65 Mr. Sawyer built a large brick shop which he designed mainly for the manufacture of ordnance, and was negotiating with Mexico, Brazil and Chili, as well as our own country, for ordnance supplies; but all four of the wars ended about the same time and the shop is now occupied by the Fitchburg Machine Works.

In 1867 he took out a patent on Dividers and Calipers, and March 3, 1868, a Steam Generator; May 26th, same year, an improved Rattan Machine, and July 7, 1868, he took another for Calipers and

Yours truly

W. T. Sherman

Dividers. In 1876 Sawyer & Esty patented a Sole Sewing Machine. About this time Mr. Sawyer commenced to start a watch factory in Fitchburg and had got considerable of the stock taken in the enterprise and the tools substantially done when the "hard times" set in, which compelled many to withdraw their subscription; hence he concluded to give up the enterprise and turned his attention to the manufacture of watch tools, in which business he continued till he moved the business to New York and formed a stock company, in 1881, and subsequently sold out his interest. On July 10, 1882, a patent was issued to him for a Centring Watchmaker's Lathe, which he manufactured in connection with other tools.

Resting from his labors, Mr. Sawyer has practically retired from active business, renting his shops. He has manifested a love for horticultural pursuits and a deep interest in progressive farming. His labor has been onerous and his achievements substantial. Through many years of constant use his inventions in cane machinery have permitted no improvements and still remain substantially as they left his hand. They have revolutionized an important industry and transferred it from the pestilential climate of Southern India and from Japan and Holland to this country, offering ample dividends to capital employed and affording employment to many people. And we may add that his inventions in rifle cannon and projectiles has been perhaps equally revolutionary.

ANDREW B. SHERMAN.

The subject of this sketch was born in Plympton, Mass., April 10, 1829. His father, Capt. Zacchæus Sherman, followed the sea fourteen years, and commanded a vessel about twelve years.

Capt. Sherman was twice married. His first wife was Jane Bradford, by whom he had two sons and two daughters; the second wife was Nancy Bartlett, of Plymouth, by whom he had two sons, Andrew B. and Algernon Sidney.

Andrew B. Sherman was educated in the district and private schools of his native town, and, after reaching the age of eight years, worked diligently during vacations—in summer on the farm and in winter in the saw-mills, and helping team lumber, &c., in which his father then dealt extensively.

With the exception of one winter, during which he worked in the store of his uncle, the late Zacchæus Parker, he passed his time thus until the age of twenty, acquiring the habits of industry which have so strongly characterized his whole business career.

In 1849 he left home and entered the country store of J. M. Harrub, of North Plympton, where for two years and ten months he worked from fourteen to sixteen hours per day, attending carefully to all parts of the business. He rendered valuable assistance in keeping the books and also in attending to finishing and shipping goods in the shoe manufactory which Mr. Harrub operated.

Though the original engagement with Mr. Harrub was but for a few months, Mr. Sherman's interest in the business was so great and his services so valuable, that his employer induced him to remain with him for the period above mentioned, at the expiration of which time Mr. Sherman, having determined to make the dry goods trade his business, went to Boston to endeavor to secure a position where, with much better opportunities to learn the whole business, he might fit himself to enter upon it on his own account, if he so desired.

Upon his arrival in Boston he called on Mr. William F. Brett, who introduced him to his recent partner, Mr. Samuel Ellis, of Samuel Ellis & Co., 131 and 133 Federal Street, and Mr. Sherman at once entered the employ of this firm. Here he formed the acquaintance of Mr. Luther J. Brown, who later came to Fitchburg, but who was then in the employ of Samuel Ellis & Co.

About this time the firm began to close out the stocks of several out-of-town stores owned by them, and also to dispose of superfluous stock. Mr. Sherman was soon sent to Medford with a stock. Here he remained six months, applying himself early and late, sleeping in the store most of the nights.

From Medford he went to Duxbury, where he stayed about the same length of time, meeting with good success in both places, selling a large amount of goods and making money, while one of his employers, Mr. Moore, with an assistant, sold a less amount and lost money at a store in South Abington.

Mr. Sherman then took charge of the East Abington store for the next two years, as general salesman in dry goods, carpets, clothing, millinery, furniture, crockery, etc.

At the expiration of this time, the firm being financially embarrassed, Mr. Sherman went to Dover, N. H., with a large stock of dry goods. Here he stayed six months, sending to the firm one-third more money per week than had been calculated upon.

In Dover Mr. Sherman, by close attention to business and unostentatious manners, gained the respect and formed the acquaintance of nearly all in the front ranks of business and society in the place. As an expression of regard at the time he left Dover, he was tendered a reception and presented with a handsome gold seal-ring, upon which was inscribed the names of some of the prominent young men of the place; and since then this pleasant friendship has been kept up by both parties.

Mr. Sherman then engaged as general salesman at the East Abington store for about a year, and in February, 1855, came to Fitchburg to dispose of a stock of dry goods. Here, although located in the "Old City," a half-mile from the other three dry-goods stores in town, he was fairly successful, and enjoyed a liberal share of the trade from all parts of the town.

At the end of six months, believing that Fitchburg would in time be a prosperous city, Mr. Sherman purchased the stock of goods of his employers, and, with what money he had saved during his clerkship, commenced on his own account.

One of his salesmen was Mr. L. J. Brown, with whom he soon formed a partnership, which lasted about three years. In the meantime Mr. Brown married, and it was thought best to dissolve the partnership; and for the past thirty years Mr. Sherman has carried on his prosperous business alone.

He paid close attention to his business, and the opportunities made possible by the condition of the markets during the Civil War made it quite profitable, —buying largely when goods were offered at less than it was then possible to make them, storing them and selling on a high market. As profits accumulated, he invested them in securities, which, in most cases, appreciated as well as paid interest.

At several different times, as more room was needed, the store was enlarged, until 1870, when he moved into his present commodious store, in the then new Rollstone Bank building. At that time he added a stock of carpets, to which he gave much study and attention.

In November, 1867, he established a dry-goods store in Winchendon, which was profitably operated until November, 1885, when it was sold to W. A. Sanford & Son, of Brockton, being then located in the I. M. Murdock block.

Mr. Sherman has, at times, invested the earnings of his business in shipping, having been part owner in eight different three-masted schooners engaged in the coasting trade, one of them bearing his name.

He has always manifested kind feelings towards his competitors and neighboring merchants, and has at various times, aided them without extra remuneration.

In 1878 Mr. Sherman married Miss Clara Belle, daughter of Mr. Jonathan Moody, of Claremont, N. H., and has three fine boys.

He has, for many years, been a trustee of the Worcester North Savings Institution, and a director of the Wachusett National Bank since its incorporation, and one of its largest stockholders.

Mr. Sherman served one year in the Common Council, and two years in the Board of Aldermen. He has, during his long residence in Fitchburg, gained the respect and esteem of the community, which he well deserves.

H. A. BLOOD.

Hiram Albro Blood was born in Townsend, Mass., February 3, 1833, and was the son of Ezra and Lydia Ann (Jefts) Blood; received an academical education in the town of his birth, and lived there until the age of eighteen, at which age he went to Worcester in search of employment.

At the age of twenty he entered the commission-house of Bliss, Sutton & Co., in Worcester, Mass., as a clerk, and became a member of the firm in 1854, at which time he opened a branch house in Fitchburg, and went there to live and has resided there ever since.

In 1857 he dissolved his connection with Bliss, Sutton & Co., and entered into a copartnership with William O. Brown, of Fitchburg, under the name of Blood & Brown, which existed until 1860, when Mr. Brown withdrew to enter the United States army, becoming a major of the Twenty-fifth Regiment, and a new firm was formed under the name of H. A. Blood & Co., which continued to carry on the business.

In 1865 Mr. Blood withdrew from all mercantile pursuits and became entirely interested in railroads, to the construction and operation of which he has ever since given his time and attention.

In 1865 he became connected with the Fitchburg and Worcester Railroad as a director and as its superintendent and general manager.

He afterwards built, or was largely instrumental in building, the Boston, Clinton and Fitchburg, the Framingham and Lowell, the Mansfield and Framingham, and the Fall River Railroads, of which he successively became superintendent and general manager, and afterwards united and consolidated them, together with the New Bedford and Taunton, and the Taunton Branch Railroads, into one system, under the name of the Boston, Clinton, Fitchburg and New Bedford Railroad Company, reaching from Fitchburg and Lowell in the north, to Mansfield, Taunton, New Bedford and Fall River in the southern part of the State.

This system of railroads was for a time operated by Mr. Blood as general manager, and was afterwards united and consolidated with the Old Colony Railroad Company, of which it now forms an important part.

In the construction of these railroads, and in their subsequent operation and consolidation, Mr. Blood was the moving and directing spirit.

In 1875 he procured the charter for the Wachusett National Bank, of Fitchburg, obtaining all the subscriptions to its capital stock, established the bank and became its first vice-president.

He was the third mayor of Fitchburg, and was first elected by the Board of Aldermen and Common Council November 2, 1875, to fill out the unexpired term of Eugene T. Miles, and, at the subsequent annual election in December, he was elected by the people, and was inaugurated January, 1876, and filled the office of mayor for one year and two months.

He is now chiefly interested in railroads in the State of Ohio, being the president of the Cleveland and Canton Railroad Company in that State, which position he has held since May, 1884, but he still retains his residence in Fitchburg, where he has an office as well as an office in Boston, Mass.

Henry A. Goodrich

It can truly be said of Mr. Blood, that he is one of Worcester County's representative men.

HENRY A. GOODRICH.

The name of Goodridge, or, as it is now commonly spelled, Goodrich, has been very closely identified with the history of Fitchburg ever since the incorporation of the town.

David Goodridge, one of the original settlers of the town, was deacon of the First Church in Fitchburg and a member of the First Provincial Congress. Like most of his fellow-townsmen, he was possessed of but limited means, but his sterling worth and integrity and his belief in the dignity and efficacy of honest toil made him an influential citizen and caused him to be often called to fill positions of trust and honor in the little colonial town of Fitchburg. Succeeding generations have kept the family name in the same good repute, and two of Deacon Goodridge's great-grandsons—Alonzo P. and John Goodrich—have spent their long and honorable lives of usefulness in our midst. The former is still with us in the enjoyment of a hale and hearty old age, but John Goodrich, the father of the subject of this sketch, died in this city in April, 1888, at the age of nearly eighty years.

Henry A. Goodrich, the eldest son of John and Mary A. (Blake) Goodrich, was born in Fitchburg, November 22, 1830. His early education was obtained in the district schools of the town, and later he attended the Fitchburg Academy and the Fitchburg High School.

He was one of the eight boys who attended during the first term of the High School, and the only one of the eight who remained permanently in Fitchburg. In 1849 he took a position as overseer in a woolen-mill, and in the course of the next four years saved money enough to start in business for himself.

In January, 1855, he entered upon his successful mercantile life by buying out a hat and furnishing store under the Fitchburg Hotel. Here he remained until 1869, when he removed to his branch store, established some years previously, in Belding & Dickinson's Block. He had also, in the mean time, started another branch store in Brattleboro', Vt. In January, 1885, he moved into his present elegant and commodious quarters in E. M. Dickinson's new brick block, where, as senior partner, we now find him at the head of one of the finest and best regulated clothing and furnishing establishments in New England.

Mr. Goodrich married, in December, 1856, Miss Harriet Stebbins, daughter of John Stebbins, Esq., of Vernon, Vt. He has one son, William Henry, and one daughter, Mrs. W. L. Humes.

In addition to his mercantile pursuits, Mr. Goodrich has been largely interested in real estate operations in Fitchburg. He was, at one time, half owner of the "L. J. Brown Block," and sold his interest to Mr. Brown. In 1868 he bought the American House property, and later erected two large blocks on Day Street, one of which bears the name of "Goodrich Block." He sold the American House in 1874, and became a stockholder and director in the Haskins Machine Company, which proved to be a disastrous venture.

Like many other active and ambitious men, he has encountered reverses, but, by energy, perseverance and industry, has quickly overcome them, and started anew with a fresh determination to win success.

During the War of the Rebellion Mr. Goodrich was the treasurer of the Fitchburg "Bounty Fund," and collected and disbursed over $20,000, the greater portion of which was afterward refunded by the town. After the terrible battles of the Wilderness in 1864 he was sent by the town, with Dr. Alfred Hitchcock and E. B. Hayward, to look after the sick and wounded Fitchburg soldiers in the hospitals at Fredericksburg and Washington. A reference to the files of the *Fitchburg Sentinel* about that time will show how thoroughly and conscientiously he performed his full share of the sad duty.

Mr. Goodrich has also been for many years a frequent contributor to the press on current topics. During the great "Silver Discussion," in 1878, he wrote a series of communications, which appeared in the *Fitchburg Sentinel* over the signature of "Inquirer," favoring the passage of the Bland Silver Bill. These communications were written in a clear and forcible style, and showed a thoroughly business-like familiarity with, as well as careful study of, the subject in hand. A correspondent of the *Boston Herald* said of these articles at the time,—"Our bankers and business men are considerably exercised at the appearance of a series of letters in the *Sentinel*, the past week or two, favoring the passage of the Bland Silver Bill. The *Sentinel* opposes the sentiments of these communications editorially, but it is beginning to be evident that the unknown writer is more than a match for the newspaper men, at least in vigorous style, mastery of the arts of logic and power of special pleading."

In politics Mr. Goodrich has never been, in any sense, an extreme partisan. In early life he was a stanch believer in, and advocate of, anti-slavery principles. He served on the first "Free-Soil Town Committee" with Moses Wood, Charles Mason and Henry A. Willis. His first vote was for John P. Hale for President. He has been a Republican since the party was organized; but, being naturally independent, has not always fully acquiesced in every political measure advocated or adopted by that party. As a rule he has supported Republican candidates.

In 1869 and 1870 Mr. Goodrich represented his native town in the Legislature, being elected thereto as the Republican candidate, and served two years on the Hoosac Tunnel committee during the most important epoch in the history of the great tunnel enterprise.

At the organization of the city government he served on the Board of Assessors, and for several years was one of the trustees of the Public Library. In 1885 he was the Citizens' candidate for mayor, though practically a temperance man, but shared the fate of the entire Citizens' ticket, which was that year swept away by a tidal wave of radical prohibition.

He was active in organizing the Fitchburg Board of Trade, and was one of its first vice-presidents. He has been one of the managers of the Massachusetts Mutual Aid Society from its organization, and in 1887 was elected its president. In 1887 he was also president of the Merchants' Association and of the American Pruning Company.

He is one of the trustees of the Worcester North Savings Institution, and a director of the Fitchburg Park Association.

Mr. Goodrich has always led a busy, active life, and has ever been ready to aid in the forwarding of all projects tending to increase and strengthen the prosperity of his native town; and his high mercantile and social standing is the result of integrity, energy and perseverance.

CHAPTER LII.

BARRE.

BY MATTHEW WALKER.

BARRE is situated in the westerly part of Worcester County, about twenty-one miles northwesterly of Worcester, and is fifty-six miles from Boston by an old turnpike road, or by the Central Massachusetts Railroad sixty-one miles. It is in forty-two degrees and twenty-six minutes north latitude, and the elevation of its Common in the centre of the town is nine hundred and ten feet above the mean level of the sea. The township is nearly diamond-shaped, its sides being very regular, two of them being about six and one-half miles long each, the other two about six and one-fourth miles each, containing an area of about forty-one square miles. This very regular plot seems to have been educed from the similar shape of the original grant of land of which it forms a part.

The early records inform us that the proprietors of Rutland voted, in 1715, to survey and set off into lots the contents of six miles square, to be granted to settlers in order to secure the performance of the conditions in the original confirmation of the title.

The surface is hilly, its soil a subsoil of clay with a loamy overlaying, thus forming a compact stratum of the nature of hardpan; it is very fertile, making it desirable, productive and valuable. In population, according to the census of 1885, it ranks thirty-second in the county, while in the relative proportion of its farm products it is third in rank, Worcester and Fitchburg surpassing it. It is essentially an agricultural town, the formation of the soil being such as admirably fits it for tillage, mowing and pasturage, the hay crop amounting in value to about seventy-five thousand dollars per annum, and its dairy products to an equal sum, or, for the year 1885, to seventy-five thousand nine hundred and sixty-seven dollars. The valuation of the town, as returned by the assessors for 1888, is one million three hundred and eighty-five thousand and seventy-five dollars.

Its undulating surface affords picturesque views, and the highways, hard and well cared for, furnish fine drives, showing the well-preserved farm-houses and other buildings, as well as the beautiful structures of the centre village and the more thickly-settled portions of the town, buildings kept neatly painted, and, with a background of living green, presenting an attractive appearance.

The town is well wooded and watered, the principal streams being the Ware River, which runs through the east and southerly portions, furnishing a water-power of considerable capacity; the Cannestow and Burnshirt Rivers in the east part, the latter having several mill powers; Pleasant Brook, a romantic and beautiful stream, partially concealed by forests, then leaping forth and glittering in the sunlight, and with its rugged bed and stony or mossy banks, attracting the gaze of the saunterer and inviting him to follow its windings; Prince River, which has its source in the north part, small streams flowing into and forming an artificial reservoir, covering about sixty acres, running almost directly south, having a number of water-powers which are used for various purposes; Dick's Brook, near the centre, flowing southerly and easterly, presenting a wild and romantic view as it turns with its swift current and considerable fall, leaping onward to Prince River; Hill Brook, Silver Brook and other small streams, from their rugged and picturesque surroundings, serving to attract the attention of the mere stroller or the disciple of the piscatorial art; Moose Brook, in the westerly part, rising to the north and flowing southerly through a number of fertile and highly cultivated farms, presenting to the lover of nature opportunities for a stroll upon its banks that will repay him for his time and exertion. All these streams find their way into the Ware River.

In 1853, to increase the water-power of Prince River, a reservoir was constructed in the north part of the town; in 1868 the dam gave way, the most commonly accepted opinion being that it resulted from the effects of lightning, the heavy body of water sweeping away in its course most of the manufactories on the banks of the stream, only a part of which have been rebuilt. A loss of about two hundred thousand dollars was entailed upon the town in the destruction of roads and bridges and upon individuals by the carrying away of their property.

The geology of the town is not different from that

of the surrounding country, the rocks belonging to the Eozoic system. Bowlders abound here and there, and gneiss, granite and granitic gneiss form a large part of our natural scenery. In the north and westerly portions of the town runs a vein of stratified rock, which is utilized in foundations for buildings and for constructing walks. In the eastern and southern portions the division of the hills, forming a course for the Ware River, presents an interesting view to the trained or untrained eye. The wild and romantic scenery of the east part is worth more than a passing visit, and the water, dashing along its channel many feet below the roadway, with the surrounding wooded tracts and the green herbage, leads the thinking mind to a contemplation of grand and noble subjects.

While our geological formation is leading us to an analysis of its construction, we may find, in separate forms, some of the minerals that constitute our granite. We have mica, feldspar, iron pyrites, beryl and garnets, and of the latter some beautiful specimens have been obtained. Fine specimens of rutile were formerly obtained in the north and west parts, but of late years the diligent searches of the amateur mineralogist have gone unrewarded, so far as this interesting mineral is concerned.

In the northerly part of the town is an extensive deposit of plastic clay, of a rich variety, tending somewhat to marl. Bricks were made of this quite extensively some sixty and more years ago, but as no sand of the proper quality with which to temper the clay could be obtained, except by trucking it a distance of several miles, the cost of manufacture was so great that, in the competition of trade in other towns, the business here became unprofitable, and was abandoned. In the south part of the town a bed of clay was worked to great advantage fifty to sixty years ago, the sand required for its manufacture into bricks being found a short distance easterly; but this bed ceased to yield a proper amount of clay, and was finally abandoned as "worked out." A short distance from this old bed it is shrewdly surmised that another deposit exists, and, at a favoring time, trials will be made of the quality of the material.

Under the head of topography we must refer to the forests of the town. The somewhat broken surface of the land, the natural quality of the soil, including its rocks, and the general inclination and the number of its water-courses, lead us to adopt the theory that this was not, in its primitive days, an unbroken wilderness; that the land in a large proportion of the present township was well wooded is indisputable, and the early settler here found his way hither, and by marking trees could retrace his path with much less difficulty. In subsequent years the forests became one of the sources of a livelihood in the way of clearing the timber, not only for obtaining improved land, but for the manufacture of pot and pearl-ashes, and these were made in considerable quantities, the towns to the south of us furnishing excellent markets for these products.

The elevation of the town from its southern to its northern extremity is quite marked, the difference in height between the Plains and the "Common" at the centre being, as furnished from the minutes of railroad surveyors, about three hundred feet, or an average of about one hundred feet to the mile, and from the "Common" to the northerly limits of the town, the ascent, though less marked, is about two hundred feet additional, thus making a difference in our elevation between the extreme northern and southern boundaries of about five hundred feet. While there is so great a difference in the elevation from north to south, the difference from the extreme eastern to the western corner is but slight; hills abound from east to west, but the elevation finally assumed is nearly the same. In the north part of the town is Hawes' Hill, which, next to Mt. Wachusett, is the highest point of land in the State east of the Connecticut River.

With the town of to-day so well laid out, with its good and numerous highways, its well-constructed and beautiful houses, its fertile fields and farms, and with a people, social, thrifty and hospitable, engaged in farming and business ventures of various kinds, the contrast now with the wooded and unsettled territory of two hundred years ago exhibits wonderful changes. The first time any white man traversed this section was in 1635, when an expedition was sent westerly from the Plymouth colony and penetrated as far as the Connecticut River. It is very probable that the report of this expedition referred to the meadow lands and to the natural fertility of the soil, and, in after-years, as the settlers in the east increased in numbers, they continued to move farther westerly, and settled various townships in what is now Worcester County, the first settlement being at Lancaster, in 1743. Brookfield was settled in 1673–74, and, in 1681, the General Court appointed a committee, who purchased a portion of the southern part of the present Worcester County; December 22, 1686, old style, or January 2, 1687, of the present style of reckoning dates, the territory which now embraces Rutland, Oakham, Barre, Hubbardston and portions of Paxton and Princeton, was purchased of five Indians "dwelling in His Majesty's territory in America," by Henry Willard, Joseph Rowlandson, Joseph Foster, Benjamin Willard and Cyprian Stevens, "in consideration of twenty three pounds in hand paid, and for themselves and all of their heirs, executors, administrators and assigns, freely, fully and absolutely give, grant, bargain, sell, alien, enfeoffe, make over and confirm unto the above-named Willard and others, a certain tract of land, meadows, swamps, timbers, intervales, containing twelve miles square," the bounds being carefully described in the deed, and these Indians covenanted that they were the lawful owners of all the lands, "or any other matter, be it mine or mines,

or any ore falling within this tract according to the butts and bounds mentioned." This was a deed of warranty, and was written in strong and comprehensive terms, and was acknowledged by the parties to the contract March 15, 1687.[1]

This purchase from the Indians was undoubtedly made to quiet and pacify them, the war of King Philip, and the massacre at Brookfield but a few years previously, having evidently taught the white people that measures of this kind were matters of policy. The settlers were aware that the Indians could have no legal title to the land, and so little value, otherwise than as a measure of peace and policy, was placed upon the deed at that time, that it was not recorded for more than twenty-five years subsequently, or not until April 15, 1714, and then not until application had been made to the General Court for a confirmation of the title, which act of confirmation was obtained February 23, 1713, but on condition that within seven years sixty families should be settled in the territory, a quantity of land to be set apart for the location and support of the church and schools, and that this grant should not encroach on any former grants. It will be noticed that this was not an act of incorporation, but merely one of confirmation of the title.

Now our predecessors were in full and legal possession of their purchase, subject to the prescribed conditions; and to fulfill the requirements of the act so far as to induce the settlement of sixty families within the limits of the grant within the time specified, the purchasers formed an association, or Proprietry, as it afterwards became to be called, by joining with themselves others who were persons of energy and influence. The association was divided into thirty-three shares, each proprietor having one, except Joseph Foster, who had two; the names of the original proprietors in this association were Joseph Foster, Mrs. Cyprian Stevens, Mary Willard's heirs, Joseph Rowlandson's heirs, Simeon Willard, John Willard, Benjamin Willard, Joseph Willard, Josiah Willard's heirs, Rev. Samuel Willard's heirs, Henry Willard's heirs, Daniel Willard's heirs, Jonathan Willard's heirs, Thomas Brintnall, Nathaniel Howard's heirs, Robert Blood's heirs, Joshua Edmund's heirs, William Tyler, Penn Townsend, Paul Dudley, Addington Davenport, Adam Winthrop, Thomas Hutchinson, Thomas Fitch, Thomas How, John Chandler, William Dudley, John White, John Farnsworth, Peter Buckley's heirs, Moses Parker and Jacob Stevens. In December, 1715, these proprietors voted to survey and set off into lots sections of six miles square, these plats to be granted to settlers, in order to secure the performance of the conditions in the original act of the confirmation of the title; the first part set off contained what is now Rutland and a portion of Paxton, being one-fourth of the twelve miles square, and which had been surveyed the previous October by William Ward. In this portion sixty-two house lots of thirty acres each were laid out, which were offered to permanent settlers at nominal rates, and promises were given to divide the remainder of the land amongst them, provided that sixty families should settle there within the prescribed seven years, reserving, however, sufficient lands for the use and support of the ministry and school, and one thousand acres, which had previously been granted by government to Samuel Sewall.

When the seven years had transpired the requirements had been consummated, the settlers coming from Boston, Lexington, Concord, Sudbury, Marlborough, Framingham, Lancaster, Brookfield, and from Ireland. The condition of the grant having been fulfilled, the proprietors petitioned the General Court, which commenced its session the last Wednesday of May, 1722, for an act of incorporation, and, on the 18th of the following month, a bill was passed for further establishing the town of Rutland, and empowering them to choose all proper officers, also empowering them to raise and collect money for defraying the necessary charges of the said town.

This part of the territory was afterwards called the "settled part" of Rutland, and the proprietors, fulfilling their promises to the settlers, ceased to have any authority over it; the other three-fourths of the grant was still held by them, and was under their authority and jurisdiction, and to this portion their immediate attention was now given, and efforts were made to induce families to settle in the north and northwest sections. Some of the families had settled westerly of the first section, and were living in the "Northwest Quarter," as it began to be called, and others, from time to time, came to the same vicinity.

Tradition says that some were induced to locate here by reason of the fertile meadows, where their cattle could graze in summer and sufficient hay be cut and placed in stacks for their winter's support, and the same tradition relates that some of the Irish emigrants of Scotch descent, who had settled in and around Worcester, were of those who came into what is now Barre. It is a matter of record that James Caldwell was here June 6, 1739, representing the ownership of Great Farm No. 9, which was in the east part of the town, lying on the banks of the Cannestow and Ware Rivers. He was the eldest son of William and Sarah (Morison) Caldwell, who had emigrated from Ireland about 1719, and settled in Worcester, where they remained but a few years, for prior to 1730 they had come into this "Northwest Quarter."

[1]This deed is a document of much value and importance, showing somewhat the customs of the times, and also the clearness and sagacity with which the instrument is drawn; it is too lengthy a document for insertion here; the recorded copy may be seen in the Registry of Deeds for Middlesex County, book 16, page 511, Worcester County not being incorporated until 1731.

Tradition says that James came here before his father, having driven cattle hither, and remaining with them during the following winter, living alone and finding shelter under a shelving rock, which is still seen on the farm which was the last residence of the late Caleb Harwood. He soon built for himself a cabin of stone, against which, as a protection from the elements and from wild beasts, he made a kind of palisade of split logs, and later, in 1754, built the first frame house ever erected in this section; this is a large, two-storied house and still stands, and is in a good state of preservation, being located but a short distance from the shelving rock, or from where was his cabin. The Caldwells were men of rare worth and influence in the community; James was killed in 1763, he, with one of his slaves, having taken refuge under a tree during a heavy thunder-shower. The tree was struck by lightning, and falling, killed him and broke a thigh of the negro. The spot where he died is marked by a stone on which the following inscription, now nearly illegible, was carved: "This stone is erected in memory of the time when and place where Mr. James Caldwell died, which happened by the falling of a tree, July 18, 1763, in the 52d year of his age."

As early as 1720 families, or representatives of families, had gone nearly to the western limits of this Northwest Quarter. In 1726 the first known deed of land in this section was given, it being for a strip near the present residence or farm of Mr. J. N. Patterson. A few families having settled here, their number was increasing. November 7, 1733, by virtue of a warrant issued by Joseph Wilder, justice of the peace, the proprietors met at the Royal Exchange Tavern, in Boston, and, on the fourth article in the warrant, voted "that the north half of said township (Rutland) be divided into two equal parts by a plain line running across the breadth of the same, and that the proprietors will proceed to divide the western part of said north half into lots, and that sixty-six other lots of good land of fifty acres each, as near as may be to the spot for a meeting-house, be laid out for homesteads; and, wherever any of said sixty-six lots fall short in quality to be made up in quantity, and said sixty-six lots to be numbered, in order to be drawn for in convenient time; and that convenient highways be at the same time laid out, so as to accommodate the several lots; and that a fair and regular plot of the said west part of said north half be, with the several lots and highways, delivered in as soon as may be to the proprietors at their meeting for their acceptance." At this meeting a tax of three hundred and thirty pounds was laid upon the proprietors to defray the expenses. Henry Lee, of Worcester, made application for appointment as surveyor, offering to do the work for one hundred pounds, but the work was given to Samuel Willard, a relative of some of the proprietors, who, in company with Lee, made the survey, and when completed, each signed the plans. In addition to the sixty-six lots of fifty acres each, the lot for a meeting-house and for the school, thirty-three Great Farms of five hundred acres each were plotted out, an additional number of acres being allowed to such of those where the land was of inferior quality.

John Butolph, of Boston, was appointed collector of the tax from those of the proprietors who lived near Boston, he being authorized to collect the sum of £248 8*s*. 11*d*., and Phineas Brintnall, of Sudbury, was authorized to collect the balance, or £81 11*s*. 1*d*. These Great Farms, as well as the house-lots, exceeded in acres the specified number, not only because some of the land might be of inferior quality, but also because a desire had been expressed that good measure be invariably given.

The proprietors of this Northwest Quarter now drew for their lots. Joseph Foster, holding two shares in the proprietry or association, drew Great Farm No. 9, in the east part of the town, and No. 13, which lay in the north part and included the land where now is the reservoir which supplies Prince River, and other land sufficient to make five hundred and sixty acres in each plot; it was a part of Foster's share of No. 9 which was afterwards represented by James Caldwell.

All these Great Farms were offered for sale, and strenuous efforts were made to induce settlers to locate upon them. In 1735 a farm of two hundred and fifty acres was offered to the first orthodox minister who would settle here, provided he would continue in the ministry for seven years, or until his death, if that should sooner happen. Land was also tendered to parties provided they would build and occupy a house thereon, of certain dimensions and within a specified time, the usual dimensions being twenty feet long and eight feet studs, the houses to be made habitable by the following winter and to be occupied by the builder or his heirs for at least five years; provision for travelers was anticipated and a tract of land was offered to any one who would build a house of entertainment thereon and keep it for that purpose for at least seven years. The terms of the proprietors were most liberal, and if the conditions on which the settlers took lands were not all fulfilled at the expiration of the times specified, the privileges were continued to such of those as had exhibited a disposition to comply with the terms imposed, but who had been prevented by some untoward event; those who had received lands and had failed to fulfill their conditions through neglect or want of energy, were dispossessed of them and the property reverted to the proprietors. Thus plans were laid for a thrifty and energetic population; to still further encourage immigration roads were projected and built from the settled part of Rutland to Nitchewag (now Petersham). A "great bridge" was built over the Ware River near where is now the Baptist Church; this was destroyed by a forest fire in 1740, but was rebuilt the following

year, logs being thrown across the stream, as in the case of the former bridge, and this time gravel was carted on to prevent the recurrence of such a mishap and also as a protection to guard against its being washed away by any sudden rise of the water.

With a road, rough though it might be, built from east to west, nearly through the centre of the Northwest Quarter, better facilities were afforded for the incoming of settlers; and they came,—energetic, rugged, honest men, who did much to aid and encourage the little band already here, and who later filled many offices of trust in the direction of affairs here. The Rices, the Holdens, the Wallaces, the Nourses, the Allens, are some of the prominent ones who now came, all of whom left descendants who still dwell with us and fill honorable and responsible places in our midst.

For such a people the proprietors desired more and better conveniences, and at their meeting held at the Light-House Tavern in Boston, December 5, 1748, a committee of their number was requested to petition the General Court, as soon as may be, that the Northwest Quarter of the township of Rutland may be made a town of itself, or be a separate district, with all the privileges of a town. This petition was drawn up, and is as follows:

PETITION.

To His Excellency, Wm. Shirley, Esq., Captain General & Governour in Cheefe in & over His Majestys Province of Massachusetts Bay in New England & Vice Admiral of the same & to the Honourable His Majsty Council & Hcuse of Representatives in General Court assembled.

The petition of the Committee of the Proprietors of the Township of Rutland (the Original Settlers part excepted) in the County of Worcester in sd Province in behalf of themselves & sd proprietors & according to their votes & directions, Humbly sheweth That the sd Proprietors have been for above these fifteen Years at great & Constant Pains & Expense of time and many hundred Pounds in Running the Bounds, surveying, Dividing & Laying out Lots, finding out & clearing Roads, Building of Bridges, settling Inhabitants & paying for Preaching in the Northwestern quarter of the Township of Rutland. That the sd North Westerly Quarter is about the Quantity of six miles Square more or less, according to the plan herewth exhibited, bound East North Easterly about six miles on the North Easterly Quarter of said Township, South South Easterly aboute six miles, partly on the original settlers Quarters & partly on the West wing of sd Township. West South Westerly about six miles partly on Braintree Grant & partly on Hardwick, North North Westerly on Nichaway so-called. That there are now settled in sd Quarter nearly Thirty famillys consisting of above one hundred souls who stand in need of a Settled Gospel Ministry & Ordinances, and the Adult are Earnestly Dessirous of them, but cannot obtain them without a proper Encouragement by your Excellency & Honours. That the sd proprieters in view of sd Quarter being erected into a Town have given Laid out & set apart a fifty acre lot of Choice Good Land & another Farm of Two Hundred Forty seven Acres for the first Orthodox Minister that shall be ordained there, and a fifty acre Lot for the use of a School there forever. And Therefore your Petitioners Earnestly Desire That yr Excellncy and Honours would in your great wisdom set off & Erect the sd North Western Quarter with all the Inhabitants into a Town or otherwise into a separate District with all the priviledges & powers of a Town so far as to Chuse All sorts of Town Officers among themselves & make all kinds of Rules on the Inhabitants of sd District for building houses for Publick worship settling & maintaining ministers laying out & making Roads & for all other Services of a Publick Nature which any Towns inthe Province are by Law Enabled to do, only Reserving to themselves the Liberty allowed by Charter & the Laws of joining in Common with the other freeholders of sd Township in chusing & being Chosen Representatives to serve in the genl assembly as also desiring the Power of assessing Levelling & Raising a Tax of sixpence old Tenor upon every Standard acre in sd District for the first five Years next Ensuing annually for the purposes above said Excepting only sd land granted to sd ministers & school wh. said Tax in their present Infant & feeble state of less than Thirty Families is of absolute necessity for them. And your petitioners might humbly offer the following among other Weighty Reasons 1 The sd Quarter is nearly a Square body of generally good Land suitable & sufficient for such a Town or District. 2 The Centre of sd Quarter is about Ten Miles distant from the place of Worship of the Original settlers & some parts of sd Quarter aboute fourteen miles off, a very heavy Inconvenience either to be warned to their common Town Meetings or to attend them or to serve as Town Officers for so great an Extent & 3 The Inhabitants of the Original Settlers part are so sensible of this hardship as they have expressed their willingness above four years and nine months ago of the sd North Westerly Quarter being deteeshed from them, as appears by their attested vote herewith offered. 4 & Lastly, Upon your Excellency & Honours now granting the sd District there are so many people straitened in other places ready to move into this as afford a most rational prospect that in case of another war the sd Quarter will grow so full of people as instead of needing soldiers stationed among them at the Publick charge for their Defence, they will not only be sufficiently able with the Divine help to Defend themselves but also have numbers to spare for the Defence of other places above them. And your Petitioners shall ever pray as Bound &c

THOMAS PRINCE
JONAS CLARKE
THOMAS HUBBARD
CORNELIUS WALDO
} Propr[s] Committee.

Twenty-eight of the inhabitants further manifested their desire by signing this petition. This was presented in April, 1749, and on the 14th of that month it was read in the House of Representatives, and ordered granted, so far as to be erected into a separate district with full power to choose town officers, and have all the other rights and privileges of a town, excepting that of sending representatives to the General Assembly; but permission was granted to join with Rutland for this purpose, and an inhabitant of this quarter was eligible to the office; the petitioners were ordered to notify the non-resident proprietors by public advertisement, by inserting in the *Boston Gazette* so much of said petition as related to the tax. This notice having been given and so certified, the petition came up in the Council, June 13th, and was read again, when it was ordered that the tax be "one penny half-penny of the last emition per acre annually," except the land for the minister and the school, for the term of five years.

The bill was sent to the House for concurrence, and, in Council, June 20th, it was again read and concurred in, and that day it received the approval of Governor Shirley.

In 1749, then, the Northwest Quarter of Rutland was created a district, and, passing out of the control of the proprietors, became subject to the authority of a local board of officers having the same rank and titles as those connected with a town.

The history of the first church is nearly coeval with the settlement of the territory, a part of which is now the town of Barre. November 7, 1733, at a meeting of the proprietors, held at the Royal Exchange Tavern, in Boston, it was voted "that some spot, as near the centre of said western part as convenience allows, be found and pitched upon for setting a meeting-house, in the middle of some considerable quantity of good land fit for settlement, and that one lot should be for the first minister ordained there;"

they ordered that the lot for the minister should consist of fifty acres conveniently near to the meeting-house. A division of the land was made, and the place assigned for the meeting-house was near the dwelling now owned by Mr. D. B. Olin. It was the intention of the proprietors that the meeting-house should be built at as early a day as possible, and, in 1739 a plot of the Northwest Quarter was returned by Abner Lee, a surveyor, and June 6th accepted and placed on record. A meeting of the proprietors was called, to be held at the Light-House Tavern, in King Street, Boston, on the 9th day of June, 1742, the warrant being dated May 4th. After electing a moderator, the first matter under consideration was "to agree with some suitable person to prepare and raise the frame of a meeting-house within the Northwest Quarter, of such dimensions as the proprietors shall determine," and, secondly, "to give some encouragement for obtaining occasional preaching."

The prominent step taken towards erecting the meeting-house at this session was that Col. Samuel Willard was desired to purchase of the heirs of Robert Blood a portion of their farm on reasonable terms, in behalf of the proprietors, that they might erect a saw-mill. (This land lies on Prince River and is a part of the farm now owned by Nelson Loring.) This meeting was adjourned to August 25th, when they met and agreed with Jonas Clarke to build a saw-mill on this land. At an adjourned meeting held on the first Wednesday of June, 1743, sixteen pounds, old tenor, was voted to be allowed and paid John Caldwell to defray the charge of a minister's preaching to the inhabitants of the Northwest Quarter one month the preceding winter. This is the first intimation that we have of religious services being held here; we have no record in what part they were held, but as John Caldwell lived some distance easterly from what is now the centre of the town, and a number of the other settlers were in his immediate vicinity, it is highly probable that the preaching was at his house, about two miles from what is now the centre of the town.

September 1, 1743, it was voted that, as some of the settlers had represented the great difficulty they labored under by reason of their distance from all places of public worship, and desired the assistance of the proprietors towards procuring preaching among themselves, eighty pounds, old tenor, be allowed them for obtaining preaching for one year, next coming, and this amount should be paid to such a committee as the settlers might choose; December 12, 1744, forty-eight pounds was allowed and paid to the inhabitants that they might have a minister for twelve weeks; the two subsequent years sixty pounds were appropriated each year for the same purpose; in June, 1748, one hundred pounds was allowed; June 7, 1750, it was voted that twelve pounds, old tenor, be allowed and paid to John Caldwell, one of a committee for erecting a meeting-house in the Northwesterly District of Rutland, and to be by him applied towards the charge of erecting the same. In 1744, seventy pounds, old tenor, had been appropriated, and it was voted that Samuel Willard should build a saw-mill in the Northwest Quarter, and that he keep it in repair for fifteen years and furnish boards to build a meeting-house and house for the minister at three pounds, old tenor, per thousand feet, and that individuals should pay four pounds per thousand feet.

Here, then, were the forceful steps taken for the erection of a meeting-house, and for regular, in place of occasional, worship; funds were provided for with which to purchase the boards, the labor and timber being presumed to follow as needed; the determination of the inhabitants soon became manifest to erect the building at the earliest practicable moment.

From 1750, when the vote was passed to allow John Caldwell funds for building the house, we can see that due haste was made in prosecuting the work; notwithstanding all the difficulties they labored under, three years later the building was occupied for worship, and July 29, 1753, a church was organized, and the following October Rev. Thomas Frink was installed as pastor of "the Congregational Church and Society in Rutland District."

In those days the parish was bounded by the same geographical lines as was the town or district, and, while the church and society were at liberty to establish their rules and choose their officers, the district or town supported the minister and paid the necessary incidental or contingent charges that pertained to the care and repairs of the house, raising the funds therefor by a tax on the property and polls of all the people.

Although the meeting-house was used as a place of worship, it was not a completed building, merely sufficient work having been done to permit the people to assemble there for worship. It was evidently expected that the district would increase in population; and it did increase, and as more seats or pews became necessary, additional pews were placed in the gallery; these places for pews and privileges of building them were generally sold to the highest bidder. In 1765 several spots were sold, and it was specified that the size of the pews to be made should be "6 ft. wide, east and west, and 7 ft. long, north and south," and the floor of the pews should be a few inches above the floor of the gallery. The meeting-house was used, also, for municipal purposes, all the town-meetings being held there. This house was not built on the lot originally assigned for it in the proprietor's plan, but was located nearly opposite, where our post-office now is. We find no definite reason for this change, but attribute it to the fact that here the ground was nearer a level, and that this location was more central, the larger part of the inhabitants living in the eastern and southerly por-

tions of the district, where there were better roads, while in the westerly part the residents were less in numbers, and no roads had been constructed.

Mr. Frink was a native of Massachusetts and in the fiftieth year of his age; a man of vigorous intellect and strong opinions, both theological and otherwise, and, in addition to his imperious will, a man of great irritability. His annual salary was £53 8*s.* 6*d.*, the pound being equivalent to three and one-third dollars of the present currency; this salary was not always paid when due, at times the arrearages extending over a period of several years, but after 1763 and until his dismissal it was paid him regularly. His arrogance and infirmity of temper unfitted him for his sacred duties, being productive of dissensions of great bitterness, and these became so intense that a mutual council was called to decide where the fault lay in the unhappy controversy which had arisen, and to advise as to the future course to be pursued. This council was an able one, consisting of well-known pastors and lay delegates from the most important churches of the province, coming here from Springfield, Amherst, Watertown and Boston. It was in session six days, investigating the difficulties.

The task was a perplexing one; the determined spirit of the people on the one hand and the equally strong course of the minister on the other had produced such a bitterness of feeling that only a calm and searching investigation could allay the excitement.

June 18, 1766, the council reported its findings, which were signed by all the members. It was a lengthy document and on nearly every point sustained the complaints of the people. It found that Mr. Frink had acted in a very arbitrary manner towards members of the church, commanding some to abstain from the communion for what he termed their perverseness, speaking of them, both publicly and privately, in hard, abusive and scurrilous language; that he had interfered in the private and domestic concerns of others; that he had claimed and had exercised the power to summarily adjourn a church-meeting contrary to the wishes of those present; that he had denied the right and privilege of certain members either to speak or to vote in these meetings; that he had defamed many of the other regular ministers of the county; and that his example had engendered pride and wrath. In view of these and other findings, the council recommended "that the pastoral relation between the Rev. Mr. Frink and the Church in Rutland District should be dissolved."

On the part of the people another step was necessary. A town-meeting was held July 16th to see whether the district would acquiesce with and accept the "result" of the council. The meeting was a stormy one. John Caldwell was the moderator, and at his request the meeting was adjourned for one hour, and the people were requested not to leave the house; private consultation was desired, and it was deemed the part of wisdom to devise some plan that would allay the excitement and anger everywhere visible, and endeavor to obtain a better outcome of their deliberations than now seemed possible. After again coming to order, the district finally voted to accept the findings and to comply with the advice of the council that the pastoral relation should be dissolved.

This vote was passed by a large majority; in the district records is the following entry: "N. B. Some people said the meeting-house was so full of people that they desired the moderator would draw the people, that were voters, out of the meeting-house into a ring abroad, which was immediately done; and it was openly declared and desired by the moderator that there might be two rings of the people drawn up, and if there were any in favor of Mr. Frink, that they would draw into a ring at the westerly end of the house, and all that were for voting Mr. Frink's dismission to make a ring towards the easterly end of said house." The record further states that the people went almost unanimously into the ring at the east end.

Mr. Frink was not disposed to accept this finding of the council and its endorsement by the people; there were a few who, in the main, approved of his course.

Dr. Thompson, in his semi-centennial sermon, recalls the story that the next Sabbath Mr. Frink attempted to enter the pulpit, but was prevented by John Caldwell, who took him by his coat-collar and led him to the door of the house.

Mr. Frink preached a short time to his partisans here, and afterwards was an attendant at the church in Petersham, but soon returned to Rutland, where he died in the seventy-third year of his age. He brought an action against the district which was decided against him in the Court of General Sessions in November, 1767. The following April he brought another for trespass, and again the district was triumphant, but Mr. Frink entered an appeal. The decision of the Superior Court of Judicature was adverse to him, and he now agreed that henceforth there should be a bar to all further legal proceedings.

Immediate steps were taken to secure regular preaching again. In September, 1766, eighty pounds was appropriated for defraying the charges of preaching, and a committee was chosen to supply the pulpit. A pastor was soon found in the person of Rev. Josiah Dana; in his few sermons that he had delivered here the people recognized his worth and had become attached to him, and in April, 1767, the church gave him a call to settle over it; the district almost unanimously ratified the action of the church, and he accepted the call the following July. In his letter of acceptance, stating that he felt that the people would desire him to be as free from secular care as possible, he "must beg leave to desire, expect and depend upon being provided yearly with a sufficient quantity of fire-wood, fit for use, at the place of my abode, if Providence should put me into a family state." The

sum of £66 13*s.* 4*d.*, lawful money, was voted as his annual salary, together with a very liberal sum to defray the expenses of his settlement, but his firewood at the expense of the district was refused. He was installed the first Wednesday of the following October, his salary dating from the 9th day of July previous, that being the date of his acceptance of the call.

In the troublesome times of the Revolution Mr. Dana found his salary inadequate to his support; he asked for an increase of compensation, and again, that his firewood might be furnished him. These requests were passed over in town-meetings on several occasions, and the feeling spread that it would be advisable to dissolve the pastoral relation. After a time this feeling subsided, and his salary was increased and firewood furnished, and subsequently, partly on account of the depreciation in the value of the currency, and the increasing wants of his large family, his compensation was made still larger. He continued as pastor of the church for thirty-four years, or until his death, in 1801. He is remembered by persons still living here, and they speak of him as a benevolent and kind-hearted man, dignified, yet attractive and pleasant to the young, and one who had the respect of the whole community. His remains were interred in the burial-ground near his residence. During his pastorate his dwelling-house was destroyed by fire; it was soon rebuilt, partly with funds raised by subscription, and the balance by a tax laid upon the town. The town voted to have published three hundred copies of the sermon which was preached at his funeral, this being delivered by Rev. Ephraim Ward, his classmate in college. Mr. Ward says of him, "He was possessed of natural firmness of mind, of a sprightly imagination, and an easy and happy elocution; his utterance was solemn and manly, which added dignity to his address, and his preaching was serious, instructive and practical."

In 1783, on a petition of a number of the inhabitants a meeting was held to see if the town would enlarge the meeting-house or build a new one. A committee was appointed to investigate the question; they reported that it was advisable to build a new house, but as the news of a treaty of peace being made had spread abroad, they recommended a postponement of the subject until another meeting, as then the cessation of war would "make a very considerable alteration in the circumstances of men and things."

In April, 1785, the matter was again brought before the town, when it was voted to erect a new house; a committee of seven men was chosen to draw a plan of the proposed building, which they did, and their report accompanying the plan was accepted. The dimensions of the house were to be sixty-eight by fifty-four feet, which size was adopted, and it was also voted to increase the size of the grounds, which were now about one and one-half acres in extent; more land was purchased and the area was now about two and one-fourth acres. Measures were adopted towards commencing work on the new edifice. The town voted to sell the pews in the contemplated building, and if sufficient funds were not procured from their sale, a tax for the balance of the money needed for construction should be levied upon the town. Eighty-six pews were sold for £1184 6*s.*, the conditions being that each purchaser should give his note for the amount he had promised to pay for the pew, of which a third should be payable in building materials on demand, a third in cash at the time of "raising the house," and the remainder three months afterwards; and any person who should not fulfil his agreement should forfeit and pay fifteen per cent. of his bid to the town and the ownership of the pew should revert to the committee. The house was to be built in the Ionic and Doric order of architecture. The report of the committee not being satisfactory as to the price of the material, the number was increased and the estimates revised. A schedule of sizes and prices of each piece of timber and lumber, of stone and of lime was made, and this report was accepted. Some of the materials for the building had been delivered on the ground; but the process of construction was delayed, some of the purchasers of the pews being unable to fulfill their agreements; in consequence there was a postponement of the work, "the great scarcity of cash, and the load of debts, both public and private," making this course indispensable.

But the people felt that a new house was a necessity and further efforts were made towards its construction. Success soon crowned their endeavors, and in October, 1790, the edifice was so far completed that the town voted to worship in the house from and after the first Sunday in November. After collecting the sums, so far as possible, for which the pews were sold and from the sale of the old house, a debt of about ten pounds stood against the committee, the cost of the house having been £1201 1*s.* 6*d.*

It was desirable that every outstanding claim should be settled before occupying the house, and strenuous efforts were made for this purpose, but it was nearly two years before they succeeded in raising the required sum.

The people had a justifiable pride in their new edifice, and, for those times, it was an imposing building; it was located on the Common, where now is the North Park, a part of the building extending beyond the south limits; from its height and style of architecture it attracted much attention. Whitney says of it, in 1793, in his "History of Worcester County," that it was the largest meeting-house in the county; he gives its dimensions as fifty-six by seventy-four feet.

This building was kept well-painted and in proper repair; the society was prosperous, the town num-

bering in population upwards of sixteen hundred, the minister respected and beloved, and his relations with the people harmonious. The church and town acted in unison, the town willingly supplying the pulpit during any temporary sickness of the pastor.

After the death of Mr. Dana, in 1801, the church was without a regular pastor for upwards of two years. During this time several ministers had been called to preach as candidates for the vacancy. November 28, 1803, the town voted unanimously to unite with the church and invite Rev. James Thompson to the pastoral charge, and a committee of seven members was appointed to wait upon him and inform him of the proceedings of the town and see if there was a prospect of his settling here in the ministry. December 2d this committee reported that there was a probability of Mr. Thompson settling here if agreeable offers should be made. The town at once voted five hundred dollars as an annual salary so long as he should continue to be their minister, and four hundred dollars for a settlement. The records state that "Mr. Thompson came into the meeting and declared his acceptance cheerfully." A committee of five was chosen to provide for his installation, and this took place January 11, 1804.

The church was pleased with its new pastor; he was young, not yet twenty-four years of age, talented, social, yet dignified, and a favorite with the young as well as with the older part of his charge. He took an active part in the various plans and schemes for improving the society of the town and for its welfare in every regard, and he not only participated in these movements, but of many of them he was the originator and leader. He was a member of the School Committee for forty years, assuming most of the burdens himself, serving most of the time without compensation, and laying down the burden only on account of the increasing cares and troubles incident to old age. As a preacher he was favorably known far beyond the limits of his own parish, and an installation of a minister in any other town for miles around was hardly thought complete without his participation. He was a man of imposing presence, yet easy of approach, a good and fluent speaker, not one who dwelt upon abstract subjects, but one who would hold the attention of his audience and bring them into sympathy with himself; his sermons never seemed to weary his hearers, nor did they become weary of him.

Although a great reader and an original writer, it may be a question whether he was a deep thinker, but he was considered the best preacher in Worcester County. In 1813 he was afflicted with a stroke of paralysis, which, to some extent, affected his efforts of after-years, but his natural vigor and strong will-power led him on to a long and useful career. The impress of his labors in the community was great, and, to-day, although nearly forty years have elapsed since his death, he is still spoken of by the older part of our people with feelings of deep respect and love.

After preaching here for more than forty years, June 9, 1845, keenly noticing the effects of his early affliction and the encroachments of age, he desired the parish to release him from the active duties of pastor, in consideration of which he offered to relinquish his salary. The parish complied with his request, and the next January Rev. Henry F. Bond was installed as his colleague. Mr. Thompson continued as the senior pastor until his death, May 14, 1854. January 11th of that year he delivered a discourse at the end of a ministry of fifty years among our people to a house filled to overflowing, and the heartiest testimony as to his worth and influence were made manifest. Dr. Thompson was a graduate of Brown University and from his *Alma Mater* received the degree of Doctor of Divinity.

Early in the century the parish desired to make its meeting-house still more attractive, and in 1806 the town appropriated a sum of money to build a handsome tower and cupola, provided individuals would give sufficient money for the purchase of a bell and clock; this money was soon raised by subscription, and, with the thousand dollars in the town treasury, the work was entered upon with much spirit and enthusiasm; this addition to the house was soon completed, but the cost was greater than had been anticipated, being more than the original edifice had cost; in September, 1807, one thousand dollars additional was appropriated to pay the expense.

From this time until 1812 the usual order of affairs prevailed. Under the pastorate of Dr. Thompson the church was prosperous and the number of members and attendants had increased. Nearly all the people had been united in one parish, holding to the prevailing theological (Congregational) belief of the day. In the east part of the town a few of the more prominent men had banded together to uphold and promote the Baptist scheme, and a number withdrew from the church here to unite with those of the eastern section; in the south part, in 1820, a few had organized and formed a Universalist society, attracting to themselves other attendants of the original church. One reason assigned by those of the Baptist persuasion for their withdrawal was the excessive taxes that were assessed for the ministerial support. As at this time the town was legally a whole and united parish, and all were liable to be assessed for the support of the one church, their method of withdrawal was somewhat unique. A committee of the church which they desired to attend certified to the town clerk this fact, the usual form of certificate being as follows: "We certify that A. B. of the town of Barre is a member of the religious society of the town of Barre called Baptist (or Universalist, as the case might be) and doth associate with them in public worship." This, signed by the church committee and entered upon the town records, was presumed and tacitly acknowledged as a release from their obligations in aiding to support and maintain the original church.

With other forms of belief, and with a more liberal as well as with a closer construction of the doctrines set forth, bitter controversies became prevalent. The church in the centre of the town adopted the liberal scheme, but many refused to adhere to this party, and, as was to be foreseen, could not act in harmony with them. They withdrew, and August 15, 1827, were organized by an ecclesiastical council, called for that purpose, as the Evangelical Congregational Church in Barre. Aside from the friction of a separation, harmony between these two organizations was somewhat interrupted, but the discords were afterwards allayed and a friendly rivalry sprang up between them.

In continuing the history of the original parish, or the First Parish in Barre, as it became to be called, as early as 1818, notwithstanding the withdrawal of a number of its members at different times, and more especially those in 1827 who had formed the Evangelical Church, and of the secession of others from 1834 to 1841, the parish prospered. In 1827 a number of the inhabitants who attended its services petitioned that, as the sufferings of the people who attended public worship in the parish during the cold season of the year were very great, the parish should procure a stove, or stoves, with sufficient pipe to warm the meeting-house. This was a decided innovation, but the matter was pressed, and in November it was finally decided to raise one hundred and fifty dollars to defray the expense of stoves and pipe and ground for their location, and a committee of three was chosen to superintend the business of placing them in the house; this was soon done, and from the year 1827 we may date the introduction of stoves into the churches of the country towns; these may have been introduced in some other towns at an earlier date, but none of the adjoining ones preceded Barre in this respect.

In 1848–49, the meeting-house having become somewhat antiquated, and being located in a place deemed worthy of improvement, such as enlarging and beautifying the Common, a new church building was erected a short distance northerly of the old one. It is of Gothic order of architecture, neat and attractive, and with a seating capacity of about five hundred. In its tower still runs the public clock. The old church was sold to private individuals and transformed into a building for offices and shops; from its magnitude, its pillars and general appearance it received the name of the Colonnade, it having been moved from its original site, where it continued to be an ornament to the town until its destruction by fire in 1862. A large brick structure was erected in its place, this being occupied to-day by the National and Savings Banks, store, printing-office, &c.

The various pastors of this society since its organization have been Rev. Thomas Frink, from October, 1753, to June 18, 1766; Rev. Josiah Dana, October 7, 1767, to October 1, 1801; Rev. James Thompson, January 11, 1804, to May 14, 1854; Rev. Henry F. Bond, as colleague, January 7, 1846, to December 30, 1850; Rev. Charles E. Hodges, as colleague, from June 11, 1851, to March, 1854; Rev. William A. Fuller, January 3, 1855, to March 28, 1859; Rev. Henry Westcott, June 14, 1860, to April 1, 1864; Rev. John B. Beach, November 9, 1865, to March 27, 1869; Rev. Henry R. Smith, September 1, 1869, to October 1, 1878; and Rev. Alvin F. Bailey, the present pastor, who was installed May 7, 1879.

The membership of this church is by many considered coextensive with the members or families of the parish. It draws its worshippers from the remote parts of the town as well as from the immediate vicinity of the church edifice. The membership of its Sunday-school is about one hundred.

The Evangelical Congregational Church at the time of its organization, in 1827, consisted of thirty-two members who had withdrawn from the First Parish, then under the charge of Rev. Dr. Thompson, who had adopted the Unitarian doctrine. The Articles of Faith agreed upon were moderately Calvinistic, containing but little more than the doctrines generally assented to by the various evangelical denominations. During the sixty years of its history the church has had the following pastors: Rev. John Storrs, January 14, 1829, to April 24, 1832; Rev. Moses Grosvenor, November 13, 1832, to May 4, 1834; Rev. John F. Stone, October 26, 1834, to November 17, 1836; Rev. Samuel A. Fay, May 10, 1837, to July 1, 1840; Rev. Erasmus D. Moore, July 1, 1840 to October 19, 1842; Rev. Amos Bullard, October 26, 1843, until his death, August 21, 1850; Rev. C. M. Nickels, May 7, 1851, to June 17, 1856; Rev. George Denham, December 3, 1856, to May 2, 1860; Rev. David Peck, April 16, 1861, to Nov. 19, 1867; Rev. Edwin Smith, October 29, 1868, to April 24, 1879, and Rev. Joseph F. Gaylord, the present pastor, who was installed September 18, 1879.

This church has always taken a decided stand against intemperance, having, as early as 1830, declared that it would not receive to its communion any who used ardent spirits except for medicine. In 1837 it adopted a series of rules, among which is the following:

"Those who become members of this church are required not to traffic in ardent spirits, or use it as a drink, and it shall be the duty of the standing committee to inform all persons offering themselves for our communion of this rule, and to obtain from them a pledge of its observance; and whenever any person is proposed it shall be understood that he stands thus pledged to the committee and the church."

In recent years the church has taken ground against the use of, and traffic in, fermented intoxicants as well as ardent spirits.

In the conflict with slavery the church also took a strong position, declaring, in 1842, "that we cannot hereafter receive to our pulpit or communion any minister or layman who holds his fellow-men in

slavery, and who encourages and upholds those who do." The church has had two church edifices, one known as the brick meeting-house, in the west part of the village, which was erected in 1828, and the other, its present place of worship, built in 1848–49, and which has a seating capacity of over five hundred. After the present church building was occupied by the society, the brick meeting-house passed into private hands and was transformed into tenements.

The church, at various periods of its history, has been favored with powerful revivals of religion, which have greatly promoted its growth, and to-day its position is strong in its influence and work, and in its membership, which numbers one hundred and sixty-one, of whom twelve are non-residents of the town, the membership of its Sabbath-school being about one hundred and thirty-five.

Soon after the organization of the church the society connected with it was formed, under the name of the Evangelical Congregational Society, in the town of Barre. This society was formed November 17, 1827, and in February, 1829, was incorporated by a special act of the Legislature. The relations between the church and society have always been harmonious, the church taking the initiative in selecting a pastor, but the relation is not established without the concurrence of the society, which determines also the salary of the pastor and provides for its payment. It also has charge, under certain limitations, of the church edifice. In 1888 the society adopted a carefully-prepared set of by-laws, and in the same year rules for the concurrent action of church and society were adopted by both of these organizations, such action having previously been guided by tradition rather than by specific regulations.

The date of the introduction of the Universalist creed to this town is 1820, in which year a spot of land nearly opposite the B. & A. R. R. depot on the Plains, and now occupied by a brick dwelling-house, was purchased, and the erection of a church edifice thereon was contemplated. Ministers prominent in that denomination in other towns were obtained to preach that doctrine, and to arouse such an enthusiasm as should result in the establishment of a church and society.

Public worship was held for several years in a hall and dwelling-houses, but gradually, chiefly on account of the depression in agriculture and of the scarcity of money, the people considered it impossible to raise funds for a church building, and the project was abandoned, and soon all interest in the matter was apparently lost. In 1838, and for two or three years previously, a number of persons had become dissatisfied in the First Church, and filed certificates of withdrawal. April 9th a few of these associated themselves, and formed the First Universalist Church of Barre, and some from the south part of the town, who had been interested in the scheme of 1820, joined them. The next year they purchased a building lot at the south end of the Common, and erected a building which was dedicated in April, 1840.

This society was never a strong one, but it held together as an organization for about ten years, when their interest waned and dissensions arose among them, which soon resulted in their disintegration, and June 6, 1851, their edifice was sold to a board of trustees for the Methodist Episcopal denomination, and, after some necessary repairs and changes in construction, was dedicated the following 17th of September to worship in accordance with the usages of that faith.

Although there had been desultory Methodist services in town as early as 1823, this denomination did not obtain a foothold here until 1842, when services were held in the town-hall; under the fostering care of various clergymen and prominent laymen of their faith their congregations increased, and in 1850 they took into serious consideration the matter of erecting a house for worship. A spot for a building was obtained, but when it was found that the Universalist edifice could be purchased, that was bought, and the building-lot sold to its previous owner. Since 1844, when the first pastor was assigned to this church, twenty-seven ministers have been sent by the Conference to its pulpit, but two of whom have remained for three years.

The present pastor is Rev. Charles Nicklin, who was located here in 1888. This church is in a prosperous condition, and, though not so strong as twenty years ago, is now increasing in the number of its attendants and its influence; its membership is about seventy-five, and of its Sabbath-school about seventy; the building has a seating capacity of about three hundred.

The first services under the auspices of the Roman Catholic persuasion were held about 1852, private houses being first used, and afterward the town-hall was occupied for this purpose. In 1856 services were held in the church building now owned by them, located south of the Common, and which was then a dwelling-house, although it had been built for, and previously occupied as a country store. The Catholics of Barre were then a component part of the Worcester Mission; in 1860 they were constituted a parish, and connected with Templeton, and afterwards with Ware and North Brookfield, and now with Otter River. In 1858 they purchased the brick dwelling-house, and remodeled it into a church building; about seventy-five families are connected with this parish, which is under the charge of Rev. Father Raynolds, and services are held bi-monthly. In accordance with the custom of the denomination, the church property is in the possession of Bishop O'Reilly, of Springfield, this parish being in that diocese. The house of worship is pleasantly located, and has a seating capacity of about four hundred.

In 1854 another church organization was effected under the title of the Free or Independent Church. Rev. Marshall G. Kimball was their pastor, the ser-

mon at his installation being preached by Theodore Parker. This society prospered for a while, but, for want of sufficient cohesive power, gradually faded away. It was in existence about five years; its pastor was a young and popular man; at the dissolution of the society he entered upon educational work in the West.

Early in the century several families came to the east part of the town from Sutton; their predilections were for the Baptist form of belief; as no denomination of that kind existed here, they attended upon that form of worship in the town of Templeton. As they increased in numbers, and the distance to Templeton was considerable, they desired to be organized into a church here. Accordingly, the officers of the Templeton Church came to the east part of the town, and August 21, 1811, a society was formed at the house of Elias Chase; this society was considered a branch of the Templeton Church rather than as an independent organization, and services were held in dwelling-houses for a number of years. In 1813 they were much strengthened in numbers by withdrawals from the First Parish or Old Church, the ministerial tax in that parish being considered burdensome. Notwithstanding that they considered themselves members of a distinct parish, the tax for the old parish was still levied and collected from them, this being assessed in connection with the town taxes. In 1816 the church protested against this tax, served notice on the town to that effect and that they should apply for an act of incorporation. This subject was freely discussed in town-meeting, when it was at length decided to pay no attention to their protest as regarded the tax, and not to oppose their incorporation. In 1817 the matter of taxation again came up, when a committee, on the part of the town, was appointed to consider the subject. They reported that they considered it unjust for the members to aid in supporting two organizations, and recommended that the voters of the old church choose their necessary parish officers, and grant and raise money for their own ministerial support. In a few years this was done, and harmony prevailed. No pastor was installed over the Baptist Church, but preaching was pretty constant. Rev. Mr. Leonard, who afterwards became a noted clergyman, was one of their early ministers, preaching for them about 1817; he was followed by other earnest workers, who so built up this mission and gave it such strength that it was deemed wise to erect a church edifice. This was accomplished in 1832–33, their first house being situated nearly opposite where Mr. Samuel Adams now lives. In 1832 the church was incorporated, and became a regularly organized body.

Previous to 1836 Rev. John Walker had preached occasionally for them and was their regular pastor from 1837 to 1844. During his pastorate a feeling prevailed that it was advisable to have their edifice in the village of Coldbrook, and plans were formed to move there; but when it was suggested that by so doing they would be in the town of Oakham, and their charter had incorporated them as a church in Barre, they obtained land westerly of the village and within the Barre boundary. In 1842–43 their new house was erected and in the winter of 1843–44 was dedicated. Their old house was soon afterward taken down and carried to Oakham, where it was re-erected and used for a number of years by the Methodists. Since 1837 their regular ministers have been Rev. John Walker, from 1837 to 1844; Rev. George W. Cate, September 8, 1845, to May 13, 1849; Rev. Lewis Holmes, June 1, 1849, to August 8, 1853; Rev. Payson Tyler, July 9, 1854, to August 17, 1856; Rev. L. Tandy, October, 1856, to November 28, 1858; Rev. D. Avery, April 1, 1859, to March 30, 1862; Rev. Joseph Shepardson, May 4, 1862, to January 18, 1863; Rev. George L. Hunt, June 3, 1863, to March 27, 1864; Rev. E. J. Emery, April 1, 1865, to January 28, 1866; Rev. C. D. R. Meacham, September 6, 1870, to August 9, 1874; Rev. K. Holt, March, 1877, to June 4, 1882; Rev. Philander Perry, September 3, 1882, to May 1, 1884; Rev. Henry H. Mansur, July 8, 1884, to March 26, 1888, and Rev. William Read, the present pastor, who was installed June 3, 1888. The seating capacity of the building is about three hundred and its services are well attended; the number of its church members is forty-five and of its Sabbath-school one hundred.

Leaving now this sketch of the church and returning to the period anterior to the incorporation of the town, we can form some idea of the trials of the inhabitants, struggling under many untoward circumstances to bring order out of confusion and have a well-disposed and well-regulated form of local government. The schools, crude as they were and maintained under many difficulties, were cherished as the bulwark of a future nation. Highways, too, were demanding much consideration.

From a mere handful of individuals, at the time when the proprietors of this Northwest District had assigned certain localities for roads, the inhabitants had so increased in number that it became necessary that additional paths for travel should be constructed to accommodate the passing to and from the places where the meeting-house and schools had been established and for transaction of business, or for social relations one with another, or to render and receive aid in case of sickness or other troubles, or to pay such slight visits of courtesy as the times demanded. Matters of state were coming to a crisis. May 20, 1772, a warrant for a town-meeting was issued to Noah Mandell, requiring him "forthwith, in His Majesty's Name," to warn all the freeholders and other inhabitants qualified to vote in town affairs to meet at the meeting-house, June 3d, there to act on certain articles. The voters assembled at the time and place, and after organizing the meeting, electing a grand juryman for the year to serve at the Court of Quarter

Sessions and choosing a committee to repair the "great bridge" over the Ware River, they voted to pass over three of the articles in the warrant and also voted that they be not entered upon the records. What these articles were might be a matter of greater conjecture, did not contemporaneous history reveal the existing state of affairs. The people were becoming restive under the restraints imposed upon them by foreign rulers, and the determination to have these burdens modified or to be released from such servitude was every day becoming more apparent. February 23, 1773, another meeting was held "to hear and consider of a Circular Letter from the town of Boston, dated November 20, 1772, containing the States and Rights of this Province in particular, etc."

A committee of five members, with John Caldwell as their chairman, was chosen to take this letter into consideration; they soon reported "that upon a full conviction of the propriety and expediency of the measure, they recommend the inhabitants of said District to pass the following resolves: 1. That the rights of the Colonists, and of this Province in particular, as stated by their respectable brethren of the metropolis of this Province, are agreeable to the real sentiments of the inhabitants of this District, and that it is of the utmost importance that the inhabitants of this Province stand firm, as one man, to support and maintain all their just rights and privileges. 2. That the inhabitants of this and the other British Provinces have an equal right with the people of Great Britain to enjoy and dispose of their own property, and the same cannot be taken from them but by their own consent. 3. That the Parliament of Great Britain have passed several acts in the execution of which American subjects are burdened with unconstitutional taxes. 4. That to render the Governor and Judges of the Supreme Court of this Province independent of the grants of the General Assembly is an innovation and infraction on the Charter Rights, as it destroys that check which should remain in the hands of the people. 5. That the thanks of this District be given to the town of Boston for their zeal shown in the defence of their Charter Rights." This report was unanimously adopted, and a copy was sent to the Committee of Correspondence and Communication at Boston.

A movement to throw off some of their burdens was now inaugurated, and a closer union of the people and a firmer binding together of the common interests made it imperative that the district should have a more united organization. The shackles of a greater power being distasteful, it is no wonder that the lesser authority of the district should be considered as tending to divert their cares and energies, and with the people working together for the common good, an organization as a town was felt necessary.

Accordingly, at a meeting held April 5, 1773, for that purpose, it was decided to petition the General Court to be set off as a town, and John Caldwell, Asa Hapgood and Nathan Sparhawk were chosen a committee for that purpose. This petition appears on the House Journal, June 22, 1773, and an order of notice was sent to the adjoining towns in relation to it. No further steps were taken in regard to it until the following February, when the petition was again brought to the attention of the General Court, again read and then ordered that the prayer be so far granted that the petitioners have leave to bring in a bill. This was sent down for concurrence and on the 16th of the same month a bill for incorporating the district into a town by the name of Barre was passed to be engrossed, but one week from that date the bill was ordered to be laid on the table. No reason is given for recalling the bill, but it is certain that Governor Hutchinson, in power by the authority of King George the Third, was a pliant and willing tool in the hands of his royal master, and a rebuke and punishment must be administered the people, in part and as a whole, for their participation in such stirring events as the Boston Massacre in 1770, the destruction of the tea in the harbor in 1773, and their apparent restiveness under the many restraints imposed upon them. May 13, 1774, Thomas Gage succeeded Governor Hutchinson, and on the 25th of this month the government was reorganized. In the Governor's opening address he declared his intentions, in accordance with the instructions of the King, to remove the General Court to Salem. This met there the 7th of June, and on the following day is recorded "a bill to incorporate Rutland District as a town." The following day the bill was read for the third time and passed to be engrossed, and on the 14th it was passed to be enacted. The records of the Commonwealth do not give the date when the bill was signed by the Governor. On the 17th of June the doors of the House were closed for a secret session, the members having assembled to consult upon the course of the Governor, his bearing towards the House and the condition of the Province; the Governor, having been informed of these proceedings, at once sent his secretary to dissolve the General Court; the House took no notice of this messenger, but proceeded with its business, which, however, did not relate so much to the affairs of the Province as to the existing general condition of matters.

On the authority of the *Massachusetts Spy* we have the information that the Governor then proceeded to the House and demanded admittance; this was refused; he immediately dissolved the General Court, having previously stated what bills he had signed that morning, among which was the one incorporating this town. In place of Barre the name of Hutchinson had been inserted; no reason is given for this change, but it is believed to have been made in the Council at the command of Gage, that thereby he might aid in perpetuating the name of his immediate predecessor. In August, 1774, a committee consisting of Asa Hapgood, Nathan Sparhawk,

Andrew Parker, John Mason and Peter Fessenden were chosen to meet committees of other towns at Worcester to take into consideration the existing condition of the Province; at an adjourned meeting held in September the committee made their report, a part of which was accepted; it does not appear what this was; with the spirit of freedom at work, a certain degree of secrecy was necessary.

The first warrant of the town for a town-meeting was issued December 20, 1774, notifying the inhabitants to assemble at the meeting-house the following 10th of January to choose a representative to the Provincial Congress, to be held at Cambridge, February 1st, and to choose a committee to give the representative instructions as to his course. John Mason was chosen representative, and at an adjourned meeting the committee's instructions were read and accepted by the town. They were in accord with the prevailing sentiments of the people; they desired Mason to stand for and to vindicate, in every consistent way, in a firm, steady and uniform manner, their rights; to act in accord with the Continental Congress, and to coincide with its determination in general, unless sad necessity should compel him to do otherwise. Notwithstanding his instructions, much was left to his discretion, the well-known character and ability of the man evidently convincing his fellow-townsmen that they had made choice of an honorable and able representative to an important assemblage. At the meeting of January 10th the patriotism of the town and their determination to resist the encroachments of Great Britain are still further shown when it was voted that the town would "indemnify the constables from paying any more money to Harrison Gray, the former treasurer of the Province, but that they should pay the said money to Henry Gardner, now treasurer." This vote was passed in accordance with the advice and resolve of the Provincial Congress. The times were eventful; the resistance to oppression had increased, and the necessity of acting in unison was apparent. August 1, 1774, the district met to take action on several papers sent hither in regard to the Boston Port Bill; after considerable deliberation they decided that their share or proportion of the money now in the district treasury should be paid towards the support of the Congress to be held at Philadelphia. Affairs were assuming conflicting aspects. Here, and now, as elsewhere, a few stanch men were vigorously endeavoring to have their more timid or cautious associates take more pronounced positions on the questions of the day. The officers of the militia had resigned their posts, "throwing the militia of the town, as it were, into a state of nature." The Committee of Correspondence for the County of Worcester had recommended that every town in the county should meet at once and choose officers to lead them wherever they might be called, until the government should be brought under proper regulations. In consequence of this, it was decided to form two companies of militia, one to be under the command of Captain Ezra Jones, the other under Captain William Buckminster. These companies were not to exceed fifty men each, including officers, and a proper allowance of money was recommended to remunerate them for each half-day that they should be required to be under arms for the purpose of drill and discipline, these half-days to be two in each month for the next eight months, unless the town should hereafter consider it unnecessary, or unless the Committee of Safety for the Provinces should, within that time, call them to march to any part of the Provinces, when their pay, so far as the town was concerned, should cease. In April, 1775, "the alarm" was sent out from Boston of the great need of militia. Twenty-one men marched from this town to do battle in their country's cause; they were attached to Colonel Brewer's regiment, and, under the immediate command of their own townsman, Captain John Black, did their duty at the battle of Bunker Hill. Buckminster was appointed lieutenant-colonel of this regiment; he received a severe wound in the engagement and was disabled from further military duty. He returned to his farm, but did not forget the needs of his country. His patriotism and enthusiasm were of great value in aiding and filling the quotas subsequently demanded from this town. Colonel Buckminster lived to see the end of the struggle, but his wound wore upon his stalwart frame, and June 22, 1786, he passed away, not fifty years of age.

These twenty-one men did not enlist in the army, but soon returned home. Subsequent events called for more aid, and in a short time fifty-eight men, including a number of those who were at Bunker Hill, enlisted under Captain Black for a term of eight months. Samuel Lee, born here in 1767, enlisted at the age of thirteen, and was attached to the army at West Point; he served during the remainder of the war, and was in many important engagements; returning to his home, he obtained an education, and became a prominent man in the town, holding many State and town offices. He was a man whose integrity and sound judgment were never questioned, and whose opinion was sought on many points. He died here at the age of seventy-two. An oil-painting of him adorns the walls of our Public Library.

By the demands of the country, ably seconded by a Jones, a Black, a Buckminster, a Sparhawk and others, the patriotic spirit prevailed; the wavering gradually sinking their objections to armed resistance, realizing that the power of tyranny was endeavoring slowly to tighten the cords which were being then thrown about them. Firm and decisive measures were necessary that the people might act together and in a spirit of accord, that they should encourage the fickle, take counsel one with another, and resist all overtures from royalty to consider in convention how peace might be obtained.

For the support of the militia money was essential; struggling with poverty, yet resolute and unwavering, the strictest economy was necessary to maintain their position. Schools and highways were now of secondary importance; no funds could be spared for support or repair; the minister's salary went unpaid; every effort of the people seemed given to the one cause. But this condition of affairs could not long exist; money must be obtained, and finally it was voted to sell some of the land about the meeting-house and the old proprietors' roads, and devote the proceeds to the use of the schools, as they recognized their great importance.

At this time another incident occurred, which still further illustrates the patriotism of the people. Thus far the town had been known as Hutchinson. The firm adhesion of ex-Governor Hutchinson to the authority of Great Britain, he being a strong believer in, and upholder of, royal prerogatives, had rendered the name obnoxious to the inhabitants. Smarting under the insult inflicted by the name, they resolved to apply to the General Court for an act authorizing the town to be named anew. January 17, 1776, it was voted to petition for authority to change the name from Hutchinson to that of Wilkes. John Caldwell, Nathan Sparhawk and John Mason, of the selectmen, and Andrew Parker and Asa Hapgood, of the Committee of Correspondence, were chosen to act for the town. Their petition stated that, having formerly been known by the name of Rutland District, in 1773 they applied for an act of incorporation as a town, which was granted by both Houses, but non-concurred in by Governor Hutchinson, unless he could have the privilege of naming the town; but the House dissented, and the matter was not completed until Gage became Governor, "who very soon after gave us a specimen of what he was, or intended to be to the colony, by filling up the blank with that obnoxious name, *Hutchinson*, that well-known enemy of the natural and stipulated rights of America, which gave us a very disagreeable sensation of mind, not being able to speak of the town in which we live, but our thoughts were necessarily turned upon that ignominious enemy of mankind, and, in a measure, filled with shame to tell where we lived, when requested," and the petitioners desired that the obnoxious name of Hutchinson be canceled, and that the name of WILKES, "that ever-memorable friend to the rights and liberties of America, would give content to the inhabitants."

The committee who had this petition in charge was made up from the best minds in town,—men commanding respect for their attainments and force of character.

The Legislature at this time was not in session, it having assembled on the last Wednesday of the preceding May, but it might be convened again and on any day, as at this time it held several sessions each year. John Caldwell was the representative at this time and was a member of the Provincial Congress that had sat at Watertown the previous summer; he was prepared to present the petition at the earliest practicable moment, it having been signed February 5th. But the Legislature was not again convened, and as its term would expire on the day next preceding the last Wednesday of May, on the 20th of February a town-meeting was held, and John Mason was chosen representative for the ensuing year. Soon after the next Legislature met the petition was presented, but, on account of an adjournment and other circumstances which were daily affecting the situation of affairs, it was not reported back to the House for some time, and it was not until the 7th of next November that the bill was passed, and which reads as follows:

IN THE YEAR OF OUR LORD 1776.

An Act for discontinuing the name of a town in the County of Worcester, lately incorporated by the name of Hutchinson, and calling the name BARRE.

WHEREAS, the Inhabitants of the Town of Hutchinson have by their Petition Represented to this Court, that in June, 1774, when the said Town was incorporated, General Gage, the then Governor, gave it the name of Hutchinson, in honor to and to perpetuate the memory of Thomas Hutchinson, his immediate predecessor in the Chair of Government, whom they have justly styled the well-known enemy of the natural and Stipulated Rights of America, and at a Town Meeting notified for that purpose, they Voted unanimously to petition, and accordingly have petitioned the General Court, that the name of the said Town might be altered, and that it might no longer bear the Disgraceful name of Hutchinson;

And, WHEREAS, there is a moral fitness that Traitors and Parricides, especially such as have remarkably distinguished themselves in that odious Character, and have long labored to deprive their native Country of its most valuable rights and privileges, and to destroy every Constitutional Guard against the evils of an all-enslaving Despotism, should be held up to view in their true Character to be execrated by mankind, and there should remain no other memorial of them than such as will transmit their names with Infamy to posterity;

And, WHEREAS, the said Thomas Hutchinson, contrary to every obligation of duty and gratitude to *this*, his native Country, which raised him from private life to the highest and most lucrative Offices in the Government, has acted towards her the part of a Traitor and Parricide, as above described, which has been clearly manifested to the world by his Letters lately published, and by his having thus acted, it has become fit and just that every honorable memorial of him should be Obliterated and cease.

Therefore—Be it enacted by the Council and House of Representatives of the State of Massachusetts Bay, in General Court assembled, and by the authority of the same, that the land lying in the County of Worcester, formerly called Rutland District, and in June, 1774, incorporated into a town by the name of Hutchinson, shall no longer bear that name, but henceforth shall be called and known by the name of BARRE, the aforesaid Incorporating act notwithstanding, and all Officers in the said town shall hold and exercise their Offices respectively in the same manner as they would have done, had not the name of the said town been altered.

In the House of Representatives, Novm. 7, 1776.

This Bill having had three several readings, passed to be enacted.
Sent up for Concurrence.
T. DALTON, *Speaker Protem.*

In Council, Novm. 7, 1776.
This Bill having had two several readings, passed to be enacted.
JOHN AVERY, *Dep'y Secretary.*
Consented to by the Major part of the Council.
A true Copy, Attest, JOHN AVERY, *Dep'y Secretary.*

The name of the town had been changed to Barre instead of Wilkes, as the people had desired in their petition. Wilkes and Barré at this time were members of the same Parliament, and each was an ardent defender of what he considered the liberties and

rights of the people of the Provinces. For some years preceding Wilkes had acquired some notoriety by his writings and course of conduct, and had, at one time, been expelled from Parliament and placed under arrest, convicted and sentenced to imprisonment and heavy fine. What many of the English people considered as an act of oppression towards him had turned the current of popular opinion in his favor; the people of America were dazzled by his public course, and their desire to honor him and his name was but natural.

By whom the name of Barre was given to the town is not known, but it is evident that, as a blank for the name was left in the act, it was inserted in the House and acceded to in the Council.

Isaac Barré, after whom the town was named, was at that time attracting much attention and commendation from the Americans for his efforts in their behalf in the British Parliament; he was born in Dublin, of French parentage, in humble circumstances, in 1726; it was intended that he should study law, as in his career at Trinity College, which he entered at the age of fourteen, he had exhibited marked ability as a student and debater; disliking that profession, he enlisted in the British Army with the rank of ensign in 1746. He was in the service for fourteen years on the Continent and in Canada, where, under Gen. Wolfe, he rose to the rank of adjutant-general. He was severely wounded in his eyes in the same engagement where Wolfe was killed. At the surrender of Montreal in 1760, Lord Amherst sent him as bearer of despatches to the home government; he remained in London to obtain relief from his injuries, in which he was but partially successful. The next year he was elected to a seat in Parliament, where he distinguished himself in debate and became a powerful champion of the American people, denouncing the oppression of the British government and contending for the rights of the people. His career in Parliament attracted the attention of the Americans, and they acknowledged him as a powerful friend and advocate in their behalf. The title of colonel, which was at times applied to him, is incorrect, as he arose only to the rank of lieutenant-colonel. In consequence of the wounds he received at Quebec in 1759, he became blind when about sixty years of age. He died in London, July 20, 1802. An oil painting of Barré, after one by Stuart, hangs in our Public Library.

The representative to the body sitting at Watertown, Dea. John Mason, a man specially fitted to the times, kept the people informed of the condition of affairs, and largely through his influence they were led to act in advance of some of the neighboring towns and to preserve and strengthen the determination against yielding to any usurpation of their rights. What wonder, then, that when they were summoned to a town-meeting to act upon a resolve emanating from the representative body of the Colony of Massachusetts Bay, asking them to advise their representative that, if the Congress should declare them independent of Great Britain, he should pledge the inhabitants to solemnly engage with their lives and fortunes to support them in this measure, they unanimously so instructed their representative, Dea. Mason. And they went still farther: they desired every male inhabitant of the age of sixteen years and upwards to be enrolled, that each and every one might contribute his share in the struggle for liberty. They desired their representative to act his part in agreeing upon and enacting a Constitution and form of government for the State such as should conduce to the safety and happiness of its inhabitants. To a people thus pledged to independence it must have seemed a direct insult to be petitioned into a town-meeting to take into consideration a circular from the King's Commissioners, Lord Howe and his brother, Gen. Howe, proposing measures of settlement, this proposition stating that all the acts that the people complained of as grievous should be righted, that they would be repealed, and their rights and privileges established. This petition for the town-meeting stated that "as all proposals must begin somewhere, we think it is time to know whether the people in this town mean to fight Great Britain only for independency, and if not, that their minds may be known thereon." The meeting was held December 30, 1776; the gilded bait of compromise was not acceptable; the meeting was of short duration; after a spirited discussion they decided not to act upon the warrant and it was dissolved. Another result of this meeting was that much indignation was aroused against the signers of this petition, John Caldwell, Ezra Jones, Matthew Caldwell, Noah Mandell, George Caldwell, William Caldwell and Thomas Holden, and their adherents, and so strong did this feeling become that a town-meeting was called by a warrant signed by but two of the five selectmen, and held January 20, 1777. Capt. John Black was voted "out of all office in town," and Col. Buckminster was removed from his position as town treasurer. When we consider the strength of these men in local affairs, their power in debate, their superior judgment and their valiant and valuable services on the field of battle, we can but feebly realize the force of that wrath that was visited upon them by those of their townsmen who, once having decided to contend for liberty, were unwilling to retrace a single step.

Notwithstanding this episode in their affairs, the spirit of patriotism was progressing. At succeeding town-meetings the people gladly voted to raise their quota of men for the fifteen battalions called for by the Continental Congress and appropriate a bounty of twenty pounds to each one who enlisted in the Continental Army; they also voted to consider those who acted as substitutes for such of the citizens as could not go to the war as inhabitants of Barre and placed them on the same footing, as to bounty, as were those who had previously enlisted for service at Ticonderoga or elsewhere.

Another element was now a source of discomfort; bills of credit had been issued by the State, and although its faith was pledged for their redemption, their value was constantly depreciatng. This was productive of hardship and suffering; these circumstances and the absence of many of the men had made the situation depressing; agriculture was neglected, specie had disappeared and nearly every one was unwilling to receive the currency for debts due them, and it was nearly impossible to procure with it many of the necessities of life. A meeting was held to see if the people would petition the General Court for a repeal or alteration of the act in regard to the bills of credit, and they voted against such a course, preferring hardship rather than to do aught that might weaken their hopes for independence, and preferring to co-operate with the General Court in all measures that it should consider necessary for the success of their cause. (In January, 1777, these bills of credit were about five per cent. below par, and in January, 1778, they were worth only about three and one-half per cent. of their face value.)

The people were ever in accord with the spirit of the times, town-meetings were of frequent occurrence and the condition of the colonies was demanding constant attention. At times a feeble minority would petition for an abrogation of certain measures, but the stern, unyielding sense of the majority, after a spirited discussion, would prevail; on some occasions, when meetings had been called on the petitions of this minority, discussion would be avoided by refusing to act on the articles, and in May, 1778, the town showed its spirit so strongly as to vote "to throw out a petition of twelve signers of the inhabitants of Barre in every part and paragraph."

This petition was for the reconsidering of a previous meeting's vote by which a bounty had been granted to those who should enlist in the Continental Army. In April of 1778 the town held a meeting to see whether it would ratify a Constitution or mode of government sent out by the General Assembly. This form was unsatisfactory, and by a strong majority they refused to ratify it as it then stood, the vote being eleven for to seventy-six against it. Realizing, however, that a stable form of government was essential, a committee was chosen to report such amendments as they thought fitting and proper, lay them before the town for its acceptance and instruct the representative in regard to them. This Constitution was the outcome of a recommendation of the House of Representatives, September 17, 1776, that the voters of the different towns assemble and determine whether they would give their consent that the House and Council should enact such a form of government for the State as would seem best; the towns generally voted unanimously to accede to this request, but when the proposed Constitution was submitted to them it was rejected.

In April, 1779, a convention of delegates was called to assemble at Cambridge to prepare another draft of a Constitution, to which Barre sent as delegates John Mason, Andrew Parker and Asa Hapgood. The work of this convention was no more favorable than before, for this draft also was rejected. When, in May of 1780, it came before the town for its consideration a committee of seven was appointed to examine and report upon this draft. Rev. Josiah Dana, the chairman, reported that it was imperfect and recommended these amendments:

1. No one, not of the Protestant religion, should be eligible to any office from Governor to Representative; 2. No person shall be eligible to any office in the Legislature who does not contribute to the support of the civil government in the way of taxation, giving as a reason that he who pays a part of the charges would be more likely to spend our money frugally; 3. That the chief officers of the State should not serve more than four years out of seven, as this might be a check on enterprising, designing men, and of consequence, a tendency to serve the liberties of the people and render the Commonwealth safe; 4. That no person should have a seat in the Congress and the State Legislature at the same time, as such a practice would give a way for some person to have an undue influence in government and be derogatory to the liberties of the people; 5. That a particular day should be appointed for the choice of representatives, as it would save the trouble and expense of an annual precept; 6. Each town should have the privilege of nominating one justice of the peace, it being the opinion that the towns entitled to choose a representative were under greater advantage to determine the qualifications and ability of their townsmen than the Governor of the Commonwealth could be.

The town, by a vote of one hundred yeas to four nays, accepted the draft with these amendments, and ordered their delegates to attend the convention at its adjourned meeting in June, to present them for consideration and to agree upon a time when the instrument should take effect, if accepted by a two-thirds vote of the people. Nothing resulted from these proposed amendments; but during this sitting a revised draft was brought before the convention and adopted, and, on being submitted to the inhabitants, was ratified; on the declaration of the convention that more than two-thirds of the voters of this Province had signified that they were in favor of it, the Constitution was declared accepted.

Barre was still contributing its proper portion of men and supplies for the army. Attempts were made to equalize the compensation of those who had labored for, and who were still in, the Continental army. As each member of the militia was, to a considerable extent, a judge of the value of his efforts, these attempts were not always productive of the best results; local jealousies and personal piques were as prominent as before or since that time, and when endeavors were made to have each free-holder pay a proportionate amount of the expense incurred, they would vigorously protest; but in the end their sense of right and justice would prevail.

The depreciation of the currency was a source of much trouble in this matter. Hours were spent in discussion, votes were passed and reconsidered, and at length the matter would be left to adjust itself. One proposition made at this time was to settle with the men for their services by paying them with bills of credit at "ninety for one," that is—that ninety

dollars in such bills should be considered as the equivalent in value of one Spanish milled dollar.

In this year, 1780, the town was called upon for a supply of beef for the army, the amount required being nine thousand nine hundred and sixty pounds; the town voted to raise £20,100, with which to purchase this beef. Additional men for the army were also called for, and committees were chosen to supply these calls. For the purpose of more easily and readily obtaining the men the town was divided into classes or districts; one man was taken from each district, either by his enlisting or, in some few cases, by hiring a substitute; sometimes one would be drawn by lot, when, if he refused to serve, the district in which he lived was assessed in a sufficient sum to procure a substitute. Twenty men marched from Barre, June 5, 1780, having enlisted for a term of six months' service. More men and more beef were still called for. In 1781 seven thousand eight hundred and ninety-three pounds of beef were called for for the army; the town voted to give John Caldwell forty-two shillings, currency, per one hundred pounds, or £165, "hard money," for the whole amount, and which he furnished.

After this time we have but little evidence that the State was still calling for aid, although in August of 1782 the town voted to use their best endeavors to collect a sum of money in compliance with a "pressing requisition" from the General Court. The last requisition for men had been made in March, but this and some of the preceding calls had not been based upon population, but on property according to the valuation.

There is no complete record of the names or number of men from this town who served in the Revolutionary struggle, but it has been asserted that about one-sixth of the inhabitants did military duty during the war; if this be so, then our town should be credited with sending out more than two hundred men to contend for their liberties.

The war was approaching its close; the campaigns of this year were destined to virtually decide the issues in favor of a long-suffering and much-enduring people. Amid deprivations and some internal dissensions they had worked steadily in answering calls for men and supplies for the force in the field, and now they could devote their time and attention to peaceful pursuits; town-meetings were less frequent, the business to be transacted relating more generally to the proper functions of a town. The church and schools and highways now received the attention they needed, and much time and care was bestowed upon them. One subject connected with the war was a source of much difficulty: some of the men considered that they had done more than their part in aiding to prosecute the war, and charged others with having shirked their duties. This was a subject of constant controversy, and so great was the excitement that the town endeavored at different times to equalize the value of the services of each one. Committees were appointed for this purpose, reports made and rejected; finally a committee reported that they had examined into the past services done in the war with Great Britain by individuals, and desiring to use their best endeavors to have every man's money made good that he had advanced for the support of the war, and also taking into view their personal services, they submitted a statement showing what each man had advanced and done by way of credit, and another statement showing by the valuation what each one's proportion should be; this report was accepted. Two hundred and sixty-five names appear upon this schedule, about one-half of whom were credited with having done more than their part; the delinquents were expected to pay the balance against them into the town treasury, but as this balance varied from a few pounds to several hundred, it was very evident that some would be unable to pay such sums, and others flatly refused to do so; numerous devices were resorted to to effect a settlement, and threats were made of invoking legislative interference; in the end a few settled the balance against them and the matter was allowed to drop.

In 1782 the people were so engrossed in their home affairs that they neglected to send a Representative to the General Court. The Legislature called the town to account for this neglect of their duty, but it declined to assign any reason for its course. So imperative were the demands of the State that the town should do its duty, the next year Colonel Nathan Sparhawk was chosen Representative. Matters of great importance to the condition and welfare of the country, in a civil rather than a military line, were coming forward and demanding settlement. A treaty of peace between the colonies and Great Britain had been arranged and preliminary articles signed. The town, to some extent, realized how great might be the benefits that would accrue to it from independence, and they eagerly desired that time to come when they might enjoy the fruits of their struggles and sacrifices. Nearly impoverished in helping to maintain an army scattered over a large territory by sending forward men and supplies, their farms suffering for want of proper care, in some instances having been carried on by the boys and girls of the household, the dawn of peace was gladly hailed. Resolved that nothing should be wanting on their part, they chose a strong committee, who should obtain the general sentiment of all the people, and from this formulate instructions by which their Representative in the General Court should be guided.

These instructions were drawn up; they expressed confidence in the integrity and good understanding of their representative to conduct public affairs in such a way as to promote the interests of the Commonwealth and this town in particular; they desired him to bear in mind that the State was free and independent, and retained every power, jurisdiction and right

that had not been specially delegated to the Congress, and that the foundation of good government rested on piety, religion and morality; that these, with moderation, justice, temperance, industry and frugality, were necessary to preserve our liberty, and that all laws must be based upon them; that the Constitution and Declaration of Rights were worthy of his frequent perusal, and that in public doings he should be be largely guided thereby. In regard to the treaty of peace, they say "our independence is confirmed, a blessing for which patriots have long toiled and heroes fought and bled. Posterity can never justly charge us with surrendering their rights. We and they shall be free so long as we deserve freedom It will depend upon our virtue."

The fifth article of the treaty of peace was unsatisfactory and distasteful. This article provided that the Congress should recommend to the Legislatures of the several States that they provide for the restitution of all the estates, rights and properties that had been confiscated from Britlsh subjects during the war, and likewise for the restoration of the estates and rights of persons resident here or elsewhere who had not borne arms against the country, but preferred to retain their loyalty to the King. The instructions on this point said, "we cannot help feeling anxious for the event of the fifth article, which respects those men who fled from their country when its liberties were invaded, and took refuge in the dominions of the invader. Congress can only recommend. It will not obtrude citizens in any of the States, much less declared traitors. Agreeable to the treaty of peace, the town wishes for no recollection of past dispute with Great Britain, no repetition of past injuries, but the seeds of discord being excluded, that a beneficial intercourse may be established between the two countries, so as to promote and serve to perpetuate peace and harmony, which would be extremely difficult were these persons to reside among us whom this country regards as the occasion of interrupting that intercourse formerly, and the cause of this suffering; especially as these wretched beings have already begun quarrels with that peace and those who made it, which terminates a long, bloody, unnatural war. Therefore, in the opinion of this town, the happiness, the liberties, interest and safety of these States forbid us to suffer persons of the above description to become the subjects of, and to reside in, this government;" they further instructed him that it would be dangerous to admit them, or to have them forced upon us. They enjoined upon him unremitting attention to business, and stated that it was their right to communicate to him their sentiments whenever they should judge it necessary or convenient, and they expected him to hold himself bound at all times to attend to and observe them.

Here is exhibited the spirit of our town in the struggle for its liberties. By their inflexible determination as a body corporate, by their material and moral support, they had conquered a peace, and no act or surrender of any principle should now put in jeopardy their rights. For neglecting to send a representative to the General Court in 1782, the Legislature had imposed upon the town a fine of forty-nine pounds, ten shillings. In May of 1783 a town-meeting was held to petition for a remission of this fine; a committee was chosen to prepare the petition, which is as follows:

Commonwealth of Massachusetts: To the Honorable, the Senate and House of Representatives in General Court assembled. The petition of the town of Barre humbly showeth that whereas said town is fined £49 10s. for not sending some person to represent them in the Great and General Court the last year, pray that the same may be taken off; and they flatter themselves that honorable Court will be convinced of the reasonableness of the petition when they consider this is the only instance of the like kind that they have failed in since they have been a town, and even in this, when it was tried to know whether they should send or not, there appeared but two or three votes majority in the negative, so that near one-half of the inhabitants are punished for what they must call their misfortune, not their crime; and it will appear further reasonable if the honorable Court will please to consider that the town of Barre, as they humbly conceive, has stood for some years past, and now stands as high on the State valuation according to its interest, than perhaps any town in the County, so that they feel, in a peculiar manner, the weight of their taxes. They have hitherto stifled every groan, that they might not seem to discourage the common cause in which they considered themselves so much interested, but for the future must beg leave to complain unless the proportion is altered between some towns with which they think they are well qualified to compare themselves. There is another reason which is of singular force with the town, and they hope it will have its due weight with the honorable Court, viz.: that besides the last Continental tax, the whole of which remains unpaid, they find themselves in debt between one hundred and two hundred pounds more than the town's proportion in the present State tax, all which, with the addition of fine upon fine, makes it appear to them a burden almost insupportable.

This petition probably had the desired effect, as we find no record of the fine having been paid.

The depreciation of the currency and the unsettled condition of the country were still weighing heavily upon the inhabitants, and were productive of deep and wide-spread suffering. Credit was extinct, the temporary act of 1782 making property a legal tender for debts due had proved a failure, as it still further postponed collections. Suits-in-law between neighbors and between individuals and the town were numerons; the town annually appointed an agent to defend such suits as were brought against it, trusting that a judicial hearing might be beneficial, both in the way of bringing the matter forward for a general discussion, and by the decision of the court, reducing the amount which had been claimed as due; the administration of the State government was arraigned, and the town was requested by petition to take measures that would result in changing the state of affairs for the better; this petition had no further effect than to elicit the reply that time would eventually make the matter right; other towns taking a similar stand, a convention was called to sit in Worcester in April to consider the grievances the people labored under, and to petition the General Court for redress. Barre and twenty-five other towns of the county were represented in this convention; the difficulties of the peo-

ple were freely and fully discussed, and the outcome of the meeting was, that the various representatives to the General Court should be instructed to procure a change in certain laws and customs, prominent among which were that there should be immediate settlements with all officers having charge of the State funds, a reduction of lawyers' fees and a settlement of accounts between the State and the Congress. Here was the entering wedge for what proved afterwards a blot on our escutcheon. The difficulties increased daily.

In 1784 a town-meeting was held on the 1st day of March to see if the town would choose a committee to sit in convention at Worcester on the third Tuesday, in conformance with the request of a circular letter, signed by Willis Hall, of Sutton, by the order of nine towns in the southeast part of the county. The substance of this letter was to have a discussion and consideration of their grievances, in regard to an impost being granted for twenty-five years. Nathaniel Jennison was the delegate from Barre; this convention being productive of no more satisfactory results than that of two years previous, another convention assembled in Leicester in June of 1786, to which this town sent William Henry as its delegate. Thirty-seven towns were represented; the distress of the people, and how to relieve it, were the chief topics for consideration; these deliberations were productive of no good result. The following September some of our citizens united with bodies from other towns in revolt against the laws and courts. On the evening of the 4th they entered Worcester and took possession of the court-house; amongst these was Lieutenant Moses Smith, of Barre, now claiming the rank of captain.

Chief Justice Ward, a man of much dignity, firmness and courage, and who had been a general in the Revolution, demanded an explanation of the proceedings; one of the leaders of the mob replying that they had come for a redress of grievances, Judge Ward informed them that their complaints were without any substantial foundation. Captain Smith replied that any communication from him to them must be in writing.

The judge refused to so communicate with them, and soon afterwards was allowed to address them, when he spoke for about two hours with good effect. The next day Captain Smith unceremoniously introduced himself to the judge, and with his sword drawn, offered him a paper purporting to be a petition of the body of people "now collected for their own good and that of the commonwealth," requiring an adjournment of the courts without day, and demanded an answer within half an hour.

The judge at once replied, telling him that no answer would be given, when Smith retired. In this condition of affairs it was found impossible to hold sessions of the courts, and they were adjourned until November, in hopes that the mob would see its uselessness and disperse. But the infection was too extensive; on the 29th of November, Captain Smith and others from this town were still taking a prominent part in what was now known as the Shays' Rebellion. How this rebellion ended is a matter of history. Smith, with his company of Barre men, after parading through the main street of Worcester, marched home on Saturday, the 9th of December.

The feeling in Barre was intense. The community was divided in opinion in regard to this affair, a large minority upholding the insurgent course and many bitter feelings were engendered. Even the church was disturbed, and one of the more offending members was the subject of a number of meetings, the result of which was his suspension; but, finally apologizing for his indiscretions, he was reinstated in his church membership.

In town affairs the excitement was of long-continued duration. About this time it was discovered that the town's ammunition had been stolen. A committee of nine was chosen to make immediate search for it. Lieut. (or Capt.) Moses Smith and Richard Mills (both of whom had been officers with the insurgents and were suspected of knowing considerable about it) were placed on this committee. After much labor and anxiety on the part of the committee, and by virtue of several search-warrants, the ammunition was found in the barn of a well-known citizen, Joseph Smith. The excitement increased, and Smith was prosecuted for the theft. He presented his case in a long petition to the town, stoutly affirming his innocence and declaring that he had no knowledge, directly or indirectly, how the powder came to his barn. He appealed for clemency and asked that the suit might be withdrawn. A number of town-meetings were held in regard to his case and the matter was finally allowed to drop, he being compelled to pay all the expenses that had accrued. Subsequent developments pointed strongly to Mills as the party who stole the ammunition, he having been encouraged in the theft by Lieut. Smith, and to throw any suspicion from himself, when the insurgents had no use for the powder, he concealed it in Josiah Smith's barn.

January 1, 1787, the town decided to petition Governor Bowdoin for relief from the causes that were generally assumed to be the cause of the revolt and that this outbreak might be condoned. In this petition the inhabitants represented that application having been made to the town by a number of its disaffected citizens, called insurgents, and desiring the town to take up the matter as mediator between government and the disaffected citizens of said town, they, the petitioners, deplored the situation and deprecated the horrors of bloodshed, "more especially town and neighbor against each other, and, to close all with accumulating horror, an armed force, ready to march from the town at the call of government, while a party is ready to march in opposition," and

besought His Excellency to desist from prosecuting the affair with rigor until every conciliatory measure had been used that was consistent with the good, the safety and the dignity of the Commonwealth; and if His Excellency would desist they pledged themselves that the insurgents among our people would promise that the Courts of Common Pleas and of General Sessions of the Peace should not be obstructed in their business until after the next session of the Legislature, provided their lives and property should be safe from seizure in consequence of their hitherto illegal acts.

One of the conventions that had previously been called had never dissolved, but had held numerous sessions from time to time, discussing the condition of the Commonwealth and endeavoring to devise means for a settlement of the difficulties. This convention was now in session, and notwithstanding that the majority of our people professed penitence for the course that had been pursued here, and had petitioned the Governor to desist from measures which would subdue the insurgents, they would not recall their delegate from Worcester. The insurgent minority had considerable power in town, and were not yet disposed to abandon their course in regard to the results that they hoped might be obtained from the deliberations of the convention, considering that by so doing they would be deprived of the right of petition, which they believed to be one of their inherent rights. They expected, too, that a continual agitation of the grievances would tend to bring an early relief to their sufferings. The whole town was considerably excited, but after the defeat of Shays the feeling gradually subsided.

The climax came at a town-meeting held July 6, 1787. The subject of the amount of costs incurred in regard to the procedures and search for the stolen ammunition was under discussion. Lieut. Moses Smith had been chosen moderator and a part of the business had been transacted. The debate over the ammunition was heated, and an attempt was made to suppress it, Lieut. Smith and his followers being in the majority. To offset their strength, a protest, signed by fourteen voters, all prominent men, was presented to the meeting. This protest was as follows: We, whose names are underwritten, protest against the proceedings of the town, in town-meeting now assembled, and declare that we will not pay one farthing of any cost or any charges that may arise to the town, either directly or indirectly, in consequence of the illegality of the same. The reason that we assign for this protest is that Lieut. Moses Smith, the moderator, has acted as an officer in the army of Captain Shays, in the rebellion against government in Massachusetts, and has not made it manifest that he has taken the oath of allegiance agreeable to the act of court.

Smith then resigned the office of moderator, which resignation was accepted. The record further states: "Then, after considerable altercation among the inhabitants of the town then assembled, the inhabitants dismissed without passing any further vote upon the articles contained in the warrant, leaving the selectmen and town clerk in the meeting-house without one inhabitant of the town with them, and said selectmen and town clerk, after waiting till the dusk of evening, retired."

Lieut. Smith was an innholder. His first location was easterly of where Mr. W. E. Hemenway now lives, and on the opposite side of the highway. This was not a tavern, but a house of entertainment. He gave this to his son, and soon afterwards, in 1801, erected a tavern, of which he had the charge for about twelve years. This house is now used as a dwelling-house, and is opposite the school-house in old District No. 9.

After the excitement of the rebellion had subsided, Lieut. Smith held various town offices for a number of years, being treasurer in 1792. His wife died about 1800, and at her grave he placed a head-stone. He afterwards placed his property in the hands of some friends, on the guaranty to support and care for him for the remainder of his life. He died in 1815, seventy-six years of age, and was buried by the side of his wife, but no stone ever marked his last resting-place.

He was a man of much force of character and kind and indulgent to his family.

At one time in our history there were nine public places in town, some of which were taverns, the others houses of entertainment, the distinction between the two being that a tavern was obliged to be licensed, and intoxicating liquors were sold there, while for a house of entertainment no license was required, and no liquors were supposed to be obtainable. The most noted tavern of the day in the last century was that of Jonathan Nourse, which stood where now is the Methodist Church. Another tavern was located where now is Smith block, and was maintained as such for some years in the present century. Still another was near the residence of Lemuel P. Rice. It is on record in the proceedings of our town-meetings of the last century that frequently the town would vote for an adjournment of five or ten or twenty minutes, then to reassemble at Landlord Nourse's.

Peace at home was now thoroughly established, and, although various primitive business enterprises had been established, farming was still the chief occupation; still struggling under many difficulties, the political condition of the town and nation was an object of much solicitude; after a few years of quiet, another war with Great Britain was believed to be imminent. When, in 1807, the Congress had passed the "Embargo law," the people were much concerned, and, as its effects gradually developed, the stringency in the scanty markets of the day was everywhere manifest; the distress that first appeared at the shipping centres soon extended to the interior towns. So marked was this here, a town-meeting was held in September, 1808, to take the matter into consideration, and an address or petition to President Jefferson

was adopted, praying for a repeal of the law, after reciting the distress that had fallen upon the people through its enforcement. It is highly probable that this law and the war rumors of this and two or three succeeding years had much to do in arousing a feeling of opposition to the War of 1812. The sympathies of the town were rather in consonance with the Peace Convention of Hartford; from Hartford and from Boston many circulars and posters were sent here, addressed mostly to the Federalists, showing, in various partisan ways, the attitude of the national administration. These aroused much discontent, and this trouble, with the increased scarcity of currency, added to the hardships of the people.

Our records in regard to this war are very scanty, but two allusions to it appearing. When a call for troops was made we have no records of any volunteers for the ranks, but it is evident that one draft for men was made. In August, 1814, a number of the people petitioned the town to grant such men as were or might be drafted into the service a compensation in addition to that allowed by the government, but the town refused to do this; in May, 1815, the town voted "to grant four dollars per month to those persons who, being inhabitants of the town, were drafted from the militia the last summer, and marched into the service of the State, or who hired substitutes."

The war with Mexico received but little sympathy here; it was fully realized that the idea of the extension of slave territory was the cause of this conflict, and to this extension our people were much opposed. The anti-slavery feeling had been growing for a number of years and was increasing, a few brave men standing by their convictions and aiding in forming that party which, twenty years afterwards, saved and perpetuated that Union for which their ancestors had so nobly contended in the last century. In 1840 the Presidential electors of the so-called Free-Soil party received but one vote in the fall election; in 1844 the number had increased to thirteen, and, in 1848, to forty-one. The only resident or native of Barre, of whom we have any record, who enlisted for service in this war, was George Field, who was a member of Company E, First Regiment Massachusetts Infantry.

Another terrible struggle was to come; the encroachment of slavery had been increasing, and, when a change in the national administration had come, in 1861, the conflict was precipitated. The firing upon Sumter was the tocsin that aroused the whole Northern people; united as never before, all petty jealousies dropped for the time, men of all shades of political belief and of various nationalities gallantly and promptly responded to their country's call; the old spirit which animated our Revolutionary sires burned anew. The young man, and the middle-aged, left his studies, his mercantile pursuits, the bench and the farm, and, cheered on by father and mother and sister, enlisted to do battle and to die, if need be, that his country might live. During that four years' struggle three hundred and nineteen men were enlisted as our quota, and engaged in the stern duties of the period, and saw many a bloody battle-field. At their enlistment the town and individuals pledged themselves to protect and guard the interests of their families or dependent relatives, and well did they perform that duty. The names of those three hundred and nineteen noble and brave men are cherished as one of our sacred records, and, though nearly a quarter of a century has elapsed since they proved their heroism, yet, to-day, their patriotism and their determination to guard the heritage entrusted to us to care for and perpetuate are held in high esteem by those for whom their efforts accomplished so much in preserving and maintaining this Union. Many of these men never returned to their homes,—the deadly rifle-ball, or disease contracted in the discharge of their duty, filling a grave near many a battle-field. The town was generous to its nation's defenders, and still recalls with pride, and will forever cherish, their brave deeds.

In 1866 the town erected a monument in honor of those who gave their lives for their country; this granite base and marble shaft stands as a grand memento in the north park, with Gettysburg, Newbern, Port Hudson and Antietam inscribed thereon, and there are the names of fifty-nine true men who died for their country, but who "still live" in the affections of a grateful people.

In the year following the adoption of the State Constitution the "Barre Slave Case" attracted much attention. James Caldwell had bought in 1754, at Rutland, a negro man, named Mingo, about twenty years of age, a woman, named Dinah, about nineteen years old, and their child, named Quako or Quork, about nine months old, for £108. By the death of Caldwell in 1763 a settlement of his estate became necessary; Quork, as a part of the personal property, was assigned to Mrs. Caldwell. She married Nathaniel Jennison in 1769 and died in 1774; at her death Jennison assumed the ownership of Quork, and Quork continued to live and work for Jennison. In April, 1781, Quork was enticed from Jennison's service by John Caldwell, a brother of James, who told him that he was a free man and not subject to Jennison's authority; the negro at first refused to leave his supposed master, but on Caldwell's representations that he would furnish work for him, pay him for his services and protect him, he left Jennison for Caldwell, who set him at work in his fields. Jennison missed his slave and, suspecting where he might be, went to Caldwell's and found Quork harrowing; he commanded the negro to return to his own house; Quork refused and was then attacked and beaten by Jennison and others who had gone with him, and was shut up for about two hours. By Caldwell's efforts the man in whose charge Quork had been placed was induced to release him, and through his influence, too, the case came before the

County Court, which was really a three-fold one. May 1, 1781, Quork, or Quork Walker, as he was now called, brought an action against Jennison for trespass, which was tried at the June term. The defense was that Quork was the proper slave of Jennison, and as such he had the control and possession of his body, and no action for trespass could hold, to which Quork joined issue, denying that he was his proper slave.

The case was tried in the Court of Common Pleas, and a verdict for plaintiff with damages in the sum of fifty dollars was awarded him. An appeal was was taken to the Superior Court, but was there defaulted. In the same month of May Jennison brought suit against John and Seth Caldwell for enticing his negro man from his service and business; he obtained judgment in the sum of twenty-five dollars; this case, too, was appealed to the higher court, and at the September term they were declared not guilty and recovered judgment and costs against the plaintiff. At this term of court Jennison was indicted for assault and battery and illegal imprisonment and on trial was found guilty and ordered to pay a fine and the costs of prosecution.

The question of slavery was not yet settled; this was sent up to the Supreme Judicial Court, but did not come to trial until the April term of 1783, when it had its hearing before the full bench. The case was ably argued and the decision of the court was pronounced by Chief Justice Cushing. This was the first and only trial of the question of slavery under our State Constitution, and it was then established that slavery in this Commonwealth was abolished by the Declaration of Rights, which prefaced the Constitution. Cushing, after rehearsing the case and explaining the previous situation, and remarking that the defendant in this case relied upon some former law of the Province which would tend to uphold the claim that Quork was the slave of Jennison, says, "as to the doctrine of slavery and the rights of Christians to hold Africans in perpetual servitude, and sell and treat them as we do our horses and cattle, that (it is true) has been heretofore countenanced by the Province laws formerly, but nowhere is it expressly enacted or established. It has been a usage which took its origin from the practice of some of the European nations and in the regulations of the British government respecting the then Colonies for the benefit of trade and wealth. But whatever sentiments have formerly prevailed in this particular, or slid in upon us by the example of others, a different idea has taken place with the people of America, more favorable to the natural rights of mankind and to the natural innate desire of liberty with which Heaven, without regard to color, complexion or shape of noses (features), has impressed all the human race, and upon this ground our Constitution of Government, by which the people of this Commonwealth have solemnly bound themselves, sets out with declaring that all men are born free and equal, and that every subject is entitled to liberty and to have it guarded by the laws, as well as life and property—in short, is wholly repugnant to the idea of being born slaves. This being the case, I think the idea of slavery is inconsistent with our own conduct and Constitution, and there can be no such thing as perpetual servitude of a rational creature, unless his liberty is forfeited by some criminal conduct or given up by personal consent or contract."[1]

Slavery, then, in this State, no longer existed. Some families had previously given their slaves their liberty, or tacitly acknowledged that they were free. After their freedom the negroes, in some cases, remained in the houses of their former masters, but worked wherever they desired or could find employment. Others formed homes in a little colony by themselves, and a number took up their abodes in the west part of the town, whence arose the name of Guinea, or Guinea Corner, which name is even now sometimes applied to old School District No. 10. Quork remained in town, and died here at an advanced age.

It is related that Jennison took the younger portion of his slaves to Connecticut and sold them there, and that one of them, Prince Walker, a brother of Quork, escaped and returned here; by some means he obtained some land in the east part of the town, where he lived and died. He married here and reared a large family. He died April 21, 1858, aged eighty-four years, as is supposed; a stone with his name and supposed age inscribed thereon marks his grave, by the side of which are five other graves of members of his family; the land, which passed out of his possession before his death, now belongs to the heirs of the late Larned Rice. "Stip," another slave, died here about 1845, supposed to be nearly ninety years of age. Annis Ring, another former slave in this town, died in Boston early in the present century. She married Pompey, who had been a slave in the family of Jonathan Allen; Pompey died in 1812, a decrepit, broken-down old man, breathing his last in a field in the north part of the town, from which circumstance the field is still known as the "Pomp lot."

In accordance with the laws of the Province, early attention was paid to education. These laws provided that this education should include the ability to read the English language and a knowledge of the principal laws, and that religious instruction should be joined therewith. Here was a three-fold system—intellectual, political and moral or religious—any one branch of which was within the power of the early settlers to cherish and promote. As the district or town was large or small, so far as relates to the number of its inhabitants, so were the requirements for schooling graded; a town of fifty families was required to fur-

[1] See "Proceedings of the Massachusetts Historical Society," 1855–58, also 1874, January to June.

nish instruction in the elementary branches only, while one of a greater number of inhabitants was required to maintain a grammar school, or one of a high grade. That the proprietors were aware of these laws, and were disposed to observe them, is evidenced when, at their meeting in 1733, they voted to assign a lot for a school. What was done in the matter of instruction from that time until 1749 is not on record, and after 1749, when the district passed out of the proprietors' possession, until 1763 there are no records, they having been destroyed in a fire which consumed the house of John Caldwell, the clerk of this Rutland District. But that schools had been established and supported previous to 1763, is manifest from the following vote of the district, passed April 11th of that year: "Voted that £26–13–4 be assessed on said District for the present year, and that the school be kept at the same places and in the same manner that it was the last year."

Here is evidence of the early establishment of methods of instruction, and that at least one building had been erected and used as a school-house is shown by the proceedings of the district the following year, as they voted "that school be kept in ten places this present year," and specified the places where the school or schools should be held, all but one being located in or near certain dwellings, that one to be "at the school-house," and forty pounds was raised by tax for their support.

It is not on record how long a term of instruction was given; the schools were not always held at or near the same dwellings, each year the district deciding on the number there should be, and where they should be held, and thus the various sections of the district were accommodated from year to year.

Individuals in certain localities had erected or arranged small buildings on their premises as temporary school-houses, for, in the vote above quoted, one school was to be held at *or near* John Fessenden's house; in 1766 forty pounds were raised for the support of the school, which was to be kept at six places, as in the preceding year, one place at the Centre school-house, one at John Caldwell's school-house, *so-called*, one at Asa Hapgood's school-house, one at Joseph Robinson's house. There were not as many different teachers as there were schools authorized, so that it would appear that a teacher, after holding a school a certain number of weeks in one locality, was then transferred to another place, the length of the terms depending somewhat upon the valuation of the particular locality in which they were held.

The first record we have of the *town* proposing to build a school-house is in May of 1783, when it was voted "to sell the school-house that stands on the Common near the meeting-house and that the center quarter have liberty to set up a new school-house on the [same] ground." This school-house stood where the town-hall now stands.

The town had increased in population, and in accordance with the laws of the Commonwealth, better facilities for instruction must be provided.

In November, 1784, two articles appeared in the warrant for town-meeting,—one to see if the town would provide and maintain a grammar-school, the other to see if it would build one or more houses for a grammar-school or schools, and make any alterations in the school districts by enlarging or forming anew; the matter of establishing a grammar-school was passed over, but a committee was appointed to consider in regard to erecting school-houses; this committee reported that eight buildings should be erected, the dimensions of each of which were specified and their locations named. The usual term applied to each district was "squadron."

The war was now over, and the need of a return to a peace basis was weighing heavily upon the inhabitants and the distracted and uncertain condition of the country claimed their attention. With these weights upon them the matter of building the houses was postponed to a time in the future. Nothing more was done in regard to the houses until 1790, when it was voted to divide the town into eight squadrons and to build a house in each and their locations were again assigned, but if the residents of any of these districts were dissatisfied with the site, and they could agree upon any definite place, permission was given to locate the building on the spot agreed upon; otherwise a committee should locate the house wherever, in their judgment, would best serve the interests of the people. After the town had been divided into districts and the building spots assigned, complaints were numerous; after these had been discussed in town-meeting the voters ordered that the house in the Centre should be erected immediately and should be thirty feet square. This was done, but its dimensions were changed to twenty-nine feet by thirty-two feet; house No. 2 was built at or near where the corresponding one now is; No. 3 was in the east part of the town on an old road leading to Hubbardston, from where the Silas Harding farm-house now stands; No. 4 was "about twelve rods southerly of David Underwood's dwelling house" (this dwelling was afterward known as the Marcus Spooner place, and has lately disappeared); No. 5 was nearly opposite where the present No. 5 house stands; No. 6 was where the present No. 6 stands; No. 7 was located on an old road leading to what is now known as the Williams place, and about midway between there and the present residence of Mr. Franklin Babbitt; No. 8 was located about fifteen rods easterly of the bridge over the Ware River at Barre Plains and on the north side of the present highway. The inhabitants of District 7 objected in vigorous language to the location of their house. After much talk a vote was passed in town-meeting to notify them to agree by a majority where the house should stand. This building was at length erected southerly of the place assigned; but this location was not satisfactory and

afterward the town gave the inhabitants permission to move it. In 1791 the town raised four hundred pounds to erect these houses and notified each taxpayer in the varions districts to bring on to the grounds their proportion of the building material, they being credited in the tax-list for the value of the material furnished. The houses were soon erected, but the cost had been more than was anticipated. In 1792 the selectmen were requested to employ "a grammar-school master and direct him to the several districts in rotation" and to hold a school in each district so long as the proportion of the school funds should be sufficient to pay the expense. In 1796, the population of the town having increased, additional schools were needed and another district was established, being what is now known as No. 9. In after years other districts were formed, in some instances by dividing the former districts and in other cases by establishing new ones in the remoter parts of the town, and houses were erected in some central location. These buildings were small and of one story, usually about twenty-five feet square, built plainly and without regard to any rules of architecture, and not a great protection from storms or cold. They answered the purpose for which they were intended and were probably in keeping with the quality and quantity of information imparted. From 1763, which is as far back as our records of Rutland District extend, annual appropriations were made for the support of the schools, usually forty pounds, until 1775, when the energies of the people were otherwise concentrated and the schools were passed by. After that year the appropriations were resumed and increased each year until in 1781 the amount appropriated was three thousand pounds. Large as this seems, it was but little larger than some of the preceding grants, as the currency had so depreciated in value that it was equivalent to not more than seventy-five pounds when we compare its value with that of the Spanish milled dollar. In 1782 the amount appropriated was sixty pounds, and from then until 1803 the amount varied from sixty to two hundred pounds. In 1804 the grant was seven hundred dollars, this being the first year that our national word, or character for, dollars was used in our official capacity as a town.

The schools were held in different parts of the town in terms of various lengths, each year a committee being chosen to lay before the assessors a list of all the ratable polls in each district, the valuation and number of polls being used as a basis for determining the number of weeks of school that should be held in each district. Instruction was not limited to ages; in the same room would be found scholars varying in age from five or six years to, in some instances, twenty-five years; the older ones appreciated the value of the meagre instruction of the day, and efforts were made to extend the school facilities.

In 1798 the necessity of an academy was freely and fully discussed in town-meeting; while this plan was finally postponed, it had the effect of placing before the people the situation of educational matters and the unsatisfactory condition in which the schools were, exhibiting the autocratic form of government and the lack of uniformity in the methods of teaching.

The laws of the Commonwealth were defective; there was no supervision of schools, parents seldom visited them, and each was conducted according to the plans or fancies of the teacher, who, in many instances, had obtained the position for other reasons than for proper qualifications. The defects of this system were soon made apparent, and the necessity of uniformity in instruction and proper qualifications on the part of the teacher began to be realized.

In 1798 a committee was chosen, for the first time, to visit the schools and have supervision of them. This committee consisted of Rev. Josiah Dana, Seth Caldwell and Jonas Eaton, men of education and energy, and under their guidance and by their influence the cause of education was advanced. This committee received no compensation for their services, but freely and willingly gave their time for this purpose; but the people were not yet fully educated to the plan of choosing a School Committee annually, for no other board was chosen until 1804, although an article on this subject had been each year inserted in the warrant.

In this year Rev. James Thompson and Samuel Bigelow were chosen, and each subsequent year the office was filled, some years consisting of but two members, and, at other times, in connection with Rev. Dr. Thompson, who was chairman of the board for nearly forty years, one from each district was chosen. In 1810 the district, or "school ward," in the west part of the town was established, which was designated No. 10, and thirty dollars was appropriated for building the school-house.

Under the efficient management of the School Committee and the fostering care of the people, the cause of education was elevated, and as better and additional facilities were needed, the number of districts was increased until, in 1845, they numbered sixteen.

Previous to 1815 the schools had been entirely under the control of the town as a unit. In that year an agent in each district was chosen "to certify money which shall become due." The explanation of this vote is that the people in the various districts were taking more interest in educational matters, and were desirous of bringing their schools more directly under their control and regulating the length of the terms. While they should remain under the general supervision of the regular school Committee, it was believed that some local authority would be more conducive to their interests. This was the beginning of a plan which was adopted in later years, both here and elsewhere. In 1828 the town voted that each district should chose its own agent or prudential

committee. This agent had authority to engage the teacher and regulate the contingent expenses of the district in regard to the school, subject, however, to some control by the general committee.

The friends of education did not rest in their endeavors to improve the common-school system. Its wants and defects were closely observed and studied. In 1838 Rev. Mr. Fay, pastor of the Evangelical Church, who took a deep interest in the schools, and entered with much enthusiasm into all plans for their improvement, ably seconded the efforts of Rev. Dr. Thompson and others in this direction. The improvement of the schools of the Commonwealth had been agitated by Hon. Horace Mann, secretary of the State Board of Education, and, as one of the results of this movement, a convention of the friends of education was held in this town, at which were present, as active participants, Rev. Dr. Thompson, Rev. Mr. Fay, Rev. Luther Wilson, of Petersham, Rev. Josiah Clark, of Rutland, and many others, and from this and similar meetings in various parts of the State there resulted the establishment of Normal Schools, the second of which was opened here in September, 1839; this school occupied the second story of the town-hall building, which had been in process of construction for about two years, and had been completed the previous winter. Its principal was Rev. S. P. Newman, a professor in Bowdoin College. On account of the location of the town, access to which was then difficult, it was not well patronized, and was suspended in 1841, greatly to the regret of the people.

In 1852 a High School was established, and since then has been well maintained, being well-attended and in charge of well-trained and conscientious teachers. The languages, higher mathematics and kindred studies are pursued; young men have been fitted for our colleges, and besides imparting instruction to the youth of our own town, it is patronized to some extent by scholars from other municipalities.

In 1869 the district system was, by State enactment, abolished, the school property appraised, and the amount remitted to each district; since then the general School Committee have had the control of the whole system.

As we look back to the schools of the early settlers, with their limited instruction, and an annual appropriation of £40 or less, and then turn to our system of to-day, with its division into grades, from the primary to the high, with an annual appropriation of nearly five thousand dollars, and where all can obtain an education according to their taste or inclination, we can truly say, "Our lines are cast in pleasant places," and we fully realize the necessity of sustaining this system, and of making all possible advancement, so that the writer of our history, a century hence, shall say of us, as we record of our predecessors, "Well done."

The most noted and worthy establishment in town is the Private Institution for the Education of Feeble-Minded Youth. This was established here in June, 1848, by Dr. Henry B. Wilbur, a graduate of Amherst College, and of the Berkshire Medical College, who had practiced medicine in Lowell previous to his coming to Barre in 1845, from which time he continued the practice of medicine.

At this time there was no provision in this country for a class deemed incapable of improvement; but Dr. Wilbur, becoming deeply interested in efforts of European philanthropists, resolved to join their ranks, a resolve in which he was ably seconded by his young wife, a woman of great tact and untiring energy and self-devotion. Dr. Wilbur was a man of versatile genius, broad intellectual attainments, and a believer in the divinity that presides over the feeblest humanity. Gifted with large enthusiasm, and possessor of an indomitable will, he won success in spite of the obstacles that ever oppose a novel undertaking. Called in September, 1851, to preside over an experimental State School in Albany, N. Y., he left his Barre pupils in a dwelling on the corner of Pleasant and High Streets, under the care of Dr. George and Mrs. C. W. Brown.

The increasing number of pupils soon requiring more house-room and ground for out-door living, the residence of Mr. Willard Broad was purchased, enlarged and adapted to special needs, and the institution removed to that location in January, 1853. Since that date its growth has been continuous, comprising now seven dwelling-houses, with a fine gymnasium, stables, &c., surrounded by about two hundred and fifty acres of land. These cottages, sufficiently contiguous for supervision, have ample grounds for each classified group of pupils, and all financial receipts have been devoted to making attractive homes for these unfortunates. For some time the only private institution in the country, still the largest, pupils have been received from all parts of the United States, Canada and the Sandwich Islands, whilst applications have come from South America and Australia. To the upbuilding of this institution Dr. and Mrs. Brown, assisted since 1884 by their son, Dr. George A. Brown, have given their undivided efforts, personal supervision and mental ability, making the standard of family organization, as to care, mental improvement and æsthetic surroundings, high enough to receive from a European specialist of wide experience the title of an "Ideal Institution."

"Here boys and girls have come with all their senses perfect, but connected with nothing within, telegraphing no communication to or fro, reaching inward only to dumb inanition. Was there a mind hid away there? Were there elements out of which a mind could be formed? Was it possible to find a way into that empty space, to pick up the buried germs of mental faculty, if such there were, attach them to the delicate wire of some sense and thus open a communication between the world within and the world without? This was the problem which the institu-

tion here, with kindred ones in other lands, has, with a sublime faith, attempted to solve; and the result has been such as to fill all observers with admiration. A work has been wrought in our village scarcely less wonderful than the creation of a human mind."[1]

At the opening of the present century the population of the town had increased from thirteen hundred and twenty-nine in 1776 and now numbered nineteen hundred and thirty-seven. Farming still continued the chief occupation, attention more particularly being given to raising such crops as wheat, potatoes, corn, flax and hemp. Whitney, in his "History of Worcester County," published in 1793, says, "here they have many and large dairies, and it is supposed that more butter and cheese is carried annually into market than from any other town of the same extent." A circulating medium was almost unknown, a majority of the inhabitants seeing no currency, or only at rare intervals, and rather as a curiosity than otherwise. Such articles of food as were not produced on the farm were obtained at the small country store in exchange for home products. Their clothing was made at home, the wool shorn from the sheep's back, carded by hand, spun into yarn and woven on the old lumbering loom, or the flax was pulled in the field, hetchelled, and finally made into garments or bed-linen, most of this work being done by the women of the household, the men attending to the out-door and more laborious duties. Considerable flax and hemp were raised, and were considered so important crops that inspectors were annually chosen to decide as to its quality and value, as in such a time of exchange and barter it was deemed necessary that disinterested parties should affix a value. Although the people were struggling for a livelihood and were dependent one upon another, yet a spirit of sociality prevailed, notwithstanding the question of their existing required hard and long hours of labor. Mills for grinding their corn and wheat had been built in several places, but all of these were of the old colonial style. The constructive and inventive faculty which this town so fully exhibited at a later day was here, and early began to manifest its outgrowth.

The raising of flax, to be more profitable, required mills to return to the people the full benefit of the crop, and two were soon established for crushing or grinding the seed and obtaining the linseed oil; one of these was on Prince River, at what is now Heald Village, and the other was in the east part of the town. With this oil and pigments their houses were kept neatly painted; clothier's mills, as they were termed, were established and tanneries erected in various parts of the town; the manufacture of brick, which had been pursued previous to 1800, had been abandoned, the yards near where now live Nathaniel Holland and the heirs of Lysander Crawford having become "worked out," while the one near Charles S. Holland's present residence was closed. About 1828 this industry was resumed at the latter yard, and in the south part of the town, at the Plains, a new yard was opened. These yards were worked for about ten years, when the business again ceased.

Saw-mills had been established as early as 1753, but from their rough construction had continued but for a short time. In the latter years of the last century and early in the present one a number of these mills were erected on the various streams. Perhaps the most business enterprise existed in the south part of the town, this being favored and promoted by the abundant water-power in that section.

There was a saw-mill at what we now term the Powder Mills early in the century. At the Plains Seth Pratt conceived the idea of diverting the water from the Ware River by means of a canal and forming a pond, throwing a dam across the river from land on the south side, now owned by Mr. A. F. Adams. This canal was excavated in 1808; subsequently the dam was moved farther up the river and the canal extended.

In 1810 Phineas Heywood, who, with his father, had come here from Shrewsbury, and who was a son-in-law of Pratt, having previously obtained considerable land in that vicinity, sold land and water-rights for manufacturing purposes. In addition to the grist-mill and saw-mill, which had been for a year or more in operation here, two tanneries were built by Parker & Pratt, and in the same year Phineas Heywood commenced work in a clothier's mill; nearly all the grinding of grain and the fulling and finishing of the woolen cloth was now done at the Plains. This clothier's mill continued the business, with changes adapted to the times, until about 1870, the manufacture of yarn and coarse woolen cloth having been adopted a number of years previously. Heywood, who was of an ingenious and inventive turn of mind, succeeded in operating, in a crude way, a cotton-spinning machine about 1814 and a woolen-carding machine about 1816. In 1827 he erected a larger mill; this has been moved from its original site and is now used for other purposes.

David Wadsworth erected a scythe manufactory a short distance easterly from where the Messrs. Stetson now live, and its production was considerable. About 1830 a company, prominent in which were Henry Holbrook and Hiram and Paul Wadsworth, purchased of John Wadsworth a lot of land bordering on the Ware River and erected a brick building for the manufacture of woolen cloth, and a pleasant little village was built up. This company did not succeed in the woolen business, and were soon followed by Jonathan Wheeler, who was favored in his venture, but who was compelled to close the works by the financial panic which existed from 1837 to 1842; he sold the property to Wright & Farnum, whom a Mr. Fisher soon succeeded. He was followed by Edward Denny, who purchased the property

[1] Rev. Dr. Thompson in Centennial Discourse.

in 1844 and who continued engaged in the manufacture of various kinds of woolen goods, conducting the business with success until about 1867. In 1871 the property was leased to C. T. Deacon & Co., who soon failed in the business. The factory was destroyed by fire in the winter of 1857–58; another one of the same dimensions, eighty-two by forty-four feet, and four stories in height, was erected the following summer.

At Mr. Denny's death, in 1874, the property passed into other hands, meeting with varying fortunes. A company with the firm-name of the Ware River Woolen Company, purchased it in 1880, and after operating it for about two years, finding the business unprofitable, sold it to James E. Crossley. In 1883 the mill was again destroyed by fire and has not been rebuilt.

During, or a little previous to, 1825, Silas Bemis and Benjamin Clark each and separately conceived the idea of erecting a cotton-mill and each made strenuous efforts to complete the first dam. Mr. Clark, having obtained control of the water privilege by purchasing it and a considerable lot of land of the heirs of Matthew Caldwell, erected a brick factory, which at that time was the first of any importance in this section of the State; by the erection of this and the necessary tenement-houses he became financially embarrassed, but he soon organized a stock company, consisting of Messrs. Mixter, Woods, Bowman and others, by whom the work was carried on and the manufacture of cotton commenced; Mr. Clark, becoming involved in a lawsuit growing out of a claim for priority of rights to the water privilege, became insolvent and retired from the manfacturing business. The success of the company, under the name of the Boston and Barre Manufacturing Company, was not at first propitious; they entered into a contract with Mr. John Smith, who was a practical manufacturer, to take the mill and make the cotton cloth at a certain price per yard, in which he was successful, making the business remunerative for himself and the stockholders. While the business was thus prosperous the factory was destroyed by fire; the company, not desirous of rebuilding, sold out by auction, the land, buildings and water privilege being purchased by Mr. Smith for himself and four others; subsequently purchasing their shares, he erected a new mill, which he managed with signal success until his death, in 1859, when the business passed into the hands of his two sons, by whom it was profitably carried on under the firm-name of C. W. & J. E. Smith. On the death of Charles W. Smith a few years ago and the settlement of his estate, J. Edwin Smith became sole owner, by whom some needed repairs and alterations were made, and now the establishment is in successful operation. The village, now and for many years known as Smithville, is a model factory village and with its neatly-painted houses, broad street and abundant and beautiful shade trees presents an attractive appearance.

On the Ware River, about midway between Smithville and the woolen-factory village, buildings and mills for the manufacture of gunpowder were erected about 1826 by Silas Bemis, one of the early settlers, and his son-in-law, Charles Bemis, and others, and did a good business under various ownerships until 1865, when this industry left the town. Here is a good water privilege awaiting utilization.

In the centre of the town manufacturing interests have been varied. Thirty-five years ago the Barre Boot Company carried on a large business, employing many hands; they were followed by J. W. Rice & Son, who continued in this industry until about 1876, when they ceased, unable to compete with the large establishments of the Brookfields and other towns. From 1850 to 1865 the manufacture of "Shaker-hoods," or bonnets made of palm-leaf was extensively carried on, furnishing employment to many women and children in weaving the leaf into the strip of which the hoods were made, but by the demands of fashion, this business became of the past. The introduction of the palm-leaf business into Barre is somewhat singular. About 1829 some hats were imported into this country, made of a material that was unknown here. A Boston merchant, attracted by their apparent durability, imported a few bales of the raw material from Cuba. A woman in Dedham was engaged to take one of the hats to pieces, learn its construction and endeavor to imitate it. She succeeded, and taught the art of making these hats to a woman of Petersham, by whom women in this town were taught. Braiding these hats became an extensive business, and a source of some income to many families here and elsewhere. The hats thus made were rough; as they needed smoothing and shaping, they were at first pressed by hand with hot irons, and by those who made them. As the industry grew, men's help was obtained to do the pressing. Mr. John W. Weston engaged in the business in a dwelling that then stood northerly of the Lincoln burial-ground. Afterwards machinery was devised for the purpose, and a small shop was built on Prince River by Mr. Chester Gorham. The business was carried on at this place for about thirty-five years, Dexter Dennis succeeding to it and enlarging the plant, which also accommodated other kinds of manufactures.

A short distance down the stream is a water privilege which, as early as 1750, the proprietors considered the second most valuable one in the territory, and they proposed to have a saw-mill erected there; but as the mill already built could furnish all the boards that were then required for building purposes, this project was abandoned. In the latter part of the last, or early in the present century, a clothier's mill was built on this privilege, where the fulling and finishing of the homespun cloth was carried on for a number of years. Woods & Field purchased this building about 1840, and, remodeling it, commenced the business of pressing and finishing palm-leaf hats;

they continued in this but a few years, when they sold to Carlos Gambol, who had superintended the work for them. He soon sold the property to Spencer Field, who ran it for a few years, and about 1854 sold it to Jason Desper. None but palm-leaf hats were finished at this time, nor was it until about 1860 that other kinds of hats came to these works. Only ten hands were employed at this time, and from forty to eighty thousand dozens were finished each year, the number varying with the different years. Mr. Desper carried on this business, enlarging the works from time to time, until about 1874, when J. F. Snow and J. Andrew Rogers became associated with him.

At the death of Mr. Snow the following year, Jesse A. Rogers became a member of the firm, which was now known as Desper, Rogers & Co. The plant was still further increased from time to time to accommodate the additional work that came in upon them; the manufacture of hats was adopted, and has proved a profitable branch of the business. In 1888 Mr. Desper, who had begun to feel the weight of advancing years, sold his interest to W. H. Osgood, and a new firm was formed under the name of the Rogers-Osgood Co. For the last eight or ten years about forty women have been employed in running sewing-machines, making the hats from braid bought in the markets. At the commencement of this business in 1840 but little finishing was done; now that branch is much more elaborate, the hat going direct from the manufactory to the salesman, and thence to the consumer. Seventy men are employed, and the annual output is now upwards of two hundred thousand dozens of hats per annum.

Farther up the stream and about half a mile easterly of the Common is an extensive foundry and machine-shop owned and conducted by Mr. L. S. Heald. This business was established in 1830 by Stephen Heald. Previous to this time a grist-mill and another small building had been erected, in the former of which wood-turning was carried on, Charles Rice having improved the water privilege by constructing a more extensive dam and excavating another pond and canal that he might get out carriage wood-work by machinery. Stephen Heald, who came to town in 1826 entered his employ, poor in purse but full of energy; soon afterwards engaging in the iron business, he built up a considerable establishment, where he was successful. In 1850 all of his shop buildings were destroyed by fire and his capital swept away. By the encouragement of individuals he was induced to rebuild, which he did on an enlarged scale, and with better accommodations found his business increasing. In 1865 two of his sons became co-partners with him. The manufacture of agricultural implements was one of their specialties in which they did a large amount of work. Wood-working and other machinery of various kinds have been an extensive part of their manufactures, which have found a market in remote as well as near sections of the country. About these works a pretty little village sprang up, which for many years has been known as Heald Village. At Mr. Heald's death, in 1887, at the age of nearly eighty-eight years, the larger part of the property passed into the hands of his son, L. S. Heald, who carries on the works. Among the agricultural implements that have been made here was a hay-tedder, invented by Mr. E. W. Bullard, of this town, which was the first machine ever constructed for turning hay in the field. Amongst other machinery Mr. Heald is now making an improved tedder of his own invention.

Wagon manufacturing has been another branch of industry in this vicinity; the making of scythes by two different establishments at the same time formerly gave employment to a number of hands, but these trades have passed from among us.

About twenty-five years ago a horse hay-rake, the invention of S. R. Nye, of this town, was made here to a considerable extent, but, partly on account of the breaking away of the reservoir, this business was discontinued here. Fifteen years ago another horse-rake, the combined invention of C. M. Lufkin, and Charles G. Allen of Barre, was placed upon the market, since which time Mr. Allen has built up an extensive plant, and is successful in his invention and manufacture. Each year a large number of these rakes are made, finding a market in all the New England and some of the other States. Other industries on this stream are planing and saw-mills.

In the north part of the town, known as Rice Village, the wagon-making, carried on for many years by Charles Rice and others, was from its extensiveness an important factor here, but for the past few decades nothing has been done in this line. Near the centre of the town the manufacture of packing boxes and mattresses, and of preparing palm leaf for braiding into hats was very prominent; of these the mattress business alone remains with us.

From the location of Barre, it was, before the days of railroads, a prominent thoroughfare for the stage-routes from Boston to New York, Albany, Keene, Brattleboro' and other places; prominent among those old-time drivers, which was then considered a responsible berth, was the late Hon. Ginery Twichell. Coming here a young man, about 1830, full of energy, genial, affable and always thoroughly reliable, he made friends of all, and always had a deep interest in the town and its welfare. To him the town was indebted to some extent for better accommodations for travel. Deeply interested in the railroads projected around us, he left the staging business and entered the employ of the Boston and Worcester Railroad, where he was soon after chosen as its superintendent, and afterwards elected to its presidency. On the consolidation of that road with

Luke Adams

the Western, he retired for a while from active railroad life, but never lost his interest in it, and it was one of his hopes that Barre should be connected with the cities by steam communication. Having chosen Brookline as his residence, he was elected to the national House of Representatives from the Congressional district in which he resided, where he served a number of years, greatly to his own honor and that of his constituents. On his retirement from Congress his active spirit led him to assume the presidency of a short line of railroad, the Boston, Barre and Gardner, then struggling under many difficulties. Always a friend to Barre, in preceding years he had advocated the construction of a road to and through this town, and it was due somewhat to him that our people began to consider this matter so early as they did. As early as 1840 the subject began to be agitated here. In 1845 the town voted to raise a sum not exceeding three hundred dollars, for the survey of a route from Worcester through this town to the Miller's River. This route being found impracticable, the matter rested for a few years. About 1850 the agitation again began, this time in connection with towns southerly of us. A line was considered, under the name of the Ware River Railroad, to extend from Palmer to Winchendon, but, mainly through the opposition of the Western road, this road was not constructed for a number of years. A charter was obtained, and renewed from time to time as circumstances demanded. The first section, from Palmer to Gilbertville, was built in 1869, and in 1870 ground was broken in Barre for its extension to Winchendon. The work of grading and track-laying progressed but slowly, but the road was at last completed, and in October, 1873, it was opened for travel to Barre Plains. In 1854 the town voted to petition the Legislature for permission to loan its credit to the amount of five per cent. of its valuation for aiding in building a railroad from North Brookfield to Barre; the necessary surveys were made, but for want of sufficient encouragement the scheme was abandoned.

In 1847 a company was chartered under the name of the Barre and Worcester Railroad Company. This road was intended to run from some point on the Worcester and Nashua road to some convenient place in the centre of Barre. This project was kept alive by renewals of its charter, but when it was constructed, in 1870–71, it ran from Worcester to Gardner.

In 1869 the town became deeply aroused to the necessity of a railroad, and entered with much enthusiasm into the project of the Massachusetts Central Railroad, and, to further aid the enterprise, took stock of the company to the amount of ninety thousand dollars, or five per cent. of its valuation, while individuals took about fifty-five thousand dollars' worth additional. From lack of necessary funds this road, which was to extend from a point on the Boston and Lowell road near Boston, passing through Barre and forming a "through line" to the West, was not constructed for a number of years. Its financial troubles were great, but finally becoming reorganized under the name of the Central Massachusetts Railroad, it was completed, and in December, 1887, trains commenced running from Boston to Northampton, although passenger trains had run from Boston as far as Ware in July.

The culture of the town has always been noteworthy. In May of 1834 a weekly newspaper, with the name of the *Farmer's Gazette*, was established by C. C. P. Thompson. He continued as its proprietor until his death, a few years afterwards, when it passed into the hands of Albert Alden, the name being now changed to that of the *Barre Gazette*. Soon afterwards Walter A. Bryant assumed its ownership and management. In 1844, the political feeling running high, the *Barre Patriot*, upholding the tenets of the opposite party, was established by his brother, N. F. Bryant. Both of these papers flourished for several years, but about 1856 they were merged in one, under the name of the *Barre Gazette*, and since then it has prospered. It is now in its fifty-fifth volume, and under the ownership and control of Henry H. Cook, although there have been two or three changes of proprietorship since the consolidation of the two papers.

In October, 1858, N. F. Bryant issued a magazine with the title of the *Household Monthly*. This was discontinued at the end of a year and a half. Previous to this he had published the *Wachusett Star*. This continued but about a year. *Bryant's Messenger* was another paper, of short duration, that was issued.

In 1866 R. W. Waterman commenced the publication of the *Worcester West Chronicle*. After issuing it here for about one year the establishment was removed to Athol. Various amateur journals have been put forth, but these were ephemeral.

In 1888 the *Central County Courier* was introduced, under the management of S. H. Ingersoll. This paper is printed in one of the neighboring towns, but has a creditable foothold here.

Previous to 1857 we had a small library, but under no competent management. In that year Samuel Gates, a farmer of small means, left by his will five hundred dollars to the town for a free public library, on condition that an equal amount should be given by the town. This condition was complied with. Cases were obtained for the books and the unexpended balance of the town's appropriation added to Mr. Gates' bequest increased the fund to seven hundred dollars. This was placed in the town treasury, and the interest of it, at six per cent., is annually expended for books.

In 1866 a Central Pacific Railroad bond of the denomination of one thousand dollars was given to the library by a native of Barre, the income of which was to be used for books. For a number of years the library had its home in the post-office rooms, and in time outgrew its limits.

In 1885 the Barre Library Association was incor-

porated, one of its objects being to procure a building suitable for the library and for kindred purposes. In 1886 Mr. Henry Woods, a native of Barre, purchased land and erected thereon, at an expense of upwards of twenty thousand dollars, a brick building which, under the name of the "Woods Memorial Library Building," commemorative of his deceased parents and brothers, and as a token of his kindly and substantial interest for the welfare of the town, he presented to the association, this corporate body holding it in trust for the benefit of the whole community. He also established the "Edwin Woods Fund" of five thousand dollars, the annual income of which (two hundred and fifty dollars) is to be expended for books of permanent value.

The library, well arranged and cared for in its new home, now numbers upwards of thirty-five hundred volumes, and is pronounced a valuable collection. In connection with the library proper are a reading-room, rooms for the directors of the association, for assemblies and for a museum.

The agricultural interests of the town have always been active. Large amounts of butter and cheese have been made in previous years. There are two cheese-factories or establishments for the manufacture of cheese, their aggregate capacity being upwards of two thousand pounds per day. These are temporarily closed, the farmers considering it more to their pecuniary advantage to send their milk to the Boston market, it being transported thither by both of our railroad corporations.

An agricultural society, with the name of "Worcester West," was chartered and established in 1851. It holds its annual fair the last Thursday of September, and is one of the best, if not the best, in the State. It has extensive and well-arranged grounds, on which is a half-mile track for exhibiting and speeding horses, and a large building for display and for dining purposes. The society is free from debt and offers annually for premiums upwards of fifteen hundred dollars.

The town has a national bank, with a capital stock of one hundred and fifty thousand dollars, and a savings bank, each of which is in a prosperous condition. The telegraph and telephone furnish instantaneous communication with the great centres of business and commerce. Our postal accommodations are good, three through and two local mails arriving and departing daily.

There are two hotels at the centre of the town and another, to be more extensive, in process of construction, which is under contract to be open for business early in 1889. At Barre Plains is another hotel. The town is noted for its temperance and good order; no intoxicating liquors, except for medicine, are allowed to be sold.

In 1885 the population of the town was not so large as in 1880, on account of the temporary suspension of manufacturing in the southern portion. Since then the cotton industry has been resumed and the population has increased. At different periods the population has been as follows: In 1776, 1329; 1790, 1613; 1800, 1937; 1810, 1971; 1820, 2077; 1830, 2503; 1840, 2751; 1850, 2976; 1855, 2787; 1860, 2973; 1865, 2856; 1870, 2572; 1875, 2460; 1880, 2419; 1885, 2093.

On a sightly eminence, about two miles southerly of the centre, is the Almshouse, with which is connected a large farm for the support of the town's poor. This house was built in 1873, in place of one destroyed by fire the same year. Its size and style of architecture attracts much attention, and the stranger to the town would receive no intimation from its appearance as to the purposes for which it is used, but would rather consider it the residence of some prosperous farmer. The number of pauper inmates is very few, the general thrift and temperance sentiment of the people acting as a preventive of pauperism. The farm for the support of the poor was purchased in 1844, but has since been enlarged by obtaining an adjoining farm. Previous to 1844 the poor had been cared for in families, bids for their support being received by the town, and the lowest offer for their maintenance was accepted, the party taking them being expected to furnish their board and lodging, clothing, necessary medical attendance and nursing.

In addition to several literary societies or gatherings, the town contains a lodge of Free Masons, of the Grand Army of the Republic, of Good Templars and a Grange, P. of H.

From the elevated location of the town and its beautiful scenery and surroundings, its health is greatly enhanced. Probably no town in the Commonwealth has so large a percentage of old people as Barre; men and women from eighty to ninety years of age are not uncommon, and there live here to-day, hale, active and well-preserved, two persons in the ninety-sixth year of their age. In 1867 James Piper died at the age of nearly one hundred and five years; in 1872 the death of Mary A. Boney is recorded at the age of one hundred and three, and in 1888 Timothy Bacon died in the one hundred and second year of his age. If we turn to the record of deaths for the past one hundred years, we find the same remarkable longevity as now. The most notable instance of this is in the families of two brothers, who came here about 1750, Nehemiah and Jonathan Allen. Jonathan lived on the same farm and with the same wife for over sixty years; Jonathan sat out the first orchard in the town, having brought from Sudbury forty apple trees and a young wife on the back of his horse; he died at the age of ninety-two, his wife at eighty-seven; they had six children, whose average age at death was eighty years. This farm has never passed out of the Allen family, it now being in the possession of George E. Allen, the great-grandson of Jonathan; on this farm it is said that the fourth framed house in town was erected, but this is not now standing. Nehemiah Allen had ten

P. W. Harwood.

Truly Yours
Chas. A. Robinson

children, the oldest of whom died at the age of ninety-six, the youngest at seventy-eight; their average age at death was eighty-seven. In view of the remarkable longevity of our people, now and in former years, the compiler of this history can desire no better verification of the healthfulness of our surroundings than these advanced ages will testify to. But younger and more vigorous energies are not wanting, and as in the years past we have built up a thriving, healthy and attractive town, so in the time to come will we add to what has been done and enlarge and render still more beautiful that which has been bequeathed to us.

BIOGRAPHICAL.

LUKE ADAMS.

Luke Adams, who was one of Barre's most substantial farmers, was born in New Braintree, January 20, 1801; he was the son of Jonathan Adams, formerly of Northboro', and Dorothy, daughter of Dr. Edward Flint, of Shrewsbury. His parents came to the adjoining town of Barre in 1808, and located upon the farm in the southern portion, which is now the residence of his son, Austin F. Adams. Mr. Adams' father dying when he was but about twelve years of age, the farm passed into the management of strangers' hands, by whom it was carried on for several years. Mr. Adams lived with his mother and sister during this time, attending the common school, and obtaining such an education as the instruction of those days could furnish. At the age of eighteen that spirit which marked his after-life began to assert itself; purchasing stock and farming implements, he began farming for himself on the old farm, although owning but a half-interest in the place. At this time the buildings were out of repair and the land badly run down; with this discouraging outlook he began his life-work in earnest, and met with signal success. He soon erected new buildings, and so improved the farm that its capacity and value were much increased. He took a great interest in all practical farm machinery, and was among the first to make use of the tedder, spreader-cart, horse-rake, etc.; it was upon his farm that the inventor of the first successful tedder experimented with his invention, and by him the inventor was financially aided in obtaining his patent. Mr. Adams was conservative in his operations, firm and decided in his opinions, and of sound and practical judgment. He was a valued member of the Boards of Selectmen, Overseers of the Poor and Assessors, and a trustee for many years of the Barre Savings Bank; he filled many places of trust and responsibility, but never neglected his farm, which to-day ranks high. The utmost confidence was placed in his sound judgment and strict integrity. He died October 25, 1884, leaving a widow, a son and daughter.

PETER M. HARWOOD.

Peter Mirick Harwood was born in Barre June 10, 1853. His ancestry in direct Harwood line is Peter (1804), Peter (1763), Daniel (1736), David (1708), David (1668) and John (1630), who is supposed to have been a son of Henry, who came from England in fleet with Winthrop. His mother, whose maiden-name was Eunice Jones Mirick, was a descendant of Abram and Eunice (Jones) Garfield, who were also ancestors of the late President Garfield.

Mr. Harwood's early days were spent on the farm where he now lives. He attended the district school, the Barre High School and the Massachusetts Agricultural College at Amherst, from which he was graduated in 1875. While in college he had the honor of winning the first Farnsworth Rhetorical gold medal. At the death of his father (1876) he assumed the management of the homestead, and began business life as a farmer and breeder of fine stock. In 1877 he was elected a member of the Board of Selectmen, being the youngest man ever on the board. In 1879 he was made a member of the School Board; again elected in 1884, he has held that office ever since, being its chairman three years. He was lecturer of Barre Grange, P. of H., in 1877, '80, '81 and '82, and master in 1883, '84 and '85, during which period the organization reached the largest membership in its history; he was lecturer of the Massachusetts State Grange in 1886 and '87; he was secretary of the Massachusetts Agricultural College Alumni Association for several years, and its president in 1886–87, and presided at the great banquet on the occasion of the twenty-fifth anniversary of the college. He was for several years a director, and in 1887 and '88 president of the Barre Central Cheese Company, and president of Worcester County West Agricultural Society in 1887 '88 and '89. He married Mary Ann Wallace December 13, 1884, from which union two children have been born,—Eunice Frances (July 18, 1886) and Mary Louisa (February 29, 1888). Mr. Harwood has been engaged for several years in the breeding of Holstein-Friesian cattle, and has developed one of the finest herds in the State. He enjoys a wide and honorable reputation, both as a public officer and as a business man.

CHARLES ROBINSON.

Charles Robinson is a native of the town of Barre, where he was born July 29, 1834. His early days were spent on the farm; at the age of seventeen years he obtained a position in a general country store in his native town as a clerk, attending school in the mean time. Leaving Barre in 1856, he started his business life in the dry-goods and grocery business in Wilmington, of this State, where he remained for about two years. Not finding the business congenial to his taste, he returned to Barre, and began the manufacture and sale of boots and shoes, in which he continued until 1862, when he enlisted in the Fifty-fourth

Regiment Massachusetts Volunteers, from which he was soon transferred to the Forty-second Regiment. From this regiment he was detailed into the Engineer Corps, where he did efficient service as pontonier at Donaldsonville, Port Hudson and other places. At the expiration of his term of service he returned to Barre and re-engaged in the boot and shoe business. In 1871 he resumed farming, making market-gardening his specialty, and followed this for about ten years. In 1875 his attention was drawn to the superiority of the Holstein Friesian breed of cattle, and, after thoroughly investigating their merits, in 1880 engaged in breeding and raising this fine class of stock, since which time he has devoted his whole attention to it. His sales of these cattle, which are numerous, have been mostly in the New England States, although some of his stock has been sold to go as far south as North Carolina. His farm consists of about seventy acres, and is in a high state of cultivation and, with the aid of a silo, of which he is an enthusiastic advocate, will keep through the year fifty head of cattle. His crops are mostly corn and hay, which, with purchases of hay and grain, is fed out to a herd of one hundred and four Holstein Friesians, all of which are registered stock. A son of Mr. Robinson is associated with him in the business of breeding and managing this fine collection; besides these, four men are employed on the farm throughout the year.

CHAPTER LIII.

WEBSTER.

BY WILLIAM T. DAVIS.

In the town of Belper, Derbyshire, England, on the 9th of June, 1768, Samuel Slater, the founder of the town of Webster, was born. On the 28th of June, 1782, at the age of fourteen, he was apprenticed for seven years to Jedediah Strutt, a partner of Arkwright, to learn the business of manufacturing cotton. At about the time of the close of his apprenticeship he saw an advertisement of a premium for the introduction of Arkwright machinery into the United States, and being familiar with the methods used by his employer, he determined to seek his fortunes in the New World. On the 1st of September, 1789, he left Derbyshire for London, and on the 13th of the same month sailed for New York, where he arrived after a sixty-six days' passage. He at first engaged his services to the New York Manufacturing Company, but, after a few weeks, hearing of Moses Brown, of Providence, he wrote to that gentleman on the 2d of December, offering his services in the line of his trade. On the 10th of December Mr. Brown replied, inviting him to Providence, to which place he removed in January, 1790. On the 5th of April in that year he signed a contract to construct machinery after the plan of that with which he had become familiar during his apprenticeship. He soon became engaged in Pawtucket, R. I., in the successful manufacture of cotton-yarn, which was sold to be woven on hand-looms into cloth by domestic labor.

While engaged in this business, Mr. James Tiffany, of the town of Wales, in Massachusetts, then known as South Brimfield, became acquainted with Mr. Slater in his trading expeditions to Pawtucket, and at his request Mr. Slater took his two sons, Lyman and Bela Tiffany, into his employ. Through Mr. Tiffany, Mr. Slater was informed of the existence of water-power in what is now Webster, and in 1811 Bela Tiffany was sent to examine it. In a letter, dated May 27, 1811, Bela Tiffany wrote to Mr. Slater that he had found on the examined premises a two-story house unfinished, a grist-mill with two stones, a good saw-mill, a trip-hammer shop, thirteen or fourteen acres of land, one-half of which was swamp, and water-fall sufficient for all practicable purposes. He added that the region was a most benighted one, four miles from Oxford, three miles from Dudley and six and one-half miles from Thompson, in Connecticut. The price asked was $4000, and he wrote that he had secured a refusal of the property until the 20th of June. The result of the examination was the purchase of the property in the name of Bela Tiffany, and this purchase was followed by others, including a farm of two hundred and twenty acres, with a house and barn, nine and one-half acres bought of Elijah Pratt, and before the close of the year 1812 about two hundred and sixty acres more from various persons. In December, 1812, Mr. Tiffany transferred to Mr. Slater five-sixths of the property, retaining one-sixth as his own interest in the enterprise.

Mills were at once erected, and in 1813 Slater & Tiffany began in what is now Webster the manufacture of cotton yarn. At the same time a dye and bleaching-house was erected and placed under the charge of John Tyson, who took an interest in the business. Mr. Tyson died August 2, 1821, and his interest passed into the hands of Mr. Slater. Other purchases of land were made by Slater & Tiffany in 1814 and 1815, but on the 27th of November, 1816, during the depression in manufactures which followed the War of 1812, Mr. Tiffany sold his interest to Mr. Slater for $8400. During the war the company began the manufacture of broadcloth under the superintendence of Edward Howard, a Yorkshireman, who had at home been engaged in the business.

Up to 1821 the business of Mr. Slater was conducted on a stream which runs from Chaubunnagunganug Pond, but in that year, through Mr. Howard, a location was made on French River, where property was bought at a cost of twelve thousand dollars. In 1822 Mr. Howard transferred one-half interest to Mr. Slater for six thousand dollars, and in that year, while the woolen-mill was there building,

the old woolen-mill was burned. Additional purchases of land on French River were made by Slater & Howard between 1822 and 1824, including about four hundred and twenty-five acres, and still other purchases were made at later dates.

On the 2d of January, 1829, Mr. Howard sold his interest to Samuel Slater and his sons, George B. Slater and Horatio Nelson Slater, who thus, as Samuel Slater & Sons, became the owners of all the property which had been puchased since 1811, including all the water-power supplied by French River within the limits of what is now Webster and by Chaubunnagunganug Pond. During the year immediately following the purchase of the entire property the firm of Samuel Slater & Sons became involved in embarrassments, from which they were, however, happily and entirely extricated. Mr. Slater died in Webster April 20, 1835. He married, October 2, 1791, Hannah, daughter of Oziel Wilkinson, who died in 1812, and about 1817 he married Esther, daughter of Robert Parkinson, of Philadelphia. His children, all by his first wife, were: William, born August 31, 1796, died January 31, 1801; Elizabeth, born November 15, 1798, died November 4, 1801; Mary, born September 28, 1801, died August 19, 1803; Samuel, born September 18, 1802, died July 14, 1821; George Bassett, born February 12, 1804, died November 15, 1843; John, born May 23, 1805, died January 23, 1838; Horatio N., born March 5, 1808, died August, 1888; William, born October 15, 1809, died September, 1825; Thomas Graham, born September 19, 1812, died 1844.

After the death of Mr. Samuel Slater, in 1835, the business was carried on by George B. Slater and Horatio N. Slater until the death of the former, in 1843, after which date Mr. Horatio N. Slater conducted the business until his death, in August, 1888, and was succeeded by his son, Horatio N. Slater, who is the present manager. The three establishments belonging to the concern are the H. N. Slater Manufacturing Company at the North Village, incorporated in 1836, manufacturing cotton dress-goods, checks, lawns, silesias, jaconets, etc.; the H. N. Slater Manufacturing Company at the East Village, employed in the finishing of cambrics, silesias, cotton dress-goods, lawns, etc., and the Slater Woolen Company at the East Village, incorporated in 1866, manufacturing broadcloths, flannels, tricots and doeskins. In the three about fifteen hundred hands are employed. The cotton and woolen factories are located on French River and the finishing factory on the outlet from the pond. The water with which the inhabitants of the town and the Fire Department are supplied is furnished from a reservoir belonging to one of these establishments, through pipes of the town water-works, first laid in 1867, for which an annual rental is paid by the town.

Not long after the recovery of Mr. Slater from his embarrassments the question of the formation of a new town began to be agitated. His property and interests lay for the most part within a territory made up of a part of Dudley, a part of Oxford and what was called Oxford South Gore, which was a tract of land included in no incorporated town. There were eleven hundred and sixty-eight inhabitants living on this territory, whose wishes in the premises were expressed in a petition to the General Court, which may be found at length in another part of this sketch. An act of incorporation was passed March 6, 1882, of which the following is the text:

AN ACT TO INCORPORATE THE TOWN OF WEBSTER.

Sec. 1. Be it enacted by the Senate and House of Representatives in General Court assembled and by the authority of the same, That the territory in the Southerly part of the County of Worcester comprised within the following limits that is to say beginning at the southwest corner of said territory where the line between Massachusetts and Connecticut intersects French River; thence running easterly by said line to the southwest corner of Douglas; thence northerly by the line which divides Douglas from Oxford South Gore until it intersects the line between Oxford and Douglas; thence due west two and three-fourths miles and thirty rods to a stone monument about eighty-eight rods west of French River; thence Southerly in the direction of a stone monument in the line of Oxford and Dudley near the house owned by Daniel Greenwood and Samuel Slater to the middle of said river; thence southerly by said river to the first mentioned corner together with all the inhabitants dwelling thereon be and they hereby are incorporated into a town by the name of Webster and vested with all the powers, privileges and immunities and subject to all the duties and requirements of other incorporate towns agreeably to the constitution and laws of this Commonwealth.

Sec. 2. Be it further enacted, That the inhabitants of said town of Webster shall be holden to pay all arrears of taxes which have been legally assessed upon them by the towns of Oxford and Dudley before the passing of this act; and all taxes assessed and not heretofore collected shall be collected and paid to the treasurer of the towns of Dudley and Oxford respectively in the same manner as if the act had not been passed.

Sec. 3. Be it further enacted, That the said town of Webster shall hereafter be liable to pay two-seventh parts of the expenses necessarily to be incurred in the support of all paupers who at the time of the passing of this act were actually in need of relief and were receiving support from the town of Dudley and one-fourth part of the expenses so to be incurred by the town of Oxford in the support of paupers at present receiving relief from the said town of Oxford. And that in all cases of paupers who shall hereafter stand in need of relief as paupers whose settlements have been derived or obtained in either of the towns of Oxford or Dudley previous to the passing of this act the said paupers shall be supported by the town within the territorial limits of which such settlement was gained, the said town of Webster being required to support all such as have acquired or shall hereafter acquire a settlement within the territory herein described.

Sec. 4. Be it further enacted, That the said town of Webster shall be holden to pay and discharge two-seventh parts of all expenses which may accrue to the said town of Dudley in the construction of a county road leading from a point near the dwelling-house of Ralph Vinton to the line of Oxford, which the county commissioners for the county of Worcester have heretofore located and ordered to be wrought; and shall also pay and discharge two-seventh parts of all debts and obligations due and incurred by the town of Dudley before the passing of this act by virtue of any contract already executed and shall be holden in the same proportional amount for all legal liabilities heretofore incurred by the said town of Dudley not otherwise provided for in this act, Provided, nevertheless that all monies now in the treasury of the said town of Dudley or which may hereafter be paid into the same as the proceeds of taxes already assessed or of obligations now due or owing to the said town of Dudley shall first be applied to the payment of the debts and expenses and the discharge of the liabilities due from or incurred by the town of Dudley as aforesaid.

Sec. 5. Be it further enacted, That the bridge over French River near Preston's cotton-mill and the bridge on the same stream near Slater's cotton thread-mill shall forever hereafter be maintained and kept in repair by said town of Webster and that the bridge on said river near the line of the State of Connecticut shall be maintained and kept in repair by said town of Dudley; and that the said bridges in regard to all legal

liabilities shall be respectively deemed and taken to be within the limits of the town which by this act is required to maintain and repair the same.

Sec. 6. Be it further enacted, That of all state and county taxes which shall be required of said towns previous to a new valuation the said town of Webster shall pay thereof in the proportion in which the said town of Webster is liable as aforesaid to the payment of expenses to be incurred as aforesaid in the support of paupers now chargeable to the towns of Oxford and Dudley.

Sec. 7. Be it further enacted, That any justice of the peace for the County of Worcester, upon application therefor is hereby authorized to issue his warrant directed to any freeholder in the said town of Webster requiring him to notify and warn the inhabitants thereof to meet at such time and place as may be appointed in said warrant for the choice of all such town officers as towns are by law required to choose at the annual town meetings.

On the 27th of February, 1841, an act was passed by the General Court providing that "from and after the passage of this act the boundary line between Webster and Douglas is hereby confirmed and established as follows, viz.: beginning at Nipmuc corner on Oxford line; thence running south seven and a quarter degrees, east one thousand five hundred and seventy-eight rods to the Bald Hill monument on Connecticut line erected by the commissioners of Massachusetts and Connecticut in the year one thousand seven hundred and twelve."

The following is the text of the petition on which the act of incorporation was based:

To the Senate and House of Representatives of the General Court of the Commonwealth of Massachusetts.

The undersigned inhabitants of Dudley Oxford and Oxford South Gore so-called in the County of Worcester represent that they are residents within a territory containing about ten thousand acres of land bounded as follows beginning at the south west corner where the line between Massachusetts and Connecticut intersects French River thence Easterly by said line which divides the States to the south west corner of Douglas thence Northerly by the line which divides Douglas from Oxford South Gore till it intersects the line between Oxford and Douglas thence due west to French River and thence down said river to the piece of beginning that said Gore which is not within the limits of any municipal corporation contains about four thousand five hundred acres; that about three thousand five hundred acres are within the limits of Dudley and about two thousand acres within the limits of Oxford, that the whole population is supposed to be from fifteen to sixteen hundred from seven to eight hundred of which is in Dudley from five to six hundred in Oxford & from one hundred to one hundred and fifty in said Gore that said territory was rough and very thinly inhabited until the water-power afforded by said river and a large natural pond invited the enterprise of manufacturers and mechanics from which time it began to flourish vigorously and is destined undoubtedly to increase in capital & business and to afford at no distant period a support to a much more numerous population—that there are within said territory two religious societies each of which has a meeting-house also a post-office five cotton-mills three woolen-mills a machine-shop, five forge-shops, hoe & scythe-shop, a dyeing and bleaching establishment and six stores in all which extensive and active business is carried on, that most of said population is distant from Dudley from three to four miles—from Oxford from four to five miles, that the great public highways leading to Boston to Hartford to Providence and other large towns do not pass through Dudley or Oxford so that said population has little natural connection or connection in business with the villages in the centre of those places, that it is burdensome and inconvenient to travel so great a distance to attend town-meetings and for other town purposes that it would greatly promote the prosperity happiness and convenience of said population to be admitted to separate municipal privileges, as nearly one-half of said territory has hitherto been denied all participation in such rights and the other half is so situated as to be subjected to unreasonable expense and loss of time in obtaining them—that a separation would not be injurious to Dudley or Oxford as each would be left with a large population and territory. Your petitioners therefore pray that they may be incorporated into a town with the limits aforesaid or such other limits as you shall see fit to assign them. And as in duty bound will ever pray.

This petition was signed by George B. Slater and one hundred and fourteen others of Dudley, William Kimball and thirty-six others of Oxford, and Paraclete Morris and twenty-one others of Oxford South Gore. It bears no date, but was presented to the General Court in 1831, and referred, June 3d of that year, to the Committee on Towns. On the 8th of June that committee reported through its chairman, David Wilder, that a copy of the petition "be served on the town clerks of the towns of Oxford and Dudley, and be published three weeks successively in the *Massachusetts Spy* and *National Ægis*, two newspapers published in Worcester, and that Messrs. John Wyles of Brimfield, Elijah Ingraham of Pawtucket, and William J. Otis of Boston be a committee to view the premises at the expense of the petitioners and report to the next General Court. This report was accepted. and the matter went over to the Legislature of 1832, and the petition was then re-enforced by another dated December 31, 1831, and signed by Joseph Bracket and five others, who claimed to be residents in Oxford, Dudley and Oxford South Gore.

Another petition, dated Dudley, December 14, 1831, was presented to the General Court of 1832, of which the following is the text:

COMMONWEALTH OF MASSACHUSETTS.

To the Honorable the Senate and House of Representatives to be assembled on the first Wednesday of January, A. D. 1832:

The subscribers, inhabitants of the town of Dudley, in the County of Worcester, beg leave to represent to your honorable body that whereas George B. Slater and a number of other persons, inhabitants of the town of Oxford and Dudley, and Oxford South Gore, did, at the last session of the General Court of said Commonwealth, held on the last Wednesday of May last, present a petition, praying that all of that part of Dudley lying Easterly of French or Stony River, and a part of Oxford described in said petition, together with said Oxford South Gore, might be incorporated into a Town, and whereas there was an order of notice issued on said petition, returnable to the next General Court, to be held on the first Wednesday of January, then next following; we therefore humbly pray that if your Honorable Body shall see fit and proper to grant the prayer of the aforesaid George B. Slater and others, that the following described tract of land, lying in Dudley aforesaid, and westerly of the aforesaid River (containing by estimate eight hundred acres, bounded as follows), viz.: Beginning on the west bank of said River being at the southeast corner of the farm formerly owned by Nathan Ward, but now by Zera Preston and Joseph Scholfield; thence on the south line of said farm, westerly about eighty rods, to the southwest corner of said farm; thence northerly on the west line of said farm to the northwest corner of the same; thence in a northerly direction to the outlet of Peter Pond (so-called); thence in a straight line to a monument on Oxford old line, where Dudley projects northerly into Charlton; from thence, on Oxford old line, easterly about two hundred rods, to a monument northerly of Olney Esten, in Oxford; thence southerly, on Oxford line, to the River aforesaid, and down said River to the first-mentioned corner, may be incorporated into the same Town, and be a part thereof as fully and effectually as if the same had been included in the aforesaid petition. Our reasons for earnestly requesting that our petition may be granted are that we are owners of land on both sides of the aforesaid River; that we live from two and one-half to three and one-half miles from the centre of the Town in Dudley, where public business is done; that we are but from half a mile to a mile from the centre of population of the contemplated new Town, and where it is contemplated that the town business will be done. That three or four years since, we, together with a number of inhabitants on the easterly side of

said River, composing a large and respectable School District, erected a large and commodious stone school-house on the westerly line of said River; that if the Town is divided by said River, our School District will be so small that we shall receive but very little advantage of schooling. That our business is almost wholly connected with the first-mentioned petitioners, having very little intercourse with the Town of Dudley, most of us, that we are almost wholly connected, and attend religious meetings at the houses of public worship, east of said River, we therefore humbly beg that your Honorable Body will take this, our petition, under your consideration, and act thereon as you, in your wisdom, shall see fit and proper.

Signed by

JEPHTHAH BACON,
JOHN BROWN,
NATHANIEL LYON,
CHESTER CLEMANS,
GEORGE B. SLATER,
JOSEPH SCHOLFIELD,
PALASKI BACON,
JEPHTHAH BACON, JUN.,
WILLIAM WAKEFIELD.

On the 17th of September, 1831, a legal meeting of the inhabitants of the town of Oxford was held, and Ira Barton, Stephen Davis and Richard Stover were appointed a committee to confer with the committee appointed by the General Court, and a remonstrance against the petition of George B. Slater, presented by Mr. Barton, was adopted.

At the same date, a meeting of the inhabitants of Dudley was held, and a committee, consisting of George A. Tufts, Morris Larned, John Eddy, William Hancock and Joseph H. Perry, was chosen to oppose the petition for a new town. On the 14th of November, in the same year, another meeting was held in Dudley, and a remonstrance prepared by the committee chosen in September was adopted.

Another remonstrance was presented by Joseph Kingsbury, who represented himself to be a resident in the territory proposed to be incorporated, and asked that he, together with his estate, might remain in the town of Oxford.

The committee appointed by the General Court at the session of 1831 made a report dated September 30, 1831, which, on the 17th of January, 1832, was referred to the Committee on Towns of the General Court of that year. The committee stated that the territory within the towns of Oxford and Dudley and Oxford South Gore contained 39,943 acres, of which Oxford contained 18,250, Dudley 17,200, and the Gore 4,493. The territory included in the petition would take 1,350 acres from Oxford, 3,280 from Dudley, and the whole of the Gore, thus constituting a town of 9,123 acres, and leaving to Oxford 16,900 acres, and to Dudley 13,920 acres.

As regards population, they stated that Oxford contained 1900 inhabitants, Dudley 2155, and the Gore 134, making a total of 4189. The town petitioned for would take 312 inhabitants from Oxford, 722 from Dudley, and all the inhabitants of the Gore, making a total of 1168, leaving in Oxford 1588, and in Dudley 1433. They also stated that in 1731 a portion of the Gore had been annexed to Oxford, and in 1807 another portion, and that the school in the Gore was supported by voluntary contribution. The taxable property in Oxford in 1830 was $693,333, of which $90,200 belonged to the proposed town, and was owned—by Samuel Slater, $54,450; George and John Slater, $12,316. The valuation of real and personal estate in the Gore for the same year was $28,034. In the part of Dudley proposed to be included in the new town there were twenty-four freeholders, with real estate valued at $41,624.40; the Slaters owned real estate in it valued at $63,374, and the personal estate in that portion, including that owned by the Slaters, was valued at $53,886. The committee also stated that the inhabitants of the South Gore in 1831 petitioned for certain highway and school privileges analogous to those of incorporated towns, and that fourteen of the remonstrants were now petitioners for the new town. The committee stated in conclusion, "that, all things considered, the towns of Oxford and Dudley and Oxford South Gore are well calculated to constitute three convenient towns, and that the prayer of the petitioners ought, in the deliberate opinion of the committee, to be granted."

The Committee on Towns, in accordance with the recommendations of the foregoing report, reported the bill, the text of which has been already quoted, and the bill was duly passed, as before stated, March 6, 1832.

It is only necessary to refer in this sketch to that part of the town of Webster which was popularly known for many years as Oxford South Gore. The remaining portions of the town, prior to the incorporation of the town of Webster, will be appropriately treated in the histories of the towns of Oxford and Dudley. This Gore was simply a tract of land which had been included in grants to individuals, but in the formation of towns had never been included within their boundaries. In 1831, when surveyed under a resolve of the Legislature, it contained, as already stated, four thousand five hundred and ninety acres, was irregular in shape, and was bounded by lines running in seven different courses, and by the irregular margin of a part of Chaubunnagunganug Pond, which separated it from Douglas, Dudley and Oxford. It is largely covered by either woods or water, and possesses a soil which did not, in the creation of early towns, make it a desirable possession. On the 8th of December, 1731, a small portion of the Gore was annexed to the town of Oxford, in reference to which the following extract from the records of the General Court may not be without interest:

WEDNESDAY, December 8, 1731.

A petition of Isaac Larned, in behalf of the town of Oxford, showing that Josiah Kingsberry and Theodore Kingsberry live upon a farm adjacent to the said town of Oxford, and nearer to the meeting-house there than to any other meeting-house, and are very desirous to be annexed to the said town, Therefore praying that the said farm between the south end of Oxford village and Chaubunnagunganug pond so running westward till it comprehends all the said farm and the land of the said Isaac Larned lying east of the Road passing from Oxford to Woodstock, be annexed to the said town of Oxford, the said petition

being signed by the said Josiah and Theodore Kingsberry as approved by them.

In the House of Representatives read and ordered that the petitioners with their lands within mentioned, be and hereby are to all intents and purposes whatsoever annexed to the town of Oxford.

In Council read and concurred. Consented to J. BELCHER.

On the 6th of February, 1807, another portion of the South Gore was annexed to Oxford, as described in the following act:

An act to annex a part of a tract of land commonly called The Oxford South Gore, with the inhabitants and estates thereon to the town of Oxford.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, That Lemuel Cudworth, Craft Davis, Ezekiel Davis, David Fitts, Abijah Harris, Joseph Kingsberry, Ephraim Kingsberry, Samuel Kingsberry, Jeremiah Kingsberry, Jr., John Larned, John Larned the 3d, living on or being owners of a tract of land lying between the towns of Dudley, Douglas and Oxford, commonly called The Oxford South Gore, together with James Wallis, of Dudley, and all others, the inhabitants living on or owning lands in that part of said Gore hereby set off with their families and estates, although not particularly named in this act and without the line of the town of Oxford, as the same is described by the following bounds, be, and hereby are, annexed to and made a part of the said town of Oxford, viz.: Beginning at the line at the southeast corner between Dudley and Oxford, and running north thirty-four degrees west three hundred and twelve rods; thence east eight degrees north two hundred and ten rods; thence north eight degrees and twenty minutes west two hundred and thirty-two rods; thence east eighteen degrees north three hundred and eighty-eight rods; thence south two degrees and forty minutes west one hundred and thirteen rods; thence west two degrees and forty-five minutes north eighty-five rods; thence south twenty-one degrees and forty-five minutes west four hundred and thirty rods; thence south eight degrees and twenty minutes east eighty-nine rods to the corner first mentioned.

At the time of the incorporation of the town of Webster there were within its territorial limits a Baptist and a Methodist Episcopal Society. The Baptist Society had its origin at an early period in that part of Dudley which was included in the town of Webster, probably as early as 1744, though it was not formally organized as a religious body until October 26, 1814. It was then called the Baptist Church of Dudley, and consisted at the time of its organization of twenty-seven males and twenty-eight females. The organization was formed in the district schoolhouse by an ecclesiastical council consisting of Rev. P. Crosby, of Thompson, Conn.; Rev. William Bentley, of Worcester; Rev. James Boomer, of Charlton; Rev. Z. L. Leonard, of Sturbridge; Rev. James Grow, of Pomfret, Conn.; Rev. Luther Goddard and Messrs. Jeremy F. Tolman and John Walker. Rev. Mr. Bentley was chosen moderator, and Rev. Mr. Leonard scribe, and the sermon was preached by Rev. Mr. Grow. The members of the society as then organized were Smith Arnold, John Baker, Stephen Bartlett, Jr., Stephen Bracket, Thomas Brown, Esek Brown, Nathan Cody, Nathaniel Crosby, David Freeman, Michael Hill, Liberty Ide, William Leonard, John Larned, Eliakim Robinson, John Stockwell, John Stone, Gardner Stone, Jubal Wakefield, Aaron Wakefield, Joel Wakefield, Simeon Wakefield, Luther Whitman, William W. Webster, Nathan Wood, Luther Wood, Lucy Arnold, Lucina Bartlett, Catherine Bartlett, Fanny Bracket, Phebe Brown, Jerusha Bracket, Sally M. Crosby, Dolly Freeman, Taman Freeman, Araminda Freeman, Rosella Greenwood, Mary B. Hill, Abigail Humphrey, Lavina Ide, Abigail Larned, Sibyl Moore, Anna Robinson, Ruth Stone, Sarah Wakefield, Betsey Wakefield, Mehitable Wakefield, Mary Whitmore, Lucinda Wood, Charlotte Wood, Eunice Wood, Adamira Wood and Betsey Wright.

On the 8th of November, 1814, Mr. Stephen Bartlett and Mr. Nathaniel Crosby were chosen deacons, and on the 15th of June, 1815, Mr. Esek Brown, who had been a deacon of the Sutton Church, was invited to become pastor. The ordination was conducted in a tent, and Rev. Samuel Waters and Rev. Zenas L. Leonard were chosen moderator and scribe of the council. Rev. Mr. Leonard, then of Sturbridge, preached the sermon; Rev. James Grow, of Pomfret, made the ordaining prayer; Rev. Samuel Waters, of Sutton, the charge; Rev. William Bentley, of Worcester, gave the right hand of fellowship, and Rev. Isaac Dwinell, of Auburn, made the concluding prayer. In September, 1818, Mr. Brown removed to the Baptist Church in Lebanon, Conn., and until the spring of 1826 the society was without a pastor. At that time Rev. John B. Ballard was settled and served until the spring of 1828. Mr. Ballard was born in Dudley, October 25, 1795, and was a graduate of the Hamilton Theological Institute in 1820. Before his settlement in Webster he was settled in Masonville, where he was ordained November 13, 1823. After leaving Webster he was settled in Bloomfield, Conn., and for thirteen years he was the agent of the American Sabbath-School Union. He died in the city of New York, January 29, 1856, while in the service of the Tract Society. In the year of his settlement the first meeting-house was erected and dedicated on the 26th of December of that year, on which occasion Elder Jonathan Going, of Worcester, preached the sermon.

In 1828 Rev. Joshua Eveleth was ordained and served one year, when he was succeeded by Rev. Hubbard Loomis, who also served one year. Mr. Loomis had been for twenty-four years a settled Congregational minister in Wellington, Conn., and in 1832, after leaving Webster, he founded the Theological Seminary in Alton, Illinois. Rev. Thomas Barnett, a native of Belchertown, succeeded Mr. Loomis in 1830, and served two years and five months. During his pastorate Webster was incorporated, and the church became by name the Baptist Church in Webster. In December, 1832, Rev. Abiel Fisher was ordained and served one year and six months. Mr. Fisher was born in Putney, Vermont, June 19, 1787, and graduated at the Burlington University in 1812. He studied theology with Rev. Nathaniel Kendrick, of Middlebury, Vermont, and was licensed to preach June 18, 1813. In January, 1816, he was ordained pastor in Bellingham, where he served twelve years. In September, 1828, he went to West Boylston, where he preached three years, and then to Sturbridge.

After leaving Webster he was settled in Pawtucket, Rhode Island, and Swansea and Sutton, and died at West Boylston, March 26, 1862.

In April, 1834, Rev. James Grow was settled and remained one year. Mr. Grow died in Thompson, Conn., March 17, 1859, at the age of ninety years. Rev. Loomis G. Leonard, a graduate of the Newton Theological Institute, succeeded in September, 1836, and served six years and seven months. He was dismissed, at his own request, March 3, 1843, and removed to Thompson, Conn., and afterwards to New London, and to Zanesville, Marietta and Lebanon, Ohio. Rev. John F. Burbank was settled in April, 1843, and served three years and five months. He graduated at the Newton Theological Institute in 1840, and died in Worcester November 22, 1853, at the age of forty-two years. Rev. Lyman Jewett, also a graduate of the Newton Theological Institute, succeeded Mr. Burbank, in March, 1848, and Rev. Joseph Thayer, of South Sutton, followed, in April, 1849. Mr. Thayer afterwards was settled as a Free-Will Baptist minister in Mendon, and finally removed to Minnesota. Rev. Frederick Charlton, of Plainfield, was settled in April, 1850, and served three years. After leaving Webster he removed to Wilmington, Del., and finally was settled in Sacramento, Cal. In April, 1853, Rev. George W. Dorrence, who had been a chaplain in the navy, was settled, and preached two years, followed in March, 1856, by Rev. J. L. A. Fish, who served seven years and three months. Mr. Fish was a graduate of the Newton Theological Institute. He resigned in June, 1863, and removed to East Tisbury. In April, 1863, Rev. Charles W. Reding was settled, and preached six years, followed by Thomas T. Tilman, in August, 1869, who still remains. During the pastorate of Mr. Reding the present stone meeting-house was built at a cost of $31,067. During his pastorate also the fiftieth anniversary of the formation of the society occurred on the 30th of October, 1864, on which occasion he delivered a commemorative address.

The Methodist Episcopal Church was organized in September, 1823. Samuel Henderson and John McCausland came from Ireland and settled within the territory afterwards included in the town of Webster. They established class meetings, and in the same year founded a society together with Samuel J. Booth, William Archer, Parsons Tourtellot, Olney Esten, Ebenezer Plummer, William Harbenson, William Hurd, Hezekiah Davis, Calvin Aldrich, Charles Wait, Henry Davis, John Dixon, William Andrews, Daniel Dwight, Oliver Adams, Jr., and Jeremiah Upham.

Rev. Elias Marble was settled as the first minister. His successors were as follows:

1825. Rev. John W. Hardy.
1826. Rev. John W. Chase.
1827. Rev. Heman Perry.
1828. Rev. George Southerland.
1829. Rev. Isaac Bonny.
1830. Rev. John Lovejoy.
1831. Rev. O. Robbins.
1832. Rev. Peter Sabin.
1833. Rev. Isaac Jennison.
1834. Rev. Ira M. Bidwell.
1835. Rev. Jonathan Cady.
1836–37. Rev. Isaac Stoddard.
1838–39. Rev. Joseph A. Merrill.
1840. Rev. Isaac Sanbourn.
1841–42. Rev. Abra'm D. Merrill.
1843–44. Rev. Leonard B. Griffin.
1845–46. Rev. Mark Staple.
1847–48. Rev. C. S. McRedding.
1849–50. Rev. Joseph W. Lewis.
1851–52. Rev. D. E. Chapin.
1853–54. Rev. Union Ward.
1855–56. Rev. Samuel Tupper.
1857–58. Rev. J. S. Haniford.
1859. Rev. Abraham S. Dobbs.
1860–61. Rev. Pliny Wood.
1862. Rev. Joseph C. Cormack.
1863–64. Rev. Cyrus L. Eastman.
1865. Rev. James W. Murray.
1866–67. Rev. Edward S. Best.
1868–70. Rev. A. O. Hamilton.
1871–72. Rev. Le Roy S. Brewster.
1873–74. Rev. Wm. J. Pomfret.
1875–76. Rev. Daniel Richards.
1877–79. Rev. S. B. Sweetser.
1880–83. Rev. Samuel Jackson.
1883–85. Rev. Charles F. Rice.
1885–88. Rev. W. E. Knox.
1888. Rev. T. B. Smith.

The first meeting-house of this society was erected in 1828 and dedicated June 29th of that year. Its cost was $1,467.40. A second and larger meeting-house was built in 1833 and dedicated January 14, 1834. Its cost was $4,626. A third meeting-house, larger and more commodious as the growing necessities of the society demanded, was built at a cost of $22,000, including land, organ and fixtures, in 1866, and dedicated September 12, 1867.

The above two societies—the Baptist and the Methodist Episcopal—were the only religious societies existing in Webster at the date of its incorporation, March 6, 1832. The first religious society organized after its incorporation was the First Congregational Church and Society, which was formed June 13, 1838, with a membership of forty-one persons, most of whom had previously been attendants on public worship in the Baptist Church. At the first meeting of this society Jonathan Day was chosen moderator, and James J. Robinson, clerk, and George B. Slater, Dexter W. Jones and Lyman Johnson, assessors and standing committee. Its first services were held in the old meeting-house of the Methodist Episcopal Society, where they continued to be held until the present meeting-house was built in 1842. The new house of worship soon proved too small for the needs of the society and was enlarged in 1849.

The first minister of the society was Rev. Sidney Holman, who was installed October 31, 1838, and served until May 4, 1840; Rev. Hubbard A. Reed served from May 6, 1841, to November 5, 1844; Rev. Lorenzo Cary from August 14, 1845, to June 29, 1852; Rev. S. C. Kendall from March 29, 1854, to March 30, 1857, and from November 8, 1860, to July 22, 1868; Rev. David M. Bean from December 10, 1868, to May 25, 1871; Rev. J. S. Batchelder from December 6, 1871, to September 7, 1874; Rev. H. M. Rogers from December 9, 1874, to September 28, 1876; Rev. B. F. Parsons from 1876 to 1881; Rev. John G. Leavitt from 1881 to his death, in October, 1886; Rev. W. W. Sleeper from 1887 to his resignation, in August, 1888. The society is at present, in October, 1888, without a pastor.

The Catholic Church and Society was organized in 1844, and placed under the charge of the pastor of St. John's Church at Worcester. The foundations of the St. Louis Church edifice were laid in 1853, while

the society was under the ministrations of Rev. Mr. Gibson, and cost eight thousand dollars. It was built of brick, but soon proving too small, was enlarged in 1865 at a cost of twenty thousand dollars, and soon after a parish-house was built at a cost of seven thousand five hundred dollars. Mr. Gibson was succeeded by Rev. Napoleon Magnault, and in 1858 Rev. James Quan became pastor and still remains. The large number of Catholic French belonging to the church, who could with difficulty speak and understand the English language, soon rendered the formation of a new society desirable, and in 1870 the French-speaking portion of the St. Louis Church organized the Parish of the Sacred Heart in the old Methodist Episcopal meeting-house, which they bought and enlarged, with Rev. J. Cosson as their pastor. Mr. Cosson left in 1871, and was succeeded by Rev. A. A. Landry, of North Adams, who remained until his death, in 1885. He was succeeded by Rev. H. H. Landry in 1885, who was followed in 1887 by Rev. Joseph A. Legris, the present pastor.

The Webster Universalist Society was organized April 22, 1861, and on the 1st of May, 1864, Rev. George J. Sanger was ordained as its pastor. On the 2d of June, 1866, the society was incorporated under the General Laws. In that year and the next, their meeting-house was built at a cost of about twenty thousand dollars, and dedicated August 21, 1867. Mr. Sanger was followed in 1869 by Rev. J. W. Keyes, and in 1874 Rev. J. W. Moore was settled and served until 1877. In September, 1878, Rev. J. F. Simmons became pastor, during whose pastorate Mrs. Julia Clemens Murdock, a devoted friend of the society, died on the 27th of April, 1879, and gave to it by her will a bequest of several thousand dollars in value. Rev. Edgar W. Preble is the present pastor, and succeeded Rev. Mr. Simmons in January, 1887.

There is also a Polish Catholic Society, whose church was dedicated on the 1st of April, 1888, of which Rev. Franz S. Chalupka is the pastor.

The Protestant Episcopal Church of Webster held its first service in the town-hall at East Webster, July 18, 1869, with Rev. William H. Brooks, D.D., rector of Grace Church, at Oxford, as the officiating clergyman. On the 3d of January, 1870, a parish was formed under the name of the Church of the Reconciliation. On the 23d of January, 1870, the church held services in Webster Hall, and on January 30th in Good Templars' Hall, where it continued to hold services until April 10th of that year, when it occupied the Congregational Chapel, which it continued to occupy until its church edifice was erected. On July 18, 1870, the corner-stone of its church was laid on land presented by Mr. William S. Slater, and on the 3d of January, 1871, it was dedicated by ceremonies conducted by Right Rev. Manton Eastburn. At the laying of the corner-stone, Dr. Brooks officiated, on which occasion Rev. Thomas L. Randolph, of St. John's Church, of Wilkinsville, made the prayer, Rev. William N. Ackley, rector of Trinity Church at Newtown, Conn., delivered the address, and Rev James W. Clark, of St. Philip's Church, at Putnam, Conn., made the concluding prayer.

Rev. Doctor Brooks, the rector of Grace Church at Oxford, held one service in Webster, after the formation of the society, until October 1, 1869, and after that date until April 1, 1870, he devoted his whole time to the interests of the society at its urgent request. On the 19th of March, 1870, he was called to the rectorship, and accepted the call at the termination of his temporary service on the 1st of April, serving as rector until his resignation, April 2, 1872. He was a graduate of the Theological Seminary of the Protestant Episcopal Church of Virginia, July 15, 1852, and was ordained deacon by Right Rev. William Meade, D.D., in Christ Church, Alexandria, Virginia, the next day. On the 13th of January, 1855, he was ordained priest by Right Rev. Alfred Lee, D.D., in St. Thomas' Church, Newark, Delaware. Before his pastorates in Oxford and Webster he was for a time rector of Christ Church, in Plymouth, and is now rector of St. Andrew's Church at Hanover, Mass.

Rev. Roger S. Howard succeeded Dr. Brooks, and resigned in January, 1879. He was followed in 1880 by Rev. Langdon C. Stewardson, who served until 1884, when Rev. A. U. Stanley officiated until 1887, who was succeeded by Rev. J. Eldred Brown, the present pastor.

The Reformed Methodist Church of Webster was organized in 1872, under the direction of Rev. Harvey Wakefield. In 1872 its meeting-house was built at a cost of two thousand five hundred dollars, and dedicated January 1, 1873. On the occasion of its dedication the dedicatory prayer was made by Rev. Mr. Wakefield, and the sermon was delivered by Rev. William H. Kirk. Mr. Wakefield still has charge of the pulpit of this society.

The Second Advent Society was established in 1883. Rev. J. E. Cross served as its pastor from 1884 to 1886. Rev. D. Matherson from 1886 to 1887, and its present pastor is Rev. George D. Smith.

The public schools within the territory of Webster were far from being in a satisfactory condition at the time of its incorporation. At a town-meeting held April 23, 1832, a committee consisting of the Board of Selectmen, with Dexter Rawson and Turner Cudworth added, was appointed to divide the town into school districts. At a meeting held on the 28th of May, the committee reported the formation of five districts, as follows:

No. 1. All that part of the town formerly a part of Oxford, and east of French River, including the Oxford South Gore, which lies north of the farm of John Rawson, and a line extending easterly to the Douglas line.

No. 2. All the remainder of the Gore bounded east by Douglas, south by District No. 1, west by what was Dudley east line, and south by the Connecticut line.

No. 3. That part of Dudley bounded east by what was the Gore west line, north by the road leading from Unionville to the four corners near the house of Rev. Thomas Bassett, west by the road leading southerly from said four corners to the Thompson road, and by said Thompson road, including the farm on the west side thereof and adjoining the same, and south by the Connecticut line.

No. 4. The territory bounded east by District No. 3, north by the road leading from the Thompson Road, west to the central turnpike and a line extending therefrom in the same direction to the French River, and west by said river and south by the Connecticut line.

No. 5. The remainder of the town bounded east and north by Districts 3 and 1, including the territory that was formerly a part of Oxford, situated on the west side of French River, west by said river and south by Districts 3 and 4.

The district system was abolished in 1867 by law, and since that time a steady improvement has marked the schools of the town. There are now fourteen schools besides an evening school. There are a High School with an average attendance of 47, a High Grammar School with an average attendance of 34, the No. 1 Centre School with an average attendance of 34, the Fenner Hill School with an average attendance of 29, the Prospect Street Intermediate with an average attendance of 27, the Prospect Street Primary School with an average attendance of 31, a Grammar School with an average attendance of 34, the Gore School with an average attendance of 10, the Kingsbury School with an average attendance of 7, the First Primary, No. 4, with an average attendance of 37, the Second Primary, No. 4, with an average attendance of 38, the Intermediate, No. 4, with an average attendance of 29, the Grammar Room, No. 4, with an average attendance of 33 and the North Village School with an average attendance of 29.

To support these schools appropriations were made at the annual meeting of 1888 of $2000 for the High School, $4200 for the common schools, $1000 for school incidentals, $300 for books and supplies and $400 for evening schools.

The appropriations for other purposes made at the same meeting, which may properly be mentioned in this place, were: For roads, $2200; sidewalks, $1500; repairing sidewalks, $600; Fire Department, $2000; water supply, $565; hook-and-ladder truck, $1000; Memorial Day, $100; street lights, $1500; salaries, $1500; interest, $500; insane poor, $4400; Poor Farm, $1200; railings for dangerous places, $150; snow, ice and gutters, $300; town incidentals, $2000; buildings at town farm, $2600, and repairs of Harris Street, $1000—making the total appropriation for the year $30,265, or a valuation of $2,290,844.

During the War of the Rebellion the inhabitants of Webster faithfully performed their duty in the enlistment of soldiers and in the appropriation of money. There was no military company within the limits of the town and consequently the patriotic rather than the mere military spirit of the young men inspired enlistments in the service. These enlistments began at the earliest period of the war and were kept up with vigor as long as demands were made on the town for recruits. At the close of the war it was found that Webster had furnished three hundred and sixty-seven men, a surplus of fifty-seven over its required quotas.

On the 29th of April, 1861, at a legal town-meeting, it was voted "to pay each volunteer, belonging to Webster, five dollars a month while in active service, and to his wife and mother, dependent upon him for support, one dollar and a half per week, and to each child fifty cents per week, and if the family should need more the amounts to be increased at the discretion of the Selectmen." It was also voted to pay volunteers one dollar per day while drilling, the aid to families beginning when the soldiers were sworn into service. At the same meeting the sum of four thousand dollars was appropriated for the establishment of a war fund.

On the 6th of July, 1861, the town voted "to furnish the Slater Guards, then drilling, with uniforms preparatory to its entering the service as Company I of the Fifteenth Massachusetts Regiment of Infantry." On its departure a dinner and the sum of one thousand dollars were given to the men, and swords and belts to the officers. The ladies of the town gave also to each man mittens and socks, and William T. Shumway presented the company with a flag.

On the 5th of November the town voted "that we hereby tender our thanks to the Slater Guards for their bravery at the battle of Ball's Bluff." On the 10th of July, 1862, it was voted "to pay a bounty of one hundred dollars to each soldier enlisting for three years on the quota of the town." On the 8th of December, 1863, the sum of six thousand dollars was appropriated for a war fund and a like sum for recruiting purposes. On the 14th of July, 1864, it was voted to increase the bounty to one hundred and twenty-five dollars. The money appropriated by the town during the war for war purposes, exclusive of State aid, was $28,674.61, and the amount paid for State aid was $18,920.63.

The following is a list of the soldiers furnished by the town with the terms of their enlistments and the organization to which they belonged. The terms of enlistment of those not marked were, in each case, three years, those marked (1) enlisted for nine months; those marked (2) for one hundred days; those marked (3) for one year; and those marked (4) for three months.

Of the above list the following were either killed, or died while in the service:

Asahel Aldrich, killed at Cold Harbor, Va., June 2, 1864.
Harrison G. O. Aldrich, died at Newbern, N. C., 1864.
Henry L. Ammidon, killed at Antietam, Md., September 16, 1862.
Elisha T. Bigelow, died at Harrison's Landing, Va., July 7, 1862.
Thomas Blasland, died December 25, 1863.
William Brandis, killed at Gettysburg, Pa., July 2, 1863.
Dennis Breen, killed at Lynchburg, Va., June 18, 1864.
Lucius H. Briggs, killed at Antietam, Md., September 16, 1862.
Charles E. Buck, died September 27, 1862.
George Butler, killed at Antietam, September 16, 1862.
Henry Butler, died November 14, 1862.
Wm. K. N. Cady, died a prisoner.
John Cassidy, died at Hilton Head, August 5, 1864.
Frederick C. Childs, killed at Laurel Hill, Va., August 10, 1864.
William I. Converse, died a prisoner in Richmond, Va., February 13, 1862.
Marcus M. Corbin, died at Newbern, N. C.
Louis Dupey, killed at Cold Harbor, June 2, 1864.
Samuel Emerson, died at Antietam, September 26, 1862.
Charles G. Foster, died at Antietam, September 17, 1862.
John George, died a prisoner, 1864.
John Grady, killed at Gettysburg, Pa., July 3, 1863.
John E. Holland, died November 29, 1864.
Joseph Holland, died at Alexandria, Va., November 28, 1862.
William Kelley, died at City Point, Va., June 25, 1864.
Frederick Levoice, killed at Chantilly, Va., September 1, 1862.
Thomas P. Mungan, died of wounds received at Antietam, Md., October 17, 1864.
John Nichols, died a prisoner.
William H. Palmer, killed in the Wilderness, Va., May 6, 1864.
Edwin L. Parmenter, died of wounds received at Antietam, October 14, 1862.
Antoine Phillips, died at Andersonville.
Mitchell Prevost, killed at Malvern Hill, Va., July 1, 1862.
George O. Raymond, died of wounds received at Gettysburg, Pa., July 22, 1863.
Gottfried Reidman, died of wounds received at Antietam, Md., September 30, 1862.
John D. Reynolds, killed at Cold Harbor, Va., May 30, 1864.
Francis Sarturn, killed at Gettysburg, Pa., July 3, 1863.
Abraham Sargent, killed at Antietam, Md., September 16, 1862.
Joseph D. Scholfield, died at Fort Lyons, Va., February 16, 1863.
William Scott, drowned at Ball's Bluff, Va., October 21, 1861.
William L. Sholes, killed at Antietam, Md., September 17, 1862.
Albert H. Snow, died of wounds received at Gettysburg, Pa., July 10, 1863.
Frederick Soden, killed at Ball's Bluff, Va., Oct. 21, 1861.
Frederick Stanton, killed at Gettysburg, Penn., July 3, 1863.
Egbert M. Stevens, died Feb. 8, 1863.
James Stevens, killed at Ball's Bluff, Va., Oct. 21, 1861.
Alfred Tourtellote, died of wounds received at Antietam, Md., Oct. 25, 1862.
John Vickers, died Sept. 2, 1864.
Edward Warren, killed at Webster by the cars while in service.
Moses J. Warren, died of wounds received at Ball's Bluff, Va., Oct. 25, 1861.
Moses Wood, killed at South Mountain, Md., Sept. 12, 1862.

The first meeting of the town was held under a warrant issued by Charles Allen as justice of the peace, and directed to Jonathan Day, one of the freeholders of the town of Webster, requiring him to notify and warn the freeholders and other inhabitants of the town qualified to vote in the choice of town-officers to meet at the Baptist meeting-house on the 2d day of April, at two o'clock in the afternoon, to choose all necessary officers. The warrant was dated March 7, 1832. On account of the sickness of Judge Allen the meeting was called to order by Ira M. Barton, a justice of the peace, who read the act of incorporation and then put the question to the town, "Will you now proceed to the choice of a clerk?" which was responded to unanimously in the affirmative. Mr. Barton then read the law prescribing the qualification of voters, and the election followed, which resulted in the casting of one hundred and three votes, eighty-four of which were for Charles P. Baldwin, and nineteen for Charles Waite, and Mr. Baldwin was chosen.

The selectmen chosen at the meeting and at each annual meeting since may be found in the following list:

1832. George B. Slater.
John H. Day.
John Learned.
Benjamin Wakefield.
Nathan Cady.

1833. George B. Slater.
Samuel C. Butler.
Dexter Rawson.
Alanson Bates.
Charles Tucker.

1834. George B. Slater.
Samuel C. Butler.
Dexter Rawson.
Wm. Andrews.
John H. Day.

1835. George B. Slater.
Alanson Bates.
John Learned.
Wm. Andrews.
Parker Palmer.

1836. George B. Slater.
Samuel C. Butler.
Charles Yeomans.
Solomon Robinson.
Erastus Spaulding.

1837. J. P. Stockwell.
Charles Yeomans.
Alanson Bates.
Nathaniel Hunt.
Elisha Kingsbury.

1838. George B. Slater.
Nathan Cady.
Charles Yeomans.
Solomon Robinson.
Phinehas Houghton.

1839. Charles Yeomans.
Nathan Cady.
Nathaniel Hunt.
Benjamin Wakefield.
Nelson Bates.

1840. George B. Slater.
Solomon Robinson.
Lathrop Clark.
John Dixon.
Eden Davis.

1841. Jonathan Day.
Solomon Robinson.
Lathrop Clark.
John Dixon.
Eden Davis.

1842. Nathaniel Hunt.
Asahel Mansfield.
Edwin May.
Erastus Spaulding.
Wyman Perry.

1843. Dyer Freeman.
Asahel Mansfield.
Erastus Spaulding.

1844. Erastus Spaulding.
Asahel Mansfield.
Chandler Fay.

1845. J. W. Tenney.
John Dixon.
Amos Bartlett.

1846. Same.

1847. Edwin May.
Amos Bartlett.
Solomon Robinson.

1848. Hiram Allen.

The following list will show the persons who have been chosen moderators, clerks and treasurers at the annual town-meetings since the incorporation of the town:

Year.	*Moderator.*	*Clerk.*	*Treasurer.*
1832.	Ira M. Barton.	Charles P. Baldwin.	Charles Tucker.
1833.	George B. Slater.	Charles P. Baldwin.	Charles Tucker.
1834.	George B. Slater.	Wm. E. Starr.	Loring Leavens.
1835.	George B. Slater.	Charles Waite.	John W. Tenney.
1836.	George B. Slater.	Charles Waite.	Charles Yeomans.
1837.	George B. Slater.	John P. Stockwell.	Charles Yeomans.
1838.	George B. Slater.	Harvey Conant.	Charles Yeomans.
1839.	Jonathan Day.	Wm. H. Bigelow.	Alanson Bates.
1840.	George B. Slater.	John Dixon, Jr.	John W. Tenney.
1841.	Jonathan Day.	John Dixon, Jr.	John W. Tenney.
1842.	John W. Tenney.	John Dixon, Jr.	John W. Tenney.
1843.	Wm. Crossman.	John Dixon, Jr.	John W. Tenney.
1844.	Jonathan Day.	John Dixon, Jr.	John P. Stockwell.
1845.	Hiram Allen.	John Dixon, Jr.	John W. Tenney.
1846.	John W. Tenney.	John Dixon, Jr.	John W. Tenney.
1847.	Hiram Allen.	Edward Rogers.	John W. Tenney.
1848.	Hiram Allen.	Edward Rogers.	John W. Tenney.
1849.	Hiram Allen.	Edward Rogers.	John W. Tenney.
1850.	Edward Lippitt.	Liberty Lamb, Jr.	Joseph Ireson.
1851.	Herbert A. Read.	F. H. Underwood.	Joseph Ireson.
1852.	Edward Lippitt.	Edward Rogers.	Joseph Ireson.
1853.	George Hews.	John Q. Adams.	Joseph Ireson.
1854.	George Hews.	John Q. Adams.	Joseph Ireson.
1855.	Joel Goddard.	John Q. Adams.	Liberty Lamb, Jr.
1856.	Henry E. Bugbee.	Newton Tourtellotte.	Liberty Lamb, Jr.
1857.	Henry E. Bugbee.	P. W. Bruce.	Liberty Lamb, Jr.
1858.	Newton Tourtellotte.	P. W. Bruce.	Liberty Lamb, Jr.
1859.	Hiram Allen.	P. W. Bruce.	Wm. T. Shumway.
1860.	Hiram Allen.	P. W. Bruce.	Wm. T. Shumway.
1861.	Amos Bartlett.	S. A. Tingier.	Wm. T. Shumway.
1862.	Hiram Allen.	S. A. Tingier.	Wm. T. Shumway.
1863.	Horace I. Joslin.	S. A. Tingier.	Wm. T. Shumway.
1864.	Horace I. Joslin.	S. A. Tingier.	Wm. T. Shumway.
1865.	Horace I. Joslin.	S. A. Tingier.	Wm. T. Shumway.
1866.	Hiram Allen.	S. A. Tingier.	Wm. T. Shumway.
1867.	Horace I. Joslin.	S. A. Tingier.	Wm. T. Shumway.
1868.	Hiram Allen.	S. A. Tingier.	Oscar Shumway.
1869.	Hiram Allen.	S. A. Tingier.	Oscar Shumway.
1870.	Horace I. Joslin.	S. A. Tingier.	Oscar Shumway.
1871.	Henry E. Bugbee.	S. A. Tingier.	Oscar Shumway.
1872.	Horace I. Joslin.	S. A. Tingier.	Oscar Shumway.
1873.	Horace I. Joslin.	S. A. Tingier.	Oscar Shumway.
1874.	Amos Bartlett.	Cortland Wood.	Oscar Shumway.
1875.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1876.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1877.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1878.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1879.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1880.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1881.	Horace I. Joslin.	Cortland Wood.	Oscar Shumway.
1882.	Horace I. Joslin.	Charles H. Burr.	Oscar Shumway.
1883.	Horace I. Joslin.	Louis E. Denfield.	Oscar Shumway.
1884.	F. D. Brown.	Edward P. Carter.	Oscar Shumway.
1885.	F. D. Brown.	Edward P. Carter.	Oscar Shumway.
1886.	John J. Love.	Edward P. Carter.	Oscar Shumway.
1887.	John J. Love.	Edward P. Carter.	Oscar Shumway.
1888.	Maurice P. Chase.	Edward P. Carter.	Oscar Shumway.

The following persons have served as Representatives from Webster in the General Court in the years set against their names, down to the representation of districts, in 1858:

John Slater.....1833
Charles Tucker.....1834
Charles Tucker.....1835
John W. Tenney.....1836
Horace Whitaker.....1837
None.....1838
Solomon Robinson.....1839
Lathrop Clark.....1840

Eden Davis.....1842
Joseph Ireson.....1843
Solomon Robinson.....1844
Solomon Robinson.....1845
John Dixon, Jr.....1846
John W. Tenney.....1847
None.....1848
John Dixon.....1849
None.....1850
Nathan Cody.....1851
Chandler Fay.....1852
None.....1853
Elias Jacobs.....1854
George H. Bacon.....1855
Parmenus Keith.....1856
Henry E. Bugbee.....1857

By an amendment of the Constitution, adopted by the Legislatures of 1856 and '57, and ratified by the people May 1, 1857, it was provided that a census of the legal voters in the Commonwealth, on the 1st of May, 1857, should be taken, and returned to the Secretary of the Commonwealth on or before the last day of June, on the basis of which census the Legislature should create representative districts. Under the new arrangement Webster and Douglas formed the Twenty-second Worcester District, which was represented as follows:

1858.—Lyman Sheldon, of Webster.
1859.—Asher Joslin, of Webster.
1860.—John Abbott, of Douglas.
1861.—Emory Sibley, of Webster.
1862.—Albert Butler, of Douglas.
1863.—F. D. Brown, of Webster.

1864.—Charles Hutchins, of Douglas.
1865.—Prince Brackett, of Webster.
1866.—Gardner Chase, of Douglas.

Under the census of 1865 a new apportionment was made, and the Sixteenth Worcester District, including Douglas, Webster, Dudley, Oxford, Sutton and Millbury, was entitled to three Representatives, as follows:

1867.—Benjamin A. Corbin, of Webster; Solomon D. King, of Sutton; Henry E. Rockwell, of Millbury.
1868.—Lament B. Corbin, of Oxford; Silas Dunton, of Millbury; Wm. D. Jones, of Douglas.
1869.—George J. Sanger, of Webster; James M. Cuniff, of Sutton; Marcus M. Luther, of Douglas.
1870.—Charles H. Page, of Webster; John Rhodes, of Millbury; Moses W. McIntire, of Oxford.
1871.—Wm. L. Davis, of Dudley; Edwin H. Hutchinson, of Sutton; Thomas H. Meek, of Douglas.
1872.—Horace I. Joslin, of Webster; E. Harris Howland, of Oxford; Irving B. Sayles, of Millbury.
1873.—C. D. Morse, of Millbury; Andrew J. Waters, of Webster; Samuel W. Heath, of Douglas.
1874.—James B. Williams, of Douglas; George Hodges, of Oxford; Wm. Abbott, of Sutton.
1875.—M. M. Hovey, of Sutton; C. W. Duggan, of Millbury; E. F. Smith, of Dudley.
1876.—Frederick T. Chase, of Webster; Francis Bugbee, of Webster; George F. Daniels, of Oxford.

Under the apportionment based on the census of 1875, Webster, Douglas and Dudley formed the Fourteenth Worcester District, with one Representative, as follows:

1877.—Francis M. Draper, of Douglas.
1878.—Josiah Perry, of Dudley.
1879.—Robert Humphrey, of Webster.
1880.—Wm. W. Brown, of Douglas.
1881.—John J. Love, of Webster.
1882.—Edwin Moore, of Douglas.
1883.—Butler Bates, of Webster.
1884.—George A. Gleason, of Douglas.
1885.—Philip Smith, of Dudley.
1886.—Julius P. Freeman, of Webster.

Under the apportionment based on the census of 1885, Webster, Oxford and Auburn constituted the Eighth Worcester District, with one Representative, as follows:

1887.—Henry Brandes, of Webster.
1888.—John J. Allen, of Auburn.

Besides the Slater factories there are only a few other manufacturing industries worthy of mention: A. J. Bates & Co. employ about one hundred and fifty hands, and B. A. Corbin & Son about three hundred and fifty hands in the manufacture of men's and youths' shoes. The Webster Gas Light Company began business in 1865, and is controlled by the Stevens Linen Works, in Dudley, on the other side of French River. Among the institutions may be mentioned the First National Bank of Webster, incorporated in 1875, and having a capital of one hundred thousand dollars. Its present officers are Chester C. Corbin, president; E. L. Spaulding, cashier; and C. C. Corbin, Cyrus Spaulding, Josiah Perry, J. M. Morse, L. R. Eddy, George Tracy and E. L. Spaulding, directors. The Webster Five Cent Savings Bank was incorporated in 1868, and had, at the time of its last report, deposits of $683,091, undivided earnings of $7,118.16, and a guaranty fund of $11,336.26. Its officers are Cyrus Spaulding, president; Waldo Johnson, John F. Hinds, Darius Wood and E. P. Morton, vice-presidents; F. A. Stockwell, treasurer; and L. E. Pattison, secretary. In 1869 the Webster Mutual Fire Insurance Company was incorporated, but was never organized.

The following societies are now in existence in the town: The Sovereigns of Industry; the Webster Lodge, A. F. and A. M.; the Webster Lodge, No. 56, A. O. U. W.; the Sigel Lodge, No. 93, D. O. H.; the Benjamin Franklin Council, No. 333; the Loyal Order of Tonti, No. 107; the Maanexit Lodge, No. 117, I. O. O. F.; the Nathaniel Lyon Post, G. A. R.; the Assembly, No. 4060, K. of L.; the Royal Arcanum Relief Association; the St. Jean Baptiste Society; La Ligue Du Cœur de Jesus; the Gesangverein Deutschen Liederkranz; the Deutsch Dramatischen Verein; the Deutsche Liederkranz Band; the Turnverein Vorwärts; the Deutschen Theater Club; the St. Patrick's Temperance Society; the Sodality of the Sacred Heart; and the Ladies of St. Ann.

The post-office, now located at the main village of Webster, was located at the time of the incorporation of the town and had been for some years at the east village and was called the South Oxford office, but, in 1841, nine years after the incorporation, was moved to its present location. The main, or depot village, as it is called, shows many signs of prosperity. It is the chief business section, and there are located the banks, the town offices, the apparatus of the Fire Department, the hotel, and most of the stores. It lies on the Southbridge section of the Boston and New England Railroad, and also on the Norwich and Worcester Railroad, thus having easy access to Boston by two routes, and also to Providence, Worcester and New York. It not only enjoys its own local trade but the people in the settlements at Jericho, Marino Village, Chaseville and Perryville, in Dudley, across the river, not inconsiderable in numbers, patronize its shops, its shows, its various societies, and attend its churches. The population of the town, which, at the time of its incorporation, was 1168, increased to 1403 in 1840, to 2371 in 1850, to 2912 in 1860, to 4763 in 1870, to 5696 in 1880, and to 6220 in 1885. The valuation, which was $277,118 at the time of the incorporation, increased to $2,466,428 in 1885.

According to the census of 1885, the agricultural products and valuations were as follows:

Animal products	$3,720
Dairy products	22,059
Food products	730
Green-house products	1,200
Hot-house products	445
Poultry products	3,332
Wood	10,163
Cereals	2,225
Fruits, berries and nuts	3,058
Hay, straw and fodder	14,532

Meats and game	2,476
Vegetables	6,089
Land	144,823
Buildings	92,145
Machines and implements	7,642
Domestic animals	16,985
Fruit-trees and vines	9,763

Two newspapers are published in Webster, *The Webster Times* and the *Worcester County News*, both published weekly in Webster and both are enterprising and successful journals. The former is edited by John Cort and the latter by John T. Miniter, and a job printing office is connected with each.

In concluding this sketch the following list of the present town officers is added: Selectmen, Charles A. Hodges, Patrick Condren, Austen C. Burnett; Town Clerk, Edward P. Carter; Treasurer, Oscar Shumway; Overseers of the Poor—for three years, John Flint; for two years, Elisha N. Bigelow; for one year, John F. Hinds; Assessors, William F. Gale, William Shanley, Monroe H. Corbin, Michael Scholfield, Russell B. Putnam; Auditors, James Maguire, James Cocks, John B. McQuaid; School Committee—for three years, Edward P. Carter; for two years, Henry F. Thompson; for one year, Charles B. Kendrick; Constables, Thomas Farrell, William Hanley, Joseph C. Spaulding, Patrick H. Grimley, O. W. Emerson, John J. Dwyer, Uzziel Gleason, Joseph P. Love, Daniel G. Blackman, Solomon Shumway, George D. Adams, John Sullivan, Collector, Charles E. Brown; Deputy Sheriff, Solomon Shumway.

BIOGRAPHICAL.

FREDERICK D. BROWN, M.D.

Frederick Davis Brown, M.D., was born in the town of Sutton, Mass., on September 5, 1824. His early life was in many respects similar to that of most country boys of the period, working on the farm in the summer and attending the district school in the winter. But, unlike many of his boyhood associates, he was not "bound out" for a term of years to the farmer or the blacksmith, but was given the opportunity of pursuing such course of study as best suited his inclination. He chose that of medicine, and at the age of seventeen entered the office of Dr. George Rawson, of Grafton. Reading with a country doctor of that time meant chiefly the care of the doctor's horse, doing the numerous chores about the premises, assisting his instructor in gathering and drying the herbs and simples so commonly used in those days, and in preparing the powders and pills, and on rare occasions helping the doctor in some minor surgical operations.

After two years of such training he removed to Worcester and entered the Baptist Academy. He did not, however, abandon his medical studies, but continued them with Dr. Samuel Green, until the doctor accepted the position of medical missionary to Ceylon, tendered him by the Board of Foreign Missions. Dr. Green placed his young charge in the care of his relative, Dr. John Green, at that time the most eminent physician in the county. After two years' reading with this learned preceptor he continued his studies at the University of Pennsylvania, and at Castleton (Vt.) Medical College, where he was graduated in 1849. He served for about a year at the Bloomingdale Asylum Hospital in New York, and in 1850 located in Webster, when he at once entered upon an active professional career, which he followed with unremitting energy for thirty-six years.

He was widely known throughout the southern part of Worcester County as a most devoted and successful practitioner, gaining the confidence and esteem of all with whom he came in contact. He was a zealous member of the Massachusetts and the Worcester District Medical Societies, at one time being president of the latter. His close application to his practice did not debar him from taking an active part in the affairs of his town, and he identified himself with many of its political and social organizations. For nearly twenty consecutive years he was elected to the office of School Committee. In 1864–65 he served on the Board of Selectmen; in 1863 he represented his district in the Legislature, and in 1868 was sent to the State Senate.

During his term of service in the latter body he was instrumental in securing the incorporation of the Webster Five Cent Savings Bank, of which he was president at the time of his death. To him work was never a hardship, but a pleasure; its perplexities only added to his zeal and stimulated his ambition. His ready willingness to do what was asked of him, and the liberality of his views, made him the counselor of many.

Probably no citizen devoted more time and work for the welfare of his town than he, or with less personal interests.

His death, sudden and unexpected, occurred November 8, 1886.

CHAPTER LIV.

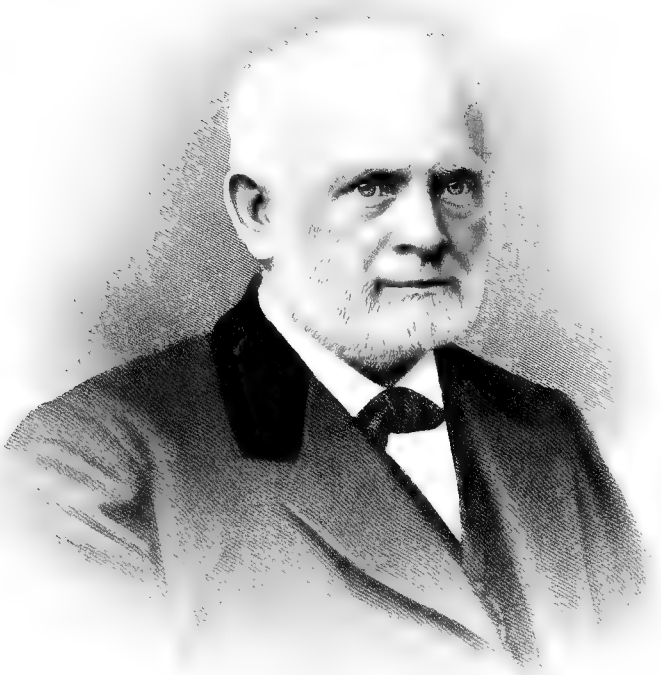
MENDON.

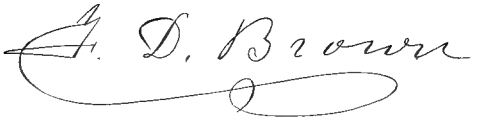
PIONEER LIFE.

BY G. B. WILLIAMS.

Mendon the Mother of Towns—Comparative Antiquity—Number of Towns once a Part of Mendon—The First Movement for a New Plantation—The Deed from the Indians—Division of Land—Names of Proprietors—The First Map—Incorporation—The Town in 1675—The Nipmucks' Attack—The Settlers' Return.

On the 15th day of May, 1867, in a small town in the southeastern part of Worcester County, "a vast assemblage," as one of those addressing it justly de-





J. D. Brown

scribed it, were gathered together. Orators, poets, distinguished jurists, clergymen, statesmen and men of military renown were present, or regretfully sent excuses for their absence. The inhabitants of Milford, Blackstone, Uxbridge, Northbridge, Upton and Bellingham, with hundreds from more remote parts of the State and nation, had met to celebrate the two hundredth anniversary of the incorporation of what they lovingly called the "Mother Town of Mendon." The distinguished speakers seemed to feel it a high privilege to recount the story of the ancient town, and found the day far too short for their purpose. Several of them had names borne by six generations of Mendon's inhabitants now passed away, as well as by many of its present citizens, and they felt they were telling the story of their ancestors as they narrated how the Aldrichs, Staples, Holbrooks, Thompsons, Chapins, Tafts and others painfully made their way from the coast to this fertile, hilly region, established homes, church, schools, and laid the foundation for all the abounding life of these busy towns of to-day.

Mendon, next to Lancaster in antiquity among Worcester County towns, was and is, well deserving of notice historically. Eighteen of these are at least a hundred years younger than she. The town of Worcester was incorporated sixteen years later than Mendon, and she is more than forty-five years older than any other town in the county, except Lancaster, and sixty-three years older than the county itself.

Her original territory is now held by eight Massachusetts towns, but she still retains the spot first settled on her ancient possessions, and her people believe it one of the most fertile and beautiful of all.

In 1659, eight years before Mendon's incorporation, the records of the General Court of Massachusetts show that the people of Braintree and Weymouth had expressed a desire for "a new plantation;" "whereupon the Court judgeth it meet to grant them liberty to seek out a place and present their desires, with the names of such persons as will carry out the work, unto the next session of this Court." Accordingly, in 1660, upon a petition by seven of the inhabitants of Braintree, a committee of five was empowered to accept persons for the settlement, which was to be eight miles square, and four commissioners were authorized "to make a valid act there." It was nearly two years later, May 22, 1662, before the commissioners reported their rules and regulations for the "Plantation at Netmocke," with the names of persons then accepted, viz.: thirteen of Braintree and ten of Weymouth. Moses Payne and Peter Brackett had already secured a deed of Netmocke from the Indians and a double allowance of land for themselves. They never settled there, but, after the incorporation, transferred their rights under the deed to the town by a writing dated December 9, 1669.

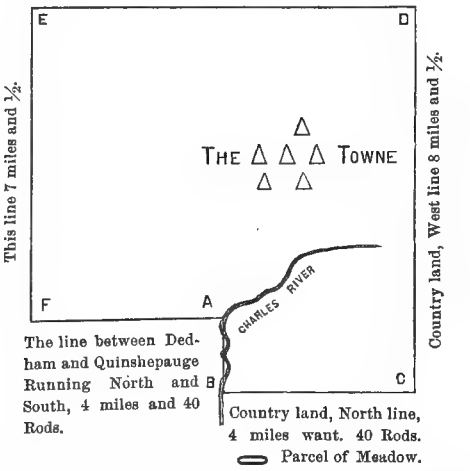
This deed was executed by five Indians designated both by Christian and Indian names, and the land was described as eight miles square, lying about fifteen miles from Medfield, "and is to lye to the south or southward of the Parth to Nipmugg Great Pond and five milles on the other side of that Parth north or northwards." The deed has always been supposed destroyed when the town was burned by the Indians in 1676.

By the committee's rules each settler was to have for "one hundred pounds estate" thirty acres "to the home lot," ten of meadow, five of swamp and one hundred and five for "greate lott." This was assigned by the committee, but later divisions, some eleven in all, proportioned to the amount of land first held, were made by lot and made up the "Doubling Lot."

Before July 7, 1663, John Moore, George Aldrich, Matthias Puffer, John Woodland, Ferdinando Thayer, Daniel Lovett and John Harber had settled at Nipmugg, Netmocke or Squinshepauge, for all these names written variously by different authors, were now applied to the plantation, probably the last most generally. Before March 24, 1664, John Gurney, Walter Cook, Joseph White, John Thompson, Abraham Staples, Joseph Aldridge, John Jepson and John Rockett had settled, making fifteen families in all. There are no means of knowing what took place from 1664 to 1667. Joshua Fisher's map was filed in April, 1667, in the General Court, a copy of which, with title and "explanation," are printed below.

SURVEY OF THE PLANTATION (1667).

The desire of the inhabitants to this Honered Courte is that they would accept of this Retourne of their Plott of theire Plantation wich is layd according to their Grainte of eight Miles square by Joshua ffisher.



An explanation of this Plott, being the Township of Squinshapauke as it was layd out according to the Grant of the Generall Courte by me, Joshua ffisher, Aprill 1667.

From A to B is bounded by Charles River, a white oake beinge marked on the south side of Charles River at A, a Black oake on the north side of Charles River at B, and a line of marked trees and heapes of stones to C, from C to D a line of marked trees and heapes of stones, to C, from C to D a line of marked trees and heapes of stones, and soe from D to E and from E to F, a line from F to A of Marked Trees; And from A to B is one mile Runninge according to the River East and West, from

B to C is fower Miles wantinge forty Rodd, Runninge from B North, from C to D eight miles and halfe west, from D to E eight miles South, from E to F seven miles and half East, from F to A ffower Milles and 40 Rods.

At O is a parcell of Meadow that the Towne Petitioned for of about thirty Acors by estimation upon the North line from Charles River.

This Courte Approves of this Plott as it is Returned.

as attest, EDW. RAWSON, *Secrty.*

The incorporation of the town of Mendon followed May 15, 1667. The name undoubtedly was taken from Mendham, the name of an ancient English town, and years after the incorporation the name Mendham was applied to Mendon in military reports and in various records. The Indian titles seem to have been seldom used later than 1667.

The town clerk of the new town, Colonel William Crowne, in the preamble to his records, sets forth the title of the inhabitants as based on the Indian deed as well as on the authority of the "Honoured Generalle Courte," and says the court had "adorned" the town "wth severall large Priviledges." It was indeed a goodly land. Meadows, springs, brooks, rivers and noble forests abounded. The Blackstone River, entering its northwest corner, crossed to its southeastern portion, now in Woonsocket, Rhode Island. The West River, the Mumford, with many smaller tributaries of the Blackstone, were largely or wholly within its limits, and the Charles crossed its eastern portion. High hills with commanding prospects—Wigwam, Misquoe, Calebs, Magormiscock, Goat Hlll and others—with the numerous meadows, upon whose grassy products the early settlers greatly relied, added their charms to the scene two hundred and twenty-one years ago. All was peace and hope. The records of 1667 and years following to 1675 are filled with interesting incidents of the settlers' pioneer life, so soon to be broken up by the Indian's torch and tomahawk.

The minister, Rev. John Rayner, had been secured, the meeting-house and parsonage built, land set off for the use of the ministry and for school purposes, roads had been laid out, some of them ten rods wide, provisions made for exterminating wolves, for establishing the town's boundaries, for compelling observance of the Lord's day, and the performance by each man of his share of the public works, for punishing the refractory, for procuring more meadow land with which, in their view, they were as yet but "meanly provided," and everything needful for securing Christian homes in an orderly, God-fearing community. In 1672 the fifteen families of five years before had become thirty-four, and in the list of proprietors receiving swamp lands at that date are found the names Hayward, Holbrook, Read, Bartlett, Tiler, Gurney, Juell (Jewell), Sprague and Peck. A few others came before 1675, but several best-known in the later history of the town not much, if any, earlier than 1680, among them, Josiah Chapin and the brothers Robert and Matthew Taft.

July 14, 1675, King Philip's War commenced with an attack on this peaceful settlement, in which four or five persons were slain. Later the Indians killed Matthias Puffer's wife and child, possibly others. Hostilities had been dreaded by the colonial authorities for some days preceding and scouting-parties ordered out. Mendon was located in the midst of the country of the Nipmuck Indians, and from the beginning had taken special precautions to secure friendly relations with them.

The labors of the apostle Eliot had been untiring, and bands of praying Indians had been organized at Wacantuck (now Uxbridge), Hassanamisco (Grafton) and elsewhere. One indication of Eliot's influence is probably seen in the Indians' signatures to the Mendon deed by such names as William, John and Jacob, to which signatures, indeed, the Eliots, senior and junior, are witnesses.

In 1668 the Nipmucks in the vicinity of Mendon and Marlborough had executed a formal submission in writing to the government of the colony, in which is found a solemn promise to obey God and do Christian duty. After the slaughter in July, the settlers exerted themselves to secure the removal of the Grafton Indians, with their weapons and supplies, to Mendon. The effort failed. The records show colonial soldiers attacking the Nipmucks at Grafton, in November, 1675. The Indians soon after abandoned Grafton, or Hassanamisco, and, doubtless with the Nipmucks generally, aided King Philip and the Narragansetts against the English. Immediately after the first attack, of which Cotton Mather is quoted as saying, "Blood was never shed in Massachusetts colony in a way of hostility before this day," many Mendon settlers fled. By November, we are told in military reports, those remaining had been "drawn into two houses." A fortified garrison had been established, from which raids upon the Indians were made. The Colonial Council, November 2, 1675, ordered "that the people of Mendon should not remove from the place without leave, and that those who had done so should immediately return;" but neither the presence of soldiers, nor the promises, orders nor threats of colonial authority, proved sufficient to overcome the dread of the Indians, and, probably before Christmas, 1675, the town was completely abandoned. During that winter the enemy burned all the buildings. The town records, though all preserved, so far as we know, make no mention of the war, but it is evident, from records of births, that soon after King Philip's death, in August, 1676, some of the fugitives returned, probably not, however, till the Nipmucks had at Boston again submitted formally to the English, and by their own hands, under colonial authority, executed Mattoonas, the Nipmuck leader of the July attack. We know that at least twenty out of the thirty-eight escaping families had returned to Mendon at the beginning of 1680.

CHAPTER LV.

MENDON—(*Continued.*)

TERRITORIAL AND POLITICAL CHANGES.

The Town's Poverty After the War—Claims of Rhode Island Territory—The "North Purchase"—Annexation of "The Farms"—Towns Claiming to be "Children of Mendon"—Mendon to-day.

FOR several years after 1680, Mendon was considered as a frontier town, and its poverty, even in comparison with other Massachusetts towns of the time, was notorious. The proprietors of nearly half its lands never returned after the war, and delayed or refused payment of taxes levied on their property. Repeated petitions were sent to the General Court asking for compulsory action against these absent owners, and for relief from colony taxes. Most of the petitions were granted. In spite of this poverty, within ten years from the close of the war about fifty families had settled in Mendon, and began to feel crowded and seek additional territory. The southern boundary was not well defined, and was later a subject of much controversy, which continued till 1725. The second map, made by Sergeant Ellis in 1683, and numerous records, show that Mendon claimed much of what was finally yielded to Rhode Island, including the "Falls," now in Woonsocket, and what is known as "The Branch." In 1692 about three square miles lying on the northern boundary, now in Milford, and still known as the "North Purchase," were bought from the Indians. In 1685 Edward Rawson, secretary of the colony, had become owner of about two thousand acres, now wholly or partly in Bellingham. He held title by deed from the Indians as well as a grant from the colony. Till 1710 he escaped taxation by town or county, paying tribute to the colonial treasury only, but in that year the Farm, as the tract was then called, was annexed to Mendon.

In 1719 thirteen families occupying this farm, or "The Farms," four dwelling on other land in Mendon, and twenty-three families of Dedham, asked the General Court for incorporation as a town. Their petition was granted, November 27, 1719, against the protest of Mendon, however, and Bellingham became a town.

As early as 1720 the settlers in Waentuck, or Wacantuck (now Uxbridge), agitated the question of separation. Their efforts were renewed in 1722, voted on and rejected in 1726, but Uxbridge was nevertheless incorporated in 1727, taking about four miles in width from the western portion of Mendon.

Upton, at its incorporation in February, 1735, took a small part of the remaining territory and the same year the inhabitants of what is now Milford and Hopedale sought separate town existence. All these attempts were resisted by dwellers in the original settlement, and in the last case successfully for about forty-five years, or till April 11, 1780, when Milford's existence as a town, by full agreement of all parties interested, began. She had formed a separate parish precinct in Mendon, known as the Easterly or Mill River Precinct for thirty-nine years.

Mendon also stoutly opposed her separation from Suffolk and assignment to Worcester County, which took place February 18, 1730. As late as 1734 she voted a petition to the court to be joined with Dedham in a new county, then in 1798 in favor of dividing Worcester County. It may be here noted that Mendon, during the first four years of town existence, was a part of Middlesex County. In 1671 she was decreed, evidently in harmony with her own wishes, "to be and belong to ye county of Suffolk."

After the incorporation of Milford no serious attempt to secure a further division of Mendon is known to have been made till 1816, when ten inhabitants of the South Parish (now Blackstone) petitioned the town, without avail, to vote that that precinct be set off as a town. It had continued in apparent content as a parish in Mendon since 1766, though in 1779 we find record of one feeble movement for division. In 1823, and during the four succeeding years, the South Parish sought for separate existence, appealing in vain to the town and to the Legislature. Again, in 1843, the vexed question arose and was discussed at brief intervals with great bitterness till the division was effected and Blackstone incorporated March 25, 1845. The petitioners therefor numbered seven hundred and sixty-seven, the remonstrants three hundred and fourteen, and they were divided on other than local or usual lines. In fact, strange to say, it appears that very probably a large majority living in what is now Mendon desired division, while divisionists were so unpopular in Blackstone as to be excluded from town office at the first town election. Closing the story of the construction of towns from Mendon's territory, it should be observed that the town of Northbridge was taken from Uxbridge in 1772, and Hopedale from Milford in 1886, and can both claim Mendon as their mother or, perhaps, with more accuracy, their grandmother town. By this course of disintegration, not, however, likely to be extended further, forty thousand acres and more, her original holding, with its substantial additions by annexation, have been reduced to eleven thousand three hundred and seventy-five acres.

Mill River alone is the only considerable stream which crosses the Mendon of to-day, but the Charles, as of old, forms a part of its eastern boundary and the lovely "Nipmuck Great Pond" is still retained within its limits, with shores now somewhat famous as a summer resort. Pond Hill remains, also Wigwam Hill in the south and Misquoe in the north, both distinguished for magnificent views. Mendon shares with Blackstone at the south a right in Daniels or Southwick Hill, and with Hopedale on the east it claims jurisdiction over Neck Hill. Muddy Brook flows between the elevation last named and the beau-

tiful summit on which is the principal village which stands, deeply shaded, just where the settlers had their house-lots in 1663.

The above glimpse of Mendon as it now is must suffice till its manufacturing, military, educational and ecclesiastical history have been outlined.

CHAPTER LVI.

MENDON—(*Continued.*)

MANUFACTURES.

The First Grist-Mill and Saw-Mill—The Successive Occupants of the Old Grist-Mill Site—Contracts with Millers and Blacksmiths—Torrey and Warfield Saw-Mills—Factories, Miscellaneous and Modern.

In Mendon's colonial life early efforts were made to utilize its water-power. In the beginning of 1664 the committee conditionally granted to Benjamin Albee twenty acres on the town site and fifty acres near the proposed mill, to encourage him to establish a "corne mill" on Mill River, near Hopedale's present town line. It was probably built in 1672, and till then the settlers ground their grain at Wrentham or Medfield, twelve or fifteen miles distant.

Ten years later Josiah Chapin had eighty acres granted him near the village and east of Muddy Brook, for his encouragement to build on that treacherous stream the first saw-mill. April 24, 1668, the town voted to build its first meeting-house "neere to Joseph White's saw-pit, in his house-lott." There can therefore be little doubt that for the first ten years, and till Chapin's mill was started, all boards were manufactured in the primitive manner of pit-sawing.

In 1684 Matthias Puffer's corn-mill was built on the site of Albee's, destroyed by the Indians. Three years later his son James occupied it; and we can trace an occupation of this place for the same purpose for more than one hundred and seventy-five years, and for more than a hundred years the town appears to have exercised control over it through conditions under which both Albee and Puffer and their successors held their rights. It is not important to name all the millers, but David How, 1724, Lieut. Wm. Sheffield, 1735–70, after him Jeremiah Kelley, 1779, then one Ellis and finally Nathan and Alvin Allen, occupied the place.

In 1727 there was a fulling-mill near the grist-mill, which was used many years.

The latter mill became a ruin about 1847, and the town claimed a forfeiture in consequence, under the contract of 1662. There was a vote to investigate, but the claims were never pressed in court.

James Bick's contract, made in 1686, somewhat resembled Albee's. He was "to doe the town's smithery work for the next ten years upon reasonable conditions, unless death or disablement hinder," otherwise the land granted was to revert or fifteen pounds to be paid. Long wrangling between Bick and the town followed; he would neither do the work, vacate the premises, nor pay the forfeiture; but finally, in 1695, he left the town, and some years after, 1713, it seems the eminent Quaker, Moses Aldrich, was the town blacksmith.

In 1691 Josiah and Angel Torrey were authorized to build a saw-mill dam upon the town's land, between School Meadow and Rock Meadow, and were granted necessary land therefor, so long as they maintained the mill. A mill on this spot, which is not far from P. W. Taft's residence, and two miles west from the village, was used till within a very few years.

In 1711 Samuel Warfield was granted land near the old saw-mill on "Fall Brook," an uncertain location, but probably on Mill River, in Hopedale, near Spindleville Shop.

There were "Iron-works" (probably a smelting furnace) and a saw-mill at or near "The Falls" (Woonsocket) in 1698, and iron-ore had been found at or near East Blackstone.

A saw-mill and a grist-mill had been started, in 1712, on the Charles River, and one in Uxbridge, on the Mumford, many years prior to the incorporation in 1727.

Samuel Thompson's grist-mill, on the Blackstone, where Millville village now is, was begun about the same time; as also iron-works and perhaps mills at Whitinsville.

Before 1800, within the present limits of the town, there were two or more establishments for making potash, several small distilleries and some brick-kilns. One of the last-named, near Albeeville, was used within forty or fifty years. All the others were abandoned many years before.

Manufacturing, as the term is generally understood and applied, never long flourished here and is now almost extinct. From 1845 to 1878 there were important boot-factories in operation. One Leland, W. H. Comstock and Dennis Eames each had a factory before 1850. Enos T. Albee and Edward Davenport were not much behind these. After them came J. R. Wheelock & Co., who for a year or two produced in their large shop, then new, some three or four hundred cases of boots weekly.

Albee maintained his business, averaging about sixty cases a week, for twenty years or over, ending in 1870. N. R. & J. A. George began boot manufacturing in the Wheelock shop in 1863, but the partnership was brief. J. A. George continued the business till 1879. Charles H. Albee has within a few years been engaged in making boots and shoes in the building occupied by his father, which is in Albeeville, about two miles southwesterly from the Centre Village, where all the other boot-makers named had

their factories. Those factories have one by one been removed or converted to other uses, and no boots nor shoes have been made in Mendon for several years. The largest factory built by the Wheelocks was torn down the present year (1888).

George R. Whiting in 1873 bought the ancient Albee "privilege," erected a new dam and a mill near the one first built in 1682, remains of which still exist, and with some interruptions has ever since utilized the property for shoddy-making. His buildings, burnt in 1887, have been replaced by improved ones made of brick.

W. H. Swan has made shoddy on Muddy Brook for about twenty years. He has a steam-engine as well as water-power, and formerly sawed lumber and made boxes—and for a time boats.

Samuel G. Wilcox made boot and shoe-boxes at the junction of Muddy Brook and Mill River, using water-power from both, for over forty years, and since his death, in 1882, his son, Hamilton C. Wilcox, has carried on the business at the old stand.

Samuel W. Wilcox, another son of S. G. Wilcox, has a steam-mill near the last-named, where for ten years he has made cigar-boxes.

All these manufacturing establishments now in operation are near each other in the southeasterly part of the town, and their production is small.

CHAPTER LVII.

MENDON—(*Continued.*)

MILITARY HISTORY.

Mendon in the French and Indian War—The Revolution—Shays' Rebellion—War of 1812—The Rebellion.

In the French War, 1755–63, Mendon furnished her full quota of soldiers. There were forty-one in one company, serving in 1759 in the expedition to Ticonderoga and Crown Point; many more served during the war, but the town records do not reveal much concerning the popular feeling nor town action on military matters. The lists of soldiers contain many names familiarly known all through the town's history. We only know the people did their part well and loyally, scant though the record may be.

There is much more known of the Revolutionary period. The first mutterings of discontent with British rule found an echo in Mendon. Its inhabitants approved the action of those who were willing to pay the damage done by the mob to Governor Hutchinson's property in 1765, but were eager to pardon the rioters, although later, in general terms, they denounced such riots. They voted, in 1767, to concur with the men of Boston in their famous agreement not to sell or use any article, tea in particular, on which Parliament should lay a tax; indeed, their records are crowded with patriotic utterances; nineteen resolutions denouncing British wrongs to the Provinces, and declaring in sounding terms their "Rights and Liberties," "The gift of God Almighty," were discussed and passed March 1, 1773. About a year later three more stirring resolutions were passed, suspending intercourse with Great Britain, and refusing to buy or use her goods while Boston is blockaded, and until a "Restoration of our charter-rights be obtained," and denouncing as "inimical to their country" all persons acting otherwise. A Committee of Correspondence was chosen to confer with similar committees in other towns, and the selectmen were authorized, in their discretion, to add to the town's stock of arms and ammunition. September 28, 1774, Joseph Dorr, Esq., was chosen delegate to the Provincial Congress, to be held in Concord, October 11th.

Dr. William Jennison gave the town a six-pounder field-piece about the same time, and two more, with other arms, were purchased by the town. One-third of the soldiers on the military list were enlisted as minute-men, and made ready to march at a moment's notice.

In common with other towns, Mendon contributed in aid of blockaded Boston and Charlestown, and promptly sent delegates to every convention called to organize colonial strength, or declare or guide colonial sentiment.

In 1775 the town was ready with arms and men. Promptly following the battle of Lexington, one hundred and sixty-two men in four companies were in arms, and one hundred and sixteen men appear to have enlisted for the three months ending August, 1775. Mendon, with Concord and other towns, had been designated as a place of deposit for army supplies.

Till the spring of 1776 every town-meeting since 1667 had been loyally called in His Majesty's name; but now Mendon's liberty-loving people openly discarded his authority, and met "in the name of the Government and People of the Massachusetts Bay," and thereupon voted "that the town advise and instruct their Representatives to acquaint the General Assembly, that if the Honorable the Continental Congress shall think it for the benefit and safety of the United American Colonies to Declare them independent of Great Britain, said Town will approve the measure and with their lives and fortunes support them therein." The immortal Declaration of Independence passed soon after and appears in full with the town's approval upon its records. Through all the years of the great contest, all testimony goes to show that no community surpassed this in devotion to liberty, influence in the colony or in patriotic service. Men of Mendon fought at Bunker Hill, marched to Canada with Arnold and were at Long Island, Valley Forge, Bennington, Saratoga and Yorktown.

Edward Rawson, a descendant of Secretary Raw-

son, Judge Joseph Dorr, Jr., the son of the minister, Thomas Wiswell, Lieutenant Benoni Benson and several others appear to have enjoyed the confidence of the colonial authorities in a high degree. Judge Dorr was especially prominent, and from his pen came many of the patriotic utterances on the records.

We note some miscellaneous matters apparently worth recording as illuminating somewhat the history of the period. A few years before the Revolution the town had been compelled to receive several of the French neutrals cruelly driven from Nova Scotia in 1755 by English authority represented by General John Winslow, descendant of the Pilgrim Governor. The same British power in 1775 turned its cruelty against Charlestown, and by order of the Provincial Congress, Mendon was "to take thirty of the people of Charlestown," made homeless by the burning of their town. Eleven years before, five of the banished Acadian French were still living in Mendon. If they saw the thirty homeless Charlestown people entering Mendon, and we have no reason to suppose they did not, they must have thought it savored of retribution.

In 1776 seven officers of the Seventy-first British Regiment Highlanders, supposed taken prisoners at sea, were quartered in Mendon. They forwarded many complaints to the Colonial Council of abusive treatment from the inhabitants, especially of language reflecting on the prowess of British soldiers generally and that of the prisoners in particular. There was also complaint of tyrannical treatment in many respects, and the citizens complained on their part of being obliged to keep the officers' servants, and expressed suspicions of the prisoners conspiring with Tories. Captain Colon McKenzie was the chief officer. How long they remained is not known—perhaps till exchanged.

A bitter quarrel arose between Uxbridge and Mendon members of the Third Massachusetts Regiment concerning the election of field officers. It could only be settled by a committee from the Colonial Council and an order on their report for a new election and an assignment of the Uxbridge soldiers, who were from the first in a minority, to another regiment. This was in 1776.

A census, taken January 1, 1777, gives Mendon five hundred and seventy-two male inhabitants, sixteen years old and upwards. She had seventy-five soldiers in the field in March, 1778. During the year 1776 twenty-eight had enlisted for three years. In 1779 there is a list of thirty-three nine-months' men in the Rhode Island service, but neither State nor town records enable us to make complete military lists or give the town exact credit for its labors and losses in the cause of liberty. Tradition has brought down the names of but one or two Tories in the whole town. Some were suspected of disloyalty, and petitions for stringent laws against them went from Mendon, whose Committee of Safety never relaxed in vigilance, if we may trust the records.

Those records also show with what wise adjustments of business the evils of the depreciated currency were met, and the careful attention given to their regular municipal affairs. Throwing aside the old-time local strifes, Mendon voted at last that the East Precinct, Milford, might become a town. The new Constitution of Massachusetts was laboriously and fully discussed, article by article, the voters amending, rejecting or adopting, as if on them alone depended the making of the organic law of the Commonwealth, and, finally, as the clouds of war rolled away, they set themselves resolutely at work to do their part as an important town in the new State of Massachusetts.

No proof is found of any Mendon citizens taking part with Shays in his rebellion, in 1786, though petitions with lists of grievances uncounted went to the General Court. Among the complaints were named the sitting of the General Court in Boston, the want of a circulating medium, the exorbitance of the lawyers' "fee-table," the doings of the Court of Common Pleas, "too many office-holders, and their salaries too large," etc.

But the town, nevertheless, furnished its quota of men, sixty in all, to march against Shays, and seems to have had no thought of resisting the government, imperfect as it was, which had cost so much.

In 1797 fears of a war with France arose. While Milford was plainly of a martial spirit, Mendon appears memorializing Congress against arming ships, and expressing its dread of the horrors of war.

There is nothing to show the town's zeal in the War of 1812, unless it be that it voted seven dollars per month extra pay to such of its militia as should be called into actual service. Six officers and twenty-six enlisted men of Mendon were paid by the United States in 1814 for service in the army. According to "Ballou's History," Milford was earnestly in favor of the war, and furnished many men.

Nothing has been found showing any popular interest in the Mexican War, or any men from Mendon serving therein.

When the great Rebellion broke out this town took its stand promptly, and, with a spirit which never faltered, sent men and expended money most freely to crush out traitors. In 1861, after a preamble declaring loyalty, and their duty and purpose to sustain the government, the voters unanimously passed resolutions appropriating five thousand dollars in aid of the families of volunteers. In 1862, while adopting patriotic resolutions, they voted to pay a bounty of one hundred and fifty dollars to each soldier volunteering, and later they increased it to two hundred dollars. This action was in harmony with their course to the end of the war, and when President Lincoln was assassinated, the town records show the horror of the citizens. The votes and resolutions passed in relation to the Rebellion were generally passed unanimously. Aside from town action, the

people called meeting after meeting to encourage enlistments, volunteers were honored, their families aided, and, if a word in defence of the rebels was ventured, the overwhelming popular sentiment in opposition prevented its repetition. In Mendon, from 1861 to 1888, traitors and copperheads have always been odious, as Tories were to the fathers.

The town's ordinary appropriations were little over five thousand dollars a year, but it paid in bounties over sixteen thousand dollars, of which the town furnished all but about twenty-five hundred dollars, which was raised by subscription. The State's records show one hundred and fifty-six residents of Mendon who served in the army or navy from 1861 to 1865, and one hundred and thirty-two are credited on her quotas, being sixteen over all calls to which she was required to respond. Nineteen were killed or died in service, namely,—Franklin B. Wilcox, Charles H. Wheelock, Juba F. Pickering, Alanson E. Bathrick, Samuel Hall, John B. Rockwood, Martin S. Howe, George W. Wilcox, David S. Thurber, Lawrence B. Doggett, William Cosgrove, Albert Cook, Patrick Wallace, Robert Wallace, Samuel Everton, Franklin Freeman, Anthon C. Taft, Benjamin H. Smith and James Burns.

CHAPTER LVIII.

MENDON—(*Continued.*)

ECCLESIASTICAL HISTORY.

Ministers and Meeting-Houses, 1663 *to* 1818—*The Change to Unitarianism—The Meeting-House of* 1820—*Pastors to* 1888—*The North Congregational Church and Pastors—The Methodists in Mendon—The Quakers.*

LIKE every New England settlement of its time, Mendon was founded on the idea that religious worship and religious life should be established and maintained at every sacrifice. Grants of privileges to establish a plantation or incorporate a town or precinct were made on the express condition that the inhabitants settle and support "a learned Orthodox Minister of good conversation," which, indeed, in every case they promptly did.

Rev. John Rayner was accepted as a settler by the committee on the Mendon plantation May 22, 1662, and in 1667 is recorded as having an allotment of meadow land. In 1669, in a petition to the General Court, he is named in terms showing plainly that he was the minister then preaching in Mendon.

Mr. Benjamin Eliot, son of the apostle Eliot, received a call in 1668 to settle there, but it was not accepted. Late in 1669 the church appears to have been fully organized and the Rev. Joseph Emerson made the first settled minister of the place.

At the beginning land had been set apart for the ministry and for schools, and when divisions of the common lands were made, the same allotment was made to them as to individual proprietors. Before Mr. Emerson came, the minister's house was advanced towards completion. It evidently, as well as the early meeting-houses, was built by the combined labor and gifts of the settlers. The town voted to build, and the selectmen employed a master workman who supervised the labors of the workers. Several records concerning the obstinate and sometimes insulting refusal of one Job Tiler to work on Mr. Emerson's house at the summons of the selectmen, their threats to report him to the Colonial magistrates, and his final surrender and giving satisfaction "for that offence" with others, make up a curious comment on the management of an early New England town.

Mr. Emerson fled with his people from the Indians in 1675, and died in Concord June, 1680. He was the ancestor of Ralph Waldo Emerson. His house and the first meeting-house were burned with the rest. It is supposed his house stood on the Caleb Hayward place. The first meeting-house, which stood near the building now occupied by the Taft Public Library, is described in the quaint language of the time as "the breadth 22 foote square, 12 foote studd, the Ruffe gathered to A 7 foote square wth A Turrett." It was built under the direction of Deacon Job Hide in 1668.

The first town-meeting after the settlers' return was held January 3, 1680, and at the second, held ten days later, it was voted to build for the minister "A house 26 foot in length 18 foot In bredth, 14 foot between joynts a girt house and a gabell end In the Roofe and a Leantowe att one end of the house the breadth of it."

January 17, 1680, Samuel Hayward had agreed with the selectmen to "begine and manige the frame of a meeting-house, 26 feet in length and 24 foot in breadth, a girt house 14 foot between joynts."

October 4, 1680, "the towne Agreed, and it pased by a clere vote, that they would give Mr. Grindall Rawson a call to the work of the ministry for this yere In order to his further settlement; for £20 in money, his bord and a hors to be kept for his servis." After three years of preaching, he was settled April 7, 1684, at £55 a year, with house and forty-acre lot.

The third meeting-house, thirty feet square, with sixteen-foot posts, was built 1690, "by subscription," doubtless under town control, at a point not now known. Four years later the old one was sold. None of these meeting-houses had pews, seats being assigned by a committee, of whom the pastor was one. In 1709 the town voted to enlarge the meeting-house by an addition of ten feet at each end, with changes in the galleries, new floors and seats, and it appears the minister and a few others had pews therein built by themselves. In 1737 "Pew Room" was sold, the elderly men paying most for church matters to have first choice.

Mr. Rawson died in 1715, aged fifty-seven, after

preaching in Mendon thirty-five years. He was twelfth son of Secretary Rawson. His body, with that of his widow, who died in 1748, lies in the town's ancient burial-place. In 1744 the town made provision for the memorial stone at his grave. He was a class-mate and friend of Cotton Mather, and renowned in the Colony for his learning. He knew the Indian language well, and preached regularly in different parts of the town week-days as well as on the Sabbath, to Indians and whites with equal fidelity.

Rev. Joseph Dorr was settled in 1716 at a salary of seventy pounds for the first year, and seventy-five pounds after; "and for settlement or encouragement, the sum of one hundred and sixty pounds,—one hundred pounds in money." He also was a distinguished divine of great discretion, and during the controversies with the East Precinct, which long agitated the town and forced him to self-defence in the town-meetings, he appears to have behaved with great wisdom, and finally to have won general approval. His wife was Mr. Rawson's daughter. His son, Judge Joseph Dorr, Jr., widely esteemed during the Revolution, has been already mentioned. His pastorate continued fifty-two years, till his death, March 9, 1768, and his body lies near that of Mr. Rawson. In 1730 the fourth meeting-house was begun. "Towards the raising," the town voted to "provide a barrel of Rhum." This house was fifty feet long, forty-five feet wide, twenty-four feet high, and remained till 1846. Controversies about its location lasted for years, and even after its erection. The opponents to the location, finally established near the old burying-ground, even tried to cut down the frame, and a hundred and sixteen years later the marks of their axes on the southwest corner-post were plainly seen. It was seven years before its final completion, and soon after, in 1741, the East Precinct, doubtless in consequence of differences concerning the new meeting-house, was organized. November 8, 1751, the four pastors, respectively settled in Milford, Upton, Uxbridge and Mendon, united in an association which has ever since continued. Mr. Dorr was long its moderator, and apparently its master-spirit. It gradually enlarged its field of work and membership, and is now called the Mendon Conference, instead of the Mendon Association, as at first. Toward the close of Mr. Dorr's life, Rev. Benjamin Balch preached in Mendon for a few months on account of Mr. Dorr's disability, but before the end of 1768 he was ordained at the South Parish, "Chestnut Hill," where a new meeting-house, still standing, was erected the next year. He was followed in Mendon by Mr. Penniman, Mr. Messenger and perhaps others.

April 17, 1769, Rev. Joseph Willard was settled. He proved to be an earnest, out-spoken man and a zealous patriot during the war, but difficulties arose between him and his people, and he was dismissed in 1782. Rev. Caleb Alexander was settled from 1786 to 1802. He afterwards became a distinguished writer and teacher in Onondaga, New York. Mr. Alexander disciplined the Mendon Church much more than former pastors, and had many contests in consequence. He died in Onondaga in 1828.

In 1805 Rev. Preserved Smith became pastor over the Mendon First and Third (South) Parishes, and labored till 1812. He had formerly preached in Rowe, Mass., and returned thither, preaching in that place thirty-five years in all. He died 1834 in Warwick, Mass. In his youth he served five campaigns in the Continental Army, and was present at Burgoyne's surrender. As a minister he was popular and influential, with liberal tendencies in his religious thought.

Rev. Simeon Doggett succeeded him in 1814, and in 1818, after much controversy, led a majority of his people to adopt Unitarian views. Mr. Doggett was dismissed in 1837, and died in Raynham in 1852, aged eighty-seven. He was much esteemed as a teacher, and maintained an academy in Mendon many years. In 1820 the First Parish Church, still used as a house of worship, was built on land given by Seth Hastings, Esq. It was then considered one of the finest in the county.

Rev. Adin Ballou, the venerable pastor, so long settled in Hopedale, was the minister in Mendon from 1831 to 1842. Since his service, with the single exception of Rev. George F. Clark, preacher from 1871 to 1883, all the ministers in Mendon have officiated for only brief periods, which, as regards the First Parish, are as follows: Revs. Linus B. Shaw, 1842 to 1844; George M. Rice, 1845 to 1847; George G. Channing, 1847 to 1849; William H. Kinsley, 1850 to 1851; Robert Hassall, 1852 to 1856; Stillman Barber, 1856 to 1860; William T. Phelan, 1863 to 1866; Richard Coleman, 1866 to 1868; David P. Lindsley, 1868 to 1871; George F. Clarke, 1871 to 1883; Aaron Porter, 1883 to 1885; James Sallaway, 1885 to 1887; Walter C. Pierce, 1888.

It is noticeable that since Rev. Joseph Dorr's death, in 1768, out of the very long list of his successors, no minister of the parish has died in Mendon except Rev. William H. Kinsley, who died in 1851.

With the diminution of population the attendance on religious worship has steadily diminished, and few now congregate where so many generations have successively assembled; but the parish, incorporated separate from the town in 1784 and perfected 1792, still exercises its corporate powers and retains its property.

There were many who did not accept the Unitarian views adopted by Mr. Doggett's followers, and in 1828 they organized the "North Congregational Church," adopting in substance the creed and covenant discarded or modified by the First Church. A meeting-house was built in 1830 on Main Street, and Rev. John M. Perry was ordained 1831. Rev. Thomas Riggs had preached prior to this. Mr. Perry resigned in 1835 to become a missionary, and soon after

he and his wife died in Ceylon of cholera. Rev. Thomas Edwards was ordained 1836 and dismissed 1840. Rev. Andrew H. Reed preached from 1841 to 1848, followed for about three months by Rev. Dwight. Rev. Charles Chamberlin was pastor from 1848 to 1851, when Methodist pastors were employed till 1853, followed by Rev. Demis for a brief period, and the last pastor, Rev. E. Demond, closed his labors October 31, 1858, after about three years of labor. The last two were Congregationalists.

The records of this church and society are very few. It was always feeble. Their meeting-house was sold in 1865 to the Methodist Episcopal Society, which many of the North Church members had already joined.

The weakness of the North Church was so apparent in 1851, that the hiring of a Methodist preacher was generally approved by the society, and thereby much support was gained. In 1853 this plan was abandoned and the Methodists forced to leave. They accordingly held their first meeting June 2, 1853, in the town hall, organizing as a society June 9th. Immediate efforts were made to raise funds to build a meeting-house, and land had been bought and foundations laid before 1855. During that year the walls were raised seven feet, but the material was such that during the winter following, it was greatly injured by the weather.

Financial misfortunes to the manufacturing interests of the place followed, resulting in a loss of population and confidence severely felt by this society, which had but from thirty-five to forty members from the first—and in 1859 its creditors brought a suit, settled only by a sale of its property.

From this misfortune recovery was slow, and it was not till 1865 that they were able to buy the old North meeting-house, which was repaired, remodeled and dedicated in 1866. The church and society did not continue to flourish, though preachers were regularly sent for many years, closing in 1879. The pastors in adjoining towns have, however, from time to time for a few weeks, held services in the church, but not since 1886. The list of Methodist preachers is as follows. Rev. C. S. McReading, located in 1851; Rev. G. L. Hanaford, 1852; Rev. John L. Day, 1853; Rev. Wm. Pentecost, 1854; Rev. G. R. Bent, 1856; Rev. J. Emory Round, 1858; Rev. W. A. Clapp, 1860; Rev. L. B. Sweetser, 1861; Rev. W. M. Ayers, 1862; Rev. Augustine Caldwell, 1866; Rev. J. Mosely Dwight, 1868; Rev. J. W. Coolidge, 1869; Rev. John L. Locke, 1871; Rev. Joseph Williams, 1872; Rev. Elisha Brown, 1873; Rev. Phineas C. Sloper, 1876; Rev. George E. Hill, 1879. There was no pastor for a part of 1862, and none during most of the time between April, 1874, and April, 1876.

Each of the religious societies organized a Sunday-school in connection with its other work, and some have been formed in different school districts. That of the First Parish is still doing its work, but there has been no other in town for several years.

The Quakers maintained a meeting in Mendon village from 1729, when their house was built, till 1841. It is indeed likely they had meetings some years prior to 1729. The East Blackstone Friends' Meeting-House, at first known as the South Mendon Meeting-House, was built in 1812. If Quakers were ever persecuted in Mendon, of which there are a few traditions of doubtful authenticity, they appear to have been generally well esteemed and their scruples duly regarded. In 1758 thirty-two were exempted from military duty, in which list we find, among other names well known, Aldrichs, Buffums, Farnums and Southwicks. In 1742 the town voted to grant the Quakers, for the enlargement of their meeting-house yard, a strip of land two rods wide, to be taken from the ten-rod road, and there are other instances on record showing similar regard for them. Moses Aldrich, 1690–1761, was one of their noteworthy preachers laboring at home and abroad. He was a descendant of one of the early settlers and lived and died in Mendon. The old meeting-house was sold, taken down and removed in 1850.

CHAPTER LIX.

MENDON—(*Continued.*)

EDUCATIONAL HISTORY AND CLOSING REMARKS.

Early Records and Tradition Concerning Schools—Notices of the Earliest Teachers and School-Houses—School-Dames—The District System—The High-School—Some Noteworthy Events in Mendon's Recent History and its Present Status.

THE early records in regard to schools are scanty. The first is as follows:

1667, July 14th. At A Generall Town Meetinge Grainted then to Coll. William Crowne and to his assigns and the present Minister there shares of meadow in that wh is called the Rocke Meadow, if they will hould out, and wh is beyond Goodman Moore's Lott; And the Scoole Meadow is Reserved and soe ordered pte for A Scoole when ye Place is able to Mayntaine one, as alsoe that pte wh is to be sott out for the Gleeb Lott is to be there, but that pte of Meadow wch is for the scool is Lieft to be agreed on for ye quantity, and then if ye Coll. and Minister's shares in the Rock Meadow want is to be made up here or In the North Meado not exceeding 10 Acors.

In 1672 the town voted that a twenty-acre lot, "with all the privileges that other lots of that size have," be laid out near the ministry lot for the school. In 1674 the school-master's home lot was "laid out between John Aldrich's house lot and the ten-rod highway that leads to the mill." The fatal Indian attack soon followed, and no record of importance of the year 1675 is found nor any at all after that date till 1680. Even before 1675 there may have been public school instruction, and it is hard to believe, as some do, there was none in Mendon till 1701.

There is, however, no definite record till the following in that year, which shows that March 3, 1701, the town passed a vote directing the selectmen, with Mr. Grindal Rawson, the minister, "to treat with Dea-

con Warfield, upon his refusal, with some other person whom they shall judge suitable, to be a Schoole Master to teach the children of the towne to read, and for this or any other person's encouragement in said work the town shall pay ten pounds in good current pay at money price, and each person sending children to schoole to pay one penny a week." Thereupon agreement was made with Deacon Warfield and recorded. He was "to keep scool half a yeare and to begin on Munday ye 14th of April next, and for his pains to have five pounds in good current pay at money price, and one penny a week for every child that coms to scoolle." John Warfield, Sr., and John Warfield, Jr., are both named in list of 1685, and at a later date we know they occupied the lot called in 1774 the "Schoolmaster's home lot." The elder Warfield died April 12, 1692.

Deacon Warfield, the schoolmaster of 1701 and the first known as such with certainty, held the position till 1709 at least, and, perhaps, till 1712. January, 1709, the town voted to build its first school-house twenty feet by sixteen and seven feet between joints. It stood near Deacon Warfield's home lot, and most likely where is now the George family cemetery. In March of that year Rev. Grindal Rawson offered to board A Latin scoolle master for four years" if the town "would retain him," upon which the town voted "that the towne accept of sd offer" and "to give twenty pounds a year for that service." Whether one was employed or not is not known.

November 12, 1712, the selectmen met in order to procure a "Scoole Master, the Towne being destitute of one," and met again December 13th, when Robert Husse, from Boston, was hired. He came to Mendon December 12th, and was to teach till May 1, 1713, for which "he shall have," says the record, "five pound paid him for his service and his Diet the s^{d} time, and to begin" (boarding?) "at John Farnum's and ther continue untill the 28th of January."

Martin Pearse was hired by the selectmen, in 1714, to keep school at seventeen pounds for one year, with "board and Dyett."

William Boyce followed in 1717, at twenty-eight pounds a year. He continued till 1728. In 1721 his contract contained the curious provision that he was to keep a "Reading and Wrighting school during the year, unless the Town should be presented for want of a Grammar School," when he was to "cease keeping at ye Selectmen's order."[1] A year later and doubtless thereafter, the town apparently not having been summoned before the grand jury, he continued teaching at four places alternately, viz.: "At the school-house, over the Mill River, at ye south end of the town, and about the Great River."

[1] The Province Acts of 1692-93 fined towns with fifty householders twenty pounds for failure to employ a master to teach reading and writing. Those having one hundred householders were required to employ a "grammar-school master," "well-instructed in the tongues." In 1721 undoubtedly the selectmen believed there were in Mendon one hundred householders.

Mr. Grindal Rawson, perhaps the first resident in Mendon to graduate from Harvard College, was engaged for six months after October 24, 1728, for a salary of twenty-two pounds ten shillings. He was the eleventh child of Rev. Grindal Rawson, had recently left college and taught in 1729 and 1730. It is probable he was the first to teach more than reading and writing. He was afterwards minister at East Haddam, Conn., dying there in 1777. His cousin, Capt. William Rawson, an earlier graduate of Harvard, taught the Mendon school in the winter of 1729–30, at the rate of forty-five pounds per year salary.

Samuel Terry taught a grammar school in 1733. May 15, 1732, "School Dames" were authorized "to keep school in the Outskirts of the Town," and thirty pounds were appropriated for the purpose. These were the first of the long list of women who have adorned and elevated Mendon's public schools.

John Field followed Mr. Terry, teaching from 1735 to 1737; salary, forty-five pounds per year. He was succeeded by Capt. William Rawson, 1735 to 1742, at fifty pounds; but after him Josiah Marshall taught at nineteen pounds a year in bills of the "last emission." The fluctuations of the colonial currency, or bills of credit, make the rates of wages misleading.

By vote of the town, no schoolmaster was hired in 1743; but Mr. Marshall taught again in 1744, and it would appear continuously till the spring of 1747, when the town voted not to employ him, and sold their school-house for fourteen pounds, "old tenor." In the autumn they voted to build a new one, the same size as the first, at the north end of the Training Field. This house stood near the present location of A. W. Gaskill's barn, and was completed in 1749.

Mr. Marshall taught but four months in 1748, and that in the old school-house.

In 1749 there was also a vote that the Grammar School should not be kept in the new school-house, and the next year there was a nearly unanimous vote not to have Mr. Foster for their teacher, and to have Mr. Dorr's son, Joseph, and Capt. Eleazer Taft s son, Moses, "Keep school by Spells, as they can agree." The same arrangement in substance continued the next year, but with an added declaration in favor of having Joseph Dorr when possible. Both these teachers were Harvard graduates.

Between 1757 and 1760 the town's control of the schools seems relaxed, and signs of a new system appear. The town left the settlement of school matters, heretofore controlled by direct vote, to the selectmen, and in 1760 we discover the existence of eleven school districts, drawing, and doubtless expending, the money they raised for schools under town authority.

As late as 1751 there were but two school-houses, that in the East Precinct (Milford) having been built in that year. But it is clear that the several districts took complete control of their schools after 1771, perhaps a little earlier. Little is to be learned

of their progress from that time to 1790. In 1789 a statute made it the duty of the ministers and selectmen to visit schools and advise and examine the scholars. Their authority was not well defined, and though they were doubtless interested and useful, their position was one of honor and dignity rather than of direct responsibility. From forty to one hundred pounds were annually raised for schools, and it is quite probable most of the schools were taught in private dwellings. In 1789 the town voted to sell the old school-house on the "Training Field," and in 1794 voted to raise six hundred pounds to build a school-house in each district. Later this was reduced to a grant of three hundred pounds, for building and repairing school-houses. This was increased by one hundred and fifty pounds in 1795, and that in turn voted down, but finally, in 1797, six hundred and sixty-six pounds were granted for building and furnishing school-houses, committees meanwhile having been chosen to supervise the work, all of which shows a strong probability that before 1800 each district had a school-house. In 1796 the first School Committee was chosen, but it is not plain that the town did this every year after. It was probably preferable for the most part to have the ministers act. They generally had students fitting for college or studying theology under their tuition from 1700 to 1830, sometimes, as in Mr. Doggett's case, maintaining an academy; and their approval of students and teachers, too, was much desired. Indeed, after 1789, teachers not college graduates must have it before they could lawfully teach.

From 1800 to 1827 from $600 to $800 was annually raised for schools, and from $1200 to $1800 from 1827 to 1844. The income of proceeds of sales of school lands made prior to 1727 had been applied to the support of schools for a period not now known, but it must have been an insignificant sum. After 1837 the income of $6927.64, received from the United States out of the "surplus revenue," was also thus applied till Blackstone was incorporated, in 1845, when only $2118.19 was left for Mendon, and in 1880 this was used to reduce the town's general indebtedness.

The statute of 1826 introduced the effectual control of public schools by the School Committee. They were first paid in Mendon in 1832, when $10.00 was voted them, "providing they are prompt and regular in visiting the schools." The people clung tenaciously to the district system, and jealously reserved all possible control of the schools to the district or prudential committees down to 1869, when the system was abolished by law. Any fancied assumption of undue control on the part of the town committee was likely to be followed by the election of a new board at the next town-meeting.

The schools, however, progressed steadily, and from the time of Grindal Rawson's graduation, in 1728, Mendon has sent out students who have won scholarly fame from New England colleges. Dr. Metcalf, in his "Annals," gives us the names of ten such graduates, all from Harvard before 1800, and twenty-three graduates of colleges or professional schools between 1800 and 1860. After an apparent lull in educational interest, a new zeal appeared to arise in the winter of 1867–68. It manifested itself in a school, gathered by consent of the school authorities, in the smallest school-house and one of the most remote in situation in town, where some of the more advanced pupils of various and distant schools assembled, and where they enjoyed instruction in studies more advanced than usual in such schools. In view of the progress thus made and the ambition aroused, the town voted in 1868 "to establish a high school for the benefit of all the inhabitants" to be kept in the town hall during the fall and winter following.

Mr. Henry Whittemore, afterwards a successful teacher and superintendent of schools in other towns, achieved such a success here that the school was continued and has been ever since, though sustained by a voluntary expenditure on the part of the town and often suffering from insufficient support and the errors of inexperienced or ignorant instructors. But the influence of the school, imperfect though it be, has been very great and has decidedly elevated educational standards throughout the town. It may be worth noting that the "Grammar School" of 1729–69, with its instruction in mathematics and "the tongues," outranked the common and "Dame" schools, was for the benefit of the townspeople generally, and ended with or about the time of the advent of the district system. As that disappeared the town again assumed full control, and in its High School restored the ancient Grammar School in a modernized form. The tenth anniversary of the High School was celebrated in 1878, when the public testimony of its former members was strongly in its praise as a power for good in their lives; later evidence is to the same effect. For the last fifteen years a majority of the town's teachers have been taken from its High School. It is doubtful if, during the ten years prior to its establishment ten of the Mendon pupils of the common schools sought any education in schools of higher grade, while in twenty years since 1868 more than forty entered such higher schools or colleges after taking the opportunities offered in the Mendon High school. Of these at least twenty have taken or will soon take diplomas from such institutions. Among them are graduates from Harvard, Dartmouth, Amherst, the Worcester Polytechnic School, the State Normal Schools and schools of law and medicine.

Such a record shows the town has not fallen back in ambition or achievement in the line of educating its children.

The names of teachers of Mendon High School and time of service are: Henry Whittemore, 1868–70; Daniel N. Lane, Jr., 1870–74; Benjamin F. Harmon, 1872: Ernest L. Scott, 1874–75; Parker P. Simmons,

1875–76; Frank C. Meserve, 1877–78; F. A. Holden, 1878–79; Walter M. Wheelock, 1879–80; J. A. Joy, 1880–81; John C. Worcester, 1881–82; Walter S. Bosworth, 1882–83; S. W. Ferguson, 1883–84; N. Currier, 1884–85; O. C. B. Nason, 1885; Volney B. Skinner, 1886; J. Q. Hayward, 1886–87; Hill Williams, 1887–88; Wendel Williams, 1888.

Closely allied to the educational history of Mendon is the story of the founding of the Taft Public Library in 1881, by Mrs. Susan E. (Lee) Huston, late of Providence, Rhode Island. Born in Mendon, July 17, 1824, and early orphaned, Mrs. Huston had exceedingly limited opportunities for reading and but little school education. Whatever advance she made in learning she was wont to attribute to the influence and aid of her older half-brother, Putnam W. Taft, late of Worcester, but also a native of Mendon. At his death Mrs. Huston received a share of his estate and unselfishly determined to apply a large portion thereof so that the people of her native town might ever after enjoy what in her early days had been denied to her,—an abundance of good books. To this end she gave the town one thousand dollars to establish a free public library to be at once useful to the living and a memorial of her brother, whose name it bears, and who, in his lifetime, had expressed a desire to do something of the kind. By the terms of the gift the town is to provide a place for the library and yearly add new books to the value of seventy-five dollars, at least. This it has done, and after Mrs. Huston's death, July 4, 1884, unanimously voted to erect a tablet to her memory in its library building, already adorned with her portrait and that of her brother. The library has received gifts from time to time, and now has over twenty-five hundred volumes, largely standard works. It is very freely used, is greatly valued and its founder held in grateful and loving remembrance.

No sketch of Mendon's history would be complete which did not notice a few events of minor importance perhaps, but which, at the time of their occurrence, attracted great and general interest.

Such was the erection in 1840 of Harrison Hall and school-rooms beneath, and its purchase in 1849 by the town, connected with which many acrimonious contests and more than one lawsuit arose. Happily, though in constant use ever since, the building, with its lot recently enlarged, still remains, is in good repair and useful as ever, while the bitter strifes of which it was the occasion exist as faint memories alone.

Pleasanter recollections follow the town's bi-centennial celebration in 1867, of which mention has been made. Rev. Carleton A. Staples, one of the town's favorite sons, now of Lexington, was orator of the day, and Judge Henry Chapin, of Worcester, the poet; General John M. Thayer, of Nebraska; Rev. Adin Ballou, of Hopedale; Putnam W. Taft, Hons. Ira M. Barton, E. B. Stoddard, Judge H. B. Staples, of Worcester; Francis Deane, Esq., of Uxbridge; Rev. Lewis F. Clarke, of Northbridge; Dr. M. D. Southwick, of Blackstone; Hon. George B. Loring, of Salem, and others, delivered addresses or read poems. There were letters of regret read from Governor A. H. Bullock, General B. F. Butler, Hons. Levi Lincoln, John H. Clifford, George S. Boutwell, Emory Washburn, Stephen Salisbury, Judge Charles Devens and others.

October 31, 1877, some hundreds of people assembled to commemorate the one hundred and seventy-fourth anniversary of the death of the pioneer, Sergeant Abraham Staples. Two of his descendants, Rev. C. A. Staples and Judge H. B. Staples, on this occasion dedicated a granite monument to his memory and, with others of this well-known family, delivered appropriate addresses.

There is in Mendon's old burying-ground, where this Staples' monument stands, a stone bearing the name of Deborah Read, and the date 1702, and one with the name of Abraham Staples, and the date October 20, 1704, is next in antiquity. On the authority of Judge Staples there are but five older ones known in the county, all in Lancaster.

Another memorial stone, and very useful, also, in the form of a large watering basin, highly finished, and suitably inscribed in memory of Hon. David Joy, originally from Nantucket, was given to the town by his widow. It stands at the junction of Main and Hastings Streets. Mr. Joy lived in Mendon, for several years and died abroad in 1876. The basin was not fully made over to the town till 1884, since which date the town has kept it supplied. It was set up in 1877.

It is apparent that from the beginning what is now Mendon always had a moderate growth in population. From 1840 to 1875 it was probably about stationary, having not far from twelve hundred inhabitants.

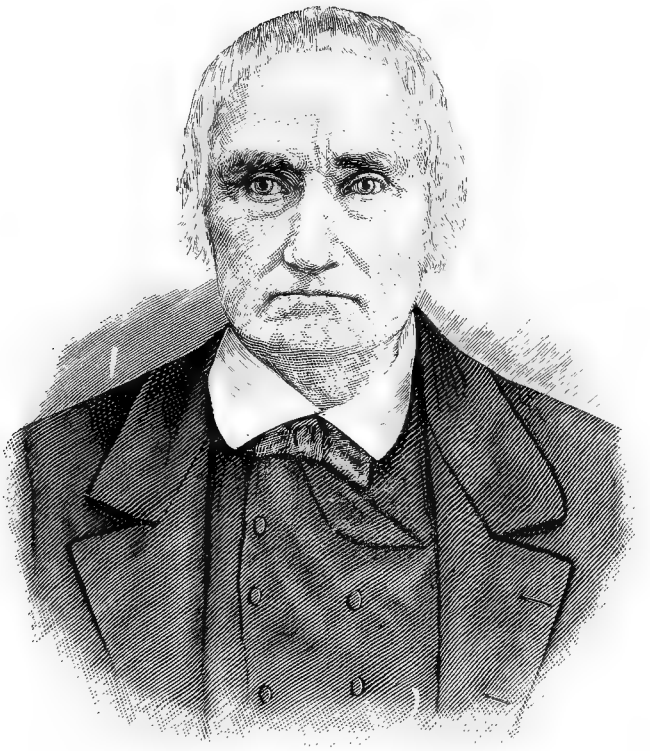
Compelled to rely upon its fertile farms, like similar Massachusetts towns, it has long seen its sons going to swell the population of larger places, but it is still strong in self-respect and is evidently as much respected as ever. Surrounded by the busy towns formerly within its limits, it seems content, in some measure, with the traditions of its past, and to look on the turmoil around something as a mother on her children at play, without taking much part in their restless activity. Its population in 1885, numbering only nine hundred and forty-five, is largely of pure New England stock, and it may be doubted if, in any town in Worcester County, the people retain more of the habits and sterling character of their New England ancestors.[1]

BIOGRAPHICAL.

OBADIAH WOOD.

Mr. Wood was born in Uxbridge, Mass., March 16, 1773. He was the son of Solomon and grandson of

[1] In the preparation of the foregoing, the "Annals of Mendon," compiled by Dr. John G. Metcalf, and published by the town of Mendon, 1880, also the published historical discourses of Rev. C. A. Staples, have been freely used.



Obadiah Wood

Obadiah. The subject of this sketch married Abey, daughter of Israel Mowry, of Rhode Island, by whom he had nine children. The early life of Mr. Wood was spent as a farmer in the towns of Uxbridge and Mendon. He then learned the trade of a mechanic, that of a wood-workman. The first of his work in this line was the manufacture of chairs and spinning-wheels. After the establishment of factories along our streams, Mr. Wood found his occupation partly gone. He was next employed in some of these factories in the region where he lived in other lines of wood-work. It is claimed for him that he was the first bobbin-maker in this country, his orders coming from all parts of the United States as time rolled on. His bobbins also found their way to the South American States,—he was quite successful in this business. While a resident of the town of Mendon he was honored by being chosen to fill all of the important offices in the place. He was elected to the Legislature from Mendon in 1835, and again in 1836. While a member of that body he introduced a bill to reduce the number of members to be chosen annually as members of the House of Representatives. The bill was favorably received, and became a law. He was at one time chosen one of the State directors of what is now the Boston and Albany Railroad. Mr. Wood was a man of strong will-power, earnest in what he thought to be right. In politics he was originally a Jacksonian Democrat, but, with the rise of the Republican party, he saw the opportunity to do something to check the advance of the slave power. Believing in equal rights for all men, he united himself with the new party, as the best means to accomplish the end desired.

He was a man of sterling integrity, ever laboring for the public good. All matters brought to his notice were carefully weighed, and his decisions were generally found to be correct, and in accordance with right and justice. He is remembered as a lover of books and as a skillful mechanic, who did much in those early days of our history to advance the prosperity of the towns and county in which he lived, leaving behind footprints not yet effaced.

He died July 29, 1852, at the ripe old age of seventy-nine, respected by all who knew him.

CHAPTER LX.

BERLIN.

BY REV. W. A. HOUGHTON.

In introducing our modest little town to Worcester County we have to say that we ought to have been much larger. A line on the map touching Boston and Albany justifies the scheme of some shrewd capitalists of sixty years ago, of connecting the two cities by canal (*á la* Erie), which would have divided our town in halves. A speaker of our House of Representatives lately said that had the project been consummated, Boston would have been the metropolis instead of New York. The Central Massachusetts Railroad has, by nature, the pre-eminent "right of way," which it has taken through Worcester County. But other considerations besides directness determine such issues. So, too, had Lancaster, when we were a part of it, only accepted the county-seat, how different would we have been, and all the northern Worcester County towns; great results follow inconsiderate action!

As it is, Berlin is one of the eight towns of the county having less than a thousand in population, and two of these towns join us. Berlin, now bounded north by Bolton, east by Hudson and Marlboro', south by Northboro' and west by Boylston and Clinton, is, territorially, a section of the original "ten miles square" of Lancaster, and the southeast corner of it.

From 1643 to 1738 we were of Lancaster,—almost a century. We had two or three houses on Berlin soil before the massacre of 1676,—one as early as 1665. That was John Moore's, who located southeast of Wataquadock Hill. In the re-settlement of Lancaster, the families clung to the Nashua River. Berlin territory was not inhabited again probably till about 1700. Garrisons were maintained up to 1720. Bolton had two or three. Our territory had none; but several families had ventured within our present bounds about 1700.

Of early landholders of Berlin, of noticeable extent, were the Johnsons, of Woburn, who settled on the south. Captain Edward Johnson, famous in Woburn as one of its founders, was virtually court surveyor under Governor Winthrop. With two others, he was appointed to supervise the affairs of Lancaster, when not enough "freemen" could be enrolled to do it, not being church members. Hence, probably, his acquaintance with Lancaster lands.

A great-grandson of his settled three sons, Edward, Joshua and Eleazer, on farms which included most of what is now South Berlin. Of these three brothers, two of them married two sisters, daughters of James Ball, of "Ball Hill," and sisters of the first of the three celebrated doctors Stephen Ball, of Northboro'. The other brother married a cousin of theirs, daughter of Nathan Ball, brother to James, on the same hill, Westboro' then, Northboro' now. The Johnsons were prominent in the early history of Bolton and Berlin. They came upon the stage about the time of the separation of Bolton from Lancaster, 1738. Dr. Joshua Johnson, late of Northboro', was one of the last of this family line in this vicinity. The name stood strong in Berlin for a hundred and fifty years. Another branch settled in Leominster. The Lancaster Johnsons were from Watertown. Our line stands Edward, William, Edward, Edward, Jr., who located here his sons.

Samuel Jones, Jr., a grandson of Josiah Jones, of Watertown, progenitor, according to Bond, of the American families of the name, was connected with the Johnsons in Woburn by marriage, and settled near them on the Assabet River, near our Marlboro' and Northboro' lines. The Joneses were a family of like standing, apparently, with the Johnsons. Here the Joneses became more numerous for many years than any other family. Samuel (2d), and third of the line, bought of Benjamin Bailey one hundred and forty-seven acres, 1748, covering all our present centre. One single dwelling of account seems to have been included. This became a hotel, an "inn" in those days. Children and children's children came upon the stage. They established homes mainly upon the first purchase. The third and fourth Samuels raised here their families. The third Samuel was "senior" as to Berlin. The first two were of Concord and Woburn.

Two large families, Samuel (5th) and William, removed to Marlboro', N. H., 1810 and 1825. They have well maintained the family name and character. At present Mr. Ira Jones is sole male representative of the several energetic founders of Berlin.

Our Samuel, Sr., gave to the town its parish common and ground for cemetery. He was a valiant patriot and "militant" in any good cause. In the ecclesiastical conflict between Rev. Mr. Goss and the town, who desired to settle Mr. Walley, "Land'rd Jones" was reported as praying that the Lord would "overturn and overturn

Till Goss should lose his case
And Walley have his place."

In some way "Constable Jones" served in the execution of Mrs. Spooner, in Worcester, 1778. So tradition has it.

On the east of the town Stephen Gates and sons held several hundred acres, including our principal pond, bearing his name. Gates came from England, 1638, by way of Hingham and Cambridge to Lancaster. Our Lancaster historians represent the family as decidedly "tropical" in blood. Daughter Mary confronted the minister in the public assembly. Prosecuted, she shook off the dust of her feet and married John Maynard, of Sudbury, and from them came several good-blooded Maynard families to Berlin. But the Gates name subsided. Some settled in Stow. The Gateses were patriots in the wars.

Between the Gates lands on the east of the town and Johnsons on the south came in John Wheeler and John, Jr,, from the Concord Wheeler hive. They have multiplied, "and still increase." The name, of late years, has represented more families and persons than any other. Their first home was on the south of Sawyer Hill. Now they have a hill of their own in the north part of the town. They have been connected mostly with the Quakers, whose meeting-house stands just over the Bolton line in Fryville.

The original Wheeler purchase was three hundred and sixty-two acres in Marlboro'. The Assabet Meadow is named. This of Thomas Henchman, by "John Wheeler, of Concord, son of Obadiah Wheeler, late of Concord, deceased." This John Wheeler died in Marlboro', 1721. His son, John, about that time moved on into Shrewsbury (now Boylston), where he died, leaving estate to his son John.

On the Marlboro' homestead, now in Berlin, Jonathan, son of John, Jr., appears with family, 1752. He is the head of the Berlin families. George Tolman, of Concord, has made a thorough development of the Concord Wheelers from their immigration, correcting many errors.

Sons Jonathan, Jr., Stephen and Levi settled in Berlin; Perigrine in Richmond, N. H.; Jonathan, Jr. married Mary Buffum, of which blood all her descendants think very much; they hold a yearly picnic the day after the August "Quarterly Meeting."

Berlin on the west was peopled by Lancaster inhabitants from the Nashua. Philip Larkin, of Irish descent, established our "Larkindale." Singularly there gathered round him other nationalities till the region was known as the "Six Nations." Philip left a vigorous posterity, well represented as yet. But he disappeared in early old age, leaving for Baltimore. No further trace of him from about 1750 till a Berlin soldier came across his grave and tablet in Poolesville, Md., 1862. He owned here several hundred acres of land, which he distributed mostly among his sons. His neighbors suggested that he left to have, at last, the offices of the Catholic Church. There was no such church nearer at that date. The suggestion has reason in it. Tradition has it that Philip, by collusion with the captain of the ship, evaded his military enrollment in the King's army. He found employment with Rev. John Prentice, of Lancaster. On the north, almost the entire section of the town was owned by the Lancaster Houghtons. John Houghton, born in England, was among the first proprietors of the "ten miles square" of Lancaster. Before the Rowlandson massacre, 1675, he had land three miles from the home settlements. His sons succeeded to the same after his death, 1684. Two of the sons settled on Berlin territory. Some of that land was in the same name for six generations, 1675–1825. The writer of this now alone represents that name in Berlin. The Houghtons vied with the Wilders and Willards in Lancaster as to numbers. John Houghton, second born, 1650, died 1737, was one of Lancaster's most noted citizens. A majority, perhaps, of the Lancaster Houghtons fell into Bolton, 1738. Robert, son of John, Sr., was the progenitor of the principal Berlin line. The foregoing were our earliest settlers.

Some other names will appear in their special localities. In point of time as to settlement, Sawyer Hill is first. Gates Pond lies at its eastern base. Josiah Sawyer, grandson of the famous Thomas Sawyer, Jr., of Indian fame and captivity, who redeemed

himself and son by introducing into Canada the first saw-mill, settled on Gates Hill, now Sawyer Hill, about 1740.

Here he reared, and nurtured in all good training, a large family. He was first deacon of the Berlin Church. At last he divided his estate among his four sons, William, Aholiab, Josiah and Silas. The hill is still represented by a great-grandson, Jonas Sawyer. One of the homesteads has of late been the residence of Madam Rudersdorf, the famous teacher of music and voice culture. "Lake Side" she called it, for its view of the lake and many distant mountains. Berlin Centre lies in the valley on the west of the hill. The Sawyer name has ever been largely represented in Berlin, socially and religiously.

William Sawyer, son of Deacon Josiah, was a thorough patriot. He married into the prominent Barrett family, of Bolton. William Sawyer Newton, town clerk of Brattleboro', grandson of Cotton Newton, of the Marlboro' and Northboro' line, an early settler here, represents the Sawyer and Barrett families in Vermont.

Major Oliver Sawyer, deacon of the Orthodox Church in Berlin, and Amos, his brother, deacon of the Unitarian Church, both reared here influential families. They were sons of William Sawyer and Hannah Barrett. Amos, Jr., was thirty years chorister in the same house of worship, also several years a Representative in the Legislature. Two sons of Dea. Oliver also repeatedly served the town in this capacity.

Hon. Henry O. Sawyer, merchant, of West Boylston, and his partner, Walter Barrett Sawyer, are grandsons of Dea. Oliver. Their father, Oliver Barrett Sawyer, was their predecessor in their business.

Wheeler Hill, named from early settlers and continued occupancy, is an offshoot from the Bolton and Indian Wataquadock. It is within bugle-sound of Sawyer Hill and several others partially encircling it. Jonathan Wheeler, Jr., of the fourth generation, was its first occupant, 1778.

Baker Hill is another spur of Wataquadock, more westerly. Hon. Samuel Baker, associate judge of the Court of Common Pleas and fourteen years a Senator, settled on the hill in 1765. The hill is now in occupancy of a great-grandson, Alden Sawyer. Samuel Baker is the only family name in Berlin which we cannot trace back a single link. To us he is a genuine Melchisedec. We can do something with John Smith, but Samuel Baker we surrender; yet his name has honored the town more, perhaps, than any other.

Barnes Hill is our western outlook. A finer view is seldom obtained. Doubtful if any other such fine view of Wachusett and intervening hills can be named. Fortunatus Barnes, of Marlboro', settled on this outlook, 1765. He cleaned up the hill of all squatters, settlers and owners, save one, Phineas Howe, whose great-grandson still "holds the fort," Silas Sawyer Greenleaf. None but these two homesteads have ever had a footing on this most sightly crest. In 1865 the Centennial was pleasingly observed. The Barnes' hospitality was abundant and fully appreciated.

Hon. Charles Hudson, whose father had lived within musket range, on Ball Hill, partly in Berlin and partly in Northboro', honored the occasion by an address.

Berlin cherishes the names of Fortunatus Barnes of Marlboro' and Persis Hosmer of Concord, both of historic families. They have largely contributed to our character and standing. Their son, Capt. William Barnes, married into the vigorous Goddard stock, then already established on the eastern slope of Barnes Hill. The son did honor to the family name, and maintained the paternal acres in the best order of husbandry till his death, 1851. No fruit to-day excels the product of Barnes Hill.

Artemas Barnes, only son of Captain William and Hannah (Goddard) Barnes, generously erected, 1876, a costly monument to the memory of Rev. Dr. Puffer; also to Lieut. Timothy Bailey, who died in the Revolutionary service. He gave also the site on which our town-house stands. His life-size portrait adorns the Town Hall. He married Nancy Meriam, a lateral branch of the Lexington and Berlin stock. He died in Worcester, 1877, aged eighty years.

Before naming other families, a view from Barnes Hill may give us the best idea of the town territorially. On the west the land rises from the Nashua River, in Clinton, so that it sheds its water not into the river near by, but carries it across the township into the Assabet. The surface is generally uneven, but of a more than ordinary fertility.

Berlin streams are small, except the Assabet, which flows through the southeast border and receives affluents from other towns. The Centre and the South village are not an intervale proper, but from Barnes Hill seem bounded by it and Baker Hill, Wheeler Hill and Sawyer Hill. North Brook, formed by streams from the north part of the town, and Larkindale, divides the lower area, tending to the Assabet. The Centre contains three churches, town-house, school-house, post-office and a store of common variety. A hotel was burned 1883.

This valley, to the Assabet, is dotted with farms, farm-houses and Old Colony Railroad station. South Berlin village, at the south end of the valley, is quite a flourishing part of the town. West Berlin, at the northeastern foot of Barnes Hill, is the most active business point of the town. The Old Colony Railroad has given it life and energy. The C. M. Railroad makes there a junction with it. The iron bridge of the latter, spanning Felton's mill-pond and the O. C. Railroad, is a very fine structure.

Carterville is a cluster of a score of houses, store, &c., just north of the churches. Here, too, is the C. M. Railroad station. Very few localities present such a horizon-view as Barnes Hill in Berlin.

We waited long for the *Rail*, but it came at last. Four trains for Boston daily and return on the O. C. and three on the C. M. On the latter one hour plus

by way of Hudson, Wayland, Waltham, &c. By the same road, within one hour of Worcester, by way of Oakdale and the Nashua, three times daily. The O. C. Northern Division embraces Fitchburg, Leominster, Clinton, Berlin, Northboro', Marlboro', Southboro', Framingham, &c. We look for "Berlin Junction," now partial, at West Berlin. Few towns have better railroad facilities. Very few, within thirty miles of Boston, have more enjoyable scenery. We have also daily stage express to Hudson Station on the Fitchburg.

Returning to family names, Benjamin Bailey, adjoining the Johnsons, and of whom Samuel Jones bought what is now Berlin Centre, owned much besides; six hundred acres at least. He bought "rights," exchanged and consolidated, till he held in one solid block, apparently, a third part of our present township, and that nearly in the centre. He came in from Marlboro', 1718; was a descendant, probably, of Rev. Thomas Bailey, of Watertown. Rev. Benjamin Bailay, of Portland, Marblehead, now of Malden, is of the fourth generation from Benjamin, of Berlin, "The places that know them shall know them no more." Sons and sons' sons were many years leading citizens here. For forty years the name has not been enrolled in Berlin, save as adopted by a lateral descendant to keep it up. A brother of Benjamin, Barnabas Bailey, had a large farm, including, at his door, what is now the Old Colony Railroad Station for Berlin Centre and South Berlin. Col. Silas Bailey was a younger brother. His son, Lieutenant Timothy, died in the Revolutionary service. The colonel got somewhat into sympathy with the Shays' Rebellion.

William Babcock, of the Dedham and Marlboro' line, settled here about 1770. He was our only *Cincinnatus*, so far as we can affirm, who left his plough in the furrow, and hastened to Lexington at the alarm gun fired from the "Jones tavern." The Babcock name has ever headed our list of citizens, the letter A refusing, almost wholly, to serve us till lately. Five generations from William, inclusive, are on our records and still well represented. Reuben Babcock, father of William, lived in Marlboro', Westboro' and Northboro', without moving, near the present Corey farms.

Adam Bartlett, of Marlboro', with wife, Persis Babcock, sister of William, of Northboro', took possession of the "Stone-house," Baker Hill, about 1808. Sons and daughters were born to them, ten in number, but the one destroyer has left us but one representative, Amory Adam, of the fourth generation. A Sawyer and Bartlett Association hold annual picnic meetings at the Stone-house about the 1st of September.

The name Bassett is modern in Berlin, but honorably represented. Three brothers came from Richmond, N. H., 1856, with their venerable parents, of the Society of Friends. Elisha settled on one of our best farms, on the Assabet; William, in the same vicinity; Ahaz settled in Hudson. Hon. William Bassett is the author of a comprehensive history of his native town, Richmond, N. H. He was Senator of his district, 1864.

Thomas and Samuel Brigham came in from that most numerous stock of Marlboro', and traceable to Thomas, of Watertown, 1635. Samuel left no son. Thomas and wife, Asuba Babcock, left Thomas and Paul. No son succeeded these. They both lived by the present central station of the Old Colony Railroad.

The Barber mills (Nathan) were a focus of prominent interest from 1777–1812. Later they were the Carter mills, Polland mills, now Felton's, West Berlin. Whence Barber came is not indicated. The family ceased from our records sixty years ago.

Bride, formerly McBride, is a name first represented here by Alexander, from Ireland and Charlestown, 1745–50. The families were numerous fifty years ago. Only two at present in Berlin. All the sons—John, James and Thomas—were more or less in the colonial armies.

Bruce is Scotch. Our records have borne the name a hundred and fifty years. They were a family of soldiers, in the French and Indian Wars, also in the Revolution. They came from Sudbury. John and Roger, of Marlboro', preceded Daniel, the head of Berlin families. We cannot give the date of immigration.

James Butler was of Woburn and Lancaster. James, Jr., without moving, was of Lancaster, Bolton and Berlin. The name was but a few years on Berlin records till recently. Lancaster, Bolton and Leominster took in most of them. Their Lancaster homes were west of Clam-shell Pond.

Christopher Banister Bigelow, of the Marlboro' line, so ancient, reared a large family, five or six of whom have reared other families within our borders. One only on our records at present. Abraham Bigelow, of Northboro', is son of Christopher.

The Carter families of Berlin, always relatively numerous, are of the Woburn stock. Rev. Thomas Carter was first minister of that enterprising town. The Carters were early settlers in Lancaster, and of the most vigorous blood. A full score of the families have made their homes on Berlin territory down to the ninth generation from Rev. Thomas. Chandler Carter, late benefactor of the town, has a personal record on another page.

Cartwright, Francis James, came from England about 1840, with sons Daniel and Algernon, and daughter Elizabeth. Parents and daughter have deceased.

Carley, Job and Silas, were transferred to Berlin from Marlboro' in the construction of the town. *Kerley* was the original form of the family name, pronounced Karley,—hence Carley. Their home was on the Assabet. The progenitor was William, of Watertown, 1642. He was an original proprietor of lands both in Marlboro' and Lancaster. In Lancaster he married, second wife, the mother of Minister

Rowlandson. His brother Henry's family were killed in the Rowlandson massacre. This brought Henry back to the Assabet, where he settled. The Berlin Carleys were his descendants. Their early connections were in the best families of Marlboro' and Lancaster. Job Carley, the last on our records, died here 1856, not of "small-pox," as put on record. That visitation of the family was fifty years earlier.

Cotting, George A., resident in Berlin, Boylston, now of Hudson, has honored his ancestry in erecting in Berlin's new cemetery a sightly and impressive granite monument bearing the Cotting genealogy of his line from the immigration. Josiah, of Roxbury, 1637, heads the line, later of Lancaster. Others of kin settled in New York City, and appeared under the name of Cutting. Cotting is the original. Josiah, Jr., was a Revolutionary soldier of Sterling; Josiah (3d) was physician of Southboro'; Josiah (4th) married daughter of Capt. William Barnes, of Berlin; George A. is their son.

Coolidge: Many in the region, Bolton and Hudson. John, of Watertown, 1636, is counted as head of the American families. His wife was Mary ———. Had Mary, Sarah, Stephen and Jonathan, and John, Jr., who settled in Sherborn. Berlin families have been Stephen, Moses, Josiah, Caleb.

A branch of the Northboro' Fays, descendants of John, of Boston, 1656, settled in Berlin, 1804. Dexter was deacon of the church. His children and children's children still abide. He owned a fine farm on the height of land next to Northboro' line, till of late in the family name. It is now a "gilt edge" butter dairy. The Morse family has been represented in Berlin for fifty years. Aaron Ward, of Marlboro', descendant of Joseph, of Watertown, 1635, settled here 1837; was succeeded by his son Symon on the Assabet, one of the best farms of the region. Winslow B. Morse, on the old "Brigham place," Old Colony Station, is of a collateral branch. Amory C., deceased, was his brother.

Feltons in Berlin are modern and came from Marlboro' 1830–40. Jacob and sons, Otis and Merrick. Two brothers from Scotland by the name of Fife came over about 1730. They located as neighbors in Lancaster, but territorial divisions left one family in Bolton the other in Berlin. The Berlin branch, by James, became numerous. They were enterprising and scattered themselves in several States. Dr. John William Fyfe, of Saugatuck, Conn., is their genealogist. The William Fyfe line, much esteemed, is represented solely by William E. Fyfe, of Clinton, Mass., the fourth William and fourth generation.

The Fosgates for a hundred and fifty years have clung to Gates Pond, in East Berlin. We trace to Robert, sometimes of Marlboro', sometimes of Bolton. Back of Robert the ancestry is obscure. It is the only ancient family among us who still hold their own in a half-score of families.

Five generations of the well-known Goddard family have dwelt among us; all descended from Edward, a stanch old Puritan in days of the hated Charles I. Edward "lost all things" for his religion. William, his son, lost all by the London fire and speculation in New England investments. Josiah, son of William, made a good farmer in Watertown, and William, his son, made a good miller on North Brook, now South Berlin. One name alone, Marcus Morton Goddard, represents, to-day, in Berlin, all these generations. They were among our earliest and most vigorous families.

A family of genuine vigor were the Fairbanks. Jonas was a first proprietor of Lancaster. His son Jabez become a terror to all Indians within scouting distance. Jabez, Jr., and a son of his settled on Berlin premises. The Goddards and Fairbanks joined hands in the marriage of James Goddard, Jr., of the sixth generation, and Keziah Fairbanks, great-granddaughter of Jabez, Sr., in 1785.

Hartshorn was a name unknown in Berlin up to 1840. Dr. Edward, son of Rev. Levi Hartshorn, who died at Gloucester in early prime, came to Berlin after his graduation at Harvard Medical College. He was then the youngest practicing physician in Worcester County. He married a daughter of Solomon Howe, Esq., and settled in professional life. Besides laborious practice, he did much to improve the town by various enterprises. He was chairman in committee for building the present tasteful and becoming town-house, 1869.

Dr. Hartshorn was for seventeen years superintendent of the Congregational Sunday-school. He sold his professional interests in the town, 1854, and with his two sons engaged in the manufacture of family medicines, which business he removed to Boston and followed with his family, 1871.

Edward Howe, son of Dr. Hartshorn, retained his home in Berlin and succeeded his father as superintendent of the Sabbath-school sixteen years. Death severed the connection. He married the daughter of Rev. Wm. A. Houghton, 1869. She died 1876. Second, he married a daughter of R. S. Hastings. He died June 8, 1887, at forty-four years. He represented his district, embracing Berlin, Clinton and Bolton, in Legislature, 1869; was the youngest member, save one, in the House. The first marriage of Edward H. Hartshorn and that of his only brother to only daughter of James Maynard, of Clinton, were on the same day; being the silver wedding of Rev. W. A. Houghton and wife. A great concourse of people were present. The elder brother and the mother of his first two children now lie side by side in the silence of the grave, under the national flag.

Hastings: Four branches of this family of ancient history have given character to Berlin. It is pleasant to know that we have some early blood in America besides the British and the Irish. No doubt the Hastings are true Danes. Mrs. Lydia Nelson (Hastings) Buckminster, of Framingham, the family gene-

alogist, gives us—1664–1864—about one thousand of the name and three times as many of the blood, having "homes from the Atlantic to the Pacific Ocean, and from the Gulf of the St. Lawrence to the tropical regions of South America." Thomas, born in England, 1605, and Margaret Cheney, of Roxbury, are the progenitors. Nathaniel, Jr., of the fourth generation, was first on Berlin territory about 1765. He had a large family. His wife was Elizabeth Goodnow. He was a soldier in the French War—1755–62—also in Revolutionary service.

Ephraim Hastings, of the fifth generation, married Achsah Sawyer, of Lancaster, and settled in Boylston, where his children were born, and where his wife, Achsah, died. He married (2d) Almira, daughter of Rev. Dr. Puffer, of Berlin. He bought the Edward Johnson homestead, where he died, 1855. His only son, Captain Christopher Sawyer, at the outbreak of the Rebellion, though exempt by age from military service, voluntarily organized a company and offered himself for service. He was in the battle of Fredericksburg, Vicksburg and at the capture of Jackson, Miss. Smitten by the small-pox, he rallied and reached Mound City Hospital, Ill., where he died of malarial fever, September 8, 1863. He was buried with civic and military honors beside his own homestead, in our new cemetery, which he had done much to adorn.

Captain Hastings was a man of public enterprise, and executed many important trusts of the town. The trees of the highway, from his own domicile to his final resting-place, bear witness to his public spirit. His farm of generous acres, in the hands of his sons, represents, perhaps, the best specimen of modern agriculture and gardening of this vicinity. The family have presented to the G. A. R. Post his life-size likeness in crayon.

Rufus S. Hastings, twenty-five years merchant and postmaster in Berlin, was separated from the other Berlin Hastings families in the third generation. His father, Major Rufus, and grandfather, Colonel Stephen, were of the most prominent farmers of Sterling, and just south of Washacum Ponds. Their line connected them with the Northboro' Balls of Ball Hill, from Watertown, and with Deacon Jona. Livermore, the centenarian, who lived in three centuries—died 1801. Samuel Hastings, of the second generation, and Sarah Coolidge were their progenitors. Thomas and Margaret (Cheney) Hastings were before these.

Thomas Holder, son of Thomas, direct from England, married, in Mendon, Sarah Gaskill, 1777, and came to Berlin. Both were effective preachers, of the Quaker persuasion. Four sons honored their name and Christian faith: Daniel and Thomas, of Berlin, Joseph, of Bolton, and David, of Clinton. All are deceased. I find the names Gaskill and Holder among the Quakers in their persecutions in the old Bay Colony. Samuel Gaskill, 1662, married Provided Southwick, daughter of Lawrence and Cassandra.

John Hudson, father of Hon. Charles, preacher and legislator, was a member of Berlin Church, and died here 1799. The Hudsons were a family of patriots, and soldiers as well.

Phineas Howe, of the Marlboro' John Howe line, came in by way of Shrewsbury, then Boylston, about 1760. His daughter Polly, who married Abel Baker, son of Judge Baker, raised, in Concord, N. H., a family remarkable for physical development. One son measured six feet, nine and one-half inches in his stockings. At a recent silver wedding of Silas Greenleaf, a great-grandson of Phineas, on the ancestral spot, the trait was observable in the sixth generation, grandsons of Mr. Greenleaf.

Solomon Howe, also of Marlboro', came much later, 1803; bought of the Joneses most of what is now Berlin Centre. He kept a store, also a public "Inn." It was the dining-place for stage passengers between New Braintree, Barre, Rutland and Boston, 1827–40.

Berlin Howards are of Shrewsbury—Timothy, Timothy, Jr., and sons.

The name Jewett has an abiding-place in Berlin records for a hundred years. Jesse, probably from Rowley, with the Spaffords, settled here 1779; married into the Johnson family. The third and fourth generations survive. A son of Jesse, Jr., was major in the New Jersey militia in the late war, suffered a severe wound in the "sword-arm," as he was leading his men in battle.

The Keyes name is modern in Berlin, represented by David, Ziba and their children. Their remotest American ancestor was Robert, of Watertown, 1633. Several of the family name settled in Shrewsbury and Boylston. The Berlin families are of the Shrewsbury branch, Dea. John Keyes. His son Thomas married into the Livermore family, of Ball Hill. Thomas, Jr., was father to David and Ziba.

The Maynards are of most ancient lineage. Our families are traceable to John, of Sudbury, 1638, and Mary Gates, of Lancaster, who confronted the minister. Barnabas, Jotham and Jotham, Jr., were lifelong citizens. Two other Maynard families succeeded them,—George, of Marlboro,' and George W., from Great Bend, Pa. George W. represented his district in the Legislature, 1859.

The Meriams were influential here from 1765 to 1845–50. Amos, from Lexington, of the well-known Concord family, married into the Danforth family, of "Cambridge Farms." Joseph Meriam, Esq., of New York City, is their genealogist (manuscript).

Jonathan Moore, of the John Moore line, of Sudbury, 1650, has been followed in Bolton and Berlin by seven generations. Warren E. Moore and brothers, of Northboro', are the later representatives of Berlin origin.

James R. Park, of Holliston, descended of Richard, of Watertown, 1636, became the owner of the Goddard mills and other estate in South Berlin, 1790,—a family of respectability and good influence in Berlin

for three generations. His son, Colonel Joseph, several years Representative to the Legislature, and his only son, Russell, returned to Holliston, where the father died.

The Berlin Pollards were of Billerica, and descendants of William and Anna, from Coventry, England, 1638. The Berlin families appear about 1720–30, then a part of Bolton, where a majority have since lived. Anna Pollard, wife of William, was the first female who set foot on Boston soil. She lived to her hundred and fifth year. Her portrait is in the Old South Church, Boston.

Joseph Priest and wife Hannah, born 1684, are the eldest born of any in Berlin Cemetery—just two hundred years before our incorporation as a precinct. He was from Woburn, and came by way of Lancaster. Had a large family, which was represented in three or four succeeding generations. A son of his, Joseph, Jr., gave the town, by will, five hundred dollars, our first school fund, to be appropriated to schools alone.

Captain Henry Powers, of unknown lineage, was an early settler on Baker Hill, about 1770. Had a large family, but they did not tarry after the second generation. A grandson of his was killed by murderous assault in Grafton, 1840.

Solomon Rathburn, from Rhode Island, settled in Berlin about 1840. His son, Thomas, was the first enrolled soldier of Berlin in the late war; the first also of Berlin soldiers to die in the high calling. Another son, James, also entered the service. Charles B. is of our progressive farmers on Baker Hill.

Of Southwicks—historic name of Puritan days—we have several families, veritable descendants of Lawrence and Cassandra, the first to suffer persecution here for opinion's sake; more accurately, perhaps, for opposing others' opinions and refusing to conform to the arbitrary laws on religious matters. Lawrence and Cassandra were certainly inoffensive, except in non-conformity. Had the defiers of martyrdom been like them, none would have been hung, defiling the history of the Colony and shaming the Puritan posterity. It is humiliating to read the atrocities inflicted in the name of the law, and sad to know the frenzy of honest souls in the name of religion.

One of the fifth generation—David—and Mary Sweet located on Berlin soil about 1780. They had a most worthy family of thirteen children. Three families of grandchildren of like character abide with us.

The Spafford name has stood by us from the first up to date. The name is the oldest, historically, of any on our records. Our Lancaster "Book of Lands" seems to us quite ancient. But the veritable Spafford name is in the "Doomsday Book" of William the Conqueror, of England, 1066. (See Spafford Memorial, Aphia T. Spofford, Groveland, Mass., 1888.) Rowley was the American family hive, then comprising Georgetown, Groveland and other places. From 1638 to 1888 about fifty-five hundred names are registered. The Berlin line stands,—John, John (2d), Samuel of Lancaster (now Boylston), his two sons, Job and Samuel, settling here in our early town life. Samuel is still represented in grandchildren.

Shattuck, Elijah C., representative 1875, is our only citizen of the name.

Young is a name duly cherished in Berlin. The Berlin family originated in Phillipston, children of Oliver and Grace (Kelly) Young. Miss Nancy Young, of her own earnings and frugality, bequeathed to our town fifteen hundred dollars as a school fund. She and an unmarried brother died on the old Southwick homestead, now Paul Randall's, who came in from Bolton.

The name of Tyler is among the more recent in Berlin. They were of Warwick, and connected with the Bassetts. They represent our best stock-raisers and dairying. Their brother-in-law, William Lawson, has erected the finest mansion in the town, on Sawyer Hill, the "Lakeside" home of the late Madam Rudersdorf.

The geology of Berlin has never been scientifically stated. We surrender, for prudential reasons.

The Central Massachusetts Railroad opened interesting specimens. One was a large vein of graphite. The northwest part of the town is unequaled in boulders short of Cape Ann. A single rocker of many tons lies on a ledge by Clam-shell Pond. Some years ago a woman could put it in motion. Too much rocking has worn it down till only a slight motion can be easily effected. About the pond, on the Larkin lands, numerous Indian relics indicate that some tribe dwelt on the pond borders. Perhaps it was a resort of the Nashaways.

WATER-WAYS.—Of water-ways we can claim about a mile of the Assabet River. This we got by grant of the Great and General Court. Marlborough had swooped in seven miles of that stream and its intervales. Lancaster surveyors set their starting-stake too far east, and so run against Marlborough. That made the Lancaster "Square" a trapezoid. Lancaster settlements began ten years earlier than Marlborough, but Marlborough was awake and got her stakes down first. She probably thought that Lancaster ought to be satisfied with the "Nashaway," of which they boasted so much. Several hundred acres of Marlborough, west of the Assabet, were granted to Berlin, crossing the Assabet at Lancaster, southeast corner, because some of our families owned land on the east beyond the river. Assabet has been variously spelled (Hist. Northborough, Joseph Allen, D.D), sometimes Elizabeth, but the Indian name has gained its standing. It affords Berlin no water-power; the only stream that does is a western tributary to the Assabet, with the modest name of "North Brook," its sources being in the north part of the town. Earliest deeds call it the "Great Brook." This is the stream that fascinated

William Goddard, 1727. At much cost, for the day, he established a saw and grist-mill, 1752–60. The "power" is better at flood than the supply for the year. Another mill was set up by Nathan Barber, two miles above, 1777; another just above that, about 1810, by Thomas Pollard for his son Stephen. Nothing else of permanent water-power has aided Berlin in her industries. Other streams are few and small. Foundations have been laid for another power near Berlin Station, O. C. R. R. Two ponds, "Clamshell," at the extreme west, and "Gates' Pond," at the extreme east, are all we can boast in this matter, except that "Gates' Pond," in Fosgate ownership, is the finest summer resort of the region. Several summer cottages have been built on its eastern shore. The pond is the source of the Hudson water supply, at which many Berlin citizens are very indignant. No man Gates was ever drowned in our pond for the sake of giving his name to it. Stephen Gates was its earliest personal owner, with much land about it. Our denizens stoutly refuse the proposal to call it "Lake Assabet," at Madam Rudersdorf's suggestion. "Clamshell" Pond is its own interpreter.

ROADS.—From the beginning Berlin has held one good mark of "civilization" in its roads. Some citizens here, especially the Meriams, caught the spirit and views of Colonel Ezra Beaman, of Boylston. We did not take to "turnpikes," but from the town to its contiguous neighbors, the fathers were ambitious of good highways. Many petitioners for an open road to their own home had to accept a "bridle-way," for the sake of more public liberality. The main roads were open, of course, while we were yet of Bolton, 1738 to 1784.

Favored in respect to bridges, our taxes have not been excessive. The first and only iron bridge has recently been constructed to span the Assabet between South Berlin and Marlboro'.

The town has not settled upon any one method of keeping up the highways. The old "highway surveyor" has been supplanted—once by a single commissioner. Many still advocate the same, but of late the commissioners are chosen for districts. Berlin is very jealous of concentrated power. The majority are not "Democrats," but all are very democratic. The highway discussions are among the most animated in town-meetings. So they were in the "twenties."

Roads suggest vehicles, and vehicles adapted to the roads. In 1734 Jonas Houghton, the "Lancaster Surveyor," contracted with settlers on Petersham territory to construct a road over a section of Wachusett, such that four oxen could conveniently carry over it four barrels of cider at once.

Only solid wagons could bear the strains of country roads a hundred years ago. But many statements as to the introduction of easier carriages exaggerate the time. The chaise was in use at least a hundred years ago, spelled "shays." Hence the old epigram on the Shays' Rebellion:

> Says sober Will, "Well, Shays has fled,
> And peace returns to bless our days."
> "Indeed," cries Ned, "I always said
> He'd prove, at last, a *fall-back Shays*;
> And those turned over and undone,
> Call him a *worthless Shays to run*."—WARD.

The first iron rail was laid in Berlin, 1866, the "Fitchburg, Framingham and New Bedford." Two stations, one for the Centre and South Berlin, midway, one for West Berlin. The road-bed of the Massachusetts Central was prepared for grading as far as Holden before a rail was laid. Here it rested till financial reconstruction, as the "Central Massachusetts." The town struggled under the twenty thousand investment some fifteen years. The debt was lifted by the generous donation of Mr. Chandler Carter, 1887.

THE STAGE-COACH.—The railroad, in its day, hardly excited more interest in Berlin than did the first stage-coach, forty years earlier. Berlin was left out in the cold by the greater thoroughfares through Northboro' and Bolton.

"The mail-stage" was a wonder to the boys in its early day. Boys and men went miles to see the first four-horse stage in the United Stage, driven by Levi Pease, of Shrewsbury, from Worcester to Boston, 1795. So when a "stage-line" was started between New Braintree, Barre and Boston, by way of Holden, West Boylston, Sawyer's Mills, Berlin, Feltonville (Hudson) and Sudbury, the enterprise created great interest. Jona. D. Meriam was the principal investor of Berlin; George E. Manson and Daniel Pope, of Feltonville. It was a losing business for the proprietors. But somebody was bright enough to run a line in opposition. The town got its post-office and other advantages.

How little we realize the blessings of postal service at public expense! It is all modern, really. When the Puritans came to America, England had no complete mail service. In 1655 a post was established between London and Edinbugh, "to go night and day," and make return route within six days. Boston was then five years old. Lancaster had no post-office for one hundred and fifty years. As late as 1820–30 every store and bar-room was a kind of post-office. As advertisements now adorn the stores, so letters to adjoining and even distant towns were thus posted. A letter in Berlin directed to Worcester or Westboro' would be taken in hand by any one going to Northboro', leaving it there for the next self-constituted letter-carrier. All Berlin mail-matter was left in Bolton post-office up to 1827. So much for a mail-stage. Then, too, Berlin was the midway town between Barre and Boston.

The Howe Tavern of Berlin was the dining-place. "Esquire Meriam" was the first driver. He obtained a mail contract and post-office for the town, and became our first postmaster, though the superintendence of it devolved upon Wm. A. Howe, of the store and tavern. Eventually Mr. Howe succeeded to the ap-

pointment. Every letter sent or received was registered, with amount of postage, before it could go out or before it could be delivered on arrival. A number of letters to Boston or elsewhere would be done up in one package with one bill of registration. A single letter must also be done up as a package, with its record and the town or city superscribed. Six and a quarter cents, ten cents, twelve and a half cents, eighteen and three-fourths cents, and twenty-five cents were the rates of postage. Times have changed.

THE MARKET-MAN.—This is a class not much on record in town histories. But really they were the connecting link between the town and the outside world. The market-man took the butter, poultry, eggs, veal and various farm produce. Sometimes he gathered it himself, carried it to Boston, ordinarily in a well-covered wagon with two horses, once a week and return. He probably handled more money than any other man in Berlin. But he was the weekly newsman. He brought the Boston news, much of it verbal, indeed, but he brought the newspaper also. From our earliest town life to 1812–20 so few towns having even a sight of a stage-coach, or mail, each town was interested in the return of the market-man. Tradition relates that a weekly concourse awaited the weekly arrival of Hugh Bruce at the Howe store and tavern, with the *Boston Palladium* reporting the progress of the war, 1812–15, also the reports of Napoleon's marvelous feats in Europe. So the slow-trudging market-man was the forerunner of the mail-coach and the locomotive. Pity the town which has no interest in the arrival of a daily mail!

The market-man usually brought all the store groceries,—more than all, "New Rum," that is, New England rum, later called Medford rum. We would not record it, only we have proved by other towns that we were not an exception, but sixty hogsheads of rum was the annual consumption in our town of less than seven hundred inhabitants, by estimate, 1825. There were then two stores. I repeat it, we were not exceptional. The market-man was sure of a weekly load. The successor of the market-man as news-carrier was the *post rider*.

INDUSTRIES.—As to our early industries, the locality of Berlin determined them. A water-power which fails for one-third of the year is just about worthless, except for mere milling. Once the brooks were very useful; but modern industries demand the rivers, and rivers that rage and roar. Compare the towns on the Concord River from Sudbury Meadows to Billerica, all on a level, and the towns on the Merrimac. Berlin was doomed to agriculture from the start. You cannot *organize* successful industries.

We have fragmentary records of the early agriculture of Berlin to show good thrift of the husbandmen Returns in part of the year 1792 indicate the yiel of good hay at nearly a ton and a half to the acre.

Some farms to-day do less than that. The yield of grain was not equal to that of hay. Cattle-herds were small. Sheep-folds were smaller. There was no "tariff" on wool then. It was grown for home uses, so of flax. Apples were mainly of the "natural" stock. But a great change was wrought for Berlin by the good minister, Mr. Puffer. He practiced grafting even for his parishioners, and taught them the art. Few apples are seen to-day superior to those of Barnes Hill in the first decades of the century. The writer of this gathers yearly the "Russet" and "Nonesuch," which Mr. Puffer originated on his own homestead, now a hundred years old. No apples to-day outrank the apples of the Berlin uplands. Less cider is made because of good fruit instead of the natural. From the scant data of 1792, which is our oldest, the product of rye was about 300 bushels; oats, 400; corn, 1,200; cider, 250 barrels. Four thousand acres improvable land; at the end of forty years, 5,400; at the end of the century 6,918. Say one hundred and twenty farms of sixty acres each.

The first State returns of mechanical industries were made by request, not by law, 1837. We will not quote. But basket-making, employing three men, was the largest business our assessors found time or disposition to report.

The old routine of farming held very constant sway in Berlin up to 1830–40. A deviation was made 1810–20 in hop-culture. The largest return was six and one-half tons for the town. The price varied from ten to fifteen or twenty cents per pound. Perhaps some years brought in two thousand dollars. Speculation set in, and some bad losses were made. It was calculated that "a pound of hops could be raised as cheaply as a pound of pork." From about 1830 hop-yards declined. Only two or three moderate fields can now be seen. Hop-picking was an annual gala day for the girls, in the field.

Berlin had one "South Sea Bubble" in the "Morus multicaulis" epidemic, about 1840,—a shrub of large leaf for feeding silk-worms. We had little scientific farming before 1850-60. A Farmers' and Mechanics' Association was formed, which has greatly advanced gardening and agriculture. The south part of the town is especially adapted to early fruits and vegetables. Well has it been improved. Berlin *asparagus* has a reputation in Boston. Small fruits receive like attention. Grape-culture, on a brow of the Assabet valley, has been a marked success. An old sand-hill (the ground was accounted) was found to have a clay subsoil of remarkable tenacity for moisture. Perhaps no acres in Berlin are now more valuable.

Peach-culture, after much fruitless endeavor, now gives promise of success. Our hills are given especially to orcharding, grass and general culture. We have several gilt-edge butter farms on high lands, with choice stock. But the bulk of milk goes off by rail. Many pastures, formerly mowed annually, in "the old moon," now have their own way. Our wood acreage is hardly less than fifty years ago.

The dwelling-houses of Berlin (two hundred and ten) are almost wholly of modern aspect. Sixty years ago one-third, perhaps, were of the long back roofs of one story and two stories front. Our last went down in smoke, 1886. We have no pretentious dwellings. The most impressive one crowns Sawyer Hill, the residence of William Lawson, Esq. The farm is managed, in gilt butter-making, by his brother-in-law, Reed Tyler. Like the Pennsylvania Dutchmen, most of the Berlin farmers are set on having good barns. Nine-tenths of all the houses in Berlin are comfortable homes. We have one which was probably built about 1720 by Jona. Moore, still habitable, "the Sanderson Carter place." Our valuation stands at $489,000,—"put up," some twenty years ago, $75,000, to lessen taxes, it was said. The percentage, of course. Southey tells of an old man who used to put on his glasses in eating cherries,—it made them look so much bigger.

The census of 1880 gives us over two hundred voters.

As for early handicraft, some thirty cooper-shops can be recalled by the old people. "Beef barrels," "rum barrels," "cider barrels," all had a good market in Boston sixty years ago. Other wooden-ware,—as churns, pails, "piggins and noggins,"—furnished some employment. Many a two-horse barrel rig started at midnight for Boston. Barrels were made on contract. A good cooper is a natural mechanic. Others need not try.

"Wire-drawing" and card-making were an exceptional attempt in Berlin, about 1810–20. Caleb Houghton, by a small power on Cranberry Meadow Brook, wrought wire; Solomon Howe, of the Centre, manufactured cards—a losing business to both. Card-setting (inserting the tooth into the punctured leather cardboard) furnished employment for many children; sometimes for parents. Braiding straw was a like family employment.

Ecclesiastical.—When Bolton separated from Lancaster probably some two hundred of its population were within Berlin limits. As a part of Bolton, the Berlin fathers lived in good harmony with the worthy town till the ecclesiastical conflict called "the Goss controversy." This item belongs to Bolton history, of course, but reaches Berlin. The minister was suspected of Toryism. In church matters he held and *practiced* the most arbitrary principles. The oncoming Revolution, 1770, added public importance to a local flame. The minister was charged with intemperance, also. He seemed to feel self-justification in the assertion, probably true, that he was never so far gone as to be incapacitated for his office. Numberless town-meetings were held,—town and parish were then one. He was dismissed by the ultimate prerogative, the people themselves, council or no council.

The controversy hastened, no doubt, the formation of the South Parish, April 7, 1779; but the agitation went with them. Only male members appear in the organization of the new church—Gossites and Walleyites, adherents of Mr. Goss' successor,—so the females, when they came, brought letters from one or the other branch of the Bolton Church.

In the interests of harmony, the council called to organize the Berlin Church advised the brethren to withhold fellowship from the Bolton Church whilst that church should remain in its divided state. That was a fire-brand. The Berlin Walleyites moved for another advisory council on this very matter.

The second council exonorated the first as to intended reproof. The reading of the first council certainly implied more than was expressed. The neighboring clergy sustained Mr. Goss, and under their influence the churches declined or renounced fellowship with the Bolton Church. To test the case, two of the Berlin opponents of Mr. Goss and one of the Bolton Church presented themselves before the Lancaster Church and asked for recognition in the communion service. The church voted affirmatively. The minister, Rev. Mr. Harrington, said the vote should be recorded, but his *negative* must be recorded with it. Virtually by the ruling of the times, this was annulling the vote of the church. The applicants were Judge Baker and Ephraim Fairbanks, Esq., of Berlin, and Nathaniel Longly, Esq., of Bolton. No three men in the towns were more prominent or conservative. A similar delegation from Bolton and Berlin visited Sterling. The minister, Rev. Mr. Mellen, refused to administer the communion service. The church was against him, and his claim of the veto power brought upon him and the town just the experience of Bolton. "How great a matter a little fire kindleth!" The simple reason is that it *is* fire. The spirit of liberty was abroad. Men were asserting personal rights, but patriotism was a bond. In the new life of the United Colonies, now become United States, partisans toned down. A supreme confidence in God and country allayed local animosities. Bolton South Parish became a precinct, 1784, virtually a town, by authority of Congress.

Peace came also to the churches. But the contest was a hard one, and in advance of its day. The ministry seemed unduly tenacious of power and dictation. The Bolton Parish fought a good fight. It broke the spell under which churches had felt themselves to be bound. Ecclesiastical liberty made a stride in the conflict. No doubt, indeed, errors were committed on both sides. But the case, and result, became a standard of appeal for the liberty of the churches. Harvard and Yale contain the published pamphlets as documents of historical importance. A layman, not known, was the virtual victor. Later tradition affirms that he was a clergyman. Ebenezer Chapin. Rev. Zabdiel Adams, of Lunenburg, defended the arbitrary power.

The act of incorporation of Bolton South Parish bears date April 13, 1778, and Samuel Baker, Esq., is empowered to issue a warrant "to some principal in-

habitant" to call a meeting for permanent organization. Signed, Joseph Warren, speaker; John Avery, deputy secretary.

Samuel Baker issues the warrant to Samuel Jones, inn-holder. At his house the inhabitants are summoned to meet. On that spot our town was virtually born. Samuel Jones' tavern stood fronting our Northboro' road, on the north side of the road to Hudson.

Samuel Baker was chosen moderator; Jonathan Meriam, clerk; James Goddard, Abijah Pratt, Joshua Johnson, parish committee; Jonathan Meriam, Timothy Jones, William Sawyer, Jr., assessors.

One week later the parish took measures for building a meeting-house; voted to locate it on "the little hill on the north side of the road that leads from Samuel Jones' house to Samuel Rice's shop in the crotch of the roads."

There was no Common then. The road to Bolton turned by our present town-house. The shop was probably some back part of the present "Bullard House." Samuel Rice never appears again. David Rice, probably his father, owned lands in connection with James Goddard, which included the old blacksmith-shop where A. A. Bartlett now lives. This shop went with the Meriam farm. Perhaps it was the one alluded to.

Berlin denizens of to-day may wonder where that "little hill" was. It was, and is not. The old church stood on it, considerably in front of the present edifice. Esquire Meriam could not persuade the building committee of the new church to set it so high as it now stands. He was not the man to "surrender." He conspired with Wm. A. Howe, and in the night they secretly lifted the standards one full foot. Look at the Common and the height of the underpinning of the church, and you will see what became of that "little hill."

The first meeting-house was twelve years in building. It is enough to make one weep, to read of the hundreds of pounds in depreciated money which were voted from time to time, all along in the war, to build that humble house of prayer.

The frame was "raised" June 16, 1779, by aid, as usual, of "rum," "cider" and "spike poles." The "pew grounds" were sold 1780 "at public vendue," each man to build his own pew. The building committee were Jonathan Meriam, Fortunatus Barnes, James Goddard, Sr., Timothy Jones, William Sawyer; second Committee, Fortunatus Barnes, Jacob Moore, Barnabas Maynard, Henry Powers, William Babcock.

In the mean time "candidates" were heard—Rev. M. Stearns, Foster and Edmunds. November 14, 1780, voted to hear Mr. Reuben Puffer. March 12, 1781, Mr. Puffer was "called." "No objections." "Ordination to be out of the meeting-house if the weather permit." The church records have it that the services were held in the meeting-house. All the "old folks" declare against it. The ordination took place November 26, 1781.

Certainly there is something inspiring in the faith and labors of the fathers, under the depression and uncertainties of war, to press forward in their circumstances, not to say poverty, to establish the ordinances of religion.

The council for ordination consisted of the churches in Sudbury, East Sudbury, Westboro', Shrewsbury, Northboro', Lancaster, Bolton and Stow. Rev. Mr. Bigelow, of Sudbury, Mr. Puffer's pastor, preached the sermon.

Mr. Puffer's presence and ministry seemed to be quite helpful to his struggling parish. No church-meeting was called for nearly two years. Records indicate peaceful progress. In the same year of the ordination the parish petitioned the town of Bolton, also the General Court, to be set off as a town, but it took three years to reach it.

Finally, by the Great and General Court, March 16, 1784 (Samuel Adams, president of the Senate, Tristram Dalton, speaker), the precinct was duly incorporated, and Judge Baker was again instructed to empower some principal inhabitant to call a meeting of the South Precinct in Bolton. This time he conferred the honor on Fortunatus Barnes. Again Samuel Baker was the first moderator and Jona. Meriam again clerk; Selectmen, James Goddard, John Temple, Jonah Meriam, William Sawyer, Barnabas Maynard.

Now Berlin had all the prerogatives of a town except personal representation in the Legislature. Any citizen of the precinct might as well represent the town as a citizen of the town the precinct. But Bolton never saw it in that light.

So matters stood till 1812. Fortunatus Barnes was now authorized to empower some principal citizen to call the first town-meeting. He committed the trust to Ephraim Babcock. The meeting resulted in the choice of Fortunatus Barnes moderator.

Such was the origin of a quiet New England town. Its inception was in time of war. It came to maturity in time of war, just in a full generation from its beginning. Thirty-five years from this date brought it to its centennial.

In the completion of their house of worship, the settlement of Mr. Puffer and the adjustment of complications with Bolton, the little town of Berlin, instead of "Norrage," as once proposed, seemed to have respite and rest. The leading men, however, who had borne the brunt of the war, with its antecedent and subsequent excitements, dropped out of the race very early,—Captain Samuel Jones, Judge Baker, the Baileys, the Meriams, Ephraim Fairbanks, Esq., Gen. Sawyer and others, whose names were towers of strength.

The central figure henceforth in Berlin character was their minister.

The Puffer ancestry, Appleton says, is obscure

But a record stands that "the town of Boston," 1640, not yet ten years old, granted twenty acres of land at Wollaston Heights to George Puffer, "five heads." A line from George is traceable to Sudbury, George, James, Richard, Jabez and Reuben, the Berlin pastor. Some count in another Richard. The present Puffer homestead, whence Reuben came, is now in Maynard. The will of Jabez shows that Reuben was the pet of his heart. He certainly grew in the esteem of Berlin people and all the region. Every congregation was pleased to see him ascend the pulpit-steps. It was not a day for enticing away favorite ministers, but it was understood that he had inviting overtures. His sermons were not especially arousing, but solemnly impressive.

In 1803 he preached the annual sermon before the Governor and Legislature. An anecdote concerning him was first published in print in the Lancaster two hundred and fiftieth anniversary. The writer of this is responsible for its appearance in type. He gave it verbally, that morning, to the speaker who gave it in response for Berlin, in the after-dinner speeches. Judge Brigham, of Westboro', had procured the appointment of Mr. Puffer to the service. His son-in-law, E. M. Phillips, Esq., of Westboro', gave the anecdote to the writer, personally. According to custom, Mr. Puffer had all parts of his service written, even the prayer. In offering it he lost his bearings. He tried to regain his ground, but only stumbled. The suspense was awful. A fellow-member of the Legislature gave Judge Brigham a nudge, whispering, "That is your minister, is it?" The disconcerted minister had the courage to desert his written prayer and to throw himself into the occasion, and the suspense of the assembly quickly gave way to rapt attention and delight. His own people, better than any others who did not hear him on this occasion, could tell what the effect was. He lifted his learned and dignified audience to exalted views of their position and duties, to the State and to God. The prayer ended, Judge Brigham returned the nudge of his neighbor, responding "*That is my minister.*"

Berlin ever had great satisfaction in "Dr. Puffer" abroad. His church records show that he ranked with foremost ministers in councils far and near on difficult cases.

To this day friends and dissentients, as to religious tenets, revere the "man of God." His face, his features and form and manner are fast passing out of remembrance. "Shall we know each other there?" Not even a profile remains; much less the tones of his voice and impressive pulpit services; a few of the venerables yet talk it over understandingly.

Some yet live who have seen him and can readily believe what has been related. But the most vivid impression which we septuagenarians have of the man is that of his pulpit devotions. Daniel? Solomon? Elijah? No, Bethel and Jacob. As with awe he lifted up his face heavenward, and bowed again his whole body in reverence, incense from the altar above seemed to pervade the assembly.

> "Heaven seemed bending, earth to rise,
> And all seemed floating in the upper skies."

He delivered the Dudlean Lecture at Harvard College, 1808. His pecuniary circumstances being made known, his address was published and sold among the students, rich men's sons subscribing largely to increase the income. They also gave him a good suit of clothes. (REV. DR. ALLEN.)

Another anecdote in his ministry reveals the ministerial tone of the day. A neighborhood of Balls, on Ball Hill, in Northboro', had special regard for Dr. Puffer; also, it would seem, some disaffection for their own minister. An especially afflictive death occurred in one of the families. One of the deacons of the Northboro' Church, by request of the family, came for Dr. Puffer to visit them, as also to attend the funeral officially. Mr. Puffer demurred; but under the appeals of grief he assented, being assured by the deacon that the Northboro' pastor would not take it offensively. The deacon did not know his man, nor the ministerial prerogatives of the day. The services were held at the house of sorrow. A few days brought a note from the Northboro' bishop demanding explanation and apology, else no more ministerial intercourse. We smile; but the parties did not. Mr. Whitney was magisterial. Mr. Puffer was timid. The correspondence is animated, if not animating. The offender did not cringe. He did apologize, and in words and temper that made him the victor.

The matter did not wholly die at that. A deceased sister of the Balls was wife of Dea. Livermore, of the Northboro' Church. He was one hundred and one years old at his death. Renewed application was made for Mr. Puffer's service at his funeral. Mr. Puffer confirmed his apology by respectfully declining. The Balls would not have the Northboro' parson; so the centenarian, deacon of the church, town clerk and, in certain sense, the public notary of the town, was buried without a funeral.

There was another element of irritation in the Northboro' Church. The good deacon's second wife was for some reason debarred from its communion. She applied for the privilege in Berlin, but ecclesiastical courtesy would not allow her request.

Dr. Puffer was no controversalist. He was even timid before his own people. It is well attested that he wept in the face of some who opposed his social prayer-meetings, then new. The compromise was that they should all be held at his own house. He was among the last to renounce or to forego exchanges with the "liberal" clergymen of the region. He foresaw coming events in his own parish. On one occasion he was so overcome in the reading of an expressive hymn that he ceased reading and sat down.

This was in the old, first-consecrated sanctuary, where the man of God had prayed and taught, "with many tears," for forty-five years. Humble as the old

structure was, every line of it was sacred in his eye and heart. It was soon to be taken down. Himself was "three-score and ten." His farewell sermon shows how the heart of a good man may be moved by that which is inanimate, and really without beauty. The old pews, which went into various and undignified uses, were for years looked upon with veneration by the older people. A successor, of twenty-five years, has found and gilded the old wooden pine-apple, with tin leaves, which surmounted a plain scroll over the old pulpit. "There are sermons in stones." The farm barn across the cemetery, made of the refitted timbers of "the house of prayer," has yet a voice to some passers-by.

The Massachusetts ecclesiastical rupture of 1820–30 was pressing upon this quiet town before steps were taken for a new house of worship. But no tongue moved against the minister. Yet it was intimated that the new church would have a new order of things when he should resign or cease from his labors. The pastor foresaw more than his people expressed. He hardly expected to escape the rupture in his lifetime. But he lived to dedicate the new church, 1826, and to preach and pray there till near his death, August 29, 1829, at the age of seventy-three years.

The church, in August same year, united in choosing Rev. Moses B. Church as Dr. Puffer's successor. The parish dissented, and following the Dedham decision, as others had done, chose another man, Rev. Robert Folger Walcut, of Nantucket, and graduate of Harvard. The Folgers were a prominent family in Nantucket.

Mr. Walcut was a cultured and scholarly man. He won the good-will and esteem of all citizens. He resigned November, 1833.

On the action of the parish, overruling the church, they withdrew almost unanimously, leaving but one male member and three females constituting the church.

The seceding members built a moderate house of worship the same year, and called Rev. Abraham C. Baldwin, a graduate of Bowdoin College, and student in theology under Dr. Lyman Beecher, who preached the ordination sermon, October 26, 1830. In Mr. Baldwin's ministry of two years, forty-six were added to the church. He had more than ordinary qualities as preacher and pastor. Had he been quiet to remain, very many have felt that he would have re-united the town effectively. His succeeding pastorates were in Springfield and New Haven. But if any man can unite a thousand people of one township, is he not more useful then in holding a like number gathered here and there from a city?

He was dismissed from the church in Berlin, October 23, 1832. Both he and his wife died in Yonkers, N. Y., 1886. Had no child. Her maiden-name was Foote, of Fair Haven, Ct.

Rev. Michael Burdett, now a retired Presbyterian clergyman in Philadelphia, succeeded Mr. Baldwin, July 17, 1833, to 1834. He was succeeded by Rev. Eber S. Clarke, of Winchendon, Ju. 21, 1835. Mr. Clarke was dismissed 1837, and settled once more in Richmond, Mass., where he died.

Rev. Robert Carver followed in a successful ministry, 1838–42. Settled next at Raynham. Entered into the Christian Commission service of the army, in which he died. After Mr. Carver's retirement, the Unitarian parish was also without a pastor. Rev. David R. Samson had succeeded Mr. Walcot, 1834–39.

Reciprocal overtures were now made on the part of the two parishes for reunion. This was effected in the settlement of Rev. Henry Adams, son of Chester Adams, Esq., of Charlestown, and graduate of Amherst and Andover. His first settlement was Worthington; next, "Hillside Church," of Bolton, noted as the "Wilder Church" (S. V. S. Wilder). Mr. Wilder, after his return from Europe, and before Hillside Church was built, attended Dr. Puffer's ministry in Berlin. Mr. Adams was installed Oct. 25, 1843; was dismissed 1853. The same year, Oct. 26th, Rev. W. A. Houghton was installed; resigned at the termination of twenty-five years, Oct. 26, 1878. Rev. Albert Barnes Cristy, of Greenwich, Ct., and graduate of Andover, was ordained and installed July 3, 1879. He gave way to a call to the church in Conway, 1881.

Rev. Henry Hyde succeeded Rev. Mr. Cristy in the same year; was dismissed 1885.

Rev. Charles H. Washburn, graduate of Amherst, was the third successor to whom Rev. Mr. Houghton has given the right hand of fellowship and received them into the church at their ordination. He was ordained and installed December, 1885; dismissed Nov. 2, 1888; called to North Woburn.

In 1853–54, under the lead of Rev. Gardner Rice, then principal of the Berlin Private Academy, a Methodist interest was started and organized. Rev. W. W. Culburn and Rev. B. F. Whittemore were the principal preachers.

The war broke up the organization. It was revived again in 1878, since which time Revs. Mr. Hanniford, Wilder, Burlingham, Desjardin and Barter have been the preachers. They built and dedicated their church 1887–88.

In 1871 the Unitarian element, which had been mostly dormant from 1844, was revived and organized. A church was built, and dedicated April 1, 1881. Its ministers have been Revs. George Greene, Granville Pierce, Francis Thacher, —— Litchfield and —— Porter.

For a small town, Berlin has a large element of the Quaker faith. Bolton has about the same. Their meeting-house is just within Bolton limits. Their Quarterly Meeting occurs in August. The society has existed since 1790.

Berlin and Bolton have known, better than most towns, the Friends, or Quakers, in their citizenship. Both towns would bear cheerful testimony to their

worth. To see the commingling of the descendants of Cassandra Southwick and the Boston Puritans fraternizing in religious meetings, public and private, with kindliest regards for each other's distinctive views and order of worship, seems to preclude the possibility of certain historic facts; just as fully Puritans as ever, and just as fully Quakers as ever. But many of the Quakers on whom the Puritans' wrath descended were as unlike our worthy Quaker citizens as were the old Puritans unlike the Puritans of to-day. Not here can we discuss the merits of the case, but we rejoice together in the better knowledge of personal liberty of opinions, and the harmonizing influence of religious faith. But Berlin has to confess; we did imprison a Quaker, and for non-payment of the minister-tax, which ministry he did not believe in. We are glad it was a hundred years ago, 1786. Nor do we offer that in extenuation. The Quaker executions were more than two hundred years ago. The law as applied in Massachusetts, 1657, was recommended to all the Colonies by the "Federal Commissioners." It was enacted here by only one vote in majority, and stood in force but two years.

But for ministerial taxes the law exempted Quakers, Episcopalians and others as early as 1750–60; only they must show certificates that they really belonged to some religious society. Here seems to have been Brother Jonathan Baker's lame point. The assessors were bound by the law. The indications are that he would not or could not present his certificate, so the assessors would not abate; by law they could not. No doubt the case was very much affected by words and temper. The town finally remitted his fourteen-shilling tax, and his certificate of Quaker membership stands on record.

On school matters Obediah Wheeler, Quaker, was the persistant leader in insisting on a division of the school money; as constantly refused. That is our issue to-day with the Catholics.

EDUCATIONAL.—Previous to the organization of the precinct, 1784, schools had been maintained for a few weeks at a time in private houses. School-houses are named in early records as if they had served us while of Bolton. The precinct proceeded, 1785, to "Squadron the district." We had four, according to the four cardinal points of the compass. The centre of the town went north, south, east or west, as they saw fit. This for fifty years. A fifth district was added, 1836, and all of them, unwisely, took on separate existence. This continued about twenty years, when, as soon as permitted by the Legislature, the town took possession of the schools and houses.

Three of the houses had done service about seventy-five years each. The town proceeded at once to build anew five houses for the five districts, all alike, 1857–58. When the cost of the war came on we congratulated ourselves in having already paid for our school-houses. These were all duly dedicated by becoming services. School interests revived very much, nor has it very much subsided. Not required by law to maintain a high school, it is difficult in a population of less than a thousand to do so. A few terms have been maintained. But three adjoining towns offer ready facilities, and by rail the accommodation is very good with each of them. It is a conviction of the committee that the schools of Berlin compare favorably, in material and quality, with towns around us. Teachers' wages stand above the average in the State. None but females have been employed for many years. Once the town furnished a large quota of young men —several in a season. They have been supplanted. School-teaching is woman's right.

The first school report read in town-meeting, and before required by law, was offered by William A. Howe, then a young man. He had never been to high school or academy.

A stimulus to Berlin, perhaps, was the somewhat famous Quaker School of Thomas Frye, just beyond our Bolton line. English grammar was a specialty. Berlin pupils availed themselves of the advantage. Later, Berlin had a somewhat similar school. Josiah Bride, a native of the town, with never a day of instruction from private teacher, high school or academy, opened a private school in the town-house. His skill, or art in teaching, gave him greater and greater success. Good in scholarship, he excelled in communicating. His private school grew into a boarding-school, and this into Berlin Academy. From 1833 to 1853 this school did much for Berlin. Pupils came from several cities and several States. Meanwhile Mr. Bride was active in the town and in the church. He died, 1887, at eighty-five years. Berlin is represented in the Technical School, Worcester, by a teacher; in Amherst Agricultural College by a student; several have graduated at commercial colleges. Of school funds Berlin has only two thousand dollars. Joseph Priest, unmarried, gave by will, 1817, five hundred dollars; Miss Nancy Young, 1860, gave by will fifteen hundred dollars. These persons had lived quiet and inexpensive lives. These gifts were about all they possessed, severally. Berlin cherishes their memory. But it is only by recalling to each school generation the facts, that the generosity of worthy benefactors is held in remembrance. Ask in almost any school who was Horace Mann, and see.

Sadly, Berlin has no public library. Sectional influences have prevented united town action. When we separated from Bolton, a generous library became a bone of contention. A division of it was finally effected. The Berlin share, with additions, was kept alive during the pastorate of Dr. Puffer.

An educating influence in Berlin was the old lyceum, as now spoken of. Rev. Dr. Allen, of Northboro', was, next to Concord, the original in starting this kind of school and debating society. He kindly gave many of his lectures in Berlin. Several years followed of elevating endeavor. This movement be-

gan about 1830. It did not wholly cease for thirty years—lectures and debates. The writer of this thinks he sees results in the town meetings of the present. Relatively we have many townsmen capable of public speech in town meetings. Also more than a common number of competent *moderators*.

Berlin has had but few college graduates. Early in our history two young men died in their preparatory studies. Winthrop Bailey graduated at Harvard, 1808. Was pastor of the church in Pelham, later, and, for many years, of Deerfield.

Barnabas Maynard Fay graduated at Yale, 1833. He taught in several institutions for the deaf and dumb. Had also several pastoral charges. His son is superintendent of the Institution for Deaf and Dumb in Washington, where the father died.

Rev. W. A. Houghton graduated at Yale 1840. Pastor eight years in Northboro', twenty-five in Berlin, Resigned 1878. Still resident.

Winthrop Sawyer, nephew of Rev. Winthrop Bailey and namesake, took the surname Bailey, and studied for the ministry at Princeton, N. J., and held two or three pastorates. He died in south-east New York.

Levi and Willard Brigham, brothers, more connected with Berlin than with their native town, Marlboro', were graduates of Williams, and both were successful ministers.

Our physicians have come to us. Dr. Benjamin Nurse, of Bolton, 1777–1804; Dr. Daniel Brigham, of Westboro', 1800-1825; Dr. Samuel Griggs, pupil of Dr. Twitchell, of Keene, 1824-1833; Dr. J. L. S. Thompson, ———, 1833–1840, afterwards of Bolton and Lancaster. Died 1886.

Dr. Edward Hartshorn, graduate of Harvard Medical School 1838, came to Berlin 1841; practiced till 1854.

Dr. Lemuel Gott, graduate of Harvard Medical School, settled in Rockport, 1836; in Berlin, 1854–1888. Was successor to Dr. Hartshorn. Died August, 1888. No resident physician since.

Town History.—Some one has expressed the sentiment: "Blessed is the town that has no history." George Elliot has expressed the same, I think, as to the family,—perhaps for a reason. But in respect to the staple of the early history of so many inland towns of Massachusetts—*the Indians*—we appreciate the force of the sentiment expressed. We gladly surrender all claim to the Indian from Massasoit to Tecumseh.

But we do suffer loss of historic material when we can quote no town connection with such a historic event as the American Revolution. In this matter we can only say Berlin was born *in it*, and there is sublimity in the fact. In the darkness of that terrible day, what faith in God and confidence in man, that, under such a cloud, men should so deliberately plan for the future, and lay new foundations for coming generations! It was Rome over again selling the land on which Hannibal had intrenched his legions. Residents on Berlin territory appear both in Lancaster and in Bolton, in all the wars of the Colonies, including the Revolution. And in the midst of the latter struggle the Berlin fathers were even planning a life independent of the mother town. And every element of town life was duly cared for after the example of Puritan forethought. Peace came to the country in 1783. A parish had been formed in the very darkest days of the war. In 1784 they came into town life by Congressional provisions. Had Berlin been a corporate body during the war, there can be no doubt her sentiment and action would have been as Bolton and Lancaster were. But a somewhat shady aspect appears in respect to the Shays' Rebellion. A Berlin delegate was appointed to one of the conventions, perhaps hoping to secure moderation. But so far as any vote of the town gave expression, all that can be said is that the majority for Hancock for Governor, against Bowdoin, was interpreted in those days as being in the radical element. Yet Judge Baker, probably the most influential man in the town, was a tower of strength for the government. He was once assaulted, by threats at least, on his way home from the court,—probably not by his own townsmen. That was a terrible time when citizens of noblest life, who had fought side by side for independence, were again armed, face to face against each other. It demands a hundred years breathing-time to judge these old insurgents impartially. There was no sublimer scene in the war itself than when General Artemas Ward led the officers of the court up Court-House Hill in Worcester, against the very point of bayonets which had withstood the British soldier on the field of blood. Our vote had been, for two years, for Bowdoin. After the Paxton Convention, it was wholly reversed. Lancaster went as invariably for Bowdoin. Both these men were loyal to the State; but Hancock was regarded as less rigorous towards the insurgents. An article in the town warrant, 1787, to pay soldiers in support of the government, was "passed over." The town remonstrated, 1807, against Jefferson's Embargo; also, 1812, against the restrictive measures of President Madison.

We can say, for ourselves, we have lived a quiet and peaceable life. We did have some trouble with our ever esteemed mother-town. The great and general court told us both how we must bear ourselves in local matters. But we did not see alike then as to the support of the poor, and some other points. It took a good while, indeed, to adjust matters. Among other things, creditable alike to mother and daughter, there was a very good library which must needs be divided. This, of course, involved the ministers. They did not see eye to eye in a matter so material as this. It took time, correspondence, committees and conferences. We had judicious men on both sides; so, as usually under such influence, this, too, was adjusted.

Town rivalries have taken a very different turn in later days. A town of a thousand people on moderate territory, known, as it were, each to all, is a more enjoyable community than a like number mixed with ten thousand in a city. The drawback to our "hill towns" is the financial inability to support religious institutions. State, county and town taxes in Berlin in 1887 were nine thousand dollars—say ten dollars per capita. To support three churches besides, lays upon less than one-half of the people about three thousand more. So that the half who do support the churches must needs pay nearly as much for this as for all their assessments besides. "Help, Lord," when "the godly man ceaseth."

How so many boys of the large families, sixty years ago, could get a living by settling down in the town is unaccountable. Hardly a mechanic ever hired a man. Old farms were divided. Some were "made up." A carpenter never built by "contract." So much, "by the day." A single blacksmith in each of the four districts, or less, was sufficient, and he, perhaps, had a farm also. Probably there was not, sixty years ago, a business in town that required a "hired man," except farming. The mills, in flush of their season, had extra help. A single tannery grew so as to need two or three men part of the year. This gradually died out, yet Berlin gained in population, relatively, with Bolton and Lancaster.

We should have had the present Old Colony Railroad running through our centre. But towns were not then permitted to invest, as in the start of the Central Massachusetts. Our twenty thousand in the Central Massachusetts, had it been put into the Old Colony, would have brought it to our doors, and have been a rich investment. It would have brought the rail to South Berlin, to the Centre; and to West Berlin as now. Individuals could not raise the money. To him that hath shall be given. Alas! for him that hath not. Berlin, with other towns on the line, invested heavily in the Central Massachusetts, and heavily has it borne upon us. After bearing it some fifteen years we sold at less than thirty-three per cent. This rail has come to our centre, but not as the Old Colony would have come. We do not complain. Above all, as a fellow-citizen, Mr. Chandler Carter has lifted our indebtedness. Few know how the smaller towns have to struggle.

Before the war Berlin had several shoe-shops of moderate capacity. In these work was done for the larger houses in Hudson and Marlboro'. The war changed the order of business by concentration. Our shops were vacated.

After the war and loss in population of about two hundred (twenty-two in the army), Berlin attempted an incorporated shoe manufactory by small shares, sufficient to employ a hundred hands. Parker Brothers, Charles E. and John H., of Boston, were succeeding hopefully. "The Boston Fire" crippled them badly. Another, at home, laid the Berlin structure in ashes. Thus we were put back again, save a small establishment still in force. So the population has decreased by removal of families to centres of business. Berlin is shut down to farming and horticulture. Summer boarders have set in upon the town, with the prospect of increase and remuneration. We claim that the town is unexcelled in pleasant resorts and summer drives, by any town within the same distance from Boston.

MILITARY.—As a town Berlin has, of course, no part in the wars till 1812 and the Rebellion. The Revolution had just terminated when we came upon the stage. Our soldiers are in the records of Bolton and Lancaster, and there imperfectly. But of those who survived, Berlin citizens should be on record as such. Many of the veterans of the old French and Indian Wars, 1744–50 and 1755–63, were still living 1784.

Of some three hundred soldiers on record in Lancaster in the French and Indian Wars, about twenty of them are of Berlin territory. Of some forty to fifty names in the Revolution, on Bolton records, nearly one-third were of Berlin territory. The Bolton lists have been searched out from old papers recently discovered. No entire list is known or attainable.

Among the foremost in military service were the Bruces. Most of them on Berlin records were more or less in the Revolutionary War. Abraham (traditionally) was at the capture of Burgoyne. John Hudson, father of Hon. Charles Hudson, had eight sons in the war of 1776–83.

Our soldiers' list, made up of the incidental records, stands . Bruce—Benjamin, Daniel, Abraham, Timothy; McBride—James, John, Thomas; Bailey—Col. Silas, Lieut. Timothy, Benjamin, Barnabas; Johnson—Capt. Edward, Joshua, Eleaser, Nathan; Larkin—Matthias, John, John, Jr., Ephraim, Edmond, Peter; Samuel Baker, Samuel Baker, Jr., Edward Baker, Amos Meriam, Jonathan Meriam, Uriah Moore, Benjamin Nurse, Nathan Barber, Fortunatus Barnes, Samuel Jones, Jr., Nathan Jones, Jabez Fairbanks, James Fife, Jr., Elijah Foster, Nathaniel Hastings, Silas Howe, Silas Houghton, Hezekiah Gibbs, Jr., Abijah Pratt, John Pollard, Thomas Pollard, Joseph Priest, Job Spafford, David Rice, Samuel Rice, Robert Fosgate.

Berlin in the Rebellion is fully on record by a published memorial address and a memorial hall, with memorial tablets and photographs. A Post of the G. A. R. keeps well alive the heroic spirit of their fallen comrades. The soldiers' memorial day has become an established anniversary. We count it among our educational institutions.

The tone and temper of Berlin in the outbreak of the war was one and the same with all patriotic citizens. The news of Sumter was read from the stage-box of our expressman before he alighted. A company were in waiting for such news as might come.

Hardly a man uttered a word; but every face was defiant.

A meeting was soon called, addresses made and resolutions offered. Names were pledged for enlistment. The call came speedily and was readily responded to. Our population was short of eleven hundred. We sent into the war one hundred and thirty-nine men. Twenty-two fell in battle or died in the service. Captain Christopher S. Hastings was our only commissioned officer. He raised a company for himself, though exempt, by years, from military duties. His company was at the battle of Fredericksburg, at Jackson and the siege of Vicksburg. Enfeebled by small-pox, he died of malarial fever at Mound City, Illinois. Our death-list besides was Thomas Rathburn, Charles H. Maynard, Alonzo F. Howe, Silas F. Jillson, Silas E. Goddard, George Ira Carter, Hollis S. Johnson, Nathan B. Garfield, William H. Coburn, James Barry, Samuel A. Snow, George H. Bowers, Edwin J. Bigelow, Rufus H. Williams, Henry P. Rich, Tyler Paine, Homer F. Stone, Lafayette Warden, Watson Wilson, Charles O. Starkey, Lemuel Gott, Jr., Ezra Bartlett, Levi Holder.

Died since the war; J. Pillsbury, N. Johnson, George F. Hartwell, George C. Wheeler, Ansel Snow, Nathan M. Allen, William H. King, James F. Rathburn, Edward H. Hartshorn.

Town appropriations for the war, fourteen thousand dollars. State aid, eleven thousand.

Perhaps no soldiers in the service were more carefully provided for, so far as it could be done at home, than the soldiers of Berlin.

The question of what memorial, commemorative of our fallen patriots, we should adopt, was considerately weighed. Needing a new town-house, with modern conveniences, a "Memorial Hall" was decided upon as that which would be most enjoyed by the citizens, being also especially appropriate for the use of the surviving soldiers. In 1870 the house was dedicated with becoming services. Memorial Hall contains memorial tablets with the record of each fallen soldier. Each has also a good photograph likeness hung by the tablet. The Grand Army of the Republic have taken commendable care of the hall and its treasures. Annually the town appropriates fifty dollars for "Memorial Day." This has become an established anniversary, an educating force for the people, as well as for the children.

The Grand Army of the Republic, as to Post 54, of Berlin, is sadly diminishing. But the Sons of the Veterans are already organized. May the Grand Army of the Republic long survive! Our last survivor of the War of 1812, many years seated on the platform on Memorial Day, died 1886,—John D. Merrill, eighty-eight years.

At the annual March meeting, 1884, Hon. William Bassett made a motion for the observance of the town centennial. The motion prevailed, and a committee was appointed to carry the vote into effect.

The day passed off happily, though one of the hottest of the season, September 10th. Ex-Governor Boutwell, who represented the town in the proposed amendment to the State Constitution, 1853, was present and added much to the day. Rev. A. P. Marvin, historian of so many towns, and of the county itself, very much enriched the historical bill of fare. Adjacent towns were represented, and many former residents and natives responded to the sentiments of the day. Altogether, it was a day of successful interest, though very little parade or show was attempted. Such occasions are becoming more and more important, though many towns allow them to go by in indolent forgetfulness.

PARISH, PRECINCT AND TOWN OFFICERS, 1778–1888.

Moderators.—Samuel Baker, 1778, '84, '88; Ephraim Fairbank, 1779, '83; James Goddard, 1780, '86, 87; Jacob Moore, 1781; Fortunatus Barnes, 1782; David Taylor, 1785, '89, '91, '93; Barnabas Maynard, 1790, '92, '94–96, '98, '99, 1801, '02, '06, '08, '09; Stephen Bailey, 1797, 1800, '03, '11–13; James R. Park, 1804, '07; Jonathan Merriam, 1806; Solomon Howe, 1810; Henry Powers, 1814, '15; Oliver Sawyer, 1816–29; Asa Sawyer, 1830–46, '48, '51; William Jones, 1847; Silas S. Greenleaf, 1849, '50; Amos Sawyer, 1852–58; Lewis L. Carter, 1859–61; William Bassett, 1862; Amory A. Bartlett, 1863–66, '79–81, '85; Abel W. Longley, 1867–69, '72, '74, '75, '77; Elijah C. Shattuck, 1870, '71, '73, '76; Leslie Hastings, 1878; Edward H. Hartshorn, 1882–84, '86; James D. Tyler, 1887, '88.

Town Clerks.—Jonathan Merriam, 1778–85, '89–99, 1800–04; John Temple, 1786–88; Stephen Bailey, 1805–07; Dexter Fay, 1808–15; Amos Sawyer, 1816; Solomon Howe, 1817–26; Josiah Conant, 1827–31; Wm. A. Howe, 1832–37; Lewis Sawyer, 1838–45, '50–55; Oliver B. Sawyer, 1846; John F. Newton, 1847–49; Otis L. Larkin, 1856; Albert Babcock, 1857, '58, '74–82; Josiah E. Sawyer, 1859–73; Frank H. Crossman, 1883–88.

Selectmen.—James Goddard, 1778–80, '82–84, 1817; Abijah Pratt, 1778; Joshua Johnson, 1778, '79, '81, '88, '89; Jonathan Merriam, 1779–83, '85, '87, '89–94, '98, '99, 1817; William Sawyer, 1780, '85, '87, '99, 1800; William Sawyer, Jr., 1781, '82; Josiah Sawyer(3d), 1783, '90, '92, '94, '97; Samuel Baker, Jr., 1788–94; John Temple, 1785, '86, '88; Barnabas Maynard, 1785, '86; Henry Powers, 1785, '86, '88–92, '94, '99, 1800, '01, '14–16; Timothy Jones, 1787; Josiah Sawyer, Jr., 1788, '89, '91, '99, 1800; Amos Johnson, 1790, 1807, '08; Levi Merriam, 1791–98, 1801; Stephen Bailey, 1795–98, 1812–14; Samuel Jones, 1795, '96, '98; Samuel Spafford, 1795, '96; Job Spafford, 1795, '97, '98; Ephraim Howe, 1.96; Joel Fosgate, 1797; Nathan Johnson, 1799–1801; Jonathan Merriam, 1800, '17–19, '21–23; James R. Park, 1801–06, '12, '13; Caleb Fairbank, 1802–04; Ephraim Howe, 1802–06; James Goddard, Jr., 1802–07, '12; Alvah Sawyer, 1802–06, '12, '13; David Barnes, 1805, '06, '12; Dexter Fay, 1807–11; Solomon Howe, 1807–11; Oliver Sawyer, 1807–11, '17–22, '28, '29, '33, '34; Silas Houghton (2d), 1808–10, '20; Amos Sawyer, 1809–11, '17–19; Ephraim Babcock, 1813–16, '18, '19, '23–26, '28–33; Adam Bartlett, 1813–16; Wm. Jones, 1814–16, '20–22, '24; Silas Sawyer, 1815, '16; William Barnes, 1817–19, '24, '25; Hollis Johnson, 1820–22, '28–30, '33, '34; Timothy Bailey, 1820–22; Joseph Park, 1823–27, '33–35, '42, '43; Luke Fosgate, 1823–26; Benjamin F. Spafford, 1823–27, '33–35, '42, '43; Paltiah Jones, 1825, '26; Welcome Barnes, 1826; John Bartlett, 1827, '31, '32, '37, '38; Edward Johnson, 1827; Ira Sawyer, 1827; Luther Carter, 1827, '28; Levi Wheeler, 1828–30; Wm. Babcock, 1830–32; Abram Sawyer, 1831, '32; Lewis Carter, 1831, '32, '35, '36, '41, '49, '50; Timothy Jones, 1832; Thomas Brigham, 1833–35; Paul Brigham, 1836, '37, '48; Samuel Spafford, 1836–38, '41; Ephraim Babcock, Jr., 1838, '39, '49, '50; Asa Bride, 1839; Jonas Hale, 1839; Wm. Jones, 1840, '41; Daniel Bartlett, 1840, '44–47; Oliver Fosgate, 1842, '58; John F. Larkin, 1842, '43; Perigrine Wheeler, 1843; Silas Sawyer, 1844–48, '51–53, '59–61; Jonas Robbins, 1844, '45; Samuel H. Wheeler, 1846, '47, '49, '50; Seth Rice, 1848; Silas Houghton, 1851, '54; Lewis L. Carter, 1851–53, '66–72, '77–85; Abram Bigelow, 1852; Hartwell Sawyer, 1853; Jonas Sawyer, 54, '63–65; Elisha M. Whitney, 1854; Oliver Smith, 1855; Josiah E. Sawyer, 1855, '56; Ezra S. Moore, 1855, '56; George W. Maynard, 1856, '59–62; Asa Sawyer, 1857; Josiah Babcock, 1857; Christopher S. Hastings, 1857; Henry D. Coburn, 1858–61, '69, '70; George H. Barnes, 1858; Luther Peters, 1862; Abel W. Longley, 1862, '63; Riley Smith, 1863; Wm. Bassett, 1864–69, '73–76; Israel Sawyer, 1864–68; Lyman Morse, 1870-72, '88; Edwin Sawyer, 1871-73; Robert B. Wheeler, 1873–86; Frederick Miller, 1874–76; Winslow B. Morse, 1877; Arthur

Hastings, 1884; Fred. A. Woodard, 1885–87; John Q. Maynard, 1886, '87; James D. Tyler, 1887, '88; Samuel Wheeler, 1888; Ruthven Hastings, 1878–83.

Assessors.—Jonathan Merriam, 1778–85, '89–1804; Timothy Jones, 1778–80; William Sawyer, Jr., 1778–83, '89–94; Jonathan Jones, 1781–83; David Taylor, 1784, '85; Henry Powers, 1784, '90–1803; Barnabas Maynard, 1788, '89; Amos Allen, 1785; Josiah Sawyer, Jr., 1785–87; John Temple, 1786–88; James Goddard, 1786, '87; Stephen Bailey, 1795–1802, '04; David Barnes, 1803, '04; James Goddard, Jr., 1805; Amos Johnson, 1806, '07; Dexter Fay, 1806–08, '28; Solomon Howe, 1806–12, '14, '16, '21–24; Wm. Newton, 1808, '09, '13, '14; Alvan Sawyer, 1809–11; Ephraim Babcock, 1810, '11, '21–24; Amos Sawyer, 1812, '13, '15–20, '22–27; Silas Houghton, 1812–14; Jonathan D. Merriam, 1815–19, '31, '32, '40; Stephen Pollard, 1815; Ira Sawyer, 1816–18, '25, '26; Oliver Sawyer, 1819; Thomas Brigham, 1827–37; Theopholus Nourse, 1820; Daniel Holder, 1825–27; Samuel Spafford, 1828, '33, '34, '36–38; Asa Sawyer, 1829–33, '39–42, '48, '49, '57; Pelatiah Jones, 1829, '30; Benjamin F. Spafford, 1833–38; Benjamin Cofran, 1835; Jonas Hale, 1838, '39; Eli Sawyer, 1839; Daniel Bartlett, 1840, '41; Perigrene Wheeler, 1841–43; Oliver B. Sawyer, 1842–46; Oliver Fosgate, 1843, '50, '51; Wm. Jones, 1844–47; Oliver Moore, 1844–46; Christopher S. Hastings, 1847; Ira H. M. Brown, 1847; Levi Bigelow, 1848–50; Solomon Jones, 1848, '49, '57; Seth Rice, 1850, '52; Silas S. Greenleaf, 1851; Albert Babcock. 1851, '53, '56; Josiah E. Sawyer, 1852, '53; Samuel H. Wheeler, 1852, '54, '55; Jonas Sawyer, 1853; Lewis L. Carter, 1854, '60, '61, '65, '73, '76; Thomas Pollard, 1854; Tyler Paine, 1855; Willard Southwick, 1855, '59; Riley Smith, 1856; Henry D. Coburn, 1856; Samuel H. Wheeler, 1857, '58, '60–62, '67–69; Edward W. Flagg, 1858; Winslow B. Morse, 1858, '62; Josiah Sawyer, 1859, '63–75; Riley Smith, 1859; Willard Southwick, 1859; Wm. Bassett, 1860, '61, '72, '78–82; Nathan W. Fay, 1862; Albert Babcock, 1863–70; Oliver Fosgate, 1863; Amory A. Bartlett, 1864; Henry D. Coburn, 1866; Abel W. Longley, 1870; Silas Sawyer, 1870–73; Josiah Moore, 1871, '72; Arthur Hastings, 1873–76, '86; Wm. Tho. Babcock (2d). 1874; Jonas H. Carter, 1875; Elijah C. Shattuck, 1876; Silas S. Greenleaf, 1877; Israel Sawyer, 1877–81; Geo. W. Fosgate, 1878–81; Paul A. Randall, 1882; Ruthven Hastings, 1882–85; John A. Merrill, 1883–87; Henry A. Wheeler, 1883–88; Robert B. Wheeler, 1887; Charles M. Sawyer, 1888; Walter E. Brown, 1888.

Treasurers and Collectors.—Samuel Jones, 1778–82; Ephraim Fairbank, 1783–87; William Sawyer, 1788, '93, '94; Stephen Bailey, 1789–92, '95; Barnabus Maynard, 1796–98; Amos Johnson, 1799–1804; Levi Merriam, 1805–11; Solomon Howe, 1812–22; Jonathan D. Merriam, 1823–27; Samuel Spafford, 1828–30, '33, '45; Pelatiah Jones, 1831, '32; Wm. A. Howe, 1834; Amos Sawyer, Jr., 1835–37; Oliver Fosgate, 1838, '39; George W. Babcock, 1840, '41; Oliver B. Sawyer, 1842–44; Ira Jones, 1846–48; Solomon Jones, 1849; Christopher S. Hastings, 1850–63; Elisha M. Whitney, 1864, '65; Edward H. Hartshorn, 1866–71; Josiah Moore, 1872–, '76–87; Ruthven Hastings, 1873–75, '88.

Constables.—Joel Fosgate, 1784; William Badcock, 1785; Jonathan Merriam, 1786; Nathan Johnson, 1787; James Goddard, Jr., 1788; Jonathan Wheeler, 1789; Barnabus Maynard, 1790; Levi Merriam, 1791; Silas Bailey, Jr., 1792; Samuel Spafford, 1793, 1809, '32, '33, '45; Samuel Jones, 1794; Nathaniel Hastings, 1795; John Larkin, 1796–99, 1800, '10, '11; Amasa Holt, 1801–04, '07; Solomon Howe, 1808; William Newton, 1805; James Goddard, Jr., 1806; Stephen Pollard, 1812, '14–16; Joseph Moore, 1813; Asa Sawyer, 1817–22: Barnabas Brigham, 1823–24; Luther Carter, 1825–27; John Bartlett, 1828–33; Amos Sawyer, Jr., 1834–37; Oliver Fosgate, 1838–40; Josiah Bride, 1841–42; R. S. Hastings, 1843–46; Silas Houghton, 1850–53; L. L. Carter, 1854; Thomas Pollard, 1854; A. A. Bartlett, 1855, '85; William G. Hapgood, 1856; Samuel M. Fuller, 1857, '64–68; John F. Bennett, 1857; Geo. Q. Sawyer, 1858; Andrew A. Powers, 1859–61; Josiah Moore, 1862–63; Frederick D. Kallom, 1863–64; William H. Frye, 1865; Samuel E. Fuller, 1869–72, '74, '75; George H. Andrews, 1872, '78, '79, '81; John L Bruce, 1873–79, '82–84; Henry D. Coburn, 1873; Thomas Hale, 1876; Warren S. Howe, 1877; Charles B. Bancroft, 1886; Leonard W. Brewer, 1887–88; Appleton D. Parmenter, 1887; John O. Osgood, 1888.

School Committee.—R. F. Walcutt, 1832, '33; A. C. Baldwin, 1832; Asa Sawyer, 1832, '36–38, '40, '41, '46; Wm. A. Howe, 1832–34; Wm. Sawyer (2d), 1832; Horace Bailey, 1833, '35; Willard Howe, 1833; Michael Burdett, 1834; Josiah Bride, 1834–39, '52–55; S. G. A. Tyler, 1834; Josephus Wilder, 1834; David R. Lamson, 1835–39; Eber L. Clark, 1835–37; J. L. S. Thompson, 1835–37; Robert Carver, 1838–39; Albert Babcock, 1838, '71, '73; John F. Larkin, 1839, '44, '45; Lewis Sawyer, 1839, '49, '50; Wm. Jones, 1840; G. W. A. Babcock, 1840; Edward Hartshorn, 1841–44, '52–55, '64, '67; Dexter Fay, 1841, '42; Oliver B. Sawyer, 1843–45; Henry Adams, 1844–48, '52; Solomon Jones, 1844, '46, '51; Jonathan F. Wheeler, 1844–50; Seth Price, 1845; Edwin A. Larkin, 1846; Ira H. Brown, 1847; Levi Bigelow, 1848–50; Silas S. Greenleaf, 1851; Addison G. Smith, 1851; Elijah C. Shattuck, 1856, '57, '59, '69, '76–83; Charles G. Keyes, 1856; Wm. A. Houghton, 1853–58, '60–66, '70, '73, '80, '83, '86; Gardner Rice, 1857; Lemuel Gott, 1858, '62; Wm. Bassett, 1858, '62, '65, '68, '71, '78; Ira O. Carter, 1861; Daniel H. Carter, 1871; Ansel L. Snow, 1872; Miss Mary Bassett, 1875; Mrs. Sarah H. Sawyer, 1875; Pliny B. Southwick, 1876, '77; Miss Mary J. Keyes, 1881; Mrs. Addison Keyes, 1885–88; Amasa A. Whitcomb, 1884; Henry H. Hastings, 1887, '88.

Representatives to General Court—Henry Powers, 1812. Incorporation of the town. Henry Powers, 1813–16, '20, '22, '25–27, '29. 1817, voted not to send; '18, voted the same; Amos Sawyer, 1819, '23, '24; Jonathan D. Merriam, 1828, '30–32, '36, '38; Joseph Park, 1833, '34, '37, '39; Ira Sawyer, 1835; Wm. Jones, 1840; '41 and '42 did not send; Oliver B. Sawyer, 1843; Seth Rice, 1846; Amos Sawyer, Jr., 1849, '50; Lewis Sawyer, 1851, '52.

Representatives of the Fifth Worcester County District.—George W. Maynard, 1859; Lincoln L. Carter, 1879; Rev. Henry Hyde, 1884; Dr. Edward Hartshorn, 1862; Abel W. Longley, 1865; Edward H. Hartshorn, 1869; Samuel Haynes, 1873; John C. Bickford, 1874; E. C. Shattuck, 1875.

Senators.—Hon. Samuel Baker, 1780–94, less two years; Hon. William Bassett, 1864.

Justices of the Peace of the town of Berlin (from 1778 to the present time, 1888).—Hon. Samuel Baker, Ephraim Fairbank, Amos Johnson, Levi Merriam, Solomon Howe, Jonathan D. Merriam, Thomas Brigham, Asa Sawyer, Amos Sawyer, Wm. A. Howe, Josiah Babcock, Lewis Sawyer, Albert Babcock, Josiah E. Sawyer, Wm. Bassett, Pliny B. Southwick, Amory A. Bartlett, Samuel M. Haynes, Abel W. Longley.

BIOGRAPHICAL.

REV. WILLIAM A. HOUGHTON.

Rev. William Addison Houghton, son of Caleb and Susannah (Sawyer) Houghton, of the seventh generation, from John Houghton, born in England, and who died in Lancester 1684, was born in Berlin, June 2, 1812, on homestead never in hands of any but the Houghtons (save one mere change). His parents died in his early childhood. At twenty-two years he began preparations for college; graduated at Yale, 1840; also at Yale Divinity School, 1843; was settled the same year over the Congregational Church of Northboro', with which he had united in 1843; resigned in 1851; resident in Berlin 1852; installed over the Congregational Church in Berlin, October 25, 1853; resigned, October 25, 1878, after a pastorate of twenty-five years. His wife, Mary Grace, was daughter of Solomon and Sarah (Stow) Howe, of Berlin. Their only daughter, Lucinda Howe, married, on the silver wedding day of her parents at their home, Edward Howe Hartshorn, son of Dr. Edward and Lucy E. (Howe) Hartshorn, May 28, 1869. Wife Lucinda, died of pneumonia, December 26, 1876, at twenty-six years. She left two children. The husband married, second, Miss Louisa Southgate, daughter of Rufus S. and Louisa (Blood) Hastings.

Mrs. Houghton died, October 16, 1882. Son-in-law, Hartshorn, died, January 8, 1887, at forty-four years. He left five children; three by second marriage. All have been born and nurtured up to date in the same ministerial homestead which was established by Rev.

W. A. Houghton.

Chandler Carter

Dr. Puffer, 1788, and occupied by him nearly half a century, and by his widow, second wife, another quarter century. Remodeled, 1866. The church, 1887, by motion of the pastor, Rev. C. H. Washburn, conferred upon Mr. Houghton the relation of pastor emeritus.

CHANDLER CARTER.

Chandler Carter is of the Lancaster line, originating in Rev. Thomas Carter, born in England about 1610; pastor in Woburn, 1642; was graduate of Cambridge, England. His son, Samuel, was graduate of Cambridge, Mass., 1660. Located in Lancaster, he became pastor in Groton, and died there in 1697. His son, Samuel 2d, had Samuel 3d, who was father to Stanton, who settled in Berlin. Stanton's son, Daniel, was father to Chandler, who was the tenth and youngest child, born October 7, 1808. His mother was Dolly Jones, of one of the most numerous and influential families of the town. Those were days of economy and hard work.

Our townsman has known both of these, in his father's home and in his own. He married a lady of good family and of good estate, whose father, a Berlin young man, Abraham Babcock, made a success of life in Boston.

But the enjoyable union was sundered by death, after the birth of a daughter, who also died in early womanhood.

After years of loneliness in his home Mr. Carter made another fitting and enjoyable connection in marriage with Miss Leah H. Lincoln, of Pembroke, Me., January 16, 1864.

Sadly this union was severed also, August 16, 1879. Singularly both deaths were painfully alike after similar surgical sufferings.

As domestic joys were quenched in sorrows, the lone husband and father has taken more and more into his sympathies his native associates and townsmen. The manifestation of it has been duly reciprocated in many kindly expressions before his great generosity was apprehended.

In 1880 Mr. Carter contributed one thousand dollars for the building of the Unitarian Church. A niece of his had appropriated, in her will, a like sum to the same end.

Our town was heavily burdened by war debt and railroad investment. Mr. Carter had opposed the latter urgently. But the town's error did not abate his good will. He sprung upon us a joyful surprise in the gift to the town of *twenty thousand dollars*. Nor this alone; he gave twenty thousand also to the Unitarian Society of Berlin. Nor this alone; he gave ten thousand to "The Children's Mission to Children of the Destitute."

Of course the town responded by votes and resolutions too extended for full quotations. A public reception was given Mr. Carter at the town hall, J. D. Tyler of the selectmen presiding. Neighboring towns joined in the occasion by representative citizens.

E. F. Johnson, Esq., attorney for Mr. Carter, came forward with the twenty thousand dollar check, which he presented, with impressive fitness, to the town, through the selectmen, F. A. Woodward, chairman. Rev. W. A. Houghton, native townsman and schoolmate of Mr. Carter, as also his near neighbor for thirty years, responded for the town. The long acquaintance of the donor and respondent gave opportunity for the pleasantries of life as well as for sober reflection. James T. Joslin, Esq., of Hudson, had been delegated to present to the town a life-size oil painting of Mr. Carter, which he had previously donated. It had been hung over the platform draped in white, and, in Mr. Joslin's closing words, it was unveiled. More than a heartfelt reception was given by the crowded assembly. Its companion likeness is that of Artemas Barnes, Esq., which, alone, had silently presided over many Berlin assemblies.

Mr. Joslin's remarks were publicly instructive.

Hon. William Bassett responded for the town in appropriate acknowledgment and practical suggestions. Others responded briefly. Lyman Morse, of the selectmen, Geo. A. Cotting, Esq., of Hudson (formerly resident in Berlin), Wilbur F. Brigham, of Hudson, C. F. Morse, of the *Marlboro' Times*, S. T. Rice, of Northboro' and Mr. Pope, of the *Boston Globe*.

The occasion was one to be long remembered in Berlin. Perhaps its moral effect will more than equal the financial relief. Our spirits grew anew as our tax bills came round so encouragingly reduced.

Among the resolutions passed, "in town-meeting assembled," was this: "That the best token of our regard which we can ever hereafter manifest for Mr. Carter's memory, is so to conduct the business of the town as to be clear of debt, the burden of which is now lightened by his generosity."

Of an inspiring poem, contributed by Miss P. A. Holder, we quote only the following:

"The aureole of silver
Years to thy head have brought—
Is tinged with *golden* lustre,
This golden *deed* hath wrought.

"We'll write thy name in brightness,
As with a golden pen,
Beside the good Ben Adhem's
Who 'loved his fellow-men,'"

CHAPTER LXI.

HOPEDALE.

BY ADIN BALLOU.

A NEW and bright little star in the constellation of Massachusetts townships. It was created by act of the Legislature, which received the consummating approval of the Governor April 7, 1886. It has an interesting history, and an auspicious future, as will be seen in the facts of the following explicit compendium:

TERRITORIAL SITUATION, DIMENSIONS AND TOPOGRAPHY.—It is situated in the southeasterly section of the county, at about 42° 8′ N. latitude, and 71° 9′ W. longitude from Greenwich. It is bounded northerly by Upton, easterly by Milford and Bellingham, and southerly and westerly by Mendon. It contains three thousand five hundred and forty-seven acres, or a little over five and a half square miles. Its length is somewhat less than five miles, and its mean width hardly one mile and a quarter. Yet five cities and seventeen towns in the State have a smaller area. It is traversed through its whole length by a goodly little stream called Mill River, lies chiefly in the valley of that river, is skirted by high lands east and west, and includes the southern declivity of old Magomiscock Hill. Otherwise its surface is comparatively level, with a gneissic soil of moderate natural fertility and feasible culture. It has little native wealth except its water-power, which has long been turned to good account. It has no mineral ores, and little clay, peat or quarrying stone. Yet its soil, with proper cultivation, yields fair crops of grass, grains and fruits. Its woodlands, too, though not superior, are tolerably productive. Its population at present is predominantly composed of manufacturers, artisans, traders and concomitant subsidiaries.

EARLY HISTORY.—This slice of territory was included in the famous "Eight miles Square," deeded by several Nipmuck Indian sachems April 22, A.D. 1662, to Moses Payne and Peter Brackett, as representative agents of the then Quinshipaug Plantation, afterward incorporated, May 15, 1667, as the town of Mendon. (For particulars see "Histories of Mendon and Milford.")

Settlements began to be made here at an early date after the incorporation of Mendon. The very first mark of civilization within our limits was made by an eminent patron of the Quinshipaug Plantation, incipient Mendon, Benjamin Alby (Albee). Under a special contract with the plantation authorities, made in 1664, he erected a "Corn Mill" (so-called) on our Mill River,—the earliest water-power established for grain-grinding west of Medfield in all this region. It was located on what is now the Lewis B. Gaskill place, in the southwest corner of our new town, just north of Mendon line, where the remains of the ancient dam are still extant. It was then deemed an important enterprise, and a great convenience to the increasing population of the general neighborhood. Albee contracted to maintain his "Corn Mill" permanently, and received several grants of land near the mill-site as a consideration for its public advantages. But he chose his house-lot a little southwesterly of his mill, in what is still Mendon territory, near the present residence of Willis Gould. His mill and dwelling-house are understood to have been burnt by King Philip's warriors, when the original Mendon Village was laid in ashes during the winter of 1675.

The earliest actual settler within our borders was John Sprague. In 1670 he bought of John Bartlett, an original Mendon proprietor, his right to a twenty-acre house-lot in the near vicinity of Albee's corn-mill, westward in our now extreme southwesterly corner. It included what has long been known as the Wing Kelley place. There he built himself a domicile soon after King Philip's War. He passed away, and was succeeded by his son William, and perhaps by a later descendant. Possibly Matthias Puffer, successor to Benjamin Albee in the ownership of the corn-mill, built a rude dwelling-house on his premises. We have no reliable evidence that any other settlements were made on our territory until the year 1700. During that year two distinguished settlers planted themselves homes on lands now included in the site of Hopedale Village. These were Seth Chapin, Esq., and Elder John Jones. Their children and posterity were long conspicuous inhabitants of this neighborhood. The limits assigned to this sub-history do not allow the writer to go into many of the interesting particulars, which may be found in his exhaustive "History of Milford." If our inquisitive readers will consult that work, they will find that the early settlers of our present town territory, their offspring and successors, have been a somewhat remarkably intelligent, enterprising and influential people, especially the leading families.

To verify this let them read what is said in several chapters, and in the "Genealogical Register," concerning the Albees, Chapins, Corbetts, Greenes, Haywards, Joneses, Nelsons, Pennimans, Warfields, Wheelocks, Whites and others of various note and date. They will then be satisfied that our present population have little reason to be ashamed, either of their predecessors or themselves. In the long struggles which resulted first in making Milford a precinct, December 23, 1741, and finally a town April 11, 1780, the inhabitants of now Hopedale were prominent, persistent and influential actors. The First Church (Congregational) of Milford originated chiefly with these inhabitants, led by Elder John Jones and his neighbors. It was formed in his dwelling-house. In that house it was organized and ecclesiastically sanctioned April 15, 1741. Many of its regular Sabbath meetings were held there, pending the erection

of its first meeting-house; and there the council convened, which ordained its first pastor, Rev. Amariah Frost, December 21, 1743. In secular affairs the influence of our antecedent citizens was at one period predominant. Samuel Penniman, Esq., at what is called South Milford, now a part of Hopedale, became a manufacturer of woolen and cotton goods, not far from 1810, at an establishment just on the edge of Bellingham, where Charles River leaves our town. He was a man of sterling business talent and enterprise. Whether he had co-partners in the manufacture of cloth the writer was never definitely informed, but deems it probable.. A little later he embarked actively in the straw goods trade, which he carried on in connection with a large grocery and dry-goods store. He did an immense business for a country merchant of those days, commanded custom throughout an area many miles in diameter, and was very popular. He employed hundreds, perhaps thousands, of straw braiders, and supplied their domestic wants out of his ample store. The then famous thoroughfare, the "Ninth Massachusetts Turnpike," so-called, had been recently opened, and passed close by his premises, affording quite unprecedented facilities for communication with comparatively distant marts. This brought another great public convenience, a post-office. This was Milford's first mail depot. It was established March 7, 1814, and Major Penniman was appointed postmaster. Milford Centre had no post-office till February 10, 1823. Samuel Penniman, Esq., died, much lamented, in the prime of life, December 22, 1817. He was succeeded in business by Samuel Leeds and one of his own surviving sons. Mr. Leeds was a man of ability and executive enterprise, but after a few years the prosperity of the establishment declined, and never afterward returned to its climax. Other minor cases of business development within our now municipal limits might be mentioned with respect, but were not of sufficient importance to occupy space, until we reach the movement which evolved

THE HOPEDALE COMMUNITY.—This was of commanding importance, for without it there is no probability there would ever have existed the beautiful village of Hopedale, or the flourishing and promising town that bears that melodious name. The writer happens to be fully cognizant of all the facts which enable him to state the exact truth concerning this matter; for he was the leading originator, projector, legislator and director of that community movement. It was not designed or expected by him that Hopedale should ever become an incorporated body politic under any human government, however otherwise good, which requires its subjects, at its behest, to slaughter human beings in war, or to train for that purpose in armies, navies and militias, or to inflict death on criminals, or to resort to deadly force against offenders, or, under any pretext whatsoever, to do unto any class of mankind what they would not have done unto themselves, or to violate in any respect the plain precepts and examples of Jesus Christ. It was strictly a practical Christian movement, conscientiously and unselfishly regardful of individual, social and the universal welfare. Yet, while it transcended the semi-barbarism of existing human governmentalism, and threw off the trammels of its unchristian requirements, it did not deny its usefulness under the overrulings of Divine Providence, nor depreciate any of the good which it conserves, nor countenance any form of opposition by physical violence even to its greatest wrongs and evils.

There was not a particle of red revolutionism in it, nor of compulsory political socialism. It was thoroughly pledged against everything of this nature. Yet its noble design ultimately failed, and its sublime expectations were drowned in the dark waters of disappointment. But it accomplished something—so much, indeed, that, as has already been said, it laid a foundation without which the present town would probably never have come into existence. What it did accomplish and why it failed will now be told as briefly as the nature of the case fairly admits.

Its chief originator and his associates were Independent Restorationists in theology and moral reformers —believers in the fatherhood of God, the brotherhood of man, and the religion of Jesus Christ, as He taught and exemplified it, according to the Scriptures of the New Testament. And they became seized with a deeply religious and rational ambition to carry their faith logically into practice, socially as well as individually. Their premises and conclusions were invulnerable to just criticism. They were all tee-total temperance people, thorough abolitionists of the non-political type, sincere believers in the co-equal rights of the sexes and devoted Christian non-resistants, eschewing all forms of deadly and harmful force against human beings, even the worst. They ardently desired to commence an order of society and civilization on this basis, wherein systematic practice should not persistently contradict and nullify gospel theory, but concordantly exemplify it.

They drew their inspiration and convictions of duty from such divine lessons and injunctions as the following: "Blessed are the meek; for they shall inherit the earth." "Blessed are the merciful; for they shall obtain mercy." "Blessed are the peacemakers; for they shall be called the children of God," "All things whatsoever ye would that men should do to you, do ye even so to them." "Ye have heard that it hath been said, An eye for an eye and a tooth for a tooth. But I say unto you, That ye resist not evil" thus with evil. "Ye have heard that it hath been said, Thou shalt love thy neighbor, and hate thine enemy. But I say unto you, Love your enemies, bless them that curse you, do good to them that hate you, and pray for them that despitefully use you and persecute you; that ye may be the children of your Father who is in heaven; for he maketh his sun to

rise on the evil and on the good, and sendeth rain on the just and on the unjust." "My kingdom is not of this world: if my kingdom were of this world then would my servants fight, that I should not be delivered to the Jews." "Put up again thy sword into his place; for all they that take the sword shall perish with the sword." "The kings of the Gentiles exercise lordship over them; and they that exercise authority upon them are called benefactors. But ye shall not be so; but he that is greatest among you, let him be as the younger, and he that is chief as he that doth serve." "Even as the Son of man came not to be ministered unto, but to minister." "Ye call me Master and Lord; and ye say well; for so I am." "I have given you an example, that ye should do as I have done to you." "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." "Why call ye me Lord, Lord, and do not the things which I say?"

We pondered these and kindred testimonies, and looked over Christendom to find in what empire, kingdom or republic thereof, such principles of truth and righteousness prevailed. We surveyed the nominal church throughout its manifold contending divisions, and found all the popular sects, and even most of the unpopular ones, completely wedded to the worldly governments under which they lived, either in formal union with the state or as subservient co-governing constituents, pledged to abide by and carry out the will of the constitutional majority. We heard much of Christian patriotism, Christian politics, Christian soldiers and Christian civilizatian, but saw comparatively little of the pure Christianity taught and exemplified by Jesus Christ, so plainly set forth in the above-quoted Scriptures. We, therefore, resolved on attempting to institute a community more accordant with Christ's clearly indicated ideal.

It was a presumptuous undertaking. We were few in numbers, crude in our Christian attainments, poor in pecuniary resources, inexperienced in social construction and confronted by formidable obstacles. Faith and conscientious zeal constituted our chief capital. A declaration of principles, embodying all that was deemed essential to an ethical and religious covenant, was matured, together with a carefully elaborated general constitution. These were discussed, considered and finally subscribed by about thirty persons, convened in Mendon, Mass., near the end of January, 1841. And there, on the 28th of that month, we formed and organized what was styled "Fraternal Community, No. 1," afterward entitled "The Hopedale Community." In the course of 1841 we purchased the "Jones' Farm," so called, *alias* "The Dale," in Milford. This locality was christened Hopedale—the word *Hope* being prefixed to *Dale*, as significant of our high anticipations of a social future. The community commenced practical operations immediately after April 1, 1842, with a joint stock capital of less than four thousand dollars, on a worn-out farm of some two hundred and fifty-eight acres, in a single, time-shattered mansion, nearly one hundred and twenty years old, with a few rickety outbuildings. There was no shop, mill or mill-dam on the premises. The little river gurgled lawlessly down a stony fall of some twenty-six feet from an almost worthless swale at the north into a kindred one at the south, yielding only a few desirable fish. The ingress and egress were by roads of the cheapest kind.

The new-comers had to start with a very scanty outfit of everything necessary to their progress. The first settlers comprised seven or eight families, numbering about thirty persons, men, women and children, all housed in their old domicile. From this humble beginning the community gradually increased in numbers and resources, amid innumerable difficulties, for nearly fourteen years, when they could muster a regular membership of one hundred, and an aggregate of three hundred souls—dwelling in fifty houses, on a domain of more than five hundred acres, with a respectable array of homely, but serviceable mills, shops and conveniences. We had also a school-house, chapel and a library of several hundred volumes. We had a handsome village site with good streets, where rough places had been made smooth, and crooked things straight. And our total capital had risen to over ninety thousand dollars.

How this culmination was reached, step by step, it would require a considerable volume to narrate, and it would be a book worth reading. The writer, over ten years ago, prepared such a volume for the press, and it will one day be published; but, for the present, a few outlines must suffice.

We had in our membership, first and last, farmers, gardeners, a variety of mechanics, seven or eight ordained ministers of the gospel, one experienced and skillful physician, several competent educators in the useful branches, and altogether a common-sense, intelligent community. We have been repeatedly pilloried by eloquent orators, who happened to know very little about us, as *visionary dreamers, deluded fanatics, idlers and incompetent financial economists*, who needed a strong master to save us from our imbecility. But, whatever our other faults and weaknesses, they were not of the kind charged or insinuated by these gracious orators. We were only such dreamers and visionaries as Jesus Christ and his apostles plainly taught us to be, honestly endeavoring to carry into practice their precepts, instead of honoring them with our lips, whilst all the time systematically conspiring with the world to nullify and set them at naught. Never was so much brick made with so little clay and straw. There was not an idler, spend-thrift or lavish consumer among us. All worked and saved. There were no time-killing, dawdling gentlemen or ladies daintily shirking manual drudgery. The leader and his wife were in the front rank of hard toilers, not merely with head and

heart, by night and day, but with begrimed hands in the dingiest places of necessary duty. No one expended a mill for intoxicating beverages. Even tobacco, though not expressly prohibited, was voluntarily laid aside. Only a single elderly member adhered to its customary use, and he with regret, after many severe struggles to overcome a long-confirmed habit. Others triumphed over it by persistent will-power.

One venerable widow, at the age of seventy, bravely renounced her cherished snuff-box, and consecrated her savings to the common cause. We spent nothing on war, its preparations or glorifications; nothing on politics or its collaterals; nothing on litigation, but settled all controversies with our neighbors by amicable conference or arbitration; nothing on police officers, constables, sheriffs or criminal prosecutions. At an early stage of our community a theft was committed on our poultry and potato field by some outlandish fellows. We bore it in silence, and waited further developments. We kept not even a dog to protect our property. No depredations were repeated, and not long subsequently word reached us, in a roundabout way, that the ringleader of our marauders was sorry, and said, if he had known what sort of people we were, not a thing should have been touched. They came no more. This was probably as well for us and him as the popular penal reliances.

But it must not be inferred that our chief concern was to make and save money for our own comfort and aggrandizement, apart from the welfare of outside humanity. The very reverse was true. We were an earnestly religious people, not on the ground of escaping the merciless vengeance of God after death, and securing a future endless heaven, but on the ground of escaping the dreadful evils of sin, both in this world and the future, and securing to ourselves and others the blessedness of the heavenly kingdom on earth as well as in the immortal world. We therefore sustained regular religious meetings twice or more on the Sabbath, and once or more during the intervening week, besides quarterly and general convocations in the regions round about. We had our weekly conference meetings, our young people's gathering on Monday evenings, our inductive communion meetings, our monthly meetings for discipline, etc. These and others, besides our Sunday-school. And all these were live meetings, dealing freely with a vast variety of topics by free discussion, and by practical training of old and young for the every-day duties of life. Many of them are remembered by their now scattered participants with reverent appreciation. Meantime, we sent out missionary preachers and lecturers very actively. All this cost time, effort and money. In furtherance of our objects we needed to publish a semi-monthly periodical organ; also books, pamphlets and tracts. We did so liberally for many years. But these could not be expected to pay for themselves, like popular fancy literature, and were a continual draft on our heads, hands and purses.

We were all loyal adherents of the temperance cause, and were levied on for contributions to it from year to year. But that cause was under no obligations to help us. It sent us occasionally a poor, broken-down victim of intemperance to house and help reform. To such we furnished asylum at more or less expense. We were all uncompromising Abolitionists, then poor and hated. Those who were specially devoted to the liberation of the groaning slave had nothing but good will to give us. But they needed our money, and received a good deal of it; also a home and help for their colored *protégés* in need, and got considerable of that. There were "prisoners' friends" and reformers of penitent criminals in those days, who found Hopedale a nice place to take up contributions in, and to domicile their unfortunates. Before the war of emancipation there was an organized society of non-resistants in the land, and they received freely of our tribute. We were an alms-giving people, and were drawn upon almost continually to hand out food, clothing and money to suppliant needy inhabitants around us, especially to the then poor Irish of Milford. We had widely advertised our community enterprise to the world, and were honored with visiting inquirers from all parts of the country. To these we gave hospitable entertainment—to some of them for weeks—and generally received nothing in return but criticism and cheap advice. We were a purely voluntary association, with doors that swung both inward and outward. So, when members became dissatisfied with our companionship, they were at perfect liberty to leave us and take away all their property. We had to meet drafts of this kind, occasionally occurring, to the extent of thousands of dollars, and, at times, greatly to our inconvenience. Finally, we were legally taxable on all our polls and estates as inhabitants of the town of Milford, and were bound by our principles to pay all taxes promptly and peaceably. This we always did. We continually increased their revenue, but never received a nod of credit from their officials, and, for several years, a very inadequate recognition of our legal rights. We educated our rising generation and constructed our streets largely at our own expense. Yet the community never made them a pauper, or criminal, or a cent's costs for relief of its poor, or for police protection, or for any sort of governmental intervention. It did, indeed, receive, first and last, many little donations and helpful favors from outside friends, amounting to several hundred dollars in all. So it was really, not only a self-sustaining institution, but an unselfish and truly beneficent one. And certainly it was not made up of imbecile visionaries and thriftless lazzaroni, but of intelligent, rational, industrious, economical, orderly and charitable people.

Having reached the culmination of its prosperity at the beginning of the year 1856, let us pause a mo-

ment to ponder the closing words of its president's annual address. The then president was Brother Ebenezer D. Draper, recently deceased. He said: "We may rejoice together in considering the degree of harmony that exists at the present time in our community—greater, I think, than ever before. And I hope and believe that, with our past experience and present advantages, we shall continue to increase in love and wisdom, and so become more and more a light to those around us—proving to the world that Christian Socialism opens a more excellent way in which men may live together as social beings, and that it gives us, as it will all who yield to its saving power, peace and good-will to one another and to the whole human race. May the good God prosper and bless us all!"

Who could imagine, after such an address and benediction, that in less than two months afterward the Hopedale Community would be declared by the same man so hopelessly conditioned that he and his brother George Draper, who together owned three-fourths of its joint stock, must withdraw their interest and manage it for themselves? Yet such was the astounding fact. The grief, disappointment and mortification of the present writer was utterly indescribable. He saw that the noblest undertaking of his life, for which he had planned, prayed and labored with all his energies night and day, over fifteen years of his meridian manhood, was irrevocably doomed to final extinction. He saw clearly, in one flashing moment, that however the results might be posponed, modified, mitigated or overruled for good, the issue was absolutely inevitable, and he must make the best of a sad case. By divine grace he has done so.

What is the explanation of this deplorable surprise? A few words only are required for it. The forementioned annual address of President Draper was delivered on the 9th of January, 1856. At that time the treasurer's report had not been completed. The numerous branches of industry had not all made up their accounts. So the meeting was adjourned. Meanwhile it began to be whispered round that the year's operations might show a small deficit. The adjourned meeting took place February 5th ensuing, and the treasurer's report announced a deficit of $145.15 in the whole aggregate of operations and financial interests. But a drastic discussion followed, in which it appeared that the treasurer's statement had not taken into account the interest due to joint stock, $1652, nor made allowance for depreciation of buildings, machinery, &c.—which might swell the deficit perhaps to $12,000. This was no sufficient reason for serious alarm, much less for dissolving the unitary property and industrial arrangements. But things were said which plainly indicated that a crisis would soon be precipitated. A few days developed it. Affairs must be wound up. It could be avoided only by the mass of small joint stock proprietors paying off the two large proprietors. This was an utter impossibility. So the best terms possible were made, and the change consummated in a manner as satisfactory to all parties as so radical a revolution permitted.

Thenceforth the Hopedale Community had but a nominal existence. It struggled on as a mere religious society till finally merged in the Hopedale Parish. Not another family ever located in its village site except under the common law of temporal advantage and expediency. Those of the old votaries who could remain with comfort and convenience stayed on. Those who felt obliged to seek better positions departed. But the new masters of the situation throve, prospered, made a generous use of their wealth and built up an enviable town. They were the only members of our community who had a lucrative business outside of it. The rest of us either had small pecuniary advantages outside, or sacrificed such as they had to their new undertaking. They had done as much for that, according to their ability, as their two abler brethren, but it did not count in money. Fraternity of property was the keystone of our social arch. When that fell out the arch crumbled. These favored brethren commanded that keystone. It was in their power to preserve or to demolish the structure. The writer thought then and thinks now that they threw away a splendid opportunity to bless mankind and immortalize their memories. But they thought and acted otherwise, as they had an undoubted right to do on their own responsibility to the Supreme Judge. We deeply deplored their decision, but were reluctant to blame them. Probably a vast majority of the world's leading minds in church and state will pronounce their decision wise and good. And if they fell away from a high Christian standard which they had professed to revere, they did so under very seductive and powerful temptations.

So the Hopedale Community failed. Was its failure a finacial and business one? Certainly not. As already shown, it paid its way, bore its heavy burdens and increased greatly in numbers and wealth down to the time of its so-called failure, excepting only during its last year's operations. Then, by estimating a real or supposed depreciation of buildings, machinery, etc., it was made to appear that we had run behindhand perhaps twelve thousand dollars, perhaps less. Was this comparatively small deficit a sufficient cause for dreading bankruptcy?—when there was plenty of money in the pockets of the members to wipe it out by assessment, and when a more prudent management of our numerous organized branches of business could probably retrieve it in a year?

Look at any section of the business world during any fourteen years of operations, and see how many firms or corporations gained more and lost less, according to ability and means, than our little community. The writer knows of several individuals, once

Van Dyck & Co. Boston

George Draper

Warren W Dutcher

our members, who since 1856 have lost, under the old unfraternal business system, more than all our fraterternal institution sunk or was likely to sink, ranging from twelve thousand dollars to one hundred thousand dollars each. No; we made no financial failure. It was simply a moral failure. Doubtless we all fell far short of our high professions, and became weary in well-doing. Certainly too many of us did. We subordinated spiritual things to temporal and too faintly strove for personal Christ-likeness. Thus at length we lost the *will* to persevere in our noble enterprise under temptation. We failed from lack of a *united will* to bear the crosses of our mission. Although there were some basilar defects in our constitutional polity, still the failure was chiefly a moral one, and the writer is now reconciled to it, not because he has lost any of his convictions, principles or hopes as a practical Christian socialist, but because he desires no communal organization that cannot be sustained by fraternal, devoted, united *free-will*. Such organizations he firmly believes will bless future ages. For these he will pray, study and labor until discharged by divine mandate.

PROGRESS TOWARDS TOWNSHIP.—Ebenezer D. and George Draper, having decided that they could do better for themselves and the world on the old financial plane than that of Christian socialism, went resolutely forward to demonstrate it. They claimed still to adhere to New Testament Christianity on such points of duty as they deemed practicable in the existing order of society. They were men of rare business talent, enterprise and tact. They had a fortunate specialty of pursuit, and knew how to succeed in it. They were shrewd, generous, public-spirited and honorable men of the higher type among civilized accumulators. They dropped the less profitable branches of industry which had been carried on by the community, concentrated their resources on profitable ones in their own favorite line, called into partnership outsiders of inventive genius and capital, multiplied their productive facilities continually, brought out many valuable patents, and steadily ascended to eminence as manufacturers of cotton and woolen machinery. Conspicuous among their new coadjutors was Mr. Warren W. Dutcher, from North Bennington, Vt. He was an ingenious mechanic, a moral reformer, and a benevolent man, with a good family. He and his made their mark among us. He brought strength to the Drapers, and gained wealth by the connection. One or two of our members were taken into the new corporations, and shared in the advancing pecuniary successes. Such of us as could carry on any kind of business to tolerable advantage did so. The writer and remaining preachers received a small income for public services as religious teachers, also as printers, editors and educators. Riches came only to the favored few and their well-salaried lieutenants. But our fortunate brethren grew in generosity with their increasing means, and dispensed their donations with liberal hands in many directions, especially to the temperance and anti-slavery causes. As to the community (now reduced to a feeble religious society), its various surviving institutional agencies and instrumentalities were largely dependent on their contributions, and received them. In the days of its greater power it prepared the way for their importance by many disinterested labors of head and hand, providing them with a village well-planned, and populated by intelligent, virtuous and orderly inhabitants such as manufacturing enterprise alone could hardly have gathered. It was, therefore, not only reasonable for them to preserve and build up the common interests, but for their own honor and pleasure, as virtual lords of a goodly vicinage. This they were happy to do. A church edifice was needed; it was built by subscription in 1860. They headed the subscription liberally, and ultimately fathered the expense of completion. It was a neat and commodious structure, handsomely situated on Community Square, so called, amid beautiful surroundings. It cost over $6,000, towards which they contributed all but $1,423, though the minor portion drew harder on most of the givers, according to their ability, than the major on its donors. But all did well, and subsequent enrichments have followed from the superior patrons, to their great credit. Our religious teachers, editors, etc., received very little for their services in earlier times. Under the new *régime* one hundred and fifty dollars were raised by subscription in 1856, and divided among three or four officiators, who had their respective assigned Sundays. The same very nearly in 1857, '58 and '59. In 1860 the compensation was raised to six dollars per Sabbath, and the pulpit supplied by two ministers—the writer and Rev. Wm. S. Heywood. Substantially the same arrangement continued till 1864, after which the same preachers received eight dollars per Sabbath till 1866. Then the junior minister removed from the place, and the writer supplied the desk for three-fourths of the time, and received twelve dollars per week of actual service. In 1867 the Hopedale Parish succeeded the community organization, and the writer was called to the pastorate on a regular salary of eight hundred dollars per annum, which continued till April, 1880. All these increases of pulpit support flowed largely from the purses of those who had risen to wealth since the so-called "failure" of the community.

During this period of twenty-four years great events transpired in our country, and marked changes in Hopedale. Ominous political agitations culminated in the gigantic War of the Rebellion. George Draper and several less prominent members of our community deemed it their duty to abandon Christian non-resistance and return to the arena of civil and martial patriotism. So they resigned membership and freed themselves from its restrictive principles. They, their families and kindred thinkers went into politics

and into the war with unstinted devotion. The elder brother, Ebenezer D. Draper, adhered unalterably to our declaration on these and most other points. Yet he and the rest of us could have no sympathy with the slave-holders, and ardently prayed that Divine Providence would overrule the bloody contest for the emancipation of the slaves. Such, indeed, was the outcome. But our position and circumstances were peculiarly unfavorable to self-preservation as a society. Our material power was gone and our social foothold was sliding from under our feet. We resorted to various promising expedients for handing our distinctive organic peculiarities down to the future. None of them succeeded. Propagandism was useless; internal discipline was useless, and pulpit teachings could not turn back the tide of dissolution. So our periodical died in 1860, and later all our instrumentalities, one after another, till the last became extinct. In 1867, though not formally dissolved, the community was virtually merged in the Hopedale Parish. This professed to be a Liberal Christian Society. It was organized under a constitution such as seemed necessary for practical parochial purposes, but contained nothing like a creed, covenant or declaration of principles, leaving each member and supporter free to think, believe and act according to the dictates of his or her own individual reason and conscience. It subsequently affiliated with the Unitarian denomination. The establishment of the parish was formally sanctioned by the waning community January 8, 1868. Finally, at later dates, its trustees legally transferred to the parish all its right, title and interest in and unto the Village Square, the church edifice, the Sabbath-school fund of $800 and the Hopedale Cemetery. Thus ended the career of the Hopedale Community.

Let attention now revert to secular affairs. Under the vigorous management of the Drapers and their allies Hopedale marched rapidly forward to commanding attainments and distinction. Expansion, improvement and beautification were more and more conspicuous from year to year. In the midst of this material prosperity the two brothers began to diverge in their managemental views of business operations. The result was a change of co-partnership in 1868, when Ebenezer D. retired from the firm, and his place was filled by George's oldest son, General William F. Draper. Ebenezer had been a successful accumulator on a smaller scale of transactions. He was worth about five thousand dollars when he joined the community in 1841. In 1852, when George became co-partner with him, he was worth at least thirty thousand dollars, and George less than five thousand dollars. Both gained rapidly, and in 1868 the senior brother was worth one hundred and twenty-five thousand dollars, and the junior over one hundred thousand dollars. Their business was now greatly expanded and correspondingly more complicated—requiring proportionate attention and vigilance. Both had a growing ambition for riches—to be devoted to laudable uses. But their ideas, tastes and capabilities differed somewhat. Ebenezer was good at negotiating advantageous contracts and making profitable bargains. George excelled him in will-power, indomitable push, mechanical genius, insight into values and the management of details. Moreover, he had a family of talented children coming up; whereas Ebenezer had only one or two adopted ones, destined to other pursuits. The upshot of divergence, however, was, that the elder brother seemed to the younger too easy in business matters, and more ready to share profits than the fatiguing, close application necessary to secure them. The result was that the co-partnership of E. D. & G. Draper ceased in 1868. That of George Draper & Son was immediately formed. This very competent and genial son, William F. Draper, who succeeded his uncle in the firm, went into the great war a private, came out of it a brigadier-general by brevet, and is equally distinguished as a business man. Meantime Ebenezer D. Draper embarked in a flattering enterprise with associates in Boston, "The American Steam Fire-Proof Safe Co.," and ultimately lost nearly all his property. He could not have fared worse had he stuck by the so-termed *incompetent visionaries* of the community. Not such the fortune of George Draper, sons and confederates. They prospered wonderfully, and marched triumphantly on from one achievement to another till they rendered Hopedale an enviable monument to their renown. And the present seems only a prelude to grander future attainments. But the historic pen deals not with anticipations.

Manufacturing operations, though more or less closely connected, are carried on by distinct firms and corporations, which may now be treated of in their order. The foremost of these in importance is the firm of "George Draper & Sons." Its senior died in the midst of his successes, greatly distinguished and deeply lamented throughout a wide circle of influence, June 7, 1887, having been its presiding head since 1868. It now consists of General William F. Draper, George A. Draper, Eben S. Draper and William F. Draper, Jr. They are large selling agents for the other companies. "The Hopedale Machine Co." was incorporated in 1867, with George Draper as president; William F. Draper, treasurer; and Joseph B. Bancroft, managing director. It has manufactured very extensively a variety of patent machinery, has an ample foundry, a screw-making department and all sorts of facilities for multifarious productions in its general sphere. Its present superintendent is A. B. Edmands. It has a capital of two hundred thousand dollars. "The Dutcher Temple Co." was also incorporated in 1867—George Draper, president; F. J. Dutcher, secretary and treasury; with the Draper brothers on its board of directors. Capital stock, forty thousand dollars. Manufactures the Dutcher and other patent temples, seamless stocking knitting-machines and numerous other curious and useful articles. It has a complete outfit of all necessaries

J. B. Bancroft

for its own successful operations. The Machine Company and Dutcher Temple Company have respectively good water-power privileges, supplemented with steam-power for all needful occasions and purposes. The three companies thus far described have large, handsome brick edifices, besides wooden ones, affording them over one hundred and sixty thousand square feet of convenient room, or over three acres of flooring. The firm of "A. A. Wescott & Sons" manufacture spindles for the Drapers. They have a flourishing establishment, situated a mile south of the others on a good waterfall, long previously occupied for more ordinary uses. They execute a creditable amount of business in their line, and are building up a respectable little village called Spindleville. Taking all these companies together, they have practical working control over patents and improvements thereon to the number of nearly four hundred—covering a vast variety of ingenious and useful mechanism now deemed indispensable in the well-furnished cotton and woolen manufactories of the United States. Their annual sales are estimated at from one million dollars to one million two hundred and fifty thousand dollars, their employés of all grades at from six hundred to eight hundred and their pay-roll at about six thousand dollars per week. Their employés are generally of superior skill, as well as moral character, receive better compensation, perhaps, than the average in our country, and have never made a strike for higher wages. To obtain an adeqate idea of the nature, variety and extent of Hopedale manufactures, the inquisitive reader is referred to the "Sixth Descriptive Catalogue" of "George Draper & Sons," as presented in an "Illustrated Pocket Hand-Book," compiled by W. N. Goddard and published in 1887. Contemporary with this successful manufacturing enterprise was a large livery and transportation business, handling thousands of tons of iron, coal, etc., annually, conveying the mail and passengers several times a day and furnishing horses and carriages to the inhabitants. Later has followed the Hopedale Elastic Fabric Company, incorporated December, 1886—William F. Draper, president; E. L. Osgood, treasurer and selling agent; and William Lapworth, superintendent. Brick factory, 100 feet long by 50 wide, 3 stories high, with boiler-house outside; capital stock, $100,000; 100 operatives, 80 of them females; annual sales, about $200,000; orders crowding and business thrifty. Mr. Lapworth is the genius of this enterprise, having the honor of projecting, introducing here and most skillfully superintending it.

Such a continually rising tide of manufacturing prosperity naturally wrought corresponding results in the whole status of Hopedale Village. Its dwellings were gradually trebled and several fine mansions built; population proportionately multiplied; new streets opened, the unfinished ones improved, the older ones macadamized and graced with concrete sidewalks; the church renovated, furnished with a costly organ, and its surroundings much beautified; gas-lights and water supplies introduced through pipes from fountain-heads in Milford for public and private convenience; effective safe-guards against fire provided; school-house accommodations enlarged; and a host of subsidiary necessaries, comforts and luxuries secured. At length, in the midst of this rising affluence, the ambition was born in the leading minds for township incorporation. The project took form in the spring of 1885, and was thenceforth energetically prosecuted to successful consummation.

Separation from Milford and Incorporation.—The first rumor of this movement was received with incredulity, and the verified fact with a mixture of astonishment and ridicule by the leading Milfordians, who regarded it as presumptuous, vain and hopeless. But George Draper & Sons, with their influential coadjutors, went into the undertaking with their accustomed shrewdness, energy, determination and ability. They knew that their cause would encounter a powerful opposition from the mother town, that it could not succeed without resorting to every legitimate means of attainment, and that they had got to work for it with tireless vigilance. They proceeded accordingly from preliminaries to conclusion. So they surveyed and mapped out the territory to be included in the proposed new town, and canvassed the population to ascertain who would favor and who oppose the project. They procured a large majority of the legal voters as signers to the petition for division and incorporation; while a few remained neutral, and a very small minority declared themselves decidedly opposed. The petition was duly prepared and entered on the Order Calendar of the General Court for consideration at its regular session to commence in January, 1886. Meantime vigorous measures were taken by both Hopedalians and Milfordians to prepare for the approaching contest. Large public meetings were held in both sections, strong working committees appointed, and very able counsel engaged to manage their respective causes. Milford had certain notable advantages. She was the party in possession; she had overwhelming numbers, alive with ardent zeal; she had three newspapers devoted to her interests, and also two able members in the Representative chamber of the Legislature. Hopedale had some countervailing advantages. Her leaders were strong, executive, judicious, indomitable men; they had a widespread, deeply-rooted influence in manufacturing, political and financial circles; they had made a multitude of friends by their public spirit and generous donations; and they had a good cause. If they could get the real merits of that cause fairly before the minds of an appreciative majority of the Legislature, they were sure to succeed. This was not an easy achievement in dealing with such a large number of persons. For many of the best disposed needed special information, the indifferent to be moved, and the misin-

formed to be enlightened. No opportunity was neglected to supply these urgent necessities; but, though their opponents, under excitement, very broadly insinuated that they resorted to dishonorable means to attain their object, there was really no just ground for such a suspicion. Their means were such only as have long been sanctioned by custom in such controversies. Their real offence was that they were too sagacious, industrious and indefatigable to be overmatched.

Both parties had engaged able counsel, sufficiently well matched to leave nothing undone or unsaid in behalf of their respective clients,—for the petitioners, N. Sumner Myrick, Esq., and Hon. Selwin Z. Bowman; for the remonstrants, Hon. J. H. Benton, Jr., and Hon. J. H. Bennett. The legislative Committee on Towns, before whom the parties were to lay the case, comprised Messrs. Henry M. Phillips, Charles A. Gleason and Samuel B. Locke, of the Senate, with Messrs. Stephen S. Taft, Charles Field, Miles Sampson, Charles F. Jenney, Robert Blyth, Jesse Allen, Francis E. Shaw and Albert A. Woodward, of the House,—Hon. Henry M. Phillips, chairman. A more intelligent, judicious, candid and patient committee could not have been asked. They commenced the hearings January 27, 1886, and continued them by adjournment through seven or eight sittings, besides making an official examination of the premises on the 9th of February. It was incumbent on the petitioners to show that their proposed town had the proper requisite elements of such a body politic,—*i. e.*, sufficient area, population, wealth and capability to manage municipal affairs. Also that their separation from the mother town would cause it no serious injury as compared with the advantages gained by the new town. It was to be expected, from the history of mankind, as always reluctant to part with power and privilege, that Milford would strenuously resist the attempted division: and she did so point by point. Although she could not deny that the area of Hopedale, 3547 acres, would be larger than that of seventeen towns and five cities in the State; nor that its population, nearly 1000, exceeded that of ninety-five towns in the State; nor that its quota of polls, 250, outnumbered that of seventy-nine towns in the State; nor that its valuation, $769,346, would be greater than that of one hundred and thirty-three towns in the State; nor that its voting citizens would be competent to manage municipal affairs; nevertheless, it was her policy to yield nothing. Her managers, partisans and lawyers boldly assumed the ground that the show of numbers in favor of a new town was unreal and deceptive; that the movement was set on foot by George Draper & Sons, was designed chiefly for the aggrandizement of one family, and was supported only by their relatives, subalterns and dependents; that some of these dependents were overawed and even coerced; that not a few of the voters on the Hopedale territory were either opposed to division or were neutrals; and finally that the Drapers were mere selfish schemers and *tax dodgers*. All these brave assumptions and imputations were put forth, reiterated and pertinaciously insisted on, with as much seeming honesty and earnestness, as if they were demonstrable verities. Their first effort was to emphasize a derogatory inference from the acknowledged and obvious fact that the Drapers initiated and led the division movement; as if such movements, where worthily started, are customarily set on foot and headed by persons of ordinary estate, talent and influence—which is seldom, if ever, the case. Common sense and prudence dictated in this case, that if any laudable attempt was to be made at all to obtain the incorporation of Hopdale, the Drapers were the very men of all others to initiate and lead the movement; for they had all the qualifications necessary to success, and would be generous benefactors of the new town,—as has proved to be the case. They doubtless had an ambition to father and endow the town. Was that a criminal ambition? Was it an ignoble ambition? Did it deserve even from opponents reproach and contumely? Milfordians themselves would now answer: No.

Next the battery of opposition was turned upon the rank and file of the petitioners, to make it appear that, though seeming to make a fair show, they were mere mercenary dependents of the Drapers. They were, therefore, all questioned as to whether they were family relatives, or business partners, or paid agents, or employés, or sold them manufactured articles; and the implied inference uniformly was, that no man standing in such relations could properly be counted in as a competent citizen. Yet all these men, thus disparaged, were uncommonly intelligent, and several of them capable of managing municipal affairs in any town of the Commonwealth. But how happened these men to think, feel and act with the Drapers? For the same general reason that thousands of independent-minded people think, feel and act together on religious and political questions,—because they view things alike. There was, however, one single individual who alleged that he signed the petition under constraint, and who also alleged that he knew of several others who did so. His name had been stricken from the list of petitioners as soon as it became known he had declared himself to have been overawed. When placed on the witness-stand, he was requested to name the persons he knew to have been coerced. He refused, but finally named one. That man soon afterward appeared and testified that he signed the petition freely, and never told any one the contrary. The alleged dictator also appeared, and testified conclusively that he never made use of coercive language in any form to induce persons to sign the petition, and certainly not in the case asserted. Thus vanished the phantom of reproach on the character of the leading petitioners. Yet the remonstrants actually had one aid and comfort which was a thorn to the petitioners. There was a handful within the

Hopedale territorial lines who thought it their duty to take sides against their near neighbors by resisting division, and who did so zealously. This was the most unpleasant occurrence, in its spirit and consequences, which befel the Hopedalians during their struggle for municipal independence; not because it had much weight in deciding the main issue, but because it alienated and embittered some who ought to be mutual friends.

The next effort of opposition ingenuity was to demonstrate that the Hopedale villagers, however otherwise estimable, had few local conveniences, and were dependent on Milford Centre for almost everything. In that favored Centre were the railroad depots, the mercantile establishments, the provision markets, the banks, the assembly halls, the churches, the high school, the public library and a multitude of other necessary good things, including even the streets over which the Hopedalians must travel to obtain the supplies they needed. Was it for such a class of dependent people to set up as a town? It was a greater strain on gravity than on facts and logic to answer such an argument. But courteous decency demanded that a formal and conclusive reply should be made. This was easily done. It was undeniably proven, first, that the Hopedale people had never received any one of these advantages as a gratuity, but had always handsomely paid for every item of value or convenience furnished them; second, that they intended always to deserve the good name, long since accorded them, of being reckoned among Milford's best customers; third, that they had done their full share towards providing the roads and streets they were obliged to travel in order to trade with Milford dealers; fourth, that the leading petitioners were stockholders and officers in the railroads and in several other corporations of Milford Centre; and fifth, that the incorporation of Hopedale as a town would not disturb a single one of Milford's superior monetary and commercial advantages at all. The only effect of such an argument on candid minds was to show that a town with so much to boast of was not very magnanimous to grudge the petitioners the right to manage their own local affairs for themselves.

But to this there remained the formidable objection that this aspiring Draper family were mere plotting *tax dodgers*, and ought not be tolerated. Milford could not afford to part with the prerogative of taxing them at her own discretion. If they should get off at the head of a new town, there was no imagining what calamities might happen. One, however, was certain—Milford was to be a great loser. They must be foiled in their pernicious career. The brilliant compliments with which they were bespangled, especially the obnoxious father, were transcendent, and quite beyond their merits, or even their demerits. There was one and but one way of escape from their unfortunate predicament. They must abandon their project of an independent town and submit to Milford taxation. If they would only perform that little act of expiation, their sins, though like scarlet, would instantly become white as snow. They would then be excellent fellow-citizens, if not fellow-saints. But they were obstinate and incorrigible offenders, and had to be denounced accordingly. So the inquiry arose how many dollars per annum of taxes they were likely to avoid in fathering their new town? Nobody knew or guessed; they were going to dodge several thousand which Milford wanted, and this was enough to seal their doom. What right had they in their wealth to diminish a flourishing town's needy exchequer? Had not that maternal town bestowed on them large gratuities to encourage their enterprise and foster their business? No, not to the value of a single cent. Had she not been a liberal purchaser of their manufacturers? To the extent of a few dollars' worth of useful iron castings perhaps. Had she not been very generous in building roads for them, and in providing safeguards against fire for their factories, &c.? The records did not show it. Had they been sordid and stingy in contributing to Milford's public necessities, wants and charities? Far otherwise. Had they surrounded themselves with intemperate, reckless and shiftless operatives, thereby and otherwise breeding criminals and paupers, to be taken care of at the expense of the town? Not one. Had they given no employment to the needy population of Milford? Much. Had they pinched, ground down and oppressed their employés? On the contrary, they had the reputation of paying fair wages. What, then, was their grave offence? Were they getting too rich and important? If so, were not their accusers doing their utmost to accumulate riches, and some of the most conspicuous of them by less creditable means? Were they fraternal communists, trying to have "the strong bear the infirmities of the weak," like the founders of Hopedale? Nothing of that kind. They derided such experiments. But they were looking out, with the shrewdness of modern civilization, every one for himself, and, if they failed to capture the lion's share, had no right to avenge their ill-luck by denouncing those who succeeded as dangerous characters. Yet the plea was that these ambitious Drapers were scheming to escape just taxation by obtaining a new town, chiefly made up of their dependents. If this was not intolerable conduct, what could be? And if such attempts did not deserve to be exposed by disinterested free speech and the press, of what value were these guaranteed free utterances? But such pleading, earnest and pathetic as it was, fell on the discerning ears of impartial judges as hardly coming from injured innocence.

Finally, the climax of the controversy was reached. If Hopedale should be incorporated, however otherwise justifiable, would not Milford be grievously and irreparably damaged? The remonstrants vehemently affirmed that it certainly would. And their tone was that of persons threatened with ejection from a

dearly-bought, clearly-titled estate by fraud and arbitrary power. If so, they ought to gain their case. But facts and arguments were still against them. It was true that their Hopedale taxable subjects were profitable ones, yielding a net annual revenue of several thousand dollars. This golden fleece would certainly be lost to them if their tributaries obtained their independence. There was no gainsaying this conclusion. On such ground the alarm-cry was raised, Milford's taxes will be fearfully increased, immigrants will be deterred from coming into the town and its real estate will greatly depreciate—its damages will be deplorable! Now its Centre was the grand emporium of affluence, of trade, of wealth and all desirable advantages. But if these Hopedale tributaries were allowed to go off and set up for themselves, their impoverished municipal parent would languish into ruin! So pleaded her eloquent advocates. What were the facts? In everything but tax profits Milford was in danger of losing nothing—not a mill. In business matters, trade and the advantages of general intercourse, Hopedale was going to be just as profitable a customer as ever. Their municipal incorporation would not change these particulars one iota, unless, perhaps, for the enrichment of Milford. In the sore matter of tax profits even, Hopedale independent must bear its own burdens, take care of itself and meet its share of State and county taxes. It must also pay its portion of the existing town debt. So far Milford would actually be relieved. Was her real estate to depreciate, or her business prosperity to decline from such causes? No; but that surplus revenue from taxation of the Hopedalians, some $8000 to $10,000 a year, was to be irretrievably lost; and that was going to do the apprehended mischief. Well, suppose that amount must be actually added to Milford's self-taxation, was it going to bankrupt her? or even seriously strain her financial ability? It was unreasonable to assert it, especially after the claims made in a former part of this hearing respecting her opulence as compared with dependent Hopedale. With a population of nine thousand, such a host of enterprising business men and such abundant advantages of all kinds, $10,000 a year ought not to be a very frightful loss to bear. Moreover, it was in her power to curtail her expenses at her own option, and, by greater prudence in making outlays, to moderate taxation. This, however, was not agreeable, for it came out she was ambitious to become a city, in which case her expenses were likely to be greatly increased. Hopedale's independence would defeat, or at least postpone, this desirable consummation, whilst at the same time escaping taxation to sustain it.

Another important consideration came into the loss account, which was, that the sanitary welfare of Milford Centre demanded costly sewers, and though Hopedale needed none, it would be grievous injustice to release her from the legal grasp that would compel her to help pay the coming bills! Who could answer such ardent and eloquent reasoners? Thus the whole controversy was narrowed down to the question: Shall Milford be damaged to the extent of her power to draw this annual net revenue from Hopedale by municipal taxation? If Milford could have shown that Hopedale was indebted to her for favors in the past, for patronage and encouragement in time of need, her plea would have had some color of justice and plausibility. But here was an unfortunate blank. For though Hopedale always had more or less good friends in Milford, as individual and social acquaintances, the town majority and authorities never laid it under any special obligation. From the days of its struggling infancy as a fraternal community, in 1842, it continually increased the taxable polls and property of the town without a token of appreciation. For several years it schooled its own children, and built its own streets. And when appropriations began to be granted, it was done with manifest reluctance. Its people made no paupers, or criminals, or disorderly characters for the town to care for. Yet, as a town, though it sowed not, it was a vigilant reaper. Every poll and every parcel of estate was assessed, the taxes duly called for and always promptly paid. And so matters had gone on through all the changes, substantially in the same manner, for over forty-three years, down to this contest.

All the while Milford was drawing a net revenue from Hopedale by taxation; giving back in appropriations much less than she took. And whence came the population of Hopedale Village? Almost entirely from places outside of Milford, some of them from remote quarters of the country. From whence came their property? A mere fraction of it from Milford—the great bulk of it from widespread regions abroad. Milford purchased very little from Hopedale, but Hopedale was a large and profitable customer of Milford's goods. These facts came out in bold relief during the discussion, and they convinced a sufficient number of Massachusetts legislators that, even if Milford should lose the net revenue to which she clung with such a tenacious grasp, she had a poor title to it, and that Hopedale ought of right to be a free and independent town. The Hon. Mr. Bowman wound up the pleadings before the Legislative Committee with a masterly speech, for the petitioners—clear, comprehensive and irresistibly impressive. The committee deliberated, and unanimously reported a bill for the incorporation of Hopedale.

The bill came up in the Senate for consideration March 12, 1886, and after a long discussion prevailed, fourteen to eleven. It was brought up in the House March 25th, and after a hot debate carried, one hundred and eighteen to ninety-two. Returning to the Senate, it was finally passed, eighteen to sixteen, April 6th. On the 7th it was signed by His Excellency,

A. A. Westcott

Governor George D. Robinson, and so Hopedale became a town. Nothing really new was said or could be said in either House of the Legislature for or against Hopedale's incorporation, but of course the whole ground must be gone over with more or less particularity. The committee ably defended their own report on its solid merits. Its opponents repeated all the sharp things said against the petitioners in the committee-room. And their orators in both Houses won laurels of approbation from the remonstrants by their invective eloquence against the leading Hopedalians and their followers. All these labors of love were lost, not only on the assailed, but on the legislative majorities and the Governor. Justice and reason triumphed.

In the evening of April 13th ensuing the Hopedalians celebrated their victory, according to the fashion of the political world, by the ringing of bells, discharge of artillery, illumination of their village and display of fireworks. Two sonorous bells were rung smartly for an hour; Battery B, from Worcester, fired first a salute of eleven guns to General William F. Draper, and then eighty-six in honor of Hopedale as the eighty-sixth town of Massachusetts incorporated during the present century; the gas and electric lights flashed their splendor in all directions, and the skies blazed with brilliant rockets. So the people rejoiced with manifold demonstrations in their newly-acquired municipal independence.

The town held its first meeting under a warrant from W. F. Draper, justice of the peace, April 19, 1886, and was legally organized by the choice of the following-named officers: Frank Dewing, clerk; E. D. Bancroft, treasurer: E. L. Chichester, collector; Ernest M. Capen, auditor; J. B. Bancroft, Lewis B. Gaskill and Alonzo A. Cook, selectmen, overseers of the poor, Board of Health and highway surveyors; Asa A. Westcott, David Nelson and H. B. Fisk, Assessors; Frank J. Dutcher, for three years, Anna M. Bancroft, two years, and Albert W. Ham, one year, school committee; William N. Goddard, for three years, Frank S. Hayward, two years, and C. F. Roper, one year, trustees of library; Frank Gaskill, William N. Phillips, Samuel A. Andrews and Robert Ross, constables; C. H. Messenger and C. F. Roper, field-drivers; Frank S. Hayward, Fred. Mooney and E. D. Walker, fence viewers.

On the 14th of October, 1886, the town adopted an ample, wholesome and commendable code of by-laws; also at the same meeting judicious rules and regulations for the Fire Department. Thus the necessary machinery of a well-ordered municipal government was set in motion. Its operations have been eminently satisfactory. A large, well-compiled, lucid and complete report for the year ending January 1, 1887, was made by the town officers and published, representing all departments of its affairs in a prosperous condition. A similar one was made and published for the year ending January 1, 1888. A summary of this second annual report, modified by later ascertained data, may properly be given on these pages, as exhibiting the progressive status of the new town, nearly down to the present time.

Town Officers.—David A. Westcott, clerk; E. D. Bancroft, treasurer; Edward S. Simpson, collector; J. B. Bancroft, Lewis B. Gaskill and Simon G. Gilman, selectmen, overseers of the poor, Board of Health and highway surveyors; Asa A. Westcott, David Nelson and Hamlet B. Fisk, assessors; Albert W. Ham (three years), Frank J. Dutcher (two years), and Anna M. Bancroft, school committee; C. F. Roper (three years), William N. Goddard (two years), and Frank S. Haywood (one year), trustees of the library; Frank Gaskill, William Phillips, Samuel A. Andrews, Robert Ross and T. J. Coyne, constables; Charles Waterhouse, George Cole and Frank Gaskill, field-drivers; Frank S. Hayward, Fred. Mooney and E. D. Walker, fence-viewers. By appointment and special organic arrangement—Charles E. Pierce, chief engineer of Fire Department; J. B. Bancroft, assistant engineer; A. W. Westcott, clerk and treasurer; Wm. N. Goddard, secretary of library trustees and librarian; Ellen F. Welch, assistant librarian; Frank H. French, truant officer.

Before coming to statistical details, it is pertinent to treat of important historical matters chronicled in the second report. George Draper, the father and benefactor of the new town, departed this life, in the ripeness of his successes, usefulness and honors, June 7, 1887, aged sixty-nine years, nine months and twenty days. This lamentable event took place in Boston, whither he went for a temporary sojourn to obtain medical relief from urinary and kindred ailments, which, though not seemingly dangerous, he was anxious to overcome. Unexpectedly to all, he presently became alarmingly sick under treatment, and in a few days expired. His remains were brought home, and on the 11th of June his funeral was solemnized with every demonstration that bereaved family affection and public grief could bestow. Thousands appreciated his merits, sympathized in a great common loss, and united in reverential tributes of respect to his memory. Besides the valuable gifts and legacies which he bequeathed, was the commodious and beautiful town edifice which graces the centre of Hopedale Village. He had laid its foundations in 1885, and it was far advanced towards its completion before he died; but the interior finish had been retarded by casualties, and lingered several months.

Brief General Description.—"The building is of granite and brownstone, with exterior dimensions of 75x69 feet. It is on the main street, and faces nearly east. On the front are two store entrances, besides the main entrance, at the right of which are the staircase and town officers' rooms. At the end of the hall, directly opposite the entrance, are double doors leading to the reading room, 24x22 feet, in the northwest corner; this is connected with the library proper by an arch eleven feet six inches in width. This room

occupies the rear centre of this floor, and is thirty feet by seventeen feet, six inches, with an entrance from the left of the entrance hall. The finish, furniture and shelving in these rooms is of California red-wood. The entire upper story is occupied by the town hall, with the stage, reception and ante-rooms. The basement contains a market, lock-up, caucus-hall, steam-heating apparatus and store cellar." The entire cost of the noble structure, with its sixteen thousand feet of land, was over forty thousand dollars.

At a special town-meeting held on the evening of August 22, 1887, the five children (three sons and two daughters) of George Draper (deceased), pursuant to their father's testamentary wishes and directions, presented these premises to the town, with a perfect title of conveyance. This conveyance imposed on the town only one qualifying condition—that none of its rooms should ever be rented to persons without the consent of the donor's heirs. The town unanimously accepted the donation on the offered terms, passed an appreciative vote of thanks for the same, and also the following preamble and resolutions:—

WHEREAS, In the Providence of God, the Town of Hopedale has been called to lament the decease of Mr. George Draper, and would formally indicate its appreciation of his noble services and powerful direction; therefore it is

Resolved, That this town suffers an irreparable loss.

Resolved, That not only has this Municipality been thus bereft of a wise counsellor, loyal citizen and most munificent benefactor, but it is also deprived of one whose integrity in business relations, and whose untiring devotion to the public welfare, constituted him an object worthy the emulation and grateful remembrance of all who knew him.

Resolved, That a copy of these resolutions be inscribed upon the records of the Town, a copy also presented to each individual of his immediate family and duly published in the public press.

At the same town-meeting, after choosing a Committee of Arrangements to supervise the dedication of their admirable Town-Hall, the following vote of thanks was passed:

Voted.—To thank Gen. W. F. Draper for his donation to the town of the so-called Dutcher Street extension (which cost him several thousand dollars), and for the prompt and liberal manner with which he accepted and paid for such changes as seemed necessary for the successful completion of said road.

If, after perusing such a record, any of our readers should wonder whether this Draper family and these menial voters are the same that were so sadly disparaged before the General Court of 1886 as unworthy to be incorporated into a town, let them rest assured that they really are the very same.

DEDICATION OF THE TOWN HALL.—The Committee of Arrangements consisted of Gen. William F. Draper, chairman; Joseph B. Bancroft, Lewis B. Gaskill and Simon G. Gilman, selectmen; and Artemas B. Edmands, Asa A. Westcott and Charles F. Roper, citizens-at-large. To these were subsequently added E. D. Bancroft, Mrs. Phila W. Weston and Miss Anna M. Bancroft. Numerous sub-committees were appointed and put in charge of the necessary branches, into which details were divided. Every committee discharged their duties assiduously, efficiently and creditably. At length the day of dedication arrived, October 25, 1887. It was a grand and memorable occasion for Hopedale. A specific narration of its interesting proceedings and performances would overflow our limits, and will not be expected. We must confine our account to synoptical outlines. A great concourse of people assembled, including, besides near residents, numerous representatives of the surrounding towns and a host of sympathizing friends from more distant parts of the Commonwealth, who had stood by Hopedale through evil as well as good report, when it was struggling before the Legislature for independence. Music of the highest excellence threw its charms over the multitude, rare eloquence distilled its fragrance on delighted auditors from eminent orators, and a rich dinner regaled the stomachs of participating guests. The formal exercises in the hall commenced at eleven o'clock A. M. Stirring airs from the band; prayer by the writer; unsurpassable music from the Weber Quartette; a pertinent and appropriate introductory address from Chairman Gen. William F. Draper; principal dedicatory address by Ex-Governor John D. Long, replete with his graceful and renowned eloquence; remarks by the writer of this article, interesting speech by Rev. Lewis G. Wilson as the spokesman of two hundred and forty grateful Hopedale employés, presenting the town a splendid life-size crayon portrait of the late Geo. Draper; formal delivery of the Town House keys to selectmen, by Geo. A. Draper, as representative of the late George Draper's heirs, and acceptance of the same by Joseph B. Bancroft, chairman of the board; dinner, toasts and speeches in the great tent on Church Common, with the customary musical accompaniments. So the day closed, redolent with testimonial tributes to departed worth, grateful acknowledgments of munificent benefactions, sacred reminiscences of the past, and auspicious hopes of the future.

As was natural and proper, the dominant current of thought, speech and attention was eulogistic of the new town's upbuilder and generous patron, George Draper. The writer was the only speaker of the occasion who represented the primary Hopedale of community days. And he deemed it both a privilege and a duty to revive its memory, and show that it had something more to do with preparing the way for subsequent success than appeared on the present surface of things. The honorable and eloquent orator of the day had, indeed, made one brief reference to it, but in terms of disparaging commiseration rather than commendation. He said:

On this spot, some forty years ago, one of those communities which spring up from time to time, and of which so much is anticipated by the enthusiasm of their members, had undertaken, under the sweet guidance of the venerable and beloved pastor, who is here to-day, to solve the problem of a happy, industrious and peaceful Christian brotherhood. It was a joint stock association, sharing capital and profits, and run on

common account. The result was a practical bankruptcy, avoided only by a change which followed no longer any transcendental line, but turned to the line of hard, practical American business, for George Draper took the plant into his vigorous hand. An enlightened and liberal selfishness became, as it usually does, a beneficence to which a weak communism was as the dull and cheerless gleam of decaying punk to the inspiring blaze of the morning sun in spring-time. The man of affairs was in temporal things a better leader than the priest, as he usually is, and as nobody will so emphatically assure you as the priest himself. A meagre manufacturing enterprise, that made a few boxes and cotton-spinning temples, and employed a dozen hands, began that marvellous expansion which, in these few years, under George Draper's direction, has come to employ five hundred men, has grown from an annual product of twenty thousand dollars to one of more than twelve hundred thousand; has built and incorporated a Massachusetts town; has erected these trim, convenient houses and homes of skilled and prosperous labor; has enlarged the original industry into four great business houses, and embraces one of the largest cotton machinery manufacturing centres in the world.

Well, how was the "venerable and beloved Christian pastor," "the priest," likely to appreciate this rhetorical picture of "weak communism, etc.?" Did he wish to detract from the merits and fame of his lamented friend, the deceased George Draper? By no means. But he did not feel that the honorable reputation of that departed friend needed to be magnified by the unjust disparagement of the Hopedale Community or any member thereof. He knew all the facts in the case, and knew that the orator, through some mistake, had radically misrepresented the most important of them. He knew that Ebenezer D. Draper, the elder brother of George, was president of the Hopedale Community at the time when its joint stock and unitary interest were dissolved; that he was then a much larger capitalist than his younger brother, and wielded far greater power; that he pronounced the condition of the community eminently harmonious and prosperous less than two months before he and his brother decided to withdraw their capital; that there really was no bankruptcy, nor any necessitating cause for a dissolution of unitary interests, except their withdrawal of three-fourths of the joint stock, and that "the plant" was taken into the vigorous hands of the two brothers only to be changed into a successful manufacturing settlement, managed on the principles of "enlightened and liberal selfishness." Therefore, knowing perfectly the entire history of the community, that without its devoted labors and sacrifices this new town of Hopedale would probably never have attained the importance now being glorified, and knowing, moreover, that the rising generation were in danger of remaining misinformed on the subject, the aged "priest" improved the few minutes allotted him in stating the salient facts of the case. What these facts were is clearly set forth in the beginning of this sub-history, and need not be repeated. His speech was listened to with respectful attention, and he was cordially thanked by many auditors for his exposition. He believes it made a salutary and lasting impression on the assembly.

Progressive Statistics to September, 1888.—The town report already referred to comes down to January 1, 1888, but on several points later information is available, and will be used. The officers chosen at the annual March meeting, with slight exceptions, were re-elected from the preceding year, as already named. The following synoptical chronicles exhibit, in a compendious form, the principal transactions and corporate progress of this youthful municipality.

Conformably to the terms prescribed in the act of incorporation, Hopedale must pay fifteen per cent. of Milford's indebtedness at the time of separation. Amicable settlement October 6, 1887, when principal and interest was paid to Milford, amounting to $18,-436.95. Liquidated by funds on hand and borrowed money.

Town debt, October 6, 1887, $16,000; reduced so as to stand at the end of 1888, $14,000; total valuation of taxable property in town, at the close of 1887, $781,204; July 1, 1888, $882,408; tax rate per $1000, uniformly thus far $13; number of inhabitants, July 1, 1887, 975; July 1, 1888, 1,116; number of dwelling-houses, July 1, 1888, 203; in Hopedale village, 217; number of polls, July 1, 1887, 301; July 1, 1888, 347; amount of taxes committed for collection, 1887, $10,-749.91; amount committed in 1888, $12,165.55; total income from taxes of all kinds,—*i.e.*, from individuals and corporations,—1887, $19,385.30; same for 1888, not fully reported at the time of this writing.

Town expenditures for the year ending December 31, 1887, viz.: for highways, out of appropriations, donations, etc., $4,456.69; for sidewalks, out of appropriations, $1,013.32; for incidentals, under administration of selectmen, $2,788.11; for town hall appurtenances, etc., $842.15; for gas and street lights, $315.94; for water against fires, under appropriation, $516.68; for Memorial Day, $25.00; for school-house lot appropriation, $600.00; for borrowed money repaid, $3,000.00; for State and county tax in 1886, $1,331.10; for State and county tax in 1887, $1,662.52; for land damage, extension of Dutcher Street, $819.00; for outlays on Water Street, newly laid, $501.36; for aid to poor belonging to other towns, $108.66; for Fire Department under appropriation, $813.01; for educational purposes, total receipts from all sources, $5,232.89; total disbursements, $5,232.89; for town library, total receipts, $1,170.10; expended, $2,294.40. So, for all purposes the town expended, during the year ending December 31, 1887, $26,320.83. It will be understood that this total includes certain donations, and is affected somewhat by debits and credits of the preceding year.

Appropriations of 1888, for the same general purposes above specified, amount to $19,475.00; town property on hand, aside from town hall and its appendages, school department buildings, $5,700.00; Highway Department, including new stone-crusher, etc., $2,467.00; Fire Department, hose-house, apparatus and equipments, $2,015.00.

Condition of Departments.—All the departments are admirably managed and in excellent condition. Respecting highways and streets, the new

town inherited twenty-five, by act of incorporation, from Milford. These are of various lengths and widths, and bear appropriate names. One of them has been very advantageously extended, through the generosity of General Draper, a considerable distance northward from Hopedale Village, shortening, on a level route, the distance to Upton. Two or three other new streets have been laid out, and marked improvements made on several old ones. Our roads are good.

Concerning the Hopedale Fire Department, matters show a no less creditable record. It has a nice hose-house, a well-equipped carriage with 1200 feet of hose, 4 ladders, 36 fire-pails and 12 suitably-located hydrants. Besides these, the several corporations have provided themselves costly and efficient apparatus for the extinguishment of fires on their respective premises, and not a few individuals have plenty of ladders and fire-pails. The department is well organized and manned. Fires are few, far between and, thus far, almost harmless.

As to pauperism, it scarcely exists, and criminality, as a cause of expense, is of rare occurrence. No licenses are granted for the sale of intoxicating liquors, and the manufactories of vice, crime and misery are kept at a distance. Our Educational Department is liberally encouraged, assiduously supervised, reputably conducted and in first-rate order. Down to the present writing there have been but two school-houses, the larger situated in Hopedale Village and the smaller in South Hopedale. An ample High School edifice is in near prospect, and will soon be erected. The corporations have unitedly pledged a subscription of six thousand dollars towards it, and the town is about to raise a sum adequate to secure its completion. The High School was inaugurated in an extemporized room of the large village school-house in September, 1886. It was an immediate success. Number of pupils, thirty. Course of studies up to the average standard. Principal and assistant eminently well qualified, and results ever since all that could be desired. The increase of scholars in the lower grades has obliged the High School to find new quarters in the Town Hall until the new edifice designed for it shall be ready for occupancy.

The village school-house barely accommodates the pupils of lower grade. During the fall term of 1887 there were in its primary room sixty-six scholars, fifty-three in the intermediate and forty-three in the grammar. Since then these numbers have been continually augmenting. Competent and excellent teachers have filled the several positions with honor to themselves and satisfaction to all parties concerned. The South Hopedale School has not yet admitted of gradation, but it has been creditably taught and managed. The whole number of children in town between the ages of five and fifteen years, as reported by the School Committee for May 1, 1887, was one hundred and eighty-two. The number must now be much larger. On the whole, few towns in the Commonwealth have greater reason to be proud of their public schools than Hopedale.

THE TOWN LIBRARY AND READING ROOM.—These have ample and elegant accommodations in the Town Hall edifice. It will bear repeating that the reading room is 24 by 22 feet. The library room is 30 by 19½ feet. They are connected by an arch 11½ feet in width. The finish, furniture and shelving of both rooms is of California red-wood. In the library, December 31, 1887, 2478 vols.; pamphlets, 1556; periodicals, in incomplete vols., 889—a very good beginning, largely made up of donations. The future is bright with hopeful auspices. There will be liberal donors, and the town will make handsome annual appropriations. The reading room and reference library opened in temporary quarters December 27, 1886; circulation of books commenced June 4, 1887; rooms in Town Hall were occupied December 24, 1887. The reading room was fairly well supplied with valuable reading matter from the outset, and has been gradually enriched ever since. The attendance at reading room, as well as the circulation of library books, has been worthy an intelligent population. The best of regulations have been established for the library and reading room, and admirable order prevails throughout. The board of trustees have done themselves honor by their judicious management of affairs. Especial commendation is due to Mr. William N. Goddard. He is an amateur librarian, takes a lively interest in the affairs of his office, and has laid the town under lasting obligations of gratitude for his services. His assistant, Miss Ellen F. Welch, who attends to the ordinary daily duties of librarian, discharges those duties meritoriously, and has won general approbation. There is fair promise that in a few years Hopedale will have a public library nobly rich in quantity and quality.

LITERARY TASTE AND CULTURE.—These are marked characteristics of our population. Of reading clubs there are three, each of which subscribes for the best periodicals published in the country, and circulates them regularly throughout the families of its members, viz.: The Hopedale Reading Club, the Hopedale Magazine Club, and the Spindleville Reading Club. There are two prominent literary clubs: The Roundabout Club, devoted to mental improvement by preparing, delivering and discussing brief essays on various interesting topics; and the Shakespeare Club, devoted to the study, select reading and consideration of Shakespeare's works. These clubs hold frequent regular meetings at the houses of their respective members. The Hopedale Debating Society, besides discussing the live questions of the day at their pleasure and convenience, furnish valuable winter courses of public lectures by able masters on attractive themes. Then, in the line of dramatic culture and entertainment, we have two active organizations: The Hopedale Dramatic Club and the Hopedale

Amateurs. As a further index to the prevailing taste for intellectual refreshment, it need only be stated that three hundred and fifty daily newspapers are received through the Hopedale post-office regularly, besides all the more infrequently published papers and periodicals.

Martial Patriotism and Military Spirit.—The section of territory recently incorporated as the town of Hopedale has borne an average crop of warriors from generation to generation, in all the historic and probably unhistoric past. The Indian natives had their braves, and their white successors since the year 1700, have furnished their full quota of heroic soldiers in every war, from the old French one down to the great Rebellion. During this last it was represented, for longer or shorter terms, by some thirty fighting men, as nearly as can be estimated from partially unauthentic data. Of these General William F. Draper is the honored flower—a candidate for higher civic distinction. His less favored comrades are either among the remembered dead or mostly dwell in widely-scattered, humbler homes. As to the professed Christian non-resistants of the Hopedale Community, who at its zenith numbered about one hundred persons, they were generally exotics from other soils. When the white flag of their projected anti-war State was abandoned by its controlling pecuniary supporters, it necessarily soon fell to the old social level, as has been told. Some who adhered to their Christ-like standard of peace have passed into the higher life, or removed to other localities. A mere remnant remain on the once hopeful domain of forty years ago, and these are surrounded by a daily increasing multitude of worthy people, who, nevertheless, are thoroughly devoted to civil and warlike society as it is. Which way soever the survivors turn, public opinion and practice present a granite wall of pro-war-governmental adherence. The aged, middle-aged and the young pay homage to the sword as the final grand arbiter and indispensable defender of justice, liberty and human rights. So they believe, think and act. And in this they glory. The most recent demonstration of their delight and trust in deadly weapons as a dernier resort is the formation of a youthful company in our village called the Hopedale Zouaves. It numbers some twenty sprightly lads, regularly officered, armed, uniformed, drilled and paraded in the modern military style. Thus in time of peace they prepare for patriotic war. In their splendid uniform, with fine music and graceful martial bearing, they make a charming display to the admiration of men, women and children. Is this to be condemned or deplored? Not if the war-principle be absolutely right, as is preached and believed by the popular religion and civilization. On the contrary, it is eminently commendable. For the young should learn what it is their duty to practice in mature age. If it is wrong, it is so because the popular religion and civilization are wrong in their fundamental, systematic pro-war principle. Would the rattlesnake be rendered less dangerous by depriving him of his rattles? Strike at his vitals, not at his rattles.

So thought the projector of the Hopedale Community. It took him over thirty years to out-think and out-grow his own pro-war heredity and education. He had a tough nature to convert to Christ-like peace ethics; but when once fairly converted to them, no temptation could convert him back to faith in the wisdom of deadly force. So now, in the eighty-sixth year of his age, he remains immovably attached to the standard of peace taught and exemplified by his Master. Majorities weigh nothing with him against principles of divine truth and righteousness. At the same time he can duly respect all that is right and good on lower moral planes. And for actual soldiers and warriors, who execute given orders to perpetrate human slaughter, he has less condemnation than for their religious and political masters, who stay safely at home, preaching and legislating others into the battle-field. They are the principals; their employés are mere accessories and instruments, personally jeopardizing all that is dear to them. But, above all, he denounces murderous principles and systems of human society, whether in church or state, rather than individuals or classes of men, many of whom are honestly deluded by specious falsities. Blessed are they who begin their proposed reformations at the beginning, and are not turned aside by plausible compromises with evil under the impulses of a time-serving expediency. Hopedale is now squarely on the ancient platform of pro-milito patriotism, and may be implicitly relied on to perform its share of service whenever its country proclaims the next bloody war, excepting only the harmless few who will soon have their home in another world.

Civil and Secular Matters—*Marriages, Births and Deaths.*—Down to January 1, 1888, our town clerks have reported,—marriage intentions recorded, 16 couples; marriages solemnized and recorded, 45 couples; births recorded, 34 persons; deaths recorded, 25 persons.

No report for the present year. The disparity between entries of intentions and solemnizations is accounted for by couples married out of town, or whose intentions were entered elsewhere.

Post-Offices.—The one at South Milford, established March 7, 1814; Hamblet B. Fisk, present postmaster; delivery and income respectable, but not large.

Hopedale post-office, established May 13, 1861; present postmaster, Henry L. Patrick. Comparatively large delivery for a country town. Receives and distributes mail matter for our enterprising manufacturers and business firms, and for some two hundred and sixty families of uncommonly intelligent people. Returns a net annual income to government of over one thousand dollars.

BUSINESS TRADES (not previously mentioned).—Henry L. Patrick, who runs two large grocery and country stores in Hopedale, and one in Upton, has a wide range of custom, making annual sales to the amount of one hundred thousand dollars. Smith & Mead opened their establishment in the Town House, December, 1887, for the sale of groceries, meats, dry and fancy goods, etc. Their store and meat market are of first-class rank, and they have a wide run of profitable patronage. Their firm is a flourishing one and promises merited success. The long established "Green Store," once the famous Major Penniman entrepot at South Milford, though shorn of its old-time importance, is still a respectable grocery and country dispensary, and well managed by Hamblet B. Fisk. We have two enterprising livery and transportation establishments, an ice company and several small artisan and handicraft shops—all useful.

CIVIL MAGISTRATES.—Gen. William F. Draper, Frank J. Dutcher, Esq., E. D. Bancroft, Esq. (also notary public), and David A. Westcott, Esq., justices of the peace.

RELIGIOUS INSTITUTIONS AND AFFAIRS.—There is but one organized religious society in our town and one church edifice, the Hopedale Parish, with its modest sanctuary pleasantly situated and surrounded in Hopedale village. The history of this parish, its house of worship and first pastorate has already been briefly given on a former page. The meeting-house was erected by the Hopedale Community in its declining days and subsequently transferred with other property to the parish as stated. The parish has recently been legally incorporated as a body politic for the safe holding and management of its pecuniary interests. This took place in August, 1887. Pastor Ballou, after his resignation, April 23, 1880, was soon succeeded by Rev. Austin S. Garver. He became pastor by acceptance of a formal call, dated April 14, 1881. He was installed September 30, 1881, in connection with a rededication of the church after rejuvenation. Salary, fifteen hundred dollars per annum. He was called to the more conspicuous pastorate of the Second Congregational Church in Worcester, Mass., and terminated his connection with Hopedale about March 1, 1885. He was succeeded by Rev. Lewis G. Wilson, who was installed October 8, 1885, and still continues in the pastorship. Salary at first, twelve hundred dollars; since April 1, 1887, fifteen hundred dollars. The parish has one hundred and forty voting members, and is officered by an executive committee of five, a clerk, treasurer, collector and board of three property trustees. It has a well-conducted Sunday-school, with a library of eleven hundred volumes. It has also a nice parsonage, donated to it by the late George Draper just before his decease, and confirmed by deed of his heirs. He was its generous supporter and benefactor from its formation to the day of his death. As a tribute to his memory and worth the following resolutions were passed by a standing vote of the parish at a special meeting held July 10, 1887:

WHEREAS, The Hopedale Parish has experienced a dispensation of great bereavement in the death of George Draper, on the 7th ultimo—our temporal head and social chief; therefore,

Resolved, That, while we deeply deplore our heavy earthly loss, in sympathy with his family and all the circles of personal association who unitedly mourn his departed mortal presence, we reverently bow to the Divine Will, in the confident assurance that he has been translated to a deathless mansion, whence his loving benedictions will descend on all he delighted to bless.

Resolved, That our Parish Clerk be instructed to inscribe this Memorial of our lamented brother conspicuously on our permanent Records; and also that she present a copy of the same to his widow and each of his children.

It may not be improper to state here that ex-Pastor Ballou, who writes this sub-history, still continues, as a sort of minister-at-large, to solemnize marriages and render funeral services throughout his general vicinity—though he chooses to preach little. He has been in the ministry over sixty-seven years, during which he has solemnized eleven hundred and seventy-six marriages, and ministered at more than twenty-five hundred and fifty funerals. And, though now far advanced in old age, the annual number of his weddings and funerals averages nearly the same as in the prime of life.

Although there is only one church edifice in our town, there is a public hall at South Milford, still, so called, well known as Harmony Hall, where religious meetings and reform lectures have long been held on some part of the Sabbath by the various neighboring clergymen of different denominations, etc. The attendance is generally good and the sacred music commendable. A respectable Sunday-school is also sustained there. It should be understood that in Hopedale Village and throughout our new town there are numerous representatives of nearly all the churches in Milford Centre, who customarily worship in their respective sanctuaries, and seldom, if ever, with the Hopedale Parish. We have Catholics, Episcopalians, Orthodox Congregationalists, Baptists, Methodists and Universalists. And for their devotional convenience our enterprising transportationist, John M. French, runs his barges to and from Milford Centre every Sunday at the proper hours, so that all who have not conveyances of their own are well accommodated. Besides this convenience, some of the sects hold occasional religious gatherings, more or less frequently, in public or private buildings of Hopedale Village. Thus religious privileges are amply provided for all our people according to their various preferences.

CEMETERIES.—We have two reputable resting-places for the dead—one in South Hopedale, formerly South Milford, under town control, and one in Hopedale village, now controlled by a corporate association. The former has been inherited from Milford by territorial right. It dates back to November 18, 1799. The writer has given an account of the origin, progress and general character in his "History of Milford," pp.

Wm. H. Draper

Adin Ballou

307–308. It contains the graves of many departed inhabitants of its district, and others from outside, has a decent receiving tomb, has respectable monuments, is well advanced in the line of modern improvements and is worthily cared for. Our Hopedale village cemetery was selected and laid out in 1847 by the authority of the Hopedale Community, and was under community regulations till transferred to the Hopedale Parish, December 15, 1873. It was a well-chosen location, naturally adapted in all respects to its designed use, and capable of being rendered admirably beautiful by artistic improvement. The lot-owners deemed it advisable to become a legal corporation. This was effected, and their organization consummated April 4, 1887. The late George Draper left the association a legacy of ten thousand dollars, and it holds some other funds in trust. General William F. Draper has recently donated a very desirable addition to its area, which now comprises probably over five acres, with room adjacent for any necessary expansion. It is under excellent management, and is rapidly developing delightful improvements. It has a commodious receiving tomb, and two noble family mausoleums, erected respectively by George Draper, a little while before his death, and by General William F. Draper, the same year. It has also a goodly number of respectable monuments and memorial tablets. Its future is well assured as a sacred and lovely sanctuary of precious mortal relics, where surviving relatives and friends may perpetuate the memories of their loved ones worthily, and complacently anticipate repose of their own ashes.

As the publishers of this County History have welcomed to appropriate places within its lids the likenesses of several distinguished Hopedalians, it seems proper that a few words of special explanatory data should be given in each case.

1. George Draper, born in Weston, Mass., August 16, 1817; died June 7, 1887, aged sixty-nine years, nine months and twenty days. Too prominently noted in this sub-history and otherwise known to the general public to need further characterization here. An excellent likeness.

2. Warren Whitney Dutcher, born in Shaftsbury, Vt., July 4, 1812; removed with his worthy wife and children to Hopedale in the spring of 1856. He became associated in business with E. D. & G. Draper, prospered and contributed largely to the upbuilding of his adopted village. He left a bright and memorable record for mechanical ingenuity, manufacturing enterprise, moral rectitude and benefactions bestowed on suffering humanity. His wife was no less distinguished for her matronly virtues, social worth and charities to the poor. Both have passed away, leaving hallowed memories. He died January 26, 1880, aged sixty-seven years, six months and twenty-two days. Mrs. Malinda, his wife, died February 9, 1888, aged sixty-six years, six months and nineteen days. Their worthy children, Frank J. Dutcher and Miss Grace Mary, survive them in honorable standing among us. The likeness of the husband and father is a very true and good one.

3. Joseph Bubier Bancroft, born in Uxbridge, Mass., October 3, 1821. He is the respected head of an intelligent enterprising and influential family. He came here with his estimable wife in 1847, and both joined the Hopedale Community. He was for several years superintendent of the Hopedale Machine Establishment, served long on the Milford Board of Selectmen, was sent representative to General Court in 1864, is now chairman of our Hopedale selectmen.

4. Dea. Asa Augustus Westcott, born in Scituate, R. I., August 17, 1826. He and his excellent family, wife, sons and daughters, settled among us in 1873. They brought with them characters of sterling worth and salutary moral influence, as well as manufacturing enterprise and usefulness. They occupy a position in the first rank of our little municipality. Dea. Westcott well deserves the place he has consented to fill among our representative engravings.

5. General William Franklin Draper, born in Lowell, Mass., April 9, 1842. After what has been said in the preceding pages, though briefly, and what is otherwise widely known to the public, it is hardly necessary to be very specific here. It is sufficient to say that since his honored father's decease, he is our financial, social and municipal chief, crowned with our unanimous deference, confidence and love. He has a red lettered past and a near future auroral with promise. In due time, no doubt, an ample biography will worthily portray his life career. Meantime his friends must be content with outlines and his likeness. Most of them will feel that this does meagre justice to his manly form and face. But for the pressure of business a better would probably have been secured.

6. Adin Ballou, the present historian, born in Cumberland, R. I., April 23, 1803, of uncollegiate education, but a persistent student of useful knowledge and self-culture; commenced preaching in his nineteenth year; has been a minister of New Testament Christianity, as he understood it, over sixty-seven years, chiefly in the southeasterly section of this county; is author of a "History of Milford, Mass.," a "History and Genealogy of the Ballous" and many minor works; and holds too many peculiarities of faith and practice to be classed very exactly with any religious denomination. His likeness is a tolerably correct one, and appears in this work through the generosity of an eminent friend.

Here we may conclude this sub-history as sufficiently minute and comprehensive for the place it is to occupy among its county associates. It shows that the town of Hopedale, though small and infantile, compared with its elder and grander comunicipalities, has a record with strong points of interest in it, and a probable future of rising impor-

tance not wholly unworthy of its name. And it affords the writer peculiar pleasure to say in closing that, notwithstanding all the unpleasantness growing out of separation from mother Milford, every embitterment is evidently passing away, and the present relations of the two towns are mutually amicable and harmonious.

CHAPTER LXII.

NORTHBRIDGE.

BY REV. JOHN R. THURSTON.

THE BEGINNINGS.

OCTOBER 16, 1660, in answer to the petition of seven inhabitants of Braintree, the General Court of the Massachusetts Colony judged "it meete to encourage the petitioners to proceede in theire settling themselves and an able ministry with them, in the place desired for a new plantation within their time limited." "In further answer to said Braintry petition the court declares that they judge meete to grant a plantation of eight miles square, and that the persons named have liberty to enter thereupon and make a beginning thereof, and to take such persons into their society as they shall judge meete, and that Maj. Humphrey Atherton, Left. Roger Clap, Capt. Eliaser Lusker and Deacon Parkes, or any three of them, shall and hereby are appointed commissioners, & are empowered to make a valid act there."

In furtherance of the object of these petitioners, the honorable court chose "Mr. Peter Bracket and Ensign Moses Paine for to purchase a title of the Indians, containing eight miles square, about fifteen miles from Medfield Town, at a place commonly called Masconsapong."

These gentlemen purchased the tract of Great John and three other Nipmuck chiefs for "the summe of twenty-foure pounds sterling." The deed was signed by them and was witnessed by the Indian apostle, John Eliot, Sr., and his son, John Eliot, Jr., April 22, 1662.

All right and interest in this deed was assigned by Messrs. Payne and Brackett to the selectmen of the town of Mendon, May 12, 1670.

Three months after the purchase of the land "the committee impowered by the General Courte to assist the ordering and setling the plantation granted at Netmoke," in a document dated "Dorchester, July 5, 1662," declared the regulations for the plantation on which they had agreed.

An allotment of one hundred and fifty acres was to be made to each subscriber who possessed estate of one hundred pounds, and to all others in this proportion. Only persons "of honest and good report are accepted and allowed to take alotment in said plantation."

No one could "sell or lease or alienate his said alotment or any part thereof" without the consent of the majority of those persons chosen to regulate the affairs of the plantation.

Five or seven "meete persons" were to be chosen "for the manageinge these affairs," and they were "to have the whole power of accepting inhabitants and disposing lands, according to the rules above written," for one year.

Of these managers Messrs. Payne and Brackett were to be two, and in consideration of all their services were to receive land, not more than three hundred acres.

There must be "an able and approved minister settled with them there, according to the order of courte in that case provided."

All persons "accepted to alotments shall be settled at the said plantation before the end of the seventh month, 1663, with their persons and estates."

This allowed them a year and two months after these regulations were made.

At this time twenty-three men had been accepted—thirteen from Braintree and ten from Weymouth.

But it was not until the fall of 1663, or the summer of 1664, that the men who had obtained the grant, with their families, to the number, perhaps, of twelve, "hewed their way through the wilderness to the spot where now stands the village of Mendon." Thus began the Nipmuck plantation, the township of Quinshepauge, soon incorporated, May 15, 1667, and called Mendham, afterwards Mendon. It was the second incorporated town in Worcester County, Lancaster alone preceding it.

The grant by the General Court was of a territory eight miles square, but that taken under the grant was ten miles by twelve, and included the present towns of Mendon, Blackstone and Uxbridge, the most of Northbridge and Milford, a part of Upton and Bellingham, and parts of three towns now in Rhode Island. Three entire towns and a portion of seven others were in the original Nipmuck plantation.

This is the story of the grant and purchase of the territory of the town of Northbridge, save about one-tenth of its present area, which was annexed to it from Sutton, soon after its incorporation.

While this territory belonged to the original forty-four proprietors of Mendon from the beginning, it was not occupied until after the beginning of the seventeenth century.

April 1, 1707, there was a "Jacob Aldrich farm," one-half mile below the present Quaker Meeting-House, on the eastern side of "the great river." February 10, 1710, he sold this, with the *house* on it, to his son, Peter Aldrich, who was *perhaps* the first resident of what is now Northbridge.

Woodland Thompson owned a large tract of land, including what were afterwards known as the Southwick, the Benson and Wing farms, in 1707, and soon after, if not at that date, began to reside on it.

Benjamin Thompson, brother of Woodland, owned land on both sides of "the great river," south of the Quaker Meeting-House, as early as 1707, and lived on it as early as 1728. These three were all of Mendon, receiving or buying their land of their fathers, also of Mendon.

George Woodward, of Brookline, bought 120 acres in the west part of what is now Whitinsville, in 1712, and occupied it for several years. He was a schoolteacher as well as "Husbandman."

John Aldrich, of Mendon, lived south of the Quaker Meeting-House, on the east side of the river, as early as 1727.

Seth Terry, of Barrington, Bristol County, clerk, bought at different times and from different persons, in 1725, '26 and '27, 488 acres of land, "with all the water courses, mines or minerals belonging thereto," which included "the Falls" of Mumford River, in what is now Whitinsville, and at once built a saw-mill, *perhaps* the first in the town, and "Iron works." He began, or prepared to begin, the manufacture of "refined iron." But he remained here only a few months, as he sold all, including the "saw-mill" and the "iron works" and "all other buildings," to Hugh Hall, of Boston, January 10, 1728.

In 1735 John and James Adams came from Ipswich and bought land and lived at the "Corner" which has so long borne their name.

The same year Christopher Winter, of Mendon, began to reside on the "Winter place," one-half mile north of what is now Rockdale, on the east side of "Great River."

While these earliest settlers of what is now Northbridge were making their homes in the different parts of the town, a change had taken place in their town relations.

For many years the "Inhabitants of the western part of Mendon" had "laboured under great Difficulties, by Reason of their Remoteness from the Place of publick Worship in Said Town." They sought and obtained permission for separation from Mendon, and, on petition to the General Court, were incorporated as a town June 27, 1727. The history of Northbridge is now included in that of Uxbridge for forty-five years. It is evident that those living in the part of the town now Northbridge took their part in all town action, bore their share of the burdens and claimed their rights and privileges, although somewhat remote from the centre of the town life, in what was then Uxbridge.

The new town secured preaching from the first, and after considerable fruitless negotiations with Rev. Othniel Cambell and Mr. Jonathan Wales, they voted, June 22, 1730, "to follow the advice of ministers, and give Mr. Nathan Webb a call." They voted £100 "encouragement" and £90 salary "good passable money." The call was accepted, and December 31st it was voted to proceed with the ordination, and to build a pulpit for the meeting-house. All these questions which are now decided by the parish were then decided in town-meeting. In fact, the town was the parish. While the church had the initiative in calling a minister, as now, the town contracted with and supported him, as the parish does now. The town was the legal body. The town began the meeting-house in 1728, the next year after it was incorporated. Before this the town-meetings and religious services were held in private houses. The meeting-house was occupied for town-meeting the next May, but it was not fully finished before it gave place to a new house, though we find frequent votes to finish it, and committees raised, and appropriations made for that purpose.

The first mention of schools in the new town is in January, 1731, when it was voted that the town will have a school *dame*, for the first seven or eight months to keep a school in each part of the town "proportionable." The next year it was voted to employ a schoolmaster, John Read, Sr. At the same meeting it was voted to procure a pair of stocks, and a few months after twelve shillings are voted to John Chilson for making them. After this, votes as to the schoolmaster, with appropriations for his pay and his board, are quite frequent. In 1734 we find the town *districted* or "Squadroned," and it was voted that each squadron select some woman to teach the children to read, who should be approbated by the selectmen. For many years the schools were under the care of these officers. The pay of these teachers came from the "School Fund." This fund was obtained from Mendon, being their part of the fund granted by the colony to that town. After long negotiation and many conferences of committees, it was voted, March 2, 1732, to accept two hundred pounds from Mendon as their part of the school fund. It was increased in 1736 by a gift of five hundred acres of land from the colony. The land was situated in that part of the State which went to New Hampshire in settling the boundary with that State in 1741, and it was thus lost to the town. It had already been sold to parties in the town, from whom it was repurchased when it went into New Hampshire, and it was replaced by a new grant from the colony and was located by a committee of the town, but the records do not show where. This school fund was loaned to individuals, and sometimes great difficulty was experienced in getting the interest. In 1738 it was voted to build the first school-house near the meeting-house. In 1761 there was another districting of the town in thirteen squadrons, containing one hundred and sixty-three families, the names of which are given, which is the first list found. In these families there were five hundred and twenty-eight scholars, an average of somewhat more than three for each family. From this we may suppose the population was not far from twelve hundred. In the part now Northbridge, as is judged from the names given, there were but forty-one families, indicating a population of about three hundred. Thi

is the earliest fact found for any estimate of population.

In 1764 a *new* squadron of seven families was voted to have their part of the school fund. The school district system thus early established was continued until quite recently.

The first mention of Quakers in the town is on March 6, 1728, when it was voted "not to free the Quakers," probably from the tax to support the preaching. At the close of the records of 1734, the following list of persons, "called Quakers," appears: Seth Aldrich, Benjamin Taft, Peter Aldrich, Seth Aldrich, Jr., Abel Aldrich, Jr. Samuel Taft—six.

It is difficult to learn when the Quakers first came into what is now Northbridge. Whitney, in his "History of Worcester County," published in 1793, says they came into Mendon, of which Northbridge was then a part, as early as 1703. Of Uxbridge he says, in 1793, "one quarter are Quakers and Anabaptists." In Northbridge he says there are twelve Quaker families.

Probably the first in Northbridge was Peter Aldrich, who was here in 1709. If not he, then Samuel Aldrich, who was here as early as 1738.

We must suppose the Quakers came up the Blackstone Valley from Rhode Island, their early refuge. Many of them settled in the South Parish of Mendon (now Blackstone), and in Uxbridge, and a few pushed up into what is now Northbridge.

With them also came the Anabaptists, who had, like them, found a refuge in Rhode Island. The limit of this immigration was the south part of Grafton.

The Quakers experienced some difficulty from their peculiar tenets as to religion and war, as is manifest from the town records. The first mention of them is the refusal of the town to "*free*" them from the minister tax.

In the warrant for the meeting for May, 1762, the fifth article reads, "To see if the town will vote not to proceed any further upon, about, or anywise concerning a petition that Cap. Solomon Wood [Representative] exhibited to the great and General Court, last winter, wherein he complains of the Quakers' hard usage upon the captains, concerning a tax laid upon them in the year 1759, for not sending soldiers into the war." At the meeting it was voted, "Not to act at all, any way on the 5th Article, in the warrant, to pass it over not acted on." From this it appears that the Quakers remained true to their principles as to war and were taxed, but that they did not remain quiet under the infliction. They would not perform military duty, and the town was obliged to hire men to fill the quota, because of their exemption, and they complained that their tax to reimburse the colony was unjust and they were unwilling to pay it.

It is remarkable that this is the only reference, in the records of the town, to the French and Indian War, which lasted from 1754 to 1760. But from the State archives we learn that the town bore a large burden in this war. From the Northbridge part of the town quite surely twenty-six, and probably thirty-five, persons served for forty-five different terms of six months to almost a year. This for a population of not more than three hundred, with not more than sixty of military age, is a very large number. We have no reason to suppose they did more than other towns. And this suggests to us what it cost our fathers to defend their homes and liberties in those early days. All through these years they kept up their military organizations as they had done from the beginning. They had their "Training Field" and training-days. Thus were they being prepared for the more severe struggle of twenty years later, which did not find them, when it came, all unready for it.

March 28, 1728, at one of the first town-meetings of the new town, it was voted "to accept £90 sh. 5, which the General Court had allotted to the town of Uxbridge as their proportion of the £60,000 emitted for the use of the Province," and a trustee was appointed to receive it. It was also voted, "That said money should be let out on good security, not exceeding £5 to any one person." Here is the first mention in our town records of the "Bills of Credit," issued by the province, which were the cause of great derangement in all financial calculations and transactions and of the various evils of an irredeemable paper currency. Mr. Joseph Taft strenuously resisted the acceptance of this semblance of money by the town, and entered a written protest, signed by himself, Benjamin Taft and Joseph Taft, Jr. Soon the evils of a money that could not be converted into specie began to appear in the larger sums that were voted for town purposes, in the additional sums voted to the minister, in the *contributions* made for him on the Sabbath. If one wished to *mark* his contribution it was allowed him in his minister tax, but all *unmarked* it was voted should be free and clear to Mr. Webb. But it is evident that this gratuity did not make good the depreciation, for presently we see votes to raise from the town additional sums for Mr. Webb, until May, 1753, when his salary was changed from that first agreed on to £53 6*s.* 8*d.*, lawful money.

We must suppose this is but a fair example of the derangement and difficulty that occurred in all business transactions, from the unsettling of nominal values.

There are some votes recorded which give interesting revelations of the condition of the country, of the customs of the people, and of their feelings on public questions, which seem to be worthy of transcription, as

August 15, 1728, it was voted "That unless Mendon be made a *shire* town as well as Worcester, and have the courts one-half time, they had rather remain in Suffolk Co. as now." They resented the ambition of the new and smaller town of Worcester to have the

precedence over their older and larger mother town of Mendon.

August 26, 1730, it was voted "The town will not join with County Middlesex in praying for a new county and that they will join in a petition with towns in West Suffolk to make a county there. But all this action is in vain, for Worcester County is constituted in 1731, and Uxbridge, then including Northbridge, is a part of it.

September 1, 1730, it is voted to appropriate four pounds to pay for killing *wild cats*. How long they felt the need of offering this premium for killing beasts of prey we do not know, but May 23, 1751, it was voted *not* to pay any more bounty for killing *wolves*.

December 18, 1739, it was voted to raise a committee to see that the law about killing deer be not violated. After this for many years in Uxbridge before the division, and in Northbridge, after it was incorporated, a "Deer Reave" was chosen with the other town officers. The last was in 1787.

May 28, 1756, it was voted "not to send a representative (to the General Court) this year." We are surprised at such a vote. But the mystery is cleared when we learn that the *town paid* the charges of the Representative, and when there was no business of special importance, no town interest to present, they saved the expense and voted not to send one. There are some votes that indicate that in some cases gentlemen went to Boston, after a vote not to send a representative, to present to the General Court some interest of the town. These votes are for compensation to certain persons, for what they had done for the town in Boston the previous year. This vote of 1756 not to send a Representative is not the only one; many such follow down into the separate history of Northbridge to 1835. For the first sixty years of this town's history it was voted not to send thirty-seven, and to send twenty-three years. This not sending a Representative was considered an offence against the colony and Uxbridge was fined ten pounds in 1765 for its first neglect to send one. On petition of the town, on the ground of great impoverishment, by disease, drought and frost, the fine was remitted. Yet we see the neglect frequently occurred in subsequent years.

May 12, 1763, it was voted "that the selectmen for the time being provide a *work-house*, and a master for said house, and convey all the idle persons there, in case they come to want, and belong to the town." Before this, provision had been made for the poor by boarding them with private families, but this is the first provision for a common house for them with work and a master.

September 1, 1766, it was voted "to allow the Representative to vote to make good the Lieutenant-Governor's damage, lately sustained by the mob in Boston, if he thinks proper upon the best information he can get." This refers to the destruction of Lieutenant-Governor Hutchinson's house in Boston, when the attempt was made to enforce the Stamp Act. It was the first rumble of the storm so soon to burst upon the colony and the land. We notice how the question is referred to the town. Seldom did the General Court act on any important matter, especially one that involved resistance to the oppressive acts of the mother country, without consulting the towns. The people were the sovereigns; they must support the action of the court, and it is referred to them, if possible, for decision.

We notice, too, how they trust to the discretion of their Representative, saying. "If he think proper upon the best information he can get."

Now for forty years had Uxbridge grown and prospered, and in this growth and prosperity the northern portion (now Northbridge) had shared. Others beside those already named came to live here.

Nathan Park came from Newton 1728, and settled near the Quaker Meeting House, and was one of the largest landholders in town and very prominent in town affairs. He was the grandfather of Professor E. A. Park, of Andover Seminary. John Spring settled in the southern part of Northbridge, on the west side of "Great River" in 1736, and was also prominent in town affairs.

Nicholas Baylies, of Cumberland, R. I., and his brother Thomas, of Taunton, who was a "Forger," leased the "Iron Works" at the Falls of Mumford's River, for twenty-one years, of John Merritt, of Boston, in 1739, and resided near their works, which, for many years, went by the name of "Baylies' Forge,"

Andrew Dalrymple settled in what is now Whitinsville as early as 1743.

Andrew Dunn, "a wheelmaker," lived near Rockdale in 1743.

Daniel Read settled in the Inman district in 1740.

Thomas Emerson, who came into the neighborhood as early as 1751, purchased the water privilege and land at Rockdale in 1765.

The privilege at Riverdale was purchased by James Nutting, of Grafton, in 1753, and improved by him by the erection of two grist-mills and a saw-mill.

Josiah Wood settled on the "Farnam" place in 1757.

Samuel Goldthwait came from the northeastern part of the colony in 1759, and purchased four hundred acres of land between Whitinsville and the Hill, and in the adjacent parts of Sutton, and settled upon it.

Nathaniel Cooper, from Grafton, settled in the part of the town which has since borne his name, in 1763.

David Batcheller, Jr. (Major), came from Upton, in 1767, and settled on Northbridge Hill.

Thus were the several parts of what is now Northbridge settled.

It will be noticed that but few of the families, afterwards prominent in the town, were of the Men-

don stock. The Mendon migration spent itself mainly in what is now Uxbridge, a few of its families, as the Aldriches and Winters, coming up the valley of "Great River," into what is now Northbridge, which was so easily accessible. But the more distant parts of the town, as the upper valley of the Mumford, and the high land near Sutton, waited for immigrants from more distant places.

There is evidence that for some years the north part of Uxbridge had had separate interests from the south part. It had come to be called by its own name, "The North End." In 1736 a constable was appointed for the "North End."

In 1753 we find a collector of the minister's tax for each end of the town. We may suppose the desire for a separation had long existed before it secured its object. The expression of this desire was occasioned by the difficulty as to the building of a new meeting-house.

In June, 1766, an article appears in the town warrant to see if the town will build a new meeting-house, but it was passed over. Before it comes up at the meeting in October a new difficulty appears. It is manifest that if it cannot be placed in the centre of the town, so as to accommodate those at the "North End," they of the North End do not wish to help in building it, but to be set off as a separate town. To such a division the town will not listen, and the new meeting-house must be set near the place of the old one. Nor would the town excuse the North End from their share in the expense of building the new house, nor listen to their petition to be relieved from bearing their part in the support of the minister. After repeated failures to secure their desire from the town, they of the "North End" apply to the "General Court" for relief. Their petition was presented July 1, 1771, praying, on the ground of their distance from the meeting-house, "that they with their families and estates, may be made a separate *District*, and that they may be entitled to their proportionable part of the ministry money, and the Lands granted by the General Court to said Town for their extraordinary expense in building bridges." Uxbridge answered the petition by a committee, but the petition was granted, and, Uxbridge consenting, the North End was incorporated as a "*District*," with the name of Northbridge, July 14, 1772, and fourteen years later, in 1786, it became a *Town*, by State law. Though called a "*District*," it had all the rights and performed all the functions of a *Town*, except that they were to choose a Representative to the General Court with Uxbridge. The Representative might be from Northbridge or Uxbridge. It was a town in reality, if not in name. Thus Northbridge began its separate life with a population of between four and five hundred, as we infer from the fact that the State census four years later gives four hundred and eighty-one.

In 1780, "John Adams and others," with their lands, were received from Sutton, they seeking the change because they were so much nearer to Northbridge for religious privileges and town duties. In 1801, Jacob Bassett and others, with their lands, were also received from Sutton. In the act of incorporation it was provided that David Draper and seven others whose homes and lands were included in the given bounds of the "District" of Northbridge, with their heirs, shall be permitted to remain in Uxbridge as long as they so choose. If they desire to become citizens of Northbridge, they have only to notify the authorities of Uxbridge in proper form and they are transferred.

Several of these transfers took place, creating no little confusion as to town lines. These families were in the "North End" of Uxbridge, and desired their rights as to the new meeting-house in Uxbridge, but they did not desire to be set off as another town or district, and were allowed to remain on these above-stated conditions. Uxbridge let go her hold on the "North End" very reluctantly, refusing Nov., 1772, to remit any of the £40 assessed on them for the support of the minister the year they were set off, and refusing to grant to the "District of Northbridge their proportionable part of the ministerial and town money and lands granted to the town of Uxbridge."

CHAPTER LXIII.

NORTHBRIDGE—(*Continued.*)

THE NEW TOWN.

THE territory thus set off from Uxbridge, with the few additions afterwards received from Sutton and Uxbridge, is an irregular quadrangle. Its extreme length north and south is about five miles. Its extreme breadth, at the southern end, is about five miles. At the northern end it is less than three miles, the eastern line running northeast and southwest. It contains 10,551 acres, a little more than sixteen square miles. The Blackstone River runs through it about one mile from its eastern border. The Mumford runs through the southwestern corner. The valley of the Blackstone is from one-half to a mile in width, of desirable intervale land, easy of cultivation and having those natural meadows so much coveted by the early settlers. The land gives quick response to cultivation, but is not strong. The valley of the Mumford is of a similar character, but has less intervale for cultivation. A branch of the Mumford runs about one-half mile from the western border of the town, with its deep, narrow valley.

Between these two rivers rises Northbridge Hill, really a broad ridge, with its highest point at the centre, falling off somewhat at the north, but still quite high land. The northern portion of this ridge

is good, strong farming land, and has been well used for agriculture from the early days of the settlement. These two rivers give several natural water privileges, which have been used from an early day, and have been much improved by the building of reservoirs.

The granite which so abounds, often appearing on the surface as boulders and ledges, has furnished abundant materials for building purposes. The town had a dense growth of wood, and the parts unfavorable for tillage are still thickly wooded.

Now legally independent, the people began to care for their own affairs. Their first fourteen town-meetings were at private houses. At the first, at the house of Joseph White, about one mile southeast of the present Northbridge meeting-house, Jonathan Bacon (2d) was moderator, and all the usual town officers were chosen. They early provided themselves with the ordinances of the gospel, voting, in April, 1773, £20 to hire preaching, to be one-half the time at David Batcheller's, one-half at Amos White's. Soon they plan for a suitable place for public worship, and for the transaction of town business. "At a meeting of the town, held on the 1st of February, 1773, it was voted to build a meeting-house on the height of the hill." In regard to the location of the meeting-house there was much feeling; some wished to have it on the plain, near the local centre of the town, others wished to have it located near the crossing of the roads, northwest of the residence of Joseph White. Another party maintained that it ought to be "on the height of the Hill." They claimed there was a probability that "a mile and a half of Sutton would come off to Northbridge, and then the Hill would be near the local centre of the town." The hill party carried their point, but at the cost of losing some of the other party in all participation in church life, as they always continued to worship in Uxbridge.

"At a meeting held on the 22d of Nov., 1773, it was voted to receive the proposition of John Adams and others, relative to the building and finishing a meeting-house," and it was "voted that it should be 45 feet long, 36 feet wide, and 22 feet posts, and that it be builded as soon as convenient." One hundred and fifty pounds were appropriated to building.

A committee was appointed to carry on the work. The labor and the timber were to a considerable extent furnished by the people of the town. A price was fixed by vote for the various pieces of timber, The house was so far finished by Feb., 1775, that the "pew-spots" (in which the purchasers were permitted to build their own pews) were then sold, and probably meetings were held in it from that time. The following are the names of the purchasers: James Fletcher. Micah Thayer, David Batcheller, William Dalrymple, Stephen Goldthwait, Ezekiel Goldthwait, John Adams, John Adams, Jr., Samuel Baldwin, Dependence Haywood, Joseph White, Henry Chase, Levi Walker, William Davenport, William Bacon and Jonathan Bacon. The money arising from the sale was by vote "to be applied towerds Defraying the Charges of Building the meeting" (house).

But very soon the increasing oppression of England called them to consider matters of more than local interest. They were not slow to do their part. They were imbued with the same spirit, grounded in the same principles, and trained in the same habits of self-government as were the men of all our Massachusetts towns, who, with a wonderful unanimity, answered to the call to maintain the liberty of the people.

"The first votes of the town as to Revolutionary affairs were passed at a meeting held on the 25th of August, 1774. At this meeting Josiah Wood, Lemuel Powers and Samuel Baldwin were appointed a committee "to correspond with other committees concerning public affairs as occasion shall call for." These committees were suggested by Samuel Adams in 1772, and were soon appointed all over the State and in other States. At this meeting it was also voted that "David Batcheller be chose to provide for a town stock of ammunition, viz., one Barrel of Powder, and lead and flints answerable to it." At the same time it was voted not to import or consume any English goods. The last town-meeting that was warned in the name of "His Majesty" was on the 10th of January, 1775. From this time till 1781 most of the business transacted at the meetings had reference to the struggles in which the Colonies were engaged: as, June 25, 1776, it was voted "to support the Continental Congress with their Lives and fortunes if they should Declare the United American Colonies Independent of Great Britain," and well they kept their vow. We find records of votes for paying the men who had enlisted in the service, for aiding those who had hired men to take their place in the army, and for furnishing provisions and clothing for the soldiers from this town. It is evident there was a disposition to equalize, as far as possible, the burdens that were to be borne. Those who remained at home performed labor on the farms, and in other ways assisted the families of those who were absent. At one meeting it was voted "to allow Joseph White eleven shillings for laboring for Samuel Clemens when he was in the six months' service;" at another it was voted "to raise 40 pounds to pay for shirts, shoes and stockings furnished by the selectmen for soldiers in the Continental Service." At a meeting in May, 1777, it was voted "to allow Stephen Rice 1 pound, 15 shillings, 4 pence, Nathan Park 15 shillings, Jonathan Bacon 9 shillings, and William Park 12 shillings, for carrying provisions to Roxbury in the time of the Lexington Alarm." These provisions were for the men from Northbridge, who were in the service in the vicinity of Boston in 1775.

As to the actual service they personally rendered, it is difficult, perhaps impossible, to learn the full facts.

There were three classes of soldiers called into the service during the war.

1. *The Militia.*—These were the men who had been enlisted in the service of the Province, and trained in the towns from the beginning. They were liable to the call of the General Court, through their officers. They were already organized into regiments, the company of Northbridge being in the Eight Worcester County Regiment, with those from Mendon, Upton, Uxbridge and Douglas. These doubtless had long felt they were liable to be called upon for serious work, and they were prepared for it. It was the militia who sprang, as it were, from the ground, without any summons, save from their company officers, and their own loyal hearts, at Concord and Lexington, and dogged the steps of the British troops in their retreat to Boston, inflicting upon them a much greater loss than they themselves sustained. They soon, at the call of the General Court, girdled Boston, and held General Gage, and his thousands of regular troops, as in a vise. It was they who fought the battle of Bunker Hill, and did all the work of the first year. They were liable to be called out of the State, after the Union of the Colonies was formed, for United States' service, as was the company from Northbridge for eight months at Peekskill in 1778–79, and often in Rhode Island.

2. Besides these were the "Minute-men" volunteers, men not enlisted, but who organized themselves, and stood ready to go at a "Minute's" notice to do brief service in an emergency. They were called out at the alarm that arose from the Lexington fight, and frequently afterwards. On May 9th, fearing a sally of the British from Boston, one-half of the militia and minute-men of the ten towns nearest Roxbury were called there to strengthen the army.

We do not find traces of the "Minute-men" after the first year of the war.

3. But it soon became manifest that an army more permanent than either of these could make must be obtained. And the Continental Army, under the command of the Continental Congress, through their officers, with General Washington at their head, was organized. Here were a third class of soldiers whose term of service was from three months to three years, or the war. A quota was assigned to each town, one-seventh of all the males above sixteen, and this quota must be kept full. The quota of Northbridge was eleven. This is in addition to the keeping up the militia, which was often called into service for terms of a few days to eight months.

When the war began there was an organized militia company, under the command of Capt. Josiah Wood, of Northbridge. It belonged to Colonel Joseph Read's regiment, the Twentieth. It was composed of men from Northbridge and Upton.

This company was often called into service. It marched April 19, 1775, at the "Lexington Alarm" to Roxbury with thirty-one men from Northbridge. After a few days fifteen of these men, with seven more from the town, enlisted for eight months' service, under Captain David Batcheller, who went out as lieutenant. Thirty-four men from Upton enlisted in the same company for the same service. This was known as "Captain Batcheller's Company" for several years. It served one and one-half months at Providence as part of the "Third Regiment of the Militia, which marched to this place on the alarm of the 8th day of December, 1776;" then for nine, though called out only for eight months, on the North River, at Peekskill, in 1778 and '79; then for sixteen days in Rhode Island in 1780.

In the State archives are found the terms of service of the men in the militia, and also those who were in the Continental service, with many of the pay-rolls. There is evidence that men from the town served in other companies beside that of Captain Batcheller, in the various calls made upon them. These calls were very many. We are told "there was scarcely a week in the fall of 1776 when the militia were not called to march to headquarters now removed to New York, or to Lake Champlain, or to Rhode Island." A large British force also remained in Newport through the spring and summer of 1778, and their fleet commanded the waters in the neighborhood. As a consequence, "the people of Massachusetts, especially near to Rhode Island, were kept in a state of continual alarm. There were but few Continental troops on the station, and the General Court were obliged to keep the militia in service in great numbers, the whole of this as the preceding year." There were many alarms of raids by the British, as at Tiverton, in May, 1779, when the men of Northbridge were called out and helped drive them back. And there is evidence in the town records of many more calls of the militia. There was a difficulty in adjusting the pay for the different "turns" of service, and September 6, 1777, William Park, Captain Josiah Wood and Thomas Read were chosen a committee "to say what past turns in the army shall be put att, according to the year and time of the year, and length of time, and the place where service was done, and the committee make report to the town for their acceptance, and for the town to act thereon as they think proper." The committee reported in October of the next year, 1778. In this report twenty-one "turns" of service are specified and the pay fixed for each of them, one at Dorchester, varying from two months to one year; five in New York, from three to eight months; seven at Providence, from fifteen days to two months, and eight others not specified. These, of course, were not all consecutive terms of service, nor by the same bodies of men, for there was not time for so many different consecutive terms before this report was made. We must suppose the militiamen were called out after this, though not so frequently as before, as the theatre of the war was transferred in such a measure to the South.

It is more difficult to learn how many went into the Continental Army, as there was no organization

of Continentals belonging here. The men from Northbridge were absorbed in the various regiments from the Colony. Of the one hundred and eighteen men credited to the town in the State archives, eleven are recorded as having enlisted in the Continental Army, and the town was expected to keep this number good as its quota, so that we must believe there were many more. During the latter years of the war committees were appointed each year to procure men for the Continental Army. And men were hired by individuals for the army. Bounties were paid to some. Some were drafted. Doubtless some of those hired and credited to the town were not citizens here, as is manifest from the warrant for the town-meeting for April 1, 1782, which speaks of men in Northbridge and hired men going into the army."

But with all they did, they did not always meet the full demand of the General Court for men. They were taxed for a deficiency of two men in the Continental Army in 1781, and they voted July 28, 1783, that Jonathan Adams carry a petition to have the tax "taken off." At the same meeting they were called upon to act on "one deficiency in the three months' service in 1781, a Quaker man." At the same meeting it was voted to collect a Quaker's tax of about fifteen pounds and pay it to the treasurer. Thus would they have the Quakers pay for the deficiency which came from their not serving personally. It is claimed by the Quakers that this tax was never paid by them, and there is nothing in the town records to show that the town succeeded in carrying its vote into effect. We can hardly understand, even with our recent experience of war, how great the strain was upon our fathers towards the last of the war, with all the loss of life in the service, and the derangements of business so long continued. And no colony bore more than Massachusetts. With less than one-eighth of the population, she furnished more than one-fourth of the years of service in the Continental Army, besides what she did by her militia and minute-men, and of the pecuniary burden she bore about the same proportion. What wonder then that Northbridge, the lowest on the list of towns in valuation, and almost, if not quite, the lowest in population, having but four hundred and eighty in 1776, had difficulty in coming up to the full quota demanded of her, especially as part of her population, the Quakers, contributed no men for the service; she did nobly, and of her record may every citizen feel proud, especially those who trace their families back to these times.

Of course, with these many calls for service, we should expect to find the same man many times in the field. James Sturdevant is found nine times; William Foster, eight times. Nor was the service confined to any one class of the citizens. Of those chosen for the first town officers, we find many in active service. Samuel Baldwin, the town clerk, served four times; Jonathan Bacon, the moderator of the first eleven town-meetings, the first Representative to the General Court, and after chosen to that office, served six times, beginning as private; David Batcheller, one of the first selectmen, saw five terms of service, beginning as lieutenant, and soon made captain and remaining such during the war; Josiah Wood, the treasurer, served three times, as private or captain; James Fletcher served six times, beginning as a private. Indeed, there could not have been many men in the town, save the Quakers, who did not see some active service.

But personal service in the army was not all that was laid upon them. They, in common with other parts of the country, suffered from a depreciated currency. In 1780 the town voted to raise eighteen thousand pounds to defray town charges, twenty-two hundred pounds for the support of the Gospel, two thousand pounds for the schools and to "allow 100 dollars a day to each man that went to the late alarm at Tiverton." The town afterwards voted not to assess the tax of twenty-two hundred pounds to pay the minister, and that he be paid forty-five pounds silver money, which was probably a full equivalent for the twenty-two hundred pounds Continental money. The same year a vote was passed on account of the scarcity of money, to allow the people to pay their taxes "in good merchantable grain, to be delivered to the Treasurer." This very difficulty from a depreciated currency, which went down to one-fortieth of its nominal value, made their honor more manifest; for having promised their soldiers a real compensation, their families were provided with food, clothing and fuel by the selectmen of the towns and clothing was furnished to the soldiers. There is ample evidence of this in our town. Being driven to reckoning in silver money as the only possible fixed standard, in 1780 they vote one hundred and sixty-four pounds silver money to purchase beef for the army. They make allowance for the depreciation in settling with Thomas Straight for what he had done in the war. They voted seventy-five pounds silver money to pay men who went to serve in Rhode Island for five months and in New York for three months. They make their contributions to the colony in articles to be used, as beef at a price fixed in silver. There is a sturdy honesty in this, which is very good. They did live in rude houses and worship God in unfinished meeting-houses, but they paid their honest dues.

During all this cost and suffering of the war they did not forget to maintain religious ordinances. The church was organized in 1782, June 6th, with eight members. June 17th they called Mr. John Crane to be their pastor. The town, July 2d, voted to concur with the church in the call. "It was voted," for encouragement, "to give him 200 pounds personage, by giving him the improvement of a farm to that

value, or the interest of the same in money, giving him his choice." "It was also voted to give him 45 pounds annually." In his reply he says, "I accept your proposals, though some things respecting some part of the encouragement have labored in my mind, and the difficulties are not yet removed." Previous to his ordination a vote was passed "to give him 75 pounds as a settlement and the use of 125 pounds as a Personage, instead of the 200 pounds offered by the previous vote." He was ordained June 25, 1783, and ministered to this people for nearly fifty years, quite within the memory of some now living. He resigned his pastorate January 6, 1832. He preached his last sermon the first Sabbath in May, 1835. He died August 31, 1836. He was a man of great influence, not only in the town, but in all the region. For thirty years he instructed young men in preparation for college or teaching, more than one hundred in all; among them Rev. Dr. Spring, of New York; Dr. Calvin Park, Professor in Brown University; Rev. Cyrus Kingsbury, of the Choctaw Mission; Rev. Dr. Joel Hawes, of Hartford, and Prof. Alexander M. Fisher, of Yale College.

The people of Northbridge were called upon to act on another important matter during the war—the formation of the State Constitution. They rejected at once the Constitution prepared by the committee appointed by the General Court in 1778. To the convention of delegates from the towns, called at Cambridge, September 1, 1779, they sent Jonathan Bacon as their representative. When the work of the convention was presented in 1780, they did not mean to act hastily in its adoption. At the first meeting, when this was brought before them for action, they adjourned the matter, appointing a committee, consisting of William Park, Samuel Aldrich, Benjamin Benson, Ezekiel Goldthwait and Lieutenant James Fletcher, "to assist the town in examing the proposed constitution, and in making remarks thereon." At the adjourned meeting they listened to the remarks of these gentlemen, and then they voted on it part by part, amending it where they felt it needed to be amended. The third article of the Bill of Rights they changed to read, "so that those of one religious persuasion shall not impose any tax on those of another." They had Quakers, Baptists and Universalists among them, and they would deal fairly with them, so well had they learned the lesson of religious liberty. And yet not quite to the standard of our day, for they amended the thirteenth article, "so that no one should be eligible to be an officer in either of the foregoing departments unless he shall be of the Christian Protestant religion."

CHAPTER LXIV.

NORTHBRIDGE—(*Continued.*)

THE LATER HISTORY.

THE town came out of the war, as did all the other towns of the State, poor and stripped, but redeemed and free, ready for the use of their energies, and of the resources God had placed within their reach, in building the State, the foundations of which they had laid at such cost of treasure and suffering. They experienced the difficulties from the depreciated currency, and it is evident from the records that they shared in the discontent that led to "Shays' Rebellion." But when called upon to maintain the authority of the government, they made loyal answer, for rebellion was not the way of redress. They knew that prosperity could come, not by discontent, but by industry and thrift, and they gave themselves to these, and soon they began to repair their fortunes. We learn the following facts of the town from Rev. Peter Whitney's "History of Worcester County," published 1793:—"It is not large, having at the time of the late enumeration (1790) eighty-three houses and five hundred and seventy inhabitants (a gain of eighty-nine since 1776). Besides the Congregationalist Church there is a Society of Baptists, consisting of about ten families, at present destitute of any settled teacher. There are also within the town twelve families of Quakers, and two or three of Universalists. There are two corn-mills, one saw-mill and one forge, where much work is performed. The growth of wood on the highlands is very valuable, consisting of walnut, oak and chestnut. That on the lowlands is less valuable. The people here subsist chiefly by farming, and they have the character of an industrious and flourishing people; and it is said there is hardly an idle person or tavern-haunter in the place." This is surely a good record. But they did not lose their interest in the national welfare, in absorption in their private and local concerns. May 2, 1786, they are called to meet the next day, "To shoe there minds in regard to the trity now depending between Great Briton and the United States." They met and "voted to sign a memorial and send to the House of Representatives, in Congress assembled, praying them to accept and ratify the trity, and about seventy of the inhabitants signed it."

The fact that the House of Representatives had taken the action they desired three days before, in giving efficacy to Jay's treaty, does not make their action less significant. The town records have only the following entries concerning the War of 1812–14 with England. In the warrant for the meeting of July 30, 1814, the second article is "To see if the town will give anything, how much, to the men who are detaich'd from this town to do duty in the defence of their country." At the meeting, it was "voted to

make up the wages of Lyman Thompson and Clark Adams, detach'd men from the town of Northbridge, sixteen—16—dollars per month, including what they git from the State." From this we infer that the town had but small share in this war. But when we come to the war to put down the Rebellion of the Southern States against the Union, we find it (the town) thoroughly aroused and doing its full share. Northbridge furnished three hundred and eleven men for the army and navy, which was seventeen more than all demands. The names of two hundred and fifty-seven, serving in forty-three different organizations, have been preserved. Of these, ninety-three were in the Fifteenth Regiment of Massachusetts Infantry; twenty-one in the Twenty-fifth; eight were commissioned officers; the rest were non-commissioned officers and privates.

The following are the names of those who lost their lives during the war:

ROLL OF HONOR.

James Allen, 15th Regiment; killed at Ball's Bluff October 21, 1861.

Andrew Addison, 15th Regiment; killed at Antietam September 17, 1862.

Henry W. Ainsworth, 15th Regiment; killed at Antietam September 17, 1862.

Arthur J. Andrus, 15th Regiment; killed at Antietam September 17, 1862.

Dexter Brown, 15th Regiment; died in hospital at Baltimore December 16, 1862.

Edwin R. Brown, 15th Regiment; wounded at Cold Harbor; died in hospital, New York City, June 22, 1864.

Alfred A. Batchelor, 15th Regiment; wounded at Gettysburg; died in hospital, Baltimore, July 10, 1863.

Elbridge Bodwell, not a citizen, but one of the town's quota, 12th Battery; died, Boston, January 20, 1865.

William H. Cole, 16th Regiment; died at Andersonville September 7, 1864.

Edward H. Chapin, 15th Regiment; wounded at Gettysburg; died in hospital at Baltimore August 1, 1863.

James F. Dunn, 15th Regiment; died in hospital February 7, 1863.

George F. Fletcher, 15th Regiment; killed at Gettysburg July 3, 1863.

James B. Fletcher, 15th Regiment; killed at Antietam September 17, 1862.

Jeremiah Callahan, 57th Regiment; died at Andersonville August 29, 1864.

Elbridge G. Fogg, 25th Regiment; died at Newbern December 11, 1864.

Lewis Hair, 5th Regiment; wounded at Ball's Bluff; died at Poolesville, Md., November 5, 1861.

Timothy Kennedy, 15th Regiment; died of consumption on way home November 4, 1862.

Eugene Keith, 15th Regiment; body found in Potomac River after battle of Ball's Bluff.

Isaac E. Marshall, 15th Regiment; killed at Antietam September 17, 1862.

George W. Kinney, 4th Cavalry; died at Hilton Head, S. C., September 14, 1864.

Thomas Magoveny, 15th Regiment; died at Hyattstown, Md., October 4, 1862.

David J. Messenger, 15th Regiment; wounded at Ball's Bluff; died a prisoner in hospital, Leesburg, Va., December 13, 1861.

Charles A. Mason, 10th Battery; killed at Ream's Station August 24, 1864.

Charles A. Morgan, 3d Rhode Island Regiment; killed at Fort Pulaski.

Robert McNally, 28th Regiment; died, from wounds received at Antietam, September 22, 1862.

Nathaniel Putnam, 15th Regiment; died at Alexandria, Va., October 10, 1862.

George H. Pierce, 10th Mass. Battery; died of disease at Brandy Station, Va., March 3, 1864.

Lyman J. Prentice, 25th Regiment; wounded at Port Walthall; died in Chesapeake Hospital May 17, 1864.

George L. Sherman, 28th Regiment; died, from wounds received, May 12, 1864.

George N. Smith, 15th Regiment; died, from wounds received at Antietam, September 17, 1862.

George F. Seaver, 15th Regiment; killed at Ball's Bluff October 21, 1861.

Franklin Waterman, 15th Regiment; died of disease near Chickahominy River June 15, 1862.

Christopher G. Young, 15th Regiment; killed at Antietam September 17, 1863.

James Kay, 10th Battery; killed at Ream's Station August 24, 1864.

Eleven of these were killed, ten died of wounds, ten of disease, one was drowned and two died in Andersonville prison,—thirty-four lives for the country's life. Fifty-six were dismissed for disability. The first meeting to consider matters relating to the war was held May 8, 1862, at which it was voted to appropriate "such five sums of money as may be required, not exceeding five thousand dollars, to aid in uniforming, and to obtain such articles as may be needful for the comfort of such residents of the town as shall have enrolled themselves into a company of volunteer militia to be formed in this town and vicinity, and also to aid the families of such volunteers while in actual service; also to pay each volunteer one dollar a day, not exceeding thirty days, for time spent in drilling."

July 26, 1862, the selectmen were authorized to pay a bounty of one hundred dollars to each volunteer for three years' service, who shall enlist and be credited to the quota of the town.

Voted, that an additional sum of fifty dollars be paid to volunteers, who shall enlist in regiments now in the field, on or before the 15th of August. A committee of one from each school-district was appointed "to solicit the enlistment of volunteers."

August 27th, "voted to pay a bounty of one hundred dollars to each volunteer enlisting for nine months; the bounty to be paid when the man was mustered in and credited to the town."

October 11th, the bounty to nine months' men was increased fifty dollars, and the bounty for three years' volunteers was raised to two hundred dollars.

November 3, 1863, voted "that the families of conscripts, disabled soldiers, and those who have died in the service of the United States, be placed on the same footing as regards State aid as the families of volunteers."

April 9, 1864, "voted to pay a bounty of one hundred and twenty-five dollars to each volunteer enlisting to fill the quota of the town for three years' service, under the recent call of the President."

August 5, 1865, "Voted to refund the money to all individuals who have paid money to aid in recruiting." These votes show the readiness of the town to do her full part in the defense of the country.

There was also much done by individuals to help enlistments. More than twenty-six thousand dollars was contributed for this purpose, beyond what was refunded by the State. More than eight thousand

dollars was contributed for the comfort of soldiers in the field and hospitals, especially through the Sanitary and Christian Commissions.

Careful estimates of what the town paid for the cost of the war in taxes growing out of it, and in contributions, make the sum $710,773.63, while the valuation was but $945,374 in 1860 and $898,385 in 1865. Her part was well done and willingly.

In the beginning the town-meetings were held in private houses. But as soon as the "Town's Meeting-House" was so far completed as to warrant occupancy, it was used for town (then "District") purposes. It was, as long as owned by the town, the town's house. The first town (or district) meeting held in it was February 24, 1775, and here for nearly sixty years they held their meetings and acted on all the secular interests of the community. They often adjourned to a private house, especially in cold weather, as we understand, because they had no means of warming the meeting-house. About 1830 a desire for another place of meeting appeared. In the warrant for the March meeting of 1832 there had been an article "to see if the Town will build a house to transact their business in." But it was passed over. In 1833 the town-meeting was warned to meet at Jacob Kinneston's Hall, in the public-house at Holbrook's Upper Village (now Rockdale). March, 1834, it was voted "to build a Town-House for the transaction of Town business." But at the same meeting a committee made a report, which was accepted, "that it is not proper to remove town-meetings from the Meeting-House until a more convenient place is procured." Notwithstanding this vote, they often voted to meet elsewhere, as at Rockdale, and frequently in the chapel of Whitinsville. The desire for a more convenient place belonging to the town continued, and in 1871 a committee was appointed "to consider what Building or Buildings are required for a Town-Hall, High School and other town purposes, to report at a future meeting." In the March meeting of 1872 the report was made. Before any action was taken upon it, Mr. John C. Whitin made an offer in behalf of himself and his brothers to provide suitable rooms for town-meetings and town business in a building to be erected by them. This offer was accepted, and they erected Memorial Hall, in Whitinsville, on the site of the homestead of their parents, a handsome building of brick, with granite trimmings, one hundred and ten by sixty feet. In the basement is a hall for town-meetings. On the first floor are a small hall for meetings, two rooms for town purposes, with a fire-proof vault for town books, a reading room and rooms for the Social Library. In the second story is a large hall for public meetings.

The first town-meeting in the new building was held in the Lower Hall, November 7, 1876, and since that time all the town-meetings have been held here.

CHAPTER LXV.

NORTHBRIDGE—(*Continued.*)

RELIGIOUS SOCIETIES.

THE CONGREGATIONAL CHURCH.—As we have seen in the beginning, the town as such provided for Gospel ordinances, and for a place of public worship, employing the preacher and building the meeting-house. For these purposes of religion, all the citizens were taxed, save those who belonged to other denominations than the standing order, which was Congregationalist. These by law were exempt from this taxation if they confessedly belonged to some other religious body and made their contributions to its support. In this town were Quakers, Baptists and a few Universalists to be thus relieved. The town employed Rev. Aaron Bliss for some two years before the church was formed. Rev. Mr. Crane gathered the church which was organized June 6, 1782. There were now two bodies having to do with religious matters,—the town and the church. The church took the initiative as to the calling and settling a pastor. The town was asked to concur, and it was responsible for his support. Soon a third body appears, "The Congregational Society," which is first mentioned in 1784. Yet it is so far identified with the town that in the warrant for town-meeting in 1784 the fifth article is "To see if the *Congregational Society* will choose a committee to settle with John Adams and Major Batcheller for Boarding Mr. Crane and the Council, when Mr. Crane was ordained," and in 1787, "To see if the *Town* will choose a collector to collect ministerial money, and also a Treasurer to receive the same, and for said Treasurer to be accountable to the *Congregational Society* as the Town Treasurers are or may be to the town, and the town chose such a collector."

The town slowly finished the meeting-house, selling "pew spots," or rights to build pews, first on the sides and then in the centre of the house, building a gallery, and some years after finishing the stairs to the same. In 1801 $60 were voted for last bills for finishing the inside of the house, which had just been accomplished. The repair of the house still came upon the town. But in their last action in reference to it, in 1808, the warrant for town-meeting has an article to see if the town will vote "to shingle the meeting-house *for what they have used it* to do town business in."

From this it is manifest that the town does not now feel it is sole owner of the house, but is under obligation to another body for its use, and the same is shown by the vote on this article, which is "to shingle the meeting-house by *the society*," and yet at the next meeting they appoint Paul Whitin, Marvil Taft and Thos. Goldthwait a committee to inspect the work. This is the last mention of the town's doing anything to repair or control the meeting-house.

For more than thirty years the town had had the care and control of the meeting-house. During these years it is called in the warrant for town-meetings: "The Town Meeting-House," or "The Meeting-House in Northbridge." But in 1819 the language is changed to "The Congregational Meeting House." Four years before this it had ceased to be town property. In March, 1814, "John Crane and others" pray the town to be incorporated as a religious society. Their petition was "passed over." In the next meeting it was not noticed. Now John Crane and thirty-one others petitioned the General Court to be incorporated as a religious society in Northbridge. Their request was granted. They are spoken of as "members of the Congregational Society in Northbridge." But now they are incorporated as such, August 27, 1814, and they became liable to pay all taxes voted by the society and responsible for the support of the minister, and the members can be released from the obligation only as they furnish a certificate that they have joined some other religious society. Still must all belong to some religious society and help in its support. This continued until the amendment of the Constitution, in 1833, when the towns were relieved from all responsibility for the support of ministers, and citizens from the liability to be taxed for religious purposes, and all connection between church and state at last ceased.

The Congregational Society was invested by the act of incorporation with the meeting-house property, and was authorized to hold other property. We find no action of the town acknowledging this incorporation or the transfer of the property, but the town takes no action after March, 1814, as to ministerial support or of control of the meeting house. It considers itself a tenant of the society, and obtains permission from the society to put up a hearse-house in the "burying-ground." Soon after the incorporation of the society an effort was made to raise a fund for the support of the minister, as was said in the preamble of the subscription: "To abolish forever ministerial taxes in this town, and to establish a fund for the support of a learned Congregational, Calvinistic Ministry in Northbridge, the subscribers promise to pay;" $2475 was subscribed, in sums from $20 to $500, but in 1816 it was voted to return the sums already paid in, and a committee was appointed to devise some other way of raising the fund. This was never done, and most withdrew their contributions. But Mr. Paul Whitin, Sr., left his in the hands of the society, and this, increased by interest, enabled the society, in 1867, to purchase the parsonage now owned and used by it. The society at once assumed all ministerial charges, and taxed the property of the members. But this did not satisfy all, and for several years the pews were taxed to raise part of the funds needed. From 1838 to 1846 the salary was raised by subscription; from 1846 to 1850 property was taxed; then there was a return to subscription; and now, as in all societies, the voluntary system of support is used.

Early in 1835 the society, having determined to have a new meeting-house, and having purchased the land for it, voted to move and repair the old meeting-house, if it was deemed worth moving. But not being deemed worth removal, it was soon taken down. The first Sabbath of May, in the same year, Dr. Crane preached his last sermon in the old house. The records of the parish show no vote to build the new meeting-house, but February 5, 1836, they voted to convey the land and the new house to the deacons of the church, and they direct their committee to convey their thanks to Mr. Orra Taft for the bell he had given them. Now the old New England custom of ringing the bell for Sabbath services, for tolling the years of the dead, and for marking the hours of noon is begun. It was also voted to have the foot-stoves filled at the stoves in the meeting-house.

The parish was as reluctant as the church to allow any of its members to leave for the formation of a new parish in Whitinsville, in every instance where a petition for this was presented, either passing it or voting not to grant it. But when the separation took place they did not lose heart. They went on in their work of maintaining the ordinances of religion at the Centre. In 1832, soon after the resignation of Dr. Crane, Rev. Samuel H. Fletcher was called and installed, March 14th. He was dismissed in March, 1834. Rev. Charles Forbush was installed June 4, 1834. He continued pastor until his death, June 9, 1838. Rev. Lewis Pennell was installed April 3, 1839, and dismissed April 11, 1842. Rev. William Bates was ordained and installed November 5, 1845, and dismissed November 23, 1857. Mr. Bates was the last installed pastor. The church has since been supplied by Revs. Messrs. George B. Safford, Hiram Day, Sylvester Hine, Calvin Terry, D. W. Richardson, W. H. Haslewood, Thomas L. Norton, James Wells, J. T. Crumrine, R. M. Burr and J. H. Childs. Rev. Mr. Childs is the present acting pastor, who also has the charge of the Rockdale Church. In 1877 this parish united with the parish in Rockdale in the support of the minister, who has since had the care of both parishes, residing at the Centre.

The church gathered by Rev. Mr. Crane, in 1782, of eight members (five from the church in Uxbridge, three from the church in Upton), received five on confession the same day, thus beginning their separate life. As was customary, there were no "Articles of faith," it being understood that all accepted the "Catechism of the Westminster Assembly" as the standard of belief. They entered into covenant with God and each other. In this covenant there is a consecration of themselves to God the Father, Son and Holy Ghost, and a giving of themselves to each other to walk together as a rightly-ordered Congregational Church, to maintain all Gospel ordinances and watch over each other,—a consecration to work

against all ungodliness in the world, to maintain secret and family worship, to train their households in a Christian manner; especially catechising them in the family, instructing, exhorting and commanding them to attend the more public catechising and instruction of those meetings which may be appointed for that end. The articles of faith were adopted probably April 1, 1814, but were not recorded. There is evidence that church discipline was not a mere name, as we have record of discipline for watering cider, for deceiving in trading for a horse; and the church recognized its own duty to repair a wrong done a member, in making confession to one whom it felt it had misjudged. For the first few years, like all the churches of the period, it received but few additions—only eighteen for twenty-six years. But it has known its times of enlargement, as in 1808, 1820 and especially in 1831, when fifty-four additions were made; and the removal of so many, to form the village church did not take as many members as had been added in this year. It had, January 1, 1888, one hundred and six members.

The Village Congregational Church in Whitinsville.—During the latter part of Dr. Crane's ministry it had been common to hold meetings in the school-house in this neighborhood Sabbath evenings, at which he and other ministers occasionally preached. The feeling that more was needed led to the formation of a Sabbath-school in 1833, having two sessions each Sabbath.

The conviction that a church should be formed, and regular Sabbath services maintained, becoming fixed, several members of the first church sought dismission from it for this purpose. This being denied, five gentlemen, not members of this church, were requested to call a council "to advise on the question whether it is expedient to establish a church and society in said village of South Northbridge." The council met April 17, 1834, and advised that it was expedient that a church should be formed and Gospel ordinances established. In 1833 "The Chapel" had been built and had been dedicated to religious uses early in 1834. Regular preaching was now provided from Rev. Caleb B. Elliot, of Millbury, and afterwards from Rev. William Whittlesey, of New Britain, Conn. The society was formed June 20, 1834. The members of the first church desiring to form the new church, still failing to obtain letters of dismission, called by their committee a council to be held July 31st, "to carry out, if it should be thought best, the recommendation of the previous council." By this council the church was constituted, consisting of thirty-three members. Seven more were received by letter from the first church August 26th, and became identified with the church in its beginning. Rev. Michael Burdett was soon called, and was installed April 15, 1835. He was dismissed April 29, 1841, after a pastorate of six years. Rev. Louis F. Clark was ordained and installed pastor June 1, 1842, and continued his labors here as pastor until his death, October 3, 1870,—a man greatly beloved and greatly useful. Rev. John R. Thurston was installed April 20, 1871, and continues pastor.

The church has been prospered, having received in all 710, and it numbered January 1, 1888, 231.

The present house of worship was built in 1846 and was dedicated November 12th of that year. It has since been enlarged.

The Congregational Church in Rockdale.—There were no regular public religious services in this village until after P. Whitin & Sons purchased the property in 1856. They finished a hall over the store and dedicated it to religious worship. In the fall of 1861 Rev. E. F. Williams, of Uxbridge, was employed, and labored there somewhat more than a year. His work was blessed by a revival, and there was some thought of forming a church. When Mr. Williams left, Rev. Mr. Harding, of Boston, was engaged to supply, and he preached there for some years, though not residing there for pastoral service. From November 1, 1871, to December 1, 1872, Rev. J. C. Halliday preached and resided there. For some time after this there was not regular preaching, but the Sabbath-school was maintained, and the pastor at Whitinsville preached there occasionally. In 1877 the people united with the parish at Northbridge Centre in the support of a pastor and since that time regular Sabbath services have been maintained. It had long been felt that a church organization was needed for the best religious result and plans had several times been made for forming one, but they had not been carried out. December 30, 1879, a council was called and a church of fifteen members was formed, which has since grown to thirty-nine, January 1, 1888. This church, with the church on the Hill, has Rev. James H. Childs as pastor.

The Quakers.—We have seen[1] that early in the last century a few families of Quakers moved up the Blackstone Valley in what is now Northbridge, and they experienced difficulty from their unwillingness to serve in the French and Indian War. They had the same difficulty after the town was incorporated during the Revolutionary struggle. By colonial statute, passed in May, 1776, among those exempted from the necessity of military service are "those persons who had, before the nineteenth day of April, one thousand seven hundred and seventy-five, been by law deemed to be of the denomination of Christians called Quakers." It appears from the State archives that one Thomas Eddy, who had become a Quaker in 1777, was allowed exemption on petition of the town, by the Colonial Council, July 27, 1778. Said Eddy had been sent to the garrison at Rutland, but had refused to do duty on the ground that he was a Quaker. January, 1779, the selectmen of the town, having doubts whether the town had a right to assess

[1] Page 426.

the Quakers for their part of the tax of two hundred pounds laid upon the town "to pay men who had been, or had hired men, to go into the army," send a petition to the "Honorable Council and house of Representatives" that they would solve their doubt "and make it certain whether we have a Right to tax said Quakers." Thus scrupulously were their rights regarded. We have no record of what answer was given to this petition, but as later we find frequent mention of a "Quaker Tax," we learn that it was felt that they must in some way contribute to the defence of the country.

After the Revolutionary War we find no evidence of any difficulty with the town from their peace principles.

Before the town was incorporated the first meeting-house was built by the Quakers. On petition of Samuel Aldrich, for the building of a meeting-house, a committee was appointed at the Smithfield Monthly Meeting of Friends, November 28, 1765, "to judge whether there was need of one." This committee reporting favorably, a committee, consisting of Samuel Aldrich, Moses Aldrich and Moses Farnam, Jr., "was appointed to oversee the building of said house."

"Twelfth Month, 1776, the Building Committee exhibited an account of the Cost of Building the Uxbridge (now Northbridge) Meeting-house, amounting to £70 16*s.* 1*d.* lawful money, which is accepted." Forty pounds of this money was contributed for this purpose by Rachel Thayer, of Mendon. We see it is ten years after the committee is appointed to oversee the building of the house before the final account of cost is rendered, and we do not know when it was first occupied, but probably before the "Town's Meeting-house." The first mention of this meeting-house is in the town-meeting of March, 1778, when it was "voted to warn town-meetings by notifications to Be posted at Capt. Baldwin's Mill, Ye Quaker meeting-house, and ye Town meeting-house in Northbridge." This became the custom ever after. This meeting-house stood about one-fourth of a mile south of the present house, on the east side of the road. Respecting the present meeting-house the following items are furnished: "At an Uxbridge Monthly Meeting in 1804, Nathaniel Aldrich, Richard Mowry, Elisha Arnold and others were appointed to exchange lots and contract for building the present meeting-house in Northbridge. They reported in the Third Month, same year, that they had done so. The new house to be built for $650 and the old house. The new one was built that year." Saml. Aldrich was one of the contractors for building it. In this house the Friends have worshipped God for more than four-score years. They have met each week, and the spirit has moved to words of exhortation, as to the faith and the life. In recent years their numbers have diminished, but their meetings are maintained with the instruction of the young in the Sabbath-school. In May of each year Quarterly Meeting is held here. There has been special interest in temperance the past few years.

The meeting in Northbridge was a part of the Smithfield Monthly Meeting till Seventh Month, 1783, when the several meetings held in Uxbridge, Northbridge, Richmond, N. H., and Leicester were set off and formed a separate Monthly Meeting under the name of the Uxbridge Monthly, which continues until the present time. We have no record of the residence in the town of a minister approved by the meeting, and the ministry has been by those belonging to the meeting but residing usually in Uxbridge. Mrs. Salome C. Wheeler, who is an approved minister, residing in Uxbridge, usually ministers at the Northbridge Meeting-house.

Baptists in Northbridge.—From the following certificates it is manifest that there was early in the history of Northbridge an acknowledged body of Baptists, having a "society," if not a church organization:

We, the Subscribers, being chosen a committee by the Society of People called Anti-pedo Baptist, we (who?) met together for religious worship on the Lord's day, in Northbridge, to exhibit a list of the names of such persons as belong to said society or congregation: Do certify that Timothy Winter, Nathaniel Cooper, Jun., John Cooper, David Dunn, Jonathan Bassett, Barnabas Aldrich, William Rawson, Joseph Hill, Nathaniel Cooper, do belong to the said congregation, and that they do frequently, and usually, when able, attend with us in our meetings for Religious Worship, on the Lord's Day, and we do thereby believe are, with respect to the Ordinance of Baptism, of the same religious sentiments with us.

Dated Grafton, Aug. 15, 1774.

Recorded by the clerk Aug. 29, 1774.

Joseph Rice,
Ebenezer Wheeler,
James Leland,
} Committee of the Baptist Society in Grafton.

Samuel Powers and John Rooks, of Northbridge, were included in another certificate of the same date.

From this we infer that thus early in the history of the town these men, wishing to be relieved from paying the town tax for the support of the Congregational minister, and building the meeting-house, obtained this relief by these certificates.

John Cooper, an ordained Baptist elder, was for many years the preacher, preaching frequently until near the time of his death, in 1818. His brother Nathaniel also preached occasionally. "The Baptists had their meetings in private houses, mostly in those of the preachers."

In April, 1787, it was voted that the warrant for town-meeting be put, "one at the place where the Baptist meet for publick worship," from which it is manifest that they early had a place of usual meeting, probably the house of "Elder John Cooper," near the Cooper grave-yard. Jesse White, the blacksmith, was deacon.

In 1793 Whitney speaks of ten families of Baptists, "at present destitute of any settled teacher." Yet there was a Baptist society as late as 1812, for Abner Cooper and John Cooper, "committee," certify that "Phineas Taft, of the town of Uxbridge, is a member of the religious society in the town of Northbridge called the Northbridge Baptist Society." After the death of Elder John Cooper they did not have preaching regularly. Mr. Sawyer, and after him Mr. Rufus Bennett, preached occasionally, but soon all public

services ceased, and the society has had no existence for many years. The few of this persuasion in the town have identified themselves with the Baptist societies of Farnamsville, or North Uxbridge, or with the Congregationalist or Methodist Churches in the town.

THE METHODIST CHURCH IN WHITINSVILLE.—The first Methodist services in the town were held in the house of Rufus Bennett, near the Quaker Meeting-house, early in 1828. Miss Rebecca Bradford, of Providence, R. I., a school-teacher, secured the preaching of the first sermon by her pastor, Rev. Mr. Osgood, in this house. "As a result of this and other meetings, a revival of religion followed, in which a number were converted. Among them were Amasa Benson, Amos White and Lyman Aldrich, who became pillars in the church. Mr. Bennett, who had been connected with the Baptist Church of Upton, joined them, and became a local preacher among them.

"The meetings were held in private houses, in the school-house near the Quaker Meeting-house, and in the stone school-house at Plummer's Corner, and the Lord's Supper celebrated in Captain Amos White's new barn a number of times.

"At the session of the New England Conference, which met at Lynn July 23, 1828, Bishop Elijah Hedding presiding, 'Northbridge Circuit' was organized. It was in the New London District, Edward Hyde, Presiding Elder. Will. J. Lovejoy and Joseph Iveson were the preachers."

During most of the years until 1850 preachers were appointed for this circuit, and religious services were maintained. Two camp-meetings and several grove-meetings were held on the Benson farm. But it was not in this part of the town that Methodism was to have its permanent and central place. The village of Whitinsville had been and was still growing and giving promise for the future, and here was the Methodist Church to find its home. The first Methodist preaching here was secured by Mr. Charles Taylor. The preacher was Rev. Joseph W. Lewis, of Webster. He was assisted by Chas. W. Ainsworth, of Millbury. The services were held in the hall just erected on Railroad Avenue, which became the place of worship for many years. This was early in 1850. April 24th of the same year, at the session of the New England Conference in Boston, Bishop Thomas A. Morris presiding, "Whitinsville took its place in the list of appointments. It was included in the Worcester District, J. Hascall, Presiding Elder; H. P. Andrews, preacher." "June 23, 1850, Dr. Hascall organized the Quarterly Conference" here. Since that day the church has maintained regular worship, and had constant preaching. They remained in the hall where they began for twenty-five years. October 22, 1875, the new meeting-house was dedicated. In 1882 a troublesome debt was removed, with the generous help of friends in the place. It was a happy day, October 22d, when they held their meeting-house and parsonage free of all encumbrance. The church has grown with the village, and now numbers ninety-one members. The preachers have been: 1850–51, H. P. Andrews; 1852, Cyrus L. Eastman; 1853, Jonathan L. Esty; 1854, Jonathan D. Bridge (during this year a collection of $6.50 was reported "to assist fugitive slaves"); 1855, it was united with East Douglas; 1856–57, Wm. P. Blackmer; 1858–59, Geo. H. Mansfield; 1860, Nath. A. Soule; 1861–62, William Merrill; 1863–64, Abraham M. Osgood; 1865–67, William A. Braman; 1868, Robert G. Adams; 1869, D. D. Hudson; 1871–73, Emory A. Howard (during this pastorate, the Spring estate was purchased, with the house which has since been the parsonage, and the ground for the new meeting-house); 1874–75, William Merrill (during this pastorate the meeting-house was completed and dedicated); 1876–77, Edward A. Manning; 1878, J. W. Fenn; 1879–80, Seth C. Cary; 1881–83, Lyman D. Bragg (during this pastorate the debt on the property was paid); 1884–86, James Mudge; 1887, E. Stuart Best.

THE UNITED PRESBYTERIAN CHURCH.—For some years previous to 1871 there had been an increasing number of United Presbyterians in Whitinsville. They had brought from their homes in the north of Ireland and Scotland a strong affection for their own faith and worship. They had worshipped occasionally and "communicated" with the United Presbyterian Church in Wilkinsonville. Some had united with this church. But they felt they must have for themselves and their children more regular Sabbath services, and early in 1871 they began such services with Rev. Mr. Cresswell as minister, and soon a "congregation" was formed and became connected with the Boston Presbytery. Worship was held at first in Smith's Hall and subsequently in "The Chapel" formerly used by the Congregational Church. Here they continued until they went into their new meeting-house, save during an interval of about seven months, when, owing to internal difficulties, the congregation was disbanded for a brief time. It was reorganized December 16, 1874. In 1881 a meeting-house was built on Cottage Street, in the erection of which, friends in the village greatly assisted them. It was dedicated February 22, 1882. In 1888 a parsonage was built on the same lot with the meeting-house. The preachers have been Rev. Robert Harkness, January 21, 1873, to April 22, 1874. For three years it was supplied by various ministers. Rev. J. L. Thompson was installed June 11, 1878. He was released April 11, 1882. Rev. J. Crawford McKay, installed April 24, 1883; resigned in July, 1884. It was supplied by Presbytery with various preachers, among them Rev. J. R. McAllister from January, 1880, to July, 1887.

Rev. Wm. Hughes was installed October 25, 1888, and is the present pastor.

ST. PATRICK'S CHURCH.—The great increase in

manufacturing in the recent years has brought many of foreign birth into the town for labor. In 1875 there were one thousand three hundred and six who were born in Ireland or Canada; most of these were of the Catholic faith. They have always belonged to the parish of Uxbridge and been under the care of the Priest resident there. As their numbers increased, it was felt that they should have a church in this town, and Rev. Dennis O'Keefe purchased the land for one in 1868. His successor, Rev. Dennis Moran, built the church. The first service was on Christmas, 1870. Rev. Henry L. Robinson became pastor in 1871 and remains such. He is assisted by Father Langier, who especially ministers to the French, who are the larger part of those of the Catholic faith. The church was moved to its present site on Church Street, and enlarged and a basement added in 1883.

CHAPTER LXVI.

NORTHBRIDGE—(*Continued.*)

SCHOOLS AND LIBRARY.

IMMEDIATELY on the incorporation of the district, attention was given to the interests of education. At the second town-meeting, September 21, 1772, a committee was appointed to "Squadron" the district for school purposes. In November, the same year, they report their work making seven "Squadrons," some of which were very small. In 1785 the second and third were united, making six, and in 1793 the fifth and sixth were united, making five squadrons. But this last union, putting Adam's Corner, Northbridge Hill and what is now Whitinsville into one squadron, proved unsatisfactory, and in 1796 James Fletcher and others, in what is now Whitinsville, received permission to be a district by themselves, and to build their own school-house and not to be taxed for the building of any other school-house. The next year a similar privilege was granted to the families in the vicinity of the Quaker Meeting-House, on the same conditions. The same year five families at Riverdale were made a district. In 1802 another district was founded, including the families at Prentice's Corner and on the northeast side of the meadow. In 1832 we find eight districts, which continued, with occasional changes of families near the border lines, until the district system was abolished and the town system adopted in 1867.

At the first the schools were kept in private houses and in the meeting-house. There is evidence that a school-house stood on the hill on the east side of the road, north of the burying-ground. But it does not seem to have been in use at the time of the incorporation of the district. It is not until 1791 that the building of school-houses was agitated. That year an article was put into the warrant to see if the town would build a house in each district; but it was passed over in the meeting. In 1795 it was voted to build a house in each district, and a committee was appointed for the purpose. But the next year the article to grant and raise money to build school-houses in the town of Northbridge was dismissed, from which it is manifest the work was not yet begun. And at the next meeting, the same year, they refused to appoint a committee to set the school-houses in each district. It is evident that the dissatisfaction with the new squadrons had something to do with this delay, as the same year James Fletcher and five others were made a new squadron if they would build their own school-house, and the next year the same action was taken for six families near the Quaker Meeting-House. At the meeting in June, 1796, a committee was appointed to instruct the committees appointed the previous year to build school-houses and to order them to set them in the most convenient place and to say how big each school-house shall be. From the absence of any further reference to school-houses in the records and from the recollections of persons recently living, we judge that the school-houses were built in most of the districts soon after this, as on the Hill in 1797. Yet it is manifest that not in all, very soon, as in 1807 a vote is passed "to allow district No. 7 to build a school-house if they please," and as late as 1810 there is a petition from certain families to be set back to the "Winter district" until suitable school-houses have been built in the districts to which they had been assigned. The whole town was taxed for building these houses, those of two districts being exempted who were to build their own houses. Also the lands of non-resident owners were taxed for the same purpose.

The school-houses then erected sufficed until the district system was abandoned in 1867, except that another had to be erected to meet the demands of the increased population of Whitinsville, and it had to be twice enlarged until it had six rooms. After the adoption of the town system new houses were built for all the schools, save at Adam's Corner, where the house was thoroughly repaired. A new two-story house was built in Whitinsville in 1869, and enlarged for two more schools in 1872. In 1878 another large school-house was built in Whitinsville for four schools; and now measures are being taken to erect a large brick school-house in the centre of this village for the high and grammar schools and for primary schools, thus providing twelve school-rooms in Whitinsville.

Until 1865, the town had had only the district schools, including all grades, and in Whitinsville the grades of Primary, Intermediate and Grammar. In the annual report of that year, the committee pleaded earnestly for a High School, which the State laws required of every town having five hundred

families, this town having five hundred and fifty; and a vote was passed to establish a High School. This was done at once, and the school was located in Whitinsville, and has been maintained ever since, doing good work and accomplishing all that could be reasonably expected, giving those who are unable to go out of town for education the opportunity to pursue their studies several years longer than formerly. The committee the same year urged the lengthening the terms of school, which had heretofore been only six months, with a private school kept in some of the districts. Their recommendation was adopted the next year, and since that time the schools have been kept between nine and ten months.

In the beginning the care of the schools devolved on the selectmen. In 1799 an article was put in the warrant for the March meeting, "To see if the town will choose a committy to regulate the school districts," but it was voted "not to choose a school committy." But in 1805 it was voted "to choose a school committee of five;" the change was not acceptable, and a committee was not chosen again until 1810, and from 1813 to 1819 none were chosen. From 1820 the school committee has been chosen every year. In 1826 "it was voted to allow Dr. Crane fifty cents each visit and to visit each winter-school twice." At the same meeting a school committee of eight was chosen, one for each district. The next year "it was voted to comply with the requisitions of the law in choosing a school committee," and three were chosen, and it was "voted each District be allowed to choose their own prudential committeemen, agreeable to *usual* custom." The innovation of the previous year, in having the prudential committee of the districts chosen by the town, was not acceptable. But the next year, 1828, the town again chose the prudential committees of the districts and continued to do so until 1862, when the choice reverted to the districts again, where it remained until the district system was abolished in 1867. In 1828, Mr. Adolphus Spring and Dr. Crane were a visiting committee to supplement the work of the prudential committee. Dr. Crane received twelve dollars for his visits. From this time for several years the town's committee are spoken of as "visitors." Previous to 1858 the whole committee was chosen each year; this made possible, and sometimes actual, an entire change of persons in the board in a single year, and might bring in a board none of whose members had had any experience in the care of schools. This brevity and uncertainty of tenure was unfriendly to the adoption and carrying out any plans of school-work which extended over years, and was a hinderance to that progress which was needed. In 1858 the plan was changed, and each member now serves three years, and two new ones are chosen each year, and thus there is a continuity of service, and the benefit of experience is secured. There has been for many years an earnest endeavor to increase the efficiency of the schools. A new and powerful impulse was received in this progress about 1847. In 1843 the committee, of which Rev. Lewis F. Clark was chairman, made a very plain report as to the deficiencies in the schools and in the school-houses, and calling for progress. Their report was printed, and it was evidently pondered; we see a slow increase in appropriations for several years, until 1847, when a very large increase of almost fifty per cent. was made, and since this time there has been great advance, and the town has been ready for any expense needed for the success of the schools. In 1843 the town was very near the lowest in the State for the amount appropriated per scholar, there being but forty-three out of three hundred and seven that raised less; now there are but sixty-nine that raise more. In 1852 the appropriation was $2.96 per each child of school age; now it is $11.20. As a result of this interest and these efforts the schools are doing good work, for which every parent and every citizen may be thankful. Much of this gain has been due to the untiring efforts of Dr. Rouse R. Clarke, who was first chosen a member of the committee in 1852, and served the town almost without interruption until his death, February 2, 1888. For many years he was acting superintendent, though unwilling to be called such. He brought to the work great love for the cause of education, a high estimate of its importance, a large measure of common sense, a friendliness to new ideas, with an unwillingness to undervalue the old methods, and great faithfulness in the care of the schools. When the new school-house was completed on Cross Street, in Whitinsville, the following vote passed unanimously in the town-meeting April 7, 1879: "Resolved, that in recognition of the long-continued and eminent services of Dr. R. R. Clarke on the Board of School Committees, his constant and zealous efforts to advance the interests of our schools, whereby they have been raised to the present high standard, it is hereby ordered that the new school-house on Cross Street shall be designated and known as the 'Clarke School,'" and the following resolutions were passed at the town-meeting, April 2, 1888, after his decease:

Resolved, That we, the citizens of Northbridge, desire to place upon the record our high appreciation of the services of the late Dr. Rouse R. Clarke, in behalf of our public schools.

For almost thirty years his best thought and most earnest efforts were devoted to their interests. During all this time it was his greatest ambition to do all in his power. Believing that the stability and freedom of our civil and religious institutions depend upon the education and morality of the people, he entered upon his life-work with a sincere desire to serve his generation by doing what he could to advance the interests of education in our midst.

For all these years he has spared no expense of time or effort to accomplish this. We believe the present success of our schools is largely due to his untiring devotion to their welfare. We cannot express too strongly our high appreciation of his valuable services and the deep sorrow we feel for our great loss.

Resolved, That the clerk be directed to enter these resolutions upon the Records of the Town, and forward a copy thereof to the family of the deceased.

THE WHITINSVILLE SOCIAL LIBRARY.—At a meeting of the citizens of Whitinsville, held December 10, 1844, to take into consideration the establishment of a Social Library, P. Whitin, Esq., was called to the chair. It was stated that the sum of one hundred dollars was left as a legacy, by Miss Sarah Fletcher, to be appropriated to such a Library whenever it should be thought best to establish one; and that this sum, with the interest on the same, was now available. Voted that we consider it expedient to establish such a Library at the present time. Voted, To choose a committee of three to draft a constitution, and present it at a future meeting. L. F. Clark, Horace Annsby and Leander Gorton were appointed on this committee.

The constitution presented by this committee, with some amendments, was adopted December 17th, and the society was organized under the name of "The Whitinsville Social Library." Signatures were obtained to the constitution, and December 24th the officers were chosen with Rev. L. F. Clark president.

By February, 1845, eighty-six subscribers had become members of the association by payment of one dollar as initiation fee and signing the constitution, which imposed an annual assessment of one dollar. Two hundred and fifty books had been purchased, and arrangements made for loaning them. This is the origin of the Social Library.

The association became *incorporated* April 14, 1858, under the provisions of the forty-first chapter of the Revised Statutes of Massachusetts.

April 9, 1860, a legacy of five hundred dollars was received from Ezra W. Fletcher, of which it was voted to use only the interest.

The library was for many years kept in "the chapel" of the Congregational Society, and was used by subscribers, and a few others, as the teachers, to whom its privileges were extended by the association. But when better and permanent accommodations were provided in the Memorial Building, in 1876, it was determined to offer its privileges to all the inhabitants of the town on certain conditions, and the following vote was passed by the association:

To make the Library free to the Inhabitants of the Town of Northbridge, subject to such Rules and Regulations as the Association or Corporation may adopt, upon condition that the Town shall annually appropriate and pay to the treasurer of the Corporation for the maintainance and support of said Library a sum not less than Three Hundred Dollars. The Library ceasing to be free to the inhabitants of said town when the Town ceases to make the above mentioned annual appropriation for its maintainance and support.

The town accepted the proposition of the association at its annual meeting in March, and has since made annual appropriations for the support of the library. The needed changes in the constitution and by-laws were made, and the library is still under the control of the association, of which any citizen of Northbridge may become a member by payment of one dollar annually, or a life member by payment of ten dollars, and signing the constitution. At the annual meeting, February 13, 1888, the fee for life membership was made five dollars.

Rev. L. F. Clark was re-elected president every year but two, until his death, in 1870. Dr. R. R. Clarke was chosen to succeed him, and re-elected annually until his death, in 1888, when Geo. A. Annsby was chosen, and is now president. From the small beginning with two hundred and fifty volumes, the library has grown apace, and, as we learn from the annual report made February 13, 1888, contains 4,507 volumes. The number who took books the last year was 418, and the number of volumes circulated was 6,875.

CHAPTER LXVII.

NORTHBRIDGE—(*Continued.*)

MANUFACTURES.

WHILE the early settlers were agriculturists, the necessity of mills for sawing their lumber and for grinding their grain soon led to the building of mills for this purpose, as the abundant water privileges on the Blackstone and Mumford Rivers gave them ample opportunity for doing. Samuel Terry erected a saw-mill at "Ye Falls," on the Mumford River, at what is now Whitinsville, in 1727 or 1728. Some time before 1740 Woodland Thompson built a saw-mill on "Oil Brook," a small stream running into the Blackstone, on the west side, a little south of Riverdale. In 1764, James Nutting, Sr., sold "two grist-mills and a saw-mill" at what is now Riverdale. Having purchased the property in 1753, without mention in the deed of dam or mills, we infer he built the dam and the mills, thus first making use of the privilege, and building the first grist-mill in the town. Some time between 1805 and 1814 the privilege at what is now Rockdale was first put to use, and a saw and grist-mill were built by John and Jesse Eddy.

But these elementary manufactures were not those which were to grow and build up the town. The manufactures which were to employ its citizens in great numbers, and bring to them comfort and wealth, were those of iron, cotton, wool and leather.

IRON MANUFACTURES.—The very early development of the manufactures of iron in this town was doubtless due to the existence of iron ore within its limits. September 16, 1700, Mendon (then including Northbridge) voted "that noe person shall carry any mine or iron ore out of or from the Town Common, upon penalty of twenty shillings a load, the one-half to the informer, the other half to the use of the towne;" At a meeting October 14th, the same year, Samuel Thayer was permitted to carry away the "ore that had been digged," "provided sd Thayer paid twenty shillings in money to Capt. Chapin for the town's use;" and a reward was voted to the informer.

March 3, 1712, the town reaffirmed the vote forbidding to carry away ore from the "Town Common," but said, "as for any yt was in Impropriated Lands, they might Repair to the owners." This ore was in the Uxbridge part of the town. The location of the "Iron Works" at "ye Falls of Mumford's River" was due to the power which "ye Falls" afforded, to the abundance of wood for charcoal for smelting, and to the evident expectation of finding ore near at hand. The man who established the works here was Samuel Terry (clerk), of Barrington, Mass. He purchased four hundred and eighty-eight acres of land, with the water privilege at "ye Falls," and "all the mines or minerals" thereto belonging, for £488, equal to £162 in gold, in 1727.

This reference to "mines or minerals" is doubtless to "Mineral Hill, so called," which we find mentioned in deeds of a later date. The next year Terry sold all the lands and a saw-mill and "Iron Works" to Hugh Hall, of Boston, for £700, equal to £206 in gold. As there was no mention of "Iron Works" in his deed of purchase, we must infer he had built them, and had prepared to manufacture iron. Hall sold the property to Gershom Keyes (trader), of Boston, for £920, equal to £212 in gold, in 1732. The next year Keyes sold all the land and the saw-mill and one-half of the "Iron Works" to Jonathan Bacon (gent), of Bedford, for £1600, equal to £368 in gold. The increase in price would indicate that Keys had improved the "Iron Works." He reserved one-half of the works, with all its privileges, and we infer he soon bought back Bacon's half interest, as he afterwards sold all the "Iron Works" and thirty acres of land belonging thereto, and from the fact that Bacon's name does not appear in any subsequent deed of the works. Keyes sold one-half of the "Iron Works" to Joseph Scott (braiser), of Boston, for £300, equal to £62 in gold, in 1735, and one-half to Samuel Grant (upholder), of Boston, in 1736, for £300, equal to £61 in gold. These owners, Grant & Scott, evidently rebuilt the "Iron Works," as they are spoken of in the next deed as "lately built," with three fireplaces and one hammer. They are subsequently called the "Forge or Refinery." Grant sold his interest the same year (1736) to John Merritt (merchant), of Boston, for £808 14*s.* 3*d.*, equal to £168 in gold. In the deed an "ore yard" is mentioned. Soon Merritt bought out Scott's interest for £870, equal to £170 in gold. The deed is dated 1740, but we infer that he had bought it before this, for he leased the property in 1739 to Thomas & Nicholas Baylies (iron-masters), of Uxbridge, for twenty-one years, for £34 lawful money of Great Britain per year. Lawful money was then worth four and one-half times as much as paper. The inventory of the works is given, and it is described as all furnished and suitable to make pig-metal into bar iron. This is the first mention of the product. It was for many years called Baylies' Refinery; but it was still held by Merritt after Baylies' lease expired in 1760. Before 1765 Merritt, now of Providence, leased the "Iron Works" to John Heseltine, of Uxbridge. Merritt held the property until his death. It was sold September 16, 1771, by John Overing, the executor of Mr. Merritt's will, to Col. Ezra Wood, of Upton, for £450, now equal to gold, as specie payment had been resumed. James Fletcher, who married Col. Wood's daughter December 24, 1771, now occupied the property and carried on the "works." The old works were situated about twenty rods below the bridge, on the south side of the river, the water for the power being conveyed in a ditch from the dam, which was about one hundred feet west of the present dam next to the bridge. About this time the works were removed to a building on the south side of the river, close to the present dam, which was built at that time. The new works went by the name of "The Forge." It was also called "Fletcher's Forge," and it had the reputation of early and hard work. In 1794 Col. Wood sold two-thirds of the "Iron Forge and Refinery" to James Fletcher, and one-third to Paul Whitin. Mr. Whitin had married Mr. Fletcher's daughter, Betsy, in 1793.

They continued to manufacture "bar-iron" from scrap-iron until 1812 or 1813. Mr. Whitin did not work in "The Forge." He was a blacksmith, and had a shop on the north side of the river, at the opposite end of the dam from "The Forge." He at first did only the work of an ordinary blacksmith, but he soon determined to engage in the specialty of making hoes and scythes. Hiring a man who understood the art of tempering and other processes in the manufacture, he himself soon became expert in them, and in a few years his business became profitable. During the suspension of trade with England, caused by the embargo of 1807–09, a large demand arose for certain agricultural tools, which had been previously imported from England. One of these, in the manufacture of which Mr. Whitin was one of the first to engage, was the large hoe used by the negroes at the South. He had three forges, a trip-hammer and a grindstone operated by power. Mr. Whitin continued this business until his death, in 1831, in the sixty-fourth year of his age. Many years before his death he engaged in cotton manufacture. His second son (John C., born 1807) worked in the mill from his ninth year, when not in school, at first in the picker-room. When about twelve he was placed in the machine-room of the company, and for the next three years worked on repairs, thereby serving in some measure an apprenticeship to the business which he followed for life.

In the year 1826 Col. Paul Whitin formed a partnership with his two elder sons (Paul, Jr., and John C.), for the manufacture of cotton goods. They built the brick mill now standing on the site of "The Forge," on the south side of the river, having a capacity of fifteen hundred spindles. In this firm Mr. John C. Whitin had the superintendence of the mill and the repair of the machinery. He had early

been impressed with the imperfection of the machinery used, especially of that used in picking the cotton, and in 1830 he directed his efforts to its improvement. With two lathes, not worth more than fifteen dollars each, and with an occasional job done in a neighbor's shop, he, with his two assistants, completed the first picker in about a year. Having so far perfected the picker, he applied for a patent and secured it in 1832. Meanwhile the new firm, which had been formed on the death of Paul Whitin, Sr.,—consisting of Mrs. Paul Whitin, Sr., Paul Whitin, John C. Whitin and Charles P. Whitin,—had purchased the mill of "The Old Northbridge Manufacturing Co."

The picker Mr. John C. Whitin had made had attracted the attention of other manufacturers, and the firm determined to make them for sale, using as a shop the picker-house of the mill just purchased, a building thirty-two by forty feet. Machinery and tools were set up in it and put in operation. They were crude as compared with what are now used; yet with the improved devices of Mr. Whitin, pickers or lappers were produced so superior to those previously in use that from 1834, when the first machine was sold, the demand steadily increased. For many years most of the pickers in use throughout the country were made at these works.

Mr. Whitin was encouraged to build other machinery in the same line. The list has been increased from time to time, so as to include cards, card-grinders, doublers, railway heads, drawing-frames, ring-frames, spoolers, warpers, dressers, looms, &c.; indeed, all the machinery used in the cotton-mill, except roving machinery, mules and slashers, is now made here. To accommodate this rapidly-increasing business, the original shop, the "Picker-house," was enlarged and new buildings were erected. In 1847 "The New Shop" was built, three hundred and six by one hundred and two feet, two stories with basement, on the north side of the river.

This year Mr. James F. Whitin, the youngest son of Colonel Paul Whitin, was admitted to the firm. In 1860 Mr. John C. Whitin purchased the "Holyoke Machine Works" on his own account, which he retained until 1864, giving it much of his time for supervision. During his engagement in Holyoke, Mr. Chas. P. Whitin had the charge of the machine-shop.

In 1864 the firm of P. Whitin & Sons was dissolved and the business of the firm was divided. In this division Mr. John C. Whitin took the manufacturing of machinery, which had in thirty years grown from one picker a month from the old "Picker House," to the production of hundreds of thousands of dollars' worth of a large variety of machinery, from the large shop of 1847 and its adjuncts. On coming into his separate proprietorship, Mr. John C. Whitin erected a new shop parallel with the shop of 1847, north of it, four hundred and seventy-five by seventy feet, three stories, with basement. The increasing business has compelled the erection of a large foundry, which has been twice enlarged; of a large blacksmith shop, and in 1883 of a large shop on the south side of the river, three hundred and eighty-six by eighty-six feet, three stories high, so that now there are in all nearly eleven acres of floor all connected, and devoted to the various departments of the manufacture. In place of two men helping Mr. Whitin, the force employed now is over eight hundred, and the improved machine tools render the work of each man equal to that of three men using the old-time tools.

Mr. Whitin secured patents on the Picker or Lapper in 1833; on the Union Card in 1862. These proved useful to manufacturers and brought considerable profit to the inventor. These inventions bore no comparison, however, in intrinsic value with the many improvements in tools and implements for the working of metals and the simplifying of existing methods. As long as he continued in active management of the shop he took the deepest interest in all improvement in tools. The last to which he gave special attention was the machine for drilling spinning-frame rails, which has proved such a success. It was with him a principle not to seek the protection and profit of a patent for any tool he was to use himself. He felt that the gain in his own work was all the profit he should desire.

In 1870 the business, which had been during the six previous years in the sole proprietorship of Mr. John C. Whitin, was organized into a joint stock corporation, under the name of "The Whitin Machine Works,"—John C. Whitin, President; Josiah Lasell, Treasurer; and Gustavus E. Taft, Superintendent. Mr. Lasell was son-in-law to Mr. Whitin and had been in his employ since 1860.

In 1881 Mr. Taft became agent and Mr. Harvey Ellis superintendent.

On Mr. Whitin's death, April 22, 1882, Mr. Lasell became president and treasurer. January 1, 1886, his son-in-law, G. Marston Whitin, became treasurer. On the death of Mr. Lasell, March 15, 1886, his oldest son, Chester W. Lasell, was made president. On the death of Mr. Taft, June 24, 1888, his oldest son, Cyrus A. Taft, was made agent. During all these changes in officers of the corporation the business has gone on with continued success.

Thus for one hundred and sixty-one years has the manufacture of iron been maintained in this place, first as the manufacture of iron from the ore, then as the manufacture of bar-iron from pig-metal and scrap-iron, then as the manufacture of hoes and scythes, and now for nearly sixty years in the manufacture of cotton machinery, beginning with a single machine and now including almost every kind of cotton machinery. For more than one hundred and sixteen years one family has been in ownership and charge of the works. For nearly one hundred years Mr. Paul Whitin, Sr., and his sons have operated

them, and to their mechanical skill, business capacity and industry and energy has this great development been due.

THE WHITINSVILLE SPINNING RING CO.—In 1872, Charles E. Trowbridge, master mechanic of the Whitinsville Cotton-Mill, and Arthur F. Whitin, who was then employed in the repair shop, perfected and patented special tools for making rings for spinning and twisting. They began the manufacture of rings in 1873, under the firm-name of the "Whitinsville Spinning Ring Co." By their improved methods and tools superior work is secured, and a great saving of labor is effected. One man can produce a perfect ring in two operations, after the forging, while with the old methods the ring passed through several hands, and numerous operations, and the ring would not be of such uniform excellence of finish.

The company began the manufacture of rings for the cotton-mills of Whitinsville and vicinity, but the fame of their superiority quickly spread and arrangements had to be made for increased production. The rings have been sent all over the country, and many have been exported. The business has increased six-fold since 1878, but its growth has been a natural one; no traveling agents have been employed. Arthur F. Whitin is treasurer, Chas. E. Trowbridge is agent, and George E. Trowbridge is superintendent.

Mr. Trowbridge has secured a number of patents on rings and ring-holders, and has recently patented a new process of producing a metallic ring, which effects a great saving of travelers, on new rings, and a much better yarn is produced by the consequent saving of breakage. The company began the manufacture of the double adjustable ring in 1886, and now produces all varieties of rings known to the trade. The work began in the repair-shop of the mill. In 1884, needing more room, it was moved to the "old cotton-mill" building of 1826, on the south side of the stream, and occupied the basement and the first story. In 1887 an enlargement of twenty by sixty-five feet was made, and a new building erected, with a furnace chimney, for hardening and annealing. Twenty-five men are employed.

While the manufacturers in iron at what is now Whitinsville are the oldest in the town and have been the most successful, they have not been the only ones.

At Northbridge Centre a foundry was in operation as early as 1790, situated opposite the Dr. Robinson place, on the west side of the road, some thirty rods south of the present meeting-house. Hollow-ware and sad-irons were cast here. The business was carried on by a man named Lothrop.

The same premises were afterwards occupied by Frebun White for the manufacture of axes, employing two hands besides himself. The axes were carried to Providence and sold to the South. This was from 1812 to 1820. Capt. Amos White made "custom axes" in a shop near his home; "afterwards he manufactured to a considerable extent for the trade boot and shoe edge tools, hammers, &c., &c., until his death, in 1853, a part of the time, in company with Dr. Starkweather, doing the work at Riverdale, on the east side of the river. But that business failing, he removed to his home shop and manufactured for a time alone and then with his son Luke, and last with his son-in-law, Orison W. Brigham.

The stone part of the present cotton-mill at Riverdale was built 1852 by Sylvanus Holbrook for Harvey Waters for the manufacture of scythes by machinery which he had invented. These were the first scythes made by machinery in the world. Mr. Waters also made bayonets by machinery during the war of 1861–65. He continued the business here until 1865.

COTTON MANUFACTURES.—In 1808 "the cotton factory fever" struck this town, and in 1809 Col. Paul Whitin erected a cotton-mill at the upper dam, which was about three hundred feet east of the present dam of the Whitin Machine Works. Col. James Fletcher contributed the water privilege as his share in the enterprise. After the mill was erected Mr. Whitin organized a company, of which he was the principal stock-holder, for the manufacture of cotton goods, styled "The Northbridge Cotton Manufacturing Company." The act of incorporation is later, being dated June 9, 1814. This was the third cotton-mill erected in the Blackstone Valley above Pawtucket, the mill of Almy Brown and the Slaters at Slatersville and the original mill of the present Blackstone Co., at Blackstone (then South Mendon), preceding it by two years. The manufacturing consisted in breaking, carding and spinning. The raw material, having some seeds and much dirt mixed with it, was put out to families to have the seed and dirt removed. The "pickers" had not yet been introduced. Some families took a bale, some half a bale, and others less. For this work four to six cents a pound was paid. The yarn was also put out to families to be woven by hand, the weaver receiving eight cents per yard for weaving No. 16 yarn, which was the grade made at that time. The weaving was done in this manner for six or eight years, after which power looms were introduced. The original Northbridge Mill was of wood and had a capacity of fifteen hundred spindles. Paul Whitin, Jr., then ten years of age, commenced work in this factory on the day of its starting, tending a breaking machine. The mill was operated several years with small returns. It was rented for two years to Gladding & Cady. It was sold in 1824 to William & Thomas Buffom. It was bought in 1829 by Samuel Shove, who operated it until 1831.

In 1815 Col. Whitin, not content with what he was doing in the Northbridge Cotton Manufacturing Company, entered into partnership with Col. James Fletcher, his father-in-law, and Mr. Fletcher's two sons, under the firm-name of Whitin & Fletcher,

and they fitted up the "Old Forge" building, on the south side of the river, for a cotton-mill of three hundred spindle capacity for the manufacture of yarns. This mill was operated until 1826, when Mr. Whitin, who had owned an interest of one-half, now purchased the other half of the Fletchers, and formed a new partnership with his own sons, Paul, Jr., and John C., under the name of P. Whitin & Sons, for the manufacture of cotton goods. Paul Whitin, Jr., was at this time twenty-six years of age. His previous training, save what he had as a boy working in the mill, had been mercantile, and in the business of the new firm he took charge of the mercantile and financial department.

John C., then nineteen years old, had had his training in the mill and in the machine-room of the Northbridge Cotton Company, and was thus prepared for his part in the new firm, the management of the mechanical and manufacturing department. Mr. Paul Whitin, Sr., only invested capital and had no personal care or responsibility in the management of the business. The company erected a new mill of 1,500 spindles on the site of the "Old Forge" mill. This mill was of brick, thirty-two by sixty feet, two stories, with attic room and basement, and was used for its original purpose until 1845.

Soon after the erection of this mill, cotton manufacture was begun in another part of the town and continued for some years. In 1830, Sylvanus Holbrook built a mill on the east side of the river at what is now Riverdale, and fitted it with cotton machinery and began to make sheetings. The next year he built at the "upper village," now Rockdale, "The Cotton Mill" north of the old woolen-mill, and began the manufacture of sheetings and drillings. In 1836 one-third of the looms were put upon print cloths. In 1837, having discontinued the manufacture of satinets, Mr. Holbrook put cotton machinery into the woolen-mill and he made Kentucky jeans until the mill was burned, in 1839 or '40. He rebuilt the mill and filled it with cotton machinery and manufactured cotton goods.

In 1846, the north or "Cotton Mill" was burned. Mr. Holbrook repaired the walls and floors, but never provided it with machinery. In 1851 fire destroyed all the factory buildings but this and a large number of dwellings. This closed all manufacturing in this village until the property was bought by the Messrs. Whitin in 1856. We now return to Whitinsville.

In 1831, Colonel Paul Whitin having died, the firm was re-organized, Mrs. Paul Whitin, Sr., and her sons, Paul, John C. and Charles P. being the partners. Charles P. Whitin had attained his majority the previous year. He had been employed in the office of the old firm. In the new firm Mr. Paul Whitin retained the financial and mercantile departments, Mr. Charles P. Whitin took charge of the cotton manufacturing and Mr. John C. Whitin took charge of the new department, the manufacture of cotton machinery. The old Northbridge Cotton Manufacturing Company's mill was bought and put in operation, and continued in operation until 1861. In 1845 the stone mill was built, with a capacity of seven thousand five hundred spindles.

In 1847 James F. Whitin, the youngest son of Colonel Paul Whitin, was admitted to the firm. He had, for many years, had charge of the books of the concern. In 1849 the firm bought up the capital stock of the Uxbridge Cotton Mill of ten thousand spindle capacity at North Uxbridge. They operated it until the firm was dissolved in 1864. In 1856, having purchased the property in Rockdale, they built the Rockdale Cotton Mill, with a capacity of ten thousand spindles. About 1857, they bought the stone cotton-mill, in East Douglass, of about eight thousand spindle capacity, and operated it until the war.

In 1864, the firm of P. Whitin & Sons, manufacturers of cotton goods and of cotton machinery, was dissolved and the business was divided. The cotton manufacturing, which had increased from one thousand five hundred spindles to thirty thousand, was retained by Mr. Paul Whitin taking the mill in Rockdale and the property at Riverdale, which P. Whitin & Sons had purchased some years before; by Mr. Charles P. Whitin taking the mill in Whitinsville, and Mr. James F. Whitin taking the mill in North Uxbridge. Mr. John C. Whitin took the manufacturing of cotton machinery.

At this time THE PAUL WHITIN MANUFACTURING CO. was formed, with Mr. Paul Whitin as president, and his son, Charles E. Whitin, as treasurer and agent. To the Rockdale Mill this company soon added the mill at Riverdale, putting a brick addition to the stone building which had been occupied by Mr. Harvey Waters for the manufacture of scythes and bayonets, and filling it with cotton machinery, making it a mill of seven thousand spindles in capacity. The company still operates both mills, making sheetings.

In 1884, on the death of Mr. Paul Whitin, Mr. Charles E. Whitin became president, and remains such, and Mr. Harry T. Whitin, his eldest son, became agent.

Mr. Charles P. Whitin enlarged the stone mill at Whitinsville in 1865, making its capacity thirteen thousand six hundred spindles. In 1866 he united his two elder sons, Edward and William H., with him in the business under the name of "The Whitinsville Cotton Mill." The same year he, with his brother, James F. Whitin, built "The Linwood Mill," of fifteen thousand spindle capacity, under the name of "The Whitin Brothers." Since the death of Mr. Charles P. Whitin, the business has been carried on by the sons under the same firm-name, the youngest son, Mr. Arthur F. Whitin, having been added to the firm in 1881.

Thus has this manufacturing interest grown from fifteen hundred spindles in 1810 to nearly fifty thou-

sand spindles, employing nearly eight hundred hands.

WOOLEN MANUFACTURERS.—We have seen that the privilege at what is now Riverdale was first improved by Jas. Nutting before 1764. In July of that year he sold the property to Hezekiah Hall, of Uxbridge. He sold it the same year, October 4th, to Edward Hall, of Uxbridge. We are unable to trace all the changes, but in March, 1780, Ezra Wood sold the land, "together with a grist mill, and saw mill and mill dam, and all the other buildings on the same," to Henry Dunn. The property descended by will to his sons David and Henry. About 1817, they built the "cloth mill," and began the woolen manufactures of the town. They took wool from the farmers and carded it. Then the farmers spun and wove it and carried it back to the mill, where it was pulled, colored and sheared.

The Dunn brothers fitted up a mill which Sylvanus Holbrook hired, but soon left it, having purchased the property at the upper village, now Rockdale. Osmus Taft now hired their mill and operated it in 1822 and '23. Then the Messrs. Dunn took the mill and manufactured satinets. But they becoming embarrassed, Deacon Solomon Nelson, a relative, and a Mr. Benson, from Enfield, Conn., took the business and carried it on. Not being successful, the business came into the hands of Sylvanus Holbrook about 1829, probably by failure to redeem the property from mortgage given to him in 1826. Mr. Holbrook rented the old mill to the younger Dunn for the manufacture of woolen hat bodies.

All these buildings were on the east side of the river. January 16, 1776, John Eddy, from Smithfield, Rhode Island, bought the property at the "upper village," now Rockdale, of Thomas Emerson. Some time before 1814 a dam was built, and a saw and grist-mill erected. May 30, 1814, Mr. Eddy and his son Jesse sold the dam and buildings, and six-tenths of three acres and eighty-two rods of land, one-tenth each to certain grantees: Antipas Earle, Silas Earle and Timothy Earle, of Leicester, Levi Lincoln and Daniel Waldo, of Worcester, and Amasa Roberts, of Northbridge. The other four-tenths were to lie in common with the six-tenths—that is, two-tenths to Jesse Eddy and two-tenths to William Hendricks, all for the formation of a copartnership for the manufacturing of "woolen and cotton goods, or any other business mutually agreed upon." June 14th, the same year, these gentlemen became incorporated as the "Northbridge Cloth Company," and as individuals, conveyed the property to this new company, January 25, 1815, and the company began the manufacture of satinets, and continued it until 1819. March 2d, of this year, the company sold its property at auction. It was purchased by Esek Pitts, of Mendon, gentleman; Samuel Pitts, of Mendon, clothier; John Farnam of Grafton, clothier, and Jesse Eddy, of Northbridge, yeoman, who continued the business. December 17, 1821, John Farnam and Samuel Willis, having become owners of the fourth part bought by Mr. Pitts, deeded to Sylvanus Holbrook, a brother-in-law of Mr. Farnam, three-fourths of the property, Mr. Holbrook to take possession April 1, 1822. October 11, 1822, Jesse Eddy sold his fourth part to Mr. Holbrook, and he now became sole owner. The mill, which had before been called "Eddy's Mill," was now called "Holbrook's." Mr. Holbrook enlarged the old mill, and continued to manufacture satinets. The weaving was all done by hand until 1823, when power-looms were introduced. Broadcloth was also made by Mr. Holbrook, woven by hand on four looms, each two yards wide. Of this article it is said, "it was made of the very best stock, and was really fine and nice." The manufacture of broadcloth was discontinued about 1831. The woolen-mill was a three-set mill. The manufacture of satinets was continued until 1837, after which no woolen goods were manufactured in the town. The textile manufactures of the town were to be of cotton alone.

MANUFACTURES OF LEATHER.—Among the primitive industries of the town was that of the shoemaker. He was soon followed by the tanner and currier, to prepare the material for his art.

Benjamin Basset, John Adams, Benjamin Farrar, Simeon Bassett, Alfred Huse and Daniel Adams were long remembered as of the traveling fraternity of shoemakers, who carried their "kit" from house to house and shod the families for the season. But they were not to continue travelers, nor were they to be content to supply the home demand. As early as 1810 Cheney Taft began the manufacture of the first "sale" work in the town. He made what were called "nigger shoes," in the summer, and went South to sell them in the winter. Others soon followed, and rooms were fitted up in the houses and little shops were built near the homes for the new manufacture. Between 1810 and 1820 eleven individuals were engaged in the business; between 1820 and 1830, twelve (some of these worked alone, others employed one or more hands); between 1830 and 1840, sixteen individuals and four firms; between 1840 and 1850, thirteen individuals and two firms; between 1850 and 1860, six individuals and two firms; between 1860 and 1870, two firms; between 1870 to December, 1877, three firms. But while the individuals carrying on the business diminished, the number of persons engaged in the work did not diminish—the individuals were employed by the firms. The largest number of persons employed was when but one firm was conducting the business, and employing sixty-six hands in the shop and ninety-four outside. Usually more men were working at their homes and in shops near them than at the large shop or factory, taking the cut work and returning the finished product.

Among the principal firms were those of J. & Z. Bachelor, Fuller, Bachelor & Co., Joel Bachelor, Jr., John M. Slocomb, A. & M. L. Taft, Bachelor &

Paul Whitin

Adams, A. Taft & Son, Bachelor & Allard, Allard & Adams, Newell, Daniels & Co., A. & A. B. Keith & Co. This last firm built the large four-story factory near the summit of the hill (still standing) in 1867, and introduced all the improvements in machinery. This firm, being changed to A. B. Keith & Co., continued business until May of 1873. In July of the same year James Tucker & Co. took the factory and continued the business until December, 1877. Of the "factory" Deacon Joel Bachelor, who began the business in 1827 and had continued it for forty years, alone and associated with others, took the charge from the first, and continued in charge as long as it was in operation. Since 1877, the factory has been closed. But few are now working at the business, being employed by firms in other towns. Many have moved away, and many have sought other employments. Thus this industry, which employed so many, in shops and at their homes, for so many years, has almost entirely ceased. The volume of this business was considerable. In 1837 600 pairs of boots and 53,500 pairs of shoes were made, valued at $50,000, and ninety-five persons were engaged in the business.

In 1871, while only one hundred and sixty persons were employed by the one factory, yet by the aid of machinery 17,280 pairs of shoes and 95,520 pairs of boots, valued at $338,480, were made, being more than six times the product of 1837, with less than twice the number of workmen—each one, thanks to machinery, accomplishing more than three times as much as the workman of 1837, and in *one* month all the workmen averaged $51.50 for the month's wages. This business was largely done at the Centre, and that part of the town has suffered severely from its extinction.

This large development of the shoe business naturally encouraged the business of tanning and currying, and quite a number, as Joseph Congdon, Charles & Derby Bigelow, Robinson & Rice, Jere Robinson, Edward Proctor and Moses Walradt pursued the business with success, some as late as 1868. After this time only leather prepared elsewhere was used.

THE GRANITE INDUSTRY.—From the first, granite for home use has been quarried in the town, and as mills and store-houses have been built of stone, the business has been quite large. Mr. Hasen O. Bean was the first to export granite, using the Blackstone Canal in the years 1827 and 1828.

Mr. John Donegan began operations at what has since been known as Plummer's Quarry, in 1854, employing some twenty men, and continued work for two years. At this time Mr. Israel Plummer began to operate the quarry, and continued the business for many years under the name of the "Plummer Granite Company," employing as many as seventy-five men during the season. In 1872 Mr. Henry S. Taft took the business and continued it until 1884, employing about the same number of men, shipping each year some five hundred car-loads of granite of ten tons each, one-fourth of it dressed. Since January, 1884, this quarry has not been worked.

In 1865 Mr. George Blanchard began operations at a quarry one-half mile southwest of Whitinsville, and has continued them to this date, employing from fifteen to forty-five men.

In 1870 Samuel Fowler & Son began operation on the east side of the Blackstone, about one-half mile below Rockdale, at a ledge which had early in the history of the town received the name of "Shining Rocks." The business is still continued by the son, Mr. Samuel Fowler, who employs from fifty to seventy-five men.

In the manufactures of iron, cotton and in work on granite nearly eighteen hundred of the people of the town are employed

The great amount of business done in the town made a bank of discount and a bank for the savings of the workmen very desirable, and

THE WHITINSVILLE NATIONAL BANK was established in 1865, as a bank of deposit and discount, with one hundred thousand dollars capital, with Mr. Paul Whitin president and Mr. H. A. Goodell cashier. Mr. Whitin continued president until his death, in 1884. He was succeeeded by Mr. Charles P. Whitin, who held the office until his death, in 1887, when Mr. James F. Whitin was made president, and still holds the office.

THE WHITINSVILLE SAVINGS BANK was established in 1874, with Mr. John C. Whitin president and Mr. H. A. Goodell treasurer. On Mr. Whitin's death, in 1883, Mr. Charles P. Whitin became president; at his death Mr. James F. Whitin was chosen to the office, which he still fills. November 1, 1888, there were 1238 depositors in this bank, and the total of their deposits was $389,895.77. It is probable that nearly, if not quite, as large deposits are held by citizens of the town in saving banks in other towns.

The growth of the town in population is as follows: 1776, 481; 1790, 569; 1800, 544; 1810, 713; 1820, 905; 1830, 1053; 1840, 1449; 1850, 2230; 1860, 2633; 1865, 2642; 1870, 3774; 1875, 4030; 1880, 4053; 1885, 3786.

CHAPTER LXVIII.

NORTHBRIDGE—(*Continued.*)

INDIVIDUALS.

THE briefest sketch of a town's history should include some notice of the men who have especially contributed to its development. Of these a few will now be noticed.

COLONEL PAUL WHITIN, or *Whiting*, as the name was originally, who laid the more recent foundations of the business which now exists in the village that received his name, "was born in Roxbury, in that

part of the town near Dedham, December 3, 1767. He was the son of Sarah and Nathaniel (Draper) Whiting. His father died when he was a child. His mother was married in 1770 to James Prentice," who lived at what is now known as "Prentice's Corner," in this town. When quite young he was apprenticed to Jesse White, of this town, to learn the blacksmith's trade. His advantages for education were exceedingly limited; his whole attendance at school did not probably exceed six months. Few men have ever entered upon business life with less encouraging prospects. When he closed his apprenticeship his health was poor and continued so for some years. He had no pecuniary means of his own and no relations to whom he could look for aid. But he had what was better—an honest purpose to do according to his ability. He struggled with and overcame difficulties to which most would have yielded. By perseverance and a diligent improvement of those intervals of labor that many young men spend in idleness, he acquired a good knowledge of those branches of study necessary for the successful prosecution of business. He was eminently a self-educated man. A book for aiding him in acquiring a correct use of language was always by him. He was as familiar with this as with the tools of his shop. When he was twenty-eight years of age he was chosen town clerk, and he was chosen to this office thirteen successive years. He was often elected to other town offices. He was regarded as an excellent military officer. He was for several years justice of the peace. He was repeatedly urged to allow himself to be chosen as Representative to the Legislature, but this he invariably refused on the ground that it would require a sacrifice in his business, that he could not then afford to make. To show his habits of industry, it may be proper to mention that it was his custom to redeem, by extra labor, all the time that he spent in military duties or public business.

Colonel Whitin was a lover of good order in society, and could never endure those practices that were an infringement upon it, or that were calculated to present a dangerous example to the young. He attached great importance to the institutions of the Gospel, and was prompt to aid in maintaining them. The Sabbath he regarded as a holy day, and any violations of it he hesitated not to class with other gross immoralities. Though he never made a public profession of religion, he was regarded by those best acquainted with his religious feelings as a true Christian. He died on the 8th of February, 1831, in the sixty-fourth year of his age.

Mr. Whitin married Betsey Fletcher, the daughter of Colonel James Fletcher, of this place, December 3, 1793. She was, during Colonel Whitin's life, a most efficient helper in the work he did for the community and the world. She survived him thirty-seven years, and was, until near the time of her death, a member of the firm of P. Whitin & Sons, and contributed her share to its success. They had ten children, of whom eight lived to years of maturity.

Paul Whitin, Jr., the second son of Colonel Paul and Betsey (Fletcher) Whitin, was born February 5, 1800. His childhood and youth were most of them spent here. He attended the district school for the few months of the year it was kept. When about twelve he spent some time with an uncle in Amsterdam, N. Y., and attended school. He also had two terms at Leicester Academy. From his tenth year when not in school he worked in the cotton-mill and on the farm. At the age of eighteen he went to Boston in the dry-goods store of James Brewer. At twenty-one he formed a partnership with a fellow-clerk, and opened a dry-goods store on Maiden Lane, in New York, under the name of Lee & Whitin. In 1826 he returned home, and, with his father and younger brother, John C. Whitin, formed the firm of P. Whitin & Sons. He took charge of the mercantile department, having the charge of the store, of buying the supplies of the mill and selling the product. For this his training had fitted him. He retained the same department in the firm as reorganized after the death of Paul Whitin, Sr., in 1831, until its dissolution in 1864, a period of thirty-eight years. He conducted it with ability and thoroughness, and thus contributed an important element to the success of the business of the firm. After the firm was dissolved he continued in the manufacture of cotton goods, being president of the Paul Whitin Manufacturing Company, with mills at Rockdale and Riverdale, until his death. Though never robust of body, his regular habits and his attention to the laws of health enabled him to accomplish a large amount of business and to preserve life to a good old age in the full possession of his faculties. He always took a deep interest in town and public affairs; was early called to town offices. He was elected to the Legislature in 1837, and to the Senate in 1849. His perfect integrity and his sound judgment won the confidence of all men, and he was sought for many places of trust, which he filled till very late in life. He was chosen director of the Blackstone Bank at Uxbridge October 6, 1828, and remained a director until he was chosen president October 6, 1845, which office he filled until 1865, when he resigned to become president of the National Bank in Whitinsville. This last office he retained until his death in 1884, thus completing fifty-six years of important connection with these banks. He was a director of the Worcester Mutual Fire Insurance Company from 1838, and attended a meeting only the day before his death; also a director of the Worcester Manufacturers' Mutual from 1860. He was a director in the Providence and Worcester Railroad from its organization until two years before his death, when he resigned his position. He was for many years an active member and trustee of the Worcester County Agricultural and Horticultural

John C. Whitin

Chas. D. Whitin

Societies. He always took a deep interest in all branches of agriculture and especially in horticulture, and did much to advance them in the vicinity. Though called to so many trusts, he neglected none. His fidelity to them was as great as to his own personal concerns. He united with the Congregational Church at the Centre in 1820. He was very active in the formation of the Village Church in Whitinsville, and was always true to his covenant of love to and interest in it, and ever faithful in attendance upon and support of its ordinances. He was a just man who feared God, a man of decided religious convictions and of deep feeling, though of few words as to his personal experiences. By his life and deeds he was ever a power for good in the community. Retiring in usual health on the eve of February 7, 1884, he fell asleep to wake in eternal life.

Mr. Whitin married Sarah R. Chapin, of Uxbridge, August 21, 1822. She was ever a most efficient helper to him in all good. Four children survived him,—Hon. Charles E. Whitin, who continues the business; Mr. Henry Whitin, for many years a commission merchant in New York; Mrs. Sarah Orvis, of Manchester, Vt.; and Miss Anna L. Whitin, at home.

JOHN CRANE WHITIN, the fourth son of Colonel Paul and Betsey (Fletcher) Whitin, was born March 1, 1807. Until he was fifteen years of age he attended the school of the district during the usual summer and winter terms. The rest of each year, after he was nine years old, he was employed in the cotton-mill, working at first in the picker-room. When twelve he was placed in the repair-room, and worked here three years, the only apprenticeship to his life-work. Early in 1822 he went to New York, to be in the dry goods store of his elder brother Paul, Jr., and remained there until the latter part of 1825, when he returned home to form with his father and his brother Paul, Jr., the firm of P. Whitin & Sons, for the manufacture of cotton goods. He took charge of the manufacturing and mechanical departments of the business. He was soon diverted to the manufacture of cotton machinery, to which he devoted himself exclusively, making it his life's work. What he did in this has been spoken of sufficiently in the chapter on "Manufactures."

He was endowed with great energy, was full of enterprise, and yet sufficiently conservative for safety. He had capacity for very hard work; he had, to an eminent degree, common sense in mechanics; he was quick to see what would work in a machine, and could construct it entirely in his mind before he made a pattern. This saved him from the failures so many mechanics have when they come to put their ideas into wood and iron. He never made a pattern which was not used enough to pay for it—a fact which is true of very few men who made thousands, as he did. He was called to various offices of trust—men learned to look on him as one in whom they could confide implicitly. At the time of his death he was a director of the National Bank, Whitinsville, president of the Whitinsville Savings Bank, and director of the Providence and Worcester Railroad. He had been Representative to the General Court, and was Presidential elector in 1876.

Mr. Whitin became a decided Christian in early manhood, and united with the church at Northbridge Centre December 4, 1831. He was one of the original members of the church in Whitinsville, and was chosen one of its deacons in the beginning, in 1834, and retained the office until his death, though for some years relieved from active service. He was superintendent of the Sabbath-school for twenty-five years. He was always in his place of service, and always ready to do his part in maintaining the ordinances of religion. He had a deep and intelligent interest in the varied benevolent causes of the day, which led to steady and large contributions to advance them. He was reticent as to his own feelings, but clear and decided in his views, and always ready to act up to his convictions. His religious vows were as sacred as his business promises.

Mr. Whitin married, May 30, 1831, Miss Catharine H. Leland, of Sutton, by whom he had several children, one of whom, a daughter, the wife of Josiah Lasell, survived him. Mrs. Catharine Whitin died January 31, 1873. She was a woman of remarkable grace and beauty of character. Mr. Whitin married, January 20, 1875, Miss Sarah Elizabeth Pratt, of Hopkinton, who survives him. Their only child, John C., died in infancy.

For years Mr. Whitin had contended with a rheumatic affection which had rendered him liable to sudden death, but, conscious of his readiness for that event, he ever kept busied as his strength allowed in the care of his estate and in works of benefaction. After a brief confinement to the house, the messenger came at midnight, April 22, 1882, without an instant's warning, but did not find him unprepared, for he had lived in the fear and the service of the King who called him.

CHARLES PINCKNEY WHITIN, the fifth son of Colonel Paul and Betsey (Fletcher) Whitin, was born August 6, 1809. His education was obtained in the schools of the town and in the academy at Leicester. It was such that at the age of sixteen he taught school acceptably in the stone school-house near Plummer's Corner. He early worked in the cotton-mill in which his father was interested, and here learned the rudiments of the art of cotton manufacture, in which he afterwards became so proficient. He continued with his father and brothers until his twenty-first year, when he went to Willimantic to fit up and take charge of a cotton-mill. Having been called home by his father's last sickness, he ever after remained in his native town, and became identified with and most active in its growth and prosperity. The same year, 1831, he became an active member of the firm of P.

Whitin & Sons, which had been formed in 1826, and in which he had had an interest from the first, and which was reorganized on the death of Colonel Paul Whitin. He had charge of the cotton manufacturing department, and in this he became an expert and an authority. He superintended the erection of the stone mill in Whitinsville in 1845, the enlargement of the North Uxbridge mill in 1847 and 1848, and the erection of the mill at Rockdale in 1856 and 1857. He had great interest in the improvement of the water-power of the Mumford River, devising and building the reservoirs and dams, which have increased its steadiness and reliability so much.

Whenever his brother, John C. Whitin, who had charge of the machine shop, was absent, the care and responsibility of this devolved upon him, and he had the practical charge of the shop from April, 1860, to January, 1864, while his brother was engaged at Holyoke. When the firm of P. Whitin & Sons was dissolved, January 1, 1864, Mr. Whitin took the cotton-mills in Whitinsville and East Douglas, and carried on the business of cotton manufacture in his own name, having associated his sons with him. In 1865 he built the mill at Linwood, with his brother, James F. Whitin, and in 1881 he purchased the mill in Saundersville.

In all his business life he was eminently a practical man, quick to discern what should be done and prompt to do it. He was thorough and faithful, so that all he did was well done. He was untiring in industry, and though not physically rugged, especially in his younger years, he had great power of endurance. He was also a man of most excellent judgment. In his special department of cotton manufacture, it may be doubted if he had a superior, and his judgment was often sought by others. He was observant and careful of all details, conservative of what had done well in the past, yet quick to see a real improvement and ready to adopt it. He was safely progressive as well as careful, and therefore successful in business.

He was reared in a Christian home, and early yielded to religious influences, and united with the church at Northbridge Centre on his eleventh birthday, August 6, 1820, and for sixty-five years he honored his profession by a consistent Christian youth and manhood. He was identified with the church in Whitinsville from the first, in 1834, and ever gladly did much for its prosperity by personal effort and generous contribution. He was deeply and intelligently interested in the great missionary and benevolent agencies of our day, and was always a steady and liberal contributor to them.

He was thoughtful of the needs and interests of others, and ever ready to minister to their comfort and pleasure in many ways, often doing it in ways unknown to the recipients of his bounty. He loved to be an unknown and unthanked benefactor. He was especially fond of children, and always had a kind word for them, and many of them received the fruits of his interest, not knowing whence they came.

He united to a remarkable degree strength and tenderness, firmness and gentleness, vigor and delicacy. He was widely loved as well as respected. As a citizen he was ever studious of the best interests of the town and the State, and was ever ready to do his part to promote them. But he was never desirous of office, rather shunning publicity of service. He was selectman in 1852, and Representative of the district in 1859. At the time of his decease he was director of the Douglas Axe Company, and president of the Whitinsville National and Savings Bank. His great work was done in this home community, and it was well done. He was confined to the house but a few days, and fell asleep without pain to wake in life, August 29, 1887. A true man and a devout Christian.

Mr. Whitin married Miss Sarah J. Halliday October 21, 1834, who survived him with four sons, three of whom, Edward, William H. and Arthur F., were associated with him in business, and who still continue it. His son Lewis F. is in the commission business in New York. The only daughter, Helen L., married George L. Gibbs, of this place. She died on May 9, 1885.

James Fletcher Whitin, the youngest son of Colonel Paul and Betsey (Fletcher) Whitin, was born December 21, 1814.

His education was received in the schools of the town, and in the academies of Uxbridge, Leicester, Munsen and Amherst. On the completion of his schooling he went into the counting-room of the firm of P. Whitin & Sons. Soon the care of this department came to him, and he retained it until the firm was dissolved, January 1, 1864. In 1847 he became a member of the firm. When the firm was dissolved he took the cotton-mill at North Uxbridge. In 1866 he built, with his brother, Mr. Charles P. Whitin, the mill at Linwood, and has continued in the business of cotton manufacture until the present time.

He married, July 23, 1842, Miss Patience H. Saunders, of Grafton. A son, George M. Whitin, who was for several years the superintendent of the cotton-mill at North Uxbridge, died suddenly January 24, 1883. A son, Albert H., is the only child now living.

Paul Whitin Dudley, the son of Amasa and Ann (Fletcher) Dudley, was born April 3, 1817, in Amsterdam, N. Y. His parents had removed there some years before from Whitinsville, but soon after his birth returned to their old home. Mr. Dudley's childhood was spent in Whitinsville, in Sutton (Manchaug) and in Uxbridge. In these places, at the common schools and the academy at Uxbridge, he obtained his education. He went into his father's store in Uxbridge and learned the business of his life, that of a merchant. He continued with his father, and in the settlement of his business when he became unable to care for it himself, until he was twenty-nine, when he

James A. Mitin

P W Dudley

J. Lasell

came to Whitinsville and took charge of the store of P. Whitin & Sons. He retained this charge until the firm was dissolved in 1864, when he formed a partnership with Mr. Charles P. Whitin, to continue the same business under the firm-name of P. W. Dudley & Co. Mr. Dudley had the active management of the business until his death, July 1, 1872.

Mr. Dudley was a thorough business man, exact and methodical. He was untiring in industry. His perfect integrity and his ability inspired such confidence that he was often called to positions of trust in the town and in the church. He was chairman of the Board of Selectmen in the trying years of 1862, '63, '64 and '65, declining a re-election the next year. He was from the first a director of the National Bank. Individuals often called on him for help in their affairs, and he was most ready to assist. Though the calls outside of his business were so many, nothing was neglected, and his industry and method were such that nothing was half done.

He was a benevolent man. Hating waste, he used his means most generously and conscientiously for every good cause and for individual need. Not content with giving of his means, he gave personal service freely. Many can witness of these deeds of personal service, especially during and after the war, for soldiers and their families. Many of these deeds were known only to himself and those helped, and often not to them. No good cause or deserving person ever appealed to him in vain. He was deeply interested in everything that made for the public welfare, local and national. He was especially active and earnest in the temperance cause. At the time of his death he was president of the Worcester South Temperance Union and a member of the State Temperance Alliance. To this cause he gave freely of time and money.

He was a very conscientious man and never hesitated to obey the voice of duty, though it might be a most unpleasant task, and he did the most trying of duties in such an honest and gentle way as to command the respect of those whom he might have to rebuke or antagonize. All knew and felt that there was not a trace of malice or harshness in the man.

He was a true and faithful Christian. He identified himself with the Village Congregational Church when he came to Whitinsville in 1846, and was always at his post, and ever ready to do his full share and to make up, as far as possible, the lack of service by others. He was chosen deacon January 11, 1866, and continued in the office until his death. He was also superintendent of the Sabbath school for several years. In this office he gave due expression to his love for and great interest in children. Kind words and deeds for them were constant.

October 19, 1842, Mr. Dudley married Miss Sarah A. Tobey, of Worcester. She, with four children—three sons and a daughter—survives him. He was preparing to attend the Sabbath evening service when he was stricken by paralysis. He remained unconscious until his death, the next morning. Though cut down in mid-life, he was not called until he had done a good work for the community, for his family and for his Master.

Josiah Lasell, the son of Chester and Nancy (Manning) Lasell, was born in Schoharie, N. Y., August 6, 1825. His parents were of Pilgrim extraction, and held and practiced the faith of their fathers in its finest and sturdiest qualities. Here and amid such home influences Mr. Lasell spent his childhood. He fitted for college in his native place, and entered Williams College, where his brother Edward was professor of chemistry, in 1840. He studied law for a time at Schoharie; but his instincts and tastes for teaching drew him from the law as a profession. Yet, without doubt, those months spent in this study helped to prepare him for his business career, which was to be his larger life-work. He first taught in the boys' school of Professor Piquet in Brooklyn, N. Y.; then for several years in Spingler Institute, New York City, of which Jacob Abbott was the principal. In 1852 he and his brother-in-law, Professor G. W. Briggs, joined his brother, Professor Edward Lasell, of Williams College, who had projected and secured the incorporation of Lasell Seminary in Auburndale, in this State, in the enterprise of establishing a seminary of high grade for young ladies. A few months after they began the work Professor Lasell, the founder, died, and Mr. Josiah Lasell became joint principal with Professor Briggs, and continued in this work until 1860. June 5, 1855, he married Jane, the only daughter of Mr. John C. Whitin, of Whitinsville.

In 1860 Mr. Whitin called him to his assistance in the conduct of the machine works he had just purchased at Holyoke, in this State. He remained in Holyoke until January, 1864, when Mr. Whitin, having sold the works, and having become sole proprietor of the Whitin Machine Works, Mr. Lasell came to Whitinsville to have the care of the books and accounts of the concern, and to render Mr. Whitin such assistance as he might need. When the Whitin Machine Works was incorporated in 1870, Mr. Lasell was made its treasurer, and he shared in the labors of the president, Mr. Whitin, and as the latter was obliged to lay aside his work more and more, it devolved more and more on the treasurer, who relieved him almost entirely of the burden of the details of it.

At the death of Mr. Whitin, in 1882, Mr. Lasell was made president and he also retained the treasurership until January, 1886. It was largely by his inspiration and under his direction that the recent great enlargement of the works has been made.

As a teacher Mr. Lasell had rare qualities and great success. He had a true teacher's genius to awaken enthusiasm and to impart instruction to the aroused pupil. Many pupils will say, as one did to

the writer many years ago, "No teacher ever did so much for me as did Mr. Josiah Lasell." And his work as a teacher is fittingly commemorated in the name of the institution, with whose early history and success he had such intimate connection.

As a business man he developed large capacity. Though not educated to business, his well-trained mind grappled successfully with its problems. He took wide and far-reaching views of the varied forces affecting business interests, and knew and could state his reasons for his opinions. He believed in large developments yet before us, and formed his plans to provide for them. He was, too, the master of details, and had unusual capacity of accomplishing a great deal of work with seemingly slight effort. He was also able to see and appreciate the difficult and intricate mechanical questions connected with machinery.

He was called to varied offices of trust, as director of the Providence & Worcester and of the Rome & Watertown Railroads, director of the Whitinsville National and Savings Banks. And very many in a large circle of kindred and friends naturally looked to him for counsel, and never failed to find in his judicious advice the help they sought.

As a friend, hosts can testify how true, kind, considerate and ready with word and deed of help he was. Incapable of malice, he cherished the most charitable and kindly views even of those from whom he might differ or who had wronged him. Severe words were very rarely, if ever, spoken of any. Pleasant and cheery ones came easily from his lips and carried comfort to many hearts. As a citizen he took deep interest in all that concerned the country and the State and the community, and sought so to discharge his duties as should best help the public weal.

In early life he cherished the Christian hope, and made public profession of his allegiance to Christ. At Holyoke he was superintendent of the Sabbath-school and gave efficient help in the music of the worship. In Whitinsville he was a Sabbath-school teacher until he took charge of the choir, which he led for several years. His interest in the musical service of the house of God continued until the last, and the last evening of his life he sang with his wonted fervor in a praise service, and in a few hours passed into the life of praise, March 15, 1886, much mourned and much missed as a man, citizen and friend.

He left a widow and two sons, Chester W. and Josiah M., who continue in the business of their father, and two daughters, Catharine W. and Jennie L., the former of whom is the wife of G. Marston Whitin, the treasurer of the Whitin Machine Works.

GUSTAVUS E. TAFT was the son of Cyrus and Lucinda Morse Taft. He was born in Peacham, Vt., August 29, 1829, to which place his father had moved rom this town a few years before. When he was ten years of age his parents returned to Whitinsville. He received his education in the schools of the town and in the academy at Uxbridge. At seventeen he entered the machine-shop of P. Whitin & Sons as an apprentice. Here he developed his mechanical powers, from which so much of his success in life came. He continued in their employ until 1860; when, Mr. John C. Whitin having purchased the Holyoke Machine Shop, Mr. Taft went to Holyoke to be superintendent of the works. He remained in this position until Mr. Whitin sold his interest in Holyoke, and took the machine shop in Whitinsville, on the dissolution of the firm of P. Whitin & Sons, January 1, 1864. Mr. Taft then became superintendent of the shop where he learned his trade, and he was identified with all its enlargements and the great growth of the business. To this great development he contributed much by his eminent abilities as an organizer of labor and a manager of men, and by his great mechanical skill exercised in the improvements in tools, greatly increasing their efficiency, and by his inventive skill. He made important improvements in cotton machinery, in cards, in spinning-frames and looms, many of which were very valuable. For some of these he obtained patents. His most valuable patent was for the "Whitin Gravity Spindle," the joint invention of himself and Mr. Henry Woodmancy. It was obtained July 18, 1882. A patent was also obtained for it in England, France, Germany and Holland, and it has been made and sold abroad and in the United States in great numbers. It is an important application of a new principle to the driving of the spindle, and greatly increases its producing capacity.

In 1881, Mr. Taft was made agent of the corporation, and remained such in the active management of the business until his death.

He ever had a deep interest in local and national affairs, though so engrossed in business that he could give but little time to any public affairs. But he was always ready to do his full share in contributing to any measures that would advance the interest of the community. In all personal relations he was eminently friendly; ever ready to grant a favor, and in such a manner that one seeking it was made to feel that it gave him real pleasure to do it. And if he was constrained to refuse a request, it was so kindly done as to make manifest his regret that he must refuse. He remembered and helped the needy in an unostentatious way, hiding the hand whence the benefaction came. He was a firm believer in the protection of American industries, as best for workman and employer.

November 8, 1855, he married Miss Ruth L. Lamb, of Clinton, Me., who with six children survives him. His three sons are engaged in the same shop where his life-work was done. He had for years contended with a fatal disease, suffering much and knowing that he was liable to sudden death. But he kept at his work with great cheerfulness until very near the end, which came after a short confinement to the house—

Gustavus E Tapp

came in an instant—June 23, 1888. A strong man, of large ability in mechanics and in business, of unimpeachable integrity, of most friendly spirit, of winning ways and kind action.[1]

CHAPTER LXIX.

NORTHBOROUGH.

BY JOSEPH HENRY ALLEN.

Territory, 10,150 *acres*; *population*, *in* 1885, 1853.

NORTHBOROUGH is the youngest in age, the third in size, and the least in population, of the four borough towns (so-called) formerly included in the town of Marlborough.[2] It lies on the old county road between Boston and Worcester, thirty-three miles from the former, ten from the latter; the track of the first emigration to Connecticut, in 1635, ran through its southeastern corner. Its shape is an irregular polygon, of six or seven sides, with a broad angle thrust out to the southeast; its dimensions are from four to five miles each way. The larger part of it is valley, lying rather lower than either of the surrounding towns. The Assabet River (here a slender stream) rising some miles to the south, flows about three miles of its course, northeastwardly, through the town, and is joined by four brooks,—Stirrup Brook, which is the outlet of Great and Little Chauncy Ponds, making here a course of nearly two miles; Hop Brook (once fringed with wild hops), which courses the southwest border of the town; Cold Harbor Brook, which flows about three miles from Straw Hollow and Rocky Pond, in the edge of Boylston, and is then joined by Howard Brook, a shorter stream (where possibly a few trout may still survive), which overflows a broad meadow a little farther north. The Assabet, then flowing with considerable force, furnishes large water-power at Hudson, Rockbottom and Maynard (formerly Assabet), joining the Sudbury to form the Concord, and so to the Merrimack, near Lowell.

TOPOGRAPHY.—These water-courses have traced the lines of population and business enterprise. The first white settler was John Brigham, who, in 1672, occupied "Licor-meadow Plain," which we understand to be Cold Harbor Brook Meadow, just north of what went as Liquor Hill till 1834, when it took the gentler name of Assabet. Saw-mills and grist-mills were early built on all these streams. A fulling-mill was set up by Samuel Wood (who removed from Sudbury about 1750) near where the main road is crossed by the Assabet; bog-iron was found and worked, and potash was made hard by. A tan-yard was established by Isaac Davis in 1781, near the Assabet, where it makes the boundary from Westborough; two miles farther down its course a cotton factory was built, in 1814, during the dearth and poverty of the War of 1812; and, a little farther still, the "new factory" was built, of brick, by the brothers Davis in 1832. In the south of the town, the Assabet Valley widens into "the Plain," quite flat for perhaps a mile and a half in length by half as much in width. Farther north the surface of the town is very diversified, with stony and rugged hills on the northern and western borders.

The chief elevations are Mount Assabet (before mentioned), which rises about one hundred and fifty feet from the valley, near the geographical centre, a pleasant rounded and wooded eminence; Edmond, Sulphur and Ghost Hills are bolder elevations towards the north; Tomlin Hill, more low and flat, in the southwest; Bartlett Hill, a long and handsome oval, near the Boylston line; and Ball Hill, broad and stony, over which the town road climbs heavily towards the northwest. In general, the forests are well preserved on the higher ground, and give the town the advantage of a landscape much admired for its picturesque beauty. Solomon Pond (so named for an Indian once drowned there), of twenty-six acres, lies prettily among high sloping banks of pine, toward the northeast; and Little Chauncy, of sixty-five acres, in the low-lying meadows of the southeast.

The rocks of the northerly hills are mostly gneiss, in strata lying at a dip of 70° to 80°; near their foot are iron and lime, not worked.[3] At the west is a large amount of micaceous slate, or schist, containing (it is thought) much iron. Hills and pastures are plentifully strewn with boulders, some of them weighing a great many tons. Most of these are of gneiss, and split favorably for building uses. In some parts large garnets are common: I have found one over an inch in diameter, and one of half that size, very clear and perfect. Quartz crystal is sometimes found in very fine specimens. Some of the

[1] The writer of this history gladly acknowledges his great obligations to the researches of Rev. L. F. Clark and Mr. Charles O. Bachelor, in the early history of Northbridge. He has made free use of the materials they gathered.

[2] In the year 1656, on petition of the inhabitants of Sudbury (founded in 1638), the colonial Legislature of Massachusetts Bay made to that town a grant of about forty-five square miles of territory to the westward, known as *Whipsuppenicke*, including a reservation of six thousand acres held by the Indians of *Ognonikongquamesit*. (These names are also written *Whipsufferadge* and *Ockoocangansett:* the reader takes his choice.) This territory—of which the central point is about thirty miles due west from Boston—was, in 1660, incorporated as a town, under the name Marlborough. In 1717 the western portion, till then known as Chauncy (a grant of land near Chauncy Pond having been made to President Chauncy, of Harvard College), was separately incorporated as Westborough. Ten years later the eastern portion was further divided, its southern part becoming Southborough; and the North Parish of Westborough, organized in 1744 as a "precinct," was in 1766 incorporated as the "district" of Northborough, becoming a town, with right of representation in the Legislature, under a general law passed in 1775. Of the four borough towns, Marlborough belongs to Middlesex County, the other three to Worcester.

[3] Lime was quarried and burned here about a hundred years ago.

northerly hills are effectually paved with ledges and boulders.[1] The general quality of the soil is good, though too sandy in the south; with more gravel also, and less clay, than some more productive soils. Apples are a good crop, and peaches were, fifty years ago; but pears and quinces have never flourished so well. There are clay-beds, especially one of great value, close to the eastern boundary, where bricks of rarely excellent quality are made, light red and very hard; these bricks were selected, among other samples, as the best in building the great Cochituate Aqueduct.

This sketch of the geology of the town would not be complete without a notice of the discovery, made November 17, 1884, of a part of the skeleton of a mastodon, on the farm of William U. Maynard, near the Shrewsbury line. The bones are those of a young animal, which had floundered in a peat-bog and there perished. They were found resting on a bed of blue clay, seven feet below the surface of the ground—the peat being four or five feet in thickness. Most of them are deposited in the museum of the Worcester Society of Natural History; the teeth, by which the species was identified, are in the Peabody Museum, Cambridge. This discovery is the single proof of the existence of that animal east of the valley of the Hudson.[2]

TOWN HISTORY.—The northerly portion of Westborough had been recognized as a separate "precinct," or parish, with church and minister of its own (the Rev. John Martyn) since 1745.[3] But its independent corporate life began with the year 1766, when a summons was issued to the inhabitants of the Second Precinct—

To conveain at the meeting House in 2d Precinct on Monday, the thertyeth Day of this instant, January, at one of the clock in the afternoon, then and there . . . to see if the Precinct will peticon to the Grate and Jenearal Cort to be set of a Destrict or not . . . and see if the Precinct will chuse a Commity or order the Precinct Committee to Preambulate the Line between the first and second Presencts of Westborough . . . and employ a Servair (surveyor) to Run the Line and set up Bounds where they cant be founde [and to see] upon what tairms they would be set of upon; and it was voted that we should be set of on the same tairms that South Brimfield was, and to have our part of the town stock of amonition and wates & measeurs & ministry lands, and also our proportion of the money that is granted or assest.

In accordance with these votes, on the 24th of January, 1766, the precinct was

erected into a District by the name of Northborough; and [it was ordained] that the same District be & hereby is invested with all the priviledges, powers & immunities the Towns in this Province by Law do or may enjoy, that of sending a Representative to the General Assembly excepted [this right being exercised till 1775, as a part of Westborough]; their proportion of all monies, arms & ammenition, weights and measures belonging to said town the inhabitants of said District shall have and enjoy, a proportion thereof equal to the proportion they paid of these charges of said Town according the last town tax;

all of which appears to have been amicably arranged. The first corporate act of the district thus created is copied here in full, as a fair specimen of the process of organization in these small political communities, then (it will be noticed) under Provincial rule. It is a record of the meeting held March 4, 1766:—

This town covined according to a warriant bearing Date the tenth of February Last Issued oute by Francis Whippele, Esqr., one of his Majesty's Justics of y^e peace appointed by the Grate and General Court to issue Dis^t Warrant & then proceeded and acted on y^e articels folloing: 1. Voted & chose Bezaleel Eager Moderator; 2^dly Voted & chose Timothy Fay Dis. Clerk; 3^dly Voted & chose for Selectmen y^e ensuing yeare, Josiah Rice, Jacob Rice, Bez^a Eager, Timothy Fay, Jesse Brigham; 4^thly Voted for Assessors for y^e yeare ensuing, Jacob Rice, Timothy Fay, Levy Brigham; 5^thly Voted & chose for a Towne Treasurer Jacob Rice; 6^thly Voted & chose for a Constibele y^e ensuing yeare William Badcock; 7^thly Voted & chose Wardens ensuing yeare, Josiah Bowker & John Carruth; 8^thly Voted for Sirvayors of Highways ensu^in yeare, Samuel Gamwell jun., Jon^a Bruce, Samuel Maynard, Timothy Brigham; 9^thly Voted & chose for Tithing men y^e ensuin yeare, John Ball, Eliphalet Warren; 10^thly Voted & chose for Hogreeves y^e ensuing yeare, Henery Gaschet; 11^thly Voted & chose for deare reeve for y^e ensuing yeare, Samuel Gamwell; 12^thly Voted & chose for Surveyor for Claboards & Shingles ensuing yeare, Stephen Jenney; 13^thly Voted and chose John Martyn for Sealer of Leather; 14^thly Voted & chose Henery Gaschet and Jorge Oak Fence Vewers; 15^thly Voted & chose Jesse Maynard Survayor of Whete; 16^thly it was put to vote to see if Town would let there Swine go at large y^e ensuing Yeare, it past in y^e affirmmitive; 17^thly it was put to vote to see if y^e town would chuse y^e Selectmen to Joyn with y^e Town of Westborough as a Committee to divide y^e Town Stock according to the act of Court, it past in the affirmmitive; 18^thly it was put to vote to see if the town would ajourn there meeting to Lew^t John Martyn's for fifteen minits; it past in y^e affirmmitive; then upon y^e ajournment voted that they would reconsider y^e vote of chusing Stephen Ball warden; 19^thly voted and chose John Carruth warden, and all y^e above said officers have Been sworn to their Respective Officirs. Then Dissolved said Meeting. *Bezaleel Eager*, Moderator. Attest, *Timothy Fay*, Clark.

The first act of civil administration (April 1st) appears to have been to build a pound for stray cattle, of stone, twenty-five feet square, with walls five feet high and two and a half feet thick, topped with timber; but this was found too costly, and it was voted (June 18th) "to build the same of timber." A proposal to buy a "buering cloth" was negatived; but provision was made to employ a reading and writing schoolmaster, with committee to provide schooling; also to raise the school-money, and to provide a jury-list. The sum of £3 16*s.* was afterwards (November 22d) granted to pay the schoolmaster's board for seventeen weeks. The rate of a day's wages was fixed at the same date, for men working out their own road-tax, at three shillings for the summer and two shil-

[1] Good old Silas Bailey, who, at past eighty, had just done his day's work with a bush-scythe, told me that when he bought his farm, near the north border, a neighbor more experienced, viewing it, feared at first that it might not have stones enough; but, being told there were "enough to fence it all into acre lots," was well satisfied with the purchase.

[2] An Indian skull was found during the excavation for these remains, but "cannot have been long in the peat," and "it is evident that it has no association with the mastodon" ("Nineteenth Report of the Curator of the Peabody Museum," where the skull now is, p. 493). A pamphlet on the discovery was printed by Franklin P. Rice for the "Society of Antiquity," Worcester; a copy is in the Public Library of Northborough.

[3] Mr. Martyn was ordained May 21, 1746. "Although the ceremonies of the ordination took place in the meeting-house, yet it appears from the town records that it was in a very unfinished state, having neither pulpit, galleries, glass windows, nor even permanent floors. It was not till June, in the following year, that a vote could be obtained 'to glaze the meeting-house and lay the floors,' and not till the next autumn that the pulpit and gallery-stairs were built."

lings for the autumn months. The highway rate to repair roads was sixty pounds. For a year's care of the meeting-house was paid 13*s.* 4*d.*; for the day's work of an assessor, eight shillings; for expenses of a delegate to the General Court, £1 1*s.* 4*d.*

The following year (July 29, 1767) the district voted—

to join with the Church in appointing Thursday, August 13, as a day of fasting and prayer to Almighty God to sanctify His Holy hand in taking away our Pastor (Rev. John Martyn) by Death, and for direction in resettling the Gospel among us again; and £60 lawful money (are) granted for preaching the Gospel among us.[1]

Mr. Martyn had been settled as pastor of the Second Parish May 21, 1746. He was a son of Captain Edward Martyn, of Boston, where he spent his early life under the care of an excellent mother, who had been left a widow in easy circumstances some time previous to young Mr. Martyn's entering college. He graduated at Harvard University in 1724. For several years after he left college he devoted his attention to secular pursuits, and was for some time an inhabitant of Harvard, in this county. At the age of forty he directed his attention to theological pursuits, and became an able, faithful and useful minister. He possessed, in a large measure, the confidence and affections of his flock, was honored in his life and deeply lamented at his death. His age was a little over sixty.

September 21, 1767, the district "concur with the church in giving Mr. Peter Whitney a call to settle as minister and pastor of the church and congregation in Northborough." The sum of one hundred and sixty pounds was voted "for settlement," to be paid in two installments, at the beginning and end of the first year, and an annual salary was granted of sixty pounds to be paid "in Spanish milled dollars, 6*s.* each, or in the several species of coined gold and silver," as enumerated. In accepting this proposal Mr. Whitney writes:

I am not insensible of the present scarcity of our Medium, and therefore I object nothing against your proposed annual support for the first few years, but yet can not suppose it sufficient for my abiding support, and therefore if you are pleased to add to your offered salary the sum of £6 13*s.* 4*d.* lawful money, to take place the fifth year from my settling among you, amounting to £66 13*s.* forepence as a settled yearly support, I do then fully accept your invitation, and stand ready to be consecrated to your service (God permitting), when you shall think proper. Gentlemen, I hope (speaking in my fear of God) I have no disposition to build myself on your Ruins. I desire neither to be cumbered with abounding riches, nor to be straitened in my worldly circumstances; may I but have what will support me in my office to the honor of Religion.

This manly and straightforward appeal was acceded to; and it is later recorded, "N. B. what was payed to the Rev. Mr. Whitney before he was ordained is £25 18*s.* 8*d.*" December, 1779, owing to the depreciation of the Continental currency, the salary was raised to £2933 6*s.* 8*d.*; but was the next year (December 4, 1780) restored to the original amount, payable in coin, with the addition of twenty cords of wood; and the sum of £13 6*s.* 8*d.* was afterwards (December 27, 1784) voted to cover arrears of loss by depreciation.

Mr. Whitney (son of Rev. Aaron Whitney, the first minister of Petersham) was born September 17, 1744; graduated at Harvard University in 1762; and was settled as minister of Northborough November 4, 1767. "Distinguished for the urbanity of his manners, easy and familiar in his intercourse with his people, hospitable to strangers, and always ready to give a hearty welcome to his numerous friends; punctual to his engagements, observing an exact method in the distribution of his time, having a time for everything and doing everything in its time, without hurry or confusion; conscientious in the discharge of his duties as a Christian minister; catholic in his principles and in his conduct, always taking interest in whatever concerned the prosperity of the town and the interests of religion, he was for many years the happy minister of a kind and affectionate people. At length, having continued in the work of the ministry almost half a century, he suddenly departed this life February 29, 1816, in the seventy-second year of his life and the forty-ninth of his useful ministry."[2] He was an eager and outspoken advocate of the patriotic efforts of '75 and '76, which his father as strongly opposed, and was the author of a "History of Worcester County," still held in much esteem. Of his ten children, the most widely known was Rev. Peter Whitney, of Quincy (1800–43, born 1770).

March 1, 1773, the district takes into consideration a pamphlet circulated from Boston, "in which the rights of this Province are stated, and also a list of grievances and infringements of those rights made by Administration at home;" and it is resolved—

that the rights of this people are very justly stated in said pamphlet, and that the grievances and infringements therein pointed out are real and not imagenary ones, as too many indeavour to insinuate; [also] that it is the indispensable duty of all men, and all bodies of men, to unite and streanously to oppose by all lawful ways and means such unjust and unrighteous incroachments, made or attempted to be made upon their Just Rights, and that it is our duty earnestly to indeavour to hand those rights down inviolate to our posterity as they were handed down to us by our worthy ancestors; and that the thanks of this District be given to the Town of Boston for their friendly, serviceable and necessary intelligence, and that they be desired to keep up their watch and guard against all such unjust invaders and incroachers for the future.

In fulfillment of this resolve, we find that the next year (November 28, 1774) a hundred weight of powder and three hundred weight of lead, with two hundred and forty flints, are voted for the general defence. Soon after (January 9, 1775) the district resolves to join in sending delegates to the Provincial Congress, "whenever met or wherever met;" and on the 10th of April (a few days before the battles of Lexington and Concord) provision is made "to pay fifty minute-men one shilling each for each half-day they shall meet to learn the military art, for sixteen

[1] Provision for the support of public worship was made by the State Constitution a town charge until 1833.

[2] Allen's "Topographical and Historical sketches of the Town of Northborough," p. 80.

half-days, beginning March 27." For these objects forty pounds are appropriated, and fifteen pounds appear as "raised and paid." The fifty minute-men, as soon as the tidings came from Lexington, before one o'clock of April 19th, "were directed, without a moment's delay, to put themselves in readiness to march; and in three or four hours from the time when the news arrived they had taken leave of their families and were paraded in the yard of Captain Samuel Wood's house, whence (the Rev. Mr. Whitney having in a fervent prayer commended them to the protection of the God of armies) they immediately set out on their march for the field of danger and blood." Two months later (June 17th) they took part in the battle of Bunker Hill.[1]

On the 22d of May, 1775, the district warrant still runs in the old way, "In his Majesty's name." The next day, May 23d, we find a summons, "Greeting in the name of the Government and the People of the Massachusetts Bay." But for an interval of some months that followed there is a sort of interregnum; either the warrant issues from the county authorities at Worcester, or the town appears to be acting by its proper sovereignty. The official title "town" first appears in the constable's warrant of June 6, 1775, when a meeting is called "to appoint and chuse a person, if they see fit when meet, *to represent the Town* in the Grate and General Court or Assembly,[2] to be convened, held and kept for the service of the Colony at the meeting-house in Watertown, on Wednesday, the 19th day of July next, it being in observance of a Resolve of the Honorable Continental Congress, directing and advising the same." This warrant, and the first exercise of complete town sovereignty in the appointment of its own Representative, mark the date of coming to its full majority. There follow upon the records, from time to time, a few items which we copy, as illustrating the way these little commonwealths toiled through the dreary and disastrous period till the return of peace in 1783 :—

June 3, 1776. Voted that it is the mind of this Town to be independent of Great Britain, in case the Continental Congress think proper, and that we are ready with our lives & fortunes if, in Providence, called to defend the same.

July 8. Voted to assist in raising the men that are sent for.

May 22, 1777. Appointed a Committee of three persons chosen for to prevent monopoly and oppression (apparently the first symptom of stringency arising from the debasement of Continental money).

June 23. Chose Gillam Bass to take care & lay before the Court the evidence which may be produced against the persons in Northborough who are looked upon by said Town as inimical to this and the United States of America, agreeably to a late directing Act. [The suspected persons are John Taylor, Thomas Billings, Silvanus Billings (who made contrite acknowledgment[3] & was received back into amity by the Town, May 17, 1781), James Eager, John Eager and Widow Miriam Eager. The estates of four of these were confiscated at the close of the war.]

Jan. 5, 7, 1778. Voted and accepted the Articles of Confederation of the Congress of the United States of America.

April 2. Appointed a Committee to collect clothing for the Continental soldiers (just after the terrible winter at Valley Forge).

April 13. It was voted "to see if they would accept of the form of goverument [of Massachusetts] as it was settled by the Convention of this State; and a unanimous vote passed in the negative."

June 15. It is voted ("according to the second claws of Warrant") to determine "an everidge of the whole of the publick cost that they have been at, ocationed by the present war, since the 19th of April, 1775, untill this time, and all necessary cost that may in the future arise on account of said war, each one to pay according to his estate, as in other taxes." The total amount was found to be:

	£	s.	d.
Up to June 29, 1778	1474	14	1
Future costs (estimated)	705		
Interest	42		
Clothing	140		
Additional, to Sept. 28	222	13	4
Additional, March 8, 1779	110		
	2694	7	5

May 17, 1779. It is resolved "that a [State] Constitution, or form of Government, [shall be] made as soon as may be;" and the Town Representative is instructed "to vote for the calling of a State Convention for the sole purpose of forming a Constitution."

Sept. 13. Under the pressure of financial distress, the common revolutionary expedient is adopted, of fixing a "maximum," or scale of highest prices to be asked for any commodity: in this scale we find Barley at £4 10 a bushel; Milk at 2 sh. a quart; labor of making a pair of shoes, 48 shillings; other in proportion. As a further indication of the range of prices, we find soon after (Oct. 30, 1780) a grant of "£6000 to purchase beef for the army," and (May 17, 1781) "the Town granted the sum of £3300 to pay for three horses" for the public service. Again (March 6, 1780) there is an appropriation of £4000 to be equally divided for the building of a School-house for each of the four "Squadrons."

May 18, 1780. Report of the State Constitution, which is accepted, with the recommendation of four Amendments; but if these cannot be had, "will accept the Constitution as it stands." [The first of these proposed Amendments is that the Governor must belong to some Protestant religious connection; the others are chiefly certain legal formalities for the ensuring of private justice.]

July 13. Voted & granted the sum of £10,000 to pay seventeen men hired into the service, nine for the term of six months, & eight for the term of three months.

Dec. 28. The town, taking into consideration the hardships undergone by those who had entered into the service of their country, and especially the losses they had sustained by being paid in a depreciated currency, generously voted to raise their quota of men, and to pay and clothe them at its own expense, allowing them 40 shillings each per month, in hard money, and £21 per year, also in hard money, in addition to their clothes. Six men were called for the following summer, & the Town granted £122 5s. in hard money ($407.50) to pay the same; at the same time they were required to purchase for the use of the army 3518 lbs. of beef, for which the Town granted £77 in hard money ($256.66). (Previous to June, 1778, it appears that this town had expended in money and service towards carrying on the war, £1474. 14. 1,—in a Depreciated currency, probably, the precise value of which it is difficult now to determine.)

"After the close of the war the embarrassments arising from the want of a circulating medium, when almost all were deeply involved in debt, caused much uneasiness, and led the people to devise measures for their removal." August 7, 1776, Isaac Davis was chosen as a delegate to attend a county convention at Leicester, on the 15th, to whom the following, among other instructions, were given by a committee appointed by the town. The delegate was

[1] In this company served as lieutenant "Capt." Timothy Brigham, who had been present, as one of eight volunteers from this precinct, at the attack on Ticonderoga, under Gen. Abercrombie, in 1758. I remember visiting him with my father, when near his death, at the age of 93.

[2] The following are the names of the town Representatives for nearly fifty years following: 1775–77, Levi Brigham; 1778, '82, '85, John Ball; 1779, '80, Paul Newton; 1783, Seth Rice; 1787–98 (7 years), Isaac Davis; 1800, '01, Nahum Fay; 1802–26 (18 years), James Keyes.

[3] He "owned that he was unfriendly in not bringing Caleb Green to justice, who was a notorious villin and an enemy to his country."

to use his influence "that the Convention petition his Excellency, the Governor & Council, to call the General Court together in the month of October next at fartherest; and that the Convention present a humble and decent petition to the General Court to set up & establish a Mint in the Commonwealth, &c." Complaints were also made of the salaries of the civil list being so high, and of various other grievances under which the people labored. The delegate was also to use his influence "that the whole order of Lawyers be annihilated, for we conceive them not only to be building themselves upon the ruins of the distressed, but said order has increased, & is daily increasing, far beyond any other set or order of men among us, in numbers and affluence; and we apprehend they may become ere long somewhat dangerous to the rights & liberties of the people." "There was nothing, however, of the spirit of rebellion or insubordination in the resolutions that were passed at this meeting, or in the conduct which followed; and though it appears from the representations of all, that the people generally were reduced to the greatest straits, yet only three or four individuals were found willing to join in the rebellion [Shays'] of that year, and to seek redress by measures of violence."[1]

It is likely that this town had its fair share of the suffering of that dismal "critical period of American history" between the close of the Revolutionary War and the adopting of the United States Constitution. But of this there is less evidence on the records than we might expect, excepting those troubles from expansion of the currency hinted above. The problem of pauperism, however, now comes up; and for the first time (November 9, 1789) we hear of a proposal "to see if the Town would vendue the poor off to the lowest bidder." This was negatived, probably from compunction at the novelty of it. But six months later (May 10, 1790) "the same passed in the affirmative, and that there be a notification put up and the names of the poor put in, that are to be vendued,"—that is, boarded at the town's expense, where they could be boarded cheapest.[2] The ordinary rate was from seventy-five cents to a dollar a week. I remember being present at such a "vendue;" it would be about sixty years ago. In 1835 the town adopted the more humane and decent method of providing a "poor-farm" for those unable to maintain themselves,—not "foreign paupers," but native citizens fallen into poverty or distress. And the number of those so dependent was very small, unless in such exceptional periods as that following the Revolutionary War; thus, in 1826, "only two persons have been a town charge, the whole expense of maintaining whom, for a year, is less than one hundred dollars."

The wounds of war, and of the years that followed, were at all events soon healed, to judge from a sermon preached June 1, 1796, by Rev. Mr. Whitney, in which he says: "The great increase of our members [since 1767, from 82 families to upwards of 110], the remarkable growing wealth and prosperity of this people, must be ascribed to the peace, union and harmony which has subsisted among us. In considering the number of inhabitants (not far from 800), the extent of territory and the distance from the capital, I know not a more wealthy place."[3] Mr. Whitney's ardent hope, which he expresses in the same sermon, of a new and "respectable meeting-house," which, as he says, "proclaims the opulence of the place and encourages population," was fulfilled twelve years later, in 1808, when the present "First Parish" meeting-house was erected, at a cost of eleven thousand five hundred dollars, a large sum and a handsome building for its day.

CHURCHES.—Throughout Mr. Whitney's term of service, of forty-nine years, and for more than fifteen years afterward, "the ministry had not only a *permanent*, it had also a *secular* character, which it has greatly lost. In a sense easily enough understood, though not at all familiar, the Town WAS the parish; the town's people WERE the congregation. In a harmless and neighborly way, Church and State (in those narrow boundaries) were one."[4] So little were modern sectarian differences felt, that in the choice of Mr. Whitney's successor, in 1816, although the liberal movement in theology was well pronounced, only eleven votes out of one hundred and eight were cast against the settlement of the candidate chosen, who was understood to be in full sympathy with that movement. This was Joseph Allen (Harvard University, 1811, D.D. 1848), whose ministry, as sole or senior pastor, lasted more than fifty-six years, till his death, February 23, 1873. For eleven years of this period the parish was undivided. In 1827 a Baptist Church was gathered;[5] and in 1832 "the Second Congregational Society was formed (under Rev. Samuel Austin Fay) by those of stricter orthodox or evangelical faith: the original members were Asaph Rice and 34 others.[6] And the next year, that is, on the 11th of November, 1833, the old 'Third Article of the Bill of Rights' was repealed; the citizen was relieved from all legal ob-

[1] The paragraphs marked as quotations are from Dr. Allen's History of Northborough ("Sketches").

[2] In March, 1817, "Mary Rice was put up at vendue," and struck off to Joseph Carruth at 88 cents, clothing and doctoring to be found by the town.

[3] Copied in a discourse by Rev. A. S. Galvin, of Worcester, on occasion of erecting a memorial tablet to Peter Whitney, in the First Parish meeting-house of Northborough, May 20, 1888.

[4] From a memorial discourse by the present writer, given in the First Parish meeting-house on occasion of erecting a tablet to the memory of Joseph and Lucy Clark Allen, October 30, 1887.

[5] Church reorganized, and its present house of worship built, in 1860.

[6] The first meeting-house of this society, on the Boylston Road, is now occupied by the "Allen Home School," under the charge of Edward A. H. Allen. Their present commodious and handsome building, in the village, was erected in 1846.

ligation to pay for the support of any church, and the voluntary system, as we have it now, came into full play." Since then, to meet the wants of the increasing Roman Catholic population (partly French Canadian), a succession of "visiting clergy" began in 1850, which resulted in the building of St. Rose's Church, a handsome edifice, which was dedicated May 3, 1885.[1]

Much the longest pastorate was that of Rev. Joseph Allen, which extended over fifty-six years. He was born in Medfield, Mass., August 15, 1790. His early home was on the farm that for five generations, since 1648, had been owned and tilled by his ancestors; his grandfather, a man of note and of amazing bodily strength, had held a King's commission in the colonial militia; his father had enlisted as a boy of sixteen in the Continental army, and endured some of the hardships of the later Revolutionary campaigns and of Shays' Rebellion. From a constitution impaired by early studies, prudent regimen had built him up to an even and active condition of health, which kept sound till past the age of eighty. His ordination as "minister of the town" was October 30, 1816. He married, February 3, 1818, Lucy Clark, daughter of Professor Henry Ware, of Harvard University, to whose intelligent and devoted co-operation much of the character of his ministry was due. His work was especially effective in the department of public and general education. His death was on the 23d of February, 1873. A tablet was erected by his children in the parish meeting-house to the memory of both their parents, and dedicated October 30, 1887.[2]

The next longest of the later pastorates was that of Rev. Samuel Stanford Ashley (b. May 12, 1819; d. October 5, 1887). He was born in Cumberland, R. I., the eldest of eleven children; educated at Oberlin, Ohio; settled first in Fall River, Mass., and, in 1852, in Northborough. In 1864 he engaged in the army-service of the United States Christian Commission. In this capacity he was noted for absolute fearlessness in his humane service on the battle-field. At the close of the war he was employed by the American Missionary Association to serve among the freedmen at Hampton, Va., and afterwards in North Carolina, where he was a member of the Constitutional Convention and Superintendent of Public Instruction. In 1881 he was appointed acting president of Straight University in New Orleans; but, suffering here from yellow fever, returned to the North. From 1874 to 1878 he was in the employ of the Missionary Association in Atlanta, Ga.; but failing health obliged him to return to country life and occupation in his former home. Here he resided as a useful, honored and public-spirited citizen, actively interested in the town library, the public schools, and the cause of temperance, until his sudden death from heart complaint, in 1887. He was, says a warm and grateful testimonial of the library trustees, "in health or sickness, in season or out of season, unfailing in his efforts for the interest of the charge given him."[3]

SCHOOLS.—Before the public provision, made in 1766, private instruction had been maintained in the precinct by voluntary contributions (see below). In 1770 the district (not yet a town) was divided into four "squadrons" for school purposes; and, in 1780, an appropriation of £1000 was made to each squadron for the erection of a school-house. The whole sum (which was extremely "soft") amounted in hard money to only £52 6*s.* 8*d.*, made up afterwards to £163 13*s.* 4*d.* There were afterwards six school districts; and, sixty or eighty years ago, there was no great disparity of numbers among them; now, probably, more than half the population are gathered about the centre. In 1837 a two-story brick schoolhouse was built for the central district. Again, about 1865, more definite steps were taken towards the system of graded schools, and, in 1878, a neat high school building was erected on the Common near the meeting-house.

The ministers of the town have taken from the first the active lead that was their duty in the matter of public instruction, and have had in it the full confidence of the public. Dr. Allen, for example, "served as chairman of the school committee for fifty-one successive years, omitting only a season of two years, when a change was tried that seemed likely to do better without his aid." To this task he gave especial zeal and energy, the more efficient from the hold he had by natural temperament upon the affection of the young. The "district school as it was"—that is, with the advantage as well as disadvantage of bringing together pupils all the way from five to twenty for the winter's school-companionship—held, as is generally claimed, exceptionally high rank in Northborough: there was one season,

[1] The present pastors of the above churches are, First Parish, Obed Eldridge, settled in 1884; Baptist, Rev. C. D Swett, settled in 1884; Second Congregational, Edward L Chute, settled in 1885; St. Rose, James McCloskey, appointed November 1, 1886.

[2] The names of his children are Mary Ware, wife of Dr. J. J. Johnson, now of Northborough; Joseph Henry (the writer of this sketch), now of Cambridge, Mass.; Thomas Prentiss, died at West Newton, November 26, 1863; Elizabeth Waterhouse, now of Northborough; Lucy Clark, wife of A. E. Powers, of Lansingburgh, N. Y.; Edward A. H., head of a private school in Northborough; William F., Professor in the State University at Madison, Wisconsin.

[3] The following is a list, nearly complete, of ministers of the several churches: 1*st Parish*—T. B. Forbush, 1858–63; H. L. Myrick, 1866–68; F. L. Hosmer, 1869–72; C. T. Irish, 1873–76; H. F. Bond, 1877–81; Obed Eldridge, 1883. 2*d Congregational*—S. A. Fay, 1832–36; D. H. Emerson, 1836–40; Joshua Bates, 1840–42, W. A. Houghton, 1843–51; S. S. Ashley, 1853–64; G. E. Sanborne, 1865–70; H. Dutton, 1870–79, (author of a sketch of Northborough in a history of Worcester County, published by C. F. Jewett, Boston, 1879); G. B. Adams, 1879–81; E. A. Adams, 1881–85; E. L. Chute, 1885. *Baptist*—(after several short terms of service), Charles Farrer, 1848–55; Silas Ripley, 1855–65; D. F. Lamson, 1865–73; W. K. Davey, 1873–77; E. A. Goddard, 1877–78; J. Tillson, 1878–82; C. Titus, 1883–84; C. D. Swett, 1884.

for example (1831–32), when the five district schools were manned by five very distinguished students from Harvard College, including three of the four highest scholars of the senior class and the first junior scholar (now Professor Bowen). Under such a dispensation it may be fairly claimed that the district school, in its three summer and three winter months, and relieved in the interval by all the variety of country occupations, had a far higher educational value than the more perfect mechanism that has taken its place. The old way, it is true, had become outgrown and impossible through the change in population and manners of life; but the change that came about has brought with it some regrets.[1] The country school has had the merit, among other things, of training and sending out a large number of young men and women to the work of education elsewhere, many of them to advanced instruction in the State Normal Schools. I have a list of twenty-one of these pupils (female) of the Normal School which was established successively at Lexington, West Newton and Framingham.[2]

I copy here the following memoranda from a record in the handwriting of Rev. Dr. Allen:

In the Laws of Massachusetts it is enacted (1641) that "If any do not teach their children and apprentices so much learning as may enable them to read perfectly the English language, [they shall] forfeit 20 shillings; and the Selectmen of every Town are required to know the state of the families," etc. In 1770 there were 85 families in Northborough. These were divided into four "squadrons," and a vote was passed to build four school-houses, which cost each in our currency $150.40. One of these earliest school-houses is described as "rough-boarded, without plastering or paint, with one door, a very large chimney in one corner, three small windows, and furniture to correspond; yet from this building graduated a Recorder of the City of New York, and here was partially educated a missionary to India, who was also a Founder of the college in Georgetown, D. C., and a Doctor of Divinity."

In 1742 a new school-house was built in the North District (to take the place of the old one, destroyed by fire), at a cost of $517.95; the annual cost of the school was here $86. "The wood was furnished by individuals, and cut by the boys, who made the fires. The teacher was at his desk as often before as after sunrise, ruling the books, setting copies, mending the goose-quill pens, and preparing practical sums for the scholars to work out and copy into their manuscripts. School kept five and a half days in the week, with 15 minutes' recess forenoon and afternoon, and 30 m. for dinner; the rest of the time was devoted to business. Imperfect lessons, whispering and mischief, cost too much among that pine shrubbery."

A brick school-house was built in 1837 for the Centre District (established in 1811), at a cost of $2230 (afterwards repaired and refurnished at an expense of $1000). The entire cost of school buildings for 100 years, not including repairs and incidentals, was $24,262. The appropriations in the same time for schools, including the above, amounted to $88,968.

As supplementary (it would seem) to the public schools, to secure more advanced instruction, there was organized, in May, 1780, by private subscription, a "Seminary," at a cost of ninety-six pounds, sixteen shillings, three pence and three farthings, which sum was divided into 35 shares; shareholders to have their children's education at an assessed rate, and others to pay 4s. per month for each scholar. At a meeting of the Proprietors, held Monday, December 4, 1781, it was "Voted to give Master Flint five pound per month for the following three months." The Seminary building was "upon the common near the pond-hole." How long the plan was continued does not appear.

About 1825 or 1826, courses of public lectures began to be given by the minister of the town, on astronomy and similar topics, supplementary to the common school course of popular education. The neat town-hall, built in 1822 (near where the high school now stands), gave convenient accommodation, and the lectures ripened into a "Lyceum" (organized in 1828), one of the first in the country, where for more than thirty years free lectures were given and debates in the earlier years were held once a week in winters. The coming together of so many college-men as teachers added greatly to the interest of these debates, which brought out, too, no little native talent. Mr. John C. Wyman, that prince of story-tellers, now of Boston, would probably say that some of his earliest lessons in oratory were received in our modest town-hall. The Lyceum, in course of time, degenerated to courses of paid lectures, as in other places; but in its day it was a much-prized adjunct to the district school.

A Juvenile Library was created by annual contributions in 1824; and a "Social Library," founded as early as 1792, was incorporated with the Parish "Free Library," in 1828. A Public Library, established in 1866, by uniting seven existing libraries, and with the aid of a donation of one thousand dollars from Hon. Cyrus Gale, is kept in the new and commodious town-hall (built in 1867), and now contains something over seven thousand volumes.

The following memoranda of local incidents during the period 1823–45 may here be found of interest:

1823, Nov. *Voted*, "not to permit Asaph Rice to use the School-house for religious meetings." *Voted*, "to provide means to warm the meeting-house, [for the first time!] by a stove or otherwise."

1824, May. "Chose a committee of 13 to investigate means to suppress the great and growing evil of intemperance; and that a committee of 6 be chosen to assist the Selectmen in selecting intemperate persons to be posted up, according to law." In the same year a new hearse is bought, at a cost of $88.82; and the sum of $300.36 was paid for a furnace for the meeting-house.

1826, March. At the request of Joseph Davis and others, a committee was chosen to see if the town will purchase the several libraries, and have a Town Library. A School Committee was for the first time appointed, the charge having hitherto been born by the minister and selectmen.

1827, April. A committee was chosen "to investigate the subject of encouraging the singing in this town." May. The sum of $100 was appropriated for a Singing-School; any surplus to be disposed of to the choir through Thaddeus Mason. Many of our older inhabitants will re-

[1] Another illustration of "how we did it" in those days may be not out of place here. It is in a letter from the admirably skilled and successful master of a singing-school: "I think it was fifty-two years ago this coming fall (1888) that I attended a singing-school here [in his native town]. Your father sent for me to do his chores and study. I went, and, being interested in music, I commenced to teach the boys in the study from the blackboard. The boys from the town heard of it, and, by your father's advice, I adjourned to the vestry [in the basement of the town-house], where I had about fifty pupils, and taught twenty-four evenings, charging nothing. The pupils paid for the lighting. It was thought to be a success." This teacher (Joseph A. Allen, of Medfield) was afterwards superintendent of schools in Syracuse, N. Y., where he had high reputation as an instructor; and he was for some years the superintendent of the State Reform School at Westborough.

[2] A list is mentioned by Dr. Allen "containing the names of fifty-seven teachers, male and female, whose education was obtained principally in our public schools, who found employment as teachers, in this and other places, during the first thirty years of the present century." Since then "the number must have been much larger, as more than thirty have graduated at our Normal Schools, most of them at the one in Bridgewater."

call the rich and bold tones of Mr. Mason's fine tenor voice in the village choir. We find it later (1829) "recommended that $50 be appropriated as compensation to Mr. Thaddeus Mason as leader of the singers for one year, and $19 to Anson Rice for using his viol for one year."

1828. The First Report on Town-Schools speaks of their "high reputation in past years," but says their "multiplication of studies is a very serious evil," that "more attention should be paid to writing," and that good order should be maintained "by persuasive and gentle measure, so far as may be practicable." The next year the number of pupils reported is 349.

1829. It is voted "that the Northborough Branch of the American Lyceum may hold their meetings in the town hall;" also, "to refund to the members of the Baptist society their proportion of expenses of painting the meeting-house, the singing, &c.;" to procure a map of the town; and "that it is inexpedient for the Town to take measures to become a Parish."

1831. *Voted* to accept the Gassett Donation,—a sum of $3,000, "presented to the Town by Henry Gassett, Esq., of Boston,—one of its provisions being that after the income has reached a certain amount, fifty dollars shall be bestowed, once in three years, upon "the most worthy and best Mother, to be selected by five mothers and five fathers chosen by the Town." A portion of the income is devoted to the support of the First Parish Church. Also to expend $40.10 for school apparatus; to purchase a Poor Farm; and not to grant a petition that the Schools be under the sole control of the people of the several districts, according to law; so the schools are left in charge of the general town committee.

1832. *Voted* not to grant the use of the town-house for public worship, and the following year the First Parish pay $20 rent for its use as a "vestry," or lecture-room.

1835. The committee in a long report recommend the establishing of a High School; measures are taken looking to this, but the plan is abandoned in 1837, when a school building is erected in the centre district for two schools, a higher and a lower. In 1837 it is also "voted to purchase four acres of land of Lowell Holbrook for a burying-ground,"—the beginning of the present cemetery of about ten acres (the old burying-ground of about 3 acres was laid out in 1729, and cleared of wood in 1804). A poor-farm was purchased for $4150. In 1838, number of paupers, 16; in 1840, 20.

1840. Number of enrolled militia-men, 128; two years later, 189.

1845. The first fire-engine is purchased (at second-hand) by the town for $171.75.

HEALTH, &c.—When the "Second Precinct" of Westborough was organized in 1746, there appear to have been forty families in the place.[1] In the autumn of this year, and for seven years following, particularly in 1749–50, "this society was visited by a very mortal sickness among children, by which the growth of the society must have been very sensibly checked, and which must have been attended with circumstances of peculiar distress. The sickness in the earlier season appears to have been dysentery; the later, throat distemper, better known now as scarlet fever. Sixty children out of a population which could not have much exceeded three hundred were victims of the disorder. Still, in 1767 the number of families had increased to eighty-two, and in 1796 to one hundred and ten. In 1810 the census gives the entire population as seven hundred and ninety-four, and in 1820 as ten hundred and eighteen, which seems to have been a slight over-reckoning.

Since the mortality of 1749–50, the general health of the town has been exceptionally good. For forty-six years, beginning with 1780, the deaths were four hundred and fifty, not quite ten a year (less than one and a half per cent. of the population), more than half of them from old age. I recall a succession of years when (if my memory is right) the annual deaths did not exceed seven in a population of full one thousand. The growth of little manufacturing centres, with their varieties of a crowded foreign population, has, of course, much changed this ratio. Some seasons of scarlet-fever epidemic (especially one short but severe in 1839), and scattered cases of typhoid, have affected the health-list, but have not altered the general good reputation of the town. Increasing frequency of drought[2] and low wells had begun to be felt as a serious inconvenience; and in 1882–83 (in good part by the urgency and liberality of Mr. D. B. Wesson, a wealthy Springfield manufacturer of fire-arms, and of Hon. Cyrus Gale, an aqueduct was laid from a reservoir constructed at Straw Hollow, just over the Boylston line, at a cost of $58,150.44, and since then the village has been amply supplied with pure and wholesome water. The engineer's report gives the following description of the work:—

> The length of the dam on top is 625 feet, the greatest height in the middle 20 feet, in the area of the pond created about nine acres. The greatest depth of water is 15 feet, and the total storage capacity is approximately 30,000,000 gallons, or a supply for your population equal to at least six months' consumption. The waste gate was closed early in December, 1882, and the pond was first full to high-water mark on June 14, 1883. This level gives a head of 145 feet at the railroad track, which is sufficient to throw fire-streams at that point 80 feet high. The head at Woodville is 193 feet, and at Chapinville 205 feet. Fire-streams can be thrown at these points 100 feet high.
>
> In regard to the nature of the water secured by your plan, your people have already expressed satisfaction with its soft qualities, and undoubtedly storage in the reservoir will tend to remove its slight color. On sanitary grounds, its use should become general for domestic purposes, as no well-water in your village will be found to be its equal in purity. PERCY M. BLAKE, *Civil Engineer.*

PHYSICIANS.—The first physician of the town was Stephen Ball (born about 1730), descendant of one of the early settlers of Concord, Mass. His son Stephen ("Old Dr. Ball," 1767–1850) had a wide and long-continued practice in Northborough and its vicinity, and was a physician of high repute; he married (about 1800) Miss Lydia Lincoln, of Hingham. The second of their thirteen children, "young Dr. Stephen" (born 1802), settled here about 1825, earning special reputation as a surgeon; he removed to Boston in 1837, where he continued an extensive and successful practice till his death, in 1871. A younger brother, Abel (1810–76), was also a practitioner in Boston. In 1836 Dr. Joshua J. Johnson (1809–84) settled here in practice, removing afterwards to Worcester (1857) and to Keene, N. H. (1858), returning to Northborough in 1865, having married (1840) the eldest daughter of Rev. Dr. Allen. Their only surviving child, Mrs. William H. Johnson, lives in Westborough. In 1848, Dr. Henry Jewett became a resident of this town,

[1] The householders, who were also church members, were the following: Ephraim Allen, Samuel Allen, John Carruth, Gershom Fay, Silas Fay, Jonathan Livermore, John McAllister, Mathias Rice, Jacob Shephard, Joshua Townsend. (May 21, 1746).

[2] The most formidable drought recorded is one of three months, from March 20 to June 20, 1826. The coldest season known was that of 1816, when there was frost in every month, and the corn froze unripened in the ear.

where he still enjoys an excellent practice. Other physicians have been Henry Barnes, who married a daughter of Dr. Ball, Sr., died 1879, and his son, Henry J., practices in Boston; Dr. I. C. Guptill and Dr. Chas. Oakes (homœopathic).

TEMPERANCE.—The evil of rum and cider-drinking (for in those days brandy, whiskey and beer were less popularly known) had become a general vice during the generation following the Revolutionary War. It was partly outgrown before the War of 1812, but had come in again as a result of camp-life in that war; and many strong, substantial and prosperous men in this town of the generation next following drank themselves to poverty, their farms into debts, and their families to distress. As early as 1817 the following testimony is found—one of the very earliest symptoms of the great temperance movement that has come since—showing a practical sense of the harm and a desire to abate it. Its signers were among the leading citizens of the town, and there is no indication of its having been urged from any outside source, though the minister's hand may possibly be traced in it:—

Impressed with the belief that the practice of using wine or ardent spirits on funeral occasions is attended with needless expense, which, to the poorer class, is no inconsiderable burden; and, moreover, that it has a tendency to interrupt those devout feelings and pious meditations which such occasions ought to call forth: We, the undersigned, are willing to use our influence to discontinue such practice; and we engage for the future to allow of no wine or spirituous liquors to be carried to the mourners at our own houses, but if any of the mourners or others think it necessary or expedient to use it, to cause it to be placed in a separate apartment for the use of such persons.—(Signed by Samuel Sever, William Eager and others, 30 in all.)

Northborough was thus very early in the field in movements looking to the temperance reform. A society "for the suppression of intemperance" was formed May 30, 1823. The record of temperance organizations since this date has probably been about the same with other places in the vicinity; and, while the town has had a good repute for order and sobriety, there is nothing especial in this respect to distinguish it from the rest. A half-century ago or more, it is said, each week three wagon-loads of produce went to Boston, and each return-load included its barrel of rum. Since the railroad was built, with its vastly greater freighting facilities, there is little perceptible change in the outward look of things; under "local option" there has generally been no license for legal sale of liquors; the native population is said to have largely outgrown its old drinking habit; and such drunkenness or other disorder as there may be prevails more, it is likely, among the foreign or vagrant population.

During the war of secession this town furnished to the service one hundred and forty recruits, being nine over and above all demands of the general government. Of these, two were commissioned officers; the record of one of them, Capt. S. Henry Bailey, is given below. Appropriations for the public service were made by the town to the amount of $10,647.57, in addition to $8,840.70, which was afterwards refunded by the State.

BUSINESS, &c.—Most of the manufacturing and other enterprises of the first century of the town's existence have been already noted. Wool-carding, the making of potash, and the working of bog-iron began before or about 1800. The manufacture of horn-combs, introduced by Haynes & Bush in 1839, was extended in 1860 into the tortoise-shell manufacture of jewelry, &c., by Hon. Milo Hildreth, who has had about twenty hands at one time in his employ. Two smaller establishments, Farewell's and Whittaker & Proctor's, have been started since. Ornamental combs, chains and large quantities of horn buttons are included in these industries. The tortoise-shell comes from Zanzibar, the Fiji Islands and other tropical regions. The old cotton factory, built in 1814, was burned down in 1860, but has been rebuilt, and has since 1866 been carried on by Daniel Wood as a woolen-mill for the manufacture of blankets, &c., employing now about one hundred and twenty-five hands, half of them Canadian French[1] and the rest Irish. The other factory is owned by Ezra Chapin, and since 1869 is used for making satinets. The manufacture of corsets has made a flourishing trade since 1877. A shoe-shop was conducted here for a few years, though not on a large scale, and a valuable bone-mill, established in 1860 by J. B. Root, employs the water-power of the Assabet.

The agricultural branch of the then Boston and Worcester Railroad, running from South Framingham, was completed to Northborough in 1855. It has since become the property of the Old Colony Railroad, and in 1866 was opened through to Fitchburg. It gives at the present time five passenger trains each way between this place and Boston; direct connection also with Taunton, Providence and New Bedford.

FAMILIES.—The family names most conspicuous in the early history of the town have appeared from time to time in the foregoing notes. These names have more significance than might appear to one who has been familiar only with the more changing population of a later day. To quote from a memorial discourse before cited:

It is said that the New England population of 60 or 70 years ago were

[1] There are in Northborough some three hundred of these Canadian French, seventy-five families, adults and children, most of them connected with the two factories, the larger number in "Chapinsville." In the Factory School, established 1880, almost all the children are French, and in their homes use their native language, which is, however, dropped in a few years, the parents continuing to use it. These people come from below Montreal, on or near the St. Lawrence. One of the earliest comers, Oliver Contois (here called Counter), came in 1850, and has lived here ever since. Their names often undergo odd transformations, thus M. Pierre becomes "Mr. Stone;" M. Rivière, "Mr. Brooks;" M. Sarracin, "Mr. Rice," &c. About a dozen of them only have become citizens, and these, mostly, a little before the late election. Not till within a year or two have any French children attended the high school; at present there are two, but none have completed the high-school course of study.

the purest blood, or had the most of a certain family likeness, of any community speaking the English tongue. They had grown into it by nearly 200 years of close association here, and wide separation from the rest of the world; and nothing, certainly, could do more to bring out and invigorate that quality than the independence of the town life, and the habit of acting together in their own little public, to decide all matters of common interest or duty. . . . I think that until within 50 years it was rather uncommon to know a family that was not born, bred and married within the town boundaries; and the few exceptions only made the general fact stand out more sharply.

It is accordingly of interest to take into our limited view the history of a few typical families,—not all, or perhaps the most familiar, of those that might be selected; but those of which the following memoranda have been kindly put into my hands, here given alphabetically:—

BAILEY.—Rev. Benjamin H. Bailey, now of Malden, Mass., writes to me as follows: "My grandfather, Silas Bailey, came from West Berlin to the old farm of my boyhood [of 214 acres] about 1795. The farm was bought of Abraham Munroe, grandfather of Mrs. F. D. Bartlett. My grandfather died late in the autumn of 1840, aged 84. His wife, Lavina, sister of Mr. Jotham Bartlett, died a few weeks before her husband, aged 82. There were 11 children, 7 of whom grew to manhood or womanhood. Timothy, the oldest son, a farmer in Berlin, died about 1838, aged 57. Silas died in Worcester in 1860, aged 86. Holloway [my father] died in Northborough, Feb. 12, 1872, aged 87 years, 7 months. My mother, Lucy Sawyer, was the youngest but one of 11 children of Benjamin and Rebecca (Houghton) Sawyer, of Bolton. Their family consisted of 5 children, of whom I am eldest. Three grew to manhood, of whom two remain, myself and my brother, John Lewis, now living at Newton, Mass. Silas Henry was killed at Spottsylvania, Va., May 12, 1864, aged 29 years. He was captain of Company G, 36th Regiment Mass. Volunteers. His comrade in arms, now Rev. H. S. Burrage, of Portland, Maine, in a history of this regiment, and this engagement (most disastrous to our troops), says, p. 168: 'Of the commissioned officers, Capt. Bailey, the beloved commander of Co. G, had received a mortal wound. Corp. Hall, of his company, was one of the first to fall in our close conflict with the enemy, and some of his comrades carried him to the rear of our line of battle. Capt. Bailey moved at once to the spot, and as he was bending over the dying corporal, a minnie ball entered his forehead, and he fell forward upon the corporal's body. Some of his men carried him to the field-hospital, but nothing could be done for him. He breathed all day, but consciousness did not return; and so we were called to part with a faithful officer and a noble-hearted companion. He had entered the service with a patriotic desire to serve his country, and his last words to those whom he loved, written after the battle of the Wilderness, showed that he had counted the cost, and was willing, if need be, to lay down his life in the endeavor to secure the great objects for which on our part the war was waged.' In the letter above referred to Capt. Bailey says, after giving detailed account of the awful carnage: 'We stand and wait, and fall if we must, I think, willing sacrifices. May God give us the victory, and keep us till his own time for our meeting.'"

BALL.—Of the Ball family, several members of which are spoken of above, in the mention of physicians, I have the following account. Of the four sons of Nathaniel Ball, of Concord, John (who was killed by the Indians in King Philip's War, 1675) left five children; of these, John (d. 1722) had seven; of these, James (1670–1730) had eight, of whom James (b. 1695) was the father of Stephen, the first physician who settled in the district of Northborough. Of his six children, Stephen (1767–1850) was the second; a younger brother, Jonas, was a well-known citizen in my boyhood, keeping the "Ball Tavern" on the Worcester Road. Of the thirteen children of Dr. Stephen Ball, besides those before mentioned, were Louisa, wife of Dr. Fitch, of Virginia, afterwards of West Newton, Mass.; Elizabeth, wife of Dr. Henry Barnes; Harriet, wife of Charles Mayo, and afterwards of Jairus Lincoln and Benjamin (1820–59), who published a volume narrating his adventures and remarkable travels in Eastern Asia, the island of Java, and Mauna Loa, the famous volcanic island of the Hawaiian group, and lost his life in an equally hazardous expedition in Nicaragua. Several of the others have left an honorable and kindly record.

BRIGHAM.—Conspicuous among the excellent and dignified fathers of the town, a few years ago, was Nathaniel Brigham (1785–1870), whose ancestor, Thomas Brigham, migrated from England in 1634, settling afterwards in Sudbury. The line of descent was through Thomas (1643–1719), David (b. 1678), Levi (1717–87), and Winslow (b. 1756). Of his eight children, Elijah W. (b. 1816) went into business in Boston; Catharine married George G. Valentine and, with her sister Mary, lives in Northborough. (The brothers, Charles and Frederick Brigham (d. 1881), were of only remote kindred to the above.)

DAVIS.—From a representative of the large and widely-honored Davis family I have the following: Isaac Davis was born in Rutland, Mass., February 27, 1749. When a young man he came to Westborough to teach the tanner's trade to the sons of Mr. Stephen Maynard, and married Mr. Maynard's step-daughter, Ann Brigham. In 1781 he bought the place in Northborough now occupied by Mrs. George C. Davis, and established a tan-yard there. Of Isaac Davis and Ann Brigham nine children lived to maturity. Three sons lived in Northborough—Phinehas, b. September 12, 1772; Joseph, b. February 28, 1774; Isaac, b. September 23, 17—. Another son, John Davis, afterwards Governor of Massachusetts and United States Senator ("Honest John"), was born June 13, 1787, died 1854. Of the children of Phinehas Davis, Mrs. Nathan Davis Wells (b. November 4, 1865) and her son James are the only descendants now living in

Stephen Ball

Cyprus Gale

Northborough. Of the children of Joseph, George Clinton Davis (b. February 28, 1813; d. April 26, 1873) was the only one who spent his whole life in Northborough; a younger son, James (b. June 20, 1818), now lives in this town. Of the descendants of Isaac, Mrs. Adeline Sanford, Miss Sarah Davis and Mrs. Ann Fiske also live in Northborough.

FAY.—The Fay farm lay hid from from public view, more than most, among the woods and hills towards the western part of the town, but the family is a large and important one. Of Paul Fay (the remotest of whom I have any record: 1719–90), the son here best known was Asa (1762–1837, a retiring, hard-working, and somewhat eccentric farmer of the old school; and his son was Lewis (1799–1880), father of ten children, of whom Joseph T. (b. 1819) is engaged in business near the village.

GALE.—Cyrus Gale, youngest but one of seventeen children, was born in Westborough October 7, 1785, and died in 1880, at the age of ninety-five.[1] He began life at sixteen, as a market gardener, in Roxbury, and at twenty-one held a stall in Faneuil Hall Market, Boston. He removed to Northborough in 1812 for the benefit of his failing health, and here became active in various lines of business,—postmaster, agent of the cotton factory, and storekeeper, as well as a large owner of land; in later years a director of the bank and largely interested in the railroad. His wife was a sister of the brothers Davis. He was for several years in the State Legislature, and in 1852 a member of the Governor's Council; a strong friend of temperance, and actively interested in politics. An offer to the Commonwealth of land and building-stone, with admirable advantages of water and situation for the Women's Prison (now in Sherburn), was not accepted. His wealth and public spirit were of essential help in the building of the handsome and commodious Town Hall, soon after the close of the Civil War, and in establishing the Public Library. His eldest son, Frederick William, (born 1818, Harvard University 1836; married to Miss Sarah Whitney, of Brookline), was lost, with his wife and child, in the sinking of the steamship "Arctic," off the coast of Nova Scotia, in October, 1854. Of his other sons, Cyrus lives in Northborough; George died in 1856; Walter Scott, born in 1832, lives in California. A daughter, Hannah, was wife of George Barnes, of Northborough; died in 1851.

RICE.—Edmund Rice, from Hertfordshire, England (born about 1594, died 1663), settled in Sudbury in 1638 or '39; had eleven children. His son, Edward (1619–1712), had eleven. Of these, Jacob (1660–1746) removed to Marlborough. His son Jacob (1707–88), the first of the family who lived in Northborough, was one of a family of nine; had eight children. Amos (1743–1827) had a family of ten children, of whom Asaph (1768–1856) was a well-known citizen from fifty to seventy years ago, puritanic in principle and eccentric in habit; dearly loving a sharp set-to of speech in town-meeting or lyceum debate; he drove his weekly wagon-load of country produce to Boston from his farm on the cross-way between the Worcester and Boylston roads, starting at two in the morning, and getting his arrears of sleep (it was said) as he walked beside his team of slumbering horses—a unique character who could not be spared from the reminiscences of this time. Of his nine children, the two best known were Anson (1798–1875), kindly, public-spirited, a frequent moderator at town-meetings, an important figure in the village choir with his great bass-viol;[2] and John (d. 1881), a useful citizen and active business man, of excellent intelligence and admirable private character, who died, suddenly, while on the railway train for Boston. The present representative in Northborough of this strong and numerous family is Charles A., son of Anson, born 1825. A sister, Mrs. Mary F. Sherman, also lives here.

SEAVER.—Samuel Seaver (1770–1838), a wool-carder by trade, was the father of seven children. Of these, the eldest son, Abraham Wood (1809–87), went at fifteen into the store of Gale & Davis, afterwards becoming partner with Mr. Gale (Cyrus Gale & Co., succeeded in 1845 by Cyrus Gale, Jr., & Henry Maynard). Between 1845 and 1853 he was engaged in the paint and oil trade in Boston; then with Milo Hildreth, in Northborough, in the comb manufacture. In 1854 he became cashier of the Northborough Bank (George C. Davis, president), which office he held, with a short interval, until his last sickness, "a quiet but busy man, enjoying the confidence of the community, well known and highly respected through the central and eastern portions of Worcester County. He has held many positions of honor and trust, with credit to himself and profit to others, and declined an appointment as Judge of the Second Worces er District Court." His brother Samuel was the father of three sons,—Edwin Pliny (Harvard University, 1864), superintendent of schools in Boston, living in West Newton; Walter, a young man of very winning character and noblest promise, a most successful teacher, who died in 1867; and Francis, cashier of the Manufacturers' Bank, Boston.

VALENTINE.—From John Valentine, who came to Boston in 1745, there were descendants in the fourth generation—sons of William, who settled in Northborough in 1804—Gill (born 1788), the eleventh child, and Elmer (born 1795), the fifteenth and youngest. Of the five children of the former, George Gill (1815–69) and Thomas W. (1818–79), long a teacher of high repute in Brooklyn, N. Y., and elsewhere,

[1] At the time of his birth his father's age was fifty-eight, so that their united ages covered the extraordinary term of one hundred and fifty-three years.

[2] Mr. Rice sang (he told me) in the choir at Dr. Allen's ordination service, in 1816, and at his funeral, in 1873.

are the best known names. Elmer, who was the founder of the Baptist Society in this town, was long a successful teacher here and an admirable writing master. Of his fifteen children, the eldest, Charles Elmer (born 1822, married Olive Seaver), an excellent and beloved teacher in the Boston school, was instantly killed by a passing train while leaving that by which he had just arrived in West Newton, where he resided (1870). The widow of Elmer (Rebecca Crawford) lives, at a great age, in Northborough.

WILLIAMS.—George Williams, a merchant of Salem, and his wife, Lydia Pickering (of whom an admirable portrait, painted in her old age by Gilbert Stuart, is in the Williams house in Northborough), were the parents of twelve children. Of his eight sons, the best known names are those of Timothy, a Boston merchant; Samuel, a London banker; and Stephen (1772–1838), owner of a fine stock and fruit farm in the westerly part of Northborough, whither he removed in 1799. His portion of the family estate had been lost by shipwreck; but a later inheritance enabled him to make the purchase of his Northborough farm. Of his brother Samuel it is told that, being on his return voyage from England, his vessel was run down and that he found himself, roused suddenly out of sleep, clinging to the shrouds or bowsprit of a large ship bound for England. Thus forced back, he conceived a horror of the sea, and never visited his native country, but went into business in London, where he was long well known for his hospitalities to visiting Americans. Among his good gifts, he sent to his brother Stephen a number of very fine stock-breeding animals, and pictures of the noblest of British bulls adorn the walls of the pleasant and hospitable old house. With the kindest of hearts, Mr. Williams' manner was curt and taciturn; he would turn aside not to betray himself, if beguiled unawares into a laugh; he cherished, like a lover, his choice varieties of rare fruit; and when the apple-harvest came he would leave at his minister's back-door the briefest of written messages: "Send your barrels!" A man of generous and noble traits, who, with his wife (Alice Orne, of Salem, 1769–1856), a lady of dignified, refined and quiet manner, made a greatly prized variety among our rural population. His son, George Henry (married Frances E. Simes, of Portsmouth, N. H.), has of late years lived upon his father's farm. His elder daughter, Mary, married Captain Edward Orne, of Salem, a shipmaster in the Asiatic trade; their two sons were Henry (formerly of Pontotoc, Miss., and later of Memphis, Tenn., where he died in 1862), and Charles, long in business in Hong Kong, who died in New York in 1881; a daughter, Mary, now lives in Cambridge. The younger daughter, Elizabeth, married Benjamin D. Whitney, of Brookline: he lives with his daughters in Cambridge. Ellen, daughter of George H. Williams, is the Northborough representative of the younger generation.

WOOD.—The family of Wood in this vicinity are descended from William Wood, who migrated from England in 1638. His son Michael died in Concord in 1674; his son Abraham in Sudbury in 1742, or a little later; his son "Captain" Samuel came in 1749 to Northborough, where he built a fulling-mill, and died in 1760. Of the twelve children of his son Abraham, representatives are found through the seven daughters under the family names of Davis, Garrett, Rice, Valentine and others. The youngest of the twelve, Samuel, born 1799, had four sons and one daughter. One of the sons, Samuel, born 1831, is now president of the bank.

STATISTICS.—The following figures show the recent growth of the town, the ratio of gain being the largest of the towns in this county excepting four: Population in 1875, 1398; population in 1885, 1853: increase, 455.

The gain is chiefly due to the immigration of French, most of whom are factory operatives from Lower Canada. From 1865 to 1875 there was a decrease, real or apparent, of 225. In the century since 1776, when the population was 562, there has been a gain of 836, or nearly 150 per cent. Number of voters in 1885, 393[1]; number of ratable polls, 573; number of families, 416; population of native birth, 1485; population of foreign birth, 368; natives of Massachusetts, 1485; natives of Ireland, 99; natives of Canada, 154; having both parents native, 983; having both parents foreign, 629; unmarried (about one-half), 976; having both parents Canadian French, 272; having both parents Irish, 215.

The following list is taken from the town reports of 1888:—

State tax, $1440; county tax, $856; town grant, $14,300; overlayings, $236.29—total, $16,832.29. Tax on polls, $1186; tax on real estate, $11,830.23; tax on personal estate, $3108.14; tax on resident bank stock, $707.92—total amount of tax to be collected, $16,832.29. Number of polls, 593; value of real estate, $946,340; value of personal estate, $248,592; value of resident bank stock, $56,613. Bank shares are taxed at $113. Rate of taxation, $12.50 per $1000. Number of dwelling-houses, 332; horses, 311; cows, 835.

The following statement is from the local newspaper: The daily shipment of milk from Northboro' averages at present about 300 cans holding 8½ quarts each. During the spring months the daily shipment reached 400 cans. Twenty-two cents per can is the price paid during the summer. Winter prices are a trifle higher. —(September, 1888.)

The export of apples to foreign markets began in 1864. It is estimated that in fruit seasons the exports amount to 10,000 barrels.

Financial summary for the year 1887–88. Expenditures: Schools, $4836.04; highways, $1757.60; bridges,

[1] Being 21 1-5 per cent. of the population. The highest ratio in the county is in Lunenburg, 30 1-2; the lowest in Webster, 16 per cent.

$294.51; snow bills, $103.70; Fire Department, $356.73; street lighting, $378.50; Public Library, $434.29; pauper account, $2229.76; cemeteries, $200; Town Hall, $377.29; water damage, $3556.97; State aid, $489; contingent expenses, $1958.43—total, $16,-972.82. Interest charges and State claims, $10,845.82; total, $27,818.64.

CHAPTER LXX.

PETERSHAM.

BY LYMAN CLARK.

Locality—Topography—Railway Connections—Historical Resources—Early Settlement—Petitioners and Proprietors—Services in the Indian War—First Meeting—Settlers—Relations with the Indians—Alarm—Armed Worshippers.

LOCATED in the northwestern part of Worcester County and bounded by Athol, Phillipston, Barre, Dana and New Salem, with eastern and southern angles connecting with Hubbardston and Hardwick, is found the town of Petersham, the only place bearing the name in the United States. The plantation, as it was originally called, was intended to be laid out six miles square, or containing thirty-six square miles. The four angles of its boundary lines coincided nearly with the points of the compass. A range of hills extends from the extreme northern portion of the town southward, in a position central between the eastern and western bounds. It is said that on these hills is found the highest cultivated land in Massachusetts east of the Connecticut River, the elevation being but a few feet lower than the summit of Wachusett Mountain.

On either side of this range of hills may be found streams flowing southward into Swift River, or, in the northwestern part, northward into Miller's River. East and west of these streams hills or elevated ground may be found as the traveller approaches Dana on the western or Hubbardston on the eastern border. A portion of the territory originally belonging to the town has been set off to increase that of Dana.

The railway connections of the place are with the Fitchburg, by stage nine miles to Athol; the Massachusetts Central by stage, ten miles to Barre. At North Dana, five miles distant, is a station of the Springfield and Athol Branch of the Boston and Albany, and at Williamsville, six miles eastward, is a station of the Ware River Railway. All of these stations are used to some extent in communicating with the world, that at Athol having been hitherto the chief point.

HISTORICAL RESOURCES.—Mention may properly be made of the early town records from 1757–1793, which are specially valuable; also of the early church records, which begin with the organization of the church, 1738. Rev. Peter Whitney, son of Rev. Aaron Whitney, the first pastor, wrote the first historical sketch of the town, of which we have knowledge, in his "History of Worcester County," which was the first published history of the county. Jared Weed, Esq., prepared an address upon the history of the town, the MS. of which has been in possession of Mr. Joseph Willson, of Bellows Falls, Vt. A bower has twice been built upon the Common and the people assembled to listen to an historical address, followed by festivities appropriate to our national holiday. The first occurred July 4, 1854, which was specially observed in view of the completion, on the 19th of April previous, of a hundred years from the date of the incorporation of the town. Dr. William Parkhurst presided. Rev. Edmund B. Willson delivered a carefully prepared, very full and complete address, presenting the previous history of Petersham. This was published in pamphlet form, with historical appendices, and is the basis of later historical labors relative to the town, furnishing much of the information contained in this article. Reference is made to this address for more full information on many topics than is here contained.

The second historical anniversary was held in pursuance of a resolution of Congress relative to local histories, under a bower on the same spot, July 4, 1876; Deacon Cephas Willard, ninety years of age, presided. Lyman Clark, then pastor of the First Congregational Church (Unitarian), delivered the address which was intended to supply some information relative to the earlier period not contained in the previous address, and to add historical facts pertaining to the period of twenty-two years which had passed since the previous celebration. This address was published in the *Athol Transcript* for July 11 and 18, 1876. George W. Horr, LL.B., in the year 1879 prepared a valuable historical article for a "History of Worcester County." Hon. John G. Mudge has carefully prepared the record of the soldiers of the War of the Rebellion, and furnished much other information. Mr. J. B. Howe has for many years collected materials for the history of the town, many items of which have appeared in the *Athol Transcript*. A valuable MS. in his possession contains the letters of Captain Park Holland, prepared from a diary kept by him of six years' service in the Revolutionary War, service at the time of Shays' Rebellion, and surveying tours to the eastern part of what is now the State of Maine. Acknowledgments are made to these various sources of information contained in this article, including courtesies by Mr. C. B. Tillinghast, in charge of the State Library. The preparation of a full history of the town remains for the future. Probably few towns of the State will be found to have more interesting historical resources than are furnished by the annals of Petersham.

EARLY SETTLEMENT.—In the month of April,

1733, John Bennet, Jeremiah Perley and sixty-five others petitioned the General Court for a grant of land six miles square. The proposed grant was to be located from a point beginning six miles from the northwest corner of Rutland, the southern line running westerly six miles. The reason urged in favor of the grant by the petitioners was previous service in the Indian Wars under Captain Lovell, of Dunstable, and Captain White, of Lancaster. Two previous petitions had been sent to the General Court without avail. This petition was acted upon favorably on the 25th day of April, 1733, the General Court having excluded nine of the petitioners and added five new names, making seventy-one proprietors. The grant was at the average rate of three hundred and twenty-four acres per man, or about twice the amount now allowed under the bounty laws of the United States, and may be thought a generous recognition of the "Hardship and Difficult marches they underwent" . . . "after the Inden Enemy and Into their Country," which were humbly assigned as reasons for the grant.

It is probable that those marches had at some time led the petitioners over the lands which they thought desirable for a plantation, and that thus the location was fixed in their minds. Some of them were men of means, thus giving the enterprise of establishing a plantation responsible endorsement. The petitioners lived chiefly in the northwestern part of Middlesex and northeastern part of Worcester Counties. The towns of Lancaster, Boxford, Harvard, Lunenburg, Concord, Groton, Dracut, Haverhill, Billerica, Grafton, Rutland, Sudbury, Worcester, Amesbury, Exeter, N. H., Bedford, Chelmsford and other places were represented among the proprietors.

Petitioners and Proprietors.—The names of the original petitioners were: "Benoni Boyenten, Moses Hazzen, William Hutchins, Caleb Dalton, John Hazzen, Jacob Perley, Samuel Stickney, Phinias Foster, Stephen Merril, Benjamin Barker, Robart Ford, Abner Brown, Samuel Hilton, John White, Benjamin Walker, Joseph Reed, John Baker, John Goss, Joseph Wrighte, Richard Hall, Oliver Pollard, Samuel Fletcher, John Dunton, William Spalding, John Varnum, John Leveston, Junr., Joseph Whelock, Robarte Phelps, Jonathan Houghton, Jacob Emes, Henry Willard, John Bennet, Jeremiah Perley, and in behalf of Joshua Hutchins, Jathro Eames, Jonas Houghton, Ezra Sawyer, James Houghton, Samuel Sawyer, Aron Rice (Ried?), Jonathan Adams, Moses Chandler, Samuel Rugg, Jonathan Atherton, Ephraim Houghton, Jonathan Wilson, Steven Houghton, heirs of Samuel Mossmann, Benjamin Gates, Fairbanks Moores, Joseph Whitcomb, Samuel Larned, Daniel Houghton, Peter Atherton, John Wilder, Edward Houghton, Henry Houghton, David Whitcomb, Timothy Hale, Jonathan Parling, Samuel Brown, John Sawyer, Joseph Willson, Samuel Willard, Ephraim Farnsworth, Edward Hartwell, Ruben Farnsworth." The five of these petitioners who were excluded by the General Court were: Edward Hartwell, Joseph Wright, Joseph Whelock, Robart Phelps and Jonathan Houghton, Jr.

Nine persons required to be admitted among the proprietors were: Thomas Farmer, Henry Coulburn, Jonathan Farrer, Samuel Shaddock, Samuel Trull, Jacob Corey, Joshua Webster, Abiel Foster, Samuel Tarbol. Thus the names of seventy-one proprietors were recognized in the grant, many of whom never became settlers, but transferred their lands to children or other assignees. In a subsequent report of the names by the proprietors' clerk, the name Aaron Ried appears instead of Aron Rice, and Sam[ll] Terrill in place of Samuel Trull. It may be deemed more likely that the true names were Ried and Terrill, an imperfect signature possibly explaining the early error, which was corrected by the proprietors' clerk after ample acquaintance.

Samuel Willard appears to have borne the military rank of major; Jeremiah Perley and Jonas Houghton, that of captain; John Bennet and Samuel Tarbol, that of lieutenant.

Services in the Indian War.—The following statement is made by Willson, in his address at the one hundredth anniversary of the incorporation of the town, of the services referred to in the petition of the proprietors. "What proprietors of this town rendered services under Captain White, of Lancaster, or what the particular services rendered were, it is out of my power to tell; but we have the means of identifying above forty of the seventy-one proprietors of this town, as having been volunteers under the famous and redoubtable Captain Lovell, of Dunstable, on the last but one of his marches into the Indian country,—they constituting about three-fourths of his whole force. This was the expedition in which a camp of ten Indians was surprised, and the whole number exterminated." It is not easy to pass this allusion without expressing a sense of humiliation in view of the fact that this warfare against the Indians was carried on in pursuance of an offer by Massachusetts of a bounty of one hundred pounds (sterling money) each for the scalps of the Indians. The scalps were brought in and the bounty paid. Aside from the barbarism of this warfare on the part of the whites, which the petitioners shared with the people of Massachusetts, the character of the original proprietors, as thus indicated, is of interest when considered in connection with events which took place at the time of the Revolutionary War. Their martial service was the occasion of a designation of the town, which sometimes appears in the early records as Volunteer's Town, or, by abbreviation, Voluntown. The name borne by established usage from the date of settlement to that of incorporation, 1854, was Nichewaug. This name

is still preserved as the post-office designation of a village in the southern part of the town.

The proprietors held their first meeting in Lancaster, May 10, 1733; the second in Groton during the autumn of the same year. At this meeting, in Groton, it was voted that a meeting-house be built. It will be noted that Groton is central between Lancaster, Dunstable and the neighboring towns, from which the recruits for the companies of Captains White and Lovell were enlisted.

SETTLERS.—More of interest attaches to the names of the early settlers than to those of the proprietors as such, many of whom never located in the town, but disposed of their rights to others. In pursuance of action by the General Court, Thomas Adams, proprietors' clerk, prepared, December 14, 1750, a report of the names of forty-seven settlers, with the proprietor's right on which they were located. This affords a means of distinguishing this number of settlers by the names which follow: John Stowill, Jacob Wheeler, Jonas Farnsworth, Sam^{ll} Willson, Nath^{l} Sanderson, Nathan Goddard, Isaac Ward, Christ^{fr} Page, Isaac Hilldrake, Nath^{l} Stevens, Salvenas How, Joseph Marble, David Stone, Simeon Houghton, David Page, John Wilder, Junr., Dan^{l} Mills, George Dobbins, Sam^{l} Willard, Jun., Esq^{r}., Aaron Allen, Ephraim Rice, Joseph Willson, Sam^{ll} Whittemore, William Negus, Sam^{ll} Marble, James Clemence, Ebenezer Davis, Thos. Robbins, Dan^{ll} Owen, Benj^{a} Chandler, Nath^{ll} Wilder, Zedekiah Stone, Ebenez^{r} Hill, David Lawson, Thomas Rogers, Daniel Fisk, Edmund Bingham, Edward Allen, Jon^{n} Marble, David Lawson, Jun^{r}., Sam^{ll} Gats, David Sanderson, Dan^{ll} Dunkin, Charles Wilder, Aaron Wilder, Dan^{ll} Spooner, Eleazer Sanger.

The report closes with this statement:

"There are Divers others settled on Devisions belonging to the same Rights that are here settled, but the time being so short since I saw the act in the Prints that I am not able at present to give an exact account what particular Rights they are settled on and convey the same to the General assembly by the time appointed; but the number of families in said Township are Sixty-one."

This report dates from four years previous to the incorporation of the town, 1754. The first census, taken in 1765, showed a population of seven hundred and seven.

Tradition reports that the first two houses in the settlement were built by Joseph Willson and Simeon Houghton, the question of precedence not being determined.

RELATIONS WITH THE INDIANS.—The proprietors of the town of Petersham acquired by purchase, in addition to the grant of the General Court, an Indian claim upon the land. Probably this contributed to the peaceable relations of the settlers with the claimants, no death by savage violence having ever been reported as occurring within the town. We have a glimpse of the early time in the following description, by Captain Park Holland, whose father came to the town from Shrewsbury in 1752, of an alarm at the time of the French and Indian War, 1756: "I recollect as distinctly as if but yesterday when the inhabitants were called upon to be ready to defend themselves. We were at church when news came that the enemy was near. The services were immediately ended, and each man seized his gun, which he had left at the door, hastened home to be ready to march in the morning. I well remember one of our neighbors coming to borrow a darning-needle of my mother to mend her husband's stockings, which I very much wondered at, it being Sunday, not exactly seeing how the expected approach of the French and Indians could lessen the sin of working on that holy day. I was then probably four or five years old." As this was an alarm it appears that their habit was to take their guns to church, which at a later date has not been thought to be in good form. Horr quotes Whitney to the same effect in the following passage: "Although the prospects from the soil were very promising, and settlers moved in fast, yet they laboured under many and exceeding great disadvantages, being then so remote from any white people, from whom they could procure the necessaries of life, or derive any aid or support. While in its infancy and struggling for life, a French war broke out, and the Indians, being always in the interest of the French, became hostile, and began to commit depredations in various parts of the land, which occasioned the few inhabitants great fear and danger, obliging them to build forts in different parts of the town, round certain houses, into each of which a number of families moved for safety and defence, and soldiers were stationed there as a guard to the inhabitants, and to reconnoitre the country. The people used to labor on their lands in small parties, changing work with one another, having their guns by them, and these, also, they were for a long time obliged to carry with them whenever they went to the House of God for religious worship, and also to place sentinels at the doors."

CHAPTER LXXI.

PETERSHAM.—(*Continued.*)

INCIDENTS OF THE REVOLUTION.

Employment of a Teacher—Dedication of a Liberty Tree—Breaking Open a School-house—A Suit for Damages—A Brilliant Attorney—A Representative Instructed—Warlike Resolutions—Greeting to Boston—That "Town" Invited to Petersham—The Doings of Several Parties—Royalists Disarmed—A Town-meeting in 1776—The Muster-roll—Clearing a Parade Ground—Captain Holland Dines with Washington—Inoculated with Small pox—Financial Honor of the Town.

THE town history presents a most interesting series of incidents connected with the Revolution. One of

the first grew out of the employment of a teacher. Rev. Aaron Whitney, pastor of the church and member of the School Board, was a royalist. (More than a hundred years removed from the passions of that time, we may well avoid the current epithets and show the literary courtesy of styling the two parties to the revolutionary struggle royalists and revolutionists, words exactly expressing the political position of the opponents.) Ensign Man, an applicant for the position of teacher, was in sentiment a revolutionist; in view of which Mr. Whitney refused to take part in his examination, but was present. The teacher was employed notwithstanding the opposition of Mr. Whitney, and became a party to several events connected with the war.

In 1768 the Massachusetts House of Representatives had forwarded an address to the King, relative to grievances, which was deemed by the crown offensive in its terms, and the House was ordered to rescind its action. The vote upon this question was seventeen in favor of to ninety-two against rescinding the petition. The "Sons of Liberty," at Petersham, celebrated, in characteristic fashion, this refusal to withdraw a petition for redress of grievances. They selected a thrifty young elm tree, and cut away seventeen branches, leaving, as tradition declares, ninety-two remaining. With songs, toasts and patriotic ceremony the dismembered branches were consigned to the flames, and the living tree dedicated to the Goddess of Liberty. That Ensign Man, teacher of the children of the place, should take part, as he did, in such ceremonies, would naturally arouse the indignation of the royalist citizens of the town. A certain school-house stood upon ground which was claimed by Captain Thomas Beaman, as was the school-house itself, to be his property. For the purpose of keeping the offending schoolmaster from using this school-house, Captain Beaman closed the door with a padlock. Mr. Sylvanus How, who had formerly owned the land, claimed that the school-house stood in the highway, and, going with Mr. Man, they broke open the door. A suit for damages arose, the decision of which awarded the plaintiff, Captain Beaman six shillings. The defendants appealed and obtained, a reduction of this small award, but were compelled to pay the costs, which were a considerable sum. Utterly trivial, petty and insignificant as this is, it led, such being the complications of human events, to that which rises to the dignity of historic consequence. Sylvanus How had employed no less a personage than the brilliant and distinguished Josiah Quincy, Jr., to defend him from being, as he thought, unrighteously mulcted in the sum of six shillings for opening a school-house. This able lawyer was unsuccessful so far as the main question was concerned. A petty reduction of the petty fine was all he accomplished, leaving the right of the cause, as awarded, to the plaintiff Beaman. But Mr. Quincy was able to render Mr. How other and very much more important services, which may now be narrated.

The Boston Committee of Correspondence had sent out its Circular Letter to the towns. Mr. How was chairman of the town committee to draft a reply to that circular. He sought unofficial assistance from his attorney, Mr. Quincy, who used the opportunity with good effect. Mr. How's associates upon the committee were Colonel Ephraim Doolittle, Jonathan Grout, Samuel Dennis, Daniel Miles, Captain Elisha Ward, John Stowell, Theophilus Chandler and Deacon William Willard. This committee, with the friendly assistance of Mr. Quincy, prepared a reply to the circular from Boston, a series of resolutions relative to the condition of the colonies, and a series of instructions to their representative to the General Court. Colonel Ephraim Doolittle represented the town and was also moderator of the town-meeting, held January 4, 1773, which acted upon the report. An excerpt from the instructions to their representative is of special interest as showing the temper of the report:

It is our earnest desire, and we here direct you to use your utmost influence (as one of the legislative body) to convince the nation of Great Britain that the measures they have meted out to us will have a direct tendency to destroy both them and us; and petition the King and Parliament of Great Britain, in the most pathetic and striking manner, to relieve us from our aggravated grievances. But if this should fail, we recommend it to your consideration and direct you to move it to the consideration of the honorable Court, whether it would it not be best to call in the aid of some Protestant Power or Powers, requesting that they would use their kind and Christian influence with our mother country, that so we may be relieved, and that brotherly love and harmony may again take place, and that natural alliance again be restored between us and Great Britain, which may continue until time shall be no more.

An excerpt from the resolutions, known to have originated in the mind of Mr. Quincy, presents the alternative of the town in case of the failure of the peaceful methods of petition and arbitration:

Resolved, That it is the first and highest social duty of this people to consider of, and seek ways and means for a speedy redress of these mighty grievances and intolerable wrongs; and that for the obtainment of this end, this people are warranted by the laws of God and nature in the use of every rightful art, and energy of policy, stratagem and force.

This historic deliberative action of the town recommended a petition, "in the most pathetic and striking manner," for redress of grievances, arbitration as the alternative; but failing in these, the town declared resistance warranted by use of every rightful art, energy of policy, strategem and force. Can it be truly said that this deliberative conclusion of the town in parliament, January 4, 1773, was in any respect less significant, though less famous than the actual use of force which began at Concord two years later?

The letter of reply to the circular sent from Boston contains such a portraiture of the times that it may well be given entire.

To the Committee of Correspondence for the town of Boston:

GENTLEMEN: The town of Petersham having received the circular letter from the town of Boston, with the state[ment] of rights and grievances as published by them, most sensibly congratulate you on reflecting on that principle of virtue which must have induced your town, at so critical a day, to take the lead in so good a cause; and our admiration is heightened when we consider your being exposed to the

first efforts of the iron jaws of power. The time may come when, if you continue your integrity, that you may be driven from your goodly heritages; and if that should be the case (which God of his infinite mercy prevent), we invite you to share with us in our small supplies of the necessarys of life. And should the voracious jaws of tyranny still haunt us, and we should not be able to withstand them, we are determined to retire and seek refuge among the inland aboriginal natives of this country, with whom we doubt not but to find more humanity and brotherly love than we have lately received from our mother country.

We are sensible that there is a number amongst us who are wicked enough to make use of their whole influence to divide and render the efforts making for a union abortive; and that they are induced to conduct in this manner from the low motives of expecting to be sharers in the arbitrary power which they are so active in endeavoring should take place, and of sharing in the unrighteous plunder of their fellowmen. But may God graciously disappoint their measures and turn their hearts! We herewith send an attested copy of the doings of our town. If the nature of causes ever again bespeaks any more from us, we then again shall offer what then may appear right, for we read that those that were faithful spake often one to the other; and may God of his infinite mercy, in his own time deliver us!

SILVANUS HOW, *per order*.
DAVID SANDERSON, *Town Clerk*.

Specially noticable is the invitation given to the "town of Boston," in view of the then possible future event of being overcome by "iron jaws of power," to take refuge in Petersham and share with them in their "small supplies of the necessarys of life." Fortunately, the British lion was not able to drive the "town of Boston" to an acceptance of this hospitable invitation; but it is a curious fact that a century later many of the people of Boston, overcome by a lion, did, and still do, take refuge in Petersham, to there share with the good people the ample supplies of the "necessaries of life." Not the lion of the English flag, but the astronomical lion, whose fury brings July and August temperatures, constrains at least some of the people of Boston to favorable consideration of the historic invitation to Petersham.

Of several parties to these incidents it may be said that Ensign Man became captivated by the charms of Miss Alice Whitney, the minister's daughter, whom he married, renouncing his former political views. Colonel Doolittle, although not personally present, was the first officer of a Worcester County regiment which took part at the battle of Bunker Hill. Daniel Miles and Sylvanus How became soldiers in the Revolutionary army. Captain Beaman, who locked the school-house door, won execrable distinction by piloting the British troops from Boston to Concord. Josiah Quincy rendered his country memorable service by his eloquence and patriotism.

ROYALISTS DISARMED.—The town was not without a local exhibition of force, which, however, did not lead to bloodshed. Dr. Ball, of Templeton, which then included Phillipston, on a visit to Petersham, fell into a disputation with one or two young men who were of the revolutionary party. Separating with ill-feeling, the men waylaid the Templeton royalist on his way homeward, and pelted him with stones, one of which took serious, one tradition says subsequently fatal, effect. The outrage naturally aroused the royalists of Templeton, and friends of Dr. Ball, who came over in force and were joined by friends of their cause in Petersham. A like assembly of the friends of the colonial cause took place under the leadership of Captain Holman, also of Templeton, the result being that the royalist party took refuge in a house then owned by David Stone, now in possession of Mr. George West, and barricaded their place of refuge. The opposing revolutionists besieged the house and guarded it during the following stormy night, after which the royalists were induced to surrender. They came out and were escorted to the hotel kept by Mr. Winslow, and an investigation took place with this result: the royalists were required to give up their arms and agree not to act against the revolutionary movement in future. The injury to Dr. Ball had given them just cause of complaint, but the cause of independence was in their estimation superior to any question of personal assault and battery, and these Petersham patriots took occasion, in January or February, 1775, to thus disarm their opponents, and parole them substantially as prisoners of war. Tradition declares that on that night of siege two wives, whose husbands were in the opposing ranks, met in the fields between their respective dwellings, and exchanged personal sympathies as neighbors and friends.

A town-meeting was held May 27, 1776, "to see if the inhabitants will instruct their representative to inform the Great and General Court of this Province that they stand ready, and are fully determined to support the Continental Congress with their lives and fortunes, on condition they should declare the American colonies independent of corrupt and arbitrary Great Britain." Affirmative action was taken, with but one negative vote.

ENROLLMENT OF SOLDIERS.—The virtue of a promise is in the performance thereof. How well the town kept its promise in behalf of the cause of independence may be seen from its roll of revolutionary soldiers.

Col. Ephraim Doolittle commanded a Worcester County regiment. Capt. John Wheeler led a Petersham company in the same regiment. The names of the men of this company, some of whom may have enlisted from other towns, are given, with various marks of interrogation, by Rev. Edmund Willson. Edw. Barker (or Bowker), Lieutenant; John Bowker, Lieutenant; Thos. Davenport, John Holland, John Rogers, Joel Doolittle, Sergeants; Thad. Houghton, Corporal; Thomas Wheeler, Drummer; Caleb Bryant, Fifer; Israel Houghton, Caleb Perry, David Perry, Aaron Allen, Bezile Amsdel (Bezaleel Amsden?), Sam. Bryant, Thomas Bowker, Ezekiel Bouker, Nat. Bozworth, David Clarke, Reuben Cummings, Ephraim Clafflin, David (Daniel?) Claflin, John Finney ("Fiendly" or Findlay?) Benjamin Ganson, Joanna (?) Gallen, Peter Gore, Luther Holland, Phazez (?) Houghton, Silvanus How, John How, Jacob Houghton, Henry W. Hunt, James Hawkes,

Thos. Jackson, Benj. Knapp, Dan'l Miles, Joab Miles, William Peckham, Eph. Bill, Amos Bill, John Bill, Luke Bill, Abel Rogers, Jabez Spear, Dav. Sanderson, Eph. Sterns, John Stores (Stowell?), Ruggles Spooner, Eliak (im) Spooner, Wing Spooner, John Warden, John Wilder, Cornelius Wilder, Joseph Wilson.

The following additional names are given as Petersham men who belonged to the company of Capt. Fletcher, of Templeton: Jotham Houghton, Ebenezer Ingersoll, William Clements, Daniel Duncan, David Fling, Silas Harris, Stephen Hall, Robert Hill, Joseph Negus, Abel Wheeler.

In the company of Captain Jonathan Holman, also of Templeton, were found Martin Rice, fifer, David Bruce, Thomas Groce, Daniel Hastings, Isaac Palmer, Amos Rice, Ebenezer Wilson. Seventy-two names are thus given as either belonging to the Petersham company or enlisted from the town in the companies of Captain Holman and Fletcher, of Templeton.

In addition to these names given by Willson, we mention those of two brothers, Captain Ivory Holland and Captain Park Holland. For a sketch of the life of the latter, see biographical notes. One incident of his service may be here given in his own words:

A Dinner by Washington.

In the spring of 1781, I think it was, our troops marched down to White Plains and formed an encampment, and while there we were amused by an order that was said to have come from Gen. Heath, but, as we all knew Washington's abhorrence of the sin of profanity, we knew well where it originated. Our parade-ground was cleared with much difficulty. The order was that the first one who was heard to utter an oath should dig up by the roots one of the pitch-pine stumps, which was no very easy matter. Not long after a soldier was seen sweating and toiling away at one, declaring that it was paying too dear, and it should be the last he would dig. Speaking of Washington's dislike of profane habits reminds me of a scene at his own table, where twenty or more of the officers were invited to dine with him. His habit was usually to take a single glass of wine after dinner, and retire, leaving us to ourselves, as he, at this time of care and anxiety, rarely made any conversation except on business. We had finished our dinner, and Washington had taken his wine in his hand, when a young officer from New Hampshire at the end of the table, who had long been in the habit of using profane language, being so much engaged, forgot where he was, and swore an oath, when he heard a rap on the table by Washington, who set down his untasted wine, arose and said, "Gentlemen, when I invited you here it was my intention to have invited gentlemen only. I am sorry to add I have been mistaken," and left the room. A dead silence reigned for some time, which was broken by the offender himself calling us all to witness that the oath he had uttered should be his last; adding he should rather have been shot through the heart than have deserved the reproof from Washington. Such was our love and reverence for this great and good man that the most profane left off the habit, and it was done away with among us before the close of the war.

The regiment in which Captain Holland served, as a matter of preparation for service, went into barracks at Bunker Hill and, this being before the discovery of vaccination, were inoculated with smallpox. He passed through this experience and tells us that "about nine hundred entered the hospital, eight hundred of whom recovered." Such was the cost of independence.

The record of the annual town-meeting held March 6, 1780, contains an entry which is very creditable to the financial honor with which the soldiers were treated. It appears that the town "Chose a committee for hiring soldiers: Joseph Gleason, Robert Peckham, John Bouker,—voted that the committee, if they have to hire money or soldiers, that they engage on the Town's credit to keep the money of Equal value." It will be borne in mind that the United States did not undertake to act upon this principle in payment of the soldiers of the Rebellion.

During the Revolution the town well and patriotically sustained the military character of its population at the time of settlement, which gave it for a time the occasional name Volunteer's Town.

CHAPTER LXXII.

PETERSHAM—(*Continued.*)

SHAYS' REBELLION.

Causes—The Insurgents at Pelham—Government Troops at Hadley—The Night March and Dispersion—Report of Gen. Lincoln—Narrative by Capt. Holland—Rev. Dr. Samuel Willard an Eye-Witness—"Infantry in Arms"—Considerate Judgment.

THE insurrection commonly known as Shays' Rebellion grew out of the disorganization of society during the Revolution, the impoverishment of the people by the war (making payment of debts difficult) and the weakness of the civil administration under the Articles of Confederation. It strikingly called attention to the need of a stronger government and thus incidentally contributed toward the movement for "a more perfect union," by the adoption of the Constitution of the United States, the imperfection of the previous union being illustrated in this and other resistance to constituted authority.

On Saturday morning, February 2, 1787, Captain Daniel Shays, after various efforts to interrupt the proceedings of the court, for the purpose of preventing the collection of debts, was found at Pelham with about two thousand men. General Lincoln was at Hadley with an armed force of government troops. The situation and subsequent events are best described in the report of Gen. Lincoln to Governor Bowdoin and in historical letters by Capt. Park Holland and Rev. Samuel Willard, D.D.

Gen. Lincoln's report is as follows:

Petersham, February 4, 1787.

Dear Sir,—I have been honored with the receipt of your Excellency's favors of the 25th ult. and the 1st inst. with the warrants.

In my last I mentioned to you that I had various applications from the neighboring towns, and what answers I had given. These, I think, had a happy effect, and the towns have felt themselves much interested in recalling their men, and putting an end to the progress of the insurgents.

I remained a number of days at Hadley, refreshing our men, who had experienced severe fatigue; this gave time for the Insurgents to reflect

upon the offers which had been made to them, and for the selectmen to interpose their authority.

Friday we reconnoitered their post with an intention to approach them the next day. This movement gave them an alarm, and at 3 o'clock Saturday morning I received a flag from Wheeler, requesting that he might have a conference with Gen. Putnam. It was granted and they met Saturday forenoon. To provide for his personal safety seemed to be the principal object he had in view—no encouragement on this head being given, he retired; and Saturday evening I was informed that Shays had left Pelham, and had pointed his forces towards this place, where, it was said, he expected to be joined by many others, and where he could make a stand, as many towns in this vicinity were in his interest. At 8 o'clock our troops were in motion; the first part of the night was light, and the weather clement; but between 2 and 3 o'clock in the morning, the wind shifting to the westward, it became cold and squally, with considerable snow. The wind arose very high, and with light snow that fell the day before and was falling, the paths were soon filled up, the men became fatigued, and they were in a part of the country where they could not be covered in the distance of eight miles, and the cold was so increased that they could not halt in the road to refresh themselves. Under these circumstances they were obliged to continue their march. We arrived here about 9 o'clock, exceedingly fatigued by a march of 30 miles, part of it in a deep snow, and in a most violent storm. When this abated the cold increased and a great part of our men are frozen in some part or other—I hope none of them are dangerously so, and that most of them will be able again to march in a short time. We approached this town nearly in the centre, where Shays had covered his men; and had we not been prevented by the steepness of the hill and the depth of the snow from throwing our men rapidly into it, we should have arrested very probably one-half of his force: for they were so nearly surprised, as it was, that they had not time to call in their out-parties, or even their guards. About 150 fell into our hands, and none escaped but by the most precepitate flight in different directions; but most of their men fled for Athol. It is said they intended to reach Northfield. This brings him near the line of another State, where he may vainly hope to find an asylum. Thus, Sir, that body of men, who were, a few days since, offering the grossest insults to the best citizens of the Commonwealth, and were menacing even Government itself, is fast dissipating, and it will not long, I think, have the least existence. It must be pleasing to your Excellency to know that this has been effected, and bloodshed avoided, but in an instant or two, where the Insurgents have rushed on to their own destruction, after every effort had been made by the officers of Government to prevent it. That so little has been spilt is owing, in a measure, to the patience and obedience, the zeal and fortitude discovered in our troops, to whom too much thanks cannot be given. A different line of conduct which Shays flattered his troops would be manifested and would have given them support, and led them to acts of violence, while it must have buoyed up the hopes of their abettors and stimulated them to greater exertions.

As soon as the troops are able to move I shall follow Shays, and throw part of our force into Berkshire. Before I leave this place I shall make a disposition of the troops, and discharge such whole services as are no longer necessary.

Notwithstanding the present state of things, much is necessary for the General Court to do; and decided measures on their part will give support to our friends and dismay to others,

I have the honor to be with highest respect, your obedient servant,

B. Lincoln.

Mr. Cabot will honor this by being the bearer of it. His great attention to duty and his knowledge therein entitle him to thanks. He will give your Excellency a more minute account of matters than I have been able to write.

His Excellency Governor Bowdoin.

An extract only can be given from the singularly interesting narrative of Capt. Park Holland, which will amply explain itself and throw fresh light upon the report of Gen. Lincoln:

Some time in December I was appointed to take the company raised in the towns of Petersham, Athol and Rutland, which was immediately filled by voluntary enlistment. I had enlisted as private soldiers thirteen old commissioned officers, among whom was Gen. Rufus Putnam, in whose regiment I had served during the War of the Revolution. During these transactions Capt. Daniel Shays, commander-in-chief of the opposite party was not idle. He had collected, it was said, eight or ten thousand men, a part of whom, under the command of Luke Day, were somewhere in the vicinity of West Springfield. Another large force commanded by Adam Wheeler collected first at Princeton, from thence marched to New Braintree, while Shays with the main body was in or near the town of Pelham. While Gen. Lincoln and his troops lay at Worcester, news arrived that Shays with his division was on the march to Springfield to take possession of the Continental stores, arms, ammunition, etc., which were deposited there. Gen. Lincoln marched immediately to Brookfield, where he halted for the night. The next day we continued our march for Springfield, and while on the way sometime before noon we heard that Shays had reached there already and had had an encounter with Gen. Shepherd, who was there guarding the United States property with a detachment of government troops. We soon met stragglers from Shays' retreating troops, among others a sleigh with two or three dead men, who, as a soldier remarked,—"poor fellows, had had their grievances redressed forever," the "redress of grievances" being a term much in use among them. It was with no small grief that I now recognized in one of the dead my old friend Spicer. . . . I had known him as a faithful soldier through the war and as one who at various times had manifested much affection for me. On our arrival at Springfield we found that Shays had made a rapid retreat towards Pelham, and Gen. Shepherd gave us the following account of the battle, if it could be termed such: 'Shays and his men were found to be rapidly marching to Springfield, where the Continental stores were deposited and guarded by Gen. Shepherd, who immediately sent out his aids with a flag to inform Shays that if he advanced any further he should fire upon him. He returned no answer, but continued marching more rapidly towards Shepherd, who then ordered his field-pieces loaded, some with balls and some with grape shot, and when within reach of the guns he ordered one of the field-pieces to be fired over the heads of the insurgents, which was quickly done, but they only quickened their march instead of halting, as he had hoped they would do. Another piece was now ordered with as good aim as possible at the main body. This had the desired effect, a rapid and disorderly retreat, leaving their dead and one mortally wounded on the field. Gen. Shepherd remarked to me that at no time in his life was he called upon to perform so painful a duty as when he ordered good aim to be taken at Shays and his men, many of whom had fought at his side and stood firm through the most trying scenes of the late war. I had served under Shays and knew him to be a brave and good soldier or officer, and I can truly say that it was with no regret on my part that I had not reached here in season to see him and his mistaken followers fired upon as enemies.

While Shays was advancing upon Springfield Capt. Day had collected a considerable force on the opposite side of the river at West Springfield to re enforce Shays if necessary. Therefore, soon as Lincoln's men had taken some refreshments we crossed the river to call Capt. Day to account for his acts and deeds, but on our arrival we found that he, in his wisdom, had thought best to disband his troops, and that neither he nor his kinsmen were to be found. We next marched to old Hadley, thinking it possible that Day might collect his men and attempt to join Shays at Pelham. Here we remained two or three days to refresh and wait for our artillery and stores to overtake us. About the third day of our tarry in Hadley, at sunset we received orders to march immediately as we supposed to Pelham, but the fact was that Gen. Lincoln had received information that Shays had left Pelham and was on his way to Petersham. We left immediately, late as it was. The weather was comfortably warm, but about ten or twelve o'clock in the night the wind changed to the northwest, blew furiously, accompanied by a violent snow-squall, and became intolerably cold. The snow was deep, though a fine sleigh path would have made it good travelling had it not been that our artillery was in front with wheels so much wider than the path that the road was filled with loose snow, which rendered the travelling as uncomfortable as can well be imagined. We reached Petersham about sunrise next morning, tired, hungry and frozen, having travelled in the course of the night thirty miles, the hardest march I ever endured. I found myself badly frost-bitten, and found but two of my whole company who were not more or less frozen. Shays being informed that Gen. Lincoln was close in his rear thought it best to leave town, and so rapid were his movements that many left their provisions, and some on the fire preparing for breakfast. Our quartermaster had gone in front of us to look out for houses to lodge in, so when we reached the main street we had only to take possession of such as were pointed out to us, some of which were still occupied by Shays' men, who soon left and gave us a peaceable entrance. Never were a good fire and breakfast enjoyed more highly by any set of men. The main body of Shays' troops marched

through the town to the northern bounds, which pass through a valley, and were in a measure out of the cold wind. There they made a halt, probably to consider what was best to be done; either to make a firm stand and give Gen. Lincoln battle or to make a final retreat. It appears that they chose the latter, as many returned to their homes.

Their place of halting, as mentioned above, was directly in front of my home, where my family then were, and it may be supposed felt themselves in a very unpleasant situation, as it was well-known that I was out in Lincoln's Army, and of course unfriendly to Shays. Of course they had reason to expect some abuse from them. My wife was at this time confined by illness to her chamber, but with her usual presence of mind she told the young man living with her to make a good fire in each room in the house as soon as she saw their intention of halting, and to bring from her cellar and pantry everything she had to offer for breakfast. The house was soon filled to overflowing with men half starved and half frozen, among whom was Mr. Converse, now quartermaster, an acquaintance of ours. My wife sent for him and told him she had done all in her power for their relief and comfort, and hoped he would see that they did no damage to the house. He assured her that he was very grateful, and that as far as possible he would comply with her request; which he strictly did, and after eating and warming themselves to their satisfaction they departed, having done no damage save clearing the house of every eatable thing.

An appendix to the address of Rev. Edmund Willson preserves to us a graphic description of the rout of Shays' men by an eye-witness, Rev. Dr. Samuel Willard. The house of his father was one of several that were occupied by troops, they supposing that their own march of the day previous had put a long distance between them and the forces of Lincoln.

"I well remember," writes the Rev. Dr. Willard, of Deerfield, "the entrance of the insurgents into Petersham, and the alarm it excited among those who were known to be on the side of the Government. Several of the insurgents had been arrested and condemned to death for having been found in arms the second time, in violation of the oath of allegiance which had been imposed after their first capture; and their party had threatened to take prisoners who should be held as hostages for the life and safety of those who were under condemnation. On this account my father and some others secreted themselves when the insurgents approached their houses. The sudden and unexpected arrival of Lincoln the next morning, and the precipitate retreat of Shays and his army dispersed all fear, but not all trouble. The army of the Government was quartered upon us from Sunday morning till Wednesday, and left our houses in such a state as to inspire dread of armies in every bosom.

"The insurgents were little prepared to act with efficiency. To say nothing of their want of personal qualifications, they were deficient in arms. Some of the *staff* officers were appropriately armed; for, in his flight, one of them left at our house the only weapon which I think he had,—a *cane*, which was nothing else than a stick stripped of its bark, with a pewter head, of which my boyhood took possession.

"One or two anecdotes will show the panic, and the want of military tactics which were apparent in the retreat:

"I was out at the door on the approach of Lincoln's army; and an officer of the insurgents came riding up at full speed, and gave me, a boy of ten years—the oral commission, 'Run into the house, and tell them to parade in a minute, for the enemy are upon us!' I went in, but found them in as much confusion as a hive of bees swarming. After they were gone, it appeared that one of them had forgotten to take his gun, and a brother of mine took possession of it, and it was never called for.

"It was in the midst of a violent snow-storm, or, rather, the snow was flying, and it was very cold. Some poor wight had his hat taken from his head, and, I suppose, went without a hat against that furious north wind to Athol, where they halted. I, myself, found the hat the following spring in one of our lots, and, as my head was large for a boy of my age, it suited me very well, and I finished the wear of it."

The writer has often conversed with another eye-witness to the scenes, a younger brother of the author of these reminiscences, the late Deacon Cephas Willard, well known in Worcester County. But he, with a humorous twinkle of his eye, excused himself for not remembering details by saying, "I then belonged to the *infantry in arms*, and not *under arms*."

Other houses in the town are said to have been occupied in similar manner, including the village tavern and that of the minister, Rev. Solomon Reed. He was a large, portly man, who stood guard in his halls for the night, as tradition affirms, with drawn sword, in order to prevent trespass on the part of the insurgents.

The plea of Captain Holland for a kindly and considerate judgment of Shays' men ought not to be overlooked. He says,—

I observe here there are many things to be considered before we condemn the misled followers of Daniel Shays. Their leaders were ignorant, and many of them deceived. Our government was a new and untried ship, with many joints that needed oiling, to say the least; with no chart of experience to guide us, nor map of the past by which to lay our course. He who stood by the side of these men in many hard-fought battles with a powerful enemy, and witnessed their hardships and sufferings, borne without complaint, would much rather remember the good service they rendered their country than dwell upon what historians have set down as a blot upon their country's pages.

CHAPTER LXXIII.

PETERSHAM—(*Continued.*)

THE CHURCHES.

A Meeting in Groton—Aaron Whitney ordained as First pastor—Opposed to the Revolution—Action by the Town—A Guard at the Church-door—Solomon Reed Ordained—Indian Corn Offered as Salary—A Mutual Council to Settle "Jarrs and Quarrels"—Festus Foster Ordained—The Covenant Changed—Rev. Luther Willson Installed—Disestablishment of the Churches—Property Transferred—The Ministerial Land Sold for Corn—Sundry Bequests—Rev. George R. Noyes, D.D., Settled—Biblical Scholarship—Rev. Nathaniel Gage Settled—House of Worship Built—Clock and Bell—Several Pastors—Congregational Church—Baptist Church—The Universalists—Methodists.

THE long and generally peaceful prosperity which followed the adoption of the Constitution of the United States gave opportunity for the growth of the churches, schools and industries of the county and of this town. The local growth may be here narrated from the beginning. The proprietors of the town voted, at their second meeting, held at Groton, in the autumn of 1733, to build a meeting-house.

This action, taken in a town forty miles distant, recalls still earlier events. In the settlement of the colonies the civil and ecclesiastieal organization was sometimes effected on shipboard, or in England before the colonists embarked. The town and church of Dorchester were organized at Plymouth, England. Afterward the community removed from Dorchester to Winsor, where it united with other towns in the formation of the State of Connecticut. So the erection of a church at Petersham was ordered by a vote taken in Groton. Five years passed before the settlement of a pastor, preaching being maintained during a portion of the time.

In 1738 a young graduate from Harvard was dismissed from the church at Littleton and came to Nichewaug to be the minister of the town and church which was yet to be organized within it. A church covenant was adopted and Aaron Whitney was ordained and settled as minister. A proprietor's lot was assigned to him, with two hundred pounds in money as a settlement and one hundred and fifty pounds as an annual salary. He was ordained in December of the same year. Isaac Ward and Thomas Adams were chosen deacons. Probably the dedication of the house of worship also took place.

The covenant adopted was Trinitarian in form. It was in use until the year 1802, or sixty-four years, when a statement of faith Unitarian in its terms was substituted. The pastorate of Mr. Whitney appears to have been peaceful and prosperous until the time of the Revolution. He was royalist in sentiment, and this led to a vote of the town that they "will not bargain with, hire nor employ the Rev. Mr. Whitney to preach for them any longer." He was treated as "an enemy of his country," though his character was blameless and his fidelity unimpeachable. Mr. Whitney regarded the action of the town as wholly illegal and would have continued to preach in disregard of the vote of the town. To prevent this a committee was chosen "to see that the publick worship be not disturbed by any person or persons going into the desk but such persons as shall be put in by the Town's Committee." In pursuance of this vote, the committee on the following Sunday stationed Peter Gore, a half-blood Indian, armed, tradition says, with a gun, at the door of the church, and when Mr. Whitney arrived he was not allowed to enter. A clear spring upon the Phillipston road, called "Gore spring," preserves the memory of Peter Gore, who owned the pasture in which it is found. Mr. Whitney continued to preach at his own house and still claimed to be the minister of the town. The pastorate was practically closed in 1777. Four of his sons were educated at Harvard College.

On the 15th of June, 1780, the town voted unanimously to call "Mr. Solomon Reed to settle with them in the work of the Gospel," and further "voted that the Town give him a Settlement of one hundred pounds Stated on Indian corn at three shillings pr bushel, to be paid in 30 days after his ordination." A yearly salary of one hundred pounds "on Indian corn" at the same rate was offered. At the suggestion of Mr. Reed these proposals were so modified that the payment was to be made in lawful money, it being agreed that "each and every hundred pounds when paid shall be with a sum of money sufficient to purchase six hundred and sixty-six bushels and tow-thirds of a bushel of Indian corn." The agreement further recited that, "Whereas, through the wiles of the adversary or through the weakness and Infirmities of human nature, dissention, difficulties, Jarrs and Quarrels may subsist between the said Mr. Solomon Reed and the Congregation in this Town, whether the Difficulty arises on the part of the Town church or on the part of s^{d} Mr. Solomon Reed," and provided that a mutual council should be called to compose and arrange all differences.

These conditions having been agreed to, Mr. Reed was settled and his pastorate continued until the year 1800, or about twenty years. This long service is sufficient evidence that Mr. Reed was beloved and respected by his people, although the truth of history compels one to say that he was not free from temptation to excesses in the use of intoxicating drinks. Furthermore, the people were not without fault in this respect, the selectmen having approved a bill of more than five thousand pounds for liquors and other articles for the ordaining council by which Mr. Reed was settled. This statement is made from memory of the language of the bill which the writer has seen. The explanation of the astonishing sum is found in the date, 1780, when currency was so inflated that the amount in specie was probably less than two hundred dollars.

In the year 1801 the church and town invited Mr. Festus Foster to become their minister. He consented, and was ordained January 13, 1802. Three months after his ordination the church substituted a "Christian Profession," Unitarian in sentiment, for the "Covenant" in previous use. The profession thus adopted has been continued by the First Parish, with slight changes, to the present time. The pastorate of Festus Foster closed 1817, when he was dismissed with honorable recognition of his faithful services.

Rev. Luther Willson, a native of New Braintree, born 1783, a graduate of Williams College, 1807, for some years preceptor of Leicester Academy, pastor of the First Church, Brooklyn, Conn., from 1813 to 1817, was installed at Petersham, June 23, 1819. The pastorate contained until October 18, 1834, or more than fifteen years, which, although his relations with his people were harmonious, he characterized as "times of excitement and division." After resignation, he lived in Petersham, preaching at various places from time to time, and died November 20, 1864, his grave being found in the cemetery east of the common. Luther Willson and Sally Bigelow were united in marriage November 30, 1806. Miss Bigelow was born July 6, 1783, and died January 29, 1826. Luther Willson and Fidelia Wells, of Deerfield, his second wife, were married December 5, 1827. She was born in Deerfield, August 6, 1797, and died in Bellows Falls, Vt., January 8, 1884.

During the pastorate of Rev. Luther Willson a State law was passed disestablishing the churches of Massachusetts. A Trinitarian Congregational Church was organized, which included those who did not accept the "Christian Profession," which had been substituted for the earlier "Covenant." The affairs of the Church were to be no longer connected with

the town. The property and records passed to the First Congregational Parish, which received from the town $3975.43 in money, that being the amount of a fund which had resulted from the sale of the "ministerial lands." These lands were one proprietor's lot set off for the maintenance of the ministry. They had been used by Rev. Aaron Whitney previously to the year 1775. Two entries in the records of a meeting held May 24th of that year will serve to indicate the cause of transfer of the lands to the care of the town:

"Voted unanimously, that the town will not hire the Rev'd Mr. Whitney to preach with them any longer, and that he is Dismissed from any further services as a Gospel Minister in this Town. . . . Voted, that the Selectmen take possession of and lease out the ministerial lands for the most they will fetch." Three years later, or in 1778, it was voted to sell the ministerial lands. From such sale the ministerial fund was established.

The report of the committee which sold the lands, accepted by a town-meeting, 1780, shows that four hundred and twenty-eight acres and one hundred and four rods were sold in lots to ten different persons, corn being the standard of value. The sales amounted to 6779 bushels and 22 quarts, as the value of the lands. The annual interest to be paid, as reckoned by the committee, was 405 bushels and 15 quarts. The rate appears to have been six per cent. The slight discrepancy in reckoning from these figures is doubtless explainable by the fact that the committee reckoned from a number of smaller quantities.

Upon the separation of the affairs of the church and town, Aaron Brooks, Esq., Jared Weed, Esq., and Jonas Carruth were the committee which made the inventory of church property to be transferred. The parish also received subsequently the sum of one thousand dollars, which was given by Nathaniel McCarty, his will having provided that the interest "shall be applied to the support of Unitarian preaching in said Town," and five hundred dollars, which were devised by an item of the will as follows: "I give and bequeath to the Town of Petersham five hundred dollars, the interest to be appropriated to support the singing on Sundays in their meeting-house. Provided the inhabitants of that town see that part of public worship decently and properly performed; the principal to be perpetually kept good by a safe investment on land security."

The will contained this explanation: "My inducement to these bequests is . . . a desire to testify the interest which I continue to feel in the place where I long resided and where, with the blessing of heaven, I acquired much of my property." These bequests came to the church as the successor of the town in respect to ecclesiastical interests.

The first Sunday-school in Petersham was established by Rev. Luther Willson, who was its first superintendent. Rev. George R. Noyes, D.D., succeeded Rev. Luther Willson. His translation of a large portion of the Bible has given him a reputation wider than any one denomination. His works, which are still in print, are a Translation of the Hebrew Prophets, Translation of the Book of Psalms, Translation of Job, and the New Testament Translated from the Greek text of Tischendorf. He made also a collection of Theological Essays by various authors, for which he wrote an introduction. The translation of the Scriptures anticipated many of the changes of the Revised Version.

Dr. Noyes was a native of Newburyport; a graduate of Harvard College, 1818; received the degree of Doctor of Divinity, 1839; settled in Brookfield, 1827; installed in Petersham, October, 1834; elected to a professorship in the Theological School of Harvard University in 1840.

Rev. Nathaniel Gage was born at North Andover, Mass., 1800; graduated at Harward, 1822; at the Divinity School, 1826; was settled in the ministry at Nashua, N. H., and Haverhill, Mass., seven years each; installed at Petersham, October 6, 1841; dismissed, 1845; afterward of Lancaster and Westboro', which was his last settlement. He subsequently resided at Cambridge, preaching at Ashby and other places, and died in 1861.

During the ministry of Mr. Gage at Petersham the house of worship, which is still occupied by the First Parish, was erected. It was built by a stock subscription of fifty-five shares of one hundred dollars each, which were subsequently presented by the shareholders to the parish. The first church edifice, which was regularly occupied from the year 1738, after several years of progress toward completion, was used until about the year 1780, or sixty-two years. Then the building of a new church was agitated, but it was probably 1788 when it was ready for occupation. Eleazer Bradshaw, Esq., of Brookfield, gave a bell which came from the works of Paul Revere. A clock was given later, 1828, by Cyrus Wadsworth. Upon the erection of the present church, 1842, the bell and clock were removed from the old church. That building, which had been used for worship from 1788 to 1842, or fifty-four years, was removed to the east side of the Common and devoted to secular uses until destroyed by fire, 1845. The previous removal of the bell and clock, and consequent preservation of those relics of the early time, is an occasion of special satisfaction. The bell bears the inscription:

"The living to the Church I call,
And to the grave I summon all."

Brief mention only can be made of those who have since served as pastors of the church. Rev. Ephraim Nute, Jr., was ordained October 15, 1845; dismissed, 1848. He has since been settled in Scituate and Chicopee, and has lived in Kansas, to which State he went in connection with a movement to settle that territory with emigrants opposed to slavery and in favor of the organization of a free State.

Rev. Martin W. Willis, ordained at Walpole, N. H., 1843, was installed at Petersham, 1848. The pastorate continued until 1851, since which time he has been settled at Bath, Me., and at Nashua, N. H., subsequently residing in St. Louis.

John J. Putnam, previously settled in Bolton, was installed 1852. During his ministry the organ was purchased, which displaced the violin, violoncello and bass viol, which had been in previous use as an aid to church music.

Rev. Seth Saltmarsh served eight years as pastor of the church.

Rev. Daniel Francis Goddard was born at Plymouth, Mass., November 29, 1827. He studied two years at Amherst College, afterward preparing for the ministry with Rev. Russell Tomlinson, a Universalist. He was ordained and settled over a Universalist Church, Boston, afterward being engaged in the ministry at Weymouth and Chelsea, before coming to Petersham. His subsequent employment was at Revere, Harvard and Chelmsford. He died July 13, 1883.

Rev. Thomas D. Howard, who served as pastor about four years, was born at Springfield, Mass., December 26, 1826, being the son of Charles and Elizabeth (Dwight) Howard. He graduated at Harvard College, 1848, Divinity School, 1851, and has since been settled in order at Berry, Me., Sheboygan, Wis., Petersham, Charlestown, N. H. He united in marriage, 1854, with Sarah A. Eaton, of Berry, Me. During the War of the Rebellion Mr. Howard served as chaplain, and upon resigning at Petersham, served as secretary of the Commissioners of Prisons for Massachusetts.

Lyman Clark was born at what is now Sago, W. Va., 1838, being the son of Cornelius and Abigail (Wright) Clark, natives respectively of Bridgewater and Westford, Mass. The family having removed to Illinois, Lyman Clark served in the War of the Rebellion, 1861–65. Upon leaving the army he entered the Meadville Theological School, remaining four years; was graduated 1869 and ordained at a meeting of the Western Conference at Quincy, Ill., October of the same year. He was located for several months at Jacksonville, Ill.; has been settled at Lancaster, N. H., 1870–74; Petersham, 1874–82; Ayer, 1882; to the present time. He was a member of the House of Representatives 1879, representing the towns of Templeton, Phillipston, Hubbardston and Petersham; was united in marriage, 1872, with Isabel Clough, daughter of Eben and Susan Clough, Bethel, Me.

Rev. Isaac Francis Porter was born at Wenham, Essex County, Mass., June 29, 1839. He served as a soldier in the War of the Rebellion, attended Madison University, New York, afterward the Meadville (Pa.) Theological School. He has been settled in the ministry at Princeton, Ill., Peterboro', N. H., Chicopee, Petersham, (1883–87), Bolton and Berlin, Mass.

Henry Harrison Brown, the present pastor, was born at Uxbridge, 1840, the son of Pemberton Brown, and Paulina (Whitmore) Brown, of Sutton. He studied at Nichols Academy, Dudley, at Meadville and served in the War of the Rebellion from 1862–65; was ordained at Petersham, 1888.

CONGREGATIONAL.—An Orthodox Congregational Church was organized and established by council held January 25, 1823. Its house of worship was built several years later, or about the year 1829. Its pastors have been Rev. Mr. Wolcott, 1830–33; Rev. Caleb B. Tracy, installed June 25, 1834; Rev. Columbus Shumway, installed October 4, 1837; Rev. Solomon Clark, installed April 13, 1841; Rev. A. B. Foster, installed May 12, 1853; Rev. Lucien H. Adams, installed October 28, 1862, dismissed January 2, 1865, to become a missionary to Turkey of the American Board of Commissioners for Foreign Missions. The church has since been served in pastoral relations by Rev. Charles Kendall, Rev. Mr. Root, Rev. Wm. Miller, Rev. Abijah Stowell, Rev. Benjamin Ober, Rev. Charles W. Fifield, installed October 14, 1874; Rev. Elbridge W. Merrit, acting pastor, and Rev. David Shurtleff, installed May 8, 1884.

A second church of the Orthodox Congregational denomination was organized in the southwest part of the town, on the borders of Dana and Hardwick, in the year 1836 or 1837, and a meeting-house was built. Probably the nearness of the locality to Dana Centre led to its discontinuance.

BAPTIST CHURCH.—At the time of the Revolution, and for some years afterward, a Baptist Society was maintained in the southwesterly part of the town, its church being located near the Factory Village, so-called, otherwise Nichewaug. Rev. Samuel Dennis and Rev. Mr. Sellon were pastors. The meeting-house was subsequently moved to Dana, where it was for some time occupied by the same society and afterward by Universalists, finally being used for secular purposes.

A branch society of the Baptist Church in Athol was organized in Petersham, November, 1824. Rev. Thomas Marshall held services for several years, he residing in the westerly party of the town. In May, 1849, this branch church assumed an independent organization, and Rev. John Shepardson became their first pastor. He was succeeded by Rev. E. C. Anderson, D.D., and Rev. T. T. Merriman and Rev. Kilburn Holt, pastor from 1882–87. Rev. Arvin Augustus Smith, the present pastor, was settled 1888. Of these several pastors a few facts may be given. Rev. Samuel Dennis was an ardent revolutionist and probably the author, in part, of the reply of the town to the Committee of Correspondence of the town of Boston, the resolutions sent to the General Court, and the instructions to their representative. His name appears as representative to the General Court, 1777.

Rev. John Shepardson was active in the organiza-

tion and conduct of the Highland Institute, a school which was for some years maintained in what is now known as the Nichewaug, and of which Rev. E. C. Anderson, D.D., was for some time principal.

Rev. T. M. Merriam, A.M., was the author of two works entitled "The Trail of History; or, History of Religion and Empire," and "William, Prince of Orange."

Rev. Kilburn Holt had served in the ministry at Lancaster, N. H., and Colebrook, Mass., having removed to Amherst upon leaving Petersham.

Rev. Arvin A. Smith was a graduate of Brown University and studied theology at Newton.

The house of worship occupied by the Baptists was purchased of the Universalists about the year 1849.

A UNIVERSALIST SOCIETY was organized in the year 1836 or 1837. It built the house of worship now occupied by the Baptists. The society was continued probably until the year 1849. Rev. Mr. Willis and Rev. Mr. Coolidge served as pastors.

THE METHODIST CHURCH.—Preaching was maintained by the Methodists, and a society formed, which continued from 1843 to 1848 or '49. A small chapel was built, the use of which, for church purposes, was afterward discontinued. Their pastors were Rev. Messrs. Dutton, Clarke and Goodwin.

CHAPTER LXXIV.

PETERSHAM—(*Continued.*)

Schools—Industries—Wealth—Population—College Graduates—Congressmen—State Senators—Representatives—Town Officers—Selectmen—Town Clerks—Town Treasurers—School Committee—Officers 1888.

FROM a letter of Captain Park Holland we have this account of the educational facilities of the town during his boyhood, or about the year 1760:

"Our opportunity for obtaining an education was very limited indeed. The Psalter and a few old books were all that were used in the few months' school we attended. . . . Our books of amusement were likewise very few. Æsop's Fables and occasionally some ballads brought us by a strolling pedlar, were the principal, and they were read with great pleasure; and not read merely, but often committed to memory." From such, not by any means worthless, beginnings has grown the present modern school.

SCHOOLS.—The town being large in respect to territory, it has been necessary to maintain schools in the several neighborhoods. Nine school-houses are still found out of the village, and formerly there were ten, one having been burned. Schools have been temporarily suspended at different times in several of the school-houses for want of pupils in the neighborhood, other schools being well filled. In the village a brick school-house is found, in which are three rooms, one of which has recently been occupied by the library, one by a primary and ungraded school, one by a high school. Although the population is below the standard which requires a high school to be maintained, the town has been accustomed to vote an appropriation for the high school from year to year. This voluntary action indicates the earnest interest of the people in the education of children. The town appropriates a high percentage of its valuation for school purposes. The number of children of school age, or from five to fifteen years, was one hundred and fifty-nine for the year 1888. A boarding-school, under the name of the Highland Institute, was maintained for several years.

INDUSTRIES.—The most common employment of the people from the beginning has been that of farming. The necessary grist-mill, saw-mill and blacksmith and wheelwright shops have done their work from an early date. No manufacturing corporation is at present located in Petersham. In 1847 a fire which swept the westerly side of the Common, destroying property estimated at fifty thousand dollars, burned a building which was fitted with engine and machinery for the manufacture of lasting buttons. Fourteen buildings were burned, including two hotels, barns and out-buildings, one dwelling-house, one large store, one building occupied by shops, offices, etc. This fire inflicted permanent injury to the business interests of the place.

The braiding of palm-leaf hats was introduced by Mr. Samson Wetherell, October, 1827. He procured material and employed a Miss Gilbert to teach braiding, furnishing her a room in his own house for the purpose. The apprentices became teachers of others throughout the town. The first expense was borne wholly by Wetherell & Brown, merchants. Afterward one dollar was paid by learners to the teacher. The leaf was first split with a pen-knife, the hats being whitened in a barrel with brimstone, pressed with a flat-iron and barreled up to send to market. In ten years from the introduction the gross business amounted to twenty-five thousand four hundred and ninety-five dollars, the value of one hundred and thirty thousand five hundred and twenty-five hats, the product of one year. This continued for a long time to be an important industry in many households, and is still practiced to some extent.

The seating of chairs is also practiced somewhat, the chair frames being distributed from the factories in Gardner.

Pearlash was at an early day produced to a considerable extent. To meet the necessities of the Revolution, saltpetre was made to be used in manufacture of gunpowder. More patriotism than profit is said to have been connected with this enterprise.

To meet a want caused by interrupted commerce, salt was made at Rochester Shore and brought to the town for the use of the people. The enterprise was not successful, for which reason it was abandoned.

Paul Peckham formerly manufactured ladders, and at the proper season sent them around through the country for sale. In this business he used a machine, invented by himself, for dressing tapering conical surfaces.

A cheese-factory was erected three-quarters of a mile south of the village, and the business carried on for some time. It was finally discontinued, and the building moved to the rear of the Unitarian Church, where it was converted first into a skating rink, and afterward into a tenement-house.

Mr. Hiram Gibbs for some years carried on the making of staves for pail manufacture.

German Lagara has manufactured articles of fancy wood-work, plates, bowls, nut-dishes, etc., which are sold to summer boarders and others who visit the town.

Mr. Elisha Webb has, for many years, manufactured powder kegs at the south part of the town, employing a small corps of workmen. This has for years been the largest manufacturing interest of the town.

Formerly Petersham was a thoroughfare and stopping-place for teams passing with merchandise or stage-coach passengers from Boston through Sudbury, Shrewsbury, Holden, Rutland and Barre, to Athol, Orange, Greenfield, Northfield, Warwick and the southeastern part of Vermont. For the accommodation of this travel there were four taverns—one in the eastern part of the town, two near the centre and one on the road to Athol at the north end. One of these, as Rev. Dr. Samuel Willard tells us, maintained a sign which "was somewhat emblematic of what a tavern should be, viz.. a tea-kettle hung from the arm of the post."

John Chandler, Esq., who lived a century ago, kept a large deer park of seventy acres, surrounded by a very high Virginia fence, sufficient, as was supposed, to keep the deer safely enclosed. But tradition tells of an exceedingly deep snow, which, drifting against the rails, compacted into a bridge, which gave his deer their natural liberty.

WEALTH.—By the census of 1885 the population of the town was 1032, of whom 972 were native, 60 of foreign birth. The dwelling-houses numbered 278. The products of the town were valued at $167,583, including, with other classifications not here given, animal products valued at $9252; dairy products, $40,459; cereals, $10,297; wood products, $9299; hay, straw and fodder, $56,628.

The property of the town, other than that classified as products, was valued at $706,765, and included land, valued at $355,132; buildings, $199,274; machines and implements, $36,968; domestic animals, etc., $70,609; fruit-trees and vines, $44,782. The total value of products and property was $874,348.

Rev. Peter Whitney, who published his "History of Worcester County" in 1793, states the relative position of the town in respect to wealth thus: "There are but seven towns who pay more to a State tax." From this it appears that Petersham was then eighth in the State in respect to wealth.

POPULATION.—The population of the town has declined somewhat during the present in comparison with the previous century. In the early settlement of the State, villages were often located at the summit of hills, presumably on account of the more defensible position. The possibility of a stealthy attack from a savage foe made it necessary to select the village site with a military eye. But the advent of the ponderous locomotive, with the necessity for a graded road-bed, determined the location of villages in the valleys rather than upon the hills. The building-up of the railway centres has made steady drain upon the population of farming communities, whether upon the hills or in the valleys. During at least a large portion of the present century the young people have constantly gone from Petersham to make homes in other towns and cities. The movement of population is indicated by some figures collected by Mr. Willson for his historical address, with the addition of the results of the later census returns.

The town was incorporated 1754, the first census afterward being in the year 1765, the population 707. The subsequent numbers appear in the following order: 1776, 1235; 1790, 1560; 1800, 1794; 1810, 1490; 1820, 1623; 1830, 1696; 1840, 1775; 1850, 1527; 1855, 1553; 1860, 1465; 1865, 1428; 1870, 1335; 1875, 1203; 1880, 1109; 1885, 1032. From this it appears that the largest population was in the year 1800, the number next in order being for the year 1840. The number of inhabitants by the last census is the smallest since 1765.

The depopulation of Petersham has built up other places, its former residents being found in Boston, Worcester, Fitchburg, Athol, Greenfield, New York, Chicago and many other places. It remains for a future writer to narrate the exodus of this town, and tell of the doings of its children in their new homes.

COLLEGE GRADUATES.—The graduates of several colleges who were native inhabitants of Petersham, include the following names:

Harvard University:—Peter Whitney, A.M., class of 1762; Paul Whitney, A.M., 1772; Abel Whitney, 1773; William Amherst Barron, A.M., 1787; John Chandler, A.M., 1787; Richard Whitney, A.M., 1787; Nathaniel Chandler, 1792; Thomas Barron, 1796; Samuel Willard, S.T.D., 1803; Samuel Ward Chandler, 1822; Francis Augustus Brooks, 1842; John Brooks, 1856.

Dartmouth College:—Jonathan Grout, A.M., class of 1787; John Jackson, 1792; William Ward, 1792; Paul Grout, 1793; George Grout, 1795; Elisha Hammond, 1802; Abiathar Hopkins, 1806; Hutchins Hapgood, 1813; Cyrus Pitt Grosvenor, 1818; Moses Gill Grosvenor, 1822.

Williams College:—Daniel Bigelow, class of 1803;

Lewis Bigelow, 1803; Charles Goddard, 1815; Joel S. Sanderson, 1850.

Amherst College:—John B. Kendall, class of 1827; Charles Grosvenor Goddard, 1841; Andrew Jackson Wheeler, 1846; George Sumner Grosvenor, 1858; Abiathar Blanchard, 1875.

Brown University:—Aaron Brooks, 1817; James Willson Brooks, 1855; Charles Hutchins Hapgood, 1857.

Middletown College:—Fisher Ames Foster, John Wells Foster.

Union College:—George Grout Hapgood, 1830.

Yale College:—Daniel Bigelow Parkhurst, 1836.

CONGRESSMEN.—Jonathan Grout, who came from Lunenburg, having served seven years as Representative in the General Court and one year in the Senate, was chosen a member of the first Congress under the Constitution.

Lewis Bigelow, born 1785, a graduate of Williams College 1803, studied law and was chosen a member of the Seventeenth Congress. He was the author of a Digest of the Cases determined in the Supreme Judicial Court from 1804 to 1815, a work published in 1818, yet still found in law offices. A comparison of these dates shows that this standard work of legal analysis was produced before the author was thirty-three years of age.

GENERAL COURT OF MASSACHUSETTS.—*Senators*—Jonathan Grout, John G. Mudge.

Representatives—Joshua Willard, 1761, 1763; John Chandler, 1768; Theophilus Chandler, 1769; Ephraim Doolittle, 1772, 1773, 1774; Jonathan Grout, 1775, 1777, 1779, 1784, 1786, 1787; Captain Elisha Ward, 1777; Samuel Dennis, 1777; Samuel Peckham, 1787; Park Holland, 1788, 1789; Ruggles Spooner, 1770, 1790; Daniel Bigelow, 1791, 1792; Asa Pond, 1818; Joel Bryant, 1822; Hutchins Hapgood, 1823; Israel Houghton, 1824; Cyrus Wadsworth, 1827; Joseph Gallond, 1829, 1830, 1832; Micajah Reed, 1829, 1832, 1833; Josiah Wheeler, 1830, 1849; Aaron Brooks, 1834, 1835; Nahum Gale, 1836, 1837; Cephas Willard, 1835, 1838; Seth Hapgood, 1837, 1840, 1849; Joseph Brown, 1839; Artemas Bryant, 1839, 1840; Asa Clark, 1841; Jonas Howe, 1845; Elbridge G. Miles, 1846; Lyman Robinson, 1848; George White, 1851, 1853; Lewis Whitney, 1852; John G. Mudge, 1856, 1858, 1865; Josiah White, 1861; Hudson Tolman, 1862; Stephen D. Goddard, 1869, 1873; Lyman Clark, 1879; Elisha Webb, 1883.

The foregoing list is incomplete.

TOWN OFFICERS.—The records for the first three years after the incorporation of the town are deficient. The first list of officers preserved to us is that chosen March 6, 1758, the town having been incorporated in 1754. The list includes several offices now obsolete, as tithingmen, clerk of ye market, leather sealer, deer-reeves, hog-reeves, in the town records sometimes called hog-constables. The list of officers for that year was as follows: Joshua Willard, Town Clerk; Joshua Wilder, Daniel Miles, Joshua Willard, David Sanderson, James Clemence, Selectmen and Assessors; Nathaniel Sanderson, Treasurer; Jerameel Wilder, Benjamin Chandler, Constables; Samuel Chamberlain, Samuel Briant, Andrew Dalrymple, Ebenezer Hill, Surveyors of Highways and Collectors; David Stone, Joel Matthews, Tithingmen; Sylvanus How, Seth Hapgood, Fence-viewers; Daniel Spooner, Clerk of ye Market; David Sanderson, Leather Sealer; Kenelm Winslow, Sealer of Weights and Measures; Nathan Goddard, David Curtice, Field-drivers; William Walker, Joseph Marble, Aaron Chandler, Hog-reeves; Daniel Dunkin, William Daget, Deer-reeve; Kenelm Winslow, Pound-keeper. The record shows that all were sworn except the town clerk, deer-reeves and pound-keeper. The office of deer-reeve is suggestive of the fact that deer were to some extent domesticated. This first Board of Selectmen of which we have record was notable by reason of the name of Daniel Miles, two sons of whom, Daniel and Joab, served in the revolutionary army. The descendants of Joab Miles are now represented by Major-General Nelson A. Miles, of the United States Army.

SELECTMEN.—No complete account of the Board of Selectmen or other official boards can here be given. In addition to the previous names we find that among those who served in the years from 1757–1792 were Joseph Wilson, Daniel Spooner, Daniel Duncan, Capt. Zedk. Stone, Thomas Rogers, Seth Hapgood, John Chandler, Theophilus Chandler, Elisha Ward, Samuel Gates, Sylvanus How, Jonathan Grout, Simon Houghton, Asa How, William Willard, Ephraim Doolittle, David Stone, Samuel Dennis, Timothy Whitney, David Curtis, Edward Powers, Daniel Hastings, Samuel Briant, Ruggles Spooner, David McClellan, Jonathan Sanderson, Capt. Wing Spooner, Ebenezer Winslow, Joel Doolittle, John Hildreth, Robert Peckham, Thomas Carter, Isaac Packard, Edward Baker, Daniel Hawks, Samuel Peckham, Samuel Stone, Maj. Ephraim Stearns, Joseph Gleason, Capt. John Permenter, Joseph Brown, Lieut. Luke Rice, Daniel Bigelow, Park Holland, William Macarty, Seth Williams, John Demick, Joseph Negus, Joel Brooks, Ebenezer Hammond, Jotham Bowker.

The following is a partial list of names of persons who have served on the Board of Selectmen since 1852 as found in town reports: Asa Johnson, P. W. Barr, Joab Young, S. D. Goddard, Hudson Tolman, J. W. Upton, Oren Tower, George Ayres, J. H. Clapp, Hubbard Peckham, H. S. Miner, Alfred Peckham, David C. Paige, Merrick Blanchard, Josiah White, Elijah Hildreth, Elisha Webb, Sewell C. Goddard, L. P. Cutler, C. K. Wilder, F. L. Sanderson, Geo. Bancroft, Charles F. Paige, Merrick E. Hildreth, Sanford B. Cook.

TOWN CLERKS.—Joshua Willard, David Sanderson, John Chandler, Jonathan Grout, William

Willard, William McCarty, Samuel Peckham, Jared Weed, Seth Hapgood, John L. Gallond, Lyman E. Sibley, Chas. B. Mosely, J. G. Mudge, Lewis E. Whitney, H. N. Tower, Sanford B. Cook. Of these the veteran town clerk of the early time was David Sanderson, who appears to have served eighteen years. Jared Weed, Esq., served twenty-six years, from 1817 to 1842, inclusive; and Lewis Whitney, twenty-six years, from 1849 to 1874, inclusive.

TOWN TREASURERS.—The names of some of those who have served the town as treasurers are as follows:—Nathaniel Sanderson, 1758–72. The uprightness with which Mr. Sanderson discharged his duty is made a matter of public record. The committee chosen to audit his account for a period of five years find, in closing their report,

That what he has paid out and is yet in the Constable's hands, Amounts to Six Hundred and Forty-Two Pounds Nineteen shillings and one penny; that the Treasurer has paid out Four Pounds Seventeen Shillings & four pence one farthing More than he hath Received In. He says that there is Now in the Treasury Five Pounds Six Shillings and Eleven pence two farthings, which, being added to the above Ballance, Makes Ten Pounds Four Shillings three pence and three farthings, which sum he says he's confident Belongs to the Town.

WILLIAM WILLARD, JONATHAN GROUT, } *Committee.*

Those curious in such matters may exercise their minds upon the question whether or not upon this statement Mr. Sanderson was more solicitous to do justice to the town, than accurate in determining what was due himself.

Theophilus Chandler was chosen town treasurer, 1772–76; David Sanderson, 1776–80; Capt. Ephraim Stearns, 1781–92. Of those who have served at later dates, the names of Jonas Howe, Joseph G. Parmenter, Collins Andrews and John G. Mudge are reported, the latter having served continuously since 1869 to date, 1888, inclusive, or eighteen years.

SCHOOL COMMITTEE.—The following are some of the names of persons who have served on the School Committee since 1852, the list being incomplete:—John J. Putnam, John Shepherdson, Luther Willson, Charles Kendall, L. Sanderson, John A. Wilder, Lyman W. Hapgood, Frank A. Wood, S. S. Tower, William Miller, John M. Holman, S. P. Goddard, D. F. Goddard, E. Jackson, Sanford B. Cook, Lewis W. Loring, A. Stowell, T. T. Merriman, George White, E. C. Anderson,* Mrs. Maria N. Ayers, Benjamin Ober, C. W. Fifield, Lyman Clark, L. O. Martin, Elisha Webb, Luther Stone, F. L. Sanderson, M. H. Leamy, I. F. Porter, David Shurtleff, Mrs. M. R. Stone.

The more prominent town officers for the year 1888 are Sanford B. Cook, town clerk; John G. Mudge, treasurer; Merrick E. Hildreth, George Bancroft, Sanford B. Cook, selectmen and overseers of the poor; Frederick Bryant, Henry L. King, Thomas S. Howe, assessors; Rev. David Shurtleff, Luther O. Martin, M.D., Mrs. Maria N. Ayers, school committee; Daniel F. Bigelow, constable and collector of taxes.

CHAPTER LXXV.

PETERSHAM—(*Continued.*)

BIOGRAPHICAL NOTES.

Park Holland—Samuel Willard, D.D., the Blind Minister—Solomon Willard, Builder of Bunker Hill Monument—Deacon Cephas Willard—Austin Flint, the Beloved Physician—William Brown Spooner, the Philanthropist—Timothy W. Hammond—Rev. E. B. Willson—Inventors—Women—Longevity.

WHILE no citizens of Petersham appear to have risen to the highest rank in connection with the civil and military history of the country, yet the *personnel* of the town is singularly interesting in respect to character and attainments. It is possible here only to add some facts to the information previously published of the dwellers in or natives of the town. If somewhat extended narratives are given concerning a few, it is because the facts are at hand and with the hope that a more full history may be prepared by other hands at some future date, in which more ample justice can be done to the many whose names are worthy to be enshrined in the memory of those who come after, and whose lives offer examples worthy of imitation.

CAPTAIN PARK HOLLAND.—An historical letter written to Major Jonas Holland, of Schenectady, N. Y., by Captain Park Holland, informs us that their ancestors were from London. Upon coming to this country, they settled at Watertown, afterward removing to Shrewsbury, where Park Holland was born, and later located in Petersham. In 1776 Park Holland, having been previously enrolled as a minute-man, enlisted, with thirty neighbors and friends, for service in a brigade of Massachusetts troops, which were sent to New York. He served under Washington at White Plains and in New Jersey. He, upon expiration of his first enlistment, re-enlisted for service during the war, with twenty-four or five others of Petersham. His brother, Ivory Holland, received a lieutenant's commission, and Park Holland was made a sergeant-major, from which rank he rose to that of captain, and was paymaster and agent to settle the accounts of the regiment. He served in the campaign which led to Burgoyne's surrender; afterward at West Point and at White Plains. At the close of the war he, by public advertisement, visited Petersham, Northampton, Worcester, Harvard, Danvers, Boston and Wrentham to pay the soldiers of the regiment.

Captain Holland once attended a dinner given by Washington to some of his officers, and a characteristic incident is narrated, showing the general's abhorrence of profanity.

The payment of the Revolutionary soldiers being completed, Park Holland and General Rufus Putnam went in partnership to survey "the Schoodiac and Passamaquody country, the harbors, islands, &c.," of Eastern Massachusetts (now Maine). An interesting

narrative of this and several other surveying tours in what is now Maine and Vermont is given in his letters. On one of these tours he undertook to survey a tract of land extending north to the height of land dividing the waters of the St. John from the St. Lawrence, an unknown distance, supposed to be fifty or sixty miles into the wilderness, but which proved to be a hundred and sixty miles from the northern limit of previous surveys. The hardship of this tour was such that Captain Holland weighed eighty-three pounds less upon his return than when he set out, much of the time having been spent without any proper supply of food. At the time of Shays' Rebellion (so called), a company was raised by Captain Holland in Petersham, Athol and Rutland for service of the government. No stronger testimony to his worth could well be given than the fact that he was able to enlist as privates thirteen commissioned officers of the Revolutionary army, including General Rufus Putnam, under whom Captain Holland had served, as he had under Captain Shays himself. His company marched with General Lincoln from Hadley to Petersham, all but two of them being more or less frost-bitten on arrival. He had a wife and family at the north part of the town. Shays' men, on their retreat to Athol, halted before the house. Mrs. Holland, being herself ill, ordered fires built and food offered to the insurgents, and by her discreet civility the household was saved from further injury than being stripped of food supplies.

Captain Holland was chosen selectman, town clerk, and for several years represented the towns of Petersham and, after removal to that place 1790, Belchertown in the General Court. He, in company with another person, purchased of the Penobscot Indians one hundred and ninety-two square miles of land lying on either side of the Penobscot River, but the title does not appear to have been made good. He removed, however, to Eddington, Maine, where his last days appear to have been spent attended by a faithful daughter, who discarded all offers of marriage in devotion to her honored father's happiness. The story of his life was largely written out in letters dictated to her after Capt. Holland ceased to himself use the pen, with which he had in early years shown much skill. He was accustomed to say that if "variety is the spice of life," his had been well seasoned. Dr. J. G. Holland, the author, born in Belchertown 1819, was a grandson of Luther Holland who was a brother of Capt. Park Holland.

SAMUEL WILLARD.—From a work entitled "Singers and Songs of the Liberal Faith," by Rev. A. P. Putnam, D.D., the following sketch of the life of one of the sons of the town is taken:

"Rev. Samuel Willard, D.D., born in Petersham, Mass., April 18, 1776, was a son of William and Catherine (Wilde) Willard, and grandson of Rev. Samuel Willard, of Biddeford, Maine. Samuel Willard, the grandfather of the Biddeford minister, was acting-president of Harvard College, 1701–07, and was the son of Major Simon Willard, who came from Kent, England, and bought land of the Indians in Concord, Mass., before the year 1635. Joseph Willard, another president of Harvard, 1781–1804, was uncle to Samuel, the subject of this sketch. The latter spent his early years on his father's farm. He began to prepare himself for college at the age of twenty-one, and was fitted mainly under the instruction of Rev. Nathaniel Thayer, D.D., of Lancaster, Mass. Having graduated at Harvard, 1803, he was subsequently, for more than a year, Dr. Abbott's assistant in the Exeter Academy, and was afterwards for some months tutor at Bowdoin College, prosecuting at both of these last-named institutions his studies in the classics, and devoting himself also to the study of theology, under the direction of Drs. Appleton, Buckminster and McKean. In September, 1805, he removed to Cambridge, where he continued his preparations for the ministry, and soon obtained a license to preach. Economical considerations induced him to reside for a time at Andover, and it was while he was there that he was invited to preach at Deerfield, Mass. He gave his first sermon in that place, March 15, 1807, and received, the next June, a call to settle. August 12th was fixed upon for the ordination. The council called, in accordance with the custom of the churches, sat for two days, and after a rigid examination of the candidate refused to ordain him, regarding his views as too liberal for the orthodox standard. Here was one of the first indications of the split that was destined ere long to divide the Congregational body of New England. Another council was called with more success, and he was duly ordained September 23d, of the same year. From that time Mr. Willard was a recognized pioneer of the liberal movement in Western Massachusetts; bravely contending with voice and pen for larger freedom, and willingly suffering not a little odium and persecution for the sake of what he believed to be the truth. On the 30th of May, 1808, he was married to Susan, only daughter of Dr. Joshua Barker, of Hingham, by whom he had three children—Susan, Mary and Samuel, the last a graduate of Harvard, 1835. About the year 1818 his eyes suddenly failed him, in consequence of too much study by a dim light. For thirteen years after this sad occurrence he was able to see large objects only very indistinctly, and for the remaining twenty-seven years of his life he was totally blind. The amount and variety of intellectual and other labor which, with the faithful aid of his family, he accomplished during these forty years of his calamity, seem almost incredible. He continued his usual pastoral duties until September, 1829, when he resigned his charge; then removed to Hingham, where for some years he assisted his son-in-law in teaching a school, and finally, after a brief residence in Concord, returned to Deerfield, where he spent the rest of his days, preaching occa-

sionally for his people, even to the very close of his long career."

It is said that Dr. Willard, who was the author of four hundred and sixty-seven hymns, could repeat from memory any of them, also whole books of the Bible. He wrote several books, and numerous articles for religious newspapers and magazines. Samuel Willard died at Deerfield October 8, 1859.

SOLOMON WILLARD.—The public services of Solomon Willard, brother of the foregoing, were such as to justify extended notice of his life. He was born in 1783. The first twenty-one years of his life were spent in his native town, at the end of which time he went to Boston. He had only common advantages in regard to education, but made the best use of those he had. His first work in Boston was fitting piles for wharf construction, at fifty cents per day. In this connection he said that his employer taught him to keep his broad-axe sharp. We soon hear of his having attended lessons in drawing. He connected himself with the Athenæum, attended lectures upon anatomy, studied geology and chemistry. Meantime his labors have advanced to architecture and designing. He built an extensive winding stairway, since destroyed by fire. Going south, he made a model of the Capitol building at Washington. He became a teacher of architectural drawing and designing, and invented the principle of the hot-air furnace, taking out no patent for the invention, but leaving profits to be reaped by others.

But the great work of Mr. Willard's life was as architect of Bunker Hill Monument. The building of the monument was initiated to commemorate the fiftieth year of independence, but the corner-stone was laid June 17, 1825, the anniversary of the battle, rather than on Independence Day. Full information of Mr. Willard's connection with the monument is given in "The Memoir of Solomon Willard," by W. W. Wheildon, prepared by direction of the Bunker Hill Monument Association. In this work the question of who was the architect is fully and carefully considered. Several persons had prepared designs for an obelisk, from which circumstance arose a controversy as to who was the architect. This claim has been made in behalf of Alexander Paris, Horatio Greenough and Robert Mills, but a careful examination of the evidence, made by direction of the association having the monument in charge, makes it conclusively established that Solomon Willard was the true and only architect, as he unquestionably was the superintendent of practical construction from the beginning to the completion of the work.

For his services he accepted no compensation, only allowing a commutation of his expenses, which were very small. His desire was to do the work as a labor of patriotism, having ample support from other work. Under his direction a quarry was purchased at Quincy. For the transportation of the stone to the seashore the first railway of the country was laid, it being operated by horse-power. The monument cost about $100,000, which was estimated by Mr. Willard as about half the cost at current rates of the time for similar work. The saving grew largely out of improved methods devised by him for quarrying and transportation, by reason of which granite was made much more available as a building material, the architecture of Boston being somewhat modified by the fact.

Solomon Willard died of apoplexy February 16, 1861. Circumstances of peculiar sadness attended his departure. On the morning of his death he arose at the usual hour and, while waiting breakfast, talked with a friend of the state of the country. Six States had passed ordinances of secession. Forts, arsenals, mints and navy yards had been seized, and the Confederate Convention was engaged in preparing a Constitution in the interests of slavery. Mr. Willard gave way to fears and wept at the prospect of the country going to destruction. Being called to breakfast, he arose to answer the call, but instead of taking his seat at the table he fell upon the floor and never spoke again. The thought of national dissolution appears to have literally burst the blood-vessels of the brain which had devised and constructed Bunker Hill Monument, and to have broken the heart of one who loved his country faithfully.

CEPHAS WILLARD, a brother of Rev. Dr. Willard and of Solomon Willard, the architect, was born November 29, 1786, and died November 25, 1879. His long life was spent as a son of the soil. Among the various offices held by him were those of assessor, coroner, deputy-sheriff and member of the House of Representatives. He was deacon of the Unitarian Church fifty-six years, and treasurer for more than thirty years in succession. The family to which he belonged had held the office of deacon for more than a hundred years, with the exception of a short interim, caused by the fact that at a certain time a brother deacon was found walking disorderly, in respect to temperance, and all members of the diaconate resigned as a courteous way of conducting the brother out of office. This duty done, the church promptly re-elected those whose conduct had been worthy.

As deputy-sheriff Deacon Willard was once found unwilling to perform a task to which he was invited, that of assisting in the execution of the death penalty by sentence of a court. He offered to resign his office if the duty were required of him, but that sacrifice of position he was not allowed to make. He was more successful in executing the law relative to imprisonment for debt. In such a case he set a man at work on his farm until his wages were sufficient to discharge at once the debt and the prisoner. When ninety years of age Deacon Willard attended the Centennial Exhibition at Philadelphia alone, and, the same year, presided over the Centennial Celebration in his native town, his lifetime having covered

nine-tenths of the life of the nation. A memorial discourse by Lyman Clark, delivered at the occasion of his funeral services, was published. It will be noticed that the family from which these three brothers were descended had given two presidents to Harvard College.

AUSTIN FLINT, M.D., LL.D., born in Petersham, 1812, graduated as M.D. at Harvard, 1833, was one of the founders of the Buffalo Medical College, 1847. He was, in 1861, appointed professor of the principles and practice of medicine in Bellevue College Hospital, New York, and of pathology and practical medicine in Long Island College Hospital. With other medical works he has published a "Practical Treatise on the Pathology, Diagnosis and Treatment of Diseases of the Heart" and a standard work on the "Practice of Medicine." A pamphlet memoir, by A. Jacobi, M.D., president of the New York Academy of Medicine, has been reprinted from the *Medical Record* of April 24, 1886. From it we learn that Dr. Austin Flint was descended from Thomas Flint, who emigrated from Derbyshire, England, and came to Concord, Mass., in the year 1638.

He was of Puritan stock, and his father, grandfather and great-grandfather were physicians. His was apparently a case of inherited fitness for his work. Having received a liberal education at Amherst and Harvard, he practiced three years at Northampton and Boston, after which he moved to Buffalo, N. Y., in 1836. There he resided sixteen years, with a brief absence, during which he taught clinical medicine in Rush Medical College, Chicago, in 1847.

He left Buffalo in 1852 to take charge of the chair of clinical medicine in the University of Louisville. Thence he returned to Buffalo in 1856. The winters from 1858 to '61 were spent in New Orleans, teaching medicine and attending Charity Hospital. In the year 1859 he settled in New York. He resigned his position as teacher of the Long Island Medical Hospital in 1868, but retained his chair in the Bellevue Hospital Medical College to his death.

The Buffalo *Medical Journal* was founded by him in 1846, and edited by him for a period of ten years.

The memoir of Dr. Jacobi closes with this tribute,—

> Austin Flint had great advantages, and developed and utilized them for the benefit of the many. Born with an enviable inheritance, he enjoyed a thorough general and special education. He had great physical endurance and uniform health, an imposing presence, pleasant manners, and an equable temperament. With physical and intellectual powers he combined indefatigable love of work, which he performed systematically and energetically. He was a thoroughly modest man, who knew how difficult it is to master the depths of knowledge; thus he had an unusual degree of common sense, which limits aspirations and aims. Thus he became thorough in what he undertook to practice and teach. He was successful in practice, and enjoyed the confidence of both the profession and the public. As a teacher he is remembered by thousands; his pupils loved him and his colleagues honored him. His writings obtained for him a national and international reputation. There was no place of honor in possession of the profession of the city, State or country, which he has not filled. The profession of Europe was anxious to show its respect for him. Thus he lived and worked to an advanced age, disturbed by but few symptoms of evanescing powers, and when the time came he ceased to labor and live on the very same day.

A letter from a relative tells us that "his manner to all was unusually courteous and kindly, and his disposition one of rare sweetness. His sympathies were far-reaching, and he was so tender-hearted that he was unable to take up surgery as a specialty, although his father, who was a physician, thought he showed great skill in that direction."

He died March, 1886. The story of the medical profession in and from the town, led by the name of Flint, remains to be written in future.

WILLIAM BROWN SPOONER will be long remembered as an upright merchant, business man, banker and philanthropist. He was born in Petersham, April 20, 1806. At an early age he went to Vermont to live with an uncle. There he acquired a knowledge of the tannery, but aspired to an education and the legal profession. He became a merchant's clerk and taught school. At twenty years of age he went to Boston, and there finally decided in favor of mercantile life, entering the firm of Simpkins & Spooner, afterward forming that of William B. Spooner & Co. He was the first president of the New England Shoe and Leather Association, and for thirty-eight years a director of the Shoe and Leather National Bank. An ardent advocate of the anti-slavery cause and the cause of temperance, he was elected to the Massachusetts House of Representatives, 1857–58. He led in the organization of the Massachusetts Total Abstinence Society, was its first president, which position he held until his death. The executive ability of Mr. Spooner led to his being appointed in behalf of the State of Masschusetts as one of the Board of Management of the Centennial Exhibition at Philadelphia, 1876, to which duty he gave much time and attention. William B. Spooner died at Boston, October 28, 1880. His will contained various public bequests. A memorial has been published by the Massachusetts Total Abstinence Society.

TIMOTHY WHITNEY HAMMOND, of Worcester, son of Enoch and Lucy (Bowker) Hammond, was born at Petersham, January 26, 1814. He received such advantages from the local schools as might be gained before thirteen years of age, after which he engaged in other employments. In 1835 he was united in marriage with Mary A. Houghton, daughter of Captain Levi and Hannah Houghton. They removed to Worcester, 1844, where Mr. Hammond served two years as a clerk in the office of the Worcester and Nashua Railway. In 1849 he was made treasurer, which position he has held to the present time, or nearly forty years. He has been a member of the Worcester Mechanics' Savings Bank since 1851, of which he was president, 1877; has served as director of the State Mutual Life Assurance Company; performed five years of duty as a member of the City Council, and held the position of treasurer of the Proprietors of the Bay State-House. Mrs. Hammond died October 13, 1887.

REV. EDMUND B. WILLSON, son of Rev. Luther

and Sally (Bigelow) Willson, was born at Petersham, August 15, 1820. He studied at different preparatory schools, and entered Yale College, 1834, leaving, 1835, on account of ill health ; completed a course at the Cambridge Divinity School, and was graduated 1843. The settlements of Mr. Willson have been at Grafton, Mass., from 1844 to 1852; Roxbury, Mass., First Congregational Society, 1852 to 1859, when he was called to the pastorate of the North Society in Salem, of which he is still in charge. Mr. Willson, as previously stated, delivered the address at the centennial of the incorporation of the town. He served in the House of Representatives for the years 1883 and 1884. While there he introduced a measure which became a law, authorizing instruction in the use of hand-tools in the public schools.

Several mechanical inventions have originated with residents of the town. Solomon Willard invented the hot-air furnace, taking out no patent for his invention.

Asa Hapgood, who was a native of Barre, lived for a time in Petersham, where he worked as a wheelwright with his brother, Chauncy Hapgood; afterward being employed as a railway conductor between Boston and New York, he gave his attention to providing for the comfort of his passengers at night, and invented the sleeping-car, by which he acquired a large fortune.

Paul Peckham invented a machine for dressing tapering conical surfaces, which was used by him in the manufacture of ladders.

Charles Frederick Bosworth invented a machine for sewing hat-braid, the patent-right of which was sold for a large sum, also a machine for lining hats and one for sewing heavy leather.

Women.—The public records give us much less information concerning the women who have lived in Petersham than they do of the lives of those who have been charged with responsibility for political affairs. Yet the town records occasionally present a glimpse of the life in the home and those who there presided. An entry in the records of May 19, 1762, is as follows:

"Voted the number of young women the hindseat on the women's side gallery in order to build a pew on their own cost, viz.: Sarah Rice, Eunice Wilder, Parsis Bowker, Esther Holland, Mehitabell Page, Hannah Walker, Ruth Page, Sarah Curtis, Molly Curtis, Susanna Miles, Jerusha Hudson, Sarah Sanderson, Martha Negus, Hadassa Houghton, Ann Wheeler." Of these, Susanna Miles was a member of the family of Daniel Miles, who came from Pomfret, Conn., and from whom Major-General Nelson A. Miles is descended. Esther Holland was presumably a sister of Captains Ira and Park Holland, of the Revolutionary army.

Mrs. Houghton, wife of Simeon Houghton, is said to have claimed to have been once recognized as the handsomest woman in the town, her claim being based on the fact that she, being without classical features, was the first white woman, and, for a time, the only woman who lived in Petersham.

Mrs. Mary Greene (Chandler) Ware was the author of three books entitled: "Elements of Character," "Thoughts in my Garden," and "Death and Life." She was born in Petersham May 22, 1818, being the daughter of Nathaniel Chandler and Dolly (Greene) Chandler. The father, born 1773, was the son of John Chandler, who built what is known as the Chandler house about 1766. Dolly Greene was born in Stafford, Conn, 1783. Mary Greene Chandler and Dr. John Ware, of Boston, were married February 25, 1862. She having survived her husband, now resides in Lancaster, to which her father's family moved, 1828.

Mrs. Caroline Hildreth, wife of Richard Hildreth, the historian, excelled as an artist, her first successes being in crayon portraits. After she had studied in Europe she manifested talent in oil-painting.

Mrs. Elizabeth Barry, daughter of Dea. Cephas Willard, wife of Rev. William Barry, of Chicago, was vice-president, for Illinois, of the Mount Vernon Association.

Miss Lucretia Pond left public bequests in behalf of the Unitarian Church, and for the care of the cemetery in which she was buried. Mrs. Ann Ingersoll bequeathed her homestead to the Unitarian Church for a parsonage, and made a small bequest for the support of the public library.

Longevity.—A considerable number of instances of remarkable longevity are found in the history of the town. Three instances of an age of one hundred years or more are presented. In the year 1796, Dea. Daniel Spooner died, aged one hundred and three; Mary Farrar, died 1855, aged one hundred years; Lucy Robinson, who died in 1863, was also a century old. The names, years of death and ages of twenty-four persons who have lived from ninety to one hundred years are as follows: Mrs. Sarah Stowell, 1830, ninety-nine; Jonathan Sanderson, 1832, ninety-two; Eunice Spooner, 1836, ninety-two; Esther Gale, 1849, ninety-two; Mary Curtis, 1853, ninety; Joel Brooks, 1856, ninety-six; David Wheeler, 1857, ninety; Mary Dunn, 1857, ninety-four; Bertha Covill, 1857, ninety-two; Josiah Newton, 1858, ninety; Caleb Chamberlain, 1862, ninety-one; Lydia Holman, 1862, ninety; Elijah Pike, 1864, ninety-one; Robert Goddard, 1868, ninety; Betsey Upton, 1869, ninety-one; Jonathan Simmons, 1869, ninety-nine; Lucinda Chamberlain, 1869, ninety; Joseph Farrar, 1870, ninety; Artemas Wilder, 1871, ninety-one; Hannah Loring, 1871, ninety-two; Caleb Bancroft, 1871, ninety-two; Elizabeth Tolman, 1875, ninety-two; Cephas Willard, 1879, ninety-two; Celia Morse Whipple, 1880, ninety-two.

CHAPTER LXXVI.

PETERSHAM—(*Continued.*)

THE REBELLION—PUBLIC SPIRIT.

Action, May, 1861—The Financial Burden—The Muster Roll, 53d Regiment, 21st Regiment, 31st Regiment—In Other Commands—The Navy—The Rebellion Record—Local Improvement—The Library Established—Memorial and Library Building Proposed—The Future Outlook.

THE REBELLION.—At the annual meeting of the town, held May 1, 1861, action was taken in view of the state of the country, it being "*Resolved*, That the Town Treasurer be authorized to borrow a sum of money not exceeding ($3000) three thousand dollars, to be expended, in whole or in part, under the direction of the selectmen, for the purpose of providing uniforms for a military company, and supporting the families of those volunteers who may be called into the service of the State or the United States, and that the selectmen be authorized to pay one dollar per day to volunteers after they are enrolled, organized and accepted by the State, for their services drilling."

It will be noticed that this action comprehensively assumed the entire responsibility of providing uniforms, payment of the soldiers at a rate higher than that allowed in the United States army, and supporting the families of the soldiers. This appropriation was the beginning of the financial responsibility of the town on account of the Civil War. Additional appropriations were made from time to time, until the town had paid $13,999.76. The sum of $3195.64 was voluntarily subscribed by individuals, and $1800 paid as commutation by drafted men, making a total amount paid from all sources of $18,995.40. Of this amount only $3663.56 were refunded, leaving the net cost of the war to the town as such at the sum of $15,631.84. This represents the excess paid by the town in addition to its equal share paid by State and national methods of taxation.

Remarkable as the exhibit is for a country town, the assessed wealth of which was less than a million of dollars, the exhibit in respect to enlistments is still more notable. It appears from the town records that there were in the town at the beginning of the war, 1861, one hundred and eighty-eight men liable to enrollment. As appears from the Rebellion record, published by the selectmen at the close of the war, there had been one hundred and seventy-seven enlistments in behalf of the town. Some of these were re-enlistments, some were secured by bounty offered by the town; but the fact that the enlistments so nearly equaled the total number liable to enrollment is certainly very creditable to the patriotism of the town.

One hundred and forty-seven men appear to have honorably served in behalf of the town, a number of these having re-enlisted, the total number liable to enrollment in 1861 being, as before stated, one hundred and eighty-eight. Hon. John G. Mudge has furnished the names, given below, of those who served, with the remarks relative to death which follow in case of all, so far as known, who are not now living. This roll does not include several from out of the town who enlisted and subsequently deserted.

FIFTY-THIRD REGIMENT (MASSACHUSETTS VOLUNTEERS).—Captain, John G. Mudge; Sergeant, Joseph W. Upton; Corporals, J. Benjamin Howe; Joseph M. Jackson, killed at Port Hudson, June 14, 1863, Benjamin W. Spooner. Privates: Jonas Brown, died January 29, 1879; Luther S. Benjamin; Charles E. Ball, died June 27, 1863; Samuel A. Chamberlain; Sanford E. Chamberlain; John F. Clark, died 1863; Charles E. Cook; Horace Drury; Geo. H. Edwards; Wm. P. Fairbanks; Augustus S. Gates; George W. Gates; Sextus P. Goddard, died November 1, 1885; Charles F. Hapgood, died August 8, 1863; John F. Jennerson, died June 26, 1863; Dwight Lippitt, died June 6, 1863; Henry H. Lippitt; William Henry Mann, died April 23, 1863; Spencer T. Nye; Austin C. Parmenter, died February, 1864; George H. Parmenter, died June 26, 1888; Lyman Peters; Lewis D. Robinson; George A. Rogers; Valentine O. Rathburn; Alonzo Rathburn; John B. Stevens, died September 4, 1863; Frederick L. Sanderson, died May 10, 1888; James H. Stowell; Alex. E. Smith; Charles B. Smith, died March 23, 1877; Quincy A. Shepardson, died July 27, 1863; John E. Townsend; Lauriston A. Simonds, died November 28, 1869; Augustus Wheeler; John A. Wilder, died November 19, 1872; Charles H. Williams; Henry Rathburn, died September 2, 1863.

TWENTY-FIRST REGIMENT.—D. Marshall Mitchell, died August 23, 1882; German Lagara; Calvin C. Aldrich; Daniel Noonan, died November, 1882; Samuel F. Young; Geo. W. Young; Dwight Ripley, killed at Knoxville, Tenn., November 25, 1863; John W. Clark, killed at Petersburg, Va., June 1, 1864; Calvin C. Barnes, died February 9, 1866; Geo. H. Holman; Job Lippitt; Geo. D. Whitcomb; Lyman D. Edwards; Abner C. Gates, died February 20, 1865; Asa F. Ellis, died at Boston; David R. Brown, died at Athol; Wm. H. Allen; Benjamin W. Crickett; Geo. O. Cook; Henry Woods; Sergeant Frank N. Peckham; Hiram Newman; Hoyt Hale, died August 7, 1862; Chas. S. Brigham, died from wounds received at Antietam, September 17, 1862; Edward A. Jackson, died at Gardner; Edward O. Murphy.

THIRTY-FIRST REGIMENT.—Ellis P. Amsden, died September 25, 1863; Jacob E. Amsden, died June 3, 1864; Zibina Cutler, died August 9, 1862; James Fobes, killed at Port Hudson, June 14, 1863; Leonard Stowe; George F. Newton; William Ryan; Albert W. Stevens, died April 8, 1863; Charles A. Stone, died August 4, 1863; Horace W. Pike, died June 13, 1863; John Young, died 1883.

In various other regiments of infantry, cavalry and artillery the persons whose names follow were

enrolled:—Joseph Roe, killed at Atlanta, Ga., July 3, 1864; Calvin Carter, died; George A. Davis, killed at Ball's Bluff, October 21, 1861; Jacob Nosedale; D. M. McChester; George W. Jillson, died July 25, 1875; Albert Haskins; U. P. Phinney; George D. Mason, died August 10, 1878; Hiram Rathburn; Charles A. Pelkey; Eben A. Conant; D. E. Collins; T. E. Rossiter; Thomas Riley; Lieut. Elisha Eldridge; Henry B. Aldrich; Thomas E. Field; James Wilson; William M. Peckham; Sergt. George H. Holman, died November 17, 1864; Edward A. Arnold, died 1872; Albert Hemmenway; Almond Williams, died June 5, 1874; Josiah C. Whitney; Dennis Brown, died February 20, 1868; David Ahern; Isaac Williams; George D. Whitcomb, died; Samuel F. Young; Winsor Gleason; Silas Richardson, died at Andersonville, Ga., Oct. 26, 1864; James Hyde; Erastus Weeks; Seneca D. Weeks, died 1883; Frank Ramsdell; Henry H. Williams, died September 30, 1876; James Kelley; Edward Whiting, died July 8, 1865; James W. Browning; Daniel Blackmer; David E. Howard; Charles Lamphire; James Frazer; Martin Heald; Patrick Dunn; Lyman D. Edwards; Charles R. Englehart.

In the navy were found Leonard Brock, James W. Browning, James Mulligan, James Reed, John Norris.

The town was also credited by the State, in addition to these names, with eight three years' men and four colored recrui s for three years' service.

In the month of April, 1866, the selectmen published the Rebellion record of the town, thus summing up the results: "Civil war in our land has ceased. The Rebellion, the greatest the world has ever witnessed, has been crushed, and our government, by the aid of loyal hands, stands stronger than ever in the hearts of the people. Our heroic army has fulfilled its mission; the living have returned to their homes, its dead are the nation's richest legacy. Petersham has responded promptly to all calls upon her loyalty and patriotism. The close of the war finds a small surplus of men placed to her credit. . . . The services of her soldiers were a priceless heritage; their honor our honor; which we should ever cherish with reverence and gratitude."

These facts are sufficient to show that the early reputation of the place, which gave it for a time the name Volunteers' Town, was well-sustained during the most critical period of our country's history since the Revolution.

Local Improvement.—A stately row of elms near the place formerly occupied by Dea. Cephas Willard, a mile north of the village, bears witness to a spirit of improvement among the people more than a century ago. The orderly condition of the large majority of the farms, the erection of a commodious town hall and school-houses in different parts of the town, the building at large expense of a shed for the protection of horses, adjoining the Unitarian Church, are more recent marks of the favorable disposition of the people towards town improvement. In the year 1878 the "Petersham Village Improvement Society" was organized, as stated in the constitution, "for the purpose of improving the good order and social condition of the town, adorning and beautifying the place of our home, promoting the public convenience and health, and elevating the standard of taste" of the people. The method of securing these objects was designed to be "by the transplanting of trees and the promotion of the growth of grass on the public grounds of the town, the establishment of sidewalks and improvement of the highways, encouraging the establishment of a public library, attention to general cleanliness with especial reference to the public health and by occasional meetings for the discussion of these objects and methods."

With purposes so largely stated, the society began a short existence of four years, after which it became inactive. Yet those few years of work were sufficient to make a permanent impression upon the future of the town. Many trees were transplanted which still live, walks were graded, and the movement which finally resulted in the organization of the Petersham Free Library was initiated. Francis A. Brooks, Esq., of Boston, a native of the town, made the first contribution, $500, toward this object. Other sums having been secured from individuals, the town finally made an appropriation sufficient to increase the library fund to more than $1000, with which the library was begun in the year 1879. Since that time it has received the benefit of frequent donations, with appropriations made by the town from time to time. Mrs. Ann Ingersoll left a small bequest in its favor. Some historical lectures were delivered by John Fiske, the proceeds to be applied to library purposes.

In the month of September, 1886, from fairs and other entertainments, several hundred dollars were raised in the hope that this would prove the nucleus of a library and memorial building. Various sums were afterwards added in the same manner, and the town, at the spring meeting, 1887, appropriated $300 with a view to adding similar sums annually.

In the autumn of the same year, Mr. Francis H. Lee, of Salem, became actively interested in raising the sum necessary to complete the work, in which task he had co-operation of Hon. John G. Mudge, James W. Brooks, Misses Elizabeth H. and Charlotte L. Flint and others. By their efforts the sum previously assured was increased to about $5000. At the annual town-meeting, 1888, the sum of $2000 was appropriated and J. G. Mudge, J. W. Upton, George Ayers were appointed a building committee on the part of the town; Misses E. H. and C. L. Flint, Francis H. Lee, James W. Brooks and William Sims acting in behalf of the contributors. Edmund Willson, of the firm of Stone, Carpenter & Willson, gave his services as architect. The plan adopted was a building of field-stone, the rooms of the first floor to be a pub-

lic hall, with stage, a memorial hall, a library and reading-room. The building fund has been increased to about $11,000, and the erection of the library and memorial hall may be expected during the year 1889.

The work of local improvement has been privately prosecuted by James W. Brooks who made large improvements upon "The Nichewaug," formerly called "The Highland Institute," converting what was before a boarding and high school building into an admirably appointed summer boarding-house.

Many summer residents of the town have shared in the spirit of improvement and have built new or remodeled old houses. Several artesian wells have been bored for the purpose of supplying the dwellings with water. As a result, the future of the town is likely to combine, as its present condition now does, the attractions of a popular summer resort with those of a venerable farming community.

BIOGRAPHICAL.

FRANCIS AUGUSTUS BROOKS.

The Brooks family have long been prominently identified with the history of Petersham. Major Aaron, who was the first of the name to settle here, came from Grafton to Petersham at an early day, and was a leading spirit in the affairs of the town. Aaron, his son, and father of Francis A., was born in Petersham. He was graduated at Brown University in 1817, and was subsequently a tutor in that institution. He studied law with Levi Lincoln and also with Hon. Lewis Bigelow. He settled in Petersham, and had an extensive practice in Worcester and Franklin Counties.

Francis Augustus Brooks was born in Petersham, May 23, 1824. He was prepared for college mostly at Leicester Academy, and was graduated at Harvard University in the class of 1842. He studied law and was admitted to the Worcester County bar in 1845. He removed to Boston early in 1848, and has there pursued the practice of his profession for a period of more than thirty years. In 1873 he became engaged in the prosecution of litigation for the enforcement of claims of creditors against railroads in Vermont, which occupied his attention largely for a period of ten years. Since 1883 his professional work has been devoted chiefly to the administration of business and corporate trusts.

In the general undertakings of his professional and business life, Mr. Brooks has met with a large measure of success.

In politics he has been a Democrat (as were many of his ancestors), but he has not held public office.

September 14, 1847, he united in marriage with Frances, daughter of Hon. Caleb Butler, of Groton, Mass., who is still spared to bless his home and life. Of their six children, three sons survive—Frederick, a civil engineer in Boston; Charles B., a stock broker in that city; and Morgan, a mechanical engineer, residing in St. Paul, Minn., and treasurer of the gas-light company of that city.

CHAPTER LXXVII.

STERLING.

BY SAMUEL OSGOOD.

THE history of Sterling previous to the year 1781 is inwoven with the history of Lancaster, of which it formed a part known at first by its Indian name, Chocksett, and secondly and until the above date, as the "West Precinct of Lancaster," and lastly by its incorporated name—Sterling.

The territory, it appears, was derived from three original grants. First, the mile, so called, being a strip of land about a mile in width, bordering on Lancaster and included in the first original grant of Nashua township made in 1643, and purchased of Sholan, the Sachem of the Nashuaggs, whose royal residence was between the Washacum Ponds, on the high ground overlooking both those beautiful sheets of water, probably not many rods distant from the ice-houses east of Mr. John Gates' residence.

The character of Sholan, the Sachem at Washacum, is ever spoken of with favor. He not only invited the English to this place and sold them an extensive tract of territory, but his deportment towards the settlers was always peaceable, and he was held in high esteem by his white neighbors.

In view of the above facts in reference to the pacific character of this prince of the red men, would it not be a merited tribute to his memory to change the name of that beautiful and, indeed, only island in the West Washacum from "Wood Island" to Sholan?

The second grant, containing the principal part of the town, was purchased of George Tahanto, a nephew of Sholan, in 1701.

The deed of this grant, "for and in consideration of" certain sums of money, paid at different times and to divers persons, was made to "John Moore, John Houghton and Nathaniel Wilder, their heirs and assigns, to have and to hold forever."

This deed was signed by George Tahanto (his 0 mark and Mary Aunsocamug her) mark.

Signed and sealed in presence of John Wansquon his (mark, John Aquitticus his 1 mark, Peter Puckataugh his p mark,) Jonathan Wilder and John Guild.

The third grant was the Shrewbury Leg. This was another strip of land, of somewhat irregular shape, set off from Shrewsbury to Lancaster by an act of the

Francis A. Brooks

Legislature in 1768. It was something more than a mile wide, forming what is now the northern part of Boylston and West Boylston and extending along the north bank of the Quinnepoxit River to Holden, its western boundary, thence northerly on Princeton line to the Stillwater River, its eastern boundary in the West Precinct.

Subsequently, in 1808, about one-third of this tract was set off from Sterling to West Boylston.

It will readily be seen that the town is bounded on the north by Leominster, on the east by Lancaster, on the south by Boylston and West Boylston, and on the west by Holden and Princeton.

The surface of the town is agreeably diversified by hills, plains and valleys—woodland and nicely cultivated farms—ponds and water-courses, set off with the neatly-painted and comfortable farm buildings of its rural population.

The soil of the hill farms is slightly argillaceous, retentive of moisture and naturally fertile. The water is pure, the air is bracing and healthful; and the scenery, especially in summer, is delightful.

There are five principal noted hills in the town. These are: Justice Hill, sometimes called Gerry's Hill, situated in the extreme northwest; Rowley Hill, about two miles west of the centre, and so-called because its first settlers came from Rowley, in Essex County; Fitch's Hill, which needs not to be described to travelers passing from Lancaster to Princeton; Redstone Hill, about a mile east of the centre, and so called from the color of its stones; and Kendall Hill to the southeast, about the same distance from the centre as the last named, and so called from the name of its first inhabitants, who came from Woburn.

There is also North Wiccapicca Hill, a remarkably well-rounded, steep, sharp-pointed eminence, on the north line of the town, owned principally by Mr. William C. Divol. It is cleared land, except a single clump of trees near the summit, which serves as a landmark for miles around. Rocky Hill, mostly in Leominster, projects into Sterling, on its northern border. South Wiccapicca is a precipitous ridge, running northerly from near the village to Pratt's Junction.

These hills, except the two last mentioned, are not craggy, unsightly protuberances, but grand swells of arable land, finely adapted to the production of grass and grain. The highest point of land in the town is believed to be on the farm of Michael Coyne, on Rowley Hill.

The territory is also embellished by four natural ponds, containing, respectively, two hundred, one hundred and seventy, thirteen and ten acres each. These, in summer, contrasting with the deep foliage around them, are of great beauty and loveliness, set like immense diamonds sparkling in the sun in a rich bordering of emerald green.

Stillwater River is a small stream running through the west part of the town, having its source a few miles above, in a gore of land known formerly—very properly—by the name of Notown. It flows through quite an extensive tract of meadow, once rich in the production of Foul meadow-grass (*Poa Serotina*), and blue-joint (*Calamagrostis Canadensis*), two varieties of forage plants, held in high estimation and much depended on for hay by the farmers of Sterling three-quarters of a century ago.

These meadows now are of little value (except it may be for cranberries), having, long since, become "run out." This quiet little stream, after it enters West Boylston, and receives the Quinnepoxit from Holden, assumes the more dignified name of the South Branch of the Nashua.

Various brooks wind among the hills, all finally emptying their tribute of waters into the Nashua. These now nearly useless small streams, two or three generations ago, when chair manufacturing was carried on quite extensively, were utilized in turning the wheels of many a "Turning Lathe" for the production of "Chair Stock."

A survey of the town was made in 1830 and a plan drawn by the late Capt. Moses Sawyer, a prominent leading citizen, and for many years the only practicing civil engineer of the town. Capt. Sawyer possessed in large measure the confidence of his fellow-citizens, and was noted for his probity, intelligence and practical good judgment.

The plan drawn by him was lithographed by Pendleton, of Boston, and contains much valuable information in regard to the topography of the town, from which the writer has obtained the following particulars:

The area of the town was found to be 19,265 acres, equal to nearly 32 square miles; 500 acres are covered with water. The population at that time was 1789. There were 256 dwelling-houses, 1 meeting-house, 1 town house, 3 grist-mills, 7 saw-mills, 2 shingle-mills, 1 bark-mill, 1 tannery, 10 chair manufactories, 3 taverns and 5 stores. Distance from Sterling to Boston, 39 miles and 23 rods; distance from Sterling to Worcester, 12½ miles. There were 71 miles of roads; and ten acres were used by the town. A few miles only of new road have been added since to shorten distances and avoid steep hills. This survey is worthy to be preserved in the archives of the town.

A former survey of the town was made by William Moris, Esq, in 1798, but it is believed no copies of that survey are extant.

Still another map of the town was made and published by Richard Clark, of Philadelphia, in 1855. This map, though more showy and pretentious in its style, is inferior to that of Capt. Sawyer's in point of valuable information. The noticeable features of Clark's map are that the eleven school districts are given in colors, and the three churches, town hall and several of the residences of the citizens are represented on the margin.

It does not appear that any settlements were made

within the present limits of the town until 1720. In that year five families came up from Lancaster and set themselves down on the rising lands west of the village, in the direction of Princeton.

The names of these pioneer settlers were Jonathan and David Osgood, Gamalial Beaman, Benjamin Houghton and Samuel Sawyer.

Jonathan Osgood located not far from the geographical centre of the town, on the place now owned and occupied by Mr. George F. Davidson. He was the first deacon in the town, and public worship was at first frequently held at his house. The writer recollects clearly the large, commodious old dwelling. It had an antiquated appearance, and was demolished near the close of the second decade of the present century, and the plain beautiful residence of Mr. Davidson was erected upon its site by the then enterprising proprietor, the late Mr. Gilson Brown.

David Osgood went a little farther westward and pitched his tent on the farm of the late Edward Raymond Fitch, now owned and occupied by his youngest son, Charles B. Fitch. The old red house yet remains, presenting a very neat and attractive appearance, it having been, to some extent, remodeled and kept in excellent repair. It is one of the oldest houses in the town.

Gamalial Beaman went a half-mile still farther west and established his home on the farm now owned by Mr. Wm. S. Walker. The farm remained in the possession and occupancy of his lineal descendants until 1834.

Benjamin Houghton sat himself down about seventy rods due north of the last-mentioned place—on the farm now owned by Mr. Asa Spencer. The old house remained until 1821, when it was destroyed by fire. It was occupied at that time by two families—Mr. William Reed and Simeon Toney. Traditional circumstances and anecdotes lead us to suppose that Benjamin Houghton was, in his day, a stirring business man. He kept a tavern, and hence was known everywhere as "Landlord Ben." He was also a very large landholder, as the Proprietor's Records and the Registry of Deeds will amply show. An anecdote in reference to this used frequently to be told of him. Two persons were discussing the physical characteristics of the moon. "They tell me," says one, "that there is land in the moon." "No," says the other, "I do not believe it, for if it were so Landlord Ben would have a farm there." But his large estate passed out of the possession of his descendants shortly after the death of his son Joel, who died in 1816.

Samuel Sawyer took up land and built a house a short distance north of Landlord Ben, on the farm now owned by Mr. Charles H. Newton. The old house remained until 1816—standing exactly in what is now the roadway—when it was taken down, and the present more modern dwelling-house was erected some fifty feet in the rear of the old one, by his grandson by the same name.

The descendants of these several persons above named have been very numerous, and very many of them have been leading citizens, holding honorable positions not only in Sterling, but in other places wherever, in the course of more than a century and a half, some of them may have migrated.

The meagre records of these early times furnish but little clue to the rapidity of the settlements, or to the increase of the population that followed. It is evident, however, that large portions of the best land were soon taken up and brought under cultivation by others, also, from Lancaster, and from other towns as well. Tradition has it that many families came from Rowley, in Essex County, and settled in the more northwest part of the town, hence called Rowley Hill. And indeed, in confirmation of this, we find, in the Registry of Deeds at Worcester, conveyances of land from Benjamin Houghton to several parties from that town as early as 1733.

Another exotic implanted in the virgin soil of the town, from which sprang a numerous and influential portion of its population, was that of the Kendalls from Woburn. Josiah Kendall came to this town in 1736, and settled upon the farm now owned and occupied by Daniel and James F. Kendall, father and son, direct descendants of the said Josiah. For a further account of this family the reader is referred to the "Kendall Memorial," a family history of much merit, by Oliver Kendall, of Providence, R. I.

And so rapid indeed had been the progress in population and general advancement, that in thirteen years from the first settlement the inhabitants petitioned the Legislature to be set off as a separate township. This petition, having in view a large excision of territory from the old town, met with determined opposition and was rejected. A long and a rather unpleasant controversy followed. But whatever of acrimony may have been engendered by the contest, the asperity of feeling was softened and the inhabitants of the west part of the town were in a measure pacified by being made a corporation by the name of the Second or West Parish in Lancaster.

The Rev. Mr. Marvin, in his "History of Lancaster," —page 198—has given the names of those who signed this first petition "to be set up as a new township." They are quoted here to show who were the leading men of the town at that time. They are as follows: Gamalial Beaman (on another page called "the irrepressible"), Ebenezer Prescott, Benjamin Houghton, Samuel Sawyer, Jonathan Osgood, Fairbank More, Jonathan Bealey, Thomas Ross, Joseph More, Shubael Bealey and John Snow.

But this proposition for a new township was among the inevitable events of the future, and was a bone of contention between the old town and the West Parish for more than forty years, when, finally, on the 25th of April, 1781, the Legislature settled the matter by granting an act of incorporation of the new town by the name of Sterling.

In 1741 or 1742 the first meeting-house was built, principally by the voluntary labor of the inhabitants, the town granting them but a small sum from its treasury for the purpose. The spot whereon it was set is the same that is now occupied by the Unitarian Church. The site is included in a lot of three acres, made over to the First Parish by deed of gift from Elias Sawyer, for the purpose of setting a meeting-house and for conveniency of stables and other uses. This deed is recorded in the Registry of Deeds, book 18, page 129. To accommodate the increasing population, an addition was made to this old church in 1766. Mr. Goodwin says of it now, that "it must have presented a singular appearance with three gable ends." The pews were not sold, as in later days, but every year a committee was appointed to "seat the meeting-house," by which process those paying the highest taxes were accorded the most desirable sittings, and so on in regular gradation.

It was not until after the adoption of the Constitution of the United States that regular enumerations of the inhabitants began to be made decennially by law. But somewhere in the old church records it is stated that in 1764 the town contained 156 dwelling-houses and 856 inhabitants. And at the time of the first national census in 1790, there were 209 dwelling-houses and 1,428 inhabitants. Thus it is seen that the town made commendable and steady progress in the first seventy years of its existence. To the traveler or the casual visitor the place must have presented an appearance of substantial prosperity and comfortable living. Large, commodious dwelling-houses had been built of similar style and construction throughout. They all fronted to the south; were two-storied in front, with a long roof running down to one low story on the north side. Two large square rooms occupied the ground floor on either side of the front door, usually distinguished—as the house stood square to the four points of the compass—as the "east" and "west" room, with corresponding chambers above. Immediately back of these two front rooms was the long kitchen, with its wide-mouthed fire-place and capacious oven.

A score or more of these plain, ancient dwellings still remain, though all have undergone more or less alteration. The habits and mode of life of the people was as plain and substantial as their dwellings. They were industrious and frugal, and their way of subsistence, down even to the time within the memory of persons now living, was simple and inexpensive.

The walls of their houses were unadorned with fresco or elegant, costly paper-hangings, and the floors were innocent of carpets. Neatness of person, however, and in household arrangements was a characteristic of the time. In summer, in the absence of carpets, it was the custom to sprinkle clean white sand on the floors, and fill the wide chimney-mouth with evergreen bushes, relieved here and there by daisies and sprigs of golden-rod. This was the old English fashion, as we infer from some lines of Goldsmith, in his "Deserted Village," where he says:

> Imagination fondly stoops to trace
> The parlor splendors of that festive place:
> The white-washed wall, the nicely sanded floor
> * * * * * *
> The hearth, except when winter chill'd the day,
> With aspen boughs, and flowers, and fennel gay.

Among the few that remain of these ancient dwellings, that now owned and occupied by Mr. Dugan, on the Amory Farm, best represents, in its external appearance, the houses referred to above.

This farm was owned many years ago by Rufus G. Amory, Esq., of Boston. Originally it was owned by Colonel Asa Whitcomb. Colonel Whitcomb possessed a large estate, and was a noted man in his day. He was chosen deacon of the church in 1760, Representative to the General Court in 1766, '68, '69, '70, '71, '72, '73 and '74. He was a delegate to the Provincial Congress at Cambridge February 1, 1775, and was appointed justice of the peace in 1780. Liberty is here taken to transcribe the account Mr. Goodwin has given of this eminent citizen in the *Worcester Magazine* in 1826:

> At the commencement of the war he was one of our wealthiest citizens. He was for many years entrusted with the most important and responsible offices,—was Deacon of the Church, Representative from Lancaster before the division, and Justice of the Peace, besides his various military stations. Such was his zeal in the cause of liberty, and so great his confidence in the patriotism and integrity of his country-men that he pledged his whole fortune upon the faith of the paper currency, and consequently became bankrupt He removed to Princeton, where he died at an advanced age in a state of abject poverty; sustained by a conscious integrity, that never departed from him, and an exalted piety that elevated him above the ills of life.

The farm on which he died is in the easterly part of Princeton, owned by Mr. Estee, formerly known as the Temple place.

Another of these antiquated houses is that on the Kilburn Farm on Rowley Hill. This house was probably built by Deacon Joseph Kilburn. He was chosen deacon in 1767, and died in 1789. This farm has ever been held in the Kilburn name, and is now owned by Mr. Levi Kilburn, a grandson of Deacon Joseph. The present owner is now in the eighty-fourth year of his age. It is not improbable that this farm may be retained in the Kilburn line for at least another generation.

The oldest house in the village is a part of what is now the Central Hotel, kept by our popular landlord, Mr. J. N. Brooks. This house is said to have been built in the year 1759, by Mr. Jabez Brooks, and, for much the largest part of the time since, has been occupied as a tavern. At the time it was built there were but two houses within the distance of half a mile,—Deacon Jonathan Osgood's at the west and that of Mr. Roger Robbins at the east, where Mrs. C. A. Riley now lives. Another ancient dwelling is that on the north end of the Common, owned by Mrs. C. A. Goodnow. It is claimed by some that a

part of this house was the first house built in the village. It was, in very early times, owned and occupied by a Mr. Harris, grandfather of the late Mr. Clarendon Harris, of Worcester.

The public records of the town were destroyed in September, 1794, by the burning of Mr. Moses Smith's store. Mr. Smith was town clerk at the time, and kept his public office in the store. The destruction was complete—leaving a blank in the town's history, from that date back to the time of its incorporation as a precinct—a period of more than fifty years. Subsequent records, however, show that the town did not suffer in comparison with other towns around in the public spirit of its citizens or in the liberality of its appropriations for roads and other improvements, and for the maintenance of church and schools. An inquiry has recently been raised, whether the town had ever adopted by-laws, regulating the transaction of public business; and in the belief that it never had done so, a committee was appointed at a late town-meeting to prepare suitable rules to be presented at a future meeting for the town's consideration and action. By a reference to the record of a town-meeting, held on the 3d day of November, 1794, it will be found that a code of by-laws for the regulation of town-meetings was adopted, which runneth as follows:

Art. 1. To take a seat and sit.

Art. 2. To proceed to business at the hour appointed in the Warrant.

Art. 3. To rise and address the Moderator with hats off when we wish to speak and sit down when done speaking.

Art. 4. That we will not presume to speak when one is orderly speaking before us.

Art. 5. That we will not interrupt by attempting to converse, or transact private business when assembled for public.

Art. 6. That the law respecting the Moderator's duty shall be read at the opening of every town-meeting, if requested.

Art. 7. That the Moderator shall exercise the powers vested in him by law, and that we will strictly obey.

Art 8. That the above articles shall be copied in a large, legible hand and brought in by the Clerk at the opening of every town-meeting and hung up in open view of the town.

In 1799 the second meeting-house was built, and located on the site of the old one at a cost of $8500. Mr. Timothy Hildreth was the builder. He was, at the time, tavern-keeper as well as carpenter.

In the following year the town-house and school-house combined was erected on the spot occupied by the present one, which was formerly the site of Mr. Samuel Brown's blacksmith shop. (See deed of Samuel Brown to Ebenezer Pope, book 146, page 60; also deed of Ebenezer Pope to town of Sterling, book 168, page 66, Registry of Deeds.) It was a very plain building—thirty-eight by twenty-eight feet—innocent of paint, and cost about $700.

Previous to 1822 the method of supporting the poor was by boarding them out among such families as were disposed, for the sake of the income, to take them. The manner of disposing of them was sometimes by auction. But, in time, a more philanthropic sentiment began to prevail, and this mode of providing for the unfortunate poor was regarded as inhuman. In consequence, in the year above-named, a committee of intelligent citizens was appointed at the town-meeting, in March, to take into consideration the manner of supporting the poor, and report whether a change for the better might not be made. In due time the committee presented to the town an able report, setting forth the disadvantages and the inhumanity of the present system, and recommending the purchase of a farm as a better and more economical way of discharging the town's obligation to this unfortunate class of her population. The report was accepted and the committee was instructed to purchase a farm at a cost not exceeding the sum of three thousand dollars. Thereupon the farm, now owned and occupied as the Pauper Establishment, was purchased. The former owner was William Morris, Esq. The farm contained sixty acres, and was purchased for the sum of $1900. Seventy-five acres have been added since the original purchase, making a total of one hundred and thirty-five acres; valued in the overseer's estimate for 1888 at $3400. A large and commodious Almshouse was built in 1877, containing twenty-six rooms. Careful provision is made for the comfort of the inmates and the care of the insane. Eight rooms are suitably fitted up for the latter class and five rooms are devoted to the common poor. The estimated value of the house is $3000. The other farm-buildings have been recently thoroughly repaired, and, to some extent, remodeled, and are valued at $1000.

In 1825 a fund of one thousand dollars was established, the income of which to be used in furnishing females of limited means with fuel during the winter months. The fund was derived from the sale of a farm given to the town for that purpose by Jacob Conant, Esq.

The fund is under the control of five trustees, who are to be chosen annually, and who are to render account to the town and submit their books and papers to its inspection, and also to that of the donor and his heirs, whenever requested so to do. By the report of the trustees, at the annual town-meeting in March, 1888, the principal of the fund invested was shown to be two thousand and twenty-four dollars, showing that the fund has been carefully and judiciously managed, while at the same time, from year to year it has fulfilled the purpose of the benevolent donor. The "Conant Fund" has relieved anxiety and carried cheerfulness to many a poor widow's heart as the cold winds of December have whistled dismally about her dwelling.

The late Mrs. Emily Wilder made a bequest in her will of fifteen hundred dollars for a similar purpose, which the selectmen, as trustees, received from the executor of her estate in 1887, and which they have duly invested.

The old town-house, built in 1800, having fallen into somewhat premature decay, partly in consequence of having been used as a school-house as well as a town-house, was sold in 1835 to Mr. John B. Pratt,

who removed it to a location a little south of the village on the Worcester road, known ever since by the euphonious name of "Tuggsville," and our present chaste and well-proportioned town-hall was erected in its place. It was built by Mr. John Springer, for many years a respected resident of the town. It was completed in November, 1835, and was immediately dedicated with appropriate ceremonies. Edwin Conant, Esq., delivered the dedicatory address, a large assemblage being present. In the evening following the services of dedication, a very pleasant musical entertainment was given, in which some noted singers, former residents of the town, took part, among whom were Colonel Daniel Newhall, of Boston; Bartholomew Brown, Esq., of Bridgewater; Mr. John Brown, of Boston; Mr. Nathaniel Sawyer, of New York, and Mr. Cephas Newhall, of Sterling, all of whom were "singing masters," or, as in modern parlance, "professors of vocal music."

CEMETERIES.—There are four public burial-grounds within the limits of the town. One is situated in the southwest part of the town in the Leg District (so called); one near Sterling Junction; the old village churchyard, where repose the remains of the first settlers of the town and many of their descendants; and the new "Oak Hill Cemetery," half a mile distant from the village on the Lancaster road. The latter contains about eight acres and was purchased of Mr. Joel Houghton in 1858. Much attention and labor of late years has been bestowed upon all these hallowed depositories of the dead, in repairing and new-setting the fences, furnishing suitable gates and entrances, and in removing weeds and bushes, and all unsightly objects which offend the moral sentiment, if they do not tend to nourish the "horrors of the tomb." And it is pleasant to observe that all these sacred enclosures are being cared for and ornamented, both by public and private munificence, by chaste monuments of marble or granite, by graded avenues or shaded paths, and by the planting of flowering shrubs and plants around and within the curbed family lots in a manner calculated to render them pleasant resorts, suited to calm contemplation, or to secret, holy communings of the soul with that of the loved but silent tenant of the grave.

The old burial-ground was enlarged in 1837 by the purchase of about two acres adjoining on the south side, including an avenue to the Kendall Hill road, where there is an entrance with stone posts and an iron gate. It was purchased of Mr. Augustine Holcombe. It was laid off into family lots, which have been mostly taken up, and now thickly abounds with becoming monuments, mostly of marble, of various styles.

The "Oak Hill Cemetery" was laid out into burial lots, avenues and paths under the direction of a committee, consisting of Daniel Hosmer, Eli Kilburn, Captain Moses Sawyer, Luther W. Rugg and Ezra Kendall, appointed at the annual meeting in March, 1859, with power to employ a civil engineer; and at a subsequent meeting the same committee were authorized to enclose the land by a suitable picket-fence, and to grade the avenues and paths, and to prepare a code of by-laws for the regulation of the affairs of the cemetery.

The committee caused a plan of the whole ground to be made out, by which it was shown that it contained three hundred and fifteen lots, but only one hundred and fifty-one lots were staked out. An additional number has been staked out since, and there are still others to be prepared for use as necessity may require. A cemetery committee is chosen each year, who have entire control of all burying-grounds, and all funds given or appropriated for the purpose of improving or beautifying them.

An exceptionally interesting event occurred in this town in September, 1824. It was a no less occasion than the "reception" given to the Marquis De Lafayette as he passed through the town on his return to New York by way of Worcester and Hartford.

From the moment Lafayette landed at New York on the 15th of August, after an absence of nearly fifty years, the whole country was aroused to the greatest enthusiasm to do all honor to the great and good man who had rendered such distinguished service in the hour of the country's greatest need. The circumstances attending his visit to Sterling were briefly these. Soon after his arrival at New York he set out on a journey north as far as Portsmouth, N. H. His route lay through New Haven, New London, Providence and Boston. Returning from Portsmouth, he left Boston, passing through Lexington, Concord, Bolton, Lancaster and Sterling on his way back to New York, by way of Worcester and Hartford. He spent the night at Bolton at the hospitable mansion of Hon. S. V. S. Wilder. At all places he received the most patriotic and flattering demonstrations of respect—the whole country ringing with salutes and applause. The citizens of Sterling were not behind in patriotic emotion or in enthusiasm to pay due homage to the distinguished guest of the nation. Suitable preparations were made. A triumphal arch was raised in front of Mr. Bartlett's store, bearing the words—"The Nation's Guest." "Welcome Lafayette." A broad platform, about four feet high, was erected nearly in front of the Congregational Church, neatly covered by a carpet and reached by a flight of stairs. There were then no trees or other obstructions upon the Common to obstruct the view. There was a military display consisting of the "Sterling Light Infantry," a fine volunteer company, recently organized, with new and beautiful uniforms, under command of Captain Phineas B. Dana; the "Princeton Light Infantry," another equally splendid volunteer company, commanded by Captain Amos Merriam; the old militia company, and the artillery company, belonging partly in Sterling and partly in Lancaster, and commanded by Captain Daniel F. Maynard, of Sterling. Promptly in the morning, men,

women and children came flocking to the village, eager to feast their eyes upon the venerable hero, who had early espoused the cause of American freedom, and had hazarded his life and shed his blood for its consummation. At about eleven o'clock A.M. the general and his suite arrived, preceded by a body of cavalry and followed by a long line of carriages from the towns below. Alighting from his carriage and ascending to the platform, he was received by the Board of Selectmen, who, through the chairman, Isaac Goodwin, Esq., made a felicitious address, to which Lafayette happily and appropriately responded. After a little time spent in hand-shaking with the ladies, the general again entered his carriage and proceeded on his journey amid the waving of handkerchiefs, the huzzas of the multitude and the salutes of the artillery.

ECCLESIASTICAL.—The first church in Sterling was organized December 19, 1744, and on the same day the Rev. John Mellen was ordained pastor. The pastorate of Mr. Mellen extended over a period of thirty-four years. From all the accounts we can gather of him it would seem that he possessed in an eminent degree the essential qualities necessary to a successful minister of the Gospel. In average ability he was at least the equal of his professional brethren in the towns around him. Mr. Goodwin says of him that he "probably stood at the head of the clergy in the county."

Under his ministrations the affairs of the church and town appear to have advanced prosperously for many years. But those that are at all familiar with the history of these early times are not surprised that a day of fiery trial was near at hand for both minister and people alike. Questions of greater freedom in affairs of church and state were everywhere agitating the public mind. People had become extremely jealous of their rights and every attempt at encroachment upon them was met with bold and determined resistance. On the part of Mr. Mellen and his people it was a question of high church and prerogative on the one side and larger liberty on the other.

We of the present generation can have but a faint idea of the bitterness of the controversy that prevailed in New England for a score of years following 1760. Mr. Mellen was formally dismissed November 14, 1774, but continued to hold meetings and administer the ordinances with his faithful adherents at his own house and at the school-house for a number of years afterwards. But through all the unfortunate disagreement the moral and Christian character of the minister was but slightly assailed. And it is pleasant to remember that after his removal from town and resettlement over another society, he occasionally returned and occupied the old pulpit from which he had been, some years before, forcibly excluded, and where, by the impressiveness of his discourses, he won the favor of those who had once been his malignaut foes.

After these few troublous years the churches had rest. A season of quiet having now been restored and all asperity of former feeling having subsided, the people united in calling to the ministry, as the successor of Mr. Mellen, the Rev. Reuben Holcomb. He was ordained June 2, 1779. Rev. Mr. Holcomb's pastorate continued thirty-five years, and was noted for its reign of peace and prosperity throughout.

During all these years no dissatisfaction appears to have been expressed with regard to the minister or any loud, vociferous complaints uttered against him. But, all on a sudden, at the commencement of the year 1814, a petition was drawn up and signed by a hundred or more of the citizens, asking the selectmen to insert in the warrant for March meeting an article "to see if the town will choose a committee to converse with the Rev. Reuben Holcomb to see on what terms, if any, he will relinquish his pastoral office in this town." To the pastor and to those not in the secret this movement was a complete surprise.

The vote upon the article passed in the affirmative and a committee of seven of the leading citizens was appointed accordingly. The following are the names of the gentleman composing the committee: Luther Allen, Joseph Kendall, John Porter, Moses Thomas, Thomas H. Blood, Samuel Sawyer and Aaron Kimball.

Immediately after the official interview of the committee with the pastor, Mr. Holcomb addressed a lengthy communication to the church and town, in which he reviewed the events of his ministry, and declared that, in view of the hitherto harmonious relations between himself and his people, the above proceeding on the part of the town "*was a sudden and unexpected event.*" But he at once preferred a request for dismission on the ground of "*want of health, want of affection among you towards me, and as a result of all, the want of a prospect of usefulness and comfort.*" A mutual council was called and the request for dismissal was granted. It does not appear that any serious alienation of feeling was caused by the separation on the part of Mr. Holcomb and his friends and the society. Mr. Holcomb continued to reside on his beautiful hillside farm, regularly attending church services in the place of his former labors until his death, which occurred, October 18, 1826, at the advanced age of seventy-five years.

The successor of Mr. Holcomb was the Rev. Lemuel Capen, who was ordained March 22, 1815. Mr. Capen was much beloved by the people of the town, and his ministry, though short, was in all respects a happy one, abounding in great good to the community among whom he was called to labor. The annual salary of Mr. Capen was six hundred dollars. But this sum being inadequate to meet the expenses of his family, and desiring not to seem burdensome by asking additional compensation, "and thus (to use his own words) endangering that unusual degree of harmony and unanimity which now so happily subsists among you as a religious society and as a

town," he felt it his duty on the 4th of January, 1819, to ask a dismission. An ecclesiastical council was called, and a separation took place. On the 21st of January a town-meeting was held, and the following vote was unanimously passed: voted, "that after mature deliberation on the communication of the Rev. Lemuel Capen of the 4th instant, and the consequent result on that communication, we cannot with honor to ourselves and justice to him, but declare, that we received his communication with extreme regret and concern; that the manner in which his request was disposed of was not the result of dissatisfaction as to his acquirements as a scholar, his deportment as a man, or his attainments as a Christian; but the conviction that an addition to his salary at this early period might materially endanger the universal harmony which now so happily prevails among us." And after some further expressions of "confidence in his character for purity of heart and rectitude of life," the vote concludes: "It now only remains for us to wish him all the joys and hopes of the good man, the polished scholar, the sincere friend and the real Christian."

The next minister in regular succession in the ancient church was the Rev. Peter Osgood, of Andover. He was ordained June 30, 1819. Mr. Osgood was never blessed with a strong physical constitution and his labors were frequently interrupted by ill-health. Previous to his settlement and for some years afterwards there was no other religious society in the town, and the number of inhabitants was larger by some hundreds than at the present time. Custom, moreover, required two elaborate sermons every Sunday. Consequently the duties of a minister, in those days, were far more laborious than now; and besides, by virtue of his office, he was expected to be in a measure the guardian of all the children of the town and the chief supervisor of its schools. Mr. Osgood was heartily interested in the education of the young. He labored faithfully and earnestly to promote the highest welfare of the schools. He exercised a watchful care over them and his frequent visits to them were gladly welcomed by both teachers and pupils. In this regard especially he is now held in grateful remembrance by many of the elderly people of the town.

But his strength was not equal to his day. Under his pastoral and ministerial labors he felt that his health was gradually, but surely, giving way and that his "only hope of enjoying comfortable health" was in relief from the cares of a parish and the labor of study. In the spring of 1839 he felt himself compelled to ask a dismission; but so strong was the attachment of his people to their minister that they were unwilling that a separation should take place until some effort for his restoration should be made by means of entire rest and freedom from care. Accordingly, at the parish-meeting which followed, a committee was appointed to converse with the Rev. Mr. Osgood respecting his request for a dismission from his ministerial office. It was also voted unanimously "that the Committee be instructed to offer to the Rev. Mr. Osgood a suspension of his ministerial duties to the Parish for one year, then to resume them, in case his health should warrant it."

With this proposal Mr. Osgood complied; but at the year's end it was found that his health had not sufficiently improved to render it prudent for him to resume his labors, and a release from further connection with the society was granted, according to his renewed request, March 9, 1840. The vote of the parish granting a dismissal concludes as follows: "And having enjoyed the benefit of his faithful ministry and witnessed his exemplary deportment for twenty years, do most cordially declare our fullest confidence in his character for purity of heart and rectitude of life."

Shortly after Mr. Osgood removed to North Andover, his native town, and spent the remainder of his life in the quiet pursuits of agriculture on his ancestral farm. But infirmities at length grew upon him and disease so impaired his mental faculties that he became insensible to all about him, even to the presence of friends. He died August 27, 1865, in the seventy-fourth year of his age.

Since the termination of Rev. Mr. Osgood's pastorate, the ministerial and pastoral office in the First Congregational Society has been held successively by the following clergymen, to wit: Rev. David Fosdick, Jr., ordained March 3, 1841,—dismissed December 8, 1845; Rev. T. Prentiss Allen, ordained November 18, 1846,—dismissed September 19, 1853; Rev. William H. Knapp, installed February 14, 1856,—dismissed May 5, 1858; Rev. Edward B. Fairchild, ordained January 19, 1860,—dismissed September 22, 1863; Rev. Alpheus S. Nickerson, installed July 27, 1864,—dismissed February 2, 1869; Rev. Harvey C. Bates, ordained June 30, 1869,—dismissed March 11, 1873; Rev. Henry P. Cutting, installed September 1, 1873,—dismissed April 5, 1881.

Rev. J. H. Whitmore took charge of the parish December 1, 1884, and continued his services to the church and society until July 1, 1886.

On July 1, 1888, Rev. William S. Heywood, by the unanimous desire of the society, assumed charge of the pastoral and ministerial affairs of the parish, and on the 1st of September moved into town with his family, and took possession of the parsonage bequeathed to the society by the late Mrs. Emily Wilder.

The present house of worship was built in 1842, immediately after the destruction, by an incendiary fire, on the night of the 14th of March of the same year, of its predecessor, built in 1799, and dedicated on the first Sunday of January in 1800. The present house is on the same site of the two former ones. In 1886, under the direction of a committee appointed by the society, it was remodeled, improved and beautified, Mrs. C. A. Freeman generously pay-

ing nearly the whole of the expense, amounting to some two thousand dollars, in memorial of her deceased sister, who was a constant and devoted attendant upon the religious services of the church. The church organ was procured in 1853. It was built by Stevens, of Cambridge, and was paid for, partly, by a legacy bequeathed to the society by the late Jacob Conant, Esq., and partly by voluntary subscriptions of the members. Its total cost was $916.38.

A ministerial library was purchased in 1846, for the use of the minister of the First Congregational Society, at a cost of one hundred and fifty or two hundred dollars. This library contains, among other standard works, the American Encyclopædia, and, as far as it goes, is a valuable collection. Owing to the organization of other religious societies, the decease of many of its prominent members and other causes not easily explained, this ancient society has become, like many another, reduced in numbers and power of its influence. It still exists, however, in a tolerably strong and healthy condition, doing its share in sustaining and promoting the intellectual, moral and religious culture of the community. Down to a period as late as 1830 this was the only religious society in the town, and it is a singular fact that nearly every family was regular and more or less constant in their attendance upon church services on Sunday. The long processions of wagons, square-topped chaises, and persons on horseback and on foot at the conclusion of the afternoon service, wending their way homeward on all the roads diverging from the meeting-house, is well remembered by many of the elderly people. It must not be supposed, however, that the people were entirely united in religious sentiment or were satisfied with the state of things in regard to religious worship. There were those who conscientiously held to the doctrine of Universal Salvation, first proclaimed in this country by Rev. John Murray, and which had begun to be preached by many clergymen of ability in New England; and there were those of Baptist proclivities, and those also who entertained more distinctively the sentiments of John Calvin.

At the date mentioned above, or immediately subsequent thereto, the Universalists began to hold occasional meetings in the old town-house.

The preachers on these occasions were the Rev. Hosea Ballou, Rev. Thomas Whittemore, Rev. Thomas Greenwood, Rev. Charles Streeter, Rev. Mr. Harriman (since Governor of New Hampshire) and others. These meetings were quite numerously attended, and such an interest was awakened that a society was soon formed, under the name of the "First Universalist Society in Sterling."

The precise date of the formation of the society, as well as the settlement of its first pastor, the Rev. Rufus S. Pope, is not known, as the early records appear to have been lost. Under the pastoral charge of Rev. Mr. Pope a church was organized, and certain articles of faith, as given below, were formulated and adopted, with the preamble as follows:

Preamble (in part.) As Christians we acknowledge the sacred Scriptures to be the only infallible rule of faith and practice, regarding them as given by inspiration of God, and profitable for doctrine, for reproof, for correction, for instruction in righteousness—and discarding all human authorities and creeds, we select the following, as expressing the general outlines of our belief, and of the Christian religion:

Article first. We believe there is one God and one Mediator between God and man; the man Christ Jesus, who gave himself a ransom for all to be testified in due time.

Article second. We believe that Jesus is the Christ, the Son of God.

Article third. We believe the Father sent the Son to be the Saviour of the world.

Article fourth. We believe that, by the grace of God he tasted death for every man.

Article fifth. We believe that God will render to every man according to his deeds.

Article sixth. We believe that we ought to adorn the doctrine of God our Saviour in all things. For the grace of God, that bringeth salvation to all men, hath appeared. Teaching us that denying ungodliness and worldly lusts, we should live soberly and righteously and godly in this present world.

The church was publicly recognized July 13, 1836, the Rev. Thomas Greenwood, of Marlborough, delivering an appropriate discourse on the occasion.

It is to be regretted that the records of the society were not more carefully preserved. It appears, however, that under the charge of its first pastor, the Rev. Mr. Pope, which continued somewhere from five to eight years, the society increased in numbers, and in its influence for good in the community. Its meetings for religious services were held in the town-hall until 1838. In that year the society built itself a neat and commodious house of worship—the same now owned and occupied by the Orthodox Society. Rev. Mr. Pope removed in 1840 or '41 to Hyannis, on Cape Cod, and became pastor of the Universalist Society in that town, and there spent the remainder of his life.

The successors of Mr. Pope were as follows: Rev. George Proctor, from 1841 to 1847; Rev. Quincy Whitney, from 1847 to 1848; Rev. Samuel A. Davis, from 1848 to 1852.

The society continued to hold services by supplies for a time after Rev. Mr. Davis closed his labors. But owing, in part, to the death of some of the older and wealthy members and the removal from town of others, and, perhaps, not a little to indifference to the cause on the part of some, the society soon began to languish, and finally, in 1853, sold its house of worship to the "First Evangelical Congregational Society," which had been recently organized. Very soon after this the society disbanded and such of the members as chose went back and connected themselves with the Unitarian Society, from which many of them had gone out scarcely a score of years before. But it is just to say that the Universalist Society did some good work during the comparatively short period of its existence.

During the last fifty or sixty years there has been a great change in the religious elements of most churches and in the religious sentiments of a great

majority of the people. Much of the old theology is discarded. Creeds have been shortened and simplified. Men are judged less and less by the articles of their religious faith and more and more by the uniform tenor of their daily life. The Universalist ministers of forty years ago, among whom were many very able and talented men, did their full share in establishing more rational and liberal views.

For several years prior to 1837 there were in town several families of Baptists and others entertaining similar views, who occasionally held meetings at private houses and at the school-house in the Leg District. In the year above mentioned it was found that the number of these persons had so increased that "*it was felt that a church to conduct the affairs and bear the responsibilities of this gospel enterprise was a necessity.*" Accordingly, a church was thereupon organized, and the Rev. Cyrus P. Grovesner was called and became its first pastor. Mr. Moses A. Brown was chosen clerk, and Levi Stuart the first deacon of the church, Preaching services were held in the town-hall. Rev. Mr. Grovesner closed his pastorate at the end of the year and the Rev. George Waters was called to succeed him. Mr. Waters remained with the church three and a half years. The Rev. John Allen followed Rev. Mr. Waters in 1841, and continued his labors until the close of 1843.

Rev. Mr. Allen is remembered as a genial, large-hearted man, and was held in high esteem by his fellow-townsmen. Under his ministry the work of the church was effectively carried on, and the moral enterprises of the town received his constant support. A society was organized embracing a goodly number of the town's most esteemed and influential citizens, and the present house of worship, beautifully located under the shade of the majestic elms on the north end of the Common, was erected. The mode of procedure in the building of the church shows that the members had courage as well as faith. An instrument was drawn up and signed by twelve of the leading members, to wit:

"Know all men by these presents, that we, the subscribers hereby agree to associate together in equal shares, by deducting out so much as may be subscribed by other individuals, for the purpose of building a meeting-house for the First Baptist Society in Sterling.

"And we bind Ourselves, our Heirs, Executors, and Administrators to the performance of the above undertaking."

The object of the above Plan is to relieve and to promote the Interest of the said Society, and so dispose of the Pews as best to subserve their Interest and keep ourselves harmless for building said house of Worship.

Sterling, January 16, 1843.

(Signed) Benjamin Stuart, Jesse Curtis, Alden Bailey, Levi Stuart, Asa Hoppin, Amos Breck, James P. Patten, Elisha Smith, Abel F. Goodnow, John Allen, John B. Pratt, Jonathan Nichols.

The site of the meeting-house was purchased of the late Mr. Helon Brooks for the sum of one thousand dollars.

The whole expense of the building, including site, was $4727.93.

A fine-toned bell has recently been purchased, and other improvements made, which swells the expense to nearly seven thousand dollars, all of which the society has promptly met, in addition to the yearly cost of supporting the ministry nearly all the time since the first organization of the church.

The ministers who have had pastoral charge of the society since the Rev. John Allen are Rev. Orlando Cunningham, six and a half years; Rev. Ira F. Kenney, a little over one year; Rev. William M. Guilford, two and a half years; Rev. John H. Learnard, two years and eight months; Rev. Gilbert Robbins, two years; Rev. William Carpenter, three and a half years; S. H. Record, a Newton theological student, six months; Rev. John H. Learnard, again, two and a half years; Rev. Samuel Cheever, nine months; Rev. G. O. Atkinson, one year; Rev. C. H. Hickock, one year; Rev. S. B. Macomber, one year and four months; Rev. I. C. Carpenter, two years and nine months; Rev. A. H. Estee, nearly two years, residing in Westborough; Rev. D. B. Gun, nearly three years. The church was also supplied a short time by Deacon W. A. Holland and by Mr. W. B. Parshley, a student of Brown University. It has had other supplies from time to time, whose names do not appear on record. The present pastor is Rev. S. H. Whitney, who commenced his services 1888.

The clerk of the society is Mr. Thomas O. Patten, and the clerk of the church is Miss Elizabeth R. Bailey.

In 1851 it was deemed needful that another branch of the Christian Church should be built up in the town. There were several highly respectable families who could not find a congenial religious home with either the Unitarians, Universalists, or the Baptists, and who, by reason thereof, were in the habit of attending church in the neighboring towns of West Boylston, Boylston and Bolton. On the 23d of September, 1851, by request of Mark Bruce, Fordyce Wilder, Luther Stone, Rufus Holman, Jones Wilder, Silas M. Wilder, Charles H. Loring, Charles M. Bailey, Luther Peters and Daniel L. Emerson, a warrant was issued by William D. Peck, Esq., a justice of the peace, within and for the county of Worcester, to Silas M. Wilder, directing him to notify and warn the above described Inhabitants to meet at the Town Hall on the 9th day of October next, to act on the following articles, viz.:

1st. To choose a Clerk, Moderator and such other Officers as may be deemed proper and necessary.

2d. To determine the mode of calling future meetings.

3d. To adopt such By-Laws as may be deemed necessary.

At the meeting held pursuant to the warrant, Jones Wilder was chosen moderator, Silas M. Wilder clerk and Luther Peters, Charles H. Loring and John Smith, Jr., prudential committee.

Charles H. Loring and Dr. E. C. Knight were chosen a committee to draft by-laws. At an adjourned meeting the committee reported and their report was accepted.

BY-LAWS.

Art. 1. This Society shall be called The First Evangelical Congregational Society in Sterling.

Art. 2, declares what officers the society will annually elect.

Art. 3, defines the manner in which new members may be admitted.

Art. 4, fixes the time for the annual meeting.

Art. 5, prescribes the mode of calling future meetings.

Art. 6, establishes the rule in this society that no tax shall be levied "on its members until every reasonable means has been exhausted;" "but all funds shall be raised, and all expenses paid by voluntary subscription."

Art. 7, defines the number necessary to constitute a quorum for the transaction of business.

Art. 8, declares how the By-Laws may be altered or amended.

In 1853 the society purchased the meeting-house, built fifteen years before, and owned by the Universalists. In 1885 the interior of the church was much improved by the repainting of the woodwork in a pleasing color and by new frescoing of the walls. In 1887 the society purchased the house of Silas Stuart for a parsonage. It is a pleasant place just a little retired and admirably adapted to the purpose for which it was purchased. No religious society can feel itself suitably equipped to fulfill its mission until it has secured a permanent and pleasant home for its minister and his family. The society has maintained religious services during the entire period of its existence, paying its settled pastor from six hundred to eight hundred dollars annual salary. It has received aid from the Home Mission Society to the amount of about two hundred dollars annually, but it has paid back by frequent voluntary contributions to various religious enterprises a yearly sum, probably equal to the amount of aid it has received. This financial exhibit is highly creditable to the society and evinces an energy and a spiritual life worthy the cause it seeks to promote. Long may it continue to fulfill its high and sacred mission and do its full share of work in the enlightenment and regeneration of the world!

The church was organized June 22, 1852, with twenty-two members. The first pastor was the Rev. William B. Green. Mr. Green began his ministry April 1, 1852, and closed July 1, 1853.

Rev. Mr. Lothrop followed, but did not remain very long.

Rev. William Miller succeeded Mr. Lothrop in January; was installed May 9, 1855, and was dismissed October, 1858.

Rev. J. C. Labaree next took pastoral charge, October 1, 1861; was ordained February 4, 1863, and remained with the society four years. Rev. Mr. Labaree on leaving Sterling was called to the ministry in Randolph, where he has since remained. He is kindly remembered by the citizens of Sterling, without distinction of sect, who held him in high respect.

Rev. Elbridge Gerry next became acting pastor in 1866, serving two years and four months.

Rev. Evarts Kent came next, after Mr. Gerry, but remained only ten months.

Rev. L. D. Mears began his ministry November 13, 1870, and was dismissed by council September 9, 1873.

The next minister was Rev. George J. Pierce, from January 1, 1874, to January 1, 1875. And then followed Rev L. B. Marsh, from 1875 to 1876.

Rev. B. F. Perkins next assumed pastoral care of the society, April 1, 1877, and closed April 1, 1883. Rev. Mr. Perkins' services were very acceptable, and his pastorate was the longest of any since the formation of the society. Immediately on his separation from the church in Sterling, he was called to the church in Saundersville, where he still continues to dispense the Word. No person is more cordially welcomed by his former townsmen than he, whenever, on given occasions, he returns among them.

Rev. O. G. McIntire and Rev. S. H. Robinson followed Mr. Perkins, one year each. Both were very genial, pleasant gentlemen. The latter is now settled over the Congregational Church in Greenfield, Mass.

The present pastor is Rev. John E. Dodge. Mr. Dodge was installed June 2, 1887. Under his ministry, thus far, the society appears to be invigorated with new life, and we bespeak for Rev. Mr. Dodge a long and useful ministry.

The ecclesiastical record of Sterling would not be complete without the mention of another important branch of the Christian Church. Though there may not be an organized society, a considerable number of the population are of the Roman Catholic faith, and attend church at either Clinton or West Boylston. The number of families is thirty-one. At one time they held church services in the town-hall, and the proposition to build a house of worship was seriously entertained. The plan, however, was abandoned for reasons connected with the churches in the two towns above mentioned.

There are also a number of families of Spiritualists who hold meetings occasionally at private houses. These persons were formerly interested and active members of either one or the other of the three principal churches in the town, but have now, to a considerable extent, withdrawn their aid for their support.

EDUCATION.—Sterling has ever been mindful of her obligations in respect to the education of the young. Her district schools have been her pride and she has ever watched over them with paternal fondness.

The first school-house of which there is any record was built in 1743. This was in the centre, near the meeting-house. Other buildings for the same purpose were soon afterward erected in the remote parts of the town, as the increase of population and the public convenience required. One was located on Rowley Hill, on the site of the present school-house. There was another in the Chocksett District, at the corner of the roads, near Mr. John B. May's.

This location retained the name of the "Old Schoolhouse bank" long after the building was demolished. Another stood near the corner of Mr. Ephraim Chandler's land, opposite the present one in Redstone. This was the scene of the renowned nursery poem:

"Mary had a little lamb,
Its fleece was white as snow," etc.

Miss Rebecca Kimball was the teacher.

Doubtless there were others in other parts of the town. They were rude structures with cavernous fireplaces, but otherwise destitute of the comforts and conveniences of modern school buildings. In 1797 the town was re-districted—each new district containing, as nearly as might be, twenty families, except the Centre, which contained forty families, and has ever since been considered a double district and has drawn a double share of the public money. By a vote passed at the same town-meeting new school-houses were ordered to be built in all the newly-formed districts, involving an expense of some three thousand dollars. The centre school-house was not built until the following year. These new structures, except that in the centre, were all built upon the same general plan and were quite uniform in external appearance. These old red school-houses by the roadside—how vividly and sacredly, almost, are they held in remembrance by many of the older people of the town! But in the general progress of events all these plain, modest temples of learning have been in turn supplanted by others of more modern construction, more tasteful and elegant in appearance and more luxuriously furnished with conveniences and comforts for both teacher and pupil.

The appropriations of money for the support of schools has always been generous in comparison with the town's valuation of taxable property.

In 1800 the appropriation for "schooling" was five hundred dollars. From 1816 to 1835 it was eight hundred dollars. Since 1835 the yearly allowance has been on the increase, until it has reached, in this year of grace, 1888, the sum of four thousand dollars. In the intervening period since 1835 school libraries, books of reference, outline maps, eight-inch mounted globes, large surfaces of black-board and other needful supplies have been liberally and promptly furnished to facilitate the process of instruction.

Parents still continue to manifest interest in the progress of their children by occasional visits to the schools and by lending their influence in other practicable ways. But it is to be feared, however, that personal interest in the schools on the part of the community generally has abated to a considerable extent from what it was sixty or seventy years ago—or even fifty years ago—on account of the fact that the State has gradually assumed entire control and management of the public schools, to the exclusion of those most intimately concerned, from any voice, part or lot in the matter except to pay the annual tax assessed upon them. And, at least, whatever advance has been made in popular education in the last half-century, it cannot be denied that the old district system had many a redeeming feature. As the population of the town was larger than at present, so the attendance upon the school was also much greater.

It was the writer's experience to attend school in the Chocksett District when eighty scholars were daily convened within the walls of the old school building, whose outward dimensions were twenty-two by twenty-two feet. The terms of school were short, never exceeding ten weeks in winter and eight or nine in summer. The "examination" at the close of the term was an event of much importance to all the people of the district and was usually attended by them in numbers oftentimes fully equal to the capacity of the school-room. The teachers were faithful to the trusts committed to them, and a generation of men and women, fairly equipped, mentally and morally, for the duties and responsibilities of citizenship was the result of their labors. The annual "School Meeting," clothed with the authority, through its "Prudential Committee," of selecting and hiring the teacher, and of deciding on all other matters relating to the school, excepting the raising and appropriation of money, was a powerful means of awakening and keeping alive an intense interest in the school and a strong desire for its welfare. In about the year 1822 there was organized an association by the name of the "Sterling Mutual Improvement Society"—changed a few years afterward to "The Sterling Lyceum"—whose declared purpose was to aid the teachers and improve the district schools.

This society had an active existence of about forty years. It was a powerful auxiliary in the educational work of the town. It convened the teachers at stated times for the discussion of vital questions relating to their daily duties in the school-room; it called out, from time to time, during the winter terms, the higher classes in all the schools for public competitive exercises in reading, geography, grammar and arithmetic; it also had lectures from "home talent" and from distinguished speakers from the cities and various other places.

It was truly a popular institution, and its regular meetings drew together in the town hall crowded audiences of old people and young, and was a potent instrumentality for promoting the social, intellectual and moral well-being of the entire community.

Few towns of the same extent and rank have produced a greater number of native teachers than Sterling. A list, as far as can be remembered, is subjoined at the end of this sketch.

Since the organization of the Board of Education in 1837, and through the influence of Normal Schools, Teachers' Institutes and educational literature, improved methods of teaching and discipline have been adopted. Blackboard instruction in all branches is resorted to, oral teaching is more frequently practiced, and the old A B C method of teaching young children to read is fast passing away. And in modes of discipline the change is not less apparent. The ferule, "that scepter of despotic power," is practically banished from our school-rooms, and other ridiculous forms of physical torture, such as supporting a heavy

book with the arm extended in a right line from the body, of bending the body forward and holding down a nail, or of being hit on the head by a heavy ruler, thrown by the master as punishment for minor offences, is not tolerated by public sentiment and is now never practiced. The regular terms of school were oftentimes prolonged from one to four weeks by private subscription; and not unfrequently a private school was supported in the autumn by those who felt the need of larger opportunities for the education of their children, and who regarded it more economical to maintain a school of higher grade in town than to be at the expense of board and transportation to an academy at a distance from home. Notwithstanding, scarcely a year passed in which numbers of our young people of both sexes did not avail themselves of the privileges afforded at the high schools and academies of Lancaster, Worcester, Leicester, New Ipswich and other places to prepare themselves for teachers, or for entrance into some college or technical institution. This state of things, which, indeed, had been of long continuance, led to the feeling on the part of many that the establishment of a high school was a public necessity.

At the town-meeting in the month of April, 1883, the subject was brought before the town. A discussion followed. Rev. Mr. Perkins made a strong and convincing argument in its favor. The Irish adopted citizens generally were found to be favorable to the measure. By a yea and nay vote the question was decided affirmatively by a fair majority. In September following the school went in operation with Mr. Herbert B. Hayden, of Ashland, as its first principal. Mr. Hayden was a graduate of the Ashland Hight School and had spent one year at Wesleyan University, Middletown, Conn. Mr. Hayden had a good measure of success and gave general satisfaction. He remained with the school five years. He left town at the close of the spring term, 1888. Mr. Henry A. MacGowan, of Clinton, was appointed to the principalship of the school at the commencement of the fall term of the present year. Mr. MacGowan is a graduate of Amherst College, of the class of 1886. He entered the Divinity School at Andover, but his studies in preparation for the ministry were interrupted by ill health, and he was obliged to suspend his professional studies. Having regained his strength in a measure by rest, he was induced to accept the position offered him by the School Committee and entered at once upon its duties. Under his judicious and able management, as a thorough scholar himself, the school gives promise of an advanced position, and worthy to take an equal rank among the high schools of the State.

Since the establishment of the High School, and principally through its instrumentality, a course of lectures has been maintained during the winter. These lectures are numerously attended by our people and afford, not only pleasant entertainment, but valuable instruction. These literary entertainments are much enjoyed, and are looked forward to with interest and pleasant anticipation.

A fine High School building was erected in 1883 on a beautiful site, between the Emily Wilder parsonage and the old Dr. Kendall place. It was formerly owned by the late Jacob Conant, Esq., and was purchased by the town of a subsequent owner of the property. The edifice is two-storied, with a large play-room in the basement. It is a neat building, pleasantly located, and presents an attractive appearance.

In respect to the number of graduates from various colleges, Mr. Goodwin (to whom the writer of this sketch is indebted for most of his acquaintance with the early history of this town) says: "The number educated at the public colleges from this place is not great, but our scholars will not suffer by a comparison with those of many towns who present a larger catalogue." He then gives a list of nineteen graduates, with the dates of graduation, as follows:

1. John Mellen (Harvard University, 1770), for many years minister at Barnstable.
2. Joseph Kilburn (Harvard University, 1777), minister at Wendell, Mass.
3. Isaac Bailey (Harvard University, 1781), minister at Ward, Mass.
4. Prentiss Mellen, LL.D. (Harvard University, 1784), chief justice of the Supreme Court of Maine.
5. Henry Mellen (Harvard University, 1784), attorney-at-law at Dover, N. H.
6. Thomas Moore (Dartmouth College, 1787), settled in the ministry in Pennsylvania.
7. Pierson Thurston (Dartmouth College, 1787), minister at Somersworth, N. H.
8. James Kendall, D.D. (Harvard University, 1796), minister of the ancient church at Plymouth, Mass.
9. Bartholomew Brown (Harvard University, 1799), for some years counselor-at-law at Sterling, afterward at Bridgewater, Mass.
10. Hosea Hildreth (Harvard University, 1805), minister at Gloucester, Mass.
11. Amos W. Rugg (Harvard University, 1805), died soon after leaving college, greatly lamented.
12. Martin Moore (Brown University, 1811), minister at Natick, Mass.
13. Mark Moore (Brown University, 1814), counselor-at-law in Connecticut.
14. Nahum H. Groce (Harvard University, 1808), preceptor of an academy.
15. Pierson T. Kendall (Harvard University, 1812), for many years practicing physician at Sterling.
16. Ezekiel Hildreth (Harvard University, 1814), instructor of youth in the Southern States.
17. Abel T. Hildreth (Harvard University, 1818), instructor of youth in the Southern States.
18. Oliver H. Blood (Harvard University, 1821), practicing physician at Worcestor, Mass.
19. Moses G. Thomas (Brown University, 1825), many years minister at Concord, N. H.
20. George Putnam, D.D. (Harvard University, 1827), minister at Roxbury until his death, in 1872.
21. Edwin Conant (Harvard University, 1828), counselor-at-law at Sterling, removed to Worcester.
22. Josiah K. Waite (Harvard University, 1829), settled in the ministry first at Fitzwilliam, N. H.
23. Augustus K. Rugg (Union College, N. Y., 1836), counselor at Albany, Ga., where he died in 1843, much lamented.
24. Silas Bailey (Brown University, 1838), distinguished educator, died in Paris, France, 1874.
25. Mark Bailey (Brown University, 1842), professor in Oregon State University.
26. Ambrose P. S. Stuart (Brown University, 1847), after spending three years in the German Universities of Gottingen and Heidelberg, he

accepted professorships in various colleges, and is now engaged in financial affairs in Lincoln, Neb.

27. Addison Stuart entered Brown University and went through the regular collegiate course, all but the last year, when he commenced the study of law. Has a law-office at Cedar Rapids, Iowa.

28. William Richardson, Ph.D. (Dartmouth College, 1864), engaged in educational work in Ohio.

29. Frank W. Wilder (Tufts College, 1880), counsellor-at-law and real estate agent, Dakota Ty.

30. Edmund W. Powers (Tufts College, 1881), counselor-at-law, Boston, Mass.

31. Arthur P. Rugg (Amherst College, 1883), counselor-at-law, Worcester, Mass.

32. Fred. H. Wilder (Tufts College, 1886), counselor-at-law and real estate agent, Dakota Ty.

A goodly number of the sons and daughters of Sterling who had charge of our schools, as teachers, were graduates of the State Normal Schools. They are as follows:

Edwin May, graduated at Bridgewater.
Hannah Ross, graduated at Bridgewater.
Edward A. Lynds, graduated at Bridgewater.
Mary Rugg, graduated at Bridgewater.
Sarah H. Rugg, graduated at Bridgewater.
Luther Rugg, graduated at Bridgewater.
Mary S. Osgood, graduated at Bridgewater.
Carrie Rugg, graduated at Salem.
Delia S. Nourse, graduated at Salem.
Abbie Hastings, graduated at Bridgewater.
William Hastings, graduated at Bridgewater.
Fannie M. Houghton, graduated at Westfield.
Kittie Wilder, graduated at Worcester.
Mary Boland, graduated at Framingham.
R. L. Chandler, Worcester.
Florence Houghton, now a student at Framingham.

The following are graduates from the Technical Institute at Worcester:

Oliver W. Rugg, now practicing civil engineering at Worcester
Arthur Woods, now practicing civil engineering at Worcester.
William A. Nelson, mechanical engineer at Fitchburg.
J. Edward Synds, engaged in the lumber business near Duluth, Minn.

LIBRARIES.—The first public library was established in the latter part of the last century, known as the "First Social Library in Sterling." It was organized by voluntary subscription, and regulated by suitable by-laws, with proper officers for its management. The only record the writer has been able to find was that of the annual meeting of the proprietors in 1803, held for the choice of officers and the transaction of such other business as might properly come before it.

It was a valuable collection of several hundred volumes of standard works of history, biography, travels, fiction and other important subjects.

It was replenished from time to time by a small annual tax upon the members of the association. It did valuable service for many years, and its benefits were shared by a large number of the people of the town. But, like all sublunary things, it had its day of progress and decline, and in 1852 came to a final termination by a public sale of the books at auction.

In 1848 a small library of choice books was purchased by the town for each school district.

In 1857 a Farmer's Library was established, containing some one hundred and fifty or two hundred volumes by the ablest writers upon agriculture. These books were subsequently turned over to and became a part of the Town Library.

But the highest and grandest point in the work of founding a library was reached when the town, at its annual meeting in March, 1871, appropriated three hundred dollars for the purchase of books for the establishment of a Free Public Library. Liberal appropriations have been made each year since for the purchase of new books and for meeting incidental expenses. Generous donations for the support of the library have been made by the following persons, most of whom were former residents of the town: Mr. A. K. Loring, of Boston, contributed a valuable package of books. The late James T. Allen, of New York, gave his check for three hundred dollars. William Frederick Holcombe, M.D., of New York, generously gave one hundred dollars. Rev. Geo. Putnam, D.D., of Roxbury, Mass., in token of his friendly regard for his birthplace, also gave one hundred dollars; and his daughter, the late Miss Carrie Putnam, bequeathed the sum of two thousand dollars, the interest of which to be used in the purchase of books. Edwin Conant, Esq., of Worcester, gave five hundred dollars, to be called the "Elizabeth Anne Conant Fund," the interest to be used in the purchase of books. From all these sources of income the library at present contains more than six thousand volumes.

For the beautiful library building that now adorns the village, the town is indebted to the munificence of Edwin Conant, Esq., of Worcester, who furnished the means whereby it was erected. It was built in 1885, as a memorial tribute to his late lamented daughter, Miss Elizabeth Anne Conant.

Mr. Conant also furnished the very neat and substantial chairs and tables which the library hall and reading-room contain.

The librarian's desk was presented by the Richardson heirs, as a tribute to the memory of their father, —the late Deacon William B. Richardson. It is constructed of cherry, very neatly finished and is perfectly in keeping with the pleasant surroundings, and bears the following inscription:

In memory of
DEA. WILLIAM B. RICHARDSON,
By his Heirs,
1886.

The library building was formally dedicated October 13, 1885. The public exercises were held in the Congregational Church, a large congregation being present, including many from the neighboring towns, and were as follows:

1. Voluntary on the Organ.....Miss Annie M. Wilder, Organist.
2. Anthem.....By the Choir.
3. Dedicatory Prayer.....By Rev. J. H. Whitmore.
4. Anthem.....By the Choir.
5. Memorial Address.....By Rev. E. H. Hall, of Cambridge.
6. Hymn 840.....Hymn and Tune-Book, read by Rev. Mr. Whitmore.
7. Benediction .....By Rev. S. H. Robinson.

MILITARY.—The military record of Sterling has been an honorable one. In 1755, when the French and Indian War broke out, Sterling furnished her quota of men and supplies—precisely how many men is not known—but the names of more than twenty of her young men have been preserved whose lives were sacrificed in that war, in one or another of its campaigns. So also when the War of Independence came, the call for men was duly responded to. The name of Colonel Asa Whitcomb is rendered famous by his military service and ardent patriotism. Another honored soldier who gave eight years' service was Lieutenant Joel Pratt. Reuben Blood, Sr., and Nathaniel Houghton were veteran soldiers of the Revolution. There were others also, but history has failed to record their names, and tradition has but imperfectly transmitted an account of their service. The several wars in which the country was involved, and in which many of our citizens participated, served to keep alive the military spirit and encourage military organizations and exercises in times of peace. If now they were of no great practical benefit, they at least served a holiday purpose. Company trainings and regimental musters were great social events, and drew together multitudes of people. In the early part of the present century two military organizations existed in the town, known as the North and South Companies. The distinction was made by the road running easterly from Princeton to Lancaster, bisecting the territory of the town into two not very unequal parts; those whose residence was on the south side falling into the South Company and those on the north side into the North Company.

In 1822 a volunteer company was formed out of the two already existing, called "The Sterling Light Infantry." In its elegant uniforms of dark blue cloth, with gilt trimmings and tall black plumes tipped with red, it presented an appearance of which the great Napoleon himself would have been proud. The officers in command were: Phineas B. Dana, captain; Josiah Pope, lieutenant; Mark Kendall, ensign. Ensign Kendall died the following year, and was buried with martial honors.

Such was the popularity of military exhibitions at this time, that four years later, in 1826, another finely-uniformed and finely-equipped volunteer company was raised, called "The Sterling Guards." The uniforms of this company were blue coats with silver trimmings, white pantaloons, and tall white plumes tipped with black. The officers first chosen to command were: Captain, Cheney Kilburn; Lieutenant, the venerable Eli Kilburn, now in his ninety-third year; Ensign, Silas Buss. For a period of more than a quarter of a century these companies were the pride of the town, but with the general decline of the military spirit, and the increasing sentiment among the people that war was unchristian and unnecessary, they at length went down and were disbanded. From that time there was but slight manifestation of military fervor until the tocsin of war rang out over the country at the bombardment of Fort Sumter on the 12th of April, 1861. Sterling now shared the indignation felt by the whole body of the people of the Northern States at this audacious insult to the flag of our country. The patriotism of her citizens was aroused. Public meetings were held to encourage enlistments and to adopt measures necessary to assist as far as possible in crushing the Rebellion, formidable as it was, and in maintaining the government. Money was generously appropriated to meet necessary expenses in furtherance of the object. Young men came forward with alacrity and voluntarily offered themselves to the service of their country. But little difficulty, comparatively, was experienced by the authorities of the town in filling the quotas of men required by the government during the four years of terrible warfare. Company K of the Fifty-third Regiment was mainly recruited from Sterling and Princeton. The commissioned officers were: James A. Pratt, of Sterling, captain—promoted to major; Samuel B. Beaman, of Princeton, first lieutenant—promoted to captain; P. T. K. Burpee, of Sterling, second lieutenant—promoted to first lieutenant; Edward W. Toombs, of Sterling, second lieutenant. This regiment did service in Louisiana under General Banks. The whole number of soldiers engaged in suppressing the Rebellion, residents of Sterling or of Sterling birth, was, as near as can be ascertained, one hundred and sixty-two. The number whose lives were sacrificed in the war was twenty-one. The names of these heroic sons of Sterling are engraven upon the "Soldiers' Monument," where they may ever be read and known of all men "until brass and marble shall have crumbled into dust."

The ladies of Sterling were not idle, disinterested observers of the great civil conflict. The "Ladies' Relief Society" was an important factor in prosecuting the war. By its unceasing labor in preparing hospital stores and other articles of comfort it did much to alleviate the hardships and sufferings of our soldier boys both in camp, on the march and in the hospital.

The following condensed statement of the part Sterling bore in the struggle for national life is taken from the *Sterling Advertiser*, published by Post 59, G. A. R., Sterling, January, 1874:[1]

But what is old Sterling's individual record in this dread crisis? Listen to a condensed report thereof.

On Monday, April 22, 1861, one week after evacuation of Fort Sumter, her citizens held in the town hall their first general indignation meeting, though many a small one had been previously held in almost every house, store, workshop and field. On Tuesday, April 23d, the ladies from all parts of the town assembled to consult together and enter upon whatever duties might await them. Six ladies (two of whom, Miss Josephine Bartlett and Miss Esther K. Waite, have since passed over the dark river) gave their names as ready for hospital service, if required. A Relief Society was organized, which continued its meetings and labors for more than four years.

On Monday, April 29th, at their first legal town-meeting, the citizens

[1] Contributed by Miss H. M. Buss.

voted to appropriate a sum not exceeding three thousand dollars to equip and uniform such fellow-townsmen as might volunteer to serve in the military service of the United States and to assist their families during their absence. November 5, 1861, one hundred dollars was appropriated to aid the ladies in procuring articles for use in the army hospitals, the same to be paid by the selectmen to the Relief Society. As the months of 1861 glided by, many a man who had his birth in Sterling or whose boyhood was passed among the hills and valleys, became numbered in his country's army for three years or during the war, having enlisted wherever he might be, whether far removed or but slightly distant from the heart of the old Bay State. Most of these have left an interesting record, several met death on the battle-field, others were wounded, some maimed for life and yet others died from sickness and exposure.

July 21, 1862, the town authorized the Selectmen to pay a bounty of one hundred dollars to each citizen of Sterling who should enlist in the company then forming in the town for nine months' service.

July 4, 1865, the town voted to raise a sum equal to one hundred dollars per man of the quotas of this town, under the President's orders of October 7, 1863, and February 1, 1864. April 15th the town voted to raise seventeen hundred and fifty dollars to procure fourteen men to fill her quota under the President's late call.

Sterling continued to raise money, recruit volunteers and pay bounties till the end of the war. Her official record is that she furnished (including substitutes) one hundred and seventy-eight men for the war, eight of whom were commissioned officers—this being a surplus of thirteen over and above demands; and she appropriated and expended $20,472.69, this sum being 2 1-11 per cent on the valuation of the town, and about $10.67⅓ to each inhabitant in 1860. Her number of men were in proportion of one for every 10 4-5 of her population at that time.

From various sources of information we learn that the number of Sterling boys who had active part in the contest was at least one hundred and sixty two. Fifty-four of these belonged to Company K, Fifty-third Regiment Massachusetts Volunteers. To more than thirty of this entire number their enlistment and service meant death; some fell in the strife, some died in hospitals from wounds and sickness and others came home bearing in their systems the seeds of fatal diseases sown therein by hardships and exposures. One more point of review. Summing up the work of our Relief Society, we have a record of thirty-seven barrels, valued at sixty dollars each, and five boxes containing smaller quantities sent forth on their comforting missions; these were filled with such various articles as our hospitals required—ours were not less than forty-eight in kind—and they were the free will offerings of women anxious to bear their part of the heavy burdens imposed by the struggle for national life.

The Soldiers' Monument, commemorating the honored dead, was erected in 1866.

It was dedicated by appropriate ceremonies on the 17th of June. The services, on account of the rain, were held in the church near by, and were as follows: Organ voluntary and singing by the choir; prayer was offered by Rev. A. S. Nickerson; an eloquent and highly appropriate address was delivered by Rev. George Putnam, D.D., of Roxbury; a poem by Miss Esther K. Waite, and the following by Mrs. Mary S. Rugg, were each read on the occasion.

The assemblage of people was very large, filling the church to its utmost capacity.

IN MEMORIAM.

While the summer breeze is sighing
Through the groves in beauty lying,
And swift-winged birds dart through the trees,
Pouring forth their sweet melodies,
We have gathered, friends and neighbors,
We have left our cares and labors,
And, looking back o'er by-gone years,
Would pay our tribute mid our tears.

But what tribute shall we pay?
For when to speak our tongues essay,
The grand story of devotion
Fills our souls with strong emotion.
We heard the cry ring o'er our land,—
"Freedom must live! Lend every hand!"
And with rapt gaze we then did see
Self-sacrifice to our country.

In the work-shop, upon the farm,
Was heard the cry and the alarm;
And our young men rose in their might
And rushed unwavering to the fight.
They thought of Anderson's starving band,
With those supplies so near at hand;
And then the story of that ship
Sprang forth like fire, from lip to lip.

They needed not a second call—
They thought of Sumter's battered wall,—
How the loved ensign of the free
Was trailed in dust by treachery;
And this spirit, breathing higher,
Never once lost its patriot fire
Till our grand army, full, replete,
Bade treason lie down at its feet.

Thus they left us—left here and there—
Left in our homes a vacant chair;
And our hearts were so full of pain
We felt we should see them ne'er again.
Yet even then, when we could but cry,
We knew it was duty thus to fly;
And we raised to God the earnest prayer,
O, watch them, guard them, ever there.

And some came not; the tidings flew
From camp and field, the whole war through,—
Over our hills and valleys wide—
That some loved soldier there had died.
And we wept at others' sorrow,
Wept, and dreaded each to-morrow,
Lest its coming to us might bring
As deep and dark a sorrowing.

How well they fought, how nobly fell,
The records of the war shall tell;
One strain of truth is breathed about,
In duty's path their lamps went out.

Yet one[1] there was—we knew him well,—
No words there need from me to tell
How virtue and truth with courage vied,
And by his blood were sanctified.
Ah! three swift years to-day have fled,
Since he was counted with the dead.
The battle raged with terrific power,
Gloom hung o'er that awful hour;
Then to those men the dread word flew,
"The works must be stormed at once by you."

O, then was need of courage rare!
Forgetting every wound and scar,
His face all glowing with a light
Reflected from the dreadful sight,
He raised aloft his flashing blade,
"Come on, my boys, come on," he said—
God drew aside the sacred shield
That saved his life on many a field—
And, rushing up that parapet,
The sun of his life grandly set.

[1] Captain Charles Goss, son of William Goss, member of 21st Mass. Regiment, killed near Petersburg, Va., June 17, 1864. The adjutant-general's report says: "Brave officers went ahead, among whom was Captain Charles Goss, who, in that terrible moment of trial, brought out all the resources of his soul, proved and tempered in more than twenty battles of this war." "A noble courage filled him." "He seemed to forget the times when he had been wounded 'nigh unto death,' and when the line was well formed and advancing nobly, he fell never to rise again till a louder trumpet summon him than was sounded for that advance."

A moment more—can I forbear
To lay one flower on another's bier?—
One [1] whose life, for his comrade given,
Has a record, we know, in heaven.

A soldier's life was ebbing fast,
He felt each moment might be his last;
"Help!" he cried, "is there none to yield
One kind hand on this bloody field?"
Our brother heard that fainting cry;
The voice of pity sounded high.
Though lead around him fell like rain,
He would be true to manhood then;
He reached at length that soldier's side,
And brought him forth, then calm'y died;
The cannon's roar, the shell's shrill scream,
Was that brave brother's requiem.

We know the valiant Western man,[2]
Who fiercely fought in the battle's van;
South Mountain's war-worn, crimson side
Drank the blood when this soldier died.
He was rocked here by his mother,
And we knew him as our brother;
His tireless spirit, spurning rest,
Turned to the vigorous, thriving West;
He learned to love his country free
On prairies boundless as the sea;
And, drinking deep of inspiration,
He gave his life to save the nation.

And could I here in this poor rhyme
Recount the many deeds sublime,
Justice and honor still would say,
But mean and meagre is the lay.
Ah! fond memories, fraught with pain,
Come thronging o'er me once again,
And the red path that war has trod,
Like Jacob's ladder, reaches God.
Angels bright are now descending,
This, their song, in music blending,—

"Greater love can there never be
Than dying for humanity."
Do we weep that they are dead,
When g'ory circles o'er each head?
Death! death! What is it we call death?
It is but yielding up our breath;
Earth, reaching forth to take her own,
The life immortal just begun.

Where are these, our warrior brothers?
Ah! they sit here with the others;
Only could the veil be drawn,
We should see them every one.
We should see them in their places,
We should know their radiant faces,
All gleaming with celestial truth,
And their forms of immortal youth.

In their deep and heavenly eyes
Mingled wonder and gladness lies;
They see the wrong by which they died,
And now our country purified;
And as the freedman walks right on
Into his future, shot with sun,
Clasp we this truth close to our heart:
In freedom's war each bore his part.

As the lily, of purest white,
Spreads fair petals to the light,
Springing from the darkest water,—
Beauteous summer's fairest daughter,—

So aspiration, sad and lone,
Hoping, praying, all unknown,
In these lives so free laid down,
Passed triumphant to her crown.

While the silent earth is keeping
All that's mortal of the sleeping,
Resting still in her close embrace,
Here and there, in many a place,
We have thought to raise some token
To these lives abruptly broken,
That shall speak till stone shall crumble,
Of those lives so grandly humble.
Enduring granite we have brought,
Hewn and fashioned as we ought;
And, rising now mid summer's beauty,
Our monument to love and duty.

Rest, then, embalmed and sainted dead!
Where valor lifts her radiant head,
And reaching to God's white throne,
Clasps hands with faith, and they are one.
Hark! triumphant bells are ringing!
Celestial choirs, too, are singing,
While these blest words our spirits greet,—
"Behold the sacrifice complete."

[1] Lyman Broad, son of Erastus Broad, member of 57th Mass. Regiment, killed while bringing off on his shoulder a wounded, bleeding comrade, whose life he saved while he lost his own.

[2] George H. Richardson, son of Deacon Wm. B. Richardson, member of 19th Indiana Regiment, enlisted August 30, 1862, and fell at the battle of South Mountain September 14, 1862.

The Major James A. Pratt Post, of the Grand Army of the Republic, was organized July 6, 1868, with ten charter members. The whole number of members belonging to the post since its organization is sixty-seven. The present number of members is forty-two. The post has received into its treasury, from various sources, the sum of thirty-eight hundred dollars, and has expended the sum of thirty-three hundred dollars, twenty-five per cent. of which has been for charitable purposes.

A very convenient Grand Army Hall has been fitted up in the old brick school-house, the free use of which is granted to the post by the town.

INDUSTRIES.—Sterling is almost exclusively a farming town. Owing to the absence of an abundant water-power, the town has never been favored to any great extent with those mechanical and manufacturing industries which have given such vigorous growth to adjoining towns. The only considerable manufacturing concern at the present time is the Wachusett Pottery and Sterling Emery Wheel Co. at West Sterling. The company has here quite an extensive plant, using for power either steam or water. The business was established and formerly carried on by M. L. Snow, now of San Bernardino, Cal. The company has an invested capital of forty thousand dollars. In the pottery department the manufacture is chiefly confined to plain and fancy flower-pots. The annual sales in this line are about twelve thousand dollars. The goods are sold mostly in the New England States. The emery wheel department is much the larger—the annual sales amounting to about forty-eight thousand dollars. The goods are largely shipped direct to New York, where the company has a wholesale and a retail establishment. Twenty-two men are employed in the business.

The chair business is carried on to a very limited extent as compared with former years. Mr. Edward Burpee, who has carried on the business for fifty years,

is still the principal manufacturer. He employs now only three or four hands. Mr. Elisha Stuart also and Mr. Edwin Stevenson are in the business, but the amount of their production is not, at the present time, very extensive. Aside from these the pursuit of the people is agriculture alone.

Formerly, before the use of machinery propelled by water or steam-power, when all kinds of manufactured articles were produced by hand-labor, the state of things was altogether different. It may surprise some persons to be told that, three-quarters of a century ago, Sterling was a leading manufacturing town in the county. Yet such was the fact. The principal article of manufacture then, as now, was chairs; but the amount of production was more than ten times greater. Over a large section of the town a chair-shop was connected with many a farm. There was a turning-lathe on almost every brook, and the forests abounded with pine, birch and maple—the material chiefly used—which, in being converted into chairs, gave profitable employment to the young men, built up the population, and gave life, energy and thrift to the inhabitants. Among the leading chair-makers, who made a success of the business and accumulated respectable fortunes, were such men as Gilson Brown, Joel Pratt, Benjamin Stuart, Nehemiah Pierson, Samuel Houghton and Eli Kilburn; and, of a later generation, we may add James W. Fitch and Edward Burpee. At the period of which we write there were various other trades besides, in which portions of the people were employed. The coopering business was an item of some importance. The two principal men engaged in it were Mr. Silas Wilder and Captain John Davis. There was a large demand for cider barrels, and the trade was remunerative. Plows and hay-forks were manufactured in the north part of the town by Mr. Silas W. Arnold. These articles of Mr. Arnold's make were decided improvements upon those previously in use. They were of better finish, more evenly balanced, and could be more effectively handled by the farmer. But, in the rapid march of improvement, they have long since given place to others of more artistic construction. A large number of shoemakers found constant employment in supplying the demand for boots and shoes. Shoe stores were unknown outside the populous city, and the supply of these needful articles for all classes was furnished, by special order, at the shoe-shop. But the manufacture often exceeded the demand for home consumption, and the surplus found sale in Boston.

The manufacture of hats by Blood & Rice was quite extensive for a period of twenty-five or thirty years, and gave employment to forty or more persons, including some females. The amount of annual sales was said to be about forty-five thousand dollars. About seventeen thousand fur and felt hats was the annual production, the larger part of which was sold in Southern markets.

Scythe snaths of excellent quality were made in the south part of the town by Silas Lamson & Sons. Lamson's snaths were very popular, and much in demand by farmers. The annual sales amounted to ten thousand dollars. Owing to the scarcity of ash timber Mr. Lamson removed to the western part of the State in 1833, where he increased the business to something like two hundred thousand dollars per year. With the advent of mowing-machines the sales were very much diminished.

All articles of clothing were the result of domestic manufacture. The raw material, such as flax, cotton and wool, was spun and woven into cloth, the cloth dyed and made into garments for each member of a household by the females of the family.

But with the introduction of labor-saving machinery came a change in the employments of our people. Owing to a want of sufficient water-power all these mechanical industries had to be abandoned here, and were transferred to those towns having greater natural facilities for their prosecution on a grander and broader scale.

Hence farming became, many years ago, the chief pursuit of the people. But agriculture, like every other human industry, is subject to change and improvement, and surely no occupation requires greater practical and scientific knowledge for its successful execution.

For a hundred years following the first settlement of the town but little was accomplished in the way of farming beyond the clearing of the land, the enlargement of the area of cultivation, and the production of an abundant supply of everything necessary to a comfortable existence. Good living and contentedness was the characteristic of our ancestors. In their homespun they were independent, peaceful and happy.

About the year 1820 an important change is to be noted in the farming industry of the town. Previously there was comparatively but little money in circulation. There were neither banks nor markets at which the farmer could sell his surplus products. A Mr. Weatherly, of Marlborough, who had started the enterprise of running a weekly two-horse market-wagon to Boston from his own vicinity, now extended his business to the easterly part of this town, inducing some of the leading farmers to turn their attention to the making of butter, putting it up neatly in one-pound lumps, in boxes holding from twelve to thirty pounds each. He was soon followed by Mr. Wilkins, also from Marlborough, and by Mr. Randal of Princeton. The advent of these marketmen wrought a remarkable change in the farming interest in the town. Dairying, or butter-making, soon became the leading business; but not butter alone, but veal, pork, poultry, fruit, vegetables, and whatever else of a like nature the farm produced, found, through these marketmen, a ready sale in Boston, and brought a sure and quick return in cash the following week. This change led to important improvements in farm man-

agement, and also to a neater and more comely appearance of the general surroundings. The hay crop now became the chief object in the cultivation of the land, and was considered the most valuable production of the farm. Whether wisely or unwisely, sheep husbandry fell into discredit, and was soon entirely abandoned.

During this period, which continued nearly forty years, the productiveness of the farms was greatly increased, money became more plenty, many farmers freed themselves from debt and secured positions of financial ease and independence.

This season of prosperity was followed by another change in the farming interest of the town. Since 1850 Sterling has enjoyed the advantage of three different lines of railroad—the Worcester and Nashua (now leased to the Boston and Maine R.R. Co.), the Worcester and Fitchburg, and the Boston, Clinton and Fitchburg. The two last are combined under the name of the Old Colony Northern Division. These lines of railroad afford direct communication with Boston, Worcester and Fitchburg three times daily. With the incoming of these swift messengers between town and city, the traditional stage-coach and the tardy market-wagon became obsolete and useless. All transportation was now by railroads, and this circumstance rendered possible the selling of milk in the Boston market, which privilege the farmers gradually availed themselves of, until now that article is the principal farm-product sold in the market. The daily average number of cans sold is estimated at one thousand. The average price per can at the railroad station is twenty-six cents the present year. The annual income to the citizens on this basis of calculation would amount to nearly or quite one hundred thousand dollars.

Fruit-raising is an important branch of farm industry. For the last thirty years the farmers of Sterling have given increased attention to this subject, until the production has assumed giant proportions. There are many orchards which, in favorable years, like the present, produce from one hundred to one thousand barrels of the choicest varieties of apples. Prominent among these is the Baldwin. But the R. I. Greening, the Roxbury Russet, the Northern Spy, the Palmer and the Gravenstein are profusely cultivated as especial favorites. Pears are raised in variety, but not to a great extent as a market crop.

THE FARMERS' CLUB.—The Sterling Farmers' Club had its birth on the evening of the 12th of November, 1857. It had a noble parentage; but most of the original members have passed on to their reward. We recall their venerable, manly forms, the genial expression of their countenances and the words of wisdom and experience which fell from their lips.

Pursuant to public notice, a meeting of the citizens was held, and after being duly organized, a committee appointed for the purpose presented a constitution, which was unanimously adopted. The first article declares that the association shall be called the Sterling Farmers' Club. The second defines the object in the these words: "Its object shall be to promote the interests of agriculture and the welfare of the farmer and disseminate such knowledge, practical and scientific, as shall conduce to that end."

Another article prescribes the order of business at each meeting as follows: "There shall be a meeting of the club once a fortnight, and at such meeting a discussion upon a topic previously announced, which shall be commenced by four members designated at a previous meeting by the presiding officer, and such other exercises as the club shall deem proper." Fifty-one gentlemen signed the constitution and at once became members. For more than twenty years the meetings of the club were well attended, its discussions carried on with earnestness, often with enthusiasm, and much practical information diffused among its members.

The work of the club has been educational in an eminent degree. By the discussion of the multitudinous questions of farm interest it has awakened thought, led to inquiry, investigation, experiment and practical knowledge. It has encouraged enterprise and promoted improvement in methods of farm work. In a social way, also, it has had a beneficent influence. With the exception of two years during the late war it has held its annual cattle-shows and exhibitions. Among those who have given addresses on these occasions are the Hon. Charles L. Flint, of Boston; the late Hon. John A. Goodwin, of Lowell; the late Rev. George Putnam, D.D., of Roxbury and the present Secretary of War, the Hon. William C. Endicott, of Salem.

Another instrumentality designed to promote the welfare of the farmer and the farmer's family is that of the order of the Patrons of Husbandry, which has been a successful experiment in this town. "The Sterling Grange, No. 53, Patrons of Husbandry," was organized in April, 1874. In some of its methods of operation it varies from the Farmers' Club, but is not, in any sense, in conflict with it. The objects of the two associations are identical. The Sterling Grange at the present time is an active force and has a membership of sixty persons.

THE CENTENNIAL.—The centennial anniversary of the incorporation of the town was observed on the 15th of June, 1881. The subject was brought up before the town, informally, at the annual town-meeting in November, 1879, and a committee was appointed to take the matter into consideration and report at a future meeting. The committee reported at the annual meeting in March following in favor of a suitable observance of the event, which report was unanimously accepted, and a Centennial Committee was chosen and empowered to make all necessary

arrangements therefor. The committee consisted of the following persons: Samuel Osgood, Captain Eli Kilburn, Dr. William D. Peck, Ezra Sawyer, Esq., Mr. William H. Burpee. Captain Kilburn, owing to the infirmities of age, declined to serve and Mr. Charles H. Loring was chosen in his stead.

The committee held frequent meetings during the summer and winter following, and made such arrangements as were deemed proper. An act was procured from the Legislature of 1880 authorizing the town to raise money by taxation *to an amount not exceeding five hundred dollars*, for commemorating the centennial anniversary of its incorporation and for publishing the doings of the celebration. The anniversary of incorporation occurred on the 25th of April, but on account of probable bad traveling and unpleasant weather at that time the celebration was postponed until the 15th of June, when it to k place according to the following

PROGRAMME.

1781. 1881.

Bells were rung and Salutes fired at Sunrise, at Noon and at Sunset.

At 9½ o'clock A. M. a Procession was formed under the direction of Chief Marshal, Capt. P. T. K. Burpee, in the following order:

A platoon of Police
Fitchburg Cornet Band.
Maj. James A. Post, No. 59, G. A. R.
Town Officers and Invited Guests in carriages.
Fire Company.
The Sterling Grange.
Representatives of Ancient and Modern Costumes.
The School Children.
The Citizens in carriages and on foot.

Route of Procession—through the principal streets to the Unitarian Church.

The exercises in the Church, commencing at 11 o'clock, were:

Voluntary on the Organ.

1st.—Prayer by Rev. Henry P. Cutting.

2d.—Hymn by the Centennial Choir under the direction of Prof. Birney Mann.

3d.—Music by the Band.

4th.—The following Address of Welcome by the Chairman of the Centennial Committee:

Friends and Fellow Citizens:

We have assembled on this beautiful June morning to observe in a fitting manner the One Hundredth Anniversary of the Incorporation of the Town of Sterling.

As the Chairman of the town's Centennial Committee it becomes my pleasant duty, in behalf of the town, to extend to you all a sincere and hearty welcome to the joys and festivities of this occasion.

To-day Sterling extends her hand in cordial greeting to all her friends and to all her sons and daughters from far and from near, and bids them "welcome home"—welcome to her hills and valleys—to her green fields and to her many homes smiling in peace and plenty—whose doors are open to receive you.

And may it prove a benediction and a blessing to us all, that leaving our cares and labors and anxieties behind us, we have gathered here at the old homestead to revive the fond recollections of earlier years, and exchange friendly greetings amid the familiar scenes of our childhood and youth.

One Hundred years ago, on the 25th day of April, this rural town, then known as the Second Precinct of Lancaster, was, by an Act of the Legislature, invested with all the rights and privileges and duties of a town, and took her place among her sister towns in the Commonwealth as the town of Sterling.

One Hundred years! As a grain of sand on the globe, so is a Century in the Cycles of time. But as compared with human life, it is a long period and most wonderful are the changes that are wrought therein.

As a suitable introduction to the exercises that are to follow, I will now call upon our much respected fellow-townsman, Dr. William D. Peck, to read the Act of Incorporation.

5th.—Centennial Address, by William Frederick Holcombe, M.D., of New York, a native of the town.

6th.—Hymn.

7th.—Music by the Band.

8th.—Auld Lang Syne, sung by Choir and Audience.

At the close of the exercises in the Church, which was completely filled, dinner was served in a tent on the Common by Augustus Marrs, caterer of Worcester, and was followed by toasts and speeches by distinguished speakers, and the reading of letters and poems.

In the Town Hall there was a display of portraits and photographs of past and present inhabitants of the town, antique articles and interesting relics.

In the evening there was an illumination, and fireworks on the Common, accompanied by music by the band.

TOWN OFFICERS SINCE 1794.

1793.—Selectmen, John Robbins, Joel Pratt, Silas Roper, Timothy Kilburn, Moses Smith.

1794.—Town Clerk, Moses Smith.

1795.—Town Clerk, Moses Smith; Selectmen, John Robbins, Timothy Kilburn, Moses Smith, Joel Pratt, Silas Roper; Assessors, John Robbins, Moses Smith, Silas Roper; Representative to General Court, Edward Raymond, Esq.

1796.—Town Clerk, Moses Smith; Selectmen, John Robbins, Moses Smith, Joel Pratt, Timothy Kilburn, Silas Roper; Assessors, Robert B. Thomas, Moses Smith, John Robbins; Representative to the General Court, Edward Raymond, Esq.

1797.—Town Clerk, Moses Smith; Selectmen, John Robbins, Timothy Kilburn, John Snow, Robt. B. Thomas, Ebenezer Buss, Jr.; Assessors, John Snow, John Robbins, Robt. B. Thomas; School Committee, Israel Allen, M.D., John Barnard, M.D., Samuel Clark.

1798.—Town Clerk, Moses Smith; Selectmen, Timothy Kilburn, Robt. B. Thomas, John Snow, Aaron Kimbal, Andrew Putnam; Assessors, Josiah Kendall, John Snow, Aaron Kimbal; School Committee, Israel Allen, John Barnard, Robt. B. Thomas, John Robbins, Moses Smith; Representative to the General Court, William Putnam.

1799.—Town Clerk, Moses Smith; Selectmen, John Snow, John Robbins, Robt. B. Thomas, Joseph Palmer, Silas Buss; Assessors, John Snow, John Robbins, Joseph Palmer; School Committee, Robt. B. Thomas, Israel Allen, Moses Smith, John Barnard, Luther Allen.

1800.—Town Clerk, Moses Smith; Selectmen, Joseph Palmer, Silas Buss, Robt. B. Thomas, John Robbins, Samuel Sawyer; Assessors, Robt. B. Thomas, Joseph Palmer, Samuel Sawyer; School Committee, John Robbins, Israel Allen, Robt. B. Thomas, John Barnard, Luther Allen; Representative to the General Court, Benjamin Richardson, Esq.

1801.—Town Clerk, Moses Smith; Selectmen, Robt. B. Thomas, Joseph Palmer, Silas Buss, Samuel Sawyer, Paul Bailey; Assessors, Robt. B. Thomas, Joseph Palmer, Samuel Sawyer; School Committee, Dr. Israel Allen, Luther Allen, Robt. B. Thomas, John Barnard, Isaac Story; Representative to the General Court, Dr. Israel Allen.

1802.—Town Clerk, Moses Smith; Selectmen, Joseph Palmer, Samuel Sawyer, Paul Bailey, Joseph Pierson, John Porter; Assessors, Joseph Palmer, Paul Bailey, Samuel Sawyer; School Committee, Pearson Kendall, Israel Allen, Thomas H. Blood, Luther Allen, John Barnard; Representative to the General Court, Dr. Israel Allen.

1803.—Town Clerk, Moses Smith; Selectmen, Samuel Sawyer, Paul Bailey, Joseph Palmer, Joseph Pierson, John Porter; Assessors, Joseph Palmer, Samuel Sawyer, Paul Bailey; School Committee, Pierson Kendall, Israel Allen, John Barnard, Luther Allen Thos. H. Blood; Representative to the General Court, Dr. Israel Allen.

1804.—Town Clerk, Moses Smith; Selectmen, Paul Bailey, Samuel Sawyer, Joseph Pierson, John Porter, Barthl. Brown; Assessors, Paul Bailey, Samuel Sawyer, Joseph Pierson; School Committee, Dr. Israel Allen, John Robbins, Thos. H. Blood, Barthl. Brown, Pierson Kendall; Representative to the General Court, Dr. Israel Allen.

1805.—Town Clerk, Moses Smith; Selectmen, Paul Bailey, Joseph Pierson, Barthl. Brown, Thos. H. Blood, John Buss; Assessors, Paul Bailey, Joseph Pierson, Bartholomew Brown; School Committee, Israel Allen, Pierson Kendall, Thos. H. Blood, Barthw. Brown, Robt. B. Thomas; Representative to the General Court, Dr. Israel Allen.

The above dates may not be exactly correct, but nearly so.

BIOGRAPHICAL.

CAPTAIN ELI KILBURN.

Eli Kilburn was born in Princeton, Mass., April 3, 1796. His father, Calvin Kilburn, was a native of Sterling, but spent most of his life in Princeton, where he died, January 23, 1852, in the ninety-fifth year of his age. His mother, Mary Stratton Kilburn, was a native of Rutland. She died in Princeton, September 15, 1847, at the age of eighty-nine.

Eli was the youngest of three sons, with two sisters, one older and one younger than himself. He is now, and has been for many years, the sole survivor of his father's family.

Eli was educated in the common schools of Princeton, and at the Leicester Academy. At the age of eighteen he came to Sterling, and began learning the chair-making business. Soon after attaining his majority he became a manufacturer on his own account.

In 1821 he married Miss Lucinda Bailey, of Sterling, and settled near Dana's Mills, in that town.

In 1829 he was chosen commander of a company of light infantry, known as the Sterling Guards.

In 1856, at the age of sixty, Captain Kilburn closed his prosperous career as a chair manufacturer, and bought a lot in Sterling Centre, on which he built a house, where he has since resided.

His wife, Mrs. Lucinda Bailey Kilburn, died in February, 1867, and in April, 1868, he married Mrs. Jane H. Powers, widow of Ezra S. Powers, and half-sister to his first wife.

Captain Kilburn during his long and active life has held many positions of trust and responsibility. He served as justice of the peace for twenty-eight years, and was chairman of the board of trustees of Oak Hill Cemetery for twenty-nine years.

For several years he was chairman of the Boards of Selectmen and of the Overseers of the Poor, and has served on numerous important committees in town affairs.

He has settled many estates, and acted as guardian for sixteen minors. For thirty years he has been the agent in Sterling for the Worcester Mutual Fire Insurance Company. About two years ago he gave up this business, finding that his private affairs needed all of his time and strength.

Captain Kilburn has been a successful business man, and, by persevering industry, good management and habits of thrift, has amassed a handsome fortune.

Since coming to Sterling he has been an active and influential member of the First Congregational (Unitarian) Society.

He has always taken an active interest in politics, and cast his first vote for President for James Monroe.

During recent years Captain and Mrs. Kilburn have made many pleasant excursions, visiting the White Mountains, the Saguenay River, Niagara Falls, Saratoga, Washington and other places of interest, visiting Saratoga Springs for thirty consecutive years.

Happy in his domestic life, prosperous in his business, honored and respected by his fellow-citizens, sound in mind and body at the age of ninety-two, cheerful, hopeful, serene, Captain Eli Kilburn is to-day one of the best representatives of our New England life.

EDWARD BURPEE.

Edward Burpee is one of the most substantial and highly respected citizens of Sterling. He comes from a line of honored ancestry, reaching back nearly to the first settlement of the town.

His great-grandfather, Jeremiah Burpee, came to Sterling from Rowley, in Essex County, probably about the year 1745 and settled on Rowley Hill (so called), where he died in 1817 at the advanced age of ninety-two years.

The subject of this sketch was the son of Jonathan Burpee—a citizen of Sterling universally respected for the rectitude of his character—and was born June 13, 1814. His mother's name, before marriage, was Fanny Johnson, daughter of Edward Johnson.

As Mr. Burpee was an only child he remained with his parents, assisting them in their labors, and, by their example, acquiring habits of industry and strength of moral character, until he was eighteen years of age. At this time his father obtained for him a situation with Joel Pratt, Jr., at that time one of the most prominent chair manufacturers in Worcester County. He remained with Mr. Pratt three years, serving him faithfully for the sum of one hundred dollars, with board and clothing and with the privilege of attending the district school in the winter; his entire education being such only as the common schools of the town at that time afforded. At the close of his apprenticeship to Mr. Pratt he left his employ and engaged service to Mr. Thomas Lewis (2d), a near neighbor.

He renewed his engagement to Mr. Lewis three years successively. At the end of this period, in 1838, he purchased Mr. Lewis' place and business and commenced the manufacture of chairs on his own account. In April of that year he married a Sterling lady, Miss Lucy Ann Smith, a daughter of Manasseh Smith, and began housekeeping in the same house he now occupies.

In 1861 he had the misfortune to lose his wife by

death, but in the following year he again entered into the marriage relation with Mrs. Mary Curtis, who now faithfully presides over his household and devotedly ministers to his comfort as the infirmities of age begin to creep upon him.

Thus, for fifty years, with varying fortunes, he has been constantly, and at times quite extensively, engaged in the chair business, by which, through industry, economy and forethought, he has secured such a competency as relieves him from all anxious thought in respect to present wants or future needs.

His home and attention to his own private business was always more congenial to his nature than crowded assemblies or public office. Nevertheless, he has several times held the office of selectman and other responsible positions, and his fellow-townsmen have ever had implicit confidence in his intelligence, sound judgment and uprightne-s of character. He is still in business, doing a larger amount than any other concern of the same line in the town. He receives his friends with a hearty welcome, and entertains them with generous hospitality.

CHAPTER LXXVIII.

BROOKFIELD.

BY WILLIAM T. DAVIS.

A LITTLE south of what is nearly the centre of Massachusetts there is a territory about eight miles square lying for the most part within the limits of Worcester County and including a small tract of land in Hampshire County, which, as early as the year 1647, attracted the attention of settlers along the coast, who were seeking favorable spots for farming and pasturage. It was occupied by the Quabaug tribe of Indians, and had been cleared by them to such an extent that its hillsides and plains, together with the meadows watered by the rivers and streams flowing through them, offered a rich prize to those who were adventurous enough to wander into the wilderness so far from the more thickly-settled villages and towns along and near the shore. The Quabaug Indians by some historians have been called a distinctive tribe, and by others they are supposed, with the Agawams and Waranakes and Naunotuks and Pacomptucks and Squakheags, along the Connecticut River, the Nipmucks proper, a little farther to the eastward, and the Nashaways, a little farther to the north, to have formed the great Nipmuck tribe. They exhibit, however, in their history, an individuality which warrants the belief that they were an independent tribe, acting only by voluntary association with other tribes and under the rule of sachems not their own. It is stated on undeniable authority that when suffering from the hostile attitude of other tribes they appealed to Massasoit, the chief of the Wampanoags, for assistance, and that late in life that sachem dwelt among them and became their ruler. Indeed, it is more than probable that the famous warrior of Mount Hope was the sagamore of the Quabaugs in 1661, and that in that year or the next, while Wamsutta, his son, was the acting sachem of the Wampanoags, died among his new-found followers.

At the time at which this narrative opens Springfield, settled in 1636, was the only town on the west and the nearest towns on the east were Lancaster, planted in 1643; Concord, settled in 1635, and Sudbury, in 1639. These new settlements were reached by the Indian trails or paths, along which the immigrant could only travel on horseback or on foot; but these trails leading from the villages of the Indians to various points on Massachusetts Bay, Mount Hope Bay and Long Island Sound were looked on by the early settlers, inured as they were to hardship and fatigue, and eager in their efforts to secure the ownership of land, as easy avenues to the prizes they sought.

The territory to which we have referred was called Quabaug, and gave its name to the tribe occupying it. As pronounced by the Indians, it was Squapauke or Squabaug, and signified "red water place," or "red pond," and was so called from the reddish color of the bottom underlying the various sheets of fresh water with which it abounded. According to J. H. Temple, whose exhaustive and interesting "History of North Brookfield" has afforded much material for this narrative, the various villages of the Quabaug tribe lay along the different trails which intersected its territory, the largest of which was the Wekabaug village, in what is now West Brookfield. The native word was Wekapauke, meaning "at the end of the pond," and was adopted by the English as the name of Wekabaug Pond, containing about three hundred acres and lying near West Brookfield village. Another large village was Quobagud or Quobacutt, in the east part of Brookfield, near what is now called Quabaug Pond, and still another was Ashquoach village, north of Great Pond, in Brimfield, and others still were the Quassuck, in what is now Sturbridge, and Putikookuppog, on the south side of the Quinebaug River, near the present line between Sturbridge and Bromfield.

The Quabaug territory is watered by the Quabaug River, which is formed by the union of the Five Mile River and the Seven Mile River and flows into Quabaug Pond. It leaves the pond at its westerly end and flows through what is now the town of Warren, uniting afterwards with Ware River, where it takes the name of Chicopee River, and empties into the Connecticut in the town of Chicopee. Numerous brooks, of more or less size and importance, enter Quabaug River at various points, including Moore's Brook, Stone's Brook, Coy's Brook, Sucker Brook, New Mill Brook, Cheney's Brook, Mason's Brook,

Salmon Brook, Dean's Brook, Wigwam Brook and many other small streams, some of which in early and later times have furnished water for wheels of industry. Among the ponds which dot the territory, are the Quabaug Pond, more than five hundred acres in extent; South Pond, nearly two hundred acres; Wekabaug Pond, three hundred acres, and Cranberry, North, Horse and Perry Ponds, of smaller dimensions.

Such was the territory when, in 1647, it first came within the notice of the government of the Massachusetts Colony. In that year the Quabaug tribe suffered from the raids of marauding Indians of other tribes, and applications for aid were sent by Quacunquasit, the sachem of the tribe, to the Massachusetts Governor. At the same time John Eliot became interested in the tribe, and in 1649 made a visit to their villages, an account of which he gave in a letter, from which the following is an extract, dated Roxbury, December 29, 1649:

There is another aged Sachem at Quobagud, three score miles westward, and he doth greatly desire that I would come thither and teach them and live there; and I made a journey thither this summer and I went by Nashaway; but it so fell out that there were some stirs betwixt the Narraganset and Monahegan Indians, some murders committed, etc., which made our church doubtful at first of my going; which, when the Nashaway Sachem (Sholan) heard, he commanded twenty armed men (after their manner) to be ready, and himself, with these twenty men, besides sundry of our near Indians, went along with me to guard me; but I took some English along with me also, so that hereby their good affection is manifested to me and to the work I have in hand. Here also (at Quobagud) I found sundry hungering after instruction; but it pleased God to exercise us with such tedious rain and bad weather that we were extreme wet, in so much that I was not dry night nor day from the third day of the week unto the sixth, but so travelled, and at night pull off my boots, wring my stockings and on with them again and so continued. The rivers also were raised, so as that we were wet riding through; but that which added to my affliction was my horse tired so that I was forced to let my horse go empty and ride on one of the men's horses, which I took along with me. Yet God stept in and helped; I considered that the word of God (2 Tim. 2: 3), "Endure hardship as a good soldier of Christ," with many other such like meditations. And I thank the Lord neither I nor my company took any hurt.

The Indian trail followed by Eliot was doubtless one of the Connecticut trails which ran through the present towns of Weston, Sudbury, Stow, Lancaster, Princeton, Barre, New Braintree, Warren, Brimfield and Springfield. This simple record of the Indian apostle shows the bold and adventurous spirit which characterized the early settlers of New England, who, having migrated from comfortable English homes and experienced the comparative discomforts with which a life in the towns and villages along the coast were surrounded, were willing and even eager to push still farther into the wilderness to unknown regions, where to hardship and exposure and want were added the dangers which the nearness of savage Indians constantly threatened. No explanation of this spirit is satisfactory that does not emphasize the greedy desire which every Englishman must have felt for that which the opportunity offered—the possession of land. To most, if not all, of the immigrants to our shores such a possession was a new privilege. Landed possessions, which in the old country were confined to the noble or wealthy classes, inspired them with hopes newly born, with aspirations never before experienced, and laid before their eyes visions of untold prosperity and worldly success.

Such as has been here described was the Quabaug territory, when only a few years later, in 1660, some of the inhabitants of Ipswich petitioned the General Court for a grant of land, which was accorded in the following language of the records:

At a great and general Court of Election held at Boston, the 20th of May, 1660.

In ansr to the peticon of severall the inhabitants of Ipswich this Court Judgeth it meete to Graunt the petitioners sixe miles square or so much land as shall be contejned in such a Compasse in a place nere Quoboag ponds provided they have twenty familyes there resident within 3 years & that they have an able minister settled there within the said terme such as ther court shall approve & that they make due provision in some way or other for the future either by setting apart of land in what else shall be thought meete for the Continuance of the ministry amongst them; and that If they shall faile in any of these particulars above mentioned this Graunt of the Court to be voyd & of none effect.

Precisely who the grantees were is not known, but John Warner, John Ayres and William Prichard were probably among their number. John Ayres and John Warner appeared first at Ipswich in 1648, and William Prichard in 1649. These three men are supposed to have visited Quabaug in 1660 with the view of selecting definitely a place of settlement; but owing to Indian troubles no further action was taken under the grant until 1665. In that year it is believed that John Warner, with his son Samuel, John Ayres, Thomas Parsons and Thomas Wilson, took up a settlement, building houses and making other preparations for a permanent home. Wilson was probably a young man, and was the son of Theophilus Wilson, who first appeared at Ipswich in 1636. Parsons was also a young man, only twenty years of age, and was born in Windsor. It is not unlikely that his father had removed from Essex County and was thus naturally associated with the settlers of Quabaug.

Previous to this settlement in 1665 and since 1647, at which date this narrative opened, new towns not far distant had been organized. Hadley, earlier known by the Indian name, Norwottock, was incorporated May 20, 1661, and Northampton October 18, 1654, and these towns with Springfield constituted Hampshire County at the date of its incorporation, May 7, 1662.

These three towns, though they had long enjoyed the privileges of municipal government, had not previously been included in either Suffolk, Essex, Norfolk or Middlesex Counties, the four counties into which the colony of Massachusetts was divided in 1643. Special enactments were at various times passed providing for the administration of justice within their limits, but they were associated with no county organization. As will be seen by the following act incorporating Hampshire County in 1662, the Quabaug territory fell within its boundaries, and

consequently Brookfield, when incorporated, became a Hampshire town.

The act incorporating the county of Hampshire was passed May 7, 1662, and is as follows:

Forasmuch as the inhabitants of this jurisdiction are much encreased so that now they are planted farre into the country upon Conecticott River, who, by reason of their remotenes cannot conveniently be annexed to any of the countyes already setled & that publicke affaires may, with more facility, be transacted according to lawes heere established, it is ordered by the Court & authority thereof that henceforth Springfeild, Northampton and Hadley shall be & hereby are constituted as a county the bounds or ljmitts on the south to be the south ljne of the pattent, the extent of other bounds to be full thirty miles distant from any or either of the foresajd tounes, & what tounes or villages soever shall hereafter be erected wthin the foresajd precincts to be & belong to the sajd county; and further that the sajd county shall be called Hampshire, & shall have & enjoy the libertjes & priviledges of any other County; & that Springfeild shall be the shire toune there, & the Courts to be kept one time at Springfeild & another time at Northampton; the like order to be observed for their shire meetings, that is to say, one yeere at one toune & the next yeare at the other, from time to tjme. And it is further ordered that all the inhabitants of that shire shall pay their publicke rates to the countrey in fatt catle or young catle, such as are fitt to be putt off, that so no unnecessary damage be put on the country; &, in case they make payment in corne, then to be made at such prices as the lawe doe comonly passe amongst themselves, any other former or annuall orders referring to the prices of corne notwithstanding.

The settlement of these western towns, together with the grant of four thousand acres near Quabaug to John Eliot, stimulated the Quabaug grantees to occupy the lands before it was too late. Even at the date of their occupation the three years' limitation of their grant had expired, and a petition was presented to the General Court by the settlers, asking for a new grant, to which the court responded by the passage of the following order:

May 15, 1667. In ans^{r} to the petition of the inhabitants at Quabaug; This Court having perused the grant which the Generall Court made anno 1660 to the first undertakers from that place, doe finde that

1. By their non observance of the condition of their grant, the same is altogether vojd, & that now the ordering & disposing thereof is wholly in this Court's power;

2. Considering that there is already at Quabauge about sixe or seven familyes, & that the place may be capable of receiving many more, this Court will readily grant them the liberty of a township when they shall be in a fitt capacity.

3. In the meane time this Court appoints Capt. John Pynchon, John Aires, W^{m}. Prichard, Richard Coy & John Younglow, or any three of them, whereof Capt. Pinchon to be one of the three who shall have power to admitt inhabitants, grant lands & to order all the prudentiall affaires of the place in all respects untill it shall appeare that the place shall be so farr settled with able men, as this Court may judge meete to give them the full liberty of a touneship according to lawe.

4. Because the inhabitants of Ipswich made the first motion for that plantation, & some of them have binn at charges about it, although by their remisse prosecution they have now lost all their right, yet such of them as shall setle there by midsummer come twelve moneth, they shall have an interest in the lands there in proportion with others; but if, by that time, they shall not be there setled, they shall then loose their lands & all their charges, which they have been att upon ye place.

5. They are to take care for the getting & mayntayning of a godly minister among them, & that no evill persons, enemjes to the lawe of this commonweale in judgment or practice, be receaved as inhabitants.

6. For promoting of the aforesajd plantation & incouragement thereof this Court doeth now grant that plantation seven yeares freedom from all publick rates & taxes to the country, provided these inhabitants of Ipswich, which intend to inhabit at Quabauge by midsummer come twelve month, doe engage to give security to the abovesajd committee, within three moneths after the date hereof, that they will performe accordingly, that so others that would setle there may not be hindered.

Richard Coy was probably an Essex County man, though not of Ipswich, and John Younglow was probably son of Samuel Younglove, who appeared in Ipswich in 1635. Captain John Pynchon was born in England in 1627, and came to New England in 1630 with his father, William Pynchon, a leader in the settlement of Springfield in 1636. William, the father, who was at one time treasurer of the Massachusetts Colony, and for many years an assistant in the government, published in England in 1650 a book entitled "Meritorious Price of Christ's Redemption," in opposition to the Calvinistic view of the atonement, which caused his deposition from the magistracy. His book was burned on Boston Common by order of the Court, and, in consequence of persecutions which followed, he returned to England in 1652. His son, John, mentioned in the grant above-quoted, was for fifty years a magistrate of Springfield and one of the founders of Northampton in 1654. He died January 17, 1703. It was undoubtedly thought judicious by the General Court to appoint one alien member on the committee, and that, unlike the occupants of Quabaug lands, who were men probably of no experience in public affairs, he should be familiar with the methods and requirements of municipal administration.

In the mean time, before the regrant was made by the court, the old grantees took measures to secure a release from the Indians of their title in the lands which their grant covered, and negotiated with Ensign Thomas Cooper, of Springfield, to take a deed in his own name. This he did, but afterwards assigned his interest to the grantees. The following is the Indian deed:

These Presents Testify That Shattoockquis, alias Shadookis, the sole & propper owner of certayne lands at Quabauge, hereafter named, Hath for good & valluable Considerations, him, the said Shattooquis thereunto moveinge given, graunted, bargayned & Sold, And by these presents Doth fully, clearily & absolutely give grant, bargayne & sell unto Ensigne Thomas Cooper, of Springfield, for the use & behoofe of the prsent English Planters at Quabaug & their Associates & their successors, & to them & their heires for evoer certayne pcells of land at towards or about the North end of Quabauge pond, that is to say, beginning at a little Meddow at the North end of the pond Quabauge, wch meddow is called Podeek, wth the land about it & soe to a little hill Wullamanick & from thence Northward or North & by East about Three miles, & soe Westward off to ye North end of Wecobaug Pond, taking in all the playnes, meddowes & upland from Podunk by Quabaug to Wecobaug pond, all the land betwixt as that called Nacommuck (vis^{t} a brook where meddow is), and soe to Massequockummes vis^{t} another brook where meddow is and soe through the playn to Wecobaug pond & then down to Lashaway, vis^{t} the River wch comes from Quabaug pond all ye land as aforesaid on the East or Northeast side of that River, and about three miles North or North & by East from the River together wth the said River & the lands on the west side, or south, or southwest side of the said River, & particularly from Lashaway down the River to a brook or streame called Naltaug, & soe up that brook to the head of it Southward, & then from the head of that brook to verge of a hill called Asquoach, & soe down Southward or Southeast to ye pond Quabauge, taking in all the wett meddow & meddows called Masquabamick & Nanantomqua, it being about foure miles from the river to the verge or foote of the hill aforesaid, called Asquoach, and about six miles or neere thereabouts from the River at the mouth of ye brook called Naltaug to Quabaug pond. All the

aforesaid Tract of land from Wecobauge to Podunk at the North end of Quabauge, & from Naltaug to Quabauge, called Naltaug, Lashaway, Manequockcumis, Nacommuck, Wullammannuck, Podunck, Nananton-qua, Masquabamick & soe to the hill called Asquoach. All wch land afore described, together with the trees, waters, stones, profits, comodityes & advantages thereof & thereunto belonging the said Ensigne Thomas Cooper, for himself and for the present Planters at Quabaug; and their Associates & successors is to have, hold and enjoy, & that for ever.

And the said Shattookquis, as well for other cousiderations, as also for & in consideration of the summe Three Hundred fadom of Wampampeage in hand Received, doth grant, bargayne & sell All & Singular the aforenamed Tract of land to Ensigne Thomas Cooper, his suc cessors & assignes as aforesaid, & to their heires for ever. And the said Shattoockquis doth hereby covennate & promise to & wth the said Ensigne Thomas Cooper that he will save ye said Thomas Cooper harmless from all manner of clamyes of any person or psons lawfully clayming any right or interest in the said lands hereby sold, or in any part thereof, & will defend the same from all or any molestation & incumbrence by any Indians lawfully laying clayme or title thereunto. In witness whereof the said Shattoockquis hath herewith sett his hand, this tenth day of November, 1665:

The mark of * * * * Shattoockquis.
The mark of Mettawomppe, * * *
An Indian witness, who, challenging some interest in the land above sold, received part of ye pay & consented to the sale of it all.

Subscribed & delivered in ye presence of
Elizur Holyoke,
Samuell Chapin,
Japhett Chapin.

Shattoockquis, an Indian above-mentioned, did own & acknowledge this to be his act & deed, resigning up all his right, title & intrest in the lands above-mentioned unto Thomas Cooper, his Associates & Assignes, as above said, this Tenth day of November, 1665.

Before mee, John Pynchon, *Assistant.*

The wampumpeage, three hundred fathoms of which were paid for the land, was made from the purple and white parts of the quaw-haug shell, and consisted of flat, round, button-like pieces of shell, about a sixteenth of an inch in thickness, and a quarter of an inch in diameter, with a hole in the middle for stringing on strings of bark or hemp. The purple and white pieces alternated on the string, the purple being of double the value of the whi e, and the whole valued at five shillings per fathom. After wampumpeage went out of use as currency, it long retained a place among the Indians for the adornment of their persons. Before the days of the Pilgrims, it had a very limited use, and that only among the tribes on the seaboard. In 1627, when the Plymouth Colony effected a settlement with the London merchants, by which they were found to owe an indebtedness of twenty-four hundred pounds to them and other creditors, the debt was assumed by William Bradford, Miles Standish, Isaac Allerton, Edward Winslow, William Brewster, John Howland, John Alden and Thomas Prence, together with their friends, James Sherley, John Beauchamp, Richard Andrews and Timothy Hatherly, of London, and the trading privileges of the Colony were assigned to them as security. In order to pay the debt, these gentlemen caused all the inland tribes to be instructed in the value and use of wampumpeage, and by its use they carried on so profitable a trade in the purchase of furs and their exportation to England as within nine years—the time prescribed in their settlement—to pay off the entire debt and to leave the Colony in the undisputed possession of all their lands.

Until 1673 the committee appointed by the court held in their hands the entire management of the lands, and by them the allotments were made. They kept their Books of Records and Mr. Pynchon was the recorder. Their first book was probably destroyed by fire in 1675, and the only knowledge extant of the methods and plan of land distribution is derived from memoranda and extracts found among the papers of Mr. Pynchon. From them it appears that what were called the home-lots were laid out so as to take in what is now known as Foster's Hill, extending from Hovey's Brook on the southeast to Coy's Brook on the northwest, including in all about five hundred acres. Beginning at Coy's Brook, the lots lay in the following order: 1. Richard Coy; 2. Thomas Parsons; 3. John Warner; 4. Samuel Kent; 5. Samuel Warner; 6. John Younglove; 7. Thomas Wilson; 8. Thomas Millet; 9. Meeting-House; 10. John Ayres; 11. William Prichard; 12. James Travis; 13. Judah Trumble; 14. Daniel Hovey; 15. James Hovey; 16. Thomas Hovey. The lot on which probably the first meeting-house was built was in the middle of the allotted territory, and was probably a little northwesterly of the present barn of Mr. D. H. Richardson. These lots contained twenty acres each, with a right to twenty acres of meadow and eight or ten acres of plain land, and larger lots were assigned to the minister and to fathers of grown-up sons. Each home-lot was also entitled to forty acres of upland and all undivided lands were held in common.

After this liberal division of lands, it was found, nevertheless, that the demand of the settlers for pasturage, mowing land, timber and fuel was far from being met, and the following petition for a further grant was sent to the General Court:

To the much honored General Court held at Boston, the 12th of October, 1670:

This honored Court being pleased upon petition presented to them by some of the inhabitants of Ipswich for land to settle a plantation at Quaboag; so far to favor their notion or to grant them a tract of land of six miles square for that end, and farther since to encourage the poor inhabitants that are upon it. The humble petition, therefore, of the poor inhabitants of Quaboag to this honored Court is, that according as they were pleased to intimate their readiness to grant us the liberty of a township (whereby meet inhabitants upon the place we should be capable of it) so they would be pleased at this time to do it. Our humble petition to this hon'd C't is farther, that they would be pleased to enlarge our grant, if they see good, for that we may go six miles every way from the centre. The reason of this, our request to the hon'd C't, is because we find the meadow to lie very much scattered about the place in many small parcels far distant one from the other, and therefore we fear that unless the hon'd C't grant us some considerable further enlargement, we shall not be able to fetch within our bounds a sufficient quantity of meddows to accommodate families enough to make a comfortable society in a place so remote in the wilderness as ours is. We would further crave leave to acquaint the honored C't that there is a great farm of land laid out very near our plantation for Peter Taft, as we do adjudge, within a matter of three or four miles from the river, which runs through our place to Springfield, as we humbly conceive that it will fall within our bounds. If it should not, we humbly crave that the hon'd C't would grant that it may pay public charge with us; it being very difficult to carry on a place so remote

from all other plantations in the woods as ours is. And this hon'd C't so far countenancing us as they have already, doth persuade, as by way of humble petition, to present these things to this hon'd C't, submitting ourselves their good pleasure concerning us herein. Wee, whose names are here underwritten, have subscribed hereto in the behalf of the rest.

RICHARD COY,
JOHN AYRES,
WILLIAM PRICHET.

From Quaboag, October 9th, 1670.

To this petition no response appears to have been made.

In 1673 application was made to the General Court for an act of incorporation as a town. We are told by Mr. Temple that the original petition was found in a junk-shop by Dr. John F. Pratt, of Chelsea, and he has saved it from oblivion by giving it a place in his valuable history. The petition reads as follows:

To the Highly Honnored General Corte of the Massachusetts:

The humble Petition of the inhabitants of Quaubauge Sheweth That whereas wee being not yet allowed a Township, wee are disabled as to comfortably carrying on ye affaires of the place as is requisite for the publicke & our own conveniences in diverse respects as for the ordering the Prudentiall affaires of the Town proper, to select men, makeing & collecting of Rates, &c. Wee have, indeed, a Committee to helpe in these matters, but in regard we cannot rationally desire or expect the p^sence & assistance of One of the Committee (vest the Honno^rd Major Pynchon) soe often as we need by reason of his remoteness. And yett w^thout his p^sence or concurrence the Committee cannot make a valid act. The p^mises considered, Our Humble request is, that this much Honno^rd Corte would be pleased to grant us the Priviledge & Libertyes of a Township, whereby we may be the better inabled to carry on our onne matters w^thout too much distraction.

And yo^r Petitione^rs shall ever pray for yo^r prosperity If Yo^r Honno^rs please let ye name of ye Place be Brookfeild.

Octr. ye 10, 1673.

John Ayres, Sen^r.	Thomas Wilson.

Samuel Warner.	James Travis.
Samuel Ayres.	Richard Coy.
John Younglove.	James Hovey.
William Pritchet.	Juda Trumbull.
Thomas Parsons.	

It is probable, judging from the names in this petition and from the allotment of lands, that most, if not all, of the old Ipswich grantees had taken advantage of the privilege accorded to them in the re-grant. John Warner, Samuel Warner, John Younglove, Thomas Wilson, John Ayres, William Prichard, Daniel James and Thomas Hovey were all from Ipswich, while Richard Coy, Samuel Kent, James Travis and Judah Trumbull were Essex County men and probably associated with the Ipswich men in the original grant.

Accompanying the petition was a letter from John Pynchon, desiring to be discharged from the committee for Quabaug, and this letter also Mr. Temple has reproduced in his history. The deputies of the court, as the record states, judged

meete to graunt this pet, & that the name of the place be Brookefeild, as is above desired, on Hono^rd magistrates consenting hereto.

WILLIAM TORREY, *Cleric.*

The record also states that the "magist^s Consent hereto, provided they divide not the whole land of ye Township till they be forty or fivety familyes in y^e meane time, yt their dividings, one to another, exceed not two hundred acres apeec to any p^sent inhabitant, their brethren, the deputyes hereto consenting.

22 October, 1673, EDW. RAWSON, *Secrety,*
Consented to by the deputies. WM. TORREY, *Cleric.*

On the 19th of December in the year of the incorporation Thomas Cooper, the grantee in the deed from Shattoockquis, assigned his interest in the lands conveyed to him to the inhabitants of the new town by the following instrument:

I, Thomas Cooper, above mentioned, doe hereby relinquish & resigne up all my right & title in ye lands within mentioned, to be bought of Shattoockquis, hereby declaring that my acting in ye p^rmises was only in the behalfe & for the use and behoofe of the inhabitants of Quabauge (now called Brookfeild) & their successors. The purchase of the above-mentioned land being at their pper cost and charge, who had obteyned a grant thereof from ye Honno^rd Gen^rll Corte, & are now allowed a Toune; I doe therefore hereby deliver up this instrument, or deed of sale to John *John* Warner, Richard Coy & William Pritchard, of Quabauge, *alias* Brookefeild, for the use & as the propp^r right of the inhabitants of Brookefeild, the said Persons beinge betrusted by the Toune, or present inhabitants of Brookefeild, for taking in & receiving this present Deed; wherefore I doe hereby deliver it up to them, hereby declaring it & the land therein mentioned to be sold to be & belong to the present Inhabitants of Brookefeild, as they are a Township, and to particular psons only, according as they have or shall have grants of land confirmed to them. The whole tract of land above mentioned I doe fully & absolutely resigne up to the Inhabitants of Brookefield aforesaid, and to their successors & their heires for Ever, As witness my hand this 19th day of December, 1673.

THOMAS COOPER.

December 19^th, 1673. Lieut. Thomas Cooper, above mentioned, subscribed hereunto & acknowledged the resigning up this Deed & all his intrest in the premises to the Inhabitants of Brookefeild,

Before me, JOHN PYNCHON, *Assistant.*

This Deed was Recorded March ye 1673-4 By mee,

ELIZUR HOLYOKE, *Recordr.*

Thus it will be seen that by the early part of 1673–74 the town was organized, had acquired full possession of the lands, and was ready under favorable auspices to begin a career of municipal prosperity. But unforeseen disasters befell the town. In 1675, within two years of its incorporation, it was entirely destroyed by the Indians in King Philip's War, its meeting-house and all its dwellings were burned, some of its leading men, among whom were John Ayres, Richard Coy, William and Samuel Prichard, and James Hovey, were killed and families were otherwise broken up by the murders of wives and children. The Quabaug Indians, with whom for ten years the settlers had lived in harmony, were under the sway of Philip, and among the most earnest in the relentless war he waged. It is not necessary in this narrative to recount the details of this war, as they may be found in a score of historical works to which readers have easy access, and may at almost any time and place refer.

With the death of Philip, on the 10th of August, 1676, the war ceased, and with the return of peace the Quabaugs left their old homes, and the scattered remnants of their tribe retreated westward beyond the Hudson River never to return.

So the young frontier town of Brookfield disappeared. Its twenty families, with all their remaining provisions, migrated to new homes; the meeting-house, in the erection of which, as the seal of their municipal union, they had taken special pride, and in

which John Younglove and Thomas Millet had preached to them the word of God, was burned, their fields were devastated and their houses in ashes, and for ten years the territory of Quabaug was a deserted waste. The memory of past disasters and the fear of their recurrence prevented during that long period its renewed occupation and settlement. So far as the incorporation of the town was concerned the privileges of a town were annulled by the following act of the General Court, passed May 28, 1679, and approved on the 9th of the following month:

At a General Court held at Boston May 28, 1679.

For the greater comfort and safety of all people who are intended to resettle the villages deserted in the late war or the planting any new Plantation within th is jurisdiction.

It is ordered and enacted by this Court and the authority thereof That no deserted town or new Plantation shall be inhabited until the people first make application unto the Governour and Council or to the County Court within whose jurisdiction such Plantation is. And the Council or County Court are hereby ordered and empowered to appoint an able and discreet committee (at the charge of the people intending to plant) which Committee are ordered and impowered to view and consider the place or places to be settled and give directions and orders in writing under their hands in what form way and manner such town shall be settled or erected, wherein they are required to have a principal respect to nearness and conveniency of habitation for security against enemies and more comfort for church communion & enjoyment of God's Worship and education of children in schools and civility with other good ends.

And all such planters are hereby injoined to attend and put in practice such orders and directions as shall be given by such committee upon the penalty of five hundred pounds fine to the country to be inflicted upon them by order of the Council or County Court for their neglect or refusal to attend this order.

Passed and Consented to. June 9, 1679.

J. DUDLEY.

In 1686, as has been already mentioned, the resettlement of Brookfield began, but only the family of John Ayres, of all the original settlers, returned. The new occupants of the land were chiefly from Marlborough, Springfield, Suffield and Hadley, while a few were from the more distant settlements of Essex County. The first effort in behalf of a reorganization is to be found in the following petition:

To the Hon^{bl} Simon Bradstreet Governor &c. The humble Petition and Request of James Ford of Brookfield.

"Whereas there was a Township formerly granted by the Hon^{bl} General Court at a place called by the Indians Quaboag & by the English Brookfield which was settled but by the Incursions and outrages of the Indians was depopulated and layd waste & and hath been so for many years: the Ancient Inhabitants wholly deserting the same and it being a place very commodious for scittuation in the Road to Springfield &c and may be beneficial and profitable as well to the Country as to particular persons; and whereas some are already seated and others would be willing to settle the said place againe were there some encouragement from the Hon^{l} Council and one to guide & order the prudential affaires for such a Plantation.

Yor Petitioner humbly requests your Hon^{rs} would be pleased to appoint and impower some prudent and able persons as a Committee to admit Inhabitants and order the affaires of the place in forming ye Toune granting Lotts & directing & ordering all matters of a prudential Nature till such time the Place be settled and a competent number of Inhabitants & persons of discretion to order the affaires thereof and your Petitioners as in duty bound shall even pray &c.

JAMES FORD.

In response to this petition, and doubtless others sent by the inhabitants, action was taken by the Council, which is stated in the records as follows:

November 9, 1686, Maj. John Pinchon, Joseph Hawley, Capt. Samuel Glover, Mr. Samuel Marshfield, Mr. Samuel Ely, & Mr. John Hitchcock all of Springfield, are appointed a Committee for settling the Town of Quabaag & the Petition of the said Town is granted and the aforenamed Gentlemen are to receive the claims of the sd Inhabitants, grant lotts to others & give necessary orders for the more orderly settlement of the said Toune.

Under the operations of this committee lands were allotted as required, and new settlers continued to come in until 1688, when new troubles arose with the Indians and the growth of the settlement was checked. Its inhabitants lived in constant fear of savage raids, and what was called Gilbert's Fort, which contained barracks for soldiers and refugees, served as a garrison to which those in the neighborhood might flee in case of an alarm.

In 1691, Mr. Marshall and Mr. Ely having died, Captain Partridge and Mr. Medad Pumroy were placed by the court on the town committee.

In 1693 an Indian raid was made on the houses of Joseph Woolcott, Thomas Lawrence and Joseph Mason, which stood at some distance from the fort, and Mr. Lawrence and Mr. Mason, with his son and the wife and two children of Mr. Woolcott, were killed. But notwithstanding the constant fear of Indian depredations, the town increased in numbers, and a determination was manifested to make the settlement, under any and all circumstances, a permanent and prosperous one. Indeed, not only was every effort made by the General Court to aid and encourage the outlying settlements, but direct and positive measures were taken to prevent their abandonment. On the 23d of March, 1699–1700, it was voted by the court

that no town or precinct being a frontier of the province which the towns hereafter named are to be accounted; that is to say Wells, York, Kittery, Amesbury, Haverhill, Dunstable, Chelmsford, Groton, Lancaster, Marlborough, Brookfield, Deerfield, Mendon and Woodstock; nor any of the towns following to wit Salisbury, Andover, Billerica, Hatfield, Hadley, Westfield and Northampton . . shall be broken up or voluntarily deserted without application first made by the inhabitants and allowance had & obtained from the Governor and Council in Court & Council for their drawing off if it appear to them that it may be of public advantage or that the place is not tenable. Nor shall any inhabitant of the frontier & other towns or precincts before named, or any of them having an estate of freehold in lands or tenements within the same at the time of any insurrection or breaking forth of any war, remove from them with intent to sojourne or inhabit elsewhere without special license first had and obtained as aforesaid.

In November, 1698, the inhabitants of Brookfield presented the following petition to the General Court:

The Petition of the Inhabitants of Brookfield to the Hon^{l} General Court assembled at Boston, Nov., 1698, Humbly Sheweth.

Firstly. That we seeme to be called of God to continue our habitation in this place; we are low in the world and it would be a breaking thing to our estates to remove to any other plantation, and the Land here is very capable of entertaining a considerable body of people; the inhabitants have been slow to come to us by reason of ye War, yet the land is very Incouraging, capable to afford a comfortable subsistence to many ffamilies.

2. That it is an Intolerable burden to continue as we have done without the preaching of the Word. God doth require his people to attend not only ffamily worship but His public worship; it is the ordinance of God that on the Sabbath Day there should be an holy convocation, and that his Word be preached by those that are able and faithful, and our necessitys put us upon it earnestly to desire it. Both we and our Children need the Instructions, rebukes and encouragements of the Word,

the darkness and deadness of our own hearts, together with the many snares that are in the world, are an experimental conviction to us that we need al those helps and advantages that God hath sanctifyed for our good.

3. That we are not able at present, to maintain the Worship of God. We are but twelve ffamilies, and we are not of estate sufficient to give suitable encouragement to a minister. We are willing to do to the outside of our ability, but tho' we do as much as can be expected from us, it will not amount to such a summ as a Minister may reasonably require for his labour.

4. That if this Hon^{d} Court would please to pity us and grant us some help for a few years for the maintenance of a godly, able Minister, besides the advantage it may be to these few familys that are here, it would be a means to draw many other Inhabitants to us, whereby we shall be so far assisted that we may, of ourselves, be able to uphold the Worship of God and not be burdensome to others.

Under these circumstances we humbly beg that this Hon^{d} Court would exercise compassion to us & arregne some reliefe to us out of the Publick Treasury, which we shal look upon not onely a testimony of your zeal for the worship of God, but alsoe of your tender compassion to the souls of those whom God hath made you ffathers of. And your Petitioners shall ever pray, &c.

Samuel Owen,	Thomas Barns,
Henry Gilbert,	Stephen Gennings,
John Woolcott,	James Pettee,
Saml. Davies,	Wm. Barns,
Thomas Parsons,	Thomas Rich,
Abijah Bartlett,	Danl. Price,
John Clary,	Joseph Marks.
John Pettee,	

In response to the above petition the court ordered that twenty pounds be paid out of the public treasury towards the support of an orthodox minister for one year. The payment of this sum was delayed until 1701, when Rev. George Phillips, a graduate at Harvard in the class of 1686, and son of Rev. Samuel Phillips, of Rowley, was engaged to preach one year, and the money was drawn from the Province Treasury.

In the same year the following petition was presented to the General Court:

To the Honbl. Wm. Stoughton, etc:

The humble petition of the Committee and Inhabitants of Brookfield sheweth,

Whereas, by the Providence of God by allowance from the General Court and our own necessites and inclinations we have and are now settled at Brookfield and altho' we are now but fewe in number, yet here is accommodations for a considerable Township; being new in our beginnings, and through the difficulties and hazzards of the times people tho' otherwise well inclined to come & settle here, yet have been slow in motion this way by reason whereof we labour under many difficulties at present—Therefore move to this Court that they would be pleased to grant us some allowances for oure encouragement & help as followeth:

First, that we may, in some measure, be in a capacity to obtain the benefit of an orthodox ministry of God's word (which we are in necessity of). That this Court would grant us such allowances towards the maintenance of such an one a year or two or three, which together with what we might do among ourselves, might incourage a minister to settle amgst us which would tend much to advantage both as to Ecclesiastical and Civil affairs.

Second, With reference to Publick charges amongst us, That this Court would order that all men that make good a claim of a proprietie within the bounds of our place might be engaged to bear their part in due proportion of all charges arising, and when notified of their Rate or proportion be obliged to pay on the place from time to time or quit their lands, etc.

Third, That this Court do settle and state the bounds of our Township, the centre to be the place where the first meeting-house stood and to extend six miles East, West, North and South, viz., twelve miles square extending from said centre as aforesaid.

These things we apprehend might be a means to promote the welfare of our place so as in time we might be beneficial to the publick interest of the Province and the granting of which will oblige your poor suppliants as in duty bound for your Honours ever to pray,

John Pynchon,
Saml. Partrigg,
John Hitchcock,
In the name of the Committee.

Henry Gilbert, Thomas Barns, Thomas Rich, Sam^{el} Davis, Steven Jennings, Abijah Bartlet, Sam^{el} Wheeler, Benj. Bartlett, Samuel Owen, Thom^{s} Parsons, Thomas Gilbert.

Brookfield, May 26, 1701.

As a result of this petition a plan was made of eight miles square, the quality of land stated and boundary lines described and the whole reported to the court in obedience to its order. In consequence of the loss of this plan another survey was made by Timothy Dwight in 1719 and the boundaries of the town were established by the court.

Shortly after the engagement of Rev. Mr. Phillips the coming on of what was called Queen Anne's War once more subjected Brookfield to the dangers of Indian warfare. In this state of things, upon a renewed application to the General Court for assistance, the sum of twenty pounds were allowed to be paid towards the support of a chaplain to the garrison in the town. No meeting-house had been erected since the first was burned in 1675, and it is probable that until the erection of the second house of worship in 1715 Sabbath services were held in the garrison. Rev. Joseph Smith, a son of Lieut. Philip Smith, of Hadley, and a graduate at Harvard in 1695, was appointed chaplain and was the second minister of the town since its reconstruction. Mr. Smith remained until 1705, and was afterward settled in Cohansey, New Jersey, and Middletown, Connecticut. During the whole of his ministry in Brookfield and for some years after the sum of twenty pounds was annually paid by order of the court for the support of the ministry.

In 1704 the condition of the town had again reached a low ebb. The war continued and though some new settlers came into the town, they for the most part were refugees from more exposed settlements, and brought little with them for the promotion of their own comfort or of the public good. This unhappy condition is well illustrated in the following petition:

Brookfield, Dec. 14, 1704.

To His Excelleency etc.:

We hues names are underwriten do humbly beage your Excelancy's favor and that you wod consider our weke condishone; the favor we beg is that we all ov us, not that such of us as find they are under such disadvantages that they cant subsist there, might remove into some other towne where they may worke fore there liveinge. by the deficulty of the times we are reduste to such pverty that we cant subsist except your onors will plese to grant us wages as soldiers & pay for our diat, for we raize little or none of our provision by rezen of our being draun so far frome our improvements of Lands. Our families are so large and our means are so small that we cant live without sume other imploye than any we have at present. And if the honoured Cort ceases to put us in as soldiers we will as we do account it our duti conform to the orders of authority—but we rather, if it may be granted, choose to remove into other towns, and we humbly intrete that the onors of the Corte would plese to grant us pay for our diat for the time we have served as soldears. No more at present, but we remain youars as followeth:

Henry Gilbert, Benjamin Bartlett,

JOHN WOOLCOTT,	JOHN GILBERT,
SAMLL. OWEN,	SAMLL. OWEN, JR.,
THOS. PARSONS,	HENRY TAYLOR,
SAMUEL DAVIS,	STEPH. JENNINGS,
PHILIP GOSS,	BENJ. JENNINGS,
EBENR. HAYWARD,	EDWARD WALKER,
THOMAS GILBERT,	JOSEPH BANISTER,
JOSEPH RICE,	JOHN HAYWARD,
JOSEPH MARKS,	JOHN HAMILTON,
JOHN CLARY,	JOSEPH JENNINGS.
THOMAS BARNS.	

This petition was probably acted on favorably by the court, as the records show that the muster-roll for wages and subsistence of soldiers posted at Brookfield and Springfield was increased from £271 9*s*. 1*d*. for the four months ending October 18, 1704, to £426 15*s*. 10*d*. for the three months ending January 31, 1705.

On the 24th of October, 1705, Rev. William Grosvenor was engaged to take the place of Mr. Smith and remained until August 25, 1708. Mr. Grosvenor was the son of John Grosvenor, who came from Chester County, in England, to Roxbury, and who was one of the settlers of Pomfret, Connecticut, who obtained a grant of land from the General Assembly in 1686 and an act of incorporation as a town in October, 1713. The son William graduated at Harvard in 1693. After the departure of Mr. Grosvenor, as far as can be learned, the people of Brookfield were without a minister until May 1, 1711, when Rev. John James was engaged and received, as his predecessor had done, a stipend of twenty pounds from the province. Mr. James remained at Brookfield until May 1, 1714, when he removed to Wethersfield, Conn., where he died August 10, 1729.

The year 1713 brought to a termination the Indian hostilities, which during nearly forty years had intimidated the inland towns of the province and checked their growth. The people of Brookfield almost for the first time since its original settlement could now without distraction and alarm turn their attention to the pursuits of peace. In that year, in consequence of the death of Joseph Hawley and John Hitchcock and the age and infirmity of Medad Pomroy, Samuel Porter, Ebenezer Pomroy and Luke Hitchcock were appointed on the town committee, which now consisted of these gentlemen and John Pynchon, Medad Pomroy and Samuel Partridge the surviving members. At a meeting of the committee held on the 4th of September, 1713, it was agreed that all grants of land should thereafter be upon the following conditions: 1st, that the grantees should work on the land within six months from the grant; 2d, that they should live on it within a year; 3d, that they shall live on it three years from the date of the grant, and 4th, that in case the grantees fail in any of the above conditions the grants should be void.

On the 1st of May, 1714, Rev. Mr. James terminated his ministry, and in the same year Rev. Daniel Elmer was engaged to preach. Mr. Elmer remained only six months and consequently received only ten pounds from the province treasury. He was a graduate at Yale in 1713, and after leaving Brookfield preached at Westborough, Mass., and at Fairfield, New Jersey.

On the 17th of September, 1714, it is recorded that the committee unanimously agreed

That the inhabitants build a meeting-house wherein to attend the worship of God, which shall be set up and erected in said place where formerly the meeting-house was built near old John Ayers' House Lott, lying near about the center of the Town; And the Committee here and do by these presents order that the Constable, together with Edward Walker, Sen., and Joseph Banister, take an exact list of the ratable estates, both real and personal, within the precincts of Brookfield, and cause a rate to be made for the payment of their minister and other charges.

On the 22d of November, 1715,

The inhabitants of Brookfield agreed by the consent of the committee to build a meeting-house wherein to carry on the worship of God; in the form and manner as followeth, viz.: 45 feet in length and 35 feet in width and to put in Galery pieces so that they may build galeries when they shall have occasion; and to carry on the building the said house as far as they can conveniently with their labour; and what shall be required in money for the carrying said work to be raised by a Town rate; and if any person or persons refuse to labour having suitable warning by the committee hereafter named shall pay their proportion in money. The inhabitants likewise agree to get the timber this winter. The committee chosen to oversee and take care for the carrying on of said work are Thomas Barns, Henry Gilbert, Lieut. Philip Goss, Ens. Thomas Gilbert Joseph Banister, Edward Walker, Joseph Jennings, John Woolcott, Wm. Old. Then ordered that a rate of 150 pounds be made towards building the meeting-house.

On the same day that the above vote was passed, Rev. Thomas Cheney was engaged to preach. On the 16th of October, 1716, the church was organized and he was ordained. On that occasion the new meeting-house was for the first time used. The inhabitants voted to give him fifty-two pounds annually for three years and to raise the salary forty shillings a year until it reached seventy pounds. He was to have also all the land which the committee proposed to give him, to have a house and barn built for him suited to his wishes, he finding the glass, nails and iron, to have twenty-five cords of wood annually during his life, and one day's labor annually from each man. He was also to have eight acres of land fenced and made fit for sowing, four of which were to be on the hill. At his ordination Rev. Solomon Stoddard, of Northampton, preached the sermon, and the following covenant was subscribed:

You do now, in the presence of the great and holy God, the elect Angels and this assembly of witnesses, enter into a solemn and perpetual covenant, never to be forgotten, never to be broken.

You sincerely and cordially give up yourself to that God whose name alone is Jehovah; taking God the Father to be your God and Father, God the Son to be your only Saviour and Redeemer, God the Holy Ghost to be your sanctifier and comforter.

You submit yourself to Christ and accept him as the Prophet Priest and King of your soul the Great Head of the Church, and the only Mediator of the covenant of grace; promising that by the assistance of the Holy Spirit you will keep the covenant of the Lord inviolably; that you will cleave to the Lord Jesus Christ by faith and Gospel obedience; and will endeavor to reform your life as to all known sin whether open or secret—will live in the conscientious discharge of all duty towards God and man—walking in all the commandments and ordinances of the Lord blamelessly; that you will endeavor that the inward temper of your mind be conformed to God's will and word; and that you will follow the excellent example which Christ has set you for the rule of your life.

You also give up yourself to this Church in the Lord; and freely cove-

nant and bind yourself to walk as a regular member of Christ's Church; to obey them that have rule over you in the Lord; to read God's word, and to live in the practice of social and secret prayer and in diligent attendance on the word preached and ordinances administered;—relying on the grace and all-sufficiency of Christ, which are sufficient for you—you promise to walk according to what you now know, or shall know, to be your duty.

Do you sincerely and cordially consent to the covenant now proposed?

We then receive you as a sincere disciple of Christ and a member of the same church with ourselves—promising so long as God shall continue you among us, to watch over you with meekness and brotherly love;—and may the Lord add to the numbers and graces of his church, and finally bring us all to join the general assembly and Church of the First-born, whose names are written in heaven. Amen.

So far as the church is concerned this may be considered to have been its birth. Though religious services had been held for many years and ministers employed, there was no formal church organization until the date above mentioned, October 16, 1717. The meeting-house, though occupied, was not completely finished for several years, but the church was fairly launched, and afterwards, with few interruptions, successfully maintained. The salary of the minister was paid by a rate or tax, which included also the current expenses connected with the erection of the meeting-house. This rate was made on the 22d of April, 1717, and amounted to £121 3*s.* 8*d.* The names of the persons taxed with the amounts of their tax are included in the following list of land-owners who had received grants from the town committee from the date of the earliest grants down to 1768, which was the last year in which the affairs of the town were managed by the committee:

CHAPTER LXXIX.

BROOKFIELD.—(*Continued.*)

Up to the year 1718 the town of Brookfield through all the vicissitudes of its life can hardly be said to have enjoyed full municipal privileges. To a certain extent it had been under the guardianship of the committee appointed first by the Massachusetts Colony Court and after the charter of the Province of Massachusetts Bay in 1692 by the government of that province. This committee had always been composed of trustworthy men, and there seems to be no record of any serious dissatisfaction on the part of the people with their administration. In the above year the committee then in commission asked to be discharged from the further performance of their duties in the following petition:

To His Excellency, Samuel Shute, Esq., and the Honbl. Council and House of Representatives, convened in General Court the 28th of May, 1718.

We undersigned, the Committee for Brookfield, after many Disappointments by warr and otherwise, which for a long time the people have laboured under, by the good providence of God are now so increased that they are now near fifty families on the place have near finished a very convenient meeting-house, have settled a church and ordained an orthodox and learned Minister. We humbly propose that they be made a Township according to the directions of the Law by themselves & said Committee released—which we submit to the Courts' determination. And for your Excellency and Honor's shall ever pray.

SAMUEL PARTRIDGE, } *Committee*
SAMUEL PORTER, } *for*
LUKE HITCHCOCK, } *Brookfield.*

This petition was granted and the following order was passed by the House of Representatives, November 12, 1718, and after concurrence by the Council, was consented to by Governor Shute:

Ordered that the prayer's of this petition be granted, and that the Inhabitants of the Town of Brookfield be invested with all the powers, privileges and authorities to direct, order and manage all the affairs of said Township that other towns are or ought to be invested with. And that the Committee be dismist from the care of them with the thanks of this Court for their good and faithful service. The said Town to lye to the County of Hampshire.

The first town meeting was held on the 15th of December, 1718, at which Philip Goss acted as moderator and Thomas Gilbert was chosen treasurer and clerk. At an adjourned meeting at which Thomas Baker acted as moderator, Thomas Barns, Philip Goss, Elisha Rice, Samuel Barns and Thomas Gilbert were chosen assessors; Tilly Merrick, Joseph Brabrook and Thomas Parsons a committee to examine town debts; Joseph Jennings and Joseph Banister measurers, and Elisha Rice, Thomas Gibbs and Jonathan Jennings a committee "to see that the grants made by the former committee do pay equal proportion to the rate committed to Constable Walker to collect for the meeting-house." At this meeting it was voted that Tilly Merrick, Henry Gilbert, Edward Walker and Joseph Jennings be a committee to see that the town is supplied by the grist-mill with meal according to an arrangement which had been made with John Hayward. The grist-mill here referred to was built on land granted to Mr. Hayward about the year 1706. The grant included "forty acres of upland in the west part of the town, and fifteen acres of meadows; also seventy acres joining the first lot and twenty-four acres of meadows for his encouragement to build a grist-mill in Brookfield, and on condition that he maintain the same in such repair as the town may be supplied at all times with grinding from said mill for the term of twenty-five years." The mill was built on the New Mill Brook, and according to Mr. Temple, the remains of its dam may be seen near the home of Mr. Sexton Douglass.

The first year after what might be called the second birth of the town, was characterized by a movement to establish public schools. On the 5th of January, 1719–20, the town granted forty acres of land for a school, and it is probable that a school was opened near that time. On the 23d of January, 1728, it was voted that a school be built in four several places in town, the town to be divided into four parts by a committee, consisting of Wm. Old, Ephraim Hayward, Wm. Ayres, Samuel Barns and John Hinds, and twenty pounds were appropriated for the salary of a school-master. On the 15th of May, 1732, it was voted to direct the selectmen to hire four women to keep school, and the sum of fifty pounds was appropriated. On the 23d of November, 1739, it was voted to have two school-masters, and the sum of one hundred pounds was appropriated. In 1746 the town granted one hundred and fifty pounds, old tenor, for the support of a grammar school, and in 1749, three hundred pounds, of the same tenor. But it is not necessary to follow the evolution of the school system of the town, and state the various steps by which its present condition has been reached. It was voted by the town after the three precincts were formed, that each precinct should have the care of its schools, and from that time each precinct raised its own school money, selected teachers, and had the general management of education within its borders. There are at present in the town fifteen schools, including the high school. These are the high school, a grammar, first intermediate, second intermediate, first primary and second primary, in the centre village, a grammar, intermediate, first primary and second primary, in the east village, the Potopoag, Rice Corner, Upper Podunk, Lower Podunk and the school over the river, with enrollments numbering six hundred and thirty-eight and average membership of five hundred and thirteen.

Little of interest occurred in the life of the town until 1744. There had been occasional alarms on account of Indian raids, and at various times companies of men had been raised to serve as scouts, and proper safeguards had been adopted. Brookfield was now scarcely enumerated among the border towns, and its people lived to a certain extent behind the shield and shelter which newer towns farther to the west and north had raised to protect them. Sheffield had been incorporated in 1733, Stockbridge, in 1739, Deerfield in 1682, Northfield in 1713, Saunderland in 1714, Brimfield in 1731, Westfield in 1669, Hatfield in 1670 and Sturbridge in 1738. But, nevertheless, occasional Indian attacks served to keep them on the watch, and to more or less obstruct and delay that development of business and trade which the older and better guarded settlements on the seaboard enjoyed.

With the settlement of new towns a new adjustment of counties became necessary. Middlesex and Suffolk counties, incorporated in 1643, had become with the incorporation of new towns disproportionately large, and an exigency seemed to exist for the formation of a new county. In the adjustment which ensued the town of Brookfield was involved. On the 2d of April, 1731, an Act was framed incorporating Worcester County, which included Worcester, Lancaster, Westborough, Shrewsbury, Southborough, Leicester, Rutland and Lunenburgh, which had previously been

included in Middlesex county, Mendon, Woodstock, Oxford, Sutton and Uxbridge, which had before been included in Suffolk county, and Brookfield, which as has already been stated, had previously been included in Hampshire county.

In March, 1744, war was declared between England and France, and what has always been known in our history as the old French and Indian War, followed until the treaty of Aix la Chapelle, in October, 1748. In this war several Brookfield men took a prominent part. Joseph Dwight commanded a regiment in the expedition against Louisburg; Jabez Olmstead commanded a company in the same expedition, and the following soldiers entered into the service of the province:

Jonathan Clary, drummer,
Benjamin Gilbert, ensign,
Eleazer Haywood,
Edward Smith,
Thomas Buckminster, captain,
Joseph Allen, lieutenant,
Noah Ashley, ensign,
Benj. Ruggles, sergeant,
Ephraim Hayward, sergeant,
Gershom Makepeace, clerk,
Edward Walker, corporal,
Simeon Dwight, "
John Wait, "

Sentinels.

James Converse,
Andrew Cowee,
Obadiah Cooley,
John Bell,
Joseph Banister,
Uriah Bush,
John Blair,
Thomas Banister,
Samuel Bascom,
Peter Blackmer,
Elijah Bartlett,
Jude Converse,
Gideon Cooley,
Thomas Gilbert,
William Dady,
Samuel Hinckley,
John Hamilton,
Moses Hascall,
Hopestill Hinds,
Nehemiah Hinds,
Jacob Hinds,
Samuel Galloon,
Dudley Jordan,
Solomon Keyes, Jr.,
Richard Marks,
Silas Newton,
Phinehas Powers,
Thomas Rich,
Solomon Rich,
Nathan Smith,
William Shepherd,
John Steward,
Simeon Dwight,
Phinehas Warner,
Henry White,
Isaac White,
Joseph Warner,
James Patterson.

In the second French and Indian War, extending from 1754 to 1763, Brookfield also performed her full share in furnishing men. Her soldiers in this war, without specifying the commands to which they were attached or the special service in which they were engaged, were:

Martin How,
Arthur Tucker,
John Tute,
William Hair,
Wm. Brabrook,
Caleb Dodge,
Ephraim Hayward,
Levi Hamilton,
Seth Hamilton,
Joseph Waite,
Thomas Waite,
Nathaniel Woolcott, corporal,
David Hinckley,
Jonathan Waite,
Jedathun Baldwin captain,
Wm. Dorothy,
Comfort Barns,
Thomas Barns, corporal,
Joseph Gilbert,
John Green,
Thomas Stevens,
Joseph Rutland,
Daniel Walker,
Benjamin Wood,
Corlis Hinds,
Jedediah How,
Simeon Walker,
Levi Walker,
Sylvanus Walker,
Joseph Witt,
Josiah Wood,
Jonathan Gilbert, sergeant,
Oliver Woolcott, corporal,
Silas Walker, corporal,
Joel Abbott,
Onesiphorus Ayres,
Stephen Blackmer,
Simeon Brooks,
John Davis,
Oliver Evans,
David Gilbert,
Ebenezer Hayward,
Eleazer Warner,
Joseph Hamilton, sergeant,
Abraham Adams,
Nathan Hamilton,
John McClure,
Phinehas Slayton,
Solomon Rood,
Jacob Wood,
Peter Harwood, ensign,
Wm. Blackmer,
Daniel Ainsworth,
Joseph Barr,
Adoniram Bartlett,
Daniel Beman,
Samuel Bliss,
Thomas Cheney,
Henry Chadwick,
James Clark,
Robert Clark,
Josiah Cutler,
Robert Cutler,
Samuel Dorothy,
Josiah Farrell,
Ebenezer Foster, Jr.,
Wm. Gallaway,
David Mitchell,
Nathan Gould,
Jason Hinds,
Abraham How, Jr.,
Amos Marsh,
Joshua Morris,
Joseph Old,
Wm. Ranger,
Isaac Rice,
John Rice,
Daniel Walker,
Benj. Gott, surgeon's mate,
Comfort Brabrook,
Nathan Thompson,
Samuel Barns,
Uriah Gilbert,
Joseph Walker,
Thomas Riggs,
Breed Batcheller,
Jedediah Deland,
Jonathan Dodge,
Walter Dorothy,
John Goldsbury,
Abraham Hair,
Wm. Ranger,
John Woolcott,
Gideon Abbott,
Thomas Weeks,
Wm. Ayres, Jr.,
Edward Ayres,
Eliphalet Hamilton,
John Adams,
Ebenezer Davis,
Solomon Flagg,
Abner Old,
Caleb How,
Joseph Hatfield,
Philip Reed,
Henry White,
John Williams,
Ezekiel Woodbury,
Samuel Church,
Philip Gilbert,
Obadiah Cooley, captain,
Moses Barns, clerk,
Cornelius White, sergeant,
Moses Jennings, corporal,
Asa Bacon,
Christopher Banister,
Moses Bragg,
Jabez Crosby,
John Goss,
Joseph Gilbert,
Peter Hill,
Caleb How,
Ebenezer Killen,
Adoniram Walker,
Joseph Walker,
Jeremiah Woodbury,
John Walker,
John Gibson,
Wm. Virgin,
David Palmer,
David Gilbert, Jr.,
Jedediah Gilbert,
Obadiah Wright,
Daniel Gilbert,
Philip Goss,
Robert Claflin, Jr.,
Thomas Cook,
Joseph Stone, lieutenant,
Daniel Matthews, corporal,
Nath[l]. Paige, corporal,
Philip Deland, drummer,
Jabez Ayres,
Joseph Banister,
Matthew Bartlett,
Obadiah Deland,
Josiah Dodge,
Samuel Gould,
John Ranger,
John Rich,
Thomas Slayton,
Nathan Smith,
Elijah Temple,
Reuben Walker,
Wm. Wright,
Peter Harwood,
Joseph Perry,
Amos Tate,
Asa Lamson,
Joseph Barns,
Solomon Gilbert,
Eliakim Spooner,
James Thompson.

Besides the above, the following muster-rolls are on record of men enlisting in 1757 for various terms of service, many of whom had before enlisted:

Captain Nathaniel Woolcott's Cmpany:

Abraham How, lieutenant.
Benjamin Adams, ensign.
Thomas Taylor, ensign.
Aaron Bartlett, corporal.
Wm. Watson, corporal.
Wm. Ayers, corporal.
Daniel Gilbert, corporal.
Moses Ayres.
Onesiph Ayres.
Wm. Ayres (3d).
John Baker.
Jeremiah Gould.
Nathan Gould.
Samuel Gould, Jr.
John Hair.
Timothy Hall.
Joseph Hatfield, Jr.
Oliver Hayward.
Corlis Hinds.
Caleb How.
Ephraim How.
Abram How.

Jacob Ball.
Thomas Ball.
Aaron Barns.
Adoniram Bartlett.
Zacariah Brown.
Joseph Bartlett.
Matthew Bartlett.
Nathaniel Bartlett.
Samuel Chapman.
Benjamin Cooley.
Nahum Eager.
Solomon Flagg.
John Goodale.
Joseph Gilbert.
Jedediah How, Jr.
Silas How.
Nathl. Jones.
Asa Lamson.
John Lamson.
Daniel Mathews.
Daniel Patten.
Joseph Stone.
Arthur Tucker.
Daniel Witt.
John Woolcott.
Oliver Woolcott.
Wm. Wright.

Captain Jabez Upham's Company:

Obadiah Cooley, lieutenant.
John White, lieutenant.
Benj. Walker, ensign.
Ebenezer Jennings, sergeant.
Nathan Hamilton, sergeant.
Wm. Old, sergeant.
Benj. Rice, sergeant.
James Brigham, corporal.
Josiah Hobbs, corporal.
Ezekiel Old, corporal.
Philip Deland, corporal.
Gideon Abbott.
Abraham Adams,
Abraham Adams, Jr.
David Aiken.
Joseph Banister.
Seth Banister.
John Belenger.
Moses Bragg.
David Bridge.
Uriah Bush.
James Converse.
Jabez Crosby.
Ebenezer Davis.
Daniel Deland.
Obadiah Deland.
Thomas Dodge.
John Green.
Stephen Green.
Amos Hamilton, Jr.
Josiah Hamilton.
Eliphalet Hamilton.
John Hamilton.
Ezra Hamilton.
Thomas Hamilton.
Wm. Henshaw.
Eben Hayward, Jr.
Samuel Hinckley.
John Jennings.
Moses Jennings.
Benj. Jennings.
David McClure.
John McClure.
Comfort Old.
Reuben Old.
Asa Partridge.
Asahel Peters.
Daniel Rolf.
John Ranger.
Ephraim Rice.
Jonas Rice.
Oliver Rice.
Solomon Rice.
Samuel Rogers.
Phinehas Slayton.
Thomas Slayton.
Josiah Stephens.
Roger Stephens.
John Waite, Jr,
Abraham Walker.
Adoniram Walker.
Joseph Walker.
Edward Walker.
Phinehas Walker.
Reuben Walker.
Daniel Walker.
John Woolcott.
Ithamar Wright.
Obadiah Wright.
Richard Vorci.

In Captain Jacob Abbott's Company:

Thomas Gilbert, lieutenant.
Abner Brown, ensign.
Jonathan Abbott, clerk.
Joseph Wood, sergeant.
Robert Claflin.
Uriah Abbott.
Caleb Dodge.
Josiah Dodge.
Walter Dorothy.
Abner Gilbert.
John Gilbert.
Othniel Gilbert.
Philip Gilbert.
Seth Gilbert.
John Goss.
Peter Hill.
Joseph Loring.
Abraham Martin.
Stephen Martin.
David Palmer.
John Peso.
John Phipps.
Wm. Ranger.
Moses Rich.
Philip Rich.
Thomas Rich.
James Rooff.
Charles Rice.
Wm. Tuffs.
John Watt.
Samuel White.
Jeremiah Woodbury.

In Captain William Paige's Hardwick Company:

Silas Walker, sergeant.
Gideon Walker, sergeant.
Caleb Dodge, sergeant.
Joel Abbott, corporal.
Wm. Ranger, corporal.
Rufus Putnam, corporal.
Josiah Dodge.
Charles Dorothy.
Josiah Gibbs,
Thomas Gilbert (3d).
Amos Hamilton.
Nathan Hamilton.
Breed Batcheller, drummer.
Gideon Abbott.
Jacob Ainsworth.
Asa Bacon.
Nathan Barns.
Wm. Batcheller.
Zeph Batcheller.
Thomas Brown.
Samuel Chapman.
Robert Chaplin, Jr.
Jedediah Deland.
Daniel Deland.
Jonathan Dodge.
Wm. Henderson,
Elisha How.
Asa Lamson.
Thomas McClure.
Abner Old.
David Patrick.
Thomas Ranger.
Asahel Rogers.
Roger Stevens.
Wm. Tuffs.
Isaac Walker.
Jacob Walker.
Samuel White.

In Capt. Sylvanus Walker's Company, 1758

Eliphalet Hamilton, lieut.
Daniel Walker, ens.
Thomas Riggs, sergt.
Reuben Old, sergt.
Christ: Banister, sergt.
Obed Abbott, corp.
David Gilbert, corp.
James McClure, corp.
Ebenezer Davis,
Abner Gilbert,
Nathan Goodale,
Erastus Hamilton,
Job Lane.
Cyrus Rich,
Moses Rich,
Daniel Rolfe,
David Slayton,
Gad Smith,
Reuben Stevens,
Arthur Tucker,
Benj. Walker, Jr.
Oliver Walker,
Zebulon Walker,
Henry Wisdom,
Isaac Wood.

In Capt. David McFarland's Worcester Company, 1758.

Jonathan Dodge, sergt.
Ebenezer Heyward, corp.
Charles Dorothy,
Abraham Gilbert,
Nathan Hamilton,
Cornelius Hinds,
Stephen Jennings,
Abner Old,
Samuel Robinson,
Daniel Rolfe,
Jonathan Streeter,
Samuel Streeter,
Josiah White,
Jacob Wood.

In Capt. Wm. Paige's Hardwick Company, 1760.

Daniel Walker, lieut.
Zeph Batcheller, sergt.
Obadiah Wright, sergt.
Ebenezer Davis, sergt.
Nathan Abbott,
Jonathan Barns,
Nathan Barns,
Wm. Batcheller,
Comfort Gilbert,
Ezekiel Gilbert,
John Goodale,
Nathan Goodale,
Solomon Goodale,
Caleb Green,
Elijah How,
John McFarland,
Asa Partridge,
Asahel Rogers,
Ezra Rood,
Gad Smith,
Aaron Tute,
Nathan Tyler,
Zebulon Walker,
Thomas Weeks,
John Woolcott.

There were others enlisting in various companies in 1758 and afterwards, many of whose names are included in the above lists, in connection with an earlier service. These were Rev. Eli Forbes, chaplain in the Crown Point expedition, Francis Stone, David Getchell, Stephen Ayres, Ephraim Ayres, Solomon Cummings, Daniel Dodge, Chas. Dorothy, Jacob Getchell, Henry Gilbert, Jesse Gilbert, Moses Gilbert, Jonas Hayward, William Mace, Samuel Palmer, Daniel Rolfe, Caleb Thayer, Nathaniel Wait, Richard Wait, Solomon Walker, Zebulon Walker, Samuel Whiston, Samuel White, John Fletcher, Beamsley Pottle, David Pratt, Job Smith, Lemuel Smith, Jesse Vose, John Whetstone, Asa Humphreys, James Wesson.

But we must return to the narration of some events which occurred just before and during these wars. The growth of the town up to the year 1741 may be estimated to have been considerable, from the fact

that in that year sundry inhabitants in the southwest part of the town joined with inhabitants in parts of Brimfield and of a district then called Kingsfield, but afterwards, in 1752, incorporated as the town of Palmer, and petitioned the General Court to be set off and incorporated as the town of Western, now Warren. The act of incorporation obtained by them, passed January 16, 1741, provided that the new town should consist of lands bounded as follows:

Beginning at Brookfield, southwest corner, then running half a mile north on said Brookfield line; then west thirty-four degrees, north three miles and eighty rods to the river and bounded with a small walnut staddle standing in the split of a rock; thence running up the river to an elm tree marked; thence crossing the river and running north forty-four degrees east about three miles and an half to Brookfield west line to a heap of stones near a chestnut tree marked; and running east eleven degrees and thirty minutes; south one mile and an hundred and fifty rods, to a heap of stones on a rock at the end of a meadow on mill pond, then bounded on Cornelius White's land, till it comes to Mill Brook, so called; then bounded with the Mill Brook to the river, as the brook runs; then crossing the river and extending southeasterly to a white oak tree, known by the name of the northeast corner of the mile square; thence extending southeasterly to Brookfield south line, intersecting that line two miles and three-quarters from said first mentioned southwest corner bounds.

On the 11th of December, 1747, Rev. Thomas Cheney, the first settled pastor of the church, died. Mr. Cheney was born in Roxbury, January 29, 1688–89, and was the son of William and Rebecca (Newell) Cheney. He graduated at Harvard College in 1711, and married two wives,—the first Dorothy, daughter of Joseph Hawley, of Northampton; and second, Mary, great-granddaughter of Rev. John Cotton, of Boston. The death of Mr. Cheney and the loss of a portion of the southwestern section of the town, changing its geographical centre, stimulated a movement for the formation of a second precinct in the northerly part of the township.

Ebenezer Witt and others petitioned the town in that year to build a new meeting-house as near the new centre as possible, or set them off as a distinct precinct. At the annual meeting in March the town refused to grant the petition, and voted down both propositions, concerning the meeting-house and the precinct.

In the mean time, Rev. Elisha Harding, a graduate of Harvard in 1745, was invited to settle, and on the 28th of November, 1748, the town concurred with the church in the invitation, and at an adjourned meeting, on the 22d of December, voted, after considerable debate, as the record states, one thousand pounds, old tenor currency, "for his encouragement to settle in the Gospel ministry," and for his annual salary the sum of five hundred pounds, old tenor, "accounting it as though it be in Indian corn, at twenty shillings a bushel; Rye, thirty shillings; Wheat, forty shillings —and so the five hundred pounds to be increased or diminished yearly, as the prices of the grain varied." He was also to have free liberty to cut wood for fuel on the common land of the town, known by the name of the Rocks.

In estimating these amounts, it must be remembered that what was called old tenor currency was in value only one-tenth of sterling—that is, that one thousand pounds of old tenor was really only one hundred pounds in sterling.

Mr. Harding was ordained September 13, 1749, on which occasion Rev. Nathan Buckman preached the sermon. After the settlement of Mr. Harding, the dissatisfaction of the people in the north part of the town continued, and on the 29th of March, 1750, the second or north precinct was incorporated. Previous to that date, the town having signified that the formation of the precinct would be assented to in case fifty or more persons signed a request therefor, in less than ten days after such a condition was agreed upon more than the requisite number of signatures had been obtained, and thus, with the assurance that no further objection would be raised, a meeting-house was begun in April, 1749.

On the 16th of the following October a covenant was signed by forty-two of the inhabitants, and some dissatisfaction having manifested itself with the location of the meeting-house, then still unfinished, it was agreed to submit the location to the arbitration of disinterested men. The location, as originally selected, was approved and the building by slow degrees went on to its completion.

The incorporation of the second precinct was granted by the General Court in response to a petition signed by Thomas Hale and fifty-six others, reciting the grievances under which the inhabitants of the north part of the town labored and the advantages of a separate precinct. The order of the court, passed by the House of Representatives March 28, 1750, passed in concurrence by the Council March 29 and consented to by Spencer Phipps, Governor, was "that the prayer of the petition be so far granted as that the petitioners, with their families and estates, together with such persons and their estates who shall, within three months from this time, signify their desire therefor under their hands to the clerk of the town of Brookfield, be and they hereby are set off a distinct Parish, and are endowed with all the privileges and subjected to all the duties which the other inhabitants of Parishes are by the laws of this Province endowed with or subjected to—Provided, their possessions do not exceed one-third part of the said town of Brookfield for quantity and quality."

On the 21st of May, 1750, a meeting of the precinct was held at the house of Jabez Ayres, in accordance with a warrant issued by John Chandler, Jr., Esq., at which William Ayres acted as Moderator. At this meeting the following officers were chosen: Wm. Ayres, Precinct Clerk; Wm. Ayres, Ebenezer Witt, Samuel Gould, Noah Harris and Benjamin Adams, Precinct Committee; Joseph Stone, Collector, and Wm. Ayres, Samuel Gould, Wm. Witt, Jason Bigelow and Moses Ayres, Assessors. On the 21st of September, 1750, it was voted by the precinct to raise by assessment on the polls and estates £13,

6*s*. 8*d*. to supply the precinct with preaching, and in 1751 forty pounds were raised for the same purpose. In 1752 Rev. Eli Forbes was invited te settle with the sum of one hundred and twenty pounds as a settlement, and £53. 6*s*. 8*d* as an annual salary. The final salary agreed on was after 1767 to be £66. 13*s*. 4*d*, and thirty cords of wood a year. The church was organized May 28, 1752, and on June 3d, Mr. Forbes was ordained.

The covenant was signed by twenty-six males and twenty-two females, as follows: Eli Forbes, John Watson, Jabez Ayres, Ebenezer Witt, Noah Barns, John Cutler, Benjamin Adams, Abram How, Ammiel Weeks, Ichabod How, Abner Taylor, Thomas Hale, Uriah Gilbert, Joseph Stone, Moses Ayres, Charles Adams, Moses Barnes, Jason Biglow, Nathan Stevens, Thomas Taylor, Ephraim Cutler, Daniel Newell, Jonathan Gilbert, Aaron Barns, Isaac Cutler, John Witt, Esther Watson, Mary Tucker, Martha How, Sarah Stone, Abigail Cutler, Rebecca Witt, Mary Witt, Abigail Gilbert, Hannah Barns, Rebecca Ayres, Esther Gilbert, Elizabeth Gilbert, Miriam Newell, Sarah Ayres, Rebecca Adams, Persis Adams, Naomi Taylor, Annah Barns, Phebe How, Mary Hale, Mary Stevens, Hannah Bartlett.

The ministry of Mr. Forbes continued until March 1, 1775, and June 5, 1776, he was installed over the first church in Gloucester, where he died December 15, 1804. His dismission, given at his own urgent request, was the result of indignities shown him in consequence of his suspected disloyalty. It is undoubtedly true that he was not by nature an enthusiast and did not enter into the revolutionary spirit with extreme ardor, but his immediate settlement and satisfactory ministry in Gloucester precludes the belief that he entertained other than patriotic sentiments during his residence in Brookfield. Mr. Forbes entered Harvard College in 1744 and during his freshman year enlisted in the Provincial army during the first French and Indian War. After his discharge he returned to college and graduated in 1751 in the class with Judge William Cushing, Rev. Mather Byles and Rev. John Willard, receiving the degree of S. T. D. from his Alma Mater in 1804, the year of his death.

On the 23d of May, 1776, a call was given to the Rev. Joseph Appleton, of Ipswich, a graduate at Brown University in 1772, to succeed Mr. Forbes in the ministry, with the offer of one hundred and thirty-three pounds, sixteen shillings and eight pence as a settlement, and of seventy pounds as an annual salary for two years and eighty pounds afterward. Mr. Appleton was ordained October 3, 1776, and died in his pastorate July 25, 1794.

Rev. Thomas Snell succeeded Mr. Appleton and was ordained June 27, 1798, and continued in his pastorate until his death, May 4, 1862, with a salary never exceeding five hundred dollars a year. He was born in Cummington November 21, 1774, and graduated at Dartmouth College in 1795. Until September 21, 1851, for fifty-three years he was the sole pastor and senior pastor, with a colleague from that date until his death closed a ministry of sixty-four years. At this point the sketch of the Second Precinct will be closed in this narrative. as that precinct was incorporated as the town of North Brookfield in 1812 and will be found further referred to in the history of that town in another part of this County History.

After the incorporation of the Second Precinct a movement was initiated in the First Precinct to build a new meeting-house. The question of location became a serious one and three localities were proposed —the site of the old house on the hill, the plain and Mr. Seth Banister's lawn. The plain was in what is now West Brookfield, Mr. Banister's lawn was in what is now Brookfield and the hill was between the two. The people of the west village, though preferring the plain, were willing to compromise on the old site on the hill but the people of the south village would consent to nothing but the lawn within their own special territory. The people of the south part formed a majority of the First Parish and at a meeting held November 20, 1753, it was voted to build a meeting house on the height near Seth Banister's house. On the 4th of December Jedediah Foster, Abner Brown, John Goss and forty others living in the west part asked to have the parish divided into two, equal as to quantity and quality of lands and number of inhabitants. The majority objected to the terms and conditions of the petition, but were willing that the petitioners themselves might be set off as another parish. In the meantime the erection of the meeting-house went on and the petitioners in the west part applied to the General Court for an injunction. Without, however, going further into the details of the controversy it is sufficient to state that on the 8th of November, 1754, an act was passed by the General Court incorporating a third precinct and making an addition to the Second Precinct, which was incorporated in March, 1750. The following is the text of the Act:

WHEREAS, it is made evident to this court that the annexing some of the inhabitants of the first precinct in the town of Brookfield, with their lands, to the second precinct in said town, and the dividing the remainder of said first precinct into two precincts would serve very much to remove many difficulties and inconveniencies which divers of the inhabitants of said first precinct at present labour under, and also very much to accommodate the greatest part of the inhabitants of said first precinct,—

Be it enacted by the Governor, Council and House of Representatives,

SECT. 1. That all the lands in the present first precinct in said town, lying northward of a line beginning at the northeast corner of George Harrington's lands, upon Spencer line, and running westward by his, the said George's lands, to Five Mile River Bridge at the country road; from thence westerly on the most southerly parts and lines of the lands of Thomas Slayton, Captain Nathaniel Woolcet, Thomas Moor, Ebenezer Jennings, John Jennings, Obadiah Rice, Wm. Parks, Josiah Converse, Francis Dodge, Paul Deland, the heirs of John Green, deceased, Stephen Green and Joseph Ranger, Jun.; and from said Ranger's southwest corner to the southwest corner of Wm. Ayres' meadow, on Coy's Brook, so-called, near the place where the old school-house stood; and from thence northward on the most eastward parts and lines of the

lands of John Tuff and Josiah Gilbert, and on the most westward parts and lines of the land of Jeremiah Woodbury and John Hill to Abner Tyler's land; and from thence on the most eastward part and lines of the lands of Jacob Abbot and Joshua Dodge and Joshua Dodge, Jun., to the center line of said town; and from thence all the lands eastward of that part of said center line, which is northward of the place where the above described line meets with the said center line to New Braintree District be and hereby are annexed to the second precinct in said town of Brookfield; and that all those persons that now are or hereafter may be inhabitants on said lands, be and hereby are incorporated with the second precinct, and shall be always hereafter obliged to do all precinct duties, and shall receive all precinct privileges in the said second precinct.

And be it further enacted,

SECT. 2. That the remainder of the lands in the said first precinct in said town of Brookfield be divided into two precincts in manner following, viz.: the dividing line shall begin at the southeast corner of Paul Deland's land, and shall run from thence to the country road in said Brookfield, so as to take in and include all John Rich's land where he dwells, into the West Precinct or division; and from said country road said dividing line shall run in the midst of the town road that leads southward from said country road to the river called Quabaug River, to the southeast corner of Ephraim Bartlet's land; and from thence westward, southward of all Ephraim Bartlet's and Obadiah Wright's land, to Quaboag River; and from thence the said river shall be the dividing line down said river to the mouth of Salmon Brook; and from thence the dividing line shall run straight to a large white oak tree standing in the northeast corner of a tract of land called the Mile Square; said tree being a boundary between the townships of Brookfield and Western; and that the lands lying in the said town of Brookfield (and not included in the second precinct) westward of the above dividing line be and hereby are made a precinct by the name of the First Precinct in the Town of Brookfield; and that the inhabitants of said land westward of the said dividing line above described be and hereby are invested with all the powers and privileges and subjected to all the duties that precincts in this province by law are invested with and subjected to; and that the lands lying in the said town of Brookfield (and not included in the second precinct), eastward of the above dividing line be and hereby are made a separate precinct by the name of the Third Precinct in the Town of Brookfield; and that the inhabitants of the said lands eastward of the said dividing line above described be and hereby are invested with all the powers and privileges and subjected to all the duties that precincts in this province by law are invested with and subjected to, and be it further enacted,

SECT. 3. That all the inhabitants of the lands which by this act are made the first precinct and all the inhabitants of those lands which by this act are annexed to the said second precinct be and hereby are and shall forever hereafter be exempted from paying or contributing any part towards the charges and debts that have already arisen or may hereafter arise by reason of the building the new meeting house which has lately been erected in said town on the lands by this act made the third precinct in said town, any of the votes of the late first precinct notwithstanding; and that all the materials of the old meeting-house which was lately standing in said town was taken down be equally divided between the said three precincts; and that all the ministerial revenues arising from all and any lands lying in any part of the said town of Brookfield heretofore sequestered to the use of the ministry in said town shall be always hereafter equally divided between the said three precincts; and that the charge of the committee who were appointed by this court in April, one thousand seven hundred and fifty-four, to view the said town be borne and paid by the inhabitants of said town.

On the 22d of January, 1755, the people of the first precinct voted to build a meeting-house "at the turning of the county rode, near the northeast corner of a plow-field belonging to John Barns, being on the plain in said first precinct." It was to be forty-five feet long and thirty-five feet wide, and so far as can be learned it was finished without serious delay. The question now arose as to which church the Rev. Mr. Harding belonged. The General Court had provided that the estates of the first parish should be held for the payment of his salary up to the time of the division, but did not determine his future relation. Owing to the embarrassments attending this question he was at his own request dismissed May 8, 1755. Two years later, February 1, 1757, Rev. Nehemiah Strong, of Hadley, was chosen pastor to succeed Mr. Harding, but declined on account of the insufficiency of the proposed salary. Rev. Joseph Parsons, of Bradford, a graduate at Harvard, in 1752, was then called and was ordained November 23, 1757. Mr. Parsons served until his death, in 1771, when he was followed by Rev. Ephraim Ward, a graduate at Harvard in 1763. Mr. Ward was ordained October 23, 1771, and served until his death, in 1818. Rev. Eliakim Phelps was settled as his colleague October 23, 1816, and after a service of ten years and two days, two years as colleague and eight years as pastor, he resigned October, 1826 and assumed the preceptorship of the Brookfield "Classical Female School." On the day of the dismission of Mr. Phelps Rev. Joseph I. Foote was installed, and after six years' service retired, and died on the day before his proposed inauguration as President of Washington College, in the State of Tennessee. Mr. Foote was succeeded by Rev. Francis Horton, a Harvard graduate of 1826. His ministry began August 15, 1832, and continued to September 15, 1841. Rev. Moses Chase was settled January 12, 1842, and was followed by Rev. Leonard S. Parker, a graduate of Oberlin Collegiate Institute, December 19, 1844. During his pastorate the first precinct was incorporated as West Brookfield in 1848, and for a continued sketch of the parish reference must be had to the history of that town in these volumes.

On the 15th of April, 1756, the third precinct, which is now the town of Brookfield, was organized with a membership of twenty-five males and fourteen females. The Rev. Nathan Fiske, a graduate of Harvard, in the class of 1754, was ordained May 24, 1758. He was in the class with John Hancock, Daniel Treadwell and Samuel West, and received the degree of S. T.D., in 1792. His pastorate continued until his death, May 24, 1799, when he was succeeded by Rev. Michael Stone, who was ordained March 11, 1801.

In 1827 the society became Unitarian, and settled Rev. George R. Noyes October 30, 1827, who remained six years, and afterwards became professor of sacred literature in Harvard University. Mr. Noyes was a graduate of Harvard in 1818. Rev. Seth Alden followed, remaining ten years, and was followed November 8, 1845, by William B. Greene, a graduate of West Point, who, in the war of 1861, commanded a regiment of Massachusetts Heavy Artillery. Rev. S. S. Hunting succeeded October 5, 1852; Rev. R. D. Burr November 18, 1858; Rev. Edward I. Galvin April 15, 1863; Rev. A. Judson Rich October 31, 1870, and later by Rev. Henry W. Woude and Rev. Samuel Hamlet. The society is at present without a pastor.

On the retirement of Mr. Stone from the society, at the time of its change of theological belief, a new society was organized called the Evangelical Society

of Brookfield, and he became its pastor. Rev. Richard Woodruff was selected as his colleague February 5, 1838, and dismissed September 12 in the same year. On the day of his dismissal Rev. Washington A. Nichols was ordained as colleague, and remained until January 11, 1843. Rev. Lyman Whiting was ordained on the day of the dismissal of Mr. Nichols, and remained four years. Mr. Stone died in September, 1852. He was followed by Rev. Jesse R. Bragg, who remained eight years; Rev. Josiah Coit, who remained seven years; Rev. Joel M. Seymour, who officiated from 1873 to 1876, and afterwards by Rev. Charles E. Stebbins. The Revs. Charles P. Blanchard, A. F. Schaufflin and Charles F. Moore have at various times supplied the pulpit, but at present the society is without a pastor.

About the time of the incorporation of the Third Precinct, a Baptist congregation held meetings in that part of the town, and without any further organization continued at intervals to hold services for forty years. It had no settled minister, nor any special place of worship. In 1788 Rev. Jeremiah Haskell was engaged to preach, and served several years. In 1795 a meeting-house was built, and in 1800 a formal society was organized. Various ministers officiated until 1818, including Rev. Nathaniel Price, Rev. Laban Thurber, and Rev. John Chase. On the 10th of June in that year a church was formed with thirty-seven members, and Mr. Chase was ordained as its pastor. He died July 28, 1833, and has been followed in the pastorate by Rev. Benjamin B. Manning, Rev. Winthrop Morse, Rev. J. H. Rickett, Rev. Job Boomer and Rev. Andrew Dunn.

During the Revolution Brookfield assumed and faithfully performed its full share. At a town-meeting held May 17, 1773, at which Jedediah Foster presided, a committee was appointed consisting of Joseph Gilbert, Benjamin Adams, Benjamin Babbet, Samuel Hinckley and Joshua Dodge, whose report was accepted and sent by copy to the Committee of Correspondence at Boston. The report declared that:

> The town will be ever ready to assist, and in every legal and pro per way maintain those rights and liberties for our children, which with so much labor, blood and treasure were purchased by our ancestors, whose memory is and ought to be esteemed by us; and we hope, notwithstanding the attempts of the enemies of our constitution, to deprive us of those rights, yet by a steady, firm and constant exertion we shall not finally be deprived of them.

At a meeting held on the 3d of the following December, another committee was chosen, of which Jedediah Foster, Jeduthun Baldwin, Joseph Gilbert, Benjamin Rice and Phinehas Upham were members, whose report, which was accepted by the town, stated that:

> We think it our indispensable duty, in the most public manner, to let the world know our utter abhorrence of the last and most detestable scheme in the introduction of tea from Great Britain, to be peddled out amongst us, by which means we were to be made to swallow a poison more fatal in its effects to the national and political Rights and Privileges of the People of this country than ratsbane would be to the natural body.
>
> *Therefore Resolved* that we will not, by any way or means, knowingly encourage or promote the sale or consumption of Tea, whatever, subject to a duty, payable in America, but all persons, whoever they may be, who shall be concerned in a transaction so dangerous, shall be held by us in the utmost contempt, and be deemed enumies to the country.

On the 12th of September, 1774, Jedediah Foster, Joshua Dodge, John Phipps, Jeduthun Baldwin, Joseph Gilbert, John Lyscam, Rufus Putnam, Phinehas Upham, John Hobbs, Asa Biglow and Jonathan King were chosen a Committee of Correspondence. On the 19th of April, 1775, the following company of minute-men, attached to the regiment commanded by Col. Jonathan Warren, marched for Boston in consequence of the commencement of hostilities at Lexington.

Jonathan Barnes, captain.	John Bell.
Peter Harwood, lieutenant.	Edmond Bridges.
Obadiah Bartlett, lieutenant.	Hugh Cunningham.
Jonas Brigham, sergeant.	Isaac Freeman.
Aaron Matthews, sergeant.	Robert Graham.
Benj. Willington, sergeant.	Reuben Gilbert.
James Washburn, sergeant.	Josiah Hincken.
Solomon Barns, corporal.	Timothy Hall.
George Townsend, corporal.	Joseph Hatfield.
John Bartlett, corporal.	Squier Hill.
Daniel Barris, corporal.	Thomas Jones.
David Chamberlain, drummer.	Charles Knowlton.
Benj. Gilbert, fifer.	Jonathan Marbel.
Hosea Edson, fifer.	Alexander Oliver.
Abner Bartlett.	Ezra Richmond.
Jonas Biglow.	Joseph Stevens.
Nathan Barns.	Ezra Tucker.
Wyman Bartlett.	Moses Tyler.
Jonathan Bond.	Peter Washburn.
Edward Marden.	Wm. Watson.
John Smith.	Samuel Watson.
Joseph Wait.	David Watson.
Jabez Warren.	Abner Witt.
Charles Wetherbee.	Eleazer Woods.
John Winter.	

The following company of minute-men marched for Boston on the same day:

Ithamar Wright, captain.	Theophilus Waterman.
John Packard, lieutenant.	Thomas Wood.
Nathan Hamilton, lieutenant.	John Wood.
Asa Danforth, sergeant.	Solomon Walker.
Daniel Bullard, sergeant.	Wm. Warner.
Nathan Allen, sergeant.	Joseph Stone.
Joseph Richardson, sergeant.	Abner Cutler,
Aaron Willard, corporal.	Benj. Pollard.
Seth Banister, Jr., corporal.	Elihu Blake.
Joseph Newton, corporal.	Wm. Gill.
Benj. Walker, corporal.	Daniel Keyes.
Nathan Richardson, corporal.	Daniel Ross.
Peter Hill, fifer.	Levi Parker.
Samuel Marsh, drummer.	John Stevenson.
Benj. Wood.	Jonathan Arms.
Asa White.	Aza Willis.
Benj. Richardson.	Jesse Banister.
Moses Barnes.	Reuben Gilbert.
Benj. Jennings, Jr.	Aaron Gilbert.
Silas Olds.	Samuel Kimball.
Meazer Adams.	Nath. Hayward.
Jude Adams.	Timothy Wolcott.
Erastus Hamilton.	Simeon Rockwood.
John Gilbert.	Jonas Newton.
Ebenezer Voree.	Theophilus Foster.
Samuel Pike.	Benj. Bachelder.
Jonas Swetter.	John Lyndes.
Joseph Dudley.	

There were other Brookfield men who marched for Boston on the 19th of April, 1775, under Capt. John Woolcott, but, as it is difficult to distinguish them from the Spencer men in the same company, they are omitted.

In Col. Larned's regiment there were enlisted from Brookfield, for eight months, in 1775, the following men:

Peter Harwood, captain.
Asa Danforth, lieutenant.
Benjamin Pollard, ensign.
George Townsend, sergeant.
Wm. Watson, sergeant.
Isaac Barron, sergeant.
Daniel Barns, sergeant.
Charles Rice, corporal.
John Denton, corporal.
Reuben Gilbert, corporal.
John Dodge, corporal.
Samuel Marsh, drummer.
Benjamin Gilbert, drummer.
Hosea Edson, drummer.
Jesse Adams.
Obadiah Adams.
Charles Adams.
Jesse Banister.
Jonas Biglow.
Ebenezer Baker.
Abner Bartlett.
Abner Cutler.
Joseph Dudley.
John Danforth.
Jonathan Danforth.
Charles Doroughty.
Wm. Gill.
Robert Graham.
Comfort Goss.
Asa Gilbert.
Henry Gilbert.
Samuel Green.
Jesse Hamilton.
Wm. Hincken.
Peter Hill.
Joseph Hamilton.
Amos Hodgman.
Josiah Hincken.
Thomas Jones.
Samuel Kimbal.
Daniel Keyes.
Jonathan Marble.
Thomas Nichols.
Jonathan Ormes.
Elijah Pollock.
Ezra Richmond.
Joseph Stephens.
John Stephenson.
Samuel Stephens.
John Smith.
Moses Tyler.
Solomon Wilder.
Eleazer Woods.
Joseph Wait.
Abner Witt.
Jeduthun Wait.
Wm. Wait.
Wm. White.
John Winter.

In Captain Joel Green's Company for same term:

John Granger, captain.
Jonathan Stone, sergeant.
Elijah Cumming, sergeant.
Reuben Slayton, ensign.
David Chamberlain, drummer.
Ebenezer Harrington, corporal.
Nathan Whitney.
Timothy Woolcott.
Solomon Woolcott.
Ebenezer Ball.
Jacob Harrington.

In Colonel Brewer's Regiment for the same term:

John Packard, captain.
Nathan Allen, sergeant.
James Washburn, sergeant.
Josiah Newton, sergeant.
Jareb Bacon, corporal.
Barnabas Potter, corporal.
Levi Packard, corporal.
Nathaniel Hayward, drummer.
Elijah Allen.
Nathan Barns.
Elisha Bartlett.
Jedediah Gilbert.
Aaron Gilbert.
Reuben Gilbert.
Joseph Gilbert.
Barzillai Hayward.
John Hubard.
Elisha Holton.
Robert Hopkins.
Elias Parkman.
Lemuel Ross.
Jonathan Willis.
Josiah Wood.
Theophilus Waterman.
Azariah Willis.
West Waterman.

The following also enlisted in 1775 for eight months and joined various companies and regiments:

Bethuel Washburn, lieutenant.
Nathan Goodale, lieutenant
Alexander Oliver, corporal.
Isaac Cutler, corporal.
Moses Ayres.
Sylvester Bishop.
Benjamin Batcheller.
Peter Cushing.
Joseph Chadwick.
Peter Bowen.
Jonathan Fletcher.
John Liddle.
John Pollard.
Isaac Hodgman.
Nathan Hill, sergeant.
James Hill, fifer.
Bartholomew Hill, fifer.
Berry Bowen.
Moses Bowen.
John Warren, drummer.
Stoddard Bowen.
Jonathan Ralph.
Pomp Lorum.
Benjamin Hill.
John Lynde, ensign.
Abner Gilbert.
Thomas Gilbert.
David Hamilton.
John Hayward.
Solomon Walker, sergeant.
Samuel Pike, sergeant.
Ebenezer How, corporal.
Simeon Rockwell, corporal.
Phinehas Slayton.
Nathan Whitney.
Joseph Olmstead.
Jonas Newton.
Eli Wood.
James Wood.
Moses Dodge.
Reuben Dodge.
Elijah Barnes.
Jabez Crosby.
Moses Hastings.
John Marble.
Daniel Moore.
Abner Old.
Jonas Streeter.
Ephraim Stone.
Josiah Stone.
John Woolcott.
Moses Woods, corporal.
Oliver Hinds.
John Sabin.
Elisha Livermore.
Elihu Blake.
Samuel Bunn.
Ebenezer Miller.
John Wood.
Joseph Wood.
Thomas Wood.

In 1776 the enlistments were as follows for various terms of short service:

David Watson, sergeant.
Charles Bruce, sergeant.
Wm. Smith, corporal.
John Barns.
Barnabas Brigham.
Antipas Bruce.
Hosea Edson.
Ebenezer Field.
John Hersey.
Daniel Matthews.
Abel Johnson.
David Leland.
Jonathan Sevier.
Abner White.
Joseph Gilbert, colonel.
James Converse, colonel.
Jonathan King, captain.
Rufus Putnam, lieut.-colonel.
Nathan Hamilton, captain.
John Bowker, lieutenant.
Joseph Olmstead, corporal.
Thomas Kimball, corporal.
Wm. Gilbert, corporal.
Prince Haskell, drummer.
Barnabas Potter.
Zadoch Gilbert.
Edward Allen.
Philip Allen.
Abner Gilbert.
Samuel Barns.
Solomon Wilden.
Samuel McClure.
Jonathan Moore.
John Burk.
John Sabin.
Nathan Davis.
Ammiel Weeks.
Seth Dean.
Benjamin Foster.
John Patterson.
Wm. Cunningham.
Stephen Chandler.
Ebenezer Wright.
Francis Pellet.
Ithamar Bowker.
Wm. Raiment.
Edward Stone.
Amos Hale.
Ephraim Wheeler.
Jesse Wheeler.
John Green.
Ephraim Richmond.
Ezekiel Bowker.
John Bowen.
Seth Twitchell.
Ichabod Warren.
Uri Babbitt.
Daniel Howe.

The enlistments in 1777 and 1778 were as follows:

Thomas Briggs.
Abner Cutler.
Cornelius Gilbert.
Robert Hall.
Reuben Hamilton.
Barzillai Hayward.
Daniel Keyes.
Jonathan Lampson.
John Lydley.
Alexander Oliver.
Elijah Pollock.
Jeduthun Wait.
Wm. Wait.
Nehemiah Ward.
Joshua Winter.
Wm. Adams.
Jason Allen.
Joel Babbitt.
Samuel Babbitt.
Daniel Barris.
Solomon Bartlett.
Wm. Hincken, sergeant.
Nicholas McClure, sergeant.
John Gilbert, sergeant.
Phillip Allen.
John Ayres.
Joshua Barns.
Wm. Barns.
Benjamin Batchelder.
Josiah Blanchard.
David Clark.
Reuben Dodge.
Jude Foster.
Zadock Gilbert.
Peter Hill.
Silas How.
Asa Humphrey.
Daniel Newell.
Comfort Old.
Abner Perry.
Amos Rice.
Elisha Rice.

Joseph Bartlett.
Jareb Bacon.
Moses Bedunah.
John Bowker.
Samuel Bunn.
Elijah Callay.
Hezekiah Cutting.
Antipas Dodge.
Thomas Dodge.
John Eveleth.
Elisha Foster.
Benjamin Gilbert.
Henry Gilbert.
Jedediah Gilbert.
Thomas Gilbert.
John Hayward.
Benjamin Hill.
James Hill.
Joseph Hamilton.
John Holden.
John Hopkins.
Joseph Green.
Zachariah Green.
Elijah Harrington.
John Hubbard.
Samuel Lancaster,
Isaac Lackey.
Abner Lasell.
Benjamin Lynde.
Joseph Marble.
Jonas Newton.
Joseph Newell,
Abner Old.
Jonathan Owen.
Joseph Olmstead.
Jesse Parker.
Ephrain Potter.
(Negro) Robena.
Lemuel Ross.
John Smith.
Asahel Stearns.
Gad Smith.
Gershom Whitney.
Gershom Whitney, Jr.
Hezekiah Whitney.
Israel Whitney.
Eleazar Whitney.
Elias Witt.
Jonathan Witt.
Lemuel Ward.
John Warren.
Caleb Willis.
Jonathan Willis.
Eli Wood.
Joseph Wood,
Thomas Wood.
Timothy Woolcott.
Ebenezer Bacon.
Benjamin G. Ball.
Joseph Ball.
Phinehas Bowman.
Thomas Hall.
John Burk.
Thomas Cole.
Jacob H. Deland.
Abraham Hair.
Philip Haskell.
John Herrick.
Josiah Hincken.
Amos Leonard.
Thomas Madden.
Joseph Owen.
Mirick Rice.
Robert Richmond, Jr.
Wm. White.
Daniel Gilbert, captain.
Wm. Clapp.
Jason Rice.
Joseph Richardson.
James Ross.
Phinehas Stevens.
Wm. Stone.
Joshua Taylor.
John Waite.
Thomas Wedge.
James Wood.
John Wright.
Asa Danforth, captain.
James Hathaway, lieutenant.
Jonas Bigelow, lieutenant.
Peregrine Foster, sergeant.
Amos Adams, sergeant.
Abraham Adams, sergeant.
Obadiah Rice, sergeant.
Joseph Richardson, corporal.
Reuben Gill, corporal.
Jude Adams, corporal.
Jesse Banister, corporal.
Nathan Hamilton.
Phinehas Upham.
Richard Wellington.
Daniel Walker.
John Hamilton.
Daniel Bullard.
Adoniram Walker.
Ephraim Cooley.
Gad Williston.
Jonathan Snow.
Jonathan Abbott.
John Linds.
John Waite.
Gershom Makepeace.
John Hobbs.
Elisha Hamilton.
Josiah Hamilton.
Samuel Owen.
Jason Walker.
Nathan Whitney.
Elisha Brigham.
Daniel Newell.
Obadiah Wright.
John Allen.
Jeremiah Streeter.
Benjamin Howard.
Samuel Green.
John Wade.
Thomas Summer.
Wm. Hamilton.
James Washburn.
Peter Washburn.
Sylvanus Curtis.
John Gilbert.
John Gilbert (4th).
Benjamin Gilbert.
Benjamin Walker.
Silas Stone.
Abner Perry.
Asa Gilbert.
Ebenezer Bartlett.
Philip Allen.
Samuel Gilbert.
Jerre Hamilton.
Rufus Hamilton.
Jonathan Danforth.
Josiah Cary.
Thomas Ranger.
Thomas Marsh,
Benjam Adams.
Benjamin Barrett.
Daniel Watson.
Jonathan Barns.
Jacob Kent.
Wm. Beals.
Silas Newton.
Joshua Dodge, Jr.
Samuel Gilbert.
James Ross.
Francis Stone, capt.
Wm. Peso.
Daniel Wait.
Jason Rice.
Levi Rice.

The soldiers whose names are repeated in the above and following lists enlisted more than once during 1777–78.

The following enlisted in 1779:

Joseph Olmstead, lieut.
Jesse Abbott, sergt.
Solomon Banister, corp.
Jonas Newton, corp.
Josiah Hamilton, corp.
Nahum Davis.
Simeon Wright.
Wm. Old.
Daniel Upham.
Silas Bridges.
Benjamin Forbush.
Oliver Walker.
Nathan Rice.
Joel Jennings.
Gershom Jennings.
Erastus Hamilton.
Joseph Hamilton.
Nathaniel Hamilton.
Thomas Hincken.
Simon Rice.
Joseph Barrett.
Josiah Cutler.
Silas Hamilton
Nathaniel Sabin.
Peter Bowen.
Joshua Green.
Jacob Harrington.
Abner Witt.
Caleb Loomis.
Joseph Hamilton.
Ebenezer Miller.
Thomas Wedge.
Thomas Hincken.
Silas Newton.
Thomas Hamilton.
Simon Rice.
Wm. Hamilton.
Jude Adams.
Judeth Stevens.
Isaiah Bowen.
Benjamin Jennings, Jr.
Samuel Walker.
Ezra Tucker.
Jonas Biglow.
Richardson Durham.
Thomas Tucker.
Nathan Moore.
John Gilbert, (2d).
Ephraim Cutter.
Benjamin Bragg.
Abner Rice.
Obadiah Wait.
Wm. Peso.
Elijah Barns.
Thaddeus Dodge.
Joseph Brown.
John Pollard.
Andrew Banister, fifer.
Joseph Richardson, capt.
Joseph Thornton, lieut.
Israel Aiken.
Isaac Abbott.
Oliver Gilbert.
Noah Hatch.
Thomas Lampson.
Asa Partridge.
Anthony Cutter.
Isaac Severn.
Ebenezer Witt.

The enlistments in 1780 were as follows:

Jonathan Willis.
Abner Witt.
Wm. Kimball.
Joseph Ranger.
Asa Gilbert.
Josiah Cutler.
Wm. Peso.
John Pollard.
Thomas Dodge, Jr.
Caleb Willis.
Bueanos Ayres.
Solomon Livermore.
Thomas Lampson.
Isaac Wetherbee.
Ichabod Stockwell.
Aaron Forbes.
Ezekiel Hardy.
Silas Barns.
Lewis Witt.
Nathan Moore.
Shadrack Wetherbee.
Thomas Hathaway, Jr.
Nathaniel Sabin.
Jacob H. Deland.
Thomas Wedge, Jr.
John Bowen.
Levi Rice.
Joseph Kimball.
Jason Ayres.
Jedediah Deland.
Levi Kendall.
Moses Dorr.
John Brown.
Wm. Posy.
Scipio Witt.
John Pollard.
Moses Walker.
Amos Wheeler.
Amos Rice.
Nathan Rice.
Silas Newton.
Benjamin Jennings, Jr.
Neverson Hastings.
Abner Hebery.
Thomas Wood, (3d).
Nathan Davis.
Thomas Young.
Ebenezer Marsh.
Aaron Forbes.
Benjamin Dane.
David Chamberlain.
Jude Stevens.
Wm. Forbes.
Eli Watson.
Jeremiah Dewing.
Martin Bridges.
Elisha Whitmore.
Peter Barton.
Silas Morse.
Timothy Armstrong.

Jesse Ayres.
John Cox.
Job Hinckley.
Samuel Lewis.
Levi Stockwell.
Wm. Richardson.

The enlistments in 1781 were as follows:

Joseph Bartlett.
George Townsend.
Joseph Kimball.
Silas Whitney.
Ezekiel Hardy.
Abijah Patten.
Asa Gould,
Samuel Stevens.
Jesse Watson.
Amos Leonard.
Scipio Witt.
John Rice.
Moses Bragg.
John Bowen.
Joseph Hamilton.
Levi Rice.
Thomas Dodge.
John Eveleth.
Amos Gilbert.
Jonas Gilbert.
Elisha Gill.
Eliphalet Hamilton.
Salma Keyes.
Samuel Pike.
John Smith.
Samuel White.
Jonathan Willis.
Jesse Banister.
Thomas Banister.
Simon Rice.
Jabez Upham.
Jacob Deland.
Joseph Cutler.

The above is an incomplete list of the soldiers furnished by Brookfield, but it indicates plainly enough the active and patriotic part which the people of the town took in the War. Not only were men furnished, but the resources of the inhabitants were largely drawn upon and seriously depleted by the demands constantly arising from bounties and supplies. The action taken by the town at various times to meet the exigencies of the period shows that its affairs were in the hands of earnest and devoted men who were determined that, so far as the burden of the War rested on them, it should be borne with courage and hope. The names of the first committee of correspondence, chosen in 1774, have already been given. In 1775 they were: Jedediah Foster, David Hitchcock, John Phipps, Daniel Gilbert, Thomas Moore, John Lyscam, Josiah Hobbs, Ephraim Walker, Ithamar Wright. In 1776 they were: Thomas Moore, John Wait, Tilly Rice, David Hitchcock, Jabez Crosby, Ithamar Wright, John Hamilton. In 1777 they were: David Hitchcock, Thomas Wheeler, Daniel Watson, Joseph Chadwick, Onesiph Ayres, Jonathan Bond, Ithamar Wright, Esekiel Olds, Jabez Crosby.

At a town-meeting held May 22, 1776, under a resolve of the General Court the question "whether the town would support the Honorable Congress in the measure if they for our liberty should see fit to declare the colonies independent of Great Britain" was decided almost unanimously in the affirmative. Indeed, the support of the War and the defense of the rights and liberties of the colonies received the united sympathies of the people. There was little or no disloyalty to the patriot cause. Joshua Upham was one of the few pronounced loyalists in the town. He was a graduate of Harvard in the class of 1763, and among his classmates was Sampson Salter Blowers, a noted loyalist, who rose to high judicial distinction in Nova Scotia, having risen from the bar through the grades of attorney-general and speaker of the House of Assembly to the seat of chief justice of the Supreme Court of the province. Mr. Upham retired to Boston, and soon after became colonel of dragoons and aide de camp to Sir Guy Carleton in New York.

He was with Arnold in the expedition to New London, and in 1781 was Deputy Inspector-General of Refugees at Lloyds Neck, Long Island. He settled in New Brunswick after the war, and became a member of the Council and judge of the Supreme Court. He was the father of the late Hon. Charles Wentworth Upham of Salem. His death occurred while on a business visit in England, in 1808.

Daniel Murray was another loyalist, a son of Colonel John Murray, and a graduate of Harvard in 1771. Mr. Murray entered the service of the crown, and was major of the King's American Dragoons. In 1778 he was proscribed and banished, and, retiring to New Brunswick, where he lived after the war on half pay, was, in 1792, a member of the House of Assembly. He died in Portland, Maine, in 1832. Colonel John Murray, of Rutland, the father of Daniel, with the other sons, Samuel, Robert and John, two of whom, it is believed, lived in Brookfield, were also loyalists.

In 1777–78–79 committees were appointed by the town to provide for the families of non-commissioned officers and soldiers of the Continental Army. In 1778 one hundred pounds per man and a blanket, were given for the soldiers in the second precinct, for the Continental Army; seventy pounds each to the militiamen, and one hundred pounds each for four men who were already in the field. In the same year it was voted to raise £988 8*s.* to defray the expenses of hiring the Continental and militia men recently enlisted, and also in the same year to "accept the confederacy of the Continental Congress, and to enjoin it on their representatives that they consent to the same." In 1779 it was voted to form a State convention, "for the sole purpose of forming a new constitution." An effort had been made by the Legislature to form a constitution, which failed. In 1780 the vote in favor of the new constitution stood one hundred and forty-three to eleven. In November of that year Brookfield furnished fifty-two head of cattle, thirty-three blankets, sixty-seven shirts, sixty-seven pairs of shoes and sixty-seven pairs of hose.

In 1781 it was voted in the second precinct that "the sum of £1080 in hard money be assessed upon the polls and estates of the precinct for the purpose of hiring twelve soldiers for three years' service, at £90 each." This vote of the second precinct was followed in the other two precincts, and was in obedience to a vote of the town that "the three precincts should raise soldiers for three years, or during the war, and choose committees to enlist men, and hire such sums of money as might be needed." "In the same year Brookfield furnished the army thirty-three blankets, sixty-seven shirts, sixty-seven pairs of shoes and sixty-seven pairs of hose, at a cost of £10,411, and before the close of the year, thirty-one blankets, sixty-two shirts, sixty-two pairs of shoes, and 15,450

pounds of beef. In 1782 the town furnished thirty-one blankets, sixty-two sheets, sixty-two pairs of shoes and sixty-two pairs of hose."

After the treaty of peace the people once more resumed their old occupations, and sought by determined effort to repair their individual and corporate condition. Since the date of the original grant, in 1660, there had been, up to this time, few years free from the alarms, and annoyances, and horrors of war; now, for the first time, there seemed to be a pathway before them in which they might walk with prosperous steps.

In 1784, the town instructed its representative that "it is the opinion of this town that the articles of confederation and perpetual union between the thirteen United States, ratified and established by each state in the union, are solemnly binding on the several states, and that no attempt ought to be made to dissolve or weaken the same; but, on the other hand, if we mean to support our dignity as a nation, every effort ought to be used to strengthen the union, and render the bonds indissoluble." Thus, in advance of the formation of the Constitution of the United States, the people of Brookfield declared what the result of the Civil War has confirmed, and what now every citizen of our country believes, in every State of our Union, whether East or West, North or South, that the nation established by our fathers is not a rope of sand, but is a welded, compact, and forever-united Union.

The annoyances of the French war in the latter part of the century from which the people on the seaboard suffered, like the summer air from the ocean, were not felt in the inland towns. Nor did the war of 1812 much disturb them. What was called Shays' Rebellion caused a momentary ruffle on the surface of public affairs which soon subsided. The next real source of disturbance to the people of Brookfield was the movement of the inhabitants of the second precinct to be incorporated as a separate town by the name of North Brookfield. The movement began in 1810, and in that year, under the direction of a committee consisting of Daniel Gilbert, Jason Biglow, Luke Patten, Aaron Forbes and Jacob Kettridge, the following petition was presented:

To the Hon^bl Senate and House of Representatives: The Inhabitants of the Second Precinct in Brookfield humbly pray that they may be set off from the other precincts in said town, and be incorporated into a township by the name of North Brookfield; and that the territorial limits of such incorporation may be the same as those whereby the said Precinct is designated.

And the said inhabitants would beg leave to further state that from the extensive limits of said town, it being separated into three distinct precincts together with the necessary mode of transacting the business of the same by annual rotation in each precinct, they not only find the distance of travel burdensome, but in considering the transacting of their parochial concerns a two fold labor and expense, that the offices of said Town are of necessity distant from the centre, and that from the numbers of its inhabitants and the multiplicity of the business of the said town, the term of one day insufficient for transacting the same."

This petition failed to receive a favorable consideration and on the 15th of April, 1811, another petition was presented, which the town voted to oppose under the direction of a committee formed for that purpose, consisting of Dwight Foster, Seth Banister and Nathan Allen. The result, however, was this time favorable to the petitioners, and the following Act of incorporation, amended in some of its provisions in 1818, was passed February 28, 1812:

Sect. 1. Be it enacted by the Senate and House of Representatives in General Court assembled and by the authority of the same, That all that part of the town of Brookfield which has been heretofore called and known by the name of Second or North Parish (excepting that part of said territory now lying south of the post-road leading from Worcester through Spencer to Springfield) together with the inhabitants thereon be and the same is hereby incorporated into a separate town by the name of North Brookfield. And the said town of North Brookfield is hereby vested with all the powers and privileges and shall also be subject to all the duties to which other corporate towns are entitled and subjected by the constitution and laws of the Commonwealth.

Sect. 2. Be it further enacted, That the inhabitants of the said town of North Brookfield shall be entitled to hold such proportion of all the personal property now belonging to and owned by the inhabitants of the town of Brookfield as the property of the said inhabitants of North Brookfield bears to the property of all the inhabitants of the town of Brookfield according to the last valuation thereof.

Sect. 3. Be it further enacted, That the inhabitants of the said town of North Brookfield shall be holden to pay all arrears of taxes due from them together with their proportion (to be ascertained as aforesaid) of all the debts now due and owing from the said town of Brookfield on what may be hereafter found due and owing by reason of any contract or other matter and thing heretofore entered into or now existing.

Sect. 4. Be it further enacted, That the said town of North Brookfield shall be holden to support their proportion of the present poor of the town of Brookfield, which proportion shall be ascertained by the present valuation of the town; and all persons who may hereafter become chargeable as paupers to the town of Brookfield and North Brookfield shall be considered as belonging to that town or the territory of which they had their settlement at the time of passing this act, and shall in future be chargeable to that town only.

Sect 5. Be it further enacted, That the said town of North Brookfield shall be holden to pay their proportion of all state, town and county taxes assessed on the inhabitants of the said town of North Brookfield until a new valuation shall be made of the said towns. Provided, That the said town of North Brookfield shall be holden until the further order of the legislature to pay the town of Brookfield such proportion of any of the expenses of maintaining the bridges and causeways over the rivers in the town of Brookfield as a Committee of the Court of Sessions for the County of Worcester shall determine; and said Court of Sessions are hereby authorized on application of either of the inhabitants of Brookfield or North Brookfield from time to time to appoint a committee for the above purpose whose report made to and accepted by said court shall be binding on said towns.

Sect. 6. Be it further enacted, That any Justice of the Peace for the County of Worcester upon application therefor is hereby authorized to issue her warrant directed to any freeholder in the said town of North Brookfield, requiring him to notify and warn the inhabitants thereof to meet at such time and place as shall be appointed in said warrant for the choice of such officers as towns are by law required to choose at their annual town meetings.

On the 20th of February, 1818, the following amendatory act was passed:

Be it enacted, that Austin Flint, of Leicester, Nathaniel Jones, of Barre, and Joseph Cummings, of Ware, are hereby appointed a committee to hear and consider the claim of Brookfield on one part and of North Brookfield on the other; and finally to determine whether the town of North Brookfield ought in future to pay any part of the expenses of maintaining the bridges and causeways in the town of Brookfield.

Sect. 2. Be it further enacted, That from and after the time the report of said committee shall be filed in the office of the Secretary of the Commonwealth the said fifth section of said act incorporating the town of North Brookfield shall be repealed, and the duties and liabilities of said North Brookfield resulting from the said section shall altogether cease.

On the 8th of February, 1823, an act was passed

by the Legislature which still further, though in a moderate degree, changed the bounds and contracted the territory of the town. It provided that Daniel Coney, with so much of his estate as is within the towns of Brookfield and Weston, in the county of Worcester, be and they are hereby set off from said towns and annexed to the town of Ware, in the County of Hampshire. A much earlier change in the boundaries which has not before been mentioned in the narrative was made in 1791, when the General Court in establishing a line between Brookfield and New Braintree set off a tract of land to the latter town and annexed to the former, "the lands of Calvin and Francis Stone and a part of Whitney Hill, so called."

The next change in the boundaries and the next birth of a new town from the loins of the mother-town occurred in 1848. On the 22d of the previous November, at a town-meeting over which Alanson Hamilton presided as Moderator, it was voted "that the town choose a committee of two, nominated by the Moderator, one from each Parish, to present a petition to the next Legislature to send out a disinterested committee to report to their body the terms upon which this town be divided, and that the town will abide said decision; provided that the town shall not agree among themselves upon the terms of division previous to the first of January next, in which case said committee will petition the Legislature to divide the town upon the terms agreed upon." John N. Fisk and Francis Howe were appointed on the committee. It was also voted that a committee of twelve, six from each parish, be appointed to agree on terms of division. This committee consisted of Perley Blanchard, Elliott Prouty, Alfred Rice, Wm. J. Adams, Wm. Howe, Charles Flagg, Baxter Ellis, Baxter Barnes, Nathaniel Lynde, Wm. Adams, Joseph Dane and Avery Keep.

At an adjourned meeting held on the 27th of December, 1847, the following report of the committee was adopted:

The Committee chosen by the town of Brookfield to consider and agree upon an equitable division of said town into two distinct towns in such manner and upon such terms as shall subject each town to bear the just proportion of the burdens or expenses and present liabilities of the whole undivided town, respectfully submit the following report: having duly considered all the facts and circumstances that we could bring to our minds, are of the opinion that the town should be divided by the same line that divides the two ancient parishes, all the part lying west of said line, except Preston Haver's land, shall be incorporated as a new and distinct town by the name of West Brookfield, with the following conditions on agreement, viz.: If the County Commissioners shall order either the road from Ware to West Brookfield depot or the road from Fiskdale to South Brookfield depot, or both of them to be made as they are now located, except a slight alteration may be made without additional expense, within two years each town shall pay an equal portion of the expense of making said road or roads; also of the present debts of the town, if any there be, West Brookfield shall relinquish and give up to Brookfield all their right or interest in the town farm with all the personal property on or belonging thereto, and Brookfield shall keep and support all the paupers who are now at the said establishment during their lives, West Brookfield paying to Brookfield fifty cents a week each for one half the number of said paupers now at said almshouse during their lives. The names of the persons to be there supported are as follows, and no other person, viz.: Joseph Porter, Abigail Stephens, Simeon Johnson, David Snow, Eleanor Gilbert, Solon Phipps, Hannah Lawrence, Martha Richardson, Elizabeth Hobbs, Harriett Richards, Sally Forbes, Sally Parker, Huldah Wood, Mary Walker, Mary Ward, Esther Jennings, Sally Thomas, Abigail Paddock, John Lindly, Wm. Richardson, Emily P. Morris, Ben Hamilton. Ruth Henshaw, insane, is to be supported by the town of Brookfield and Harriett Cording to be supported in West Brookfield. All persons who may hereafter claim town aid to be supported or assisted by the town in whose territorial limits they may have gained a settlement by the laws of the Commonwealth previous to the division of said town of West Brookfield, shall have the right to visit said Almshouse by an Agent or Committee for the purpose of seeing that said paupers are well treated or taken care of.

The expense incurred by your Committee they pray may be allowed, and that the town direct the Selectmen to give an order to Perley Blanchard, Chairman, for the sum of sixteen dollars for that purpose.

It was then voted to petition the Legislature for an act providing for admission substantially in accordance with the report, and on the 3d of March the following act was passed:

Section 1. All that part of the town of Brookfield in the county of Worcester which lies westerly of the line hereinafter described, is hereby incorporated into a separate town by the name of West Brookfield, and the said town of West Brookfield is hereby vested with all the powers privileges, rights and immunities, and shall be subject to all the duties and requisitions to which other towns are entitled and subjected by the constitution and laws of this Commonwealth. The dividing line between the two towns shall be and the same is hereby established as follows: Beginning at the north end of the said line at a town monument between Brookfield and North Brookfield, thence south eighteen and three-fourths degrees west thirty-one rods and twenty-two links to a stake and stones; thence south eighty-six degrees west twenty-four rods; thence north eighty-four and three-fourths degrees west ten rods and eighteen links; thence south fifty-six and three-fourths degrees west seventeen rods and five links; thence south fifty-four degrees west fifteen rods and twenty-three links; thence south sixty-nine and one third degrees west fourteen rods and twenty-two links; thence south seven degrees west nineteen rods and seven links; thence south twenty-four and one-fourth degrees west nine rods and nine links; thence north fifty-six and one-fourth degrees west twelve rods; thence north fifty-two and three-fourths degrees west sixteen rods; thence south nine degrees west sixty-six rods and twenty links; thence south fifteen degrees west sixty-six rods and twenty links; thence south nine degrees west seventeen rods and seventeen links; thence south eighty-two and one-half degrees west fifteen rods and three links; thence south five and one-half degrees east fifty-nine rods and seven links: thence south forty-nine degrees west eighteen rods and twelve links; thence south thirty-three and one-half degrees west eight rods; thence south ten and one-half degrees east seven rods and four links; thence south thirty degrees east seven rods and four links; thence south fifty-three and one half degrees east nine rods and thirteen links; thence south thirty-four degrees west twenty-six rods and thirteen links; thence south seventy-five and three-fourths degrees east nine rods and twenty links; thence south nine and one-fourth degrees west three rods; thence south seventy-four degrees east sixteen rods; thence south twenty and one-fourth degrees west one hundred and twenty-nine rods to the north bank of the river; thence southerly to the middle of the river; thence down the middle of the river to a point opposite the corner of land of Reuben Blair and the Brigham farm lying on the southerly side of said river; thence southerly to said corner; thence south thirty-three and one-fourth degrees west one hundred eighty-five rods and fifteen links; thence north sixty-eight and three-fourths degrees west thirty-three rods and twenty links; thence south sixteen degrees west two hundred thirty-six rods and twenty links; thence south sixty seven and three-fourths degrees east thirty-two rods; thence south seven degrees west three rods; thence south seventy degrees east sixteen rods and eight links; thence seventeen degrees west forty rods and two links; thence south eighty-four and three-fourths degrees west seven rods and fifteen links; thence south three and one-fourth degrees west twenty-six rods; thence south eighty-five and one-half degrees west twenty-four rods and thirteen links; thence north seventy and three-fourths degrees west twenty-eight rods and eighteen links; thence north eighty-six and one-half degrees west twenty-eight rods and five links; thence south twelve rods, thence south twenty-nine and one-half degrees west forty-four rods and fifteen links; thence south seventeen one-half degrees west fifty-five rods and fourteen links;

thence south seventy-five and one-half degrees east ninety rods; thence south thirteen one-third degrees west eighty-eight rods and twenty-two links; thence north seventy-five degrees west sixty-one rods and twenty links; thence south nineteen and three quarters degrees west eighty rods; thence south forty and one-half degrees east seventeen rods; thence north twenty-five degrees east twenty-three rods and fifteen links; thence south eighty degrees east fifty-four rods and ten links; thence south thirteen and one-third degrees west one hundred twenty-seven rods and five links; thence north sixty-four degrees west sixty-eight rods and ten links; thence south sixty-two degrees west eleven rods and twelve links; thence north forty-nine degrees west five rods and nine links; thence north sixty-one and one-half degrees west forty-two rods and twenty links, to a point on the town line between said Brookfield and Warner.

The remaining sections of the act provided for equitable settlements of arrears of taxes, of county taxes, of debts, of corporate property, the support of the poor, the construction of roads, and further provided, that West Brookfield should

Continue to be a part of the town of Brookfield for the purpose of electing a representative to the General Court, State officers, senators, representatives to Congress and electors of President and vice-President of the United States until the next decennial census shall be taken in pursuance of the 13th article of amendment of the Constitution; and all meetings for the choice of said officers shall be called by the selectmen of the town of Brookfield in like manner and in the same places as heretofore called.

Six years later, on the 15th of April, 1854, the town lines were again, and for the last time, changed. An act of the Legislature of that date provided that

So much of the town of North Brookfield in the County of Worcester as lies southerly of a line beginning at a stone monument at the old post road leading to Brookfield, a little Northwesterly of what is called the Wolcott Mill, and running thence south seventy-seven degrees and thirty minutes east three hundred and seventy-five rods, to a stone monument, as now established in the line of Brookfield and North Brookfield, on the easterly side of the Stephens pond, so-called with all the inhabitants and estates thereon is hereby set off from the town of North Brookfield and annexed to the town of Brookfield; provided, however, that for the purpose of electing representatives to the General Court to which the said town of North Brookfield is entitled until the next decennial census shall be taken in pursuance of the thirteenth article of amendment to the constitution, the said territory shall remain and continue to be a part of the town of North Brookfield, and the inhabitants resident thereon shall be entitled to vote in the choice of such representatives, and shall be eligible to the office of representative in the town of North Brookfield in the same manner as if this act had not been passed.

The record of Brookfield in the War of the Rebellion impresses upon us anew a realization of the immense resources of our government in bringing it to a successful conclusion. Every city and town and hamlet in the loyal North poured out its men and its means, and their sources of supply were far from exhausted when the last soldier had been drafted for the Confederate Army, and the last dollar had been expended for its support. On the 30th of April, 1861, at a town-meeting, at which John E. Prouty acted as moderator it was voted, "that every person belonging to this town who should enroll himself in the company now being raised in this town and vicinity for the purpose of volunteering its services to the Government, subject to the call of the Governor shall, as soon as said company is accepted by the Governor, receive one dollar a day for every day he is called out to drill by the drill-master, or such officers as are authorized so to order. The payment of the above to be made weekly to the order of the drill-master, or the officer properly calling them out, and this shall continue till otherwise directed by the Selectmen."

It was also voted, "that every private and non-commissioned officer when called into actual service shall receive from the town such an amount as shall make his pay, including that received by him from the Government, fifteen dollars per month; that every private and non-commissioned officer, who has a family or any person dependent upon him for support, shall receive in addition to the above eight dollars per month to be paid in such a manner and to such person as the Selectmen of the town shall think best for the support of said family or dependent persons."

It was further voted, "that when the company has been organized and accepted by the Governor, each and every member shall be provided with a plain, substantial uniform, and before going into actual service with an army blanket and revolver at the expense of the town unless otherwise provided."

It was still further voted, "that the Selectmen be authorized to borrow what money the town may want to carry the foregoing votes into effect, to be paid in one, two and three years, and the Selectmen to give all necessary obligations binding the town to pay the same sums and interests that may accrue thereon. And it was finally voted, "to choose a committee of three to confer with North Brookfield in regard to the uniform, etc., and for the purchase of the same for the volunteers." This committee consisted of Emmons Twichell, J. S. Montague and Charles Fales.

At a subsequent meeting held on the 15th of June in the same year, at which also John E. Prouty acted as moderator, it was voted "that each member of the family of the volunteer militia be paid one dollar per week for every member of the family, the sum not to exceed twelve dollars per month for any one family and the Selectmen be authorized to borrow the money." It was also voted "that all members that the Committee uniform be paid two dollars and fifty cents per week for five weeks, to be left discretionary with the Selectmen and officers of the company, when to be paid, and to be paid to the officers of said company."

At a meeting held on the following November, at which George W. Johnson acted as moderator, the committee on uniforms reported that the uniforms had been furnished under a contract with Marshal & Duncan of North Brookfield, and that the following men had been supplied:

Sardus S. Sloan, captain.
Elisha F. Johnson, lieutenant.
Lyman Doane, lieutenant.
John W. Heath.
James E. Adams.
Shepard Brown,
Charles N. Holmes.
John H. Millman.
Warren A. Walker.
Herbert Chaffee.
Benjamin Stevens.
Eldridge Doane.
W. L. Blood, Sturbridge.
Sidney Hewitt, Sturbridge.
F. L. Benson, Bromfield.
L. G. Lamb, Southbridge.
H. C. Ball, Amherst.
F. H. Dickinson, Amherst
H. C. Albee.
George W. Burr.

Wady H. Cheever.
Wm. H. Ormsby.
Wm. H. Nichols.
Wm. H. Webber.
Ralph Preston.
James H. Belcher.
Everett A. Hebard.
Ferdinand Dexter.
Artemas D. Ward.
Frederick Bullard.
E. A. Rice.
James B. Freeman.
Alonzo W. Phillips.
Alexander Budreaux.
Wm. A. Belcher.
Richard Yeaton.
David Jenks.
John H. Price.
L. C. Moulton.
S. H. Bannister.
Edward F. Ware.
Amasa Bemis.

They also reported that the cost of equipment and drilling was fifteen hundred dollars

At a meeting held on the 2d of January, 1862, at which Austin H. Moulton acted as moderator, it was voted "that the Selectmen be authorised to pay to each volunteer not to exceed thirty-four in number, who may enlist or has enlisted under the last call of the President for three hundred thousand volunteers, the sum of one hundred dollars, to be paid to each volunteer upon his being mustered into the service of the United States, it being understood that those who have previously enlisted shall be entitled to the same bounty as those who may hereafter enlist, if they can be legally counted as belonging to our quota of thirty-four men which this town must raise under the call above mentioned." At a meeting held on the 12th of September, 1862, at which also George W. Johnson acted as moderator, it was voted "that one hundred and fifty dollars be paid to each man voluntarily as a part of the quota of the town under the last call for men for nine months' service whether enlisted before or after the first day of September, 1862."

The following is a list of the soldiers furnished by Brookfield in the War of the Rebellion, taken from the tablets on the interior walls of the town-house:

Eighth Regiment.

Austin L. Nichols.

Eleventh Regiment.

John H. Chamberlain.

Twelfth Regiment.

Charles C. Guppy.

Fifteenth Regiment.

Sardus S. Sloan.
Frederick Bullard.
Lyman Doane.
H. Eugene Carpenter.
George L. Avery.
Edwin H. Newton.
James E. Adams.
Charles H. Holmes.
Benjamin Stevens.
Artemas D. Ward.
John H. Johnson.
Reuben W. Adams.
Henry C. Alba.
Wm. J. Babbitt.
Sumner H. Bannister.
Francis A. Barnes.
James H. Belcher.
Andrew J. Benson.
Amasa Bemis.
Wm. A. Belcher.
Wady H. Cheever.
Ezekiel M. Cooper.
Amos Deane.
Sidney Hewett.
David Jenks.
George L. Marsh.
Harrison Moulton.
Lafayette C. Moulton.
James S. Nichols.
Wm. H. Nichols.
Oren O. Ormsby.
Joseph Pecot.
Alonzo W. Phillips.
Augustus W. Patten.
Ralph Preston.
John H. Prior.
John W. Raymor.
G. W. Allen.
Michael Rock.
Henry H. Slayton.
Harrison W. Stone.
Warren A. Walker.
Charles P. Webber.
Benjamin C. Wheelock.
Richard Yeaton.
Elias H. Woodward.
James B. Freeman.
Samuel E. Gilbert.
Otis H. Hamilton.
Everett A. Hebbard.
Richard Dowling.
Ellridge Doane.
Wm. H. Walker.

Seventeenth Regiment.

Wm. S. Pike.
John H. Copp.
Charles S. Hamilton.
Wm. E. Rice.
Francis A. Shaw.
Wm. T. Wilcott.
Emerson Wilcott.

Eighteenth Regiment.

Charles Riggs.

Twentieth Regiment.

Lewis McCrellis.

Twenty-first Regiment.

Samuel B. Rice.
Hubert Claffery.
George Ward.
Leonard J. Alexander.
George W. Burr.

Twenty-second Regiment.

John A. Plympton,
Gilbert Lombard.

Twenty-fourth Regiment.

Elbridge Howe,
George F. Sibley,
George A. Slayton,
John E. Turner,
Wm. H. Austin,
Lorenzo Doane,
Charles B. Carpenter,
Peter Delane.
Curtis Dickinson,
Wm. H. Feary,
Albert S. Howe,
Henry D. Rogers,
George N. Maynard,
Sylvester H. Stevens,
Frank P. Works,

Twenty-fifth Regiment.

Cyrus K. Webber,
Lyman E. Weeks,
Edwin C. Carpenter,
Wm. H. Webber,
Hugh Jameson,
Robert Kelley,
John Lyon,
John McCarthy.

Twenty-ninth Regiment.

Albert H. Prouty.

Thirty-first Regiment.

Benjamin O. Gay,
Julius W. Johnson.
Daniel W. Sherman.

Thirty-second Regiment.

Wm. Conroy,
George H. Bush.
James G. Adams.

Thirty-fourth Regiment.

Freeman Snow.
George A. Haraden.
Charles A. Porter.
John W. Russell.
Ormill Young.
Marcus W. Goodell.
Ezekiel P. Kempton.
Franklin L. Knox.
Freedom N. Upham.
Edward L. Drake.
Edwin N. Adams.
George K. Perkins.
John M. Putnam, Jr.
Loring B. Vinton.
Andrew F. Jackson.
Edwin C. Babcock.
Robert Killard.
Rufus S. Newton.
Jacob Watson.
Joseph E. Webber.
James R. Jorselyn.

Thirty-seventh Regiment.

Joseph D. Knights.

Forty-second Regiment.

Emmons E. Chapin.
Elmer H. French.
Wm. S. French.
Henry R. Gilmore.
Melvin E. Haraden.
Charles B. Heath.
Frederick A. Howe.
Oren B. Chaffee.
Edward Lackey.
Alvin N. Lamb.
Oliver P. Merritt.
Charles H. Newton.
Wm. A. Springer.
Enoch Spencer.
James Spencer.

Forty-fourth Regiment.

Wm. W. Howe.
Frederick A. Howe.

Fifty-fourth Regiment.

Francis W. Adams.
George Varney.
Henry O. Adams.
Charles Alden.
Hiram Bassett.
Joel Bartlett.
Jonas M. Bellows.
Simon Gager.
Hiram Gallup.
Osborn Gallup.
Nahum Gilbert.
Kinkland Hawes.
Charles F. Hobbs.
Michael McGillicoddy.
Charles F. Mullett.
Franklin H. Sawtelle.
Salem F. Adams.

Fifty-seventh Regiment.

Alexander Bedreaux. Louis Richell.

Fifty-ninth Regiment.

Thomas Gray. James Lord.
Sanford A. Sawyer.

Sixty-first Regiment.

Wm. Barron. John Gaul.

Second Heavy Artillery.

Charles W. Baker. Alexander B. Moran.
Dexter W. Trask. Daniel W. Smith.
Luke Kendrick. James D. Brown.
Oliver Rood. Benjamin H. Hatch.
Gilman Doeg. Hiram Hatch.
Andrew W. Ellis. Wm. H. Hatch.
Jonathan M. Ames. Michael McDonald.
Wm. A. Gilbert.

Third Heavy Artillery.

George S. Keeler.

Fourth Heavy Artillery.

Henry J. Bigelow. Lorenzo N. Fletcher.
Seneca B. Howland. George F. Fudge.
John W. Knight. Clark Hill.
Myron W. Sherman. James A. Hill.
Joshua B. Bellows. Nath^{l}. E. Merrill.
Wm. E. Cook. Anson Williams.
John D. Fiske.

Fourth Battery.

George H. Clark. Clement Davieux.
John J. Hynde.

Sixth Battery.

Charles A. Taylor. Dwight Sampson.

Tenth Battery.

Wm. F. Herney.

Unassigned.

George Allen, Hartwell B. Martin.
Thomas Allen,

Navy.

Patrick Tiffany.

The following enlisted men were killed or died during the war:

John W. Heath, killed at Antietam September 17, 1862.
John H. Hillman.
Benjamin Davis.
Sheppard Brown.
Wm. L. Blood.
Elisha F. Johnson.
Alfred Russell.
James E. Sargent.
Ferdinand Dexter, killed at Ball's Bluff October 2, 1861.
John F. Butters, killed March 12, 1864.
Edward F. Ware, died September 23, 1862.
Edward W. Prouty, died July 2, 1862.
Wm. E. Vanever, died November 5, 1862.
Emery N. Robbins, died July 15, 1864.
Wm. A. Mullet, died May 6, 1864.
Charles Barnes, died May 6, 1864.
Frederick Davis, died March 17, 1863.
George Adams, died May 24, 1862.
Charles A. Lyon, died December 24, 1862.
Edwin R. Merritt, died December 15, 1862.
Charles E. Dickinson, died October 9, 1864.
Andrew J. Merritt, killed at Newbern March 14, 1862.
Salem D. Slayton, killed at Bermuda Hundred May 30, 1864.
Marcus E. Lyon, killed at Deep Run August 16, 1864.
Artemas Adams killed near Richmond October 13, 1864.
Henry W. Watson, killed at Darbytown October 13, 1864.
Owen Kough, killed in the Wilderness May 7, 1864.
James P. Coolidge, killed at Winchester September 19, 1864.
Joseph W. Webber, killed at Winchester, September 19, 1864.
Hosea L. Barnes, killed at Piedmont June 15, 1864.
Elijah C. Pearl, died December 8, 1864.
Francis T. Bartlett, died December 30, 1863.
Orlando F. Carpenter, died of wounds June 16, 1864.
James Claffey, killed at Cold Harbor June 3, 1864.
Lyman Hawley, killed at Gaines Mill June 27, 1862.
John F. Hobbs, died September 21, 1862.
George F. Haven, killed at Knoxville November 29, 1863.
Henry Fales, killed in the Wilderness May 6, 1864.
James B. Freeman, killed in the Wilderness May 7, 1864.
Harrison Moulton, died at Andersonville January 25, 1865.
Martin L. D. Leach, died September 16, 1865.
James C. McClure, died August 25, 1863.
Emerson Wolcott, died April 10, 1865.
George W. Sloan, died July 9, 1865.
Oliver F. Lakin, died October 10, 1864.
James Taylor, died March 25, 1865.
George R. Johnson, died April 9, 1864.
Jefferson Richards, died June 25, 1864.

Some of those in the above roll of the dead belonged to Brookfield, but enlisted elsewhere.

The expenditures of money by the town during the war were $29,874.91, of which the sum of $14,166.19 was re-imbursed by the State, as expended under the law for State aid.

But this sketch with the limited space assigned to it in these volumes, must be brought to a close. Besides the Orthodox, Unitarian and Baptist churches already referred to, there is a Methodist church, established in the early part of this century, and a Catholic church, established about the year 1867, of which Father Grace is pastor. Both enjoy a steady and prosperous growth. The town-house was built at a cost of about seventy thousand dollars, and there are two hotels, a high school, a public library, a Grand Army Post and a Masonic Lodge. The business of the town is not extensive, and is chiefly confined to the manufacture of boots and shoes, and bricks, the former by George H. Burt & Co., who employ about five hundred hands, and the latter by the Brookfield Press Brick Company. Under the last census of 1885 the population of the town was three thousand and thirteen, having increased to that number from two thousand six hundred and sixty, in 1875. The valuation of the town is about one million three hundred thousand dollars. At the last annual meeting the following appropriations were made to defray the expenses of the town for the ensuing year:

Fire Department	$1,250 00
Schools	5,700 00
Roads and Bridges	3,000 00
Poor	2,500 00
Memorial Day	100 00
Library	500 00
Town Dept	3,000 00
Contingent	1,600 00
Military Aid	460 00
Text Books	500 00
Cemeteries	60 00
Transportation of Scholars	100 00
Common	50 00
Water	15,000 00
State Tax	1,642 50
County Tax	976 00
Overlay and Sundries	603 91
	$37,042 41

The Merrick Public library, a valuable adjunct to the school system of the town and a means of improvement and cultivation to all its inhabitants, stands as a monument to the memory of two of its sons. Its foundation was laid in 1865, for the formation of a library association, with a capital of two hundred and ninety-five dollars, divided into fifty-nine shares at five dollars each, which were taken, five by one person, forty by twenty persons at two each, and the remainder by fourteen at one each. Additions to this capital were made by gifts of money and books, and about two hundred volumes which had belonged to another, then extinct association, were placed on its shelves. Mr. George Howe, of Boston, contributed one hundred dollars, and his brother, Jabez C. Howe, two hundred and fifty dollars as mementoes of their attachment to an early home. With these and other gifts the library prospered until 1867, when receiving a bequest under the will of Pliny Merrick, a native of the town, it was merged in the Merrick Public Library. Mr. Merrick said in his will: "Having always felt a strong attachment to the town of Brookfield, in which I was born, and where I spent the early years of my life, and where the remains of my parents are entombed; and wishing to do something to promote the well being and prosperity of the inhabitants of the town in all time to come, I do hereby to that end, and for that purpose, give and bequeath to the said town of Brookfield, the sum of ten thousand dollars to be preserved and maintained perpetually as a fund to be denominated the 'library fund.' The income and interest of which shall be appropriated to the purchase, binding and repair of books, to constitute a library for the free use of the inhabitants of the town and the visitors thereto, subject only to such rules and regulations as the town shall from time to time make and present, and I in like manner give and bequeath to said town all my books which I shall own at my decease, except law books, to constitute a part of said library. These two legacies of money and books are upon the condition that the town shall within nine months next after the probate allowance of this will, vote to accept the same upon and subject to the conditions herein contained. If the town should not so vote the said legacies are to be wholly void and of no force or effect."

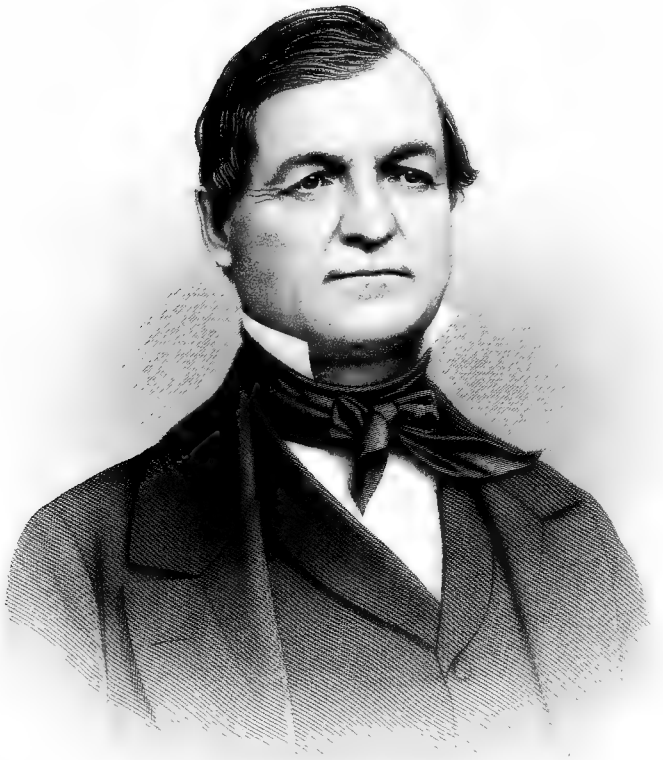
The legacies were accepted at the annual meeting of the town in April, 1867, and the library received ten thousand dollars and four hundred and fifty volumes, with one hundred and fifty magazines and unbound serials. The fund yields an income of about seven hundred and fifty dollars. This income is expended, as provided in the will, for the purchase, binding and repair of books, while other current expenses of the library are met by town appropriations.

The commodious and substantial building in which the library is now kept is called "Banister Memorial Hall," and was erected by William A. Banister, of New York, a native of the town, at a cost of about ten thousand dollars, on land presented to the town by Nancy S. R. Felton, widow of Oliver C. Felton, and was dedicated January 31, 1884. At that time the library contained seven thousand five hundred volumes. The present trustees of the institution are Washington Tufts, D. W. Hodgkins, L. H. R. Goss, H. V. Crosby, E. J. Irwin and C. F. Holt.

Judge Pliny Merrick, the benefactor and real founder of the library, was born in Brookfield, August 2, 1794, and died in Boston, February 1, 1867. He was the son of Pliny Merrick, a graduate at Harvard in 1776, and one of Brookfield's most prominent men. Judge Merrick graduated at Harvard in 1814 in the class with Martin Brimmer, Rev. Francis G. P. Greenwood, William H. Prescott and Rev. James Walker. He studied law with Levi Lincoln, and began practice in Worcester in 1817, subsequently practicing at Swansea and Taunton. In 1824 he was appointed county attorney, in 1832 attorney for the middle district, and in 1843 a judge of the old Common Pleas Court. In 1851 he was again appointed judge of the Common Pleas Court, and in 1853 a justice of the Supreme Judicial Court. He was also Representative from Worcester in 1827, and Senator in 1850. Besides the bequest to his native town, he made bequests to the City of Worcester for the establishment of schools of a high grade.

Among other distinguished men of Brookfield, the following may be mentioned. Jedediah Foster was born in Andover, October 10, 1726, and died October 17, 1779. He graduated at Harvard in 1744, and settled in Brookfield in the practice of law. He was a delegate to the Provincial Congress in 1774–75, and was an influential member. He was chosen councillor in 1774, and disapproved by General Gage, and re-chosen in 1775. He was judge of the Superior Court of Judicature from 1776 to his death, and had previously been probate judge and judge of the Worcester County Court of Common Pleas.

Dwight Foster, son of Jedediah, was born in Brookfield, December 7, 1757, and died in that town April 29, 1823. He graduated at Brown University



Aaron Kimball

in 1774 and practiced law in his native town. He was Sheriff and Common Pleas Judge of Worcester County, a member of the House and Senate in the General Court, member of Congress from 1793 to 1799, and United States Senator from 1800 to 1803. On the death of his father, in 1779, while a member of the State Convention for framing the State Constitution, he was chosen in his place.

Jabez Upham, son of Phinehas Upham, was born in Brookfield in 1764 and graduated at Harvard in 1785. He studied law with Dwight Foster and was admitted to the bar in 1788. He practiced a few years in Sturbridge, Mass., and Claremont, New Hampshire, and thence removed to Brookfield, where he died, November 8, 1811. He represented his native town in the General Court and the Worcester South District in Congress, resigning his seat in 1809.

Wm. B. Banister was born in Brookfield, November 8, 1773 and graduated at Dartmouth in 1797. He was a distinguished member of both the Worcester and Essex bars and died in Newburyport, where a considerable portion of his professional life was spent, July 1, 1853.

Amos Crosby was born in Brookfield in 1761 and graduated at Harvard in 1786. He was a preceptor in Leicester Academy and tutor at Harvard. He afterwards practiced law in Brookfield until his death in June, 1836.

Alfred D. Foster was born in Brookfield July 26, 1800, and graduated at Harvard in 1819. He studied law with S. M. Burnside, but after a few years' practice retired from active business. He was three years a member of the Executive Council, and a member of the Massachusetts Senate in 1848.

Daniel Gilbert, a native of Brookfield, graduated at Dartmouth in 1796 and was admitted to the bar in 1805. He died, March 11, 1851, at the age of seventy-six.

Lovell Walker was born in Brookfield in 1768 and graduated at Dartmouth in 1794. He practiced law in Templeton and Leominster, and was a member of the Senate in 1830 and 1831. He died March 25, 1840.

Among other natives of Brookfield who have distinguished themselves either at home or in wider fields of enterprise may be mentioned Joseph Dwight, Josiah Converse, Phinehas Upham, Thomas Hale, Oliver Crosby, Simeon Draper and Oliver C. Felton. These belonged to past generations and of the living it is not proposed to speak.

With these sketches this imperfect narrative must close. It is only necessary to say in conclusion that the writer has drawn freely from Temple's valuable "History of North Brookfield" as a source of supply of historical material, for which he desires to express the fullest acknowledgment and the sincerest thanks. That history being a town publication, he has esteemed it a sort of town record, and therefore free for public use.

BIOGRAPHICAL.

AARON KIMBALL.

Aaron Kimball was the son of Aaron and Silence (Bartlett) Kimball, and was born at North Brookfield, June 19, 1796. His paternal grandfather, Benjamin, came from Ipswich to Brookfield prior to 1755, and since that time the family name has been prominently associated with Brookfield and her interests.

He married Eliza Cooley of Long Meadow, by whom were the following children: Harriet Cooley, born, February 3, 1830, died February 6, 1860; Adeline Augusta, born October 1, 1832 d; Mary Ann, born November 15, 1834—died, 1884; Franklin Olcott, born October 26, 1838—died December 24, 1856.

June 21, 1853, he married Persis Stebbins of Wilbraham: the issue was: John Cone, born August 16, 1857.

Aaron Kimball began business at Brookfield as a country merchant, in 1821, with small capital, except force and perseverance. In 1830 he formed a partnership with J. P. Robinson, and commenced the manufacture of shoes at Brookfield. In 1851 they opened a shoe and leather store on Fulton Street, Boston, from whence they removed to the well-known warehouse on Hanover Street, opposite the American House.

For thirty-four years Mr. Kimball was the senior partner of the wholesale boot and shoe house of Kimball, Robinson and Co., Boston.

During the financial storms of this period all their business engagements were met with great promptness. The panic of 1837 especially tested Mr. Kimball's executive ability with great credit to himself.

He belonged to that school of men who did business on honor, and whose word was considered as good as their bond. He possessed sterling integrity, great firmness, a pure character, and was considered the leading business man of his day at Brookfield.

He retired from active business in 1864, and died at Brookfield, May 17, 1866.

JOHN PARMELEE ROBINSON.

Rev. John Robinson, the supposed ancestor of the subject of this sketch, was the well-known pastor of the Pilgrim Church. He became connected with that church at Scrooby soon after 1606 while it was under the ministration of Richard Clyfton. He was born in Lincolnshire in 1576, and entering Emanuel College in 1592 he took the degree of M.A. in 1600 and B.D. in 1607. He began his ministerial labors in Mendham, where on account of his puritan tendencies he was at length suspended from his functions. Retiring to Norwich, after preaching a short time to a small puritan congregation, he at last re-

nounced all communion with the church. Robinson afterwards said "that light broke in upon him by degrees, that he hesitated to outrun those of his puritan brethren who could still reconcile themselves to remain in the establishment." He was called even by an opponent of separatism "the most learned, polished and modest spirit that ever the sect enjoyed."

In 1608 he went with the church to Amsterdam where it remained a year and to Leyden in 1609. Mr. Clyfton having decided to remain at Amsterdam, Mr. Robinson was chosen pastor and at his house on Clock Alley in the rear of St. Peter's Church, in Leyden, his congregation probably met on the Sabbath. Here Robinson lived from the 5th of May, 1611, the date of the deed of the premises, until his death in 1625. The records of the church of St. Peter's show that he was buried under its pavement and that the sum of nine florins was paid for the right of burial. This sum, however, only secured a place of deposit for the term of seven years and it is therefore probable that at the end of that time either his coffin was removed to an unknown grave or his ashes were scattered in the burial of others.

Subsequent to the death of Mr. Robinson his widow and son Isaac came to New England and from this son the subject of this sketch was probably descended, the line of descent from John being Isaac, Thomas, David, David, Noah, Hezekiah and John Parmelee.

John Parmelee Robinson was the son of Hezekiah and Rebecca (Cooley) Robinson and was born in West Granville in the county Hampden, Massachusetts, April 24, 1809. Rebecca (Cooley) Robinson, his mother, was the daughter of Josiah Cooley, of Longmeadow, and descended through him and another Josiah and two Eliakims from Benjamin, who came from England about 1635 and not long after settled in Springfield. Benjamin Cooley is first mentioned in the history of Springfield as owning land at the "long meddowe" in 1645, a part of the town which was incorporated as a precinct in 1715 and a separate town in 1783. It is evident from the records that the Cooley family always retained their lands at the Longe Meddowe in Springfield and in Longmeadow after its incorporation. Mr. Cooley was one of the selectmen of Springfield as early as 1646, and occupied a position on the Board many years. At later dates he is called Ensign Benjamin Cooley and is spoken of as distinguishing himself in the Indian Wars.

The other children of Hezekiah Robinson were Josiah C., of Longmeadow, and Noah H., of Elmira, New York, both deceased, and Henry A. of Springfield and Emeline and Harriet R., both unmarried. The subject of this sketch attended school at West Granville and afterwards at the Westfield Seminary where a more thorough education was possible than the public schools of his native town could furnish. After leaving school he was in 1828 and a part of 1829 employed as teacher in West Granville, and for a short time afterwards in Longmeadow, the old home of his mother. At the age of twenty-one he removed to Brookfield where with Aaron Kimball he engaged in the manufacture of boots and shoes. With devoted labor and careful management the business of Kimball & Robinson after a solid foundation had been laid assumed large proportions, soon requiring more attention to the sale of goods in Boston than visits to that city twice in a week could furnish. In 1852 Mr. Robinson removed to Boston and there took up his permanent residence. Up to that time the Boston business had always been transacted by Mr. Robinson while Mr. Kimball gave his attention more particularly to the business of the factory. Mr. Robinson had occupied for the transaction of his business a part of the office of William C. Murdock in Fulton Street (that part of Boston then being the headquarters of the shoe and leather trade), who did a commission business in boots and shoes. This business Kimball & Robinson bought out in 1852 and for several years they carried on a large and increasing business at the old stand. During Mr. Robinson's connection with Mr. Kimball and afterwards in other business connections, his house may be said to have been the largest in their line of business in Boston. They not only sold their own goods but those manufactured by others in Brookfield, Medway, Hudson, Massachusetts, and Dover, New Hampshire, the manufacture being carried on on joint account and Mr. Robinson always making the purchase of leather.

After remaining in Fulton Street a few years Kimball & Robinson removed to Hanover Street and occupied a store opposite the American House. While there two trusted employees of the house were taken into partnership and the firm-name became Kimball, Robinson & Co. It so remained until December 1, 1864, when the partnership expired by limitation, and Mr. Robinson formed a new firm, associating with himself James Longley, Jr., under the name of Robinson & Longley. Mr. Longley had been brought up in the house and on the 24th of October, 1866, married Julia Frances, Mr. Robinson's daughter.

At the beginning of the War of the Rebellion Mr. Robinson's house, like other large boot and shoe concerns of that period, suffered heavily from losses at the South, but by shrewd management and persistent effort his firm not only successfully went through the financial storm, but assisted many others, as in the struggle of 1857. In 1865 Robinson & Longley removed to Pearl Street, where they continued in business until 1867, when they were succeeded by Loring & Reynolds, in whose concern Mr. Robinson and Mr. Longley were special partners. Mr. Kimball died in 1866, but Mr. Robinson continued his interest in the Brookfield factory until September, 1881, when he sold the property.

John P. Robinson

Francis Lord

Mr. Robinson died at North Conway, N. H., August 5, 1882. He married, February 18, 1835, Eliza A., daughter of Stephen and Fanny (Paige) Rice, of Hardwick, and had four children,—Frances Eliza, Julia Frances, John Cooley and Anna Eliza, all of whom died young except Julia Frances, the wife, now living, of James Longley, of Boston, as has been already mentioned. Stephen Rice, of Hardwick, the father of Mrs. Robinson, was descended, through Stephen, of Westboro', who married Dorothy Woods, of Marlboro', Beriah Rice, of Westboro', who married Mary Goodenow, of Marlboro', Thomas Rice, of Marlboro', who married Anna Rice, his cousin, Thomas Rice, of Sudbury, who married a wife Mary, from Edward Rice, born in England about 1594, who came to New England before 1639, and settled in Sudbury in that year.

During the residence of Mr. Robinson in Brookfield he was a leading man in the town, prominent in every good work, but, with the exception of the office of postmaster, which he held under the Whig administration inaugurated by the election of Zachary Taylor in 1848, he held no public office. Aside from his interest in the Unitarian Society, of which he was an active and useful member, and his interest in the general welfare of the town and the comfort and happiness of its people, he devoted his time and energies to his business, and neither sought nor desired public station.

After he came to Boston, he first associated himself with the church at the corner of Beach Street and Harrison Avenue, of which Rev. James I. T. Coolidge, then a Unitarian, was pastor, and later with that of Rev. Edward E. Hale, near his residence, which was at the corner of Washington Street and Chester Park. In the ministry at large, of which he was once an officer, he felt a special interest, and did much to sustain it and promote its usefulness.

Like other business men who, by the cultivation of all their powers, build up and maintain prosperous enterprises in business, Mr. Robinson looked on his school instruction as only the beginning of knowledge, and continued through life to build on the foundation laid in his boyhood, and educate himself in wider fields of knowledge than the demands of his daily vocation required. Possessed of an exceedingly genial temperament, of good common sense, an unerring judgment, an unswerving integrity, a capacity for honest and thorough investigation, and tastes inclined as his mind developed to literary pursuits, it would have been difficult to find a station in public or private life which he could not have creditably filled. For many years he was a director in the Eliot Insurance Company, and afterwards one of the organizers and a director of the Eliot Bank and its successor, the Eliot National Bank, until his death; and to his conservative prudence and sagacious insight these institutions owed a debt of gratitude which they were ever ready to acknowledge.

FRANCIS HOWE.

Francis Howe, whose portrait accompanies this sketch, was descended from John Howe, the first American ancestor. John Howe came from England and first settled in Watertown whence he removed to Sudbury where he was living in 1639, and made a freeman in 1640. In 1642 he was a selectman in that town. He was one of the petitioners for the grant constituting the town of Marlboro', and in 1657 removed to that place. The petition for the grant was presented to the General Court in May, 1656, and besides Mr. Howe, the petitioners were: Edmund Rice, William Ward, Thomas King, John Woods, Thomas Goodnow, John Ruddocke, Henry Rice, John Bent, Sr., John Maynard, Peter Bent and Edward Rice. In compliance with the petition a plantation known by the Indian name Whipsuppenicke, was granted and laid out containing 29,419 acres.

It is said that John Howe was the first white man to take up his residence on the grant. He built a house and there lived until his death in 1687. By a wife, Mary, whose death occurred not far from the time of his own, he had eleven children—John, 1640; Samuel, 1642; Sarah, 1644; Mary, 1646; Isaac, 1648; Josiah, Mary again, 1654; Thomas, 1656; Daniel, 1658; Alexander, 1661; and Eleazur, 1662. Josiah, one of the above sons, married March 18, 1671, Mary Haynes and had five children—Mary, 1672; Mary again, 1674; Josiah, 1678; Daniel, 1681; and Ruth, 1684. Josiah, one of these children, married June 14, 1706, Sarah Bigelow, and November 22, 1713, Mary Marble, and died September 20, 1766. His children were—Phinehas, 1707; Abraham, 1709; Rachel, 1710; Sarah, 1714; Mary, 1716; Josiah, 1720; Jacob, 1724. Abraham Howe, one of the above, settled in Brookfield, and married Martha Potter. His children were—Ephraim, born September 23, 1733; Abraham, 1735; Abner, 1736; Sarah, 1738; Rachel, 1741; Martha, 1744; Persis, 1749; Eli, 1752; and Abraham again, 1758. Ephraim, one of the children of Abraham, married in September, 1757, Sarah Gilbert of Brookfield, and had William born in 1759; Molly, 1761; Rachel, 1763; Sarah, 1766; Martha, 1768; Lucy, 1769; and Josiah, 1774. William Howe, one of the above children, born November 15, 1759, was a trader in Brookfield, and married November 2, 1780, Abigail, daughter of Jabez Crosby of Brookfield, and had Sally, 1782; Nancy, 1784; Jabez C., 1787; Otis, 1788; Otis again, 1790; William, 1792; George, 1795; Amos, 1797; Francis, 1799; Oliver, 1801; Charlotte Abigail, 1804; and Charlotte again, 1807. Jabez C. and George Howe were the late distinguished merchants of Boston, known as partners in the well-known house, of J. C. Howe and Co. Otis Howe was also a merchant in Boston, and the three daughters, Sally, Nancy, and Charlotte Abigail, married Darius Hovey and Cyrus Dean, of Brookfield, and Samuel Johnson of Boston.

All the children are now deceased. Mr. Hovey was the father of the late Charles F. Hovey and George Hovey of Boston.

Francis Howe, the subject of this sketch, married in September, 1824, Maria A., daughter of Ephraim Richards, of Enfield, and had eight children, three of whom died young and five of whom survived him. A daughter, Abbie J., married S. R. Pattison, an attorney of London, England, who has acquired some distinction as an author and scientist, and also as a philanthropist. Lucretia P., another daughter, married Wm. J. Pingree, of Boston, of the firm of Wm. J. Pingree & Brother, one of the leading dry goods commission houses in that city. Among the living children there are two other brothers—William, for many years a planter in Mississippi, and Frederick A. Howe, an esteemed and prosperous commission merchant in Boston. Albert R. Howe, another son, born January 3, 1840, died in Chicago, June 1, 1884. He was major of the 5th Massachusetts cavalry in the War of the Rebellion, and after the war settled with his brother, William, in the South and engaged in the business of cotton planting. He was a member of the 43d Congress from Mississippi, and afterwards until his death was a merchant in Chicago.

Francis Howe was educated in the schools of his native town, and began business in Enfield. As his business grew and his capacity for its management developed he found the field in which he operated too narrow for the full satisfaction of his active spirit, and he removed to Boston, where, for some years, he was engaged in the West India business as a member of the well-known firm of Pope & Howe. With the competence which he had acquired as the result of his successful business career in Boston, he returned to his native town, whose inland air was more congenial to him than he had found the harsher airs from the sea. In Brookfield, after his return, he was associated for some time with Chester W. Chapin, of Springfield, and Frank Morgan, of Palmer, in the ownership of a stage-line between Worcester and Hartford, and at the same time carried on a large and successful country store. He always felt a deep interest in State and national politics, and was an active and influential leader of the democratic party of the town. As the candidate of that party he represented the town in the house of representatives in 1841–43, and represented Worcester County in the Senate in 1846. Subsequent to the Kansas outrages and in consequence of the attitude concerning them assumed by the party to which he had always been warmly attached he became a member and one of the founders of the Republican party, and to that organization and its success he lent his aid and energies.

As a member of the Orthodox Congregational Church, with which he became connected in 1867, he was always generous in his benefactions, and in private charities his hand was always found open and his heart warm. In all the varied fields of labor into which he had entered he carried with him a sound judgment, good common sense, a firm will, unswerving integrity, a generous spirit and a determination to win success. It was said, by one who knew him, "he will be long remembered as a gentleman of kind and generous feelings, courteous manners and uncompromising integrity. The church, society and the community have suffered a serious loss and his death will be severely felt by a large circle of friends and relatives." Mr. Howe died in Brookfield January 4, 1879, leaving, besides the children above mentioned, a widow, who is still a resident of that town.

LUTHER STOWELL.

Luther Stowell was the son of Luther and Lucy (Richardson) Stowell and was born at Sturbridge December 22, 1799. He came to Brookfield with his parents when young and spent his life here. Many of his winters when a young man were devoted to school teaching. May 11, 1827, he married Sophia Barret, of Brookfield. Mr. Stowell was a man who gave close attention to his own pursuits, which were principally agricultural. He was esteemed a good citizen, represented his town as selectman and in 1840 and 1860 represented his district in the Legislature of the State. Mr. Stowell was a man of good judgment and in his business affairs was successful. He died at Brookfield August 5, 1865.

WILLIAM A. BANISTER.

William A. Banister was born at Brookfield, Mass., June 4th, 1807. He was the son of Seth and Dolly (Cutter) Banister, and belongs to the sixth generation bearing the name at Brookfield. His paternal grandfather, Seth, was a leading man in military affairs. In 1777 had served in the Revolutionary army nineteen months, the highest average in the third precinct; commanded a company in the service and rose to the rank of colonel. He married Marcy Warriner, of Brimfield. Their children were William Bostwick, born November 8, 1773, a benefactor of Newburyport; Liberty, born October 16, 1775; Seth, born January 4, 1778, was a captain in the War of 1812 and died at Brookfield September 7, 1857.

The issue of Seth and Dolly Banister was: Caroline C., died July 11, 1879; William A. the subject of this sketch; Eliza Ann, died 1828; Sarah, died young; and Seth W., born January 15, 1811, and died October 5, 1861.

William A. Banister spent his boyhood at Brookfield, and from there went to Boston. In 1831 he engaged himself at Charleston, S. C., as a salesman.

His close attention to his duties through three successive yellow fever seasons showed his devotion to business entrusted to him. Shortly afterwards the mercantile house of Banister & Ravenel was established for direct trade between Charleston and Europe, with Mr. Banister at its head. Mr. Meminger, after-

Luther Stowell

W. A. Barrett

Edwin Rice

wards Confederate Secretary of the Treasury, was a special partner in this house.

After this time Mr. Banister made annual business visits to Europe, and in 1838 was a passenger on the Great Western, the finest Atlantic voyage made by passenger steamer from America to England. He witnessed the demonstrations at the coronation of Queen Victoria in that year. In 1845 he moved to New York city, and was associated with several large importing and jobbing houses, taking rank with the first merchants of his day, and doing a business of several millions annually. He always showed the courage, capacity and high honor which most become a merchant. He retired from active business in 1859.

In 1861 he was South on business, and witnessed the bombardment of Fort Sumter and the surrender of the same on the afternoon of April 13th.

Mr. Banister has shown his interest in humanity by his works. He has assisted in educating his three nephews, sons of his brother, Seth W.; has given several thousand dollars to the home for aged men at Newburyport, a beautiful gate-way to the cemetery at Brookfield, in conjunction with Otis Hayden, Esq., and donated ten thousand dollars for founding a public library at Brookfield.

Of late years Mr. Banister has lived in comparative retirement, with New York City as his home.

EDWIN RICE.

Edmund Rice, the American ancestor of the subject of this sketch, came from Barkhamstead, in the County of Hertfordshire, in England, and settled in Sudbury, Massachusetts, in 1638 or 1639. He was a Selectman in 1644 and for some years afterwards, and deacon of the church in 1648. His son Thomas Rice also lived in Sudbury and by a wife Mary had thirteen children, one of whom was Peter, born October 24, 1658. Peter Rice, of Marlboro', married Rebecca, daughter of Abraham and Hannah (Ward) Howe, of Marlboro', and had eleven children, one of whom was Elisha, born December 2, 1690. Elisha Rice, of Brookfield, married Martha Rice October 6, 1720, and had seven children, one of whom was Elnathan. Elnathan Rice, of Brookfield, married Lucy Walker in October, 1754, and had six children, one of whom was Rufus, born February 7, 1764. Rufus Rice, of Brookfield, married Betsey Moore October 2, 1786, and had nine children, one of whom was Shepard, born September 20, 1790. Shepard Rice, of Brookfield, married Mahala Carpenter April 22, 1810, and had Elsie (1812), who married John E. Ainsworth, of Brimfield; Elliot (1814), who married Harriet Nickols; Edwin, April 11, 1817; Miriam, who married Sylvanus King, of Monson and Leprelet.

Edwin Rice, the son of Shepard, is the subject of this sketch. He received such an education as the schools of his native town were able to furnish supplemented by that which his native gifts fortunately enabled him to acquire. After leaving school, with the other boys in his neighborhood he naturally drifted into the shoe establishments of Brookfield, then extensive and flourishing, to learn the business of manufacturing shoes and to prepare himself for active life. He soon, however, found the field into which he had entered too narrow for his restless spirit and on the 20th of April, 1841, he went to Boston and engaged in the retail furniture business in partnership with David Walker. This enterprise proved unsuccessful and the end of six months found the concern insolvent. The creditors offered a settlement at a large discount on their indebtedness which Mr. Rice refused and after a year's hard work as Sheriff's keeper and in other occupations he liquidated the entire liabilities of the concern and acquired a reputation for industry and integrity which he has retained through life.

In 1845 he was appointed constable by Thomas A. Davis, the mayor of Boston, and held that officer's warrant not far from twenty-five years. His promptness in the despatch of business, his accurate and intelligent methods, and above all his thorough honesty in all his dealings made him a popular officer. Among the leading lawyers of Court Street, Sohier and Welch, Hubbard and Watts, Fiske and Rand, Whiting and Russell, Hutchins and Wheeler, Whitman and Davis, and other attorneys, too numerous to mention, entrusted him with their business, and his income from this source enabled him to make investments in real estate, in which he has found a profitable account. In 1851 he was commissioned by Governor Boutwell as coroner, and the business of that office, by no means insignificant, was added to his regular occupation as constable. This office he held about ten years, and he has since devoted his full time to the management of his real estate and other properties of which he has become possessed.

When Mr. Rice came to Boston, in 1841, he settled in East Boston, and during the forty-seven years which have since elapsed he has lived within fifty feet of his present residence in Saratoga Street. At that time the population of East Boston was about one thousand, and there are now living on the island only four families that were living there then.

Mr. Rice married March 5, 1838, Frances L. Muzzy, of Brookfield, by whom he had no children. His second wife was Abbie E. Brigham of Boston, daughter of Major Franklin Brigham, of Lancaster, whom he married August 13, 1878. He has an only child, Edwin Brigham Rice, who was born December 5, 1879.

Mr. Rice has never sought political preferment, and has declined all participation in the management of enterprises, in which he did not have a substantial interest. He is a large owner in the Quincy Mining Company, and as one of its directors makes an annual visit to its properties in Michigan. He is an enthusiastic Mason, an active member of Joseph Webb Lodge of Boston, and also a member of the National

Lancers. He is connected with the Unitarian Society of East Boston, having been brought up in a liberal faith. His father was active in the settlement of a Universalist church in Brookfield, and from Universalism to Unitarianism was an easy transition for the son.

Mr. Rice, at the age of seventy-one, is still active in mind and body, and with the enjoyment of a handsome competence, acquired by his own skill and energy and of a happy home, he has apparently many years yet before him of usefulness and content.

CHAPTER LXXX.

NORTH BROOKFIELD.

BY WILLIAM T. DAVIS.

NORTH BROOKFIELD is substantially the Second Precinct of Brookfield, which was incorporated March 28, 1750. The petitioners for a separate precinct in the northeasterly part of Brookfield having failed to secure an act of incorporation in 1749, presented a petition at the next session of the General Court in 1750, in which they stated as follows:

That your petitioners under our unhappy and remote situation from the place of public worship in said town having often petitioned the town for relief either by building a meeting-house at or near the centre of the town as it now lies or to set us off as a distinct parish as per our former petitions may appear; but being often denied our request which we thought most reasonable; the town at last made a grant to the inhabitants of the said part of the town that they with such as would join with them—they entering their names or sending them to the town clerk in writing within the space of three months from the date of the grant, should be set off as a distinct Parish—provided they and their possessions did not exceed one-third part of said town for quantity and quality as per the vote or grant of the town may appear; upon which vote or grant we agreed to build a handsome frame for the public worship of God; and in April last we preferred a petition to this Honored Court so agreeable (as we thought) to the town's vote that none would oppose it; but to our surprise we found such opposition from the town and some of our petitioners that caused us to desist the proceeding; and being willing to do anything reasonable to satisfy our disaffected brethren we covenanted and agreed for their satisfaction to be at the cost of a committee of uninterested worthy gentlemen mutually chosen who have been upon the spot and heard the pleas and viewed the proposed parish and have returned their judgment that the house stands just and reasonable to accommodate them as well as ourselves as per their return and the covenants we entered into may appear. Therefore your petitioners pray that this Honored Court will incorporate us who have returned our names to the town clerk agreeable to the vote of the town into a distinct Parish and invest us with parish privileges; granting also a liberty of others joyneing with us (not to exceed one-third part of the town as abovesaid) for the space of two years or eighteen months or as this Honored Court shall think meet; And your petitioners further pray that one-third part of the lands in said town sequestered to ministry and school use or the incomes thereof may be set over and secured to us; and also that the town of Brookfield abate or reimburse to your petitioners and such as join with them their proportion of a tax lately assessed on our polls and estates for the settlement and ordination charges of the Rev. Mr. Elisha Harding and the repairs of the old meeting-house amounting in the whole to about twelve hundred pounds old tenor currency more or less. And your petitioners as in duty bound shall ever pray.

This petition was signed by Thomas Hale, Wm. Ayres, Ebenezer Witt and fifty-four others, and the record of the General Court contains the following order:

That the prayer of the petitioners be so far granted as that they with their families and estates, together with such persons and their estates who shall within three months from this time signify that desire therefor under their hands to the clerk of the town of Brookfield, be and they hereby are set off a Distinct Parish and are endowed with all the privileges and subjected to all the duties which the other inhabitants of Parishes are by the laws of the Province endowed with or subjected to—Provided their possessions do not exceed one-third part of the said town of Brookfield for quantity and quality.

THOMAS HUBBARD, *Speaker pro tempore.*

In Council March 29, 1756, Read and Concurred.

SAMUEL HOLBROOK, *Dep. Secy.*

Consented to

S. PHIPPS.

After the incorporation of the Second Precinct the Second Parish was organized at the house of Jabez Ayres, Monday, May 21, 1750, by the choice of Capt. Wm. Ayres moderator, Capt. Wm. Ayres precinct clerk and Capt. Wm. Ayres, Capt. Ebenezer Witt, Samuel Gould, Noah Barns and Benjamin Adams precinct committee. Thomas Bartlett was chosen treasurer, Joseph Stone collector, and Wm. Ayres, Samuel Gould, Wm. Witt, Jason Bigelow and Moses Ayres were made assessors. The frame of a meeting-house was reared April 5, 1749, before the act of incorporation had been secured, and, though occupied, it was not completed for some years. Rev. Eli Forbush or, as he afterwards called himself, Rev. Eli Forbes, was invited to settle as pastor, and was ordained June 3, 1752. Mr. Forbes was born in Westborough in 1726, and graduated at Harvard in 1751. During his collegiate career he enlisted in the army to engage in the French war, but returned to Cambridge, and graduated seven years after he entered as freshman. During his pastorate he was for a time an Indian missionary, and established a church and school among the Oneidas. He was dismissed at his own request March 1, 1775, in consequence of certain indignities resulting from an undeserved suspicion of his disloyalty to the patriot cause. He was installed over the First Church in Gloucester June 5, 1776, and died in his pastorate in that town December 15, 1804.

The next settled minister was Rev. Joseph Appleton, of Ipswich, who was ordained October 3, 1776, and died in the pastorate July 25, 1795. Mr. Appleton came from a good stock. He was descended from Samuel Appleton, who was born in Little Waldingfield, County of Suffolk, England, in 1586, and was the seventh in descent from John Apulton, of Great Waldingfield, who was living in 1396. Samuel Appleton came to New England about 1635, and settled in Ipswich, where he had a grant of lands. He married Mary Everard, who came to New England with her husband and probably her children—John, Samuel, Sarah, Judith and Martha. Samuel, the second son, was born at Little Waldingfield in 1624, and during the career of Andros, in New England, he took a definite and influential stand against him. He married

Hannah Paine, and had Hannah, Judith and Samuel. By a second wife, Mary Oliver, whom he married December 8, 1656, he had John, Isaac, Oliver and Joannah. Isaac Appleton, one of the above children, born in 1664, married Priscilla Baker, and had Priscilla, Mary, Isaac, Elizabeth, Martha and Rebecca. Isaac Appleton, one of the above, born in Ipswich in 1704, married Elizabeth Sawyer, of Wells, in the State of Maine, and had Isaac, Francis, Elizabeth, Samuel, Thomas, John, Daniel, William, Mary and Joseph. Joseph, the youngest child, graduated at Brown University in 1772, and was settled in North Brookfield soon after he had completed his studies for the ministry. He married Mary Hook and had the following children, all of whom were born in Brookfield—Phineas, born in 1779, who died in 1800; Joseph, born in 1781, and died in 1793; Abigail Ellery, born in 1784; William, Sarah Hook and Mary Ann. William, the youngest son, was born in that part of Brookfield which is now North Brookfield, November 16, 1786, and died in Brookline, Mass., February 15, 1862. He came to Boston in 1807, and after a short career of preparation for mercantile pursuits he advanced step by step until he occupied a place in the front rank of Boston merchants. He was the president of the Branch Bank of the United States from 1832 to 1836 and a member of Congress from 1851 to 1855, and in 1861–62. He was also president of the Provident Association, and was a large benefactor of the Massachusetts General Hospital. He was a benefactor also of his native town, and as a memorial of him therefore, as well as of his father, this sketch has been introduced into this narrative. On the 16th of March, 1859, he gave to the church and parish, over which his father had ministered, a considerable number of books and the sum of $5000 for the purpose of establishing a Parish Library. He provided that the sum of $2000 should be kept as a permanent fund, and that the remainder, with the income of the fund, could be expended in the purchase of books and paying the current expenses of the library. The parish accepted the gift, and voted that the library should be called "The Appleton Library." It was also voted that the pastor for the time being and four other persons, chosen by the parish, should compose a board of trustees to have the library in charge. The original board consisted of Rev. Dr. Thomas Snell, the successor of Rev. Joseph Appleton, Rev. Christopher Cushing, Charles Adams, Jr., Dr. Joshua Porter, Bonum Nye and Gideon B. Dewing. The chapel was enlarged to receive the library, and, at the present time, there are nearly five thousand volumes on its shelves.

Rev. Thomas Snell, the successor of Mr. Appleton, was ordained June 27, 1798, and continued as sole pastor until September 17, 1851, and senior pastor afterwards until his death, May 4, 1862. His salary, which was objected to by some at the time of his settlement as too large, never during the sixty-four years of his pastorate exceeded five hundred dollars. Dr. Snell was an early and earnest advocate of the establishment of Amherst College, and in 1828 received from that institution the degree of Doctor of Divinity. He was born in Cummington, Mass., November 21, 1774, and graduated at Dartmouth in 1795. He taught an academy at Haverhill one year before going to Brookfield and was licensed to preach by the Tolland Association October 3, 1797. He delivered an oration at Brookfield July 5, 1813; a sermon on the completion of his fortieth year in the ministry in 1838, with a short history of the town; a sermon on the fiftieth anniversary of his ordination in 1848; an historical address containing a sketch of North Brookfield in 1850, and another containing a sketch of his own church in 1852. During his pastorate a new meeting-house was built in 1823 and dedicated January 1, 1824. The house was remodeled in 1842, lengthened twenty feet in 1853 and re-dedicated January 18, 1854, and again remodeled in 1874.

Rev. Christopher Cushing was installed as colleague with Dr. Snell September 17, 1851, and after his death continued as sole pastor until his dismissal, September 17, 1868. Mr. Cushing was born in South Scituate (now Norwell), Mass., and after graduating at Yale in 1844, entered the Andover Theological Seminary, from which he graduated in 1847. He became secretary of the American Congregational Union in May, 1867, sixteen months before his dismissal. He received the degree of Doctor of Divinity from Amherst College in 1871 and died in Cambridge October 23, 1881.

The successor of Mr. Cushing was Rev. Gabriel H. De Bevoise, who was installed September 17, 1868, and dismissed in 1880. After leaving North Brookfield he was installed at Leominster in 1881.

Rev. Sedgwick P. Wilder, born at Newfane, Vt., May 28, 1847, graduated at Yale Theological Seminary in 1875 and was installed June 24, 1880.

No other religious society existed in North Brookfield before its incorporation as a town. The Congregational Church was the nucleus of the town, and in order to make its sketch complete it must necessarily include that part of its history which lies back of the incorporation. The act incorporating the town was passed February 28, 1812. At a meeting of the parish held in 1810 it was voted to petition the Legislature for an act of separation and a committee was chosen for the purpose consisting of Daniel Gilbert, Jason Bigelow, Luke Potter, Aaron Forbes and Jacob Kittredge. Under the direction of this committee the following petition was drawn up and presented:

To the Honorable Senate and House of Representatives in General Court assembled:

The Inhabitants of the Second Precinct in Brookfield humbly pray that they may be set off from the other precincts in said town, and be incorporated into a Township by the name of North Brookfield; and that the territorial limits of such incorporation may be the same as these, & hereby the said Precinct is now designated.

And the said Inhabitants would beg leave further to state that from the extensive limits of said town, it being separated into three distinct precincts, together with the necessary mode of transacting the business of the same by annual rotation in each Precinct, they not only find the

distance of travel burdensome, but in considering the transacting of their parochial concerns a two-fold labor and expense; That the officers of said town are of necessity distant from the centre, and that from the number of its inhabitants and the multiplicity of the business of the said town the term of one day insufficient for transacting the same.

This petition not meeting with success, another was presented to the Legislature April 15, 1811, which was signed by Jason Bigelow, Wm. Ayres (2d), Ezra Batcheller, Luke Potter, Daniel Gilbert, Hugh Cunningham and Amos Bond, committee. As a result of this second effort, the following act of incorporation was passed February 28, 1812:

ACT OF INCORPORATION.

SECT. 1. *Be it enacted*, etc. That all that part of the town of Brookfield which has been heretofore called and known by the name of the Second or North Parish (excepting that part of said territory now lying south of the post-road leading from Worcester through Spencer to Springfield), together with the inhabitants thereon, be, and the same is hereby incorporated into a separate town by the name of NORTH BROOKFIELD. And the said town of North Brookfield is hereby vested with all the powers and privileges, and shall also be subject to all the duties to which other corporate towns are entitled and subjected by the constitution and laws of this Commonwealth.

SECT. 2. *Be it further enacted*, That the inhabitants of the said town of North Brookfield shall be entitled to hold such proportion of all the personal property now belonging to and owned in common by the inhabitants of the town of Brookfield, as the property of the said inhabitants of North Brookfield bears to the property of all the inhabitants of the town of Brookfield, according to the last valuation thereof.

SECT. 3. *Be it further enacted*, That the inhabitants of the said town of North Brookfield shall be holden to pay all arrears of taxes due from them, together with their proportion (to be ascertained as aforesaid) of all the debts now due and owing from the said town of Brookfield, or which may be hereafter found due and owing by reason of any contract or other matter and thing heretofore entered into, or now existing.

SECT. 4. *Be it further enacted*, That the said town of North Brookfield shall be holden to support their proportion of the present poor of the town of Brookfield, which proportion shall be ascertained by the present valuation of the town; and all persons who may hereafter become chargeable, as paupers, to the town of Brookfield and North Brookfield, shall be considered as belonging to that town, on the territory of which they had their settlement at the time of passing this act, and shall in future be chargeable to that town only.

SECT. 5. *Be it further enacted*, That the said town of North Brookfield shall be holden to pay their proportion of all State, town and county taxes assessed on the inhabitants of the said town of Brookfield, until a new valuation shall be made of the said Towns. *Provided*, That the said town of North Brookfield shall be holden, until the further order of the Legislature, to pay to the town of Brookfield such proportion of any of the expenses of maintaining the bridges and causeways over the rivers in the town of Brookfield, as a committee of the Court of Sessions for the county of Worcester shall determine; and said Court of Sessions are hereby authorized, on application of either of the inhabitants of Brookfield or North Brookfield, from time to time, to appoint a committee for the above purpose, whose report, made to and accepted by said court, shall be binding on the said towns.

SECT. 6. *Be it further enacted*, That any Justice of the Peace for the county of Worcester, upon application therefor, is hereby authorized to issue his warrant, directed to any freeholder in the said town of North Brookfield, requiring him to notify and warn the inhabitants thereof to meet at such time and place as shall be appointed in said warrant, for the choice of such officers as towns are by law required to choose at their annual town-meetings.

February 20, 1818, the Legislature passed an act to provide for the repeal of the fifth section of the above act, as follows:

Be it enacted, that Austin Flint, of Leicester, Nathaniel Jones, of Barre, and Joseph Cummings, of Ware, are hereby appointed a committee to hear and consider the claim of Brookfield on the one part, and of North Brookfield on the other; and finally to determine whether the town of North Brookfield ought in future to pay any part of the expenses of maintaining the bridges and causeways in the town of Brookfield. . . .

SECT. 2. *Be it further enacted*, That from and after the time the report of said committee, shall be filed in the office of the Secretary of the Commonwealth, the said fifth Section of said Act incorporating the town of North Brookfield, shall be repealed; and the duties and liabilities of said North Brookfield, resulting from the said section, shall altogether cease. . . .

The first town-meeting was held on Tuesday, March 10, 1812, and Daniel Gilbert was chosen moderator, and Moses Bond town clerk. The destruction by fire of the town records renders it impossible to either present in this narrative a list of selectmen and moderators of town-meetings and other officers or to make such extracts as would be desirable in portraying the life of the town. The first town-house was built in 1833. Before that time town-meetings had been held in the Congregational Church, as was the universal custom in the early days of New England towns, when the town and the parish were one and the same. Indeed, the meeting-house derives its name from the fact that it was the general meeting-place of the people. The first town-house in North Brookfield was not built by the town, but was owned by a company called the North Brookfield Town-House Company, and occupied by the parish and the town for town-meetings, schools and other purposes. This house was burned in the winter of 1846, and in 1847 a town-house was built by the town which was burned October 14, 1862, with all the records of the town and the books of the North Brookfield Savings Bank, whose treasurer, Hiram Knight, was also the clerk of the town. In 1863 the present building was erected at a cost of about twenty thousand dollars.

Though we are unable to furnish a list of town officers and thus show who, in the different generations, have been the men to whom the municipal interests have been confided, the following list of representatives to the General Court, covering for the most part a period when offices sought the men and not men the offices, will, to a considerable extent, make up the deficiency. It is taken from the State Register and the manual of the General Court, and is believed to be correct,

The following persons have represented North Brookfield in the General Court wholly or in part since its incorporation in 1812:

1813. Thomas Hale.
1814. None.
1815. None.
1816. None.
1817. Thomas Hale.
1818. None.
1819. None.
1820. Daniel Gilbert.
1821. None.
1822. None.
1823. Charles Henshaw.
1824. None.
1825. None.
1826. None.
1827. Eli Forbes.
1828. Wm. Adams.
1829. Wm. Adams.
1830. None.
1831. Tyler Batcheller.
1832. John Bigelow.
1833. Jonathan Cary.
1834. Eli Forbes.
1835. Tyler Batcheller.
Oliver Ward.
1836. Wm. Adams.
Joseph A. Moore.
1837. Kittredge Hill.
1838. Chauncey Edmunds.
Pliny Nye.
1839. Joseph A. Moore.
Freeman Walker.
1840. Freeman Walker.

1841. Ezra Batcheller.
1842. None.
1843. None.
1844. Hiram Edson.
1845. None.
1847. None.
1848. Amasa Walker.
1849. Amasa Walker.
1850. Charles Adams, Jr.
1851. Charles Adams, Jr.
1852. Charles Adams, Jr.
1853. John Hill.
1854. None.
1855. A. L. Poland.
1856. Levi Adams.
1857. Warren Tyler.

By an amendment of the Constitution adopted by the Legislatures of 1856 and 1857, and ratified by the people May 1, 1857, it was provided that a census of the legal voters in the Commonwealth on the 1st of May, 1857, should be taken and returned to the Secretary of the Commonwealth on or before the last day of June, on the basis of which the Legislature should provide for the creation of representative districts. Under this arrangement North Brookfield and Brookfield constituted the twelfth Worcester Representative District, and were represented as follows:

1858. Amasa Walker, of North Brookfield.
1859. Luther Stowell, of Brookfield.
1860. J. H. Jenks, of North Brookfield.
1861. Charles Fales, of Brookfield.
1862. Charles Adams, Jr., of North Brookfield.
1864. Edward J. Russell, of North Brookfield.
1866. Josiah F. Hebard, of North Brookfield.

Under the appointment of 1866, based on the census of 1865, the towns of Brookfield, North Brookfield, West Brookfield, Sturbridge and Warren constituted the Eighteenth Worcester District, and were represented during the ten succeeding years as follows:

1867. James S. Montague, of Brookfield.
Charles E. Smith, of West Brookfield.
1868. Amasa C. Moore, of Sturbridge.
Joseph B Lombard, of Warren.
1869. Ezra Batcheller, of North Brookfield.
Daniel W. Knight, of Brookfield.
1870. Benjamin A. Tripp, of Warren.
John Harvey Moore, of Warren.
1871. Martin L Richardson, of Sturbridge.
George S. Duell, of Brookfield.
1872. Daniel W. Knight, of North Brookfield.
Simon H. Sibley, of Warren.
1873. Noah D. Ladd, of Sturbridge.
Wm. B. Stone, of West Brookfield.
1874. Warren Tyler, of North Brookfield.
Stillman Butterworth, of Brookfield.
1875. Charles B. Sanford, of West Brookfield.
George T. Lincoln, of Sturbridge.
1876. Charles Fuller, of S urbridge.
John Wetherbee, of Warren.

Under the apportionment of 1876, based on the census of 1875, the same towns constituted the Twelfth Worcester District, and were represented as follows:

1877. Wm. H. Montague, of North Brookfield.
George W. Johnson, of Brookfield.
1878. George C. Lincoln, of North Brookfield.
Alvin B. Chamberlain, of Sturbridge.
1879. Theodore C. Bates, of North Brookfield.
Joseph Smith, of Warren.
1880. George W. Johnson, of Brookfield.
George N. Bacon, of Sturbridge.
1881. George A. Parratt, of West Brookfield.
George M. Newton, of Warren (died).
Lucius M. Gilbert, of Warren (vacancy).
1882. Hiram Knight, of North Brookfield.
David W. Hodgkins, of Brookfield.
1883. Emory L. Bates, of Sturbridge.
Horace W. Bush, of West Brookfield.
1884. Alden Batcheller, of North Brookfield.
Joseph W. Hastings, of Warren.
1885. Edwin D. Goodell, of Brookfield.
David B. Wright, of Sturbridge.
1886. Edwin Wilbur, of West Brookfield.
Marcus Burroughs, of Warren.

Under the apportionment of 1886, based on the census of 1885, Brookfield, North Brookfield, West Brookfield, New Braintree, Oakham, Sturbridge and Warren constituted the Fifth Worcester District, and have been represented as follows:

1887. Edwin D. Goodell, of Brookfield.
Samuel Clark, of North Brookfield.
1888. George H. Coolidge, of West Brookfield.
Henry D. Haynes, of Sturbridge.
Chosen for 1889. George Bliss, of Warren.
John B. Gould, of Warren.

The following residents of North Brookfield have held other State offices since its incorporation:

Amasa Walker, Senator, 1850; Secretary of the Commonwealth, 1851–52.
Freeman Walker, Senator, 1852, '53, '61.
Charles Adams, Jr., Senator, 1865–67, '78; State Treasurer, 1871–75.
Theodore C. Bates, Senator, 1883.

In 1854 the boundary line between North Brookfield and Brookfield was changed by the following act, passed April 15th in that year:

An act to set off a part of the town of North Brookfield and annex the same to the town of Brookfield. Be it enacted, &c., as follows:

Section 1. So much of the town of North Brookfield in the county of Worcester as lies southerly of a line beginning at a stone monument at the old post-road leading to Brookfield, a little northwesterly of what is called Wolcott Mill, and running thence south seventy-seven degrees and thirty minutes east three hundred and seventy-five rods to a stone monument as now established in the line of Brookfield and North Brookfield on the easterly side of the Stevens Pond, so called, with all the inhabitants and estates thereon, is hereby set off from the town of North Brookfield and annexed to the town of Brookfield; provided, however, that for the purpose of electing Representatives to the General Court to which the said town of North Brookfield is entitled until the next decennial census shall be taken in pursuance of the thirteenth article of amendment to the constitution, the said territory shall remain and continue to be a part of the town of North Brookfield, and the inhabitants resident therein shall be entitled to vote in the choice of such representatives, and shall be eligible to the office of representative in the town of North Brookfield in the same manner as if this Act had not been passed.

Section 2. The said inhabitants and estates so set off shall be liable to pay all taxes that have been legally assessed on them by the town of North Brookfield in the same manner as if this act had not been passed, and until the next general valuation of estates in this Commonwealth the town of Brookfield shall annually pay over to the said town of North Brookfield the proportion of any State or county tax which the said town of North Brookfield may have to pay upon the inhabitants or estates hereby set off.

Section 3. If any persons, who have heretofore gained a legal settlement in the town of North Brookfield by reason of a residence on the territory set off as aforesaid, or by having been proprietors thereof or who may derive such settlement from any such resident or proprietor shall stand in need of relief or support as paupers, they shall be relieved and supported by the said town of Brookfield in the same manner as if they had gained a legal settlement in that town.

Section 4. The selectmen of the town of Brookfield shall annually until the next decennial census, fourteen days at least before the second Monday of November, furnish to the selectmen of North Brookfield a correct list, so far as may be ascertained from the records of the town of Brookfield or any of its officers, of all persons resident on the territory hereby set off who shall be entitled to vote for representatives as aforesaid in North Brookfield.

Section 5. This Act shall take effect from and after its passage.

The part which North Brookfield took in the suppression of the Rebellion was what might have been expected in view of the character of its leading men. The spirit and energy displayed by these men, some

of whom were largely engaged in Southern trade, but whose patriotism controlled and suppressed every unworthy and selfish motive, deserve a commendatory reference in this narrative. A public meeting was held on the evening of the 19th of April, 1861, on the reception by telegraph of the news of the attack on the Sixth Regiment in Baltimore, "to see if North Brookfield will respond to the call of the President by raising a company of volunteers to offer their services to the government." The meeting was called to order by W. S. Phelps, who was chosen chairman, and it was addressed by J. E. Green, Freeman Walker and others. An enrollment list was opened for signatures, which was headed by Joseph C. Fretts and Charles Perry, whose example was soon followed by others. It is a singular fact that these two men, whose promptness to enlist in the cause of their country inspired the young men of the town to enter the service, should have both been killed at the battle of Antietam. After the adoption of appropriate resolutions the meeting was adjourned to the next evening of Saturday the 20th, and on that occasion the town hall was filled by citizens of North Brookfield and the adjoining towns. The enrollment of volunteers continued and the selectmen were requested to call a meeting of the town at the earliest practicable day. The meeting called by the selectmen was held on Monday, April 29th, and before that time the spirit of the town had been thoroughly aroused by the passage of troops on the railroad bound to the front. At this meeting it was voted that each volunteer who shall serve in the company now being raised in the town until mustered into the military service shall receive one dollar a day while engaged in drilling and when mustered in shall be supplied with a substantial uniform and a good revolver, and while engaged in active service his family shall receive eight dollars a month. Freeman Walker, John Hill and Augustus Smith were appointed a committee to procure the supplies voted by the town. At a subsequent meeting these gentlemen resigned and Charles Adams, Jr., J. F. Hebard and A. Woolworth were chosen in their place. On the 3d of June it was voted to pay State aid to the families of volunteers in accordance with an act of the Legislature which had just been passed. On the 3d of March, 1862, it was voted to pay State aid to families of volunteers to the amount the State promises to refund, and on the 3d of July it was voted to pay a bounty of one hundred dollars to each volunteer who shall enlist for three years and be credited to the quota of the town before the 1st of August, and on the 22d of August it was voted to pay the same bounty to volunteers for nine months' service. On the 8th of December, 1863, James Miller, Charles Adams, Jr., and T. M. Duncan were chosen to aid the selectmen in the work of obtaining recruits. On the 5th of April, 1864, the bounty to three years volunteers was increased to one hundred and twenty-five dollars, and on the 26th of June it was voted that a bounty of one hundred and twenty-five dollars be paid for one year's men, two hundred and twenty-five dollars for two years' men and three hundred and twenty dollars for three years' men. The amount of money appropriated and expended on account of the war was $34,825.55, of which the sum of $17,886.47 was expended in State aid and refunded by the State. The following list covers the various enlistments of Brookfield men, some of whom re-enlisted and whose names therefore appear more than once on the list:

Thomas S. Bates, three years.....1st Regiment, musician
Andrew Anderson, three years.....2d Regiment, unassigned
George Christy, three years.....2d Regiment, unassigned
Jonn Congdon, three years.....2d Regiment, unassigned
James Erwin, three years.. .....2d Regiment, unassigned

The following soldiers died in the service:

Henry R. Bliss, killed at Antietam, Sept. 17, 1862.
Thomas S. Bates, died in Washington, Feb. 6, 1864.
Wm. Bates, killed in the Wilderness, May 13, 1864.
James P. Coolidge, killed at Winchester, Sept. 19, 1864.
Wm. Clark, killed in Georgia, Dec. 10, 1864.
N. S. Dickinson, died of wounds, Aug. 18, 1864.
Peter Devlin, died at Nashville, June 5, 1865.
Joseph C. Fretts, killed at Antietam, Sept. 17, 1862.
Andrew J. Fisher, died Aug. 6, 1863.
John W. Gilmore, died at Newbern, April 13, 1862.
Lyman H. Gilbert, killed at Petershurg, Sept. 30, 1864.
Thomas Griffin, died at Salisbury, Dec. 7, 1864.
Albert T. Holman, died at Newbern, Sept. 23, 1862.
John A. Hughes, died May 16, 1863.
Wm. F. Hill, died in Virginia, Aug. 28, 1863.
James Henderson, died at Newbern, Oct. 3, 1864.
J. H. Jenks, killed at Cedar Creek, Oct. 19, 1864.
James A. Knight, died Aug. 10, 1863.
John F. Lamb, killed at Petersburg, June 29, 1864.
David S Moulton, killed at Fredericksburg, Dec. 13, 1862.
N. B. Maxwell, died at Andersonville, Aug 23, 1864.
Timothy McCarthy, died at Andersonville, Sept. 2, 1864.
Henry H. Moulton, died at Andersonville, Jan. 23, 1865.
Charles Perry, killed at Antietam, Sept. 17, 1862.
Albert F. Potter, died at Newbern, Jan. 28, 1863.
George S. Prouty, killed at Piedmont, June 2, 1864.
George L. Sherman, killed at Spottsylvania, May 12, 1864.
Lyman Tucker, died at Alexandria, Sept. 11, 1864.
Alvin M. Thompson, died at Andersonville, ——, 1864.
Louis D. Winslow, killed at Spottsylvania, May 12, 1864.

It has been stated, in an earlier part of this narrative, that the Congregational Church was the only church in the precinct at the time of its incorporation as a town. Not an inconsiderable number of its people were connected with a Baptist society in Brookfield; but to that organization outside of the limits of the town, no special reference will be made.

The foundation of the Methodist Episcopal Society seems to have been laid about the year 1829. From that time until 1833 Sabbath services were held, with some intermissions, in the Old Congregational Church. In the latter year, on the 30th of January, a new meeting-house was dedicated, and in 1834 North Brookfield was made a station under the charge of Rev. Henry Mayo. The society, for many years after 1846, held services in the town-hall and other available places until their present church was dedicated, May, 1861. The following list of preachers up to 1885 is given by Mr. Temple in his history:

James Shepard.....1841–42	E. S. Chase..... 1863
C. W. Ainsworth.....1843 44	Edwin S. Snow.....1864–65
Frederick Stewart.....1845	George Hewes 1866–67
Albert A. Cook.....1846	Gilbert R. Bent.....1868–69
George W. Weeks.....1847	L. P. Causey.....1870
E. F. Newell.....1847	Samuel A. Fuller.....1871
John Goodwin.....1848	W. A. Cheney.....1872–73
George Bowler 1849–50	E. H. Leeseman.....1873
John Goodwin.....1851	Reuben W. Harlow..... 1874
P. Wallingford.....1852–53	George E. Chapman.....1875–76
M. Leffingwell.....1854	J. M. Avann.....1877–79
W. J. Pomfret.....1855–57	John W. Fulton.....1880–81
J. W. Coolidge.....1858–59	J. S. Barrows.....1882–83
Daniel Atkins.....1860–61	E. R. Watson.....1883
N. F. Stevens.....1862	Porter R. Strattan.....1884–85

On the 29th of October, 1853, a second Congregational Society was formed, called the "Union Congregational Society." The church was organized June 7, 1854, and on that day Rev. Levi F. Waldo was installed. After his dismissal, June 13, 1856, the society remained without a pastor until the installation of Rev. William H. Beecher, June 3, 1857. Mr. Beecher remained until May 14, 1861. After a short supply of the pulpit by Rev. J. E. Tower, Rev. Luther Keene was installed in 1862, and continued in the pastorate until April 29, 1867. Rev. John Dodge supplied the pulpit about three years and a

half from December 2, 1867, and was followed in a supply by Rev. Charles E. Coolidge for about a year and a half. On Sept. 6, 1876, Rev. George W. Wilson was ordained, and remained until June 1, 1878. Rev. John W. Hird was installed March 28, 1879. The meeting-house of this society was built in 1854.

St. Joseph's Parish, the Catholic Society, began to hold services in June, 1851. Soon after that date North Brookfield became a mission church of that in Webster, and later of that in Ware, during which period it was under the charge of the pastors in those towns. While under the charge of Rev. William Moran, of Ware, the present church was begun in October, 1866, and completed in July, 1867, and placed under the charge of Rev. Edward Turpin. After the death of Father Turpin, at the close of a single year's service, Rev. Henry M. Smyth was placed in charge, whose pastorate also was terminated by death at the end of three years.

Rev. Michael Walsh followed, and remained thirteen years, until his death, when Rev. James P. Tuite was transferred from Clinton to North Brookfield. The society has a parsonage, with fifteen acres of land, a church and a cemetery of four acres, and is free from debt. Its membership numbers nearly twenty-three hundred.

The schools of North Brookfield have not been under the care of the old town of Brookfield since the incorporation of the Second Precinct, in 1750. In 1756 the town of Brookfield voted that the school-money raised in each of the three precincts should be expended within said precinct according to its pleasure. The Second Precinct, under this vote, assumed the right to levy and collect a tax within its own limits for the support of its own schools, and this right was always exercised during its life as a precinct. In 1760 the Legislature confirmed the right, and the precinct built its school-houses, appointed teachers, and raised money for the support of schools.

In 1791 the precinct was divided into seven school districts, and, until 1805, chose a School Committee to take charge of all the schools in the precinct. During the four years after that date each district chose its own committee, but in 1809 the old practice was resumed. It is believed that the districts as formed in 1791 continued until the final abandonment of the school district system, in 1869, except that in the mean time the central district had been divided into two, thus making eight instead of seven. On the abandonment of the district system, the school-houses which had been built at the expense of the districts were appraised at ten thousand dollars, and that sum was raised by tax, and each taxpayer credited with his due share. According to the last report of the school committee there were, at the close of the last year, nineteen schools in the town, including the high school, which was opened August 19, 1857, under the care of O. W. Whitaker, a graduate of Middlebury College. The high school house, built in 1856–57, was burned May 14, 1878, and a new brick building was erected on the old site. For the year 1887–8 the sum of $8500 was appropriated for schools, in addition to the Dog Fund of $401.28 and the State Fund of $202.95.

The population of North Brookfield, in the early years of its municipal life, did not rapidly increase. In 1820 it was 1095 and in 1840 had only reached 1468. In 1875 it was 3749, in 1880 4459 and in 1885 4201. The advance in population was owing to the introduction and gradual enlargement of the manufacture of boots and shoes in the town. Oliver Ward, of Grafton, first began the business in 1810, and in his shop many of those who, in later years, carried on a large business, served their apprenticeship. Mr. Ward's business rapidly increased, but in the panic of 1837 was so extended and incurred such serious losses that he abandoned and never resumed it.

In the mean time, the well-known firm of T. & E. Batcheller, both of whose members, Tyler and Ezra, had been brought up by Mr. Ward, started in business. The business of this firm was begun in a small way by Tyler Batcheller in 1819, who in 1825 took his brother Ezra into partnership and established the firm above mentioned. In 1830 Freeman Walker was admitted into the firm as a partner and the firm-name was changed to T. & E. Batcheller & Walker. Mr. Walker, however, retired in 1834 and the firm resumed its old name. In 1852 Charles Adams, Jr., Alfred H. Batcheller, Wm. C. King and Hervey I. Batcheller were admitted as partners, and the firm's name was changed to T. & E. Batcheller & Co. In 1848 Tyler Batcheller removed to Boston to take charge of the business, for the transaction of which, in connection with their manufacture, a store had been opened; and in 1860 Mr. Adams retired, followed soon after by Hervey J. Batcheller, and by Mr. King in 1865. Losses in Southern trade during the war caused a temporary suspension of the firm, from which, after the payment of all its liabilities, it soon recovered, and during which Ezra Batcheller died, October 8, 1862. The present firm-name is E. & A. H. Batcheller, and by the employment of not far from one thousand hands the annual product of the concern is not far from two millions of dollars.

The Batcheller family is descended from Joseph Batcheller, who came to New England from Canterbury, England, in 1636, and settled in Wenham. By his wife, Elizabeth, he had Mark, John, Elizabeth and Hannah. John, the second child, married, in July, 1661, Mary Dennis; and second, in May, 1666, Sarah, daughter of Robert Goodale, of Salem. His children were Joseph, born in 1660; John, born in January, 1666–67; Mark, born in 1678; Elizabeth, Ebenezer, Hannah, Mary, Sarah and David. David, the last-mentioned child, married Susannah Whipple and had David, 1710; Susannah, 1712; Joseph, 1713; Nehemiah, 1716; Abraham, 1722; Amos, 1727; and Susannah again, 1731. Abraham, one of these chil-

dren, removed from Wenham, the old family home, to Westborough, and thence to Sutton, and married Sarah Newton. Her children were Abraham, 1752; Abner, 1755; Vashti, 1757; Joseph, 1759; Benjamin, 1762; Ezra, 1764; Sarah, 1766; and Amos, 1768. Ezra Batcheller, one of these children, moved from Sutton to Brookfield in 1802, and married, in 1789, Mary, daughter of Daniel Day; and second, in 1814, Widow Ann Mayo. His children were Willard, born in 1789, and died in North Brookfield in 1853; Daniel, born in 1791; Tyler, born in Sutton, December 20, 1793; Alden, born in 1796; Orra, born in 1799; and Ezra, born in 1801. Tyler Batcheller, one of the above sons, was the founder of the Batcheller business in North Brookfield. He married, April 6, 1819, Nancy Jenks, of North Brookfield; and second, October 8, 1829, Abigail J. Lane, of North Brookfield. His children were Mary Day, born September 12, 1821, who married Abel Harwood, of North Brookfield; Martha Ann, born December 7, 1823, who married Aaron D. Weld, of North Brookfield; Emeline, born December 22, 1826, who married Wm. C. King, of North Brookfield; and Hervey Jenks, who was born in 1828.

Ezra Batcheller, brother of Tyler and his partner, many years, born in Sutton July 21, 1801, married first, April 7, 1824, Relutia Parks, of North Brookfield, and second, March 25, 1851, Lutheria Cummings, of Ware. His children were Lucius Edwin, born July 6, 1825; Elizabeth Henry, born December 17, 1826; Alfred Hubbard, born July 23, 1830; George Ezra, born December 14, 1833; Mary Relutia, born October 16, 1835, and married Josiah W. Hubbard, of Boston; George Ezra, again, born December 6, 1838; Sarah Cheever, born October 3, 1844, and Frank Arthur, born October 15, 1852.

Among the corporations and institutions in North Brookfield may be mentioned the North Brookfield Savings Bank, the North Brookfield Free Public Library and the North Brookfield Railroad Company. The Savings Bank was incorporated March 3, 1854, and, according to its last report, its deposits were $519,427.02. Its officers at the same time were: S. S. Edmands, president; Bonum Nye, treasurer; and Bonum Nye, clerk.

The Free Library may date its origin May 17, 1879, when, at a town-meeting, it was voted to accept various sums of money for its establishment. These sums created a fund to which the past and present scholars of the high school and citizens generally subscribed five hundred dollars; William H. Montague, one hundred dollars; Theodore C. Bates, five hundred dollars, and Alfred H. Batcheller one thousand dollars, with which trustees, appointed by the town, organized the enterprise. The library, with a reading-room, was opened November 26, 1879. The town makes an appropriation annually for its maintenance, and its shelves now contain about four thousand volumes.

The railroad company was organized January 14, 1875, with a capital of one hundred thousand dollars—ten thousand dollars of which was subscribed by individuals, and ninety thousand dollars by the town. The road was opened January 1, 1876, and a lease for ten years, which has been renewed for an additional term of fifty years, was made to the Boston and Albany Railroad Company, that company supplying the rolling stock. During the time of the first lease of ten years the company received under its lease $24,443.74, or, in other words, a dividend on its stock of an average of little less than two and a half per cent. per year.

In addition to Oliver Ward and the members of the Batcheller family, who have been prominent in the affairs of the town since its incorporation, may be mentioned: Hiram Ward, the firms of Johnson & Edson, and Dewing & Edmands, C. & D. Whiting, Whiting & Haskell, Whiting, Lowe & Co., Bond & Jenks, H. B. & J. N. Jenks, Woodis & Crawford, Jenks & Miller, Gulliver & Jenks, Gulliver, Duncan & Howe, Gulliver & Stone, P. K. Howe, Fullman, Livermore & Montague, Olmstead & R. Walker and A. & E. D. Batcheller, all of whom have engaged at various times in the manufacture of shoes for long or short periods. Nor must mention be omitted of Theodore C. Bates, Amasa Walker, Freeman Walker and Charles Adams, jr., all of whom have been not only prominent and useful citizens, but well known and influential in the walks of public life. Of Mr. Bates, who is still among the living, it is not proposed here to specially speak. It is sufficient to say that he is not only honored and esteemed among his neighbors and immediate friends, but has been deservedly the recipient of public honors whose measure, if his life and health be preserved, it is safe to predict, is not yet full.

Amasa Walker was born in Woodstock, Conn., May 4, 1799. He was descended from Augustine Walker, who was in Charlestown in 1641, and was the son of Walter and Priscilla (Carpenter) Walker, who removed while Amasa was yet an infant to the Second Precinct of Brookfield (now North Brookfield). He was educated in the common schools of North Brookfield, and in 1814, at the age of fifteen years, he entered a store in that town and afterwards one in South Brookfield, and finally the store of Moses Bond in North Brookfield. During most of the time from 1817 to 1820 he taught school, and in the latter year went into business in West Brookfield, continuing his interest until 1823. For a short time afterwards he was the agent of the Methuen Manufacturing Company, and in 1825 he removed to Boston, where he remained until 1840, a partner in the house of Carleton & Walker until 1829 and during the remainder of the time in business alone. In 1833 he delivered an oration before the Young Men's Society in Boston, in 1839 was president of the Boston Temperance Society, and in 1840 retired from business. In 1843 he returned to North Brookfield and in 1844 delivered a course of lectures at Oberlin

Amanda Walker

Tyler Batcheller

College. In 1848 he was a member of the Free Soil National Convention at Buffalo and was the successful candidate of that party for the State Legislature. In 1849 he was chosen to the Senate and in 1851 Secretary of State. In 1853 he was a member of the convention for revising the Constitution of the Commonwealth and in 1854 was chosen president of the North Brookfield Savings Bank at the time of its organization. In 1859 he delivered a course of lectures on political economy in Amherst College and in 1862 was chosen a Representative to Congress. In 1867 he received the degree of Doctor of Laws from Amherst and died at North Brookfield, October 29, 1875. He married, July 6, 1826, Emeline, daughter of Jonathan Carleton, of Boston, who was at that time his partner in business. On the 23d of June, 1834, he married Hannah Ambrose, of Concord, N. H., whose three children survived him.

Francis A. Walker, of Boston, is one of these children and was born in Boston, July 2, 1840. He removed with his father to North Brookfield in 1843 and was educated in its public schools preparatory to his admission to Amherst College in 1856, from which institution he graduated in 1860. He studied law with Charles Devens and George F. Hoar, then in partnership in Worcester, and in 1861 was made sergeant-major of the Fifteenth Massachusetts Regiment of Volunteers, under the command of Colonel Devens. On the 14th of September, 1861, he became assistant adjutant-general on the staff of General Darius N. Couch, and on the 23d of December, 1863, a colonel on the staff of the Second Army Corps. In 1865 he was breveted brigadier-general. He was wounded at Chancellorsville. captured at Ream's Station and confined in Libby Prison, and on his exchange left the service on account of impaired health. After his discharge he taught two years in the Williston Seminary, was then for a time connected with the editorial department of the *Springfield Republican*, and in 1870, after having had charge for a time of the Bureau of Statistics, was made Superintendent of the National Census of that year. He is now at the head of the Institute of Technology in Boston.

Freeman Walker was the brother of Amasa, and born in North Brookfield December 12, 1803. He was educated in the public schools of his native town, having, in addition, the advantages of one term in the Monson Academy. In the winter of 1822-23 he taught school in Western (now Warren), and in 1823 entered as clerk the store of Newell & Taintor. In the latter part of that year he went to Methuen to take charge of a store connected with the Methuen Manufacturing Company, of which his brother Amasa was agent. In 1826 he joined his brother in Boston, and became a clerk in his employ, in which position he continued until January 1, 1830, when he became a partner in the shoe manufacturing company of T. & E. Batcheller & Walker at North Brookfield. In 1834 he retired from this firm, and in 1835 began manufacturing shoes on his own account, and so continued until 1842. As moderator, selectman and overseer of the Poor he commanded the respect and confidence of his fellow-citizens, and as Representative to the General Court in 1840 and 1841, and as Senator in 1852, 1853 and 1861 he had opportunities of a wider field of action, He married, June 3, 1830, Mary, daughter of Amos Bond, of North Brookfield, and died July 13, 1883.

Charles Adams, Jr., was descended from Henry Adams, who came from England and settled in Braintree. He was the son of Charles Adams, a physician in Antrim, N. H., and was born January 31, 1810. He received his education partly from the public schools and partly from private instruction under the care of Rev. John Bisbee, of Brookfield, and Rev. Josiah Clark, of Rutland. He went to North Brookfield in 1832, and entered the business office of T. & E. Batcheller, where he remained twenty years as book-keeper. In 1852 he became a partner in the firm and so continued until his retirement in 1860. Besides holding various town offices he was a Representative to the General Court in 1850–51–52 and 1862; a State Senator in 1865–68; a member of the Executive Council in 1867–68–69–70, and treasurer and receiver-general of the Commonwealth from 1871 to 1875 inclusive. He received the degree of Master of Arts from Dartmouth College in 1878, and died at North Brookfield April 19, 1886.

With these sketches, this narrative, short as it is, must be closed. The writer is aware of its imperfections, but they are such as must be attributed to the scantiness of material essential to its completion. As was stated by him in his sketch of Brookfield, he has been indebted in its preparation to Mr. Temple, the historian, who has so thoroughly gathered the harvest that little has been left to those coming after him but the satisfaction of entering his granaries and filching from his store.

BIOGRAPHICAL.

TYLER AND EZRA BATCHELLER.

The following account of this firm, and the men who were associated in its management, was prepared by Mr. Charles Adams, Jr., and was the last literary work of his life. It is printed, without alteration, from his manuscript.

Of all the men who have been citizens of this town since its incorporation, no one, probably, has done so much to promote its material growth and prosperity as Deacon Tyler Batcheller; and a history of the town, without a brief sketch, at least, of his active and useful career, would lack an essential element. He may truly be called the founder of the now large and flourishing central village of North Brookfield. He

was born, as will be seen in the genealogical record, December 20, 1793, in the town of Sutton, where he lived with his father till April, 1802, when the family removed to this town, which, however, was then the North Parish, or "Second Precinct in Brookfield;" his father purchasing of Solomon & Edmund Matthews, by deed, August 19, 1801, and for many years occupying the farm ever since known as the "Batcheller place," now (1885) owned by J. Winslow Bryant. At an early age, probably in his fifteenth year, he went to Grafton and learned the trade of shoemaking of Mr. Nathan Johnson. At the close of his apprenticeship there he returned to North Brookfield, and was employed in the establishment of Mr. Oliver Ward, who, in 1810, had commenced in this town the manufacture of "sale shoes," the first and only manufactory of the kind in the State, west of Grafton. In the family of Mr. Ward he found a pleasant and congenial home for about eight years.

In 1819 he commenced business on his own account, at the "Wetherbee house," so called, which stood on the spot now occupied by the house of Mrs. Erastus Hill. Having married, the same year, he resided there with his family; the back part of the house serving as his manufactory. At first his entire business consisted only in what shoes he could make with his own hands; soon, however, taking into his service one or two apprentices, and his brother Ezra, who had already learned the trade of Mr. Ward. The first shoes he made were chiefly of a low-priced quality, especially adapted to the Southern trade. These he packed in empty flour-barrels and consigned to Mr. Enoch Train, who in those days ran a line of sailing packets between Boston and Havana. On these small consignments a large per cent. of profit was realized. In 1821 he purchased the "Skerry house" and farm in the centre of what is now the main village of the town, expecting to enter into possession the first of the following April; but in February, 1822, his dwelling and shop at the Wetherbee place were totally destroyed by fire, and he at once removed his family to his new purchase, the "Skerry house," where he resumed and continued his business in an out-building on the premises, until 1824. In that year, having previously taken into his service several additional employés, he built a small two-story shop, which is now a part of the immense structure known far and wide as the "big shop," into which January 1, 1825, he removed his business, and at the same date took into partnership his brother Ezra, continuing the same business, though somewhat enlarged, under the firm of T. & E. Batcheller. From this time forward to the end of his life the two brothers were associated as partners through all the changes in their business; and in giving a history of it, their names cannot be dissociated. Tyler, the senior, attended to the purchase of stock and to all other business abroad; while Ezra was the efficient and popular superintendent, almost always at home, and at his post, giving direction to all matters pertaining to the manufactory. Harmonious in all their business relations and interests, as well as in all measures devised for the public weal, the act of one was the act of both; and in most matters their names were usually coupled, and they were familiarly spoken of as "the Deacon and Ezra."

They now added to their business the manufacture of "Batcheller's Retail Brogan," an article adapted to the New England trade, and kept for sale in all the stores in this and many of the neighboring towns; their main business, however, being the manufacture of goods for the Southern and Western States. The firm of T. & E. Batcheller continued, with a constantly increasing business, until January 1, 1830, when, by the admission of Freeman Walker, it was changed to "T. & E. Batcheller & Walker." The business having largely increased, the factory was now enlarged to three times its original size. In 1831 they introduced the manufacture of Russet Brogans, specially for the trade of the Southern States—the first that were made in Massachusetts. They soon became a leading article in the shoe trade and continued to be so for many years. Mr. Walker retired from the firm in 1834, and the firm resumed its former style of "T. & E. Batcheller." At this time the business had increased from its small beginnings to what was then considered very large; but the manufacture for an entire year then was probably no more than the product of a single week in the "big shop" at the present time. Nothing that could properly be called machinery had been introduced to prepare the stock for bottoming, none of which was done in the factory, but was put out and done by workmen in their small shops in this and most of the towns in the vicinity—in some instances the stock was carried to a distance of twenty to thirty miles.

The firm of T. & E. Batcheller continued until June 10, 1852, when Charles Adams, Jr., Alfred H. Batcheller, William C. King and Hervey J. Batcheller were admitted to the firm, and its style changed to T. & E. Batcheller & Co.; meanwhile a store had been established in Boston for the transaction of their business, and Tyler Batcheller had found it necessary, for greater convenience, to remove his residence to Boston the latter part of 1848. Mr. Adams retired from the firm January 1, 1860, the firm-name remaining the same, and Hervey J. Batcheller retired soon after. The business had then increased, from the day of small things, to nearly a million and a half of dollars annually. In April, 1861, the Southern Rebellion broke out, paralyzing for a while almost the whole business of the country. This firm suffered with the rest, and their business being very largely with the Southern States, their losses were proportionally large. A suspension was inevitable, and they were temporarily under the general financial cloud. But an arrangement, highly honorable to them, was soon made, and in a few months they were enabled

to pay, and did pay, every dollar of their indebtedness, principal and interest. But Tyler Batcheller, the founder and for years the sole proprietor and manager of the business, and the efficient senior partner of the firm from its beginning, did not live to see that fortunate consummation. The disappointment and anxiety caused by the apparent loss of a large fortune—the accumulations of a half-century of successful business—the inability to meet present pecuniary liabilities; the future darkened by the civil war in which the nation was then involved, the termination and result of which could not be anticipated by any human foresight;—in the midst of this accumulation of adverse and discouraging circumstances, and probably to some extent in consequence of them, his health failed, and his constitution, never robust, and which had begun to feel the effects of advancing years, seemed entirely to give way, and after a brief confinement to his house and bed, and without any clearly-defined disease he died, October 8, 1862, nearly sixty-nine years of age,—apparently of mere exhaustion of the vital powers, accelerated, probably, by mental care and anxiety. Thus ended a life distinguished for industry, energy, perseverance, integrity and usefulness. If his life had been spared but a few months longer he might have seen the cloud, which overhung their business at the time of his death, dispelled, all the pecuniary liabilities of the firm paid in full, an ample competency for himself and family retrieved from the wreck of the old business, and a most favorable prospect for a future business, which, although he did not live to see it, was more than realized by the surviving partners, of whom his brother Ezra was henceforward to the end of his life the able and efficient senior partner. Mr. King retired from the firm in 1865.

In the early years of Tyler Batcheller there were no special indications of the prominent positions he was destined to fill in the community, and in the business world. In boyhood he was noted for his mild and peaceful disposition; never zealously mingling with his contemporaries in their noisy and boisterous sports; then and always modest and unassuming in his deportment; improving to the best of his ability the very limited advantages afforded in those days for schooling: a very few weeks in the district school each winter being the extent of his school education—a defect which was ever a source of regret to him.

He was very early inured to habits of industry and economy, which he retained through life. The following incident exemplifies both traits. The first three years of his service with Mr. Ward were the last three years of his minority, and his stipulated wages went to his father; over and above which, during that time he earned and saved five hundred dollars—a large amount for those days—the interest on which, as he told the writer, was his self-restricted annual allowance for clothing for several years—until he went into business on his own account.

He united with what is now the First Congregational church in North Brookfield, June 8, 1817. In the spring of 1818, in connection with Joseph A. (afterward Deacon) Moore, he organized and superintended the first Sabbath-school in town, and for sixteen years he was a member of the supervising committee of the same.

September 15, 1820, he was elected a deacon, when he was twenty-seven years of age, and continued in that office twenty-eight years—until he removed his residence to Boston.

He was married April 6, 1819, to Miss Nancy Jenks, daughter of Mr. Nicholas Jenks, one of the early residents of the town. She was a most estimable lady and helpmeet, the mother of all his children. Her early and lamented death, in 1828, was a great loss to the whole community. She was born August, 1796, and died October 5, 1828, leaving four small children—three daughters and a son. He married for his second wife, October 8, 1829, Miss Abigail Jones Lane, daughter of Captain Samuel Lane, a very worthy young lady who had been an inmate of his family four years, and had the care of all his children, to whom she was now called to be a second mother; the oldest was only seven years old at the death of their mother. She lived to see the daughters all married, and survived her husband six years. She was born at Bedford, Mass., August 1, 1810, and died at Boston, March 10, 1877.

The "Skerry farm," which he purchased in 1821, covered a large portion of what is now the central village—the whole of the northeast quarter and part of the southeast, on no part of which was there any building except the old Skerry house in which he lived until 1836, when it was demolished, and a new house built on its site, and which was his home until he removed to Boston in 1848. It is now occupied as a part of the "Big Shop," and is the southwesterly portion of it. About 1825 the land on the streets by which the farm was bounded began to be wanted for building lots. In disposing of them Mr. Batcheller, with a view to the development and growth of the village, rather than to his individual interest, adopted the liberal policy of selling them at only about their value for agricultural purposes, to men of good character who would probably become permanent citizens, and to workmen whose services were wanted in or near his manufactory. The first sale was to his brother and partner, Ezra Batcheller, where Frank A. Smith now lives: and in a few years those streets were lined by neat residences owned and occupied by a very desirable class of citizens. When "Grove Street" was opened through his land, and real estate had largely increased in value, he was asked by several individuals at the same time to set a price on building-lots; he declined, giving as a reason that several of his interested friends had intimated to him that at the prices at which he had been parting with building-lots, he was doing less than justice to him-

self, and perhaps to them. He accordingly proposed to leave the price to be made by two disinterested men mutually agreed upon, and that he would abide by their decision. The proposition was accepted, and carried into effect.

In 1848 it became necessary, for the convenience of the extensive business of the firm, that he should remove to Boston, which he did in December of that year, and, as was said at his funeral, "he carried his religion with him." He attended meeting regularly at Park Street Church, and November 2, 1850, he and his wife united with that church, then under the pastoral care of Rev. A. L. Stone, now of San Francisco, Cal. September 17, 1857, he was elected a deacon of that church, and to the close of life remained an active and devoted officer. He was also for several years a member of the Prudential Committee of that society.

Mr. Batcheller was an original member of the Boston Board of Trade: was chosen a member of its Committee of Arbitration, and served on other important committees.

In removing his legal residence to Boston Mr. Batcheller did not forget the town of North Brookfield, where he had passed nearly a century of his life, —nor the church and society there with which he had been connected more than thirty years, as was shown by his frequent visits and acts of liberality and beneficence.

Ezra Batcheller, the junior member of the original firm, if less prominent before the public, was, equally with his brother, an efficient and essential factor in the growth and prosperity of the manufacturing establishment. And to his business tact and energy is largely due the prompt extrication of the concern from their temporary embarrassment in 1861. He was a large-hearted, public-spirited man, of earnest piety; and his memory is fragrant of good deeds and an honorable and useful life.

The present firm name is E. & A. H. Batcheller & Company; and this is the only boot and shoe manufactory now in operation in North Brookfield. In 1875, as appears from the census report, they gave employment to 927 males and 150 females, and manufactured goods of the value of $1,817,000. Their facilities for business have been considerably increased since that date.

HON. CHARLES ADAMS, JR., A.M.

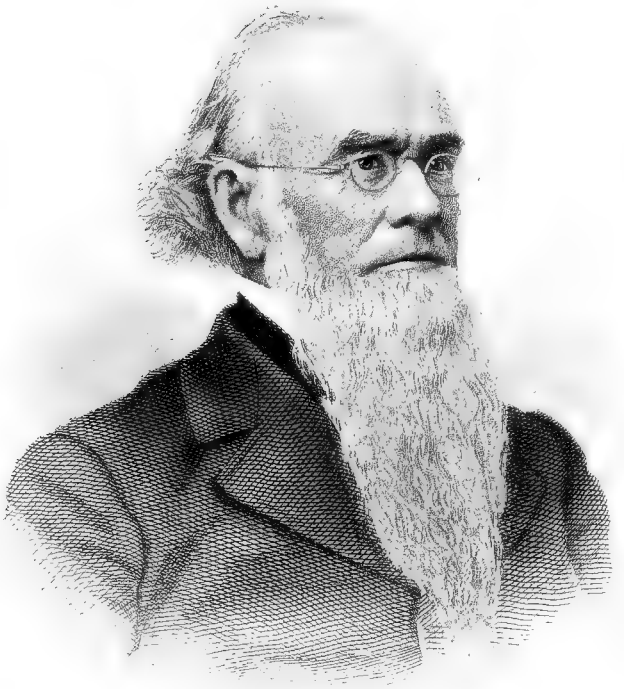
According to his own prepared family record, Mr. Adams is descended from Henry[1], who came from England and settled in Braintree; the line running through Edward[2] of Medfield, John[3] of Medfield, Abraham[4] of Brookfield, Jesse[5] of Brookfield, Charles, M.D.[6] of Antrim, N. H., and Oakham, Mass.

Charles, Jr.[7], was born at Antrim, in the part then known as Woodbury Village, now South Antrim, January 31, 1810, and died at North Brookfield, April 19, 1886. In addition to the advantages of the common schools, he attended a select school in Brookfield under Rev. John Bisbee, and studied eight months with Rev. Josiah Clark, of Rutland. This completed his school education. He served an apprenticeship of five years in a country store at Petersham, and was employed as clerk for a single year by J. B. Fairbanks, of Ware. He came to North Brookfield in 1832, and entered the employment of Messrs. Batcheller, shoe manufacturers, as book-keeper and accountant, which position he held for twenty years. In 1852 he became a member of the firm, and so continued until 1860, when he retired with a competence.

Mr. Adams was much in public life—having held by election most of more responsible town offices: was representative to the General Court for the years 1850, '51, '52 and '62; State Senator 1865, '66, 77 and '78; member of the Executive Council 1867, '68, '69 and '70; Treasurer and Receiver-General of the Commonwealth 1871, '72, '73, '74 and '75. He was also honored with special trusts; was commissioner of the Norwich and Worcester Railroad Sinking Fund; and for many years president of the North Brookfield Savings Bank. Perhaps it is enough to say, that in all these offices and trusts he fully met the expectation of his constituents for industry, ability, foresight, good judgment and integrity.

In manners, Mr. Adams had the dignity, without the preciseness, of a gentleman of the old school of official station. What was lacking in courtliness was more than made up by self-poise and an unaffected cordiality that won esteem, while it did not lessen respect. Always collected and maintaining a proper self-respect, he yet was at home equally in the kitchen of the farmers and the parlors of the educated. He saw a true manhood in whomsoever it existed, and yielded it due homage; he detected and did not conceal his contempt for mere pretence and outside show.

Though he often lamented his early disadvantages of schooling, yet he was, in the best sense, an educated man—not "self-made" as the popular phrase is, which implies the creating of one's surroundings and means. Rather, he subjected those surroundings to his will, and made them the means to develop and furnish his mind; and thus was educated and trained. He utilized whatever advantages were within his reach, whether at home or at school, behind the counter or in the counting-room; first as a subordinate and after as partner, owner and director. He was a learner, always and everywhere; seizing the opportunities, which both old and young so often throw away, to gain knowledge of men, and methods, and principles, and business, as well as books. And this early training, and the formation of habits of observation and inquiry and research, and this steady application to the work and duty of the hour, laid the foundation of the self-reliance and power of concentrated effort which fitted him for the higher duties and responsibilities of business life and official position. He succeeded because he had paid the full price of success.



Nat. Adams M.D.

Nor was his lack of school privileges apparent. He was well read in general and local history, as well as in political economy, the industrial sciences and finance. His memory was retentive, and was well stored with available knowledge. He was a good talker; and though commonly very practical in conversation, he yet possessed a mobile fancy and a vein of humor slightly imbued with satire that, combined and incited by refined instincts and pure thoughts and associations, made him a desirable acquisition to any social circle.

In the quiet life of a busy manufacturer, and even in the responsible station of a State official, there is little of incident and few turns of affairs to attract special notice and give interest to a biographical sketch. The startling situations, and conflicts, and triumphs which attach to military and professional life and make the reputation and renown of men of those classes and furnish the emphatic points in their biographies, are either wanting in legislative, and judicial and mercantile experience; or they are of strictly personal and temporary concern. They may have touched matters of success or popularity, vital in their day; but that day was a brief one, and results affected mainly the parties immediately interested.

While a member of the Legislature and the Executive Council, Mr. Adams gave his attention largely to matters of banking and finance, and questions growing out of the State's connection with the Troy and Greenfield, and the Boston, Hartford and Erie Railroads, and other corporations. He was chairman, or a member of the appropriate committees. To these committees is entrusted the shaping of the financial policy of the Commonwealth. And as several of his terms of service followed close upon the ending of the late Civil War, his sound views and practical good sense made his influence at that juncture of especial consequence. The reports from his pen are distinguished by a broad grasp, and able reasoning, and safe conclusions.

Mr. Adams did not claim to be a popular speaker, and attempted nothing in the line of oratory. He wrote out his intended remarks; and as he was a good reader, he made a favorable impression whenever he chose to appear before the public. He had himself and his theme well in hand; his points were clearly put; his evident mastery of his subject enlisted the hearer's attention, while his unaffected earnestness made a deep impression, if it did not carry conviction.

His style of writing was largely influenced by his leading pursuits. It was direct, unadorned, and what in Addisonian times would have been called didactic. He used Anglo-Saxon words and idioms; and the guiding thread of logic was always apparent in his sentences and consecutive sections. Having Scotch blood in his veins, it was only natural that he should have a love for Scottish history and literature. He became particularly fond of the poetry of Gray and Burns, and the poetry and romance of Sir Walter Scott. And the chance he had of going abroad in 1871, to complete the sale of State bonds in London, and which opportunity he embraced for extended travel in Scotland as well as on the Continent, intensified the early passion, and gave direction to his study and reflection in later years, after his retirement from office.

In a paper which he wrote in 1873, on "The Life and Times of Robert Burns," he tells us how he was first led into this attractive field. "In the year 1827, when I was in my seventeenth year, in a trade with another young man, to make the bargain even, I received a copy of 'Burns' Poems' in two small red-morocco bound volumes, without at the time knowing or caring who Robert Burns was. On opening the books I was delighted to find in them several songs which I had often heard sung by my mother—a descendant from clan McAllister—who was a fine singer —of course the finest I had then heard, and you will pardon me if I say the finest I have ever heard to this day (in *my* estimation). Some of her favorites, which I found in these volumes, were 'Bonnie Doon,' 'John Anderson my Jo,' 'Auld Lang Syne,' 'Highland Mary,' 'The Lea-Rig,' etc. And the reading of these songs in their peculiar dialect, naturally led my thoughts beyond the songs themselves and the singer, and awakened an interest in the author and his life and home; and thus insensibly I became an ardent admirer of Burns and Scotland." He then relates his visit to the Land of Burns in 1871, and gives expression to the thoughts inspired by the sight of the places and associations amid which the poet lived and wrote.

This paper, filling sixty-three closely-written pages of manuscript, reveals a trait of character which was prominent in all his life, viz., a tender and appreciative regard for his mother; and it furnishes a fair sample of his literary style. It is characterized by vivid descriptions of natural scenery and peasant life. He groups the hamlet, and its occupants and home-surroundings in a spirited picture, charming by its lights and shades, its mingling of the real and ideal, and all enveloped in the fitful sunshine and mists of the Ayr and Ayrshire. This paper, and a *diary* kept by him, and since written out in full, take rank above many modern published essays and books of travel.

Mr. Adams prepared and delivered an address at the semi-centennial of the Oakham Sabbath-School, May, 1868; an address at the centennial of Antrim, N. H., June 27, 1877, in response to the toast—"Scotch character: still marked by grit and grace;" an address delivered on Washington's birthday, 1874; and read a paper on North Brookfield family history before the New England Historic-Genealogical Society, February, 1884; and had partly completed a Sketch of the Life of Thomas Gray. But his principal literary work was the compilation of family biog-

raphies, comprising the leading Brookfield settlers, and filling ten large quarto volumes. These manuscript volumes contain historical matter, personal anecdotes and adventures, and family memorials of great value to genealogists, and are a monument of the author's patient research and discriminating judgment.

Both by nature and self-culture, Mr. Adams was a conservative man. But his was a conservatism that is an element of strength, and not of weakness; which was a consequent of deliberation and forecast, and not of timidity. He built on well-laid foundations and not on the sand. He made no more "haste" than "good speed." The meteor may outdazzle the evening star, but Jupiter remains king of the nightly heavens.

And this habit of mind fitted him for his work in the State treasurership and his other financial trusts. A wise conservatism always begets confidence, and, when joined with a clear head and habits of investigation, is the common antecedent of permanent success. This trait appeared as a factor in his daily life, in his friendships, in his views on education, on political and moral reforms, and on questions of theology and religion. He learned the Assembly's Shorter Catechism from his mother, and was accustomed to recommend it as a safe manual of Scripture doctrines to be taught to children. He was for fifteen years a member of Dr. Snell's Bible class. And he united with the Presbyterian Church because of its steadfast adherence to the old standards of faith and practice.

Mr. Adams was tender and strong in his social friendships, and his heart and purse were open to the calls of the needy and suffering. He bestowed his charities freely, but unostentatiously, on those who had a claim on his generosity and kindness. Many a widow and orphan will miss his timely help, and cherish and bless his memory.

He received the honorary degree of Master of Arts from Dartmouth College in 1878.

CHAPTER LXXXI.

WEST BROOKFIELD.

BY WILLIAM T. DAVIS.

THE town of West Brookfield should have been called Brookfield. It was the first place of settlement on the original grant; it held the first church, and holds the ancient burial-ground within its borders, and was made the First Precinct when the old town of Brookfield was divided into three. On the 28th of May, 1750, the Second Precinct was incorporated, including substantially the territory now included within the limits of North Brookfield, and on the 8th of May, 1754, the Third Precinct was incorporated (now Brookfield), leaving the west part (now West Brookfield) to retain the name and powers of the First Precinct. The steps taken to obtain the division of the town into precincts, and the several acts of incorporation, may be found stated in detail in the history of Brookfield in these volumes. A sketch of the church in the First Precinct up to the date of the incorporation of West Brookfield may also be found in that history; this narrative, therefore, will be confined chiefly to the career of the town since its incorporation.

In 1812 the town of North Brookfield was incorporated. The division of the remainder of the old town of Brookfield, after Warren or Western, as it was originally called, had been set off in 1741, and North Brookfield in 1812, was accomplished without contest and by general consent. At a town-meeting held on the 22d of November, 1847, at which Alanson Hamilton acted as moderator, it was voted "that the town choose a committee of two, one from each Parish, to present a petition to the next legislature to send out a disinterested committee to report to their body the terms upon which the town be divided, and that the town will abide said decision, provided that the town shall not disagree among themselves upon the terms of division previous to the first of January next, in which case said committee will petition the legislature to divide the town upon the terms agreed upon." The committee consisted of John M. Fiske and Francis Howe, the former from the First and the latter from the Third Precinct. A committee of twelve was also appointed, consisting of Baxter Ellis, Baxter Barnes, Nathaniel Lynde, Wm. Adams, Joseph Dane and Avery Keep, from the First Precinct; and Parley Blanchard, Elliott Prouty, Alfred Rice, Wm. J. Adams, Wm. Howe and Charles Flagg, from the Third Precinct, to consider terms and conditions of a division, and report to the town. At an adjourned meeting, held on the 27th of December, the committee made the following report, which was accepted:

The Committee chosen by the town of Brookfield to consider and agree upon an equitable division of said town into two distinct towns, in such manner and on such terms as shall subject each town to bear its just proportion of the burdens or expenses, and prevent liabilities of the whole undivided town, submit the following report:—Having duly considered all the facts and circumstances that we could bring to our minds, they are of the opinion that the town should be divided by the same line that divides the two ancient parishes, and the part lying west of said line, except Preston Howe's land, shall be incorporated as a new and distinct town, by the name of West Brookfield, with the following conditions or agreement, viz.:—If the County Commissioners shall order, either the road from Ware to West Brookfield depot, or the road from Fiskdale to South Brookfield depot, or both of them, to be made as they are now located, except a slight alteration may be made without additional expense within two years, each town shall pay an equal portion of the expense of making said road or roads, also of the present debts of the town, if any there be; West Brookfield shall relinquish and give up to Brookfield all their right or interest in the town farm, with all the personal property on or belonging thereto; Brookfield shall keep and support all the paupers who are now at the said establishment during their lives, West Brookfield paying to Brookfield fifty cents a week each for one-half the number of said paupers now at said alms-house during their lives. The names of the persons to be thus supported are as follows, and no other person, viz.:—Joseph Porter, Abigail Staples, Simeon

Johnson, David Snow, Eleanor Gilbert, Solon Phipps, Hannah Lawrence, Martha Richardson, Elizabeth Hobbs, Harriet Richards, Sally Forbes, Sally Parker, Huldah Wood, Mary Walker, Mary Ward, Esther Jennings, Sally Thomas, Abigail Paddock, John Lindley, William Richardson, Emily P. Morse and Orin Hamilton. Ruth Henshaw, insane, is to be supported by the town of Brookfield, and Harriet Candy to be supported in West Brookfield. All persons who may hereafter claim town aid are to be supported or assisted by the town in whose territorial limits they may have gained a settlement, by the laws of the commonwealth, prior to the division of said town. West Brookfield shall have the right to visit said alms-house, by an agent or committee, for the purpose of seeing that said paupers are well treated or taken care of. The expenses necessarily incurred by your committee they pray may be allowed, and that the town direct the Selectmen to give an order to Parley Blanchard, their chairman, for the sum of sixteen dollars for that purpose.

On the 4th of February the town voted to petition the Legislature for an act incorporating the new town substantially in accordance with the terms of the report, and on the 3d of March, 1848, the following act was passed:

AN ACT TO INCORPORATE THE TOWN OF WEST BROOKFIELD.

Be it enacted by the Senate and House of Representatives in General Court assembled and by the authority of the same as follows:

Sec. 1. All that part of the town of Brookfield, in the County of Worcester, which lies westerly of the line hereinafter described, is hereby incorporated into a separate town by the name of West Brookfield, and the said town of West Brookfield is hereby vested with all the powers, privileges, rights and immunities, and shall be subject to all the duties and requisitions to which other towns are entitled and subjected by the constitution and laws of the Commonwealth. The dividing line between the two towns shall be and the same is hereby established as follows: Beginning at the north end of said line at a town monument between Brookfield and North Brookfield; thence south eighteen and three-fourth degrees west thirty-one rods and twenty-two links to a stake and stones; thence south eighty-six degrees west twenty-four rods; thence north eighty-four and three-fourths degrees west ten rods and eighteen links; thence south fifty-six and three-fourths degrees west seventeen rods and five links; thence south fifty-four degrees west fifteen rods and twenty-three links; thence south sixty-nine and one-third degrees west fourteen rods and twenty-two links; thence south seven degrees west nineteen rods and seven links; thence south twenty-four and one-fourth degrees west nine rods and nine links; thence north fifty-six and one-fourth degrees west twelve rods; thence north fifty-two and three-fourths degrees west sixteen rods; thence south nine degrees west sixty-six rods and twenty links; thence south fifteen degrees west sixty-six rods and twenty links; thence south nine degrees west seventeen rods and seventeen links; thence south eighty-two and one-half degrees west fifteen rods and three links; thence south five and one-half degrees east fifty-nine rods and seven links; thence south fifty-nine degrees west eighteen rods and twelve links; thence south forty-three and one-half degrees west eight rods; thence south ten and one-half degrees east seven rods and four links; thence south thirty degrees east seven rods and four links; thence south fifty-three and one-half degrees east nine rods and thirteen links; thence south thirty-four degrees west twenty-six rods and thirteen links; thence south seventy-five and three-quarters degrees east nine rods and twenty links; thence south nine and one-fourth degrees west three rods; thence south seventy-four degrees east sixteen rods; thence south twenty and one-fourth degrees west one hundred and twenty-nine rods to the north bank of the river; thence southerly to the middle of the river; thence down the middle of the river to a point opposite the corner of land of Reuben Blair and the Brigham Farm, lying on the southerly side of said river; thence southerly to said corner; thence south thirty-three and one-fourth degrees west one hundred and eighty-five rods and fifteen links; thence north sixty-eight and three-fourths degrees west thirty-three rods and twenty links; thence south sixteen degrees west two hundred and thirty-six rods and twenty links; thence south sixty-seven and three-fourths degrees east thirty-two rods; thence south seven degrees west three rods; thence south seventy degrees east sixteen rods and eight links; thence south seventeen degrees west forty rods and two links; thence south eighty-four and three-fourths degrees west seven rods and fifteen links; thence south three and one-fourth degrees west twenty-six rods; thence south eighty-five and one-half degrees west twenty-five rods and thirteen links; thence north seventy and three-fourths degrees west twenty-eight rods and eighteen links; thence north eighty-six and one-half degrees west twenty-eight rods and five links; thence south twelve rods; thence south twenty-nine and one-half degrees west forty-four rods and fifteen links; thence south seventeen and one-half degrees west fifty-five rods and fourteen links; thence south seventy-five and one-half degrees east ninety rods; thence south thirteen and one-third degrees west eighty-eight rods and twenty-two links; thence north seventy-five degrees west sixty-one rods and twenty links; thence south nineteen and three-fourths degrees west eighty rods; thence south forty and one-half degrees east seventeen rods; thence north twenty-five degrees east twenty-three rods and fifteen links; thence south eighty degrees east fifty-four rods and ten links; thence south thirteen and one-third degrees west one hundred and twenty-seven rods and five links; thence north sixty-five degrees west sixty-eight rods and ten links; thence south sixty-two degrees west eleven rods and twelve links; thence north forty-nine degrees west five rods and nine links; thence north sixteen degrees west twelve rods; thence north sixty-one and one-half degrees west forty-two rods and twenty links, to a point on the town line between said Brookfield and Warren.

Section 2. The inhabitants of West Brookfield shall be holden to pay to the collector of Brookfield all arrears of taxes legally assessed on them in the said town of Brookfield before the passage of this act, and also shall be holden to pay their proportion of State and County taxes that may be assessed upon them previously to the taking of the next State valuation, said proportion to be ascertained and determined by the town valuation of the town of Brookfield next preceding the passage of this act; and the said town of West Brookfield shall be holden to pay one-half of the debts due and owing from the town of Brookfield at the time of the passage of this Act, and shall be entitled to receive one-half of all corporate personal property except as hereinafter provided and all assets now owned by said town of Brookfield; and the town of West Brookfield shall be entitled to receive one-half of the school fund belonging to or receivable by the town of Brookfield.

Sec. 3. The poor farm belonging to the town of Brookfield shall remain and continue to be the property of the town of Brookfield, together with all the personal property on or attached to said farm. And the said town of Brookfield shall support during their lives the following-named persons, provided the same shall continue to be paupers and require support to wit: Joseph Porter, Simeon Johnson, David Snow, Elenor Gilbert, Abigail Staples, Solon Phipps, Hannah Lawrence, Martha Richardson, Elizabeth Hobbs, Hannah Richards, Sally Forbes, Sally Parker, Huldah Wood, Mary Walker, Mary Ward, Esther Jennings, Sally Thomas, Abigail Paddock, John Lindley, Wm. Richardson and Emily P. Morse. And the said town of West Brookfield shall pay to the town of Brookfield the sum of twenty-five cents per week for the support of each of said persons respectively so long as they shall severally live, whether they shall continue paupers or otherwise. And the town of Brookfield shall hereafter support Ruth Henshaw, a pauper, and the town of West Brookfield shall support Harriett Casey, a pauper, so long as they shall respectively require support. The towns of Brookfield and West Brookfield shall be respectively liable for the support of all other persons who now do or hereafter shall stand in need of relief as paupers whose settlement was gained by or derived from a residence within their respective limits.

Sec. 4. If the County Commissioners shall, within two years, order the construction of the road which has been located from Ware to West Brookfield Depot, and the road which has been located from Fiskdale to South Brookfield Depot on either of said roads as the same are located or so altered as not to increase the expense, the towns of Brookfield and West Brookfield shall each pay one-half the expense of said road or roads.

Sec. 5. The town of West Brookfield shall continue to be a part of the town of Brookfield for the purpose of electing a Representative to the General Court, State officers, Senators, Representatives to Congress, and electors of President and Vice-President of the United States, until the next decennial census shall be taken in pursuance of the thirteenth article of amendment of the constitution; and all meetings for the choice of said officers shall be called by the selectmen of the town of Brookfield in like manner and in the same places as heretofore called; and the selectmen of West Brookfield shall make a true list of all persons in said town qualified to vote at every such election, and shall, ten days at least before the day of every such election, deliver the same to the selectmen of Brookfield, to be used by them in the same manner for such elections as if prepared by themselves.

Sec. 6. Any justice of the peace within and for the county of Worcester is hereby authorized to issue his warrant directed to any principal inhabitant of the town of West Brookfield, requiring him to notify and

warn the inhabitants thereof qualified to vote in town affairs to meet at the time and place therein appointed for the purpose of choosing all such town officers as towns are by law authorized and required to choose at their annual meetings; and such justice, or in his absence, such principal inhabitant shall preside till the choice of a moderator in said meeting.

In conformity with the provisions of the act of incorporation, Elisha Hammond, of West Brookfield, a justice of the peace, issued a warrant to George S. Duell, a principal inhabitant of West Brookfield, requiring him to notify and warn the inhabitants of said town qualified to vote in town affairs to meet at the town hall in said town on Monday, the 27th of March, 1848, to choose town officers and raise such sums of money as might be needed for town affairs, and also to decide on the manner of calling meetings of the town. The town hall, so called, was the Congregational Church, which had in alternate years with the Congregational Church in the south part of the town been used for town meetings. The warrant was dated March 11th and was duly served by Mr. Duell, who made his return of service on the same. At the meeting Alanson Hamilton was chosen moderator, and a prayer was offered by Rev. Leonard S. Parker, then pastor of the Congregational Church in West Brookfield. The following town officers were chosen for the year: Selectmen, Alanson Hamilton, Eli Chamberlain, Baxter Barnes, Mandley Peirce, Bramin Sibley; Town Clerk—Jacob Dupee; Assessors—Alanson Hamilton, William Cowee, William R. Thomas; Treasurer—Lucius Tomblin; Overseers of the Poor—Jesse Bliss, Seth Crabtree and Avery Keep; Visiting School Committee—Leonard S. Parker, William Curtis and William R. Thomas; Fence-Viewers—Nathaniel Lynde, Joseph A. Sprague and John M. Fiske; Measurers of Wood and Bark—Lucius Tomblin, William Cowee and T. Lindsey; Measurers of Leather—H. Brown, B. T. Leland and Joseph A. Sprague; Sealer of Weights and Measures—William Barrett; Surveyors of Highways—Horace F. Watson, Bostwick Gilbert, Linus Banister, William Barrett, Augustus Makepeace, Seth Crabtree, Warren Blair, Bramin Sibley, Mandley Peirce and Aretas D. Gilbert; Surveyors of Lumber—George H. Gilbert, Lucius Tomblin, Senate Johnson; Fire-Wards—Avery Keep, J. M. Fiske, H. Brown, G. Crowell, A. C. Gleason and G. W. Lincoln; Field-Drivers—I. Lincoln, G. Crowell, E. W. Coombs, Joseph A. Sprague, J. M. Fiske, Arad Gilbert, C. T. Cooke and Avery Keep.

It was voted to put out the collection of taxes to the lowest bidder, and George S. Duell took the collection for one and a quarter per cent. George S. Duell and Charles Cutter were chosen constables, and it was voted that warrants for town-meetings should be posted at least seven days at the Congregational Church and at the school-house near the house of William Adams.

Josiah Henshaw, Nathaniel Lynde and Isaac Gilbert were chosen a committee to ascertain the financial condition of the town and report at an adjourned meeting on the 17th of April. At the adjourned meeting the committee reported that the outstanding orders of the two towns amounted to $750. Due on account of schools, $80; due on account of tax abatements, $50; due on account of poor, $153.52; due on account of contingent expenses, $100.48—$1,134. Assets deducted, $434.45—amount of indebtedness, $699.55, one-half of which is West Brookfield's share: $350.

The committee recommended appropriations which were made as follows: One-half of indebtness of the two towns, $350; schools, $900; roads, $300; contingent and tax discount, $225; poor, $450—total appropriations, $2,225.

It was also voted that the sum of six hundred dollars be worked out on the roads as a labor tax. The following is a list of the selectmen of the town since its incorporation, chosen in the years set against their names:

1848. Alanson Hamilton.
Eli Chamberlain.
Baxter Barnes.
Mandley Peirce.
Bramin Sibley.
1849. Same.
1850. Baxter Ellis.
Ebenezer Fairbanks.
Willard Gilbert.
Benj. W. Leland.
Daniel C. Snow
1851. Willard Gilbert.
Aretas D. Gilbert.
Adolphus Hamilton.
Horace G. Rawson.
William Cowee.
1852. Hammond Brown.
Seth Crabtree.
Joshua Ross.
Horace G. Rawson.
Abijah Cutler.
1853. Horace G. Rawson.
Mandley Peirce.
Chandler Giddings.
Joseph W. Woods.
Joseph Dane, Jr.
1854. Chandler Giddings.
Joseph W. Woods.
Joseph Dane, Jr.
Bramin Sibley.
John R. Snow.
1855. George H. Gilbert.
Moses Hall.
George Gault.
Cheney Dane.
Chandler Giddings.
1856. Hammond Brown.
Moses Hall.
Bramin Sibley.
David B. Gleason.
Charles E. Smith.
1857. Alanson Hamilton.
Wm. B. Stone.
Ebenezer B. Lynde.
Charles E. Smith.
George A. Barnes.
1858. Alanson Hamilton.
Wm. B. Stone.
George A. Barnes.
William Paige.
Warren A. Blair.
1859. Wm. B. Stone.
William Adams, Jr.
Warren A. Blair.
Raymond Cummings.
Francis H. Barnes.
1860. Josiah Henshaw.
Raymond Cummings.
Henry P. Barrett.
Francis H. Barnes.
Amos C. Allen.
1861. Raymond Cummings.
Amos C. Allen.
Augustus Makepeace.
William Foster.
E. W. Coombs.
1862. Raymond Cummings.
Amos C. Allen.
Augustus Makepeace.
E. W. Coombs.
William Foster.
1863. Hammond Brown.
Amos C. Allen.
Abner C. Gleason.
Daniel Allen.
H. L. Banister.
1864. Hammond Brown.
Amos C. Allen.
Abner C. Gleason.
Daniel Allen.
Zebulon E. Cary.
1865. Amos C Allen.
Abner C. Gleason.
Sanford Adams.
Zebulon E. Cary.
David S. Lawrence.
1866. Amos C. Allen.
Sanford Adams.
David S. Lawrence.
O. A. Davis.
R. K. Makepeace.
1867. George Crowell.
Daniel Allen.
L. H. Chamberlain.
Warren Dane.
Wm. H. Barnes.
1868. George Crowell.
Daniel Allen.
L. H. Chamberlain.
1869. Benjamin Aiken.

O. P. Maynard.
Wm. B. Stone.
1870. B. P. Aiken.
Wm. B. Stone.
Raymond Cummings.
1871. Same.
1872. Raymond Cummings.
John B. Tomblin.
George A. Parratt.
1873. Raymond Cummings.
H. G. Rawson.
Edward McEvoy.
1874. Same.
1875. Same.
1876. B. P. Aiken.
B. K. Makepeace.
Wm. H. Allen.

1884. E. W. Coombs.
Charles H. Allen.
Charles B. Henshaw.
1885. E. W. Coombs.
Charles H. Allen.
John T. Gulliver.
1886. E. W. Coombs.
George A. Parratt.
J. T. Gulliver.
1887. Sanford Adams.
Amos C. Allen.
G. H. Coolidge.
1888. Sanford Adams.
George H. Brown.
G. H. Coolidge.

The moderators at annual meetings have been :

Alanson Hamilton..... 1849–50	L. Fullam.....1868–69
Hammond Brown.....1851–54	Lyman H. Chamberlain.....1870
George W. Lincoln.....1855–58	L. Fullam.....1871–72
D. S. Merrell.....1859	Lyman H. Chamberlain....1873–78
Josiah Henshaw..... 1860	L. Fullam.....1879–80
George W. Lincoln.....1861–62	Lyman H. Chamberlain.....1881–83
Josiah Henshaw.....1863	Ebenezer B. Lynde.....1884–85
Hammond Brown.....1864–66	George H. Coolidge.....1886–88
Lyman H. Chamberlain.....1867	

Jacob Dupee served as clerk from 1848 to 1857, inclusive; E. Hutchins Blair, from 1858 to 1879, inclusive, and in 1880 H. W. Bush, the present clerk, was chosen. Lucius Tomblin served as treasurer from 1848 to 1851, inclusive; Oliver S. Cook, from 1852 to 1856, inclusive; Hammond Brown, from 1857 to 1859, inclusive; E. H. C. Blair, from 1860 to 1866, inclusive; A. C. Gleason for the year 1867, and E. H. C. Blair from 1868 until his death, in May, 1887. George H. Fales was then appointed to fill the vacancy and was chosen by the town at the annual meeting in 1888.

While presenting lists of the most prominent officers of the town, it will not be out of place to include in this narrative the names of those who have represented the town in the General Court. In the act of incorporation it was provided that for the purpose of choosing these, West Brookfield should form a part of Brookfield until the next State census in 1850. In 1848 the two towns chose no representative and in November, 1849, Oliver C. Felton, of Brookfield, was chosen to represent them. Those chosen in West Brookfield at the election in the following years were: Chosen in 1850, William Curtts; 1851, Horace J. Rawson; 1852, none; 1853, Baxter Barnes; 1854, William R. Thomas; 1855, none; 1856, John M. Fales.

The Legislatures of 1856 and 1857 adopted the Twenty-first Amendment to the Constitution, which was approved by the people May 1, 1857, providing that a census of the legal voters of each city and town should be taken on the first day of May, 1857, and returned to the Secretary of the Commonwealth on or before the last day of June, and a census of the inhabitants of each city and town in 1865, and every tenth year thereafter, including the legal voters. The amendment also provided that the House of Representatives should thereafter consist of two hundred and forty members, who shall be apportioned by the Legislature, at its first session after the return of the census, to the several counties of the Commonwealth, according to their relative numbers of legal voters and the apportionment certified to the mayor and aldermen of the city of Boston and to the county commissioners of other counties than Suffolk, who shall, on the first Tuesday after the receipt of the apportionments, divide their counties into representative districts and assign to each its number of representatives. Under the apportionment of 1857 the towns of Warren, West Brookfield and New Braintree constituted the Eleventh District of Worcester County and were entitled to one Representative. The following is a list of the Representatives chosen to represent that district in the nine succeeding years:

Chosen in 1857, Samuel E. Blair, of Warren; 1858, Nelson Carpenter, of Warren; 1859, George Crowell, of West Brookfield; 1860, Joseph Rawson, of West Brookfield; 1861, Lucius J. Knowles, of Warren; 1862, Sexton P. Martin, of New Braintree; 1863, John M. Fales, of West Brookfield; 1864, Lucius J. Knowles, of Warren; 1865, Nathan Richardson, of Warren.

Under the apportionment of 1866, based on the census of 1865, the towns of Sturbridge, Brookfield, West Brookfield, North Brookfield and Warren constituted the Eighteenth Worcester District and the following were chosen to represent that district in the ten succeeding years:

Chosen in 1866, James S. Montague, of Brookfield, Charles E. Smith, of West Brookfield; 1867, Amasa C. Morse, of Sturbridge, Joseph B. Lombard, of Warren; 1868, Ezra Batcheller, of North Brookfield, Daniel W. Knight, of Brookfield; 1869, Benjamin A. Tripp, of Warren, John Harvey Moore, of Warren; 1870, Martin L. Richardson, of Sturbridge, George S. Duell, of Brookfield; 1871, Daniel W. Knight, of Brookfield, Simon H. Sibley, of Warren; 1872, Noah D. Ladd, of Sturbridge, William B. Stone, of West Brookfield; 1873, Warren Tyler, of North Brookfield, Stillman Butterworth, of Brookfield; 1874, Charles B. Sanford, of West Brookfield, George T. Lincoln, of Sturbridge; 1875, Charles Fuller, of Sturbridge, John Wetherbee, of Warren.

Under the apportionment of 1876 the same towns constituted the Twelfth Worcester District and were represented as follows during the ten succeeding years:

Chosen in 1876, William H. Montague, of North Brookfield, George W. Johnson, of Brookfield; 1877, George C. Lincoln, of North Brookfield, Alvin B. Chamberlain, of Sturbridge; 1878, Theodore C. Bates, of North Brookfield, Joseph Smith, of Warren; 1879, George W. Johnson, of Brookfield, George N. Bacon, of Sturbridge; 1880, George A. Parratt, of West Brookfield, George M. Newton, of Warren, died (Lucien M. Gilbert, of Warren, filled vacancy); 1881, Hiram Knight, of North Brookfield, David W. Hodgkins, of Brookfield; 1882, Emory L. Bates, of Sturbridge, Horace W. Bush, of West Brookfield; 1883, Allen Batcheller, of North Brookfield, Joseph W. Hastings, of Warren; 1884, Edwin D. Goodell, of Brookfield, David B. Wright, of Sturbridge; 1885, Edwin Wilbur, of West Brookfield, Marcus Burroughs, of Warren.

Under the apportionment of 1886 the towns of Brookfield, West Brookfield, North Brookfield, New Braintree, Oakham, Sturbridge and Warren constituted the Fifth Worcester District and the following Representatives have been chosen to represent it:

Chosen in 1886, Edwin D. Goodell, of Brookfield, Samuel Clark, of North Brookfield; 1887, George H. Coolidge, of West Brookfield, Henry D. Haynes, of Sturbridge; 1888, George Bliss, of Warren, John B. Gould, of Warren.

In the early life of West Brookfield little occurred to arrest the attention of the historian or interest the reader. Its current flowed with gentle tide, bearing satisfactory prosperity to its enterprises and peace and happiness to its people. Its real history lies back of its incorporation far in the past and is owned in common with its sister towns. Brookfield, though the Third Precinct, inherits the name and records of the original town, while West Brookfield, really the mother instead of sister of the towns at the north and south, and holding within its borders the ancient landmarks of Quabaug, has scarcely passed the fortieth year of its municipal age. It would be a fitting acknowledgment of its historic record to place in its keeping the ancient archives and christen it anew with the name which rightfully belongs to it. South Brookfield is the title which Brookfield often bears in the records, and to an impartial eye it seems more applicable to-day to the town from which West Brookfield was separated in 1848.

As owners in common of the memories of the good old town, the citizens of the three towns of Brookfield, North Brookfield and West Brookfield celebrated the anniversary of our national independence on Saturday, the 3d of July, 1858. The purpose of the celebration was a double one,—both to celebrate the event which the day commemorated and, as stated by the committee in their circular, sent to the sons of the three towns, to make preliminary arrangements for the two hundredth anniversary of the settlement of the town, which would occur in 1860. The circular was signed by Aaron Kimball, Francis Howe, Lewis Abbott, S. W. Banister, Perley Stevens, Luther Stowell, Oliver C. Felton, Calvin Jennings, Otis Hayden, Emmons Twichell and Alfred Rice, of Brookfield; Amasa Walker, Daniel Whitney, Hiram Edson, Charles Duncan, William Adams, George H. Lowe, Royal Pickard, Ezra Batchellor, Lysander Brewer, James H. Hill and Bonum Nye, of North Brookfield, and Alanson Hamilton, Nathaniel Lynde, Ebenezer Merriam, John M. Fales, Augustus Makepeace, Ebenezer Fairbanks, David A. Gleason, David L. Merrill, Raymond Cummings, George W. Lincoln and Warren A. Blair, of West Brookfield. At that time the population of the three towns, in the order here given, was 2007, 2307 and 1363 respectively. A dinner was held in a tent pitched on the Common in Brookfield and nine hundred guests were seated at the tables. A procession, under the Chief Marshal George D. Clapp, with Tyler Hosman and Henry L. Mellen as his aids, contained four divisions in the following order and marched through the principal streets to the tent:

First Division.

Bonds Cornet Band, 20 pieces,
Cataract Engine Company, of Brookfield, Capt. A. H. Moulton.
Committee of Brookfield.
Speakers and guests.
Citizens.

Second Division.

American Engine Company, of West Brookfield, Capt. C. B. Sanford.
Committee of West Brookfield.
West Brookfield Glee Club.
Citizens.

Third Division.

Committee of North Brookfield.
President, Vice-President, Chaplain.
Guests.
Citizens.

Fourth Division.

Bay State Engine Co., East Brookfield, Capt. C. K. Willard.
Challenge Engine Co. (Juvenile), East Brookfield, Capt. E. J. Nichols.
Guests and Citizens.

Hon. Amasa Walker, of North Brookfield, presided, assisted by the following vice-presidents: Hon. Francis Howe, Hon. Oliver C. Felton, Abraham Skinner and Aaron Kimball, of Brookfield; Hon. Alanson Hamilton, Nathaniel Lynde and Ebenezer Merriam, of West Brookfield, and Colonel Wm. Adams and Pliny Nye, of North Brookfield. D. L. Morrill, of West Brookfield, was toast-master. The speakers, besides the president, were Hon. Pliny Merrick, Hon. Dwight Foster, George Howe, of Boston, Wm. Howe, of Brookfield, Henry Upham, of Boston, Rev. C. Cushing, of North Brookfield, and Dr. Hitchcock, of Newton.

On the 15th of March, 1860, the following circular was issued, preliminary to the celebration of the two hundredth anniversary of the settlement of the town. The original grant was made May 31, 1860, but for some reason it was thought expedient to celebrate the event on the 4th of July.

BROOKFIELD, March 15, 1860.

Dear Sir: The present year marks the two hundredth Anniversary of the settlement of the town, and it is thought desirable and proper that the event should be commemorated in a suitable manner

A general meeting of the citizens of the several towns, into which the ancient town of Brookfield has been divided, has been held, and the undersigned appointed a Committee to make arrangements for the occasion and invite the attendance of all who may feel an interest in it.

We, therefore, respectfully extend to you an invitation to be present on the Fourth of July next, the day fixed upon, as on the whole the most eligible and convenient.

The Committee are especially desirous that all who originated in, or have been residents of this place, should join in this Celebration.

The Sons and Daughters of Brookfield are scattered far and wide in all the States in the Union; but the Committee trust they will be happy to come together on an occasion so fraught with interesting associations and reminiscences.

The first settlement having been made in that part of the old town now incorporated as West Brookfield, and the site of the first Meeting-House, the old garrison which stood successfully the Indian Siege of 1675, the Gilbert Fort and the first Grave Yard being also in that section, the Committee have decided to hold the proposed celebration in that town. Rev. Lyman Whiting, of Providence, R. I., has been invited to deliver the address, and every effort will be made to give interest to the occasion.

A large tent will be erected upon the Common, in which the services will be held and the dinner be provided.

Tickets to the Tent and Dinner, one dollar.

We have the honor to be,
Respectfully Yr obt servants,

Aaron Kimball.	Francis Howe.
O. C. Felton.	Emmons Twichell.
Luther Stowell.	A. H. Moulton.
George W. Johnson.	H. L. Mellen.
George Forbes.	Pliny Doane.
Wm. Adams.	Ezra Batcheller.
Charles Adams, Jr.	Hiram Carruth.
Pliny Nye.	Amasa Walker.
Bonum Nye.	E. D. Batcheller.
T. M. Duncan.	G. B. Dewing.
Alanson Hamilton.	Nathaniel Lynde.
Alfred White.	Josiah Henshaw.
Baxter Barnes.	Raymond Cummings.
Charles E. Smith.	John M. Fales.
L. H. Thompson.	S. N. White.
G. W. Lincoln.	

The celebration was carried out in accordance with the plans of the committee. The streets and houses were decorated, and Wednesday, the 4th of July, will long be remembered by the sons and daughters of the ancient settlement. At nine o'clock the citizens of West Brookfield, under escort of the Oakham Band, proceeded to Foster's Hill, the site of the first church and fortification, and there met the citizens of Brookfield and North Brookfield, attended by the Brookfield Cornet Band, and marched to the Common. There a formal procession was organized under Chief Marshal S. D. Cooke and marched to the old burial-ground, and thence to the tent on the east end of the Common, where the tables, set for twelve hundred, were completely filled. Hon. Amasa Walker acted as president of the day, and called on Rev. Dr. Joseph Vaill, of Palmer, to invoke the divine blessing. After the dinner Mr. Walker addressed the assembly and Rev. Lyman Whiting, of Providence, followed with an historical address of nearly two hours in length. After the address speeches were made by Rev. C. Cushing, of North Brookfield, Dr. Eliakim Phelps, of Philadelphia, a former pastor of the First Precinct Church, N. B. Chamberlain, of Boston, Rev. Mr. Burr, of Brookfield, Rev. C. M. Cordley, of West Brookfield, T. M. Duncan, of North Brookfield, Rev. W. H. Beecher, of North Brookfield, Wm. B. Draper, of New York, Dr. John Homans, of Boston, Dr. Jabez B. Upham, of Boston, Rev. Hubbard Winslow, of Brooklyn, Judge Danforth, of New York, and Josiah Cary, of St. Charles, Missouri.

But the memories of the early settlers of Brookfield were destined to be soon revived by events less joyous and peaceful. The hill-sides and plains of this ancient settlement, so accustomed to scenes of warfare in their earlier days, within a year after the celebration again witnessed preparations for hostile strife. Since the grant of 1660 no generation had passed away without learning something of the horrors of war. They had fought for years with the Indian hordes at their doors; they had fought for independence; they had fought to assert the rights of an infant nation against an insolent foe; they were now to take up arms to preserve a Union which had been dearly purchased in Revolutionary days.

During the War of the Rebellion West Brookfield was not behind other towns in the Commonwealth in patriotic endeavors to sustain the government and fill the ranks of the army. At a town-meeting held April 29, 1861, at which George W. Lincoln was chosen moderator, it was voted to pay each volunteer twenty dollars when mustered and furnish each with a revolver. The town also pledged itself to properly support families of soldiers in the service, and passed the necessary votes to enable the selectmen to borrow money for the purpose. When nine-months' men were called for, a bounty of one hundred and fifty dollars was paid to each volunteer credited to the quota of the town, and in 1864 one hundred and twenty-five dollars in gold was paid to the men enlisting on its quota for three years or the war.

The following list of soldiers enlisting in the town, taken chiefly from the town's Rebellion Record, but enlarged and corrected by the Adjutant-General's Roll, is as nearly accurate as it is possible to make it:

Thomas Reese, three years.....2d Regiment, Co. H
J. H. W. Bartlett, three years.....2d Regiment, Co. F
Simon Curley, three years.....9th Regiment, Co. H
Joseph W. Cutler, three years.....10th Regiment, Co. F
Caleb C. Brock, three years.....11th Regiment
Franklin W. Fellows, three years.....12th Regiment, Co. I
John Mundell, three years.....12th Regiment, Co. H
Perez B. Sampson, three years.....12th Regiment, Co. K
George W. Shaw, Jr., three years.....12th Regiment
Julius A. Amsden, three years.....12th Regiment, Co. F
Albert Lynde, three years.....13th Regiment, Co. B
Jabez A. Blackmer, three years.....13th Regiment, Co. K
Bernard R. Gilbert, three years.....13th Regiment
Lyman W. Gilbert, three years.....13th Regiment, Co. D
Wm. L. Adams, three years.....13th Regiment, Co. F
Emerson H. Bullard, three years.....13th Regiment, Co. F
Albert W. Livermore, three years.....13th Regiment, Co. F
C. W. Marsh, three years.....13th Regiment, Co. F
A. N. Potter, three years.....13th Regiment, Co. F
Justus C. Wellington, three years.....13th Regiment, Co. F
Wm. A. Mullet, three years.....13th Regiment, Co. F
Edward U. Prouty, three years.....13th Regiment, Co. F
C. S. Lowe, three years.....13th Regiment, Co. F
Henry C. Read, three years.....17th Regiment, Co. G
George W. Temple, three years.....17th Regiment, Co. G
Charles Riggs, three years.....18th Regiment, Co. G

L. B. Bliss, three years.....19th Regiment, Co. C
John Mann, three years.....19th Regiment, Co. G
Lewis McCrellis, three years.....19th Regiment, Co. G
Wm. Daggett, three years.....19th Regiment, Co. I
Martin J. Gilbert, three years.....20th Regiment, Co. K
Isaac M. Sampson, three years.....20th Regiment, Co. K
Benjamin F. Sampson, three years.....20th Regiment, Co. K
Samuel B. Rice, three years.....21st Regiment, Co. B
Joseph P. Adams, three years.....21st Regiment, Co. C
Edwin T. Brown, three years.....21st Regiment, Co. C
C. C. Buck, three years.....21st Regiment, Co. C
Eli Tyler, three years.....21st Regiment, Co. C
Leonard F. Alexander, three years.....21st Regiment, Co. F
John L. Powers, three years.....22d Regiment, Co. G
John F. Hastings, three years.....25th Regiment, Co. C
E. P. Buck, three years.....25th Regiment, Co. D
F. E. Buck three years.....25th Regiment, Co. D
Albert Peck, three years.....25th Regiment, Co. C
George E. Howe, three years.....25th Regiment, Co. C
Frank Warren, three years.....28th Regiment
George Day, three years.....32d Regiment, Co. A
Joseph W. Adams, three years.....34th Regiment, Co. I
George E. Adams, three years.....34th Regiment, Co. I
Charles H. Allen, three years.....34th Regiment, Co. I
Eldridge B. Ainsworth, three years.....34th Regiment, Co. I
Pliny F. Barr, three years.....34th Regiment, Co. I
Azor W. Barlow, three years.....34th Regiment, Co. I
Edwin W. Barlow, three years.....34th Regiment, Co. I
Daniel Boyle, three years.....34th Regiment, Co. I
Lorenzo Chickering, three years.....34th Regiment, Co. I
Edward L. Drake, three years.....34th Regiment, Co. I
Ephraim Carey, three years.....34th Regiment, Co. I
John E. Farley, three years.....34th Regiment, Co. I
Harvey Gilbert, three years.....34th Regiment, Co. I
George H. Gilbert, three years.....34th Regiment, Co. I
John McCloskey, three years.....34th Regiment, Co. I
James Mundell, three years.....34th Regiment, Co. I
James M. Pratt, three years.....34th Regiment, Co. I

The following soldiers were either killed or died while in the service:

Simon Curley, killed June 23, 1863.
Wm. L. Adams, wounded at Antietam September 17, 1862, and died November 7th.
Emerson H. Bullard, died June 15, 1862.
Albert W. Livermore, died January 8, 1863.
Justus A. Wellington, killed in October, 1863.
Wm. A. Mullet, wounded at Spottsylvania, and died May 23, 1864.
Edwin T. Brown, wounded at Petersburg, and July 27, 1864.
Leonard F. Alexander, killed June 2, 1864.
George E Adams, killed at Newmarket, Va., May 15, 1864.
Edwin W. Barlow, killed at Snicker's Gap July 18, 1864.
Daniel Boyle, died in Danville Prison in 1865.
Lorenzo Chickering, wounded at Winchester September, 1864, and died September 20th.
Harvey Gilbert, killed June 5, 1864.
George H. Gilbert, wounded at Petersburg April 2, 1865, and died May 4th.
Harvey E. Truesdell, died in hospital March 7, 1864.
Alfred D. Washburn, died in hospital June 3, 1864.
S. Waldo Allen, died July 12, 1863.
John Mundell, killed at Fredericksburg May 8, 1864.
Daniel Lawler, killed October 24, 1864.
George E. Howe, killed at Petersburg, May 6, 1864.
Charles E. Cutler, died in U. S. Hospital at Baltimore, July 30, 1864.
Lewis Bovier, died July 20, 1865.
Moses Renier, died February 23, 1865.
Herman A. Gilbert, died at Alexandria, September 23, 1864.

An important event in the history of the town was the establishment of a public library. No town can have a complete educational system without such an institution. It supplements the public schools, and carries on and perfects the work begun by them. The

time is not far in the past when education was said to be finished at the schools. There was little of general instruction after the school-days were over, except what a greedy mind here and there, from a keen observation of the world and from a native gift of absorption, could unaided and with difficulty acquire. The consequence was that there were to be seen in all our towns men of fair business and social standing who, from its want of use and development, had lost the little general knowledge obtained at their desk at school, retaining only that which their special business or trade had made demands upon. They were, perhaps, shrewd, industrious and prosperous, but they were nevertheless ignorant men. Now, since the introduction of libraries into our small communities, education is never finished. The school-boy grows into manhood holding fast to the fruits of public school instruction, while craving and reaping more from his constant use of these store-houses of knowledge. And, indeed, in these latter years, when immigrants from abroad, well advanced in life, are finding their way into every city and town without early education, and too old to use our public schools, these institutions have become the indispensable means of that popular enlightment without which the standard of our republican government would be dangerously lowered, if not permanently weakened and destroyed.

The West Brookfield Free Library and Reading-Room owes its origin to a law passed in 1869, requiring towns to appropriate the annual dog fund for the support of schools or for a public library—that fund being created by fees paid annually for the licenses of dogs, and being the residue after the deduction of amounts paid to owners of sheep for damage inflicted by dogs.

In the early days of the Plymouth Colony it was provided by law that "all such profits as might or should annually accrue to the Colony from time to time from fishing with nets or seines at Cape Cod, for mackerel, bass or herrings, should be improved for and towards a free school in some town of the jurisdiction." Thus the fathers of New England set an example in the thrifty use of the tribes of the sea in the establishment of free schools, which their sons of to-day have followed in a similar use of the creatures of the land for their permanent preservation.

In the autumn of 1873 the town voted to establish a public library, and the dog-funds of 1871, 1872 and 1873 were appropriated in its aid. It was placed in an ante-room of the town-house, and opened to the public January 5, 1874, with two hundred and ninety-eight volumes. The room was fitted up and lighted by the liberality of Mr. Lemuel Fullam, a public-spirited citizen. In March, 1874, Mr. T. S. Knowlton was chosen librarian, and still holds that office. During the first year Mr. Charles Merriam, of Springfield, a native of the town, presented five hundred volumes to the library, and five hundred dollars in money, and at the close of the year there were fourteen hundred and eight volumes on its shelves. Mr. Merriam continued his gifts of books until they reached finally the number of about one thousand volumes. In 1876 he gave to the town fifty shares of New York Central and Hudson River Railroad stock, valued at that time at fifty-six hundred and fifty dollars,—"to be kept permanently invested safely, and never on personal security only, the annual income to be used for the benefit of the Library or Reading Room, which are to be kept always free to all the citizens of the town of a suitable age, and under such rules and regulations as the town may establish." He further provided that in case the library should be abandoned, the money should be paid to the public town libraries of Brookfield or North Brookfield, if such should be in existence; but, otherwise, the town of West Brookfield might appropriate the sum to any general educational purpose for the benefit of the town.

At a town-meeting, held April 15, 1876, the town formally accepted the gift, and thanked Mr. Merriam for his liberality. But his liberality had not reached its limit. In 1880 he addressed the following letter to the town, which, as a memorial of his enlightened generosity, is made a part of this narrative:

SPRINGFIELD, February 3, 1880.

To the Town of West Brookfield:

It is, I believe, already known to many of your citizens that I have formed the purpose of erecting within your limits a building to be used for a Free Public Library and Reading Room, and presenting it to my native town. The site has already been purchased, on the so-called Tainton lot, next west of the Town Hall, and the contract closed for the erection of the building. It had been my intention to complete the edifice, and then ask its acceptance by the town. But it is to be finished next October, and there will then remain four or five months before your usual town-meeting in the spring, and it seems proper and desirable that the town should own the property before entering upon its occupation. I understand there is no legal difficulty in making the transfer, although the building itself is yet to be erected.

I therefore propose to the town to make a present formal and legal transfer to it of the lot mentioned, with the building to be erected on it, to be used perpetually as a free Public Reading Room and Library for the town of West Brookfield. The town will maintain it as such under any By-laws and regulations it may think proper to establish; but under such regulations it is to be free to all, with no fee or charge to any citizen for admission to the privileges of the library and reading room. The town shall keep the building constantly insured for such a sum that, if destroyed, the town engages to replace it by another equally convenient. It is not required that the same site should always be used if a change becomes necessary or desirable. I am to be at liberty to go on and complete the building according to my plans. Three of your own citizens—Dr. Blodgett, Mr. Fullam and Mr. Knowlton, have been kind to act as an Advisory Committee in the matter, and can give the town any desired information in regard to these plans.

From long observation I have come to feel strongly the undesirableness of attaching any other than indispensable conditions to matters looking far into the future, as unforeseen circumstances may greatly change the conditions. I will not, therefore, add any to my donation other than these I have mentioned. I would, however, recommend—

First, That the upper hall, which I intend shall be a large and convenient one, be not used, unless rarely and occasionally, for religious worship, for the reason that the town is made up of different religious denominations, and such use by one might awaken jealousy in others, and I would like this building and its purposes to be such as that all shall feel in them a common interest.

Second, For similar reasons I would not use the hall for political purposes, as caucuses and the like.

Third, For moral and religious considerations and as I now, judge for

the best interests of the community, I would not open the library and reading room for general use on the Sabbath. Nor,

Fourth, Let the hall for purposes of mere amusement and entertainment, especially such as some may honestly deem objectionable, as balls, theatrical and minstrel performances, etc.

A general reason, perhaps in itself sufficient for not using the hall for purposes I have mentioned, would be that all the citizens of the town may be united in regard to its use. Then, too, the little sums to be obtained for rental for objects with regard to which there was a difference of opinion, would hardly compensate for the objections, and you have other places available for these purposes and it would seem desirable to keep the hall for uses somewhat in sympathy with the general design of the building. There will be many of these, as lectures, debates, scientific exhibitions, farmers' clubs, etc., wholly unobjectionable, and the income from which will help towards making the library and reading room self-sustaining. Yet if the town at any time think it expedient to use the building for the foregoing or similar purposes, I would not be understood as interposing any objection but that becoming the property of the town the gift in these respects be absolute and unqualified.

In case the donation, lapses from a failure of the conditions or the town's declining or neglecting to use the building for the objects for which it is given for any considerable period, the property shall revert to the same purposes as provided for the lapsing of the endowment of $5,000 given by me for a library fund in March or April, 1876.

Upon the town's passing a vote of acceptance of my proposition, recording the vote on its records, placing my proposal on file and sending me a certified copy of the vote, I will make out a deed of conveyance.

I have been prompted to make this proposition by a desire to do something for my native town, which shall be an expression of my gratitude for the early educational advantages it afforded me, and at the same time be of permanent benefit to its citizens, especially the young. I recall, too, the value such an institution would have been to me in my own early life, and entertain, I trust, a not improper wish to be pleasantly remembered by a good influence perpetuated.

I may be allowed to express the hope that the town will cherish the institution as one in which all its citizens have an interest, and may find it of lasting value. Such value will, of course, depend largely upon a wise discretion being exercised in selecting and encouraging the reading of books and periodicals, instructive and improving, as well as a due proportion of those of a right character more especially designed for entertainment, amusement and relaxation.

CHARLES MERRIAM.

At the annual town-meeting held April 5, 1880, the gift of Mr. Merriam was formally accepted by the town, and at a town-meeting held in October steps were taken for the dedication of the building, which took place on the evening of Friday, November 12th, in the same year. On that occasion Homer B. Sprague, of Boston, delivered the dedicatory address, and short speeches were made by Rev. Mr. Cushing, William B. Stone and L. H. Chamberlain. Letters were read from Governor Daniel H. Chamberlain, a native of West Brookfield, and from Mr. Merriam, the benefactor, who was prevented by the infirmities of age from being present. Mr. Merriam died at his residence in Springfield, July 9, 1887. According to the report to the town of the Library Committee made for the year ending February 29, 1888, the number of books in the library, at that date, was 5754, and 11,231 had been taken out during the year by 595 persons. During that year the library was credited on the treasurer's books with $200 income from the Merriam Fund, Dog Fund $192.89, and appropriations amounting to $300, making a total of $692 89. It may be proper to add, in closing the sketch of the library, the items of Mr. Merriam's various gifts, exclusive of one thousand volumes of books presented by him in the earliest stages of its career:

Cost of land	$2,245 17
Cost of building	10,300 00
Architect	600 00
Gas fixtures	316 00
Furnace	325 00
Furniture	1,000 00
Cash for books	600 00
Endowment Fund of 1876	5,000 00
Sundries	944 25
	$21,330 42

The public schools of West Brookfield, as well as its library, reflect credit on the town. According to the last report of the School Committee, for the sake of convenience of description, the town is divided into five districts, containing in all nine schools, with rolls of 286 scholars, and an average attendance of 87 per cent. In District No. 1, there are five schools—a grammar school with an average attendance of 24; a first intermediate, with an average attendance of 26; a primary, with an average attendance of 27; a primary, with an average attendance of 36; and another primary, with an average attendance of 36.

The Second District school has an average attendance of nineteen; the Third District of nine, the Fourth of seven, and the Fifth of five. The grammar school teacher receives $50 per month; the first intermediate, $36; the first primary, $36; the second primary, $32; the third primary, $32; Second District, $28; Third District, $28; Fourth District, $24, and the Fifth District, $24. The amount of money available for the support of schools for the year was $8217.54, of which the sum of $3,000 was appropriated by the town, and the sum of $217.54 was received from the State fund. The appropriations made by the town for the various departments for the year ending at the above date, February 29, 1888, were:

Schools	$3000 00
Roads and bridges	1000 00
Poor	600 00
Contingent Fund	1200 00
Debt and interest	1000 00
Street lamps	300 00
Common	100 00
Firemen	600 00
Memorial Day	50 00
Library	300 00
	$8150 00

At the time of the incorporation of the town, in 1848, the ancient First Parish of Brookfield was the only one within its borders. A meeting-house was built in, or soon after, 1673, probably on Foster's Hill, but was burned during King Philip's War. It is probable that John Younglove and Thomas Millet preached to the settlers during the short time they remained on their grant. Mr. Younglove was at Quabaug, the Indian name of Brookfield before the settlement, as early as 1667. After the destruction of the settlement he removed to Hadley, where he taught school. In 1681 he is mentioned as living in Suffield, and there he died June 3, 1690. Thomas Millet seems to have succeeded Mr. Younglove and died early in 1676, before Philip's War was

over. It is not probable that either Mr. Younglove or he were ordained ministers. After the resettlement of Brookfield, in 1686, it is not believed that any meeting-house was built until 1715. Religious services had probably been held in the garrison on Foster's Hill, and the preacher seems to have been styled chaplain, and to have been appointed by the government of the Province, with an annual allowance towards his salary from the Province treasury. On the 22d of November, 1715, the inhabitants agreed to build a meeting-house, which was erected on Foster's Hill, about half a mile southeast of the first meeting-house. On the 16th of October, 1717, it was so far completed that it was used on that day for the ordination of Rev. Thomas Cheney, who had accepted an invitation to settle as pastor. On that day the First Church of Brookfield was formally organized, and a church covenant signed, which may be found in a more detailed history of the church, in the history of Brookfield in these volumes. At the ordination of Mr. Cheney, Rev. Solomon Stoddard, of Northampton, preached the sermon. Mr. Cheney was born in Roxbury in 1690, and graduated at Harvard in 1711. He died December 11, 1747, and his grave is at Brookfield. Rev. Elisha Harding, a Harvard graduate in 1745, succeeded Mr. Cheney, and was ordained September 13, 1749, on which occasion Rev. Nathan Bucknam, of Medway, preached the sermon. During his ministry the Second Precinct (now North Brookfield) was incorporated, March 28, 1750, and the Third Precinct (now Brookfield) November 8, 1754.

In 1755 the First Church built a new meeting-house and abandoned the old house on Foster's Hill. It was voted, January 22d, in that year, "to build a meeting-house for public worship at the turning of the county rode, near the northeast corner of a plowed field, belonging to John Barns, being on the plain in said First Precinct." It was also voted that the house should be built "with timber and wood," and be forty-five feet in length and thirty-five feet in width. The location of this church was near that of the present Congregational Church, on the west side of the Common.

On the 8th of the following May Mr. Harding was dismissed, and on the 1st of February, 1757, Rev. Nehemiah Strong, of Hadley, was chosen pastor, but declined. Rev. Joseph Parsons, Jr., son of Rev. Joseph Parsons, of Bradford, and a graduate of Harvard in the class of 1752, was then engaged, and was ordained November 23, 1757. At his ordination Rev. Joseph Parsons, of Bradford, Rev. David White, of Hardwick, Rev. Joshua Eaton, of Spencer, Rev. John Tucker, of Newbury, and Rev. Isaac Jones, of Western (now Warren), took part in the services. He continued in his pastorate until his death, January 17, 1771, at the age of thirty-eight years.

Rev. Ephraim Ward, born in Newton in 1741, and a Harvard graduate in the class of 1763, followed Mr. Parsons and was ordained October 23, 1771, serving until his death, February 9, 1818. Dr. Lyman Whiting, in his address on the two hundredth anniversary of the settlement of Brookfield, said of him that "he was esteemed throughout his pastorate, which was little short of forty-seven years, as the urbane Christian scholar, illustrating the graces of the village pastor, so admirably pictured by the godly Herbert:

> As a tender father
> Doth teach and rule the church and is obeyed,
> And reverenced by it, so much the rather,
> By how much he delighted more to lead
> All by his own example in the way,
> Than punish any when they go astray."

At his ordination Rev. Jason Haven, of Dedham, preached the sermon, and the churches of Western, Ware, Spencer, Sturbridge, Newton, Weston, Waltham and Dedham were represented.

On the 23d of October, 1816, Rev. Eliakim Phelps, a native of Belchertown and born March 20, 1790, was settled as the colleague of Mr. Ward, and at his ordination Rev. Jedediah Morse, of Charlestown, the distinguished geographer, preached the sermon. In 1818, on the death of Mr. Ward, he became his successor in the pastorate. He was a graduate, in 1814, of Union College, of Schenectady, and received the degree of Doctor of Divinity from his *alma mater* in 1842. On the 25th of October, 1826, he was released from his charge to assume the preceptorship of a "Classical Female School," which at one time flourished in West Brookfield. At a later date he was the principal of the Female Seminary at Pittsfield, and in 1860, at the time of the Bi-Centennial Celebration, he was living in Philadelphia, and was present and spoke on that occasion.

On the day of the release of Dr. Phelps from the church, Rev. Joseph I. Foote, also a graduate of Union College, was installed, and was dismissed May 1, 1832. Mr. Foote was born in Watertown, Conn., November 17, 1796, and graduated at Union College in 1821. At his ordination Rev. Herman Humphrey, president of Amherst College, preached the sermon. In 1833 he had a pastorate in Salina, N. Y.; in 1835 in Cortland, N. Y.; in 1839 in Knoxville, Tenn.; and in the latter year was chosen president of Washington College, in Tennessee, but died April 21, 1840, before his inauguration.

Rev. Francis Horton, a graduate of Brown University in 1826, was installed August 15, 1832, on which occasion Rev. Thomas Snell, of North Brookfield, preached the sermon. He was dismissed September 15, 1841, and succeeded by Rev. Moses Chase, who was settled January 12, 1842, and dismissed October 28, 1842.

Rev. Leonard S. Parker, born in Dunbarton, N. H., December 6, 1812, and a graduate of Oberlin Collegiate Institute, was installed December 19, 1844, and dismissed April 7, 1851. At his installation Rev. Thomas Snell preached the sermon.

Rev. Swift Byington succeeded November 7, 1852, and served until his resignation, November 1, 1858. At his ordination Rev. Henry M. Dexter, now living in New Bedford, preached the sermon. Mr. Byington was born in Bristol, Conn., February 4, 1824, and graduated at Yale in 1847.

Rev. Christopher M. Cordley, born in Oxford, England, January 2, 1821, was settled June 28, 1859, and continued in the pastorate until June 23, 1862.

Rev. Samuel Dunham, a Yale graduate in 1860, was ordained October 4, 1864, and dismissed October 27, 1870. At his ordination Rev. E. C. Jones, of Southampton, Conn., preached the sermon.

Rev. Richard B. Bull was installed March 12, 1871, and dismissed July 6, 1874. The pulpit has since been supplied by Rev. S. C. Kendall, Rev. Mr. Stebbens, Rev. Frederick Allen, Rev. E. S. Gould and the present acting pastor, Rev. Thomas E. Babb.

Among the prominent members of this church have been Henry Gilbert, his son, John Gilbert, Joshua Dodge, Joseph Jennings, Comfort Barnes, John Cutler, Jedediah Foster, Thaddeus Cutler, Othniel Gilbert, Thomas Rich, Joseph Cutler, Levi Gilbert, Samuel Barnes, John Ross, Nathan Bucknam Ellis, John Wood, Josiah Cary, Alfred White, William Spooner, Reuben Blair, Jr., Jairus Abbott, Josiah Henshaw, Baxter Ellis, Jacob Dukes, Liberty Sampson, Solomon L. Barnes, Moses Hall, Samuel Newell White, Enos Gilbert, Nathaniel Lynde, Ebenezer B. Lynde, Avery Keep, John M. Fales, Raymond Cummings, Adolphus Hamilton, Wm. B. Stone, George Merriam, S. D. Livermore, A. C. Gleason, Edward T. Stowell, Warren A. Blair and others too numerous to mention. This list includes nearly all the deacons of the church since its organization and some laymen of later years.

On the 29th of October, 1792, it was voted to build a new meeting-house on the land given to the precinct by Lieutenant John Barnes for that purpose, and its dedication occurred November 10, 1795, on which occasion Rev. Enos Hitchcock, of Providence, preached the sermon. A bell was hung in its tower in 1799, and in 1838 it was remodeled and turned round to a right angle with its former site and rededicated January 1, 1839. Rev. Hubbard Winslow, of Boston, preached the dedicatory sermon. In 1855 the present bell was hung, and in 1856 a new organ replaced an old one which had been in use since 1826.

The old meeting-house was removed to another lot and for a time devoted to town and parish purposes. In 1809 it was sold by auction for one hundred and eighty-six pounds. The last meeting-house mentioned was burned February 28, 1881, and, having been rebuilt on the same site, was dedicated September 15, 1882.

The first burial-ground, probably, in consequence of the hard clay found near the old meeting-house on Foster's Hill, was located in the fields about one hundred rods distant from the meeting-house, and remains of the old grave-stones have been found sufficiently preserved to mark the spot. At a later day a second burial-ground was laid out in the westerly part of what is now West Brookfield, and at a still later day a third one was laid out nearer the village.

A Methodist Episcopal Church was organized in October, 1851, and purchasing a meeting-house in Templeton, removed it to West Brookfield, where it has since been used as a place of worship. Rev. Mr. Winslow was its first pastor and he has been followed by Rev. Mr. Clark, Rev. Alpheus Nichols, Rev. J. S. Barrows, Rev. G. H. W. Clark, Rev. William Blackman, Rev. Mr. Miller and others.

A Catholic Society was organized a few years since, but has neither church nor pastor. Its services are held in the town-hall under the ministrations of Father Grace, of Brookfield.

The business of Brookfield is moderately large, but not sufficient to indicate any considerable immediate growth. The boot and shoe establishments are those of McIntosh & Co., employing about fifty hands; M. J. Savage & Co., employing about thirty; George H. Fales, about fifty; J. T. Wood & Co., about fifty, and Allen & Makepeace, employing a somewhat smaller number. Besides these industries there is a condensed milk factory carried on by W. K. Lewis' Bros. & Co., and a branch of the Bay State Corset Company having its main establishment in Springfield. The farming interests of the town are considerable, and its product of butter and cheese for distant markets is by no means insignificant. The town is well situated on the line of the Boston & Albany Railroad, about midway between Worcester and Springfield and accessible by express and other trains in about two hours from Boston. It is laid out with wide and pleasant streets, and though bleak in winter is fanned in the heat of summer by airs from Long and Coy's and Foster's Hills, and across the meadows of the Quabaug. An attractive Common ornaments the central village, graced by a fountain presented by George M. Rice, of Worcester, and surrounded by a fence, the gift of Hon. J. Henry Stickney, of Baltimore, a grandson of Rev. Ephraim Ward, who gave the town thirty-five hundred dollars for the purpose. Few towns can be found along the hill-sides and in the valleys of Massachusetts presenting greater attractions to those who seek relaxation from the toils of business or the invigorating influences of a pure and healthy clime.

The Common above referred to was the gift of David Hitchcock, who, November 7, 1791, "granted and quit-claimed to the first parish in Brookfield a certain tract of land in said parish, containing three acres, more or less, to be held by said parish in its corporate capacity forever; provided said tract shall never be sold to any individual or individuals, but shall always remain open as a common for public use."

J. Henry Stickney, of Baltimore, through whose liberality the Common was graded and fenced, is a native of West Brookfield. He belongs to a branch of the Stickney family which settled in Essex County in the first half of the seventeenth century, and which had its estates in the town of Stickney, in England. Thomas Stickney, the grandfather of the benefactor, removed from Boston to Leicester and occupied an estate which makes one of the illustrations in the history of that town by Emory Washburn. His son Thomas removed to West Brookfield and married a daughter of Rev. Ephraim Ward, already mentioned as a pastor of the First Church. Mr. Ward was a cousin of General Artemas Ward, of the Revolution, and his wife was Mary Colman, of Boston, a relative of Rev. Benjamin Colman, of the Brattle Street Church. J. Henry Stickney was a son of the last-mentioned Thomas and was born in the parsonage house facing the Common. At the age of nine or ten years he went to Worcester, where his father had at one time lived, and from there went to Hopkins Academy in Hadley, where he closed his school-days. After leaving Hadley he entered the hardware store of Montgomery Newell, of Boston, as an apprentice, receiving a compensation of fifty dollars a year. At the age of twenty-two years he went to New York, where he spent a year and then joined some relatives in Baltimore, where he was employed for a term by his uncle, Benjamin Colman, who was at one time a partner of Nathan Appleton in Boston. In November, 1834, he began what was a new business in Baltimore, the American hardware business, and became the agent in that city for a large part of the manufacturers of the country. He had accounts in nearly every State in the Union, and by his exact methods and rigid integrity commanded the confidence of the business community. Having acquired a competence, he retired from active business pursuits and is now living at his home in Baltimore at a somewhat advanced age, but with a health and vigor of body and mind which enables him to gratify and enjoy the refined tastes in literature and art which in his busy life he has not failed to cultivate. He is a lover of the past and its representative men, and to the pursuits of an antiquary he has devoted time and money, to the satisfaction besides himself of others who were less able to follow them with success. The towns of Plymouth and Topsfield and Duxbury and West Brookfield have cause to remember his liberality long after the hand which has dispensed it shall have lost its power to give.

The town has two hotels, a commodious town-house, built in 1860, a savings bank, incorporated in 1872, a Fire Department with steam apparatus and an abundance of water, supplied by aqueducts from copious springs on the slopes of neighboring hills. In earlier times two newspapers were published in the town, but, as in many other New England communities, the facility and cheapness with which the metropolitan press furnishes everywhere its supplies have rendered the local press both unprofitable and unnecessary. The *Moral and Political Telegraph or Brookfield Advertiser*, published by Thomas & Waldo, and the *Political Repository and Farmer's Journal*, by E. Merriam & Co., are scarcely remembered by any now living.

The population of the town, which from the date of its incorporation until 1880 had slowly, but gradually, increased, was found in 1885, in consequence of the destruction of one of the shoe establishments of the place, to have fallen off nearly two hundred. There is no reason, however, to doubt that from this new starting-point another gradual increase will set in. The population at each census since the incorporation has been as follows: 1850, 1344; 1855, 1364; 1860, 1548; 1865, 1549; 1870, 1842; 1875, 1903; 1880, 1917; 1885, 1747.

Some of the distinguished men who, in earlier times, were born or lived within the limits of the town have been referred to in the history of Brookfield accompanying this sketch. Most of those who in later years have been conspicuous in the various walks of life have served the town in responsible offices, and have been referred to in the lists presented on earlier pages of this narrative.

It would be improper, however, even at the risk of repetition, to omit particular reference to a few of the men who have given West Brookfield distinction in the past. General Joseph Dwight, a graduate of Harvard in 1722, who lived in the town for a time; Joshua Upham, a distinguished Loyalist, a graduate of Harvard in 1763, who became a judge of the Supreme Court in New Brunswick; Jabez Upham, a Representative in Congress; Jedediah Foster, a graduate of Harvard in 1744, who became judge of Probate and member of the convention for framing the State Constitution; Dwight Foster, a graduate of Brown University in 1774, who became Senator of the United States, and others of equal or less reputation served to give to West Brookfield, or Brookfield, as it then was, a standing in the councils of the Province and State of which few towns in Massachusetts could boast.

Among those who have obtained distinction in broader fields of labor than were open to them at home may be mentioned Charles Merriam, of Springfield, already referred to as a benefactor of the town; Daniel H. Chamberlain, a graduate of Yale College, and the distinguished ex-Governor of South Carolina; Rev. Leander T. Chamberlain, of Norwich, Conn.; Rev. Enos Hitchcock, of Providence; Rev. Caleb Sprague Henry, the well-known professor and author; Lucy Stone Blackwell and Rev. Austin Phelps.

Lucy Stone was descended from Francis Stone, who lived before 1742 in that part of New Braintree which was annexed to North Brookfield in 1854. Francis Stone, son of Francis, was born in 1742. He was with his father in the French wars, and his father was killed at Quebec under Gen. Wolfe in 1759. Francis, the son, was a captain in the Revolution, and

one of the leaders in Shays' Rebellion. After the dispersion of the insurgents at Petersham in February, 1787, he fled to Vermont, where he remained until the decree of amnesty permitted him to return. He married, September 11, 1760, Martha, daughter of Abel Chase, of Sutton, and second, in June, 1777, Sarah Witt. Her children were Amy, Sally, (who married Hugh Barr, of New Braintree), Luther, Jonathan, Calvin and Francis. Francis, the last-named of these children, born November 9, 1779, lived on Coy's Hill, in West Brookfield. He married, March 27, 1804, Hannah Matthews, and had Bowman, 1805; Francis, 1807; Elizabeth Matthews, 1808; Wm. Bowman, 1811; Luther, 1813; Rhoda, 1814; Luther again, 1816; Lucy, 1818; and Sarah Witt, 1821. Lucy was born August 13, 1818, and graduated at Oberlin College. She early attached herself to the anti-slavery cause and to the advocacy of woman's rights, in which she distinguished herself as a forcible and eloquent speaker. She was married in 1855 to Henry B. Blackwell, but is usually called by her maiden name.

Austin Phelps, the son of Rev. Eliakim and Sarah (Adams) Phelps and grandson of Deacon Eliakim and Margaret (Coombs) Phelps, was born in West Brookfield Jan. 7, 1820, and graduated at the University of Pennsylvania in 1837. He was ordained pastor of the Pine Street Congregational Church in Boston in 1842, and in 1848 was appointed Bartlett professor of sacred rhetoric in Andover Theological Seminary. He married, in 1842, Elizabeth, daughter of Professor Moses Stuart, who is well known as the author of "The Sunny Side," and other works. Their daughter, Elizabeth Stuart Phelps, is better known than her mother as the author of "Gates Ajar," and other works too numerous to mention.

With the mention of these distinguished sons and daughters of West Brookfield this imperfect sketch must close. The reader who would learn more of the early history of the settlement of Quabaug and of the three towns into which its territory has been finally divided, is referred to the able and exhaustive history of North Brookfield, written by J. H. Temple, and published by that town in 1887.

BIOGRAPHICAL.

JOHN M. FALES.

In the middle of the seventh century James Fales came from Chester, England, and settled in Dedham. His children were James, John, Mary, Peter, Hannah, Martha, Rachel and Ebenezer. John Fales, one of these children, had Hannah, Martha, Rachel, Ebenezer, John, Joseph and Mary. John, one of these children, had a son Daniel. Daniel Fales married Sally Pratt, of Sherburne, and had Leander, Mary Ann, Elmira L., John M., Charles, Martha S., Sarah E. and Daniel H. Leander lived in Shrewsbury; Mary Ann married a Parker, and lived in Holliston; Elmira L. married a Lincoln, and lived in Brookfield; Charles lived in Brookfield; Martha S. lived, unmarried, in Shrewsbury; Sarah E. married a Flagg, and lived in Westboro'; and Daniel H. married a Thurston, and lived in Brookfield.

John M. Fales, the subject of this sketch, was born in Shrewsbury August 25, 1805, and married Mary S. Trask, of Leicester, May 12, 1831, by whom he had Ann Eliza, who married Dr. J. Blodgett, now of West Newton; George Henry, who married Laurinda T. Tomblin, daughter of Lucius Tomblin, of West Brookfield; John, who died at the early age of twelve years; Leander, who died at the age of seventeen years; Francis Theodore, who married Esther Griffin, of Enfield; and Mary, who died in infancy. From James Fales came the Fales families of Holden, Troy, Bristol, Taunton, Foxboro' and Milford. The Fales family was a very prolific one, David, of the third generation, the son of the second James, having had twenty-four children, and more than fifty of the descendants of the first James having had ten.

John M. Fales attended school in Shrewsbury, and afterwards went to Dedham, where he learned the trade of making shoes. The trade he learned included all the branches of the trade, and it is said that the first pair of shoes he ever wore he made himself. About the year 1831 he went to Brookfield and there opened a custom boot and shoe shop. After a short time his success in business warranted the initiation of a new enterprise, and with good business qualities and ample experience he entered into the wholesale manufacture of boots and shoes. In this business he was the pioneer in Brookfield, and before his death, which occurred in 1867, he established a large trade, in which he employed about one hundred and seventy-five hands. Before the war his business, like that of other shoe manufacturers, was largely at the South, but his adherence to principle saved him when the war broke out from those serious losses which many less conscientious than himself incurred.

In 1860, at a time when dealers at the South boycotted Northern manufacturers who advocated measures opposed to the extension of slavery into the Territories, he was asked, in a letter from S. Kirtland, one of his customers in Montgomery, Alabama, if he intended to advocate the Republican cause. To this letter he made the following answer:

WEST BROOKFIELD, March 10, 1860.

MR. S. KIRTLAND,

Dear Sir,—

Yours of the 3rd inst. is received, asking my views in relation to the Republican party, and saying, if I endorsed their principles, you should not trade with me. In reply I would say that I sell boots, not principles. I shall vote the coming Fall, if I am alive and well, for the nominee of the Republican party for president, and if you see fit to give me your orders, I shall be pleased to fill them, but not under any consideration will I sell my principles to sell boots.

Yours Respectfully, JOHN M. FALES.

During the war he was successful in securing army contracts, and these he filled with a promptness and

John M. Foley

E. B. Lynde

E. B. Lynde

fidelity which did not always characterize negotiations with the government. After the war his business was largely in the West, and his orders were received directly at the factory and filled without the intervention of middle-men in Boston or elsewhere.

Mr. Fales, at the time of his death, which occurred October 27, 1867, was a member in full standing of the Orthodox Congregational Church in West Brookfield, and made its interests and prosperity his chief concern. He was an active member of the Republican party, and as its candidate represented his native town in the House of Representatives in 1847, and his Representative district, composed of Warren, West Brookfield and New Braintree, in 1864.

Mr. Fales was a man of indomitable courage, firm will, strict integrity and judicious benevolence. He sought no public station, and attended with thorough devotion to the demands of his business, but whenever appealed to in the interests of the community in which he lived, was lavish in the use of time and money to develop and promote them. George H. Fales, the son of John M. Fales, was appointed town treasurer of West Brookfield in May, 1887, on the death of E. H. C. Blair, and was chosen to that office by the town at its annual meeting in 1888. Mr. George H. Fales carries on the business of the manufacture of shoes at the factory occupied by his father, and is a successful business man and an esteemed citizen.

EBENEZER B. LYNDE.

The subject of this sketch is descended from Enoch Lynde, a merchant of London, who married Elizabeth Digby and died in London in April, 1636. Enoch had three children, two of whom died in infancy. Simon, the surviving child, born in London in June, 1624, followed the occupation of his father and finally, after carrying on business for a time in Holland, came to New England in 1650 and settled as a merchant in Boston, where he married, in February, 1652, Hannah Newgate. He had seven children, one of whom, the seventh child, Benjamin, became chief justice of the Superior Court of Judicature, and had a son bearing his name, who was elevated to a seat on the same bench. Simon Lynde was made a justice for the county of Suffolk and died November 22, 1689, at the age of sixty-five years. Hannah, the wife of Simon, daughter of John Newgate, by his last wife, Ann, born June 28, 1635, died December 20, 1684. John Newgate, her father, was born in Southwark near the bridge in 1580, and came to New England. He had three wives. By the first two he had Sarah, who married Capt. Peter Oliver, and another daughter, who married John Oliver. By his last wife, Ann, he had, besides Hannah, Nathaniel, who married a daughter of Sir John Lewis and left Capt. Nathaniel Newgate his heir. John Newgate died September 4, 1665, at the age of sixty-five years. Ann Newgate died in 1679, at the age of eighty-four years. Nathaniel Lynde, son of Simon, took with him to Saybrook the old parchment containing the family record and family arms, which is still in the possession of the branch of the family to which the subject of this sketch belongs. Nathaniel Lynde, the fourth son of Simon and brother of Benjamin, was born in Boston, November 22, 1659, and became a merchant. He removed to Saybrook, Conn., and married, in 1683, Susanna, daughter of Governor Willoughby. He was a man of undoubtedly large means for the times and held a prominent position in the government of the Province. He was one of the early benefactors of Yale College, having given a house and land for the foundation of a college at Saybrook, which afterwards was absorbed by the institution at New Haven.

Nathaniel Lynde had eight children, all of whom but Samuel were girls and died in infancy. Samuel Lynde was born at Saybrook in October, 1689, and educated at Yale. He was first justice of the peace and member of the Council for the county of New London and married Rebecca Clark. The precise location of the residence of the Lynde family at Saybrook was at what is still called Lynde's Point, at the mouth of the Connecticut River.

Samuel Lynde had three children, two of whom died in infancy. The third child, Willoughby Lynde, was born at Saybrook in 1711, and also educated at Yale. He married, November 19, 1736, Margaret Corey, and had one child, Samuel, who was born at Saybrook October 14, 1737. Samuel was also educated at Yale, and married, in July, 1758, Phebe Waterhouse. He also lived in Saybrook and had nine children, the last of whom was Nathaniel, who was born at Saybrook May 18, 1784. Nathaniel removed to that part of Brookfield which is now West Brookfield in 1805, and following the occupation of a farmer, soon became, as he continued to be until his death, a large owner of land. He married, July 15, 1806, Sally, daughter of Caleb Hitchcock, and died February 25, 1865. At the organization of the town, in 1848, he was one of a committee of three appointed to ascertain the financial condition of the town and report recommendations for appropriations. His judgment was largely relied upon in placing the new town on a sound financial basis. In 1858, on the occasion of the celebration by the three towns, Brookfield, North Brookfield and West Brookfield, of the anniversary of the Declaration of Independence, and in 1860, on the occasion of the bi-centennial celebration of the settlement of Brookfield, he was one of the committee of arrangements. The children of Nathaniel and Sally (Hitchcock) Lynde were Caleb Hitchcock, who died early; Mary Pemberton, who married Elijah Albord, of West Brookfield, afterwards president of the Northwestern Stage Company, and living in Indianapolis and Washington City; Samuel Willoughby, living in Richmond, Indiana; William Waterhouse, who died in Cincinnati; Sarah, who married James Van Uxum

and died in Richmond, Indiana; Henry, living in Greggsville, Illinois; Elizabeth Allen, who married Charles Woodward, living in Cincinnati; and Nathaniel, who died young.

Mr. Lynde married a second wife, Eunice Phelps, daughter of Ebenezer Bissell, of Windsor, Conn., and had Ebenezer Bissell; Eunice Phelps, who married James M. Durkee, of Pittsfield; Ellen Augusta, who married Horace White, of Boston; and Albert, who died young.

Ebenezer Bissell, one of these children and the subject of this sketch, was born in West Brookfield August 31, 1823, and was educated in the public schools of his native town and at the Leicester Academy. Like his father, he is an extensive owner of real estate and the occupation of farming, which came to him by inheritance, he has pursued with energy and success. He married, January 23, 1850, Minerva Jane, daughter of Joseph L. White, a successful manufacturer in North Adams, and has had the following children: Augusta, who was born July 28, 1851, and died February 5, 1852; Annie Dewey, who was born January 12, 1854, and died October 21, 1854; Herbert Bissell, who was born January 15, 1857, and is now living in West Brookfield unmarried; Nathaniel White, who was born January 4, 1859, and, after graduating at the Yale Scientific School and the College of Physicians and Surgeons in New York, became, as he now is, physician at the Inebriate Asylum at Fort Hamilton, New York; Mary Finney, the youngest child, born November 4, 1868, who is now pursuing a course of instruction at the Wheaton Seminary in Norton.

Mr. Lynde early won a prominent position in his native town and has always continued to occupy it. Though at all times reluctant to assume public office, his clear head and sound judgment, combined with a strong will and an unusual executive ability, have often been sought by his fellow-citizens, and, when sought, they have been freely and willingly lent. He has served on the Board of Selectmen and as moderator of town-meetings, and in various ways he has brought his active influence to bear in the promotion of the interests and welfare of the town. As a general adviser and friend, as a promoter of peace and good-will, as the earnest advocate of philanthropic, educational and religious enterprises, in a word, covering all, as a kind neighbor and good citizen, he occupies a place which every man should be proud to fill. The affection and esteem in which he is held by the community at large he possesses also in the narrower field of the Congregational Church, of which he is a member. To his energy and fidelity much of its prosperity is due, and to his business foresight may properly be attributed the insurance of its meeting-house, burned in 1881, without which the injury inflicted upon the society would have been well-nigh irreparable. But the reputation of Mr. Lynde has not been confined to his church or town. Beyond their borders his influence has been felt and his usefulness acknowledged. In 1877 and 1878 he represented his district in the Massachusetts Senate, and the position there sought by him as a member of the Committee on Agriculture enabled him to do something to advance and promote the welfare of the farming interests of the State, to which, during his life, he had been actively and intelligently devoted.

CHAPTER LXXXII.

PAXTON.

BY LEDYARD BILL.[1]

If lines were drawn diagonally across the Commonwealth, from and to each of its four corners, the point of crossing would be within, or nearly so, the borders of the little town of Paxton; hence it might be truly said, speaking geographically, that this town is the "axis" of the State, and that the high point of land known as Asnebumskit Mountain is the "hub" itself; thus may the least of towns aspire to rival, in some senses, the greatest!

This town lies about fifty-five miles west of Boston, and some seven miles from the city of Worcester, and is bounded and described as follows, namely: On the north by Rutland, on the east by Holden and Worcester, on the south by Leicester, and on the west by Spencer and Oakham. The town is situated upon high and rugged lands, and belongs to that class of towns known as the "hill towns" of the State. The general elevation above tide-water would not be very far from eleven hundred feet; indeed, the village "common" is, to be tolerably exact, eleven hundred and thirty-five feet above the sea, while the southernmost spur of the White Mountain range, Asnebumskit, is about fourteen hundred feet above water level, and is, with the exception of Mount Wachusett, the highest land lying east of the Connecticut River. The land surface is not so broken and irregular as might be inferred from its considerable elevation, but is rather a succession of rounded hills on which are situated some of the best of farming lands and farms, and again the valleys stretch away, here and there, into level tracts both fertile and pleasant, and between the hills and valleys of this town are found many thrifty homes and a comparatively contented population.

This town does not rank among the ancient corporations, but yet it has passed its first century, and may be said to have seen "generations come and go." The reasons which moved the early settlers to ask to be incorporated were various, but chief among those they gave in their petition was "the great difficulties

[1] Copyright applied for and all rights reserved.

they labored under in attending public worship, in consequence of the great distance they were from its places in the towns to which they belong." The foregoing petition was presented to the Legislature in 1761, and was unsuccessful, as nearly every petition of this nature is apt to be on its first presentation.

The people thus petitioning for a separate municipality were citizens of Leicester and Rutland, and the tract of land desired by the petitioners was that portion of the two towns lying contiguous, viz.: the southern part of Rutland and the northern portion of Leicester, making a tract of about four miles square. They complained in their first petition and subsequent appeals to the General Court that the distance to places of worship was great, and doubtless the same reason held good when it came to the transaction of the business of the two towns, since the centre of each of these towns was full five miles distant, and we can well imagine the condition of the highways in those early days, when the best were but very indifferent roads, while the side-ways were mere bridle-paths, making it quite a task in the inclement season to perform those public duties incumbent upon them.

The inhabitants, however, had the merit of persistency, and the following year they again petitioned and were again rejected; but nothing daunted, they still worked for the accomplishment of their final purpose; so in 1763, feeling, doubtless, the inconvenience of their position more and more, they again renewed their importunities and received some support from one of the towns, but the other (Rutland) opposing, the case was still deferred.

The following petition was presented to the authorities of Leicester by the undersigned, and this town, at a town meeting held on May 16, 1763, voted affirmatively on the petition, which was the first favorable action looking towards the establishment of the new town:

To the Selectmen of the town of Leicester, and the other inhabitants of the same:

The petition and desire of the subscribers hereof humbly showeth,—That whereas, in the government of Divine Providence, our inhabitants are at a great distance from the place of public worship in this town, which, together with the snow and moisture of the land, it is exceedingly difficult, a great part of the year, to attend on the public worship of God in this town; We look upon it as our bounden duty to endeavor to set up the Gospel among us, by which we, with our families, might more constantly enjoy its means of grace.

In order to accomplish the good end of setting up the Gospel, we propose, if possible to obtain leave so to do, to erect a town or district between the towns of Leicester and Rutland, by taking two miles off each town to make up the contents of four square miles. Wherefore your petitioners humbly and earnestly desire that, for the good end above proposed, you would now sett off, by a vote of this town, two miles at the north end of this town, the lands with the inhabitance thereon, to be laid out and connected with the south part of Rutland that is adjoining the same, to be erected into a town or district by order of the Great and General Court of this province, as soon as may be, that we may set up a Congregational Church and settle a gospel minister, according to the constitution of the churches in the land; which we judge will be for the advancement of religion and our comfort if it be obtained in the way of peace. So wishing your health and peace, as in duty bound, we subscribe your petitioners:

Leicester, May 13, 1763.

Oliver Witt,	James Thompson,
Timothy Barrett,	William Thompson, Jr.,
Abraham Smith,	Abijah Bemis,
Abner Morse,	Daniel Snow, Jr.,
William Thompson,	James Nichol,
Jason Livermore,	Isaac Bellows,
Nathan Livermore,	Daniel Steward.

Finally a fourth attempt was made by these people, and the petition this time headed by one Oliver Witt, followed by many others, was duly presented to the Legislature, and this time with better results, for it was ordered "that Jedediah Foster, of Brookfield, and Col. Williams, on the part of the House, and Benjamin Lincoln, of the Council, be a committee in the recess of this court to repair to the place petitioned for to be erected into a parish, at the charge of the petitioners, and that they hear all parties interested for and against said corporation, and report at the next session whether the prayer thereof should be granted."

This committee held several meetings, at which there were hearings of all the parties interested, and at the succeeding session of the General Court reported, on June 23, 1765, a bill entitled, "An Act for Incorporating the Southerly part of Rutland and the Northerly part of Leicester, in the county of Worcester, into a District by the name of Paxton." This bill, after brief reference to the appropriate committee, was reported back to the full house and speedily passed both branches of the General Court, and received Governor Francis Bernard's signature on the 12th of February, Anno Domini 1765. Thus was the frail bark of Paxton duly launched, possessing all the rights, privileges and immunities of any other town, except the right to send a representative on its sole account, but gave the right to "join with the town of Leicester and the precinct of Spencer" in choosing a representative to the Legislature.

It is proper to make some reference to the name given the town by the act of incorporation, and perhaps no better account can be given than the following, which has come under our observation, viz.: "When the bill for incorporating this town passed the House of Representatives no name was inserted; the blank was filled in the Council by the word Paxton, in honor of Charles Paxton, who at that time was marshal of the Admiralty Court and a friend and favorite of Francis Bernard, the Governor, and of Thomas Hutchison, the Deputy-Governor. It is said that Paxton promised the town a church-bell if it was named for him; this promise was never fulfilled. Charles Paxton, although polished in manners and of pleasing address, was an intriguing politician and a despicable sycophant; 'every man's humble servant, but no man's friend,' as his paper figure was labeled, when, on Pope's day, as the anniversary of the gunpowder plot was called, it was paraded through the streets of Boston standing between the effigies of the Pope and the devil. He was the tool of Charles Townsend, the Chancellor of the English

Exchequer, and with him devised the scheme of raising a revenue from the colonies by a tax on glass, paper, painter's colors and tea. The passage of this bill by the Parliament of England was greatly aided by Paxton, and returning to Boston, he was put at the head of this internal tax system, and made himself especially obnoxious to the people by reason of his issuing search-warrants to discover supposed smuggled goods, and his course was so insolent and tyrannical that he became an object of public hatred, was even hung in effigy upon Liberty Tree, and was subsequently, by the wrath of the people, driven into Castle William, and finally, at the evacuation, he departed with the British troops and went to England, where he died in 1788."

The course of this man, who had christened the town with his own name, was such that the bad odor of it reached the inhabitants of the newly-fledged district and they were intensely disgusted, and among the earlier public acts of the citizens was to petition for a change of name, and why the Legislature did not grant this reasonable request is a marvel. It should be attempted even at this late day, and there is no good reason why a new name would not be readily granted.

There have been several additions at sundry times to the territory of Paxton. At one time, on the petition of John Davis, Ebenezer Boynton, Nathan Harrington, Samuel Harrington, Micah Harrington and Ephraim Harrington, of Holden, their estates were set off from Holden on February 13, 1804, and attached to the town of Paxton, and, by this act, the town line was extended so as to border on Worcester. Still another addition from Holden was made in April, 1839. Again, in 1851, a small strip was added from the same source, and there is still room for improving the present zig-zag boundary line between Holden and Paxton. The total acreage is now about eight thousand five hundred acres. The population of Paxton at the time of incorporation is not known, but it is presumed to "have been some hundreds," says an unknown writer in the *Worcester Magazine*, published a half-century or more ago. It is quite likely that the settlement of this portion of the country was well under way the latter part of the first century after the landing of the Pilgrims. It was, indeed, about 1720 that Rutland was incorporated and Leicester settled, and all this region of country taken up gradually by natural gravitation of the population westward, this section being at that period of time the "great west," and had its border-wars and conflicts with the aborigines and their allies. Doubtless there were wise men in those days who were wont to say to the wayward and the self-aspiring in the crowded centres of population along the seaboard: "Go west, young man, go west." And so, in the lapse of time, these hill-towns, with those in the valleys, have filled up and the great army of emigrants has continued from that day to this to flow westward, founding new States, enlarging the boundaries of civilization and establishing both law and liberty, on firm foundations, over a vast territory.

Thus these hill-towns, so despised in the eyes of some ephemeral writers who draw distressing pictures of "abandoned farms, dwindling villages, decayed meeting-houses, diminished schools and poor highways," have contributed largely to the public weal.

The marvelous strides this country has made in the last century are chiefly by reason of the inexhaustible supply of men and women drawn from the hills and valleys of New England, where they have been trained in the schools of industry and frugality. These have given direction and force to the upbuilding of the great region of the West. Thus, while it is true that the populations of the hill-towns, with some of those even in the valleys here in New England, have diminished, the cause is not permanently disturbing—since the era of cheap lands is about closing and the reflex tide cannot be far distant when New England will be filled to overflowing, and then this assumed prophecy of a premature decay will have been forgotten. The country is to be taken as a whole and not judged by any of its minor members.

The statement that there "were some hundreds" of people in the district of Paxton at the time of incorporation could hardly have meant more than two or three hundred at the most, for in 1790 the number was but 558; in 1820 it rose to 613 and in 1850 to 870, while in 1880 it had fallen to 592, and in 1885 the State census gave the town only 561.

The population in 1870 was, we believe, well towards nine hundred, but, in part owing to the destruction of one of the chief industries by fire, which, unfortunately, was never re-established, it has gradually fallen to a point in numbers to about what it was one hundred years ago.

The town is at the present time purely agricultural, there being no manufacturing of any description carried on here.

In former years the boot and shoe industry was the principal business, or, at least, monopolized a very great share of the attention of the people; and the product of the shops was equal, if it did not greatly exceed in value the products of all the farms in town.

In 1820 John Partridge established the boot business in Paxton, and continued in the same line to the time of his decease, which occurred some fifteen years since, having been in business over half a century. The next notable firm to follow in the same line of industry was that of Messrs. Lakin & Bigelow, and they were succeeded by R. E. Bigelow & Son. All of these parties accumulated quite large fortunes, but none of their descendants reside within the town at the present time.

The town of Paxton is so situated, and has such natural beauty of landscape, and from its summits such extended and charming views of the surround-

ing country, that its ultimate destiny is by no means uncertain. Already many scores of visitors rest here during the summer months, and annually come back to "view the landscape o'er" and breathe again the wholesome and health invigorating air of these primeval hills and valleys. From the top of Asnebumskit, on a clear day, a score of towns may be seen, and from its summit a fine bird's-eye view of the city of Worcester can be obtained, which alone well repays the tourist for all his labors. There is still another eminence, known as Crocker Hill; this swell of land lies a few rods east of the village, and from the top there is a fine view of Wachusett, also of Monadnock and the Hoosac Mountains. This point is a charming spot to all who have any taste for the beautiful in nature. The wonder is, that some capitalist does not secure it, pitch his tent on the same and invite the world to dine with him and spend all of the "midsummer nights" at this breezy and delightful place. On "Christian Hill," west of the village church, is another landscape to the northward which is unsurpassed for quiet loveliness. Some day an artist will *discover* it, and it will then be famous for its exceeding beauty.

It may be thought unusual for elevated lands to hold many ponds or lakes; but, however that may be, Paxton has a goodly supply, inasmuch as there are some half a dozen artificial or natural ponds within the town's boundaries.

Of these, Lake Asnebumskit is by far the most interesting. This is located at the northern slope of the mountain whose name it bears, and covers, perhaps, sixty acres, "more or less," as the legal phrase is. It is elliptical in form and has an average depth of perhaps seven feet. All the sources of supply for this attractive sheet of water come from the springs in and around it. These springs are uniformly cold and clear; especially is this true of one at the southern shore, near the present carriage-way to the lake. The outlet is at the extreme northern end, and the flow is considerable. It supplies the Haggett Pond, and in its rapid descent furnishes power for Harrington's grist-mill, planing-mill and saw-mill, and then turns abruptly eastward, flowing through Holden, and on to the Quinepoxet and Nashua Rivers, and thus to the sea.

This lake has been famed for its fine pickerel and perch, and for many years afforded most excellent fishing for many people far and near. Latterly, however, its supply diminished, and some dozen years ago a few citizens formed a club and, securing a lease from the Commonwealth, stocked it with black-bass, and these were left for several years to increase, but when fishing was recommenced it was discovered that the bass had destroyed the most of the native fish, and, as many of the bass made their escape through the lake's outlet, little headway was made in stocking the pond. The club subsequently relinquished to the town all their rights, whereupon the town took out a lease, and all have the old-time privilege restored, but the fish are not plentiful in the lake at this time.

Bottomly Pond is the largest body of water in the town. It is about one mile in length, has irregular shores, and is of varying width, while its depth must average ten feet or more. It is for the most part an artificial pond, and is used as a storage-pond for the mills below, of which there are quite a number. This pond lies just south of the village and west of the Worcester and Paxton county road, but only the southern end is in view from the highway mentioned. It is there that the joke concerning the "Paxton Navy-Yard" was perpetrated, which is so frequently mentioned even to this day. It was some years ago, and in the late autumn, as the stage-coach with its complement of passengers reached this place in the highway (Arnold's Mill), where there was afforded a tolerable view of the lake. A sailor passenger, who had at least "three sheets in the wind," on gazing out and seeing the forest trees at the left, with their bare trunks and branches in close proximity to the water, recalled his wandering senses sufficiently to exclaim "Is—hic—this—hic—the navy-yard?" The solemn quiet which had prevailed with the passengers in the coach up to this time was suddenly broken. The ludicrous remark, and the very absurdity of the whole subject, as applied to a section of country twelve hundred feet above tide-water and fifty miles inland, and coming, too, from a furloughed sailor just off ship, was too much, and all, as it were, "tumbled" to the same, and the joke seems ever fresh in the mouths of men inclined to poke a little fun.

Turkey Hill Pond is a natural body of water near the Barre county road, about two miles north of the centre of the town. It is perhaps a fourth of a mile in width. Its waters are dark and the fishing is fair, though not nearly as good as in former years. The outlet is at the southern extremity, and forms what was once known as Jennison's Brook, crossing the highway near what is now known as the "town-farm," and empties into Comins' mill-pond, formerly Jennison's mill-pond, and thence southwesterly through Spencer and the Brookfields to the Chicopee River. Formerly there was at the outlet of this pond a fulling-mill and carding-factory.

There are several small streams flowing into this Jennison Brook within the limits of the town. One of these rises in the southwesterly part of Rutland, passes into Paxton, and unites with the brook above named in the meadow below Comins's mill. Another rises about five hundred yards southeast of the meeting house, on lands owned by the late John Partridge, and flows southerly across the village farm of the writer into Lakin's meadow and thence northwesterly to Howe's meadow, where it unites with the brook above named. The third takes its rise in the southwesterly portion of the town, and joins the above brook just over the Spencer line. These three forks

are the head-waters of the Chicopee River, that rising on the Partridge land being the most easterly, and, perhaps, is the true head of the Chicopee.

The head-waters of the Blackstone River are found on the old Col. Snow Farm, and near the road leading from Paxton to Holden. The spring is on land now owned by Peter Daw. There are numerous other springs lower down the brook which is known as Arnold's Brook. The stream was given the last name of Oliver Arnold, who lived in the present old red house, adjoining the highway at the junction of the Worcester and Leicester roads; he kept a saw- and grist-mill there, and had an artificial reservoir, which has since been enlarged and repaired, and, like the brook flowing into it, was and is called Arnold's Pond. The old saw-mill site is still visible, a few rods west of the county road. Mr. Arnold had a son Elisha, who is living in this town at the present time. The pond last named is used as a storage reservoir for the mills below, and its waters flow into Bottomly Pond, previously mentioned.

There is another small stream, which has its source in a spring on the southeast face of Asnebumskit Mountain, and flows across the county road southerly, and is the head-water of Lynde Brook which forms a source of supply for the city of Worcester.

While speaking of these brooks, we are reminded of a house in this town, owned and occupied by Tyler S. Penniman, situated about a mile east of the village.

This house stands on a slight rise of ground, in such a way that rain falling upon the roof flows away into the waters of the Blackstone River on the one side, while upon the other the water goes to the Chicopee. There is, too, a well-known spring, famed for its cool, sweet water, which bubbles up near the trunk of a large tree just west of the Rutland highway, and less than a mile from the centre, where the water flows a short distance into a marshy tract, out of which two streams come, one going northerly into the Quinepoxet, while the other goes southerly to the Chicopee.

The original growth of forest trees here must have been quite large and very general. At the present time pine and hemlock predominate, though there are samples of about every other sort of timber found in New England. As an illustration of the size of some of the earlier timber, it may be interesting to note that this sketch is penned on a table made of a single pine board, three and a half feet in width, manufactured from a tree cut in this town some fifty years ago. The older growth of wood disappeared long since, and at the present time the second growth has about all been removed, and yet it would be difficult to say whether there is, or is not, as much land given up to the growth of forest trees as at any time within the past hundred or more years.

Among the early settlers in what is now Paxton, the names of Josiah Livermore and his brother, Jason Livermore, appear. This was about 1748. They came from the town of Weston, and settled in what is now the southwestern part of this town, on lands considerably improved. About the same time came Abijah Bemis, and from the same town, or Waltham. There were also living near the Livermores: William Thompson, James Thompson, James Bemis, William Wicker, Jacob Wicker, John Wicker, Isaac and Ezekiel Bellows.

Captain Ralph Earle, an early settler, owned and lived on the farm which once belonged to the late Joseph Penniman; and his was one of the first fifty families which settled in Leicester, and he was one of the grantees named in the deed of the proprietors of Leicester, and was assigned to Lot No. 47. On the other hand, in the Rutland portion of the new town, Seth Metcalf made an early settlement, as did Phineas Moore, who lived on the Rutland road, a mile or so north of the present meeting-house, and, by the way, it is proper to say that the line dividing the towns of Leicester and Rutland ran east and west, by the present north side of the meeting-house as it now stands. Others of the early settlers were: John Snow, David Davis, Benjamin Sweetser, Samuel Moore, Jonathan Witt and Oliver Witt.

We have seen that the act of incorporation of the "District of Paxton" transpired on the 12th of February, 1765. Very speedily "a warrant," dated the 25th of February, 1765, was issued by John Murray, of Rutland, a justice of the peace, the same being addressed to Phineas Moore, "one of the principal inhabitants" residing within the new district, requiring him to warn a meeting of the inhabitants for the choice of officers. We append a copy of the first warrant calling the first district meeting:

Worcester ss. To Mr. Phineas Moore of Paxton in the county of Worcester and one of the principal Inhabitants of Said District. Greeting—Whereas I the subscriber am Impowered by an act of this Province to call a meeting of the Inhabitants of the District of Paxton to Choose Town Officers &c.

[Seal] These are therefore on his Majestys name to Require you forthwith to Warn and Notify the Said Inhabitants of Paxton Qualified to Vote in Town Affairs to meet at the House of Mr. Jnº. Snows Innholder in Said Paxton on Monday the Eleventh Day of March Next at nine of the Clock in the forenoon then and there to Choose a Moderater, District Clerk, Selectmen, assessor, warden, Constables, Surveyors of highways, Tythingmen, Fenceviewers, Sealers of Leather, Sealers of weights and measures, Sealers of Boards, and Shingles, and all other ordinary Town Officers as Towns Choose in the month of March annually; hereof Fail not and make Due Return hereof with your Doings hereon unto me at or before the Said meeting. Given under my hand and Seal at Rutland in Said County this 25th Day of Feb. 1765 and in the fifth year of his Majesty's Reign.

Jno. Murray, Jus. of the Peace.

This first town-meeting was at the house of one John Snow, who kept a tavern or hotel, and who lived just east of the present village, on the Holden road, on the place known to the present inhabitants of Paxton as the old Colonel Snow or Bellows place. This place has now no farm buildings upon it, they having been destroyed by an incendiary fire about ten years since.

The meeting was held on March 11, 1765. Captain Samuel Brown was chosen moderator, and Ephraim Moore district clerk, and the following district officers

elected, namely: Selectmen, Oliver Witt, Ephraim Moore, Samuel Brown, Timothy Barrett, Abraham Smith; Clerk, Ephraim Moore; Treasurer, Ephraim Moore; Wardens, William Thompson, Jr., Jonathan Knight; Assessors, Oliver Witt, Ephraim Moore, Aaron Hunt; Constable, John Livermore; Surveyors of Highways, Abner Moore, Ebenezer Hunt, Jr., Elijah Howe, Thomas Cutler; Sealer of Weights, etc., Captain Samuel Brown; Tything-men, Samuel Man, Ralph Earle; Hog-reeves, Jonathan Morse, William Martin; Deer-reeves, James Ames, William Whitaker; Pound-keeper, Jonathan Knight; together with other officers, such as measurers of boards and shingles, etc.

They probably had a jollification at the close of this meeting. Remembering that in those early days the inhabitants had no town halls, either old or new, in which to meet, their next best place was at some public house, or tavern, as they were then called, and we have seen that they first gathered at an inn. In those they found good cheer, even if the accommodations were circumscribed. Here, too, the old-time flip-mug, or glass, served for the whole company, and was frequently replenished, as everybody in those days indulged, more or less, in the "flowing bowl." It is sometimes asserted in these days that temperance has not made any progress, but in these century mile-stones we can note a world of advancement. Why, a hundred years ago the clergy, as well as the people, partook of the ardent, even at the laying of the corner-stones and dedication of church edifices, and also after the Sabbath sermon all would repair to the nearest tavern for "refreshment." Now, in New England these things have all passed away, so far as the public eye or public approval is concerned. Strange to say, however, the people did not lack for piety in those sturdy days, for among the very first things done, of note, by this district of Paxton was to provide by vote for the building of a "meeting-house."

At the next district meeting, held on April 1, 1765, "it was put to vote to see if the district will Build a Meeting House in said Paxton and of what dimensions they will Build it, also to see if the district will agree upon some place for to Sett Said meeting House on." It was also voted "to build a house of worship fifty feet in length and forty in width with twenty two foot posts and to set the house at the Gate behind John Snow's farm in Mr. Maynard's pasture."[1] In the following autumn a grant was made of £13 6*s*. 8*d*. for the support of the gospel during the winter. In the following spring (March 3, 1766), the sum of £250 was voted "for a meeting house and a meeting house place." When the building had advanced to the point of raising the frame there was a general turnout of the citizens interested, and the records say a supper was provided for the occasion. The building was so far completed by the end of the year that its use commenced. Its appearance has been described by Mr. Livermore,[2] in his Centennial address, as "a plain, square structure, standing in the middle of the Common in primitive simplicity, without dome or spire, destitute of external ornament and internal embellishments, its prominent sounding-board above, and its deacon seat and its semi-circular communion table at the base of the pulpit; its uncarpeted aisles and pen-like pews, with their uncushioned and hinged seats, to be turned up and let down at the rising and sitting of their occupants, with a clatter sufficient to have awakened a Rip Van Winkle; its negro seats in the rear of the front gallery and the old people's in front of the pulpit, for the use of the deaf; its two corner pews perched aloft over the gallery stairs.

> "'Through which, and the scuttles above, were the ways
> To the attic, the arsenal of those early days.'"

Thus did the inhabitants of this new district of Paxton keep faith with the General Court. They had asked to be set up in housekeeping, and gave as a reason that it was burdensome and extremely inconvenient for them to go so many miles to attend upon church service, and it cannot be denied that they were sincere and honest in their request. They had, indeed, other and important reasons for separation, but the foregoing was the chief one given.

One writer says that there was an attempt to form at first an Episcopal Church, but it failed, and had the effect to put off the formation of any other till September 3, 1767, when the present Congregational Church was organized, and the meeting-house completed during this year.

Regular preaching heretofore had not been established, but yet services had been held by the Rev. Henry Carver and by Rev. Mr. Steward, who also taught school here at this early date in the history of Paxton.

The names of those subscribing to the covenant at the time of organization were Phineas Moore, John Snow, Jason Livermore, David Davis, Benjamin Sweetser, Silas Bigelow, Samuel Man, Oliver Witt, Stephen Barrett and Samuel Brown.

In the early part of 1767 a committee was appointed to secure a permanent pastor, and they subsequently reported in favor of the Rev. Silas Bigelow. On May 14, 1767, the district voted him the sum of £133 6*s*. 8*d*., as a settlement grant, and also voted a yearly salary of £53 6*s*. 8*d*. for the first four years, and £66 13*s*. 4*d*. as long as he shall continue his relations as a minister.

In response to the call of the parish and district of

[1] During the year a good deal of dissatisfaction was manifested about the location, and several efforts were made, at subsequent meetings, to change the decision, and we believe it was finally located on land of Seth Snow, who subsequently gave the town the land around it for a town "common."

[2] George W. Livermore, of Cambridge, a native of Paxton, delivered the Centennial address in 1865.

Paxton to become their settled pastor, the Rev. Silas Bigelow returned the following answer, viz.:

To ye Inhabitants of ye District of Paxton, Christian Friends and Brethren:

I have taken very serious Notice of ye Sovereign Hand of Divine Providence in Conducting me to you, and would in some suitable and Grateful manner attend to ye kind acceptance my labours have met with among you; and ye Regard which you have manifested to me (how unworthy so ever) in Electing me to be your Pastor. I observe ye Degree of unanimity and undeserved Affection with which you have Done this, and I can't but be apprehensive of *Harmony* and *unanimity* afford some of ye Best encouragements to hope for success, and yt ye Great End of ye Gospel ministry may be obtained in the Conversion of Souls to God and ye edifying of Saints in Faith and Comfort to Salvation. Nor would I fail to take Due Notice also of ye Provision which you Have made for my *Settlement* and *Support* among you; and it is Fit you should give Praise to God who both enabled you to maintain ye gospel and ye ordinences thereof, and so far inclined your hearts thereto; At ye same time I am obliged to appraise you (not, I hope, From any avoricious Disposition, nor Because I would rather seek yours than you, but because I would fain Promote your real Benefit and highest welfare) that after Taking ye Best Advice I can get, not merely From those in Ministerial life, but From others in Civil Character, I fear I shall not be able (from The *Support* you have *offered*) to answer your expectations from me in ye office I must Bear, nor to sustain the Dignity and Discharge the duties thereof. But having sought earnestly to ye God of all Wisdom and Grace for Direction in the most weighty and important affair; Consulted such as are esteemed Respectable for their Capacity and Integrity, and Deliberately considered everything as well as I could within myself, I accept of your Call, Determining by the Grace of God to Devote myself to ye work of ye Gospel Ministry among you; not Doubting your Readiness to Do what you can to free me from ye unnecessary cares and Incumbrances of Life; yt so I may more fully give up myself to this Great and arduous work. Concluding with Rom. 15: 30 and 32. Now I Beseech you, Brethren; for ye Lord Jesus' sake and for ye love of ye spirit yt ye strive together with me in your prayers to God for me; That I may come unto you with Joy by ye will of God, and may with you be refreshed. So Prays your Friend and Servant in the Gospel of Christ.

Paxton, June 25, 1767. SILAS BIGELOW.

Mr. Bigelow was ordained on October 21, 1767. His pastoral labors were comparatively of brief duration, since his decease occurred on November 16, 1769, at the age of thirty years. He was buried in the public cemetery, near the southeast corner and but a few paces from the present meeting-house. All accounts agree that this first pastor was a devoted minister of the Gospel; a man of unusual intellectual endowments, coupled with great dignity of manner, and he was also a man much esteemed for his high Christian character and greatly beloved by all of the parish over which he had so briefly presided.[1]

Under his ministry the kindliest of feeling had sprung up among all the members of the society, and had his valuable life been spared to this people, much greater good must have been accomplished. The Rev. Mr. Bigelow was from the vicinity of Concord, it is believed; of his early education we have no present data. He was of a family, however, quite celebrated for their learning and prominence in public affairs.

He lived on the western slope of Asnebumskit, on what is now known, and has been these many years, as the "old Bigelow place." His first wife was from Lexington. There is one memento of this family still preserved. It is an antique clock, one of the well-known "grandfather's clocks," so-called, reaching from floor to ceiling. It was a bridal present from her parents in Lexington, where the clock was made, as indicated on its face. It remained in the family several generations and on the farm more than one hundred years, and is now in the possession of the wife of the writer (a descendant), and is doing duty as faithfully as when first set in motion by the hand of the bride, a century and more since. His second wife was a Mrs. Sarah Hall, of Sutton; intentions of the marriage were published September 22, 1769, as shown by the records.

On November 28, 1770, the Rev. Alexander Thayer[2] was ordained as the successor of Rev. Silas Bigelow. His pastorate continued for nearly twelve years. He was dismissed on August 14, 1782. His relations with the church during the last half of his ministry were anything but agreeable. He was suspected of being a loyalist. "This suspicion (says one writer), whether well or ill-founded, was sufficient to create a degree of coldness, and, in some instances, a fixed dislike, especially among those, who, from other causes, had become disaffected." It is reported that his salary was another cause of trouble, he complaining that the currency had much depreciated, and that he was justly entitled to a grant to make it equivalent to what it was when first settled, and it is not unlikely, from a review of the whole matter, there was really just ground for complaint upon both sides, and entire condemnation of either party would be very unjust.

The Rev. John Foster[3] followed Mr. Thayer. He found the church divided and inharmonious. He endeavored to reconcile them, but was unfortunate in being a positive man, and in expressions was perhaps injudicious.

At all events the old troubles were not healed, but broke out afresh, when it was proposed to settle him. The first council refused to grant a settlement, but a short time afterwards a new council, composed of different members from the first, voted to ordain and settle him, which was accordingly done on September 8, 1785. He was dismissed in 1789. During his pastorate there was a secession of about twenty, who

[1] The undersigned met on Nov. 9, 1767, and made choice of pews in the completed church. The prices they were to pay ranged from fourteen to twenty-two dollars. The district voted to give them the preference as to choice, since they were the heaviest tax-payers on real estate. The district also voted to give them deeds of the pews.

Capt. Oliver Witt, Timothy Barrett, Abraham Smith, Capt. Ephraim Moore, Hezekiah Newton, Capt. Samuel Brown, Jonathan Smith, Elijah How, Jeremiah Newton, Jonathan Knight, Samuel Man, Ebenezer Hunt, Jr., James McKennen, Capt. Ralph Earle, Paul How, Phineas Moore, Jacob Sweeter, Ebenezer Hunt, Abijah Bemis, Peter Moore, Abner Morse, David Davis, William Whitaker, William Thompson, Seth Snow.

[2] He married Miss Abigal Goulding, of Holliston, in 1773.

[3] He was married in September, 1785, to Mrs. Eunice Stearns, of Holden.

formed a new church, and so continued till 1793, when a reunion occurred.

Mr. Livermore relates several anecdotes of Mr. Foster, one of which will interest the general reader. "In those days, when capital punishment was to be inflicted it was the law that public religious exercises should be held, and the criminal had the privilege of selecting the preacher. Mr. Foster was selected, and at the appointed hour the house was crowded, and in the audience were many clergymen. Mr. Foster being selected only to preach, asked the first minister he saw to offer prayer. The invitation was declined, and several others were similarly invited and all declined, whereupon Mr. Foster stepped to his place, with the remark in an undertone, though loud enough in the general hush of the occasion to be heard by all, 'Thank God, I can pray as well as preach.' It is reported that his prayer was so soul-stirring and sincere that all were moved to tears, and many wept aloud."

Mr. Foster is reported to have been a man of brilliant attainments, and a very eloquent preacher, but possessed some other qualities that neutralized greatly these gifts. The Rev. Daniel Grosvenor was installed on the 5th November, 1794, as the successor of Mr. Foster. He came to this people from a church in Grafton, where he had been pastor. There was, for a season, quiet and considerable religious interest manifested under this affable and able pastor. But the old trouble would not wholly down, but, ghost-like, came to the surface.

Mr. Grosvenor's health was poor at best, and he felt unequal to the task of reconciling the factions, and finally asked to be dismissed, which was granted on November 17, 1802.

One proof that the old troubles were the causes of the unhappy condition of things at the time, and prior to the retirement of Mr. Grosvenor, is that they continued to be a disturbed church for several years after he left, and some years came and went before a pastor was again settled over them.

Mr. Grosvenor lived a half mile northeast of the church on the Holden road, where Peter Daw now lives.

In 1808, February 17th, the Rev. Gaius Conant was ordained, and he remained with the society for many years. He lived and died in the square-roofed house now occupied by Deacon Levi Smith, situated about half a mile due east from the church. He was dismissed September 21, 1831, and the same council ordained the Rev. Moses Winch. It was in 1830 that the Congregational Society was organized separately from the town. Mr. Winch's ministry must have been a very quiet one, and without any very disturbing circumstances, since very little is said respecting his stay here. He was discharged in 1834, August 28th.

The Rev. James D. Farnsworth succeeded Mr. Winch and was ordained on the 30th of April, 1835, and continued his labors till May 7, A.D. 1840. He was succeeded by the Rev. William Phipps, A.M., who was ordained November 11, A. D. 1840. Something more than a passing notice should be given this eminently gifted divine. He was for more than twenty-eight years connected with the history of the Congregational Church in this town. He was born in Franklin, this State, on October 31, 1812. He was the son of William and Fannie (Moulton) Phipps, with a line of ancestry traceable back to old England; to the father of Sir William Phipps, one of the early Governors of Massachusetts Colony. He was a quiet, gentle man, and true, yet did not lack force or bravery. He was resolute for worthy ends, and brave in self-denial. He early learned the trade of a cabinet-maker in his father's shop, which trade, in those days, meant quite as much an ability to manufacture a violin as a bureau, and as an illustration of his mechanical genius in this direction, it is told that he made in the days of his apprenticeship a fine bass-viol, with five strings, on which he was wont to play as an accompaniment to his vocal songs. He was a great lover of music and possessed a fine, rich, bass-tone voice, and always sang with an enthusiasm never to be forgotten by sympathetic hearers. He found his trade especially useful to a "country minister" in a small place, and on a small salary, since many of the things he needed he either had to make or go without. His inventive faculty was by no means inconsiderable. He constructed models of an improved school-room, a turret wind-mill, a drawing globe, a seed-sower, an upright piano and other useful and fancy things. He was a natural student, ever fond of the companionship of good books, and was diligent in everything. He attended Day's Academy in Wrentham; from there he entered Amherst, and graduated in the class of 1837. On leaving college he taught, as principal, in the academy at Edgartown, for one year. He married, in 1837, Miss Mary C. Partridge, of Franklin, who still survives at the age of eighty-eight. They had seven children, of whom five are living—two sons and three daughters. The sons, George G. and William H., have taken up the profession of their father. The former is settled at Newton Highlands, while the latter is preaching in Prospect, Conn. Mr. Phipps was first settled in this town. He was an earnest preacher and profoundly interested in all good works. He served for very many years as the head of the School Committee, and his school reports are good reading to-day, and display much thought, earnestly and gracefully expressed. He was wont to do anything he had in hand with "all his might," whether tuning a piano, or raising the finest vegetable in town. Those, whether in the church or out who became intimate, were not the ones to turn from him, for they best realized his largeness of heart and generosity of spirit.

But few of his sermons were ever published, barring a few Thankgiving discourses, fugitive pieces in var-

ious newspapers and a number of musical compositions.

Of the latter, it was as easy for him to write the poetical stanzas as the melodies that floated them. Had he been more favorably situated, as to leisure and means, he might readily have made his mark as an inventor or author, but he preferred to remain where he felt an all-wise Providence had placed him. His mark was, however, made honestly and deeply on the generation of youth that grew up under his long and faithful ministry here.

In 1869 he accepted a call to Plainfield, Conn., and was there installed June 9th. He died on June 18, 1876.

The Rev. Thomas L. Ellis succeeded Mr. Phipps, and was installed November 26, 1871. He died, after a brief pastorate, on November 12, 1873. He was followed by the Rev. Francis J. Fairbanks. He was hired in the early part of 1874, and continued his labors here till October, 1877. He was a well-educated man, and devoted in his work. The Rev. Otis Cole, a Methodist divine, was next hired by this society, and commenced his labors on January 1, 1878, and continued for two years, when he removed to New Hampshire. He was a man of great simplicity, and yet of very great power as a preacher and much beloved by all, both by those in and out of the church. The following summer the society engaged Mr. John E. Dodge, who was licensed to preach. He filled the pulpit for several years and was then ordained and settled, continuing his labors a couple of years thereafter. In June, 1887, he asked for a dismissal, having been called to the church in Sterling. Both Mr. and Mrs. Dodge were earnest in their labors in behalf of the church and community.

The Rev. Alpha Morton succeeded to the pastorate. He was engaged in June, 1887, and still continues his active labors with this people. He is an able man and of the highest character.

The old church edifice erected by the district of Paxton in 1767, paid for by a general tax, was used for all town-meetings after its erection, and the "deacon's seat" was the place occupied by the moderator of the town-meetings. In 1835 it was voted to remove the building to its present site and both enlarge and repair it, the town putting in a basement story for a town-hall, and it is now a very dignified edifice of the usual village style. Subsequently the church, feeling the need of a room for vestry purposes, entered into an agreement with the town, offering to light and warm and care for the said town hall for all town purposes on condition of its use by them as a vestry. In 1888 the town, stimulated by the gift of one Simon Allen, erected a new town hall, concerning which additional particulars are given further on in our history.

Leaving the history of the church and taking up that of the town, it will be remembered that the "District of Paxton" was chartered in 1765, Feb. 12th, and was "to join Leicester and the precinct of Spencer" in electing a Representative to the Legislature. This restriction was removed by an act bearing date July, 1775, viz.: "Whereas there are divers acts or laws heretofore made and passed by former General Courts or Assemblies of this Colony for the incorporation of towns and districts, which, against common right and in derogation of the rights granted to the inhabitants of this Colony by the charter, contain an exception of the right and privilege of choosing and sending a representative to the Great and General Court or Assembly. Be it therefore enacted and declared by the Council and House of Representatives in General Court assembled, and by the authority of the same, that henceforth every such exception contained in any act or law heretofore made and passed by any General Court or Assembly of this Colony for erecting or incorporating any town or district, shall be held and taken to be altogether null and void, and that every town and district in this Colony consisting of thirty or more freeholders and other inhabitants qualified by charter to vote in the election of a representative, shall henceforth be held and taken to have full right, power and privilege to elect and depute one or more persons being freeholders and resident in such town or district, to serve for and represent them in any Great and General Court or Assembly hereafter to be held and kept for this Colony according to the limitations in an act or law of the General Assembly, entitled an act for ascertaining the number and regulating the House of Representatives, any exceptions of that right and privilege contained or expressed in the respective acts or laws for the incorporation of such town or district notwithstanding."

On August 22, 1774, the following committee was chosen to consult and report on the state of public affairs, viz.: Capt. Ralph Earle, Lieut. Willard Moore, Dea. Oliver Witt, Phineas Moore and Abel Brown. They also voted to purchase a barrel of powder in addition to the stock (some two barrels) then on hand. All the able-bodied men of all ages, capable of bearing arms, were formed into two military companies, one of which was called the "Standing," and the other the "Minute Company."[1]

On the 17th of January, 1775, thirty-three men were ordered by the town to be drafted as minute-men. They chose Willard Moore to be their captain. He went with his command on April 19, 1775, to Cambridge, on receiving intelligence of the beginning of hostilities at Lexington and Concord.

The following is a copy of the agreement of the minute-men at Snow's in 1775:

We the Subscribers, Do engage for to Joyn the Minute Men of this District and to March with them Against our Common Enemys When we are called for, if so be that the Minute Companys are kept up as witness our hands: Marmaduke Earle, Jonah Newton, David Goodenow,

[1] A Committee of Safety was chosen on March 20, 1775, consisting of Willard Moore, Phineas Moore, Abraham Smith, Ralph Earle and David Davis.

Jr., Abijah Brown, Joseph Knight, Clark Earle, Nathan Swan, Jonah Howe, Ithamer Bigelow, John Davis, John Pike, Phineas Moore, John Flint, Ebenezer Hunt, Thomas Lamb, Oliver Earle, Jonathan White, Hezekiah Newton, Stephen Barrett, Samuel ——, Daniel Steward, Joseph Prescott.

The duties of the committee named above were various; among other matters, to observe and report to the people the action of Congress, and also the acts of the colonists and the doings of the home government, and last, but perhaps not least, to keep watch of certain suspected Tories in the district, of whom there were a number.

Captain Willard Moore, with a number of his men, soon enlisted in the Continental Army. He was promoted to the rank of major and took part with his men in the battle of Bunker Hill, where he was killed, together with several of his men. The "standing company," already named, was commanded by Captain Ralph Earle,[1] with John Snow as lieutenant, and Abel Brown as ensign. They were chosen as officers at the district-meeting on January 17, 1775, and did valiant service, and bore their share of the hardships of the long campaigns for liberty and independence.

At the town-meeting held April 6, 1775, Lieutenant Willard Moore was chosen delegate to the Provincial Congress, held in Concord, Mass., and was instructed to "use his influence in Congress that government be assumed in case that it shall prove certain that Great Britain intends to enforce the late acts of Parliament by the sword."

The town, at various times during the Revolutionary period, appropriated about ten thousand pounds as bounties, besides paying heavy taxes to the Provincial government amounting to many hundreds of pounds. Then, too, there were frequent purchases of beef for the use of the army, sending as high as nine thousand pounds at one time as their quota of the supplies needed by the government "at the front."

In addition to the regular companies named, there were, the records say, many volunteers going forward on their own responsibility and their own patriotic impulse to defend their imperiled country.

In the following year (1776) the records show a warrant directed to the "Constable of the *Town* of Paxton."

There is a warrant dated May 13, 1776, calling a meeting on the 23d of that month, for the purpose of choosing "a person to represent them in the Great and General Court" that year, agreeably to a precept directed "to the town" for that purpose.

On May 23, 1776, the town made choice of Abraham Smith as its first representative to the General Court, and the record shows the clerk of the meeting to have signed himself as the *town* clerk, all records prior thereto having been signed by the district clerk.

In June, 1779, there was a special call for representatives to meet in Cambridge, for the purpose of framing a State Constitution, and under this call, on August 10, 1779, Adam Maynard was chosen as the delegate. This very year it would seem by the records that Abraham Smith continued as the representative to the General Court, while Phineas Moore was the delegate to the convention held in Concord.

These were stirring times with the colonists, and besides the care of founding States was the added one of taking up arms to maintain them and establish liberty. In all of these serious affairs the new town of Paxton discharged all of her obligations with highest credit. In the earlier contests between the French and Indians this town furnished, in 1756, five men as her quota in a call for one thousand men from Worcester and Hampshire Counties. Their names were: Ezekiel Bellows, Jacob Wicker, Jason Livermore, David Wicker and John Wicker. These men were in the command of Gen. Ruggles, and saw service at Crown Point, Fort Edward and Ticonderoga.

This town is proved by all the ancient records to have been eminently patriotic in the time of the Revolution. All of the demands for men and means were met, though doubtless their efforts at times were very great. The prolongation of the war, saying nothing of the cost incurred in getting ready for the contest, was a very serious matter, but through all these trials the true patriots never flinched.

Among their first acts was an attempt on their part to rid themselves of the name of Paxton, now odious by reason of his loyalty to and influence with the enemy of the colony. They failed in their patriotic endeavor to secure a change of name, as we have seen.

The Hon. George W. Livermore, of Cambridge, a native of Paxton, relates the following incident which happened here: Jason Livermore and his three sons were plowing in the field when informed by a messenger of the incursion of the "regulars" to Lexington and Concord, and that the company of which they were members would march forthwith. The father said: "Boys, unyoke the cattle and let us be off." No sooner said than done; and they at once made ready and marched, with the household pewter dishes melted into bullets, to Cambridge, and there joined the Continental army, and on June 17, 1775, they bore a part in the great battle of Bunker Hill. The wife and mother, Mrs. Jason Livermore, was left with a lad but twelve years of age, to cultivate the farm and care for the stock. This was successfully done, and it is further stated that she made a hundred pounds of saltpetre for the army, during the summer, in addition to her other duties." Mrs. Livermore died at the extreme age of ninety-nine years and ten months. In the following year this same Jason Livermore, together with one Samuel Brewer, of Sutton, raised a company and proceeded

[1] Capt. Ralph Earle married the widow Naomi Kinnicutt, of Providence, in 1775.

to Charlestown, and from there were ordered to Ticonderoga and Mount Hope, where they were stationed for some time. It is fully believed that the town of Paxton must have sent more than a hundred men into the ranks of the patriot soldiers of the Revolutionary army; and history declares that few, if any, towns contributed, proportionately, more for the achievement of our independence, according to their means, than this. It is also reported that towards the close of the war "their individual and public suffering was extreme, and at times almost intolerable;" yet at no time did their courage flag or the fires of patriotism grow dim.

The qualification for voting in 1770 was the possession of sixty pounds' worth of property or an annual income of three pounds sterling. At the first State election there were twenty-four votes cast for John Hancock for Governor. The amount assessed at this time in the town on both polls and real estate was £29,400. The State tax in 1780 was as high as £5,120, old tenor.[1]

Provision for the education of the young was made as early as 1769 in the new district. On January 9, 1769, a warrant was issued calling a meeting to consider, among other things, the division of the town into "squadrons" or school plots, as per the recommendation of a previously-appointed committee who had reported favorably. This committee (chosen in October, 1768) consisted of Captain Oliver Witt, William Whitaker, William Thompson, Willard Moore and Jonathan Knight.

There were (in 1769) five districts established, and the committee for each "school plot" were as follows: For the Northeast, Phineas Moore, Hezekiah Newton and Stephen Barrett; for the Southeast, Daniel Stewart, James Glover and Francis Eager; for the Southwest, Abner Moore, James Thompson and Jason Livermore; for the Northwest, Abraham Smith, William Whitaker and Jonah Newton; for the Middle plot, Captain Paul How, John Snow and Ralph Earle.

The following names of the heads of families living in the several school plots or divisions, together with the number given the said divisions, must be of general interest even at this date, viz.:

Northeast School Plot, No. 1.—William Allen, Capt. Saml. Brown, En. Stephen Barrett, Aaron Bennet, Samuel Estabrook, Jno. Fersenden, Zach? Gates, Aaron Hunt, Ebenezer Hunt, Samuel Man, Phineas Man, Elijah Man, Peter Moore, Ephraim Moore, Willard Moore, Hezikiah Maynard, Hezikiah Newton, Silas Newton, Benj. Pierce, Jacob Sweetser, Jacob Sweetser, Jr., Benj. Sweetser, Ebenezer Wait, Antipas How, James Ames.

Southeast School Plot, No. 2.—Capt. Jesse Brigham, Joel Brigham, En. Timothy Barrett, Thomas Denny, Wm. Earle, Jr., Antipas Earl, Francis Eager, Newhall Earl, James Glover, Zach. Gates, Wm. Howard, Jabez Newhall, Daniel Steward, Danl. Snow, Asa Stowe, Joseph Sprague, Danl. Upham, Capt. Oliver Witt, Elijah Dix, Jedediah Newton, Ebenezer Boyington, Jon't. Wheeler, Jr., Jeremiah Fay.

Southwest School Plot, No. 3.—Ezekiel Bellows, Joseph Bellows, Abijah Bemis, Jont. Brigham, Jacob Briant, John Livermore, Abner Morse, James Nicol, Seth Swan, Wm. Thompson, Wm. Thompson, Jr., Wm. Wicker, David Wicker, Samuel Wicker, Jacob Wicker, David Newton, Jonathan Knight, Jr., James Pike, Solomon Newton.

Northwest School Plot, No. 4 (now West School District).—Joel Brigham, Jonathan Clemmer, David Goodenow, Ebenezer Hunt, Jr., James McKennon, Seth Metcalf, Jaasaniah Newton, Jonah Newton, Nahum Newton, John Smith, Abraham Smith, Jonas Smith, Wm. Whitaker, Wm. Whitaker, Jr.

The Middle School Plot, No. 5.[2] (now the Centre School).—Abel Brown. Col. Gardner Chandler, Capt. Thos. Davis, David Davis, Wm. Earle, Capt. Ralph Earle, Samuel Gould, Wid. Damarius How, Wm. Martin, Shadariah Newel, Ebenezer Prescott, David Pierce, Jonathan Knight, Daniel Knight, Jno. Snow, Seth Snow, Adam Maynard, Elijah Demmon, Capt. Paul How, Jonah How, Saml. Brewer, Eleazer Ward, James Logan, Andrew Martin.

The Northwest (or West, as it is now known) Schoolhouse was located, in these early days, just west of the road leading from "Hows Hill," now "Davis's Hill," to Jennison's Mills (Comins' Mills), a few rods southward of the pond and across the highway. About 1820 the present brick school-house was erected just west of the mill-dam. Some fifty years ago or more Homer Chase taught this school, and lived at the house near by. It will be recollected by the older citizens that years ago the seats were arranged in two rows, which brought the scholars in two lines, one directly back of the other.

A class in reading was up, and a notably dull scholar was proceeding, and, as usual, was being

[1] Among the names found in the early records it is interesting to note the following, viz.:—Dr. Saml. Stearns, who married in 1773 Sarah Witt. This Dr. Stearns was the practicing physician in this town at and before the Revolution. Then there appear the names of Samuel Gould, Capt. Ralph Earle, Ephraim Moore, Marmaduke Earle, Willard Moore, Paul How, Rev. Silas Bigelow, Ithamar Bigelow, who had sons Timothy, Silas, Lewis and Ithamar; Samuel Brown, Wm. Thompson, who had sons William and James; Danl. Upham, Hezekiah Newton, John Newhall, James Earle, Oliver Earl, Wm. Livermore, John Livermore, Braddyl Livermore, Wm. Martin, Thos. Lamb, Silas, Ezekiel and Joseph Bellows, Jacob Sweetser, Saml. Sweetser and Stephen Sweetser, David Davis, Ephm. Davis, Aaron Hunt, Jonathan Ames, Seth Swan, Jabez Newhall, John Warren, Daniel Steward, M. B. Williams, Adam Maynard, Moses Maynard, David Goodenow, John Knight, Wm. Whitaker, David Wicker, Abel Brown, Danl. Knight, John Flint, Clark Earl, Nathan Sergeant, Danl. Bemis, Benj. Cutting, Dexter Earl, David Peirce, who had sons David, Gad, Aaron and Job; James Washburn, Joseph Penniman, Hezekiah Ward, Phiny Moore, Phineas Moore, Samuel Brigham, Seth Metcalf. Benj. Wilson, Dr. Thad. Brown, Dr. Saml. Forrest, Dr. Caleb Shattuck,—these were all residents and practicing physicians, between 1765 and 1800, in this town—Samuel and Ebenezer Wait, Jude Jones, Timothy Bigelow, married Anna Earl in 1797; Ithamar Bigelow, Jr., married Sophie Earle in 1801; Daniel Abbott, D. H. Grosvenor and Jonathan P. Grosvenor, Levi Boynton, Dr. Absalom Russel, Dr. Loami Harrington, was married to Delia Newton in 1806 by Nathaniel Crocker, Esq.; Taylor Goddard, Frederick Flint, Joseph Knight, Benj. Wilson, Thomas Whittemore, Wm. Howard, Henry Slade and his sons Anthony, John and Henry; Winthrop Earle, Braddyl Livermore, Amos Ware, Elisha Ward, Ebenezer Bointon, had children, Ebenezer, Jr., born in 1770, Silas, Jeremiah, Alpheus, Phebe, Levi, Hannah, Asa and David; Samuel Jennison, Ebenezer Estabrook, William Earle, Robert Crocker, Emory Earle, Seth Metcalf, Jr., John Pike, Francis Pike and Clark Pike, Thomas Read, Jacob Earle, Rufus Earle, Artemas Earle, Nathan Cass, Moses Gill Grosvenor, son of Rev. Daniel Grosvenor, Geo. W. Livermore, son of Braddyl Livermore, born Oct. 15, 1794; Thaddeus Estabrook, Ephraim Carruth, John Brigham, Joseph Day, Nathaniel Lakin, Samuel Partridge, John Partridge, Elbridge Gerry Howe, son of Jonah Howe, born Aug. 14, 1799; John Howe, Jonathan Chase and son, Homer Chase; Ralph Earle Bigelow, son of Ithamar Bigelow, Jr.; Oliver Arnold, Amasa Earle, Silas D. Harrington, Daniel Lakin, John Bellows, Sam'l Wait, Daniel Estabrook, son of Jonah Estabrook, born in 1807; Jacob Earle, Dr. Edward M. Wheeler.

[2] The number of districts now is the same as in 1769.

prompted by his neighbor behind him, who could overlook his book. It was the habit of this dull reader to use his finger to keep his place, and as he was being coached, his finger prevented the party prompting from seeing the words ahead, so he whispered to this dull reader, "Skip it;" the reader supposed they were the next words in order for him to repeat, and he drawled out, "S-k-i-p i-t," which had the result to "bring down the house," as modern people speak.

At the Southwest School, forty years ago, there were as many as sixty scholars in attendance, and this was true of most of the other schools in town, whereas, at the present time, they would not average a dozen pupils to a school-house, outside of the Centre District; and what is true of this town is nearly true of all the back towns in New England. The Centre School building used to stand north of its present location, near where Hiram P. Bemis now lives, on the Rutland road. It was a square-built house, and when abandoned, it was used to erect the house now owned by H. C. Eames, on the Barre road. Mr. D. Gates Davis remembers when more than sixty scholars attended at this school.

We herewith append a list of prices established in 1777 by the authorities of Paxton:

Agreeably to late act of the Great and General Court of Massachusetts Bay To Prevent Monopoly and oppresion; The Selectmen and Committee of correspondence for the Town of Paxton have Agreed upon and affixed the Prices hereafter set down to the Following Articles in the Town of Paxton, Viz. :—

Men's Labour at Farming Work in the months of July and August. 3 shill. per day; The months of May, June and September, 2*s.* 3*d.* per day; The months of April and October, 1*s.* 9*d.* per day; The months of November, December, Jan., February and March, 1*s.* 4*d.* per day; Wheat, 6*s.* per Bushel; Rye, 4*s.* 3*d.* per Bushel; Indian Corn, 3*s.*; Oats, 1*s.* 8*d.* per Bushel; Barley, 3*s.* 6*d.* per Bushel; Spanish Potatoes, 1*s.* per Bushel in the fall of the year and not to exceed 1*s.* 4*d.* at any other season; Beans, 6*s.* per bushel; Peas, 7*s.* per bushel; Sheeps Wool, 2*s.* per lb.; Fresh Pork, well fatted, 3 pence 3 farth. per lb.; Good Grass-fed Beef, 2 pence 3 farth. per lb.; Stall-fed Beef, 3 pence 3 farthing per lb.; Raw Hides, 3 pence per lb.; Green Calf Skins, 6 pence per lb; Imported Salt, 13 shillings per bushel; Salt manufactured of Sea water, 15*s.* per bushel; West India Rum, 8*s*, 2*d.* per Gallon; New England Rum, 5*s.* per Gall.; Best Moscorado Sugar, £3 6*s.* 8*d.* per Hundred Wt. and 8 pence 3 farthings by the single pound; Molasses, 4*s.* 8*d.* per Gallon; Chocolate, 1*s.* 9*d.* per lb.; Best new milk Cheese, 5 pence 1 farthing per lb.; Butter, 9 pence per lb.; Tan[d] Leather, 1*s.* 3*d.* per lb.; Curried leather, in Proportion; Homespun yard-wide Cotton . . .; Cloth, 3*s.* 6*d.* per yard; Mutton, Lamb and Veal, 3 pence per lb.; wheat Flour, 18*s.* per hundred Wt.; Best English Hay, 2*s.* 8*d.* per Hundred Wt.; Teaming work, 1*s.* 6*d.* per mile for a Ton; Turkies, Dunghill Fowls and ducks, 4 pence per lb.; Geese, 3 pence per lb.; Milk, 1 penny 3 farthing per quart; Good Merchantable white pine Barn boards, 2*s.* 8*d.* per hundred feet; Men's best yarn Stockings 5*s.* 4*d.* per pair; Men's best Shoes made of neat Leather, 8*s.* per pair; Women's best Calf Skin shoes, 6*s.* 8*d.* per pair; Making Men's Shoes, 2*s.* 8*d.*; Making Women's leather shoes, 2*s.* 8*d.*; Good Salt Pork, 8 pence per lb.; Cotton, 3*s.* 8*d.* per lb.; Good well dressed merchantable Flax, 1 shilling per lb.; Coffee, 1*s.* 5*d.* per lb.; Yard wide tow Cloth, 2 shillings per yard; Good yard-wide Stripped Flannel, 3*s.* per yard; Fried Tallow, 7 pence per lb.; Rough Tallow, 4 pence 2 farth. per lb.; Men's board, 5*s.* per week; Women's board, 2*s.* 8*d.* per week—Taverners; Oats, 2 pence 2 farthings for 2 Quarts; A mug of Flip made with half a pint of West India Rum, 1*s.* 1*d.*; a mug of Flip made with half a pint of New England Rum, 9 pence; a Common meal of Vituals, 9 pence; lodging a person a night, 4 pence; Keeping a horse a night or 24 hours on English Hay, 1 shilling; Keeping a yoke of oxen a night or 24 hours on English Hay, 1 shilling; Charcoal, 3 pence per bushel at the pit; Shoeing a horse round and Steeling toe and heel, 6*s.* 3*d.*; Weaving Plain Towel Cloth yard-wide, not to exceed 3 pence 2 farthings per yard; sawing White pine boards, 1*s.* 1*d.* per Hund feet; Tanner's Bark Oak—Delivered at the Yard, 12*s.* per Cord—price for tanning, 1 penny 3 farthings per lb.; horse hire, 2 pence per mile; Cyder not to exceed 6*s.* at the press in time of the Greatest Scarcity; Carpenter's work, 3 shilling per day; Price of Taylor's work to be advanced one-eighth part above what was usual when Labour at farming work in the Summer Season was 2*s.* 8*d.* per day; Best Homespun Woolen Cloth of a Good Colour full[d] and Press[t] not to exceed 8*s.* per yard, and all other articles not her enumerated are to bear a price in a just Proportion to the Particularly Mentioned, According to former Customs and usages. Dated at Paxton, Feby. 7, 1777. Agreed to by the Selectmen and Committee of Correspondence of Paxton. Attest,

ABEL BROWN.

On September 14, 1791, Seth Snow, of Paxton, gave by deed to the town, one and a half acres and fifteen rods, "whereon the meeting-house stands," the whole forming nearly a square tract for "the use and benefit of the town." The bounds are given in Book 115, page 134, as certified to by Artemas Ward, register of deeds, Worcester, and are as follows, viz.:

A certain tract or parcel of common land lying in Paxton aforesaid, whereon the meeting-house stands, for the use and benefit of the said town, and is bounded as follows, viz.: beginning at a stake and stones on the south line of the burying-yard, thence East 3° S. nine rods and nine tenths to a stake and stone, being the Northwest corner of Frederick Hunt's land; thence South 13° 40′ W. eighteen rods and eight-tenths of a rod to a heap of stones on the West side of said Hunt's barn, said line strikes the Northwest corner of said barn; thence South 29° East ten rods and seven-tenths to a stake and stones; thence West 12° 30″ N. four rods to a stake and stones by the Southeast corner of Deacon Timothy Barrett's horse-shed; thence N. 32° West seven rods to a stake and stones near the Northeast corner of the store; thence W. 8° 45′ N. eight rods and six-tenths to a stake and stones by the Northwest corner of my dwelling-house; thence S. 45° 30′ W. six rods to a stake and stones; thence W. 19° N. two rods and five-tenths to a stake and stones; thence East 42° N. nine rods to a stake and stones near the Southeast corner of Abner Morse's horse-stable; thence N. 8° E. running on the West side of the horse-stables eighteen rods to the first-mentioned corner; said tract contains one acre and a half and fifteen rods by measure.

The town, after about 1800, moved along the even tenor of its way, without alarming incidents, until 1812, when, at a special meeting of the town, held August 10th, of that year, it was voted to choose a committee to attend a county convention called to consider the state of the country, and Nathaniel Crocker and Braddyl Livermore were appointed as the delegates. There was also a petition or memorial ordered at this meeting to be sent to the President, and the following persons were appointed to prepare the same, viz.:—Nathan Swan, Nathaniel Lakin, David Davis, Jr., Braddyl Livermore and Jonathan P. Grosvenor. The war was of short duration, terminating in a successful issue for the government.

Of Indian history little is known. Paxton was for many years a part of other towns, and their history would in part be its history, but long before the surrounding towns were incorporated there were conflicts with the aborigines in this vicinity, though yet not much that can be localized as having happened within the present territory of the town. Yet there was one Indian resident of this town who made it his home during the greater portion of his life, and his

name was Aaron Occum.[1] He was the last remnant and representative of his race. He lived about one hundred years ago, and had his home near the southwest point of Turkey Hill Pond. He lived in peace and quiet with his white neighbors, who learned to like him, and were, at times, much interested in him: "He was a tall, well-formed man, very lithe and strong, and in feats of running, jumping, wrestling or lifting, no white man in the town could approach him. He clung to his ancient arms, and always was seen with bow and arrows, and with these primitive weapons his aim was unerring and fatal. He was a temperate and peaceful man and came to be respected and was a frequent visitor during the long winter evenings, at the dwellings of his neighbors, whom, in broken English, he would entertain by his wonderful stories of his ancestors and their exploits. Close by his cabin was a large flat rock, on which he pursued his occupation of beating brooms and making baskets, in which arts he was a master, and his wares found ready sale in the vicinity. Thus he lived till one eventful winter night, when he went to visit at the old red house on the hill, a half-mile or so west of his cabin, now the home of Oris Howe. It was an icy time, bitter cold having followed a storm of sleet. The face of the country was glass, with ice. Occum finally departed, and with a bound he started forward down the hill, but he never reached his cabin home alive. The next morning he was found dead at the foot of a sharp declivity, with a gash in the back of his head caused by a sudden fall on a sharp stone above the ice. He, in the darkness, had, doubtless, miscalculated his footing and thus came to his sudden death. He was buried in the public cemetery of the town."

Of Indian relics there are few; still, some are found of course, but not in numbers that would lead us to think any tribe made its permanent home on these hills. There is, however, just west of the Barre road, beyond the causeway, adjacent to the house of the late Benjamin Maynard, "a low, hollow rock," which tradition says was an Indian "Mortar," used by them for grinding corn. The story of the "Indian Graves" was related by John Metcalf, who lived to be ninety years old and had a clear memory up to the close of his long life. He died about 1884. His statement was that southwest of said Turkey Hill Pond, on a long ridge, is the spot where a party of Indians killed a number of white men, as described in a book giving an account of the Indian Wars. Here seven white men were killed and were buried under a large oak tree. The mound may still be seen surrounded (or was) by flat stones, not far from the stump of a large oak tree. The original account stated "that a party of white men were attacked on a hill at the southwest corner of a pond with a large hill on the east side of it, about ten miles from Quinsigamond (Worcester) and on the road from Quabog (Brookfield) to Wachusett, and were buried under a large oak tree." Mr. Metcalf showed this account to one Artemas Howe, of this town, and together they identified this place as the spot referred to.

George Maynard states that at one time he sank a shaft into this mound and below yellow earth he came to a black mound, such as might appear in any very ancient grave.

Of murders there have been several within the present limits of the town since its first settlement. The first great crime of this character occurred on what is known as the old "Carruth Road," which formerly led from just below "Comins Mill" (once "Jennison's Mill") to the north into the Barre Road and on to West Rutland. Less than a half-mile from the mills named lived Daniel Campbell, a Scotchman, who was killed March 8, 1744, by one Edward Fitzpatrick, an Irishman who was in the employ of Campbell. Fitzpatrick disposed of the body in the wood-pile, the whole covered over with a few rails. There was a general rally of the neighbors to search for the missing man. It was agreed that should the body be found the horn (conch-shell) should be blown to give notice. At the sound of the horn Fitzpatrick, who was standing in the doorway of the house, exclaimed, "My God! it is all up with me," or words to that effect. Fitzpatrick was tried the following September, found guilty and sentenced to be hanged on the 18th of October following. Campbell was buried in the old cemetery at Rutland Centre, and on his tombstone is the following inscription, viz.: "Here lies buried y^e^ body of Mr. Daniel Campbell, born in Scotland, who came into New England A. D. 1716, and was murdered on his own farm in 1774, aged 48 years. . . . Man knoweth not his time."

This Carruth Road was much used in the days of which we write, it affording a short route to Barre and that section, to people in the vicinity of Jennison's Mills; besides, many came over this road to trade at Jennison's.

One Aaron Coggswell lived on the right as you go up this road. He is the ancestor of the present Coggswells of Leicester. Beyond Mr. Coggswell lived Ephraim Carruth and further on Daniel Campbell and others. This Mr. Carruth, for whom the road was named, came from Marlboro' along with the Hows. After the murder of his neighbor, Campbell, his family, which was quite large, became discontented and he returned to Marlboro. He was a surveyor and once surveyed the farm of David Davis, who lived at C. A. Streeter's. Mr. Carruth was not in favor with Jonah How, who lived on what is now called "Davis' Hill." This How had a pasture up on the Carruth Road where he kept his sheep in summer, and each year he lost a good lamb. At the close of the season, finding a lamb gone as usual, and happening to meet Carruth, said to him that he had got a

[1] Related to us by George Maynard of Worcester.

new name for his pasture and now called it Pilfershire. After that no lambs were missed. The locality still goes by the new name among the old people of the neighborhood.

Some twenty-five years ago, at the time of grading the Great Road, as the Barre Road was then called, many men were employed, among whom was one Doyle, an Irishman. He boarded at the first house beyond the brook on what is now called the West Road (New Braintree Road), a quarter of a mile or less west of the Common. In the evening of May 11, 1862, one Henry Watson, an Englishman, was going by to his home, known as the Stillman Smith place, beyond Pudding Corner. As he came opposite the house some conversation occurred with this Doyle, who demanded some rum of Watson, which he refused, whereupon Doyle became angry, and stepping to the woodpile, took up a hemlock stick and chased Watson, who ran to the next house, where Samuel Peirce lived, and as he passed on to the veranda at the west side of the building he was struck and killed. Doyle at once fled to Worcester, where he was arrested, tried and sentenced to a long term of imprisonment at hard labor. There was, some years ago, a human skeleton found in the front yard of a small farm-house, now occupied by H. Sweetser, on the road leading to Pine Hill, in the northerly part of the town. This brought to mind the fact that a peddler by the name of Livermore, who staid over-night in this neighborhood, some years prior, was suddenly missed from the community, and was thought to have been foully dealt with, as a quarrel was believed to have occurred at Widow Samuel Sweetser's that night. An inquest was held, but nothing was established, though Benjamin Maynard, who was present, stated that some of the parties living there were much disturbed and seemed guilty. At all events, the principals soon after left, and have never returned.

A man by the name of Charles Conners, in February, 1862, was frozen to death in his sleigh at the foot of the hill near Pudding Corner, on the New Braintree road, east of the school-house. He had been to Worcester, and, addicted to drink, had procured a bottle of liquor, and, over-indulging, had become insensible from two causes,—the liquor and the cold. The day had been somewhat mild and fairly pleasant, but in the early afternoon the wind rose and it grew cold rapidly, and before sunset the wind had risen to a blizzard, and the thermometer dropped during the night to 30° below zero. He was found in the morning, sitting nearly upright, with his hat off and an empty bottle beside him. The reins had become tangled, and had turned the horse to the side of the road, where he stopped, and was yet alive. The man lived at North Spencer, and the team belonged to Samuel Cunningham, of that place. The day he was found the thermometer at noon stood at 28° below, the coldest day for three-quarters of a century in this locality.

At one time in the spring of the year, as a company of workmen were engaged repairing the road near the present town-farm, Captain B—— was holding the plow when a skeleton was turned up. All were horror-stricken, and the captain left and went to work elsewhere, being unable to witness the scene. It was told by him that it must be the body of a Mrs. Hunt, who had lived on the cross-road near by, and who, having died of the small-pox, was hurriedly buried there. But this was not credited by the citizens. The other theory was that a young man, who, a year before, was working for the captain, had suddenly disappeared without any very good explanations, and it was believed the body was his, especially as an investigation showed the remains to be those of a male person.

Among the notable people who were born or lived in Paxton was the Livermore family. Jason Livermore was one of the early settlers, and lived in the southerly part of the town, near Pudding Corner, and had several children.

He was in the engagement at Bunker Hill, as has already been shown, and was a man of high courage and great patriotism. He was for many years a prominent citizen here. His son Braddyl also became prominent, and was well known for his capacity to transact business, and stood high among his townsmen. His son, George W. Livermore, a graduate of Harvard, and now of Cambridge, became a distinguished citizen of that place, and returned on June 14, 1865, and delivered the historical address at the centennial celebration, and to him, as well as to other writers, are we much indebted for many of the facts herewith embodied.

Few men in our early history were as distinguished as Doctor Samuel Stearns. He was a somewhat celebrated man in his day, as well as prominent as a practicing physician. He traveled much between 1778 and '85, and he made the journey from Southern Georgia to Massachusetts on horseback. He relates leaving Georgia in February, with the trees blooming, and he so timed his journey as to reach Massachusetts in early June, having a succession of blossoms for a thousand miles. He married Sarah Witt of Paxton March 7, 1773.

In 1782 he was in Europe, and continued his travels there for several years. He published a volume of his letters from England and the Continent written in 1784.[1] He speaks of meeting Minister John Adams at the Hague, and spending some time with him in driving about the country. Doctor Stearns was very fond of art, and greatly admired the painting of Rubens, as well he might. He visited the Hague in the summer of 1784 and was a guest of John Adams, the American minister, of whom he speaks in

[1] This volume was published by Isaiah Thomas of Worcester, in 1790, entitled, "A Tour in Holland," with a preface by John Trumbull, the celebrated author of "McFingal."

the highest praise. In speaking of the ambassador he says his livery is the same as the American uniform. He also says that in popularity and influence at that court Mr. Adams bore the palm of the diplomatic body. He adds that Mr. Adams talks but little, but what he says is direct and forceful; that America stands indebted to him principally for three important acquisitions—the defeat of Sir Joseph Yorke and securing the patronage of Holland in a critical moment, the extension of our limits and the security of our fisheries. The headquarters of the embassy was the Grand Hotel, which Mr. Adams had purchased for the permanent quarters of United States ministers. Dr. Stearns relates an incident which, but for him, the life of Mr. Adams might have been in great jeopardy, viz.:—They were driving along the banks of a canal in Delft when a child was discovered struggling for life in the waters of the canal. Mr. Adams drew off his overcoat and was about ready to leap into the water when the Doctor interfered. At this juncture, a workman close by had made the plunge and saved the drowning child.

The Earles were numerous and prominent in the town's early history and for many years afterward. Marmaduke Earle came from Leicester and settled where Nathaniel Parkhurst now lives, about a mile west of the centre, on the Barre road. He had fourteen children.

Capt. Ralph Earle, of Leicester, was the best-known of any of the Earle family. He took a part in the Revolutionary War and performed other and valuable service. One of his sons, R. E. W. Earle, became famous as an artist. He made a painting of Niagara Falls which attracted much attention, and subsequently he resided in the South, where he became an inmate of the family of General Jackson, at the "Hermitage." He painted several portraits of the general and his family. He died there in 1837, and was buried in the garden, beside the graves of Jackson and his wife. Captain Ralph was a member of important committees raised by the town at sundry times during the Revolution; was for a time chairman of the selectmen, and occasionally served as moderator. He was also captain of the Standing Company in the Revolution.

Philip Earle[1] was a public man and was engaged in the manufacture of scythes, below Jennison's Mills, just west of the highway. Here he had a trip-hammer and carried on quite a business. The mills above named were first owned by one Silas Newton; he lived on Brigham Hill, where one Brigham subsequently lived. Newton had a fulling mill, besides a saw and grist-mill and shingle-mill. He sold to Samuel Jennison, who is reputed to be a rough sort of a man. He kept a *wet* grocery store in the basement of his house, and it used to be a much-frequented resort. He sold to Homer Chase, his son-in-law, who continued the store business. Homer was a son of Jonathan Chase, who lived where Horace Daniels now lives.

[1] This Philip was a son of Marmaduke Earle and succeeded to the business of one Joel Crossman.

The Davis family was likewise conspicuous, and the first Simon Davis came from Concord to Rutland, where he had a son David, who settled in Paxton, where Charles A. Streeter now lives. He had a son David, Jr., who lived at the foot of the hill, just west of his father's place. There was a tan-yard just back of this last-named house, where considerable business was done annually. At this time there was another tan-yard near Pudding Corner, on the Bellows place, where an equal amount of tanning was done. This Davis family are the ancestors of Mr. D. Gates Davis, who, until lately, lived where Jonah Howe formerly lived.

The Peirce family came here from New Hampshire, but of all the members perhaps John D. Peirce is the most conspicuous. His father was Gad Peirce, and his grandfather David Peirce. The subject of this brief sketch came to live at the Peirce homestead, in the easterly part of the town, on the farm now owned and occupied by Horace Peirce. He lived with Job Peirce, an uncle. He, at the age of sixteen, decided to secure a liberal education, and, with the assistance of the Rev. Mr. Conant, a near neighbor, he went to Leicester Academy. He joined the church at that place. He fitted for college, entered Brown University and graduated with Elbridge Gerry Howe, of this place. He married in Sangerfield, New York, studied for the ministry and settled in York State as a Congregational minister. He subsequently went to Michigan and preached for a time at Marshall, and at same time kept the post-office (in a cigar-box). When Michigan was admitted into the Union he was appointed State Superintendent of Instruction. He took an active part thereafter in all educational affairs and advised a liberal policy for the State, which was adopted, and has left its impress on that great Commonwealth to this day. He was at one time prominently named for United States Senator, but being a Whig and they in the minority, he decided to change his politics, and soon after the party he espoused became the minority and so he died a disappointed man in some respects. But his life was made valuable to his fellow-men in the founding of a new State.

Of the Harringtons, first came Nathan Harrington from Weston and settled on the farm just north and under the shadow of Pine Hill. He had children—Nathan, Lemuel and Samuel. The first son settled in Barre, Vt., the second lived and died in Hardwick, Mass., while Samuel remained at home and had children—Lucy B., Elizabeth F., Samuel D., Lemuel, David, Simon G., Abigail and Lucinda. Samuel D. had children—Samuel, who lives in Boston; Nathan, living in Toledo, Ohio; and Eliza, who married Rev. Charles Morris and lives in Gloucester.

David Harrington, last above named, married Miss Olive Holmes in October, 1830. He lived and died

on his farm in Paxton. He celebrated the fiftieth anniversary of his marriage on October 29, 1880. There was a large company of relatives and friends from far and near present on that occasion. Mr. Simon G. Harrington is still living at the advanced age of eighty years and upwards, at his farm on the Rutland Road. He represented the town some years since in the Legislature and is one of the brightest and ablest men in this vicinity.

Silas D., son of Dr. Loami Harrington, was a very prominent man in the public affairs of this town. On November 17, 1877, he celebrated his fiftieth wedding anniversary. He died suddenly soon after, while on a visit to Millbury. He was for many years one of the selectmen and much respected. His portrait can be seen in the new town hall.

The Howe family is a numerous one in Paxton, and the first settler here was one John How, who came from Marlboro', Mass., in 1742, and purchased lands of an agent of the Crown, and the old deed, now in possession of Dr. A. J. Howe, bears the seal of the colonial government. The place purchased by John Howe is now owned by Deacon Keep, and is situated about a mile west from the centre. This John Howe deeded the place to his son Paul Howe, and he to his son John, and he to Samuel H. Howe, the father of the present Dr. Andrew Jackson Howe, of Cincinnati. Of the Howe family born in Paxton, Dr. Howe is the most distinguished. His father moved to the edge of Leicester, where Mr. Watts now lives. At the age of twenty, Andrew bought his time of his father, agreeing to pay one hundred dollars for his "freedom," a transaction not unknown in those days. Young Howe worked in a saw-mill and thereby kept his engagement with his father as to the payment of the "time" or freedom money. He then went to Grafton, where he worked for an uncle in a shoe-factory. While thus engaged he made the acquaintance of Dr. Calvin Newton, who, being interested in him, consented to take Andrew as a student on condition that he acquire the education requisite to enter college. The young man, nothing daunted, subsequently entered the Leicester Academy, where he attended two years, taking high rank as a student, From there he went to Cambridge and was admitted, and during the four years there he held a reputable place in his class, that of 1853. While fitting for college he was obliged, out of study hours and during vacations, to labor at whatever his hands could find to do; sometimes he was busy with wood-chopping and threshing and boat-building. After graduation at Harvard he prepared his way as best he could pecuniarily for entering upon a course of medical lectures at Jefferson College, in Philadelphia. The next year he attended hospital instructions in New York. The year following he took temporary charge of Dr. Walter Burnham's practice in Lowell, Mass. In 1855 he was appointed to the professorship of surgery in the Eclectic Medical Institute of Cincinnati, Ohio, a position he has held ever since.

He is the author of a treatise on General Surgery, and also of works on special branches of surgical science. He has, during his residence in Cincinnati, performed all the great operations of a surgical character and he is favored with a wide range of patronage. In 1886 Dr. Howe made a tour of Europe, visiting the famous hospitals of the Continent, and became acquainted with the distinguished men of his profession. As a recreative indulgence, Dr. Howe has cultivated a taste for biological investigations, and has acquired some distinction as an anatomist. For many years he was one of the curators in the Cincinnati Society of Natural History. Dr. Howe married, in 1858, Georgiana, the oldest daughter of George Lakin, of this place.

The familiar faces of Dr. and Mrs. Howe are occasionally seen in town revisiting the places familiar in their childhood, and renewing old acquaintances, by whom they are ever cordially welcomed.

Jonah How lived on Davis Hill, and died there aged eighty-four years. Artemas How was also prominent in public affairs.

Rev. Elbridge Gerry Howe, son of Jonah Howe, was a graduate of Brown University, and went West on missionary work and established the first Congregational Church at Waukegan, Ill. He was four times married. He leaves two sons, E. G. Howe, Jr., and Ira Howe. Rev. Mr. Howe was one of those men who left the world better by having lived in it. He was pre-eminently adapted to missionary labors, in which he had great success. He was always an earnest speaker and always found on the side of right on every public question. He was an honest man and of exalted character.

The Grosvenor family were among the notable people during their residence in this town. A brief sketch has already been given of the Rev. Daniel Grosvenor. Jonathan P. Grosvenor was a prominent man, occupying offices of trust and honor for many years. He was a justice of the peace, and lived on the farm now owned by Peter Daw. Here met some of the most cultivated people in town. His daughter, Lucy Grosvenor, married David Manning, Sr., of this place, and subsequently they removed to Worcester, where they at present reside.

Capt. Tyler Goddard, who lived just north of the meeting-house at the junction of the Rutland and Holden roads, was the first postmaster in Paxton. The office was established December 10, 1816, and he held the place till 1841. He kept a small grocery store just across the road west of his house, in what is now the new burying-ground. An anecdote is related of him that one time, in order to cure David Sweetser of the bad habit of borrowing jugs, filled one for him in which oil had been kept. *This* jug came back and with it the lost jugs, and a pretty free expression of miscellaneous statements on the part of Sweetser, to

the great amusement of Capt. Goddard. Luther Goddard, of Worcester, is a son of Tyler, and was for some years the town clerk of Paxton. The next postmaster was S. D. Harrington, followed by Otis Pierce, and in 1861 Nathaniel Clark was appointed and still holds the office. Of town clerks Ephraim Moore was first and William H. Clark, the present incumbent, the last chosen.

The Bigelows have ever been prominent in town since the advent of the Rev. Silas Bigelow. He had a brother, Ithamar Bigelow, who also lived on Asneybumskeit and he had sons Silas and Ithamar, Jr. Silas Bigelow had children: John Flavel, George Norman, Artemas E. and Adaline E. Ithamar Bigelow, Jr. had children: Ralph Earle, Walter R. and Lewis. Ralph Earle Bigelow had children: Caroline, Emeline and John C. Lewis Bigelow had children: Henry, Charles, Edward, George, Phœbe and Eliza.

In the late Civil War this town contributed seventy-four men, and of this number fifteen lost their lives while in the service. The records show that on the 26th July, 1862, a bounty of one hundred and ten dollars was voted. On August 9th the amount was raised eighty-five dollars. On December 8th the town offered one hundred and ten dollars for nine months' men, and one hundred and sixty dollars for those enlisting for three years. These offers were in addition to any bounties or gratuities proffered by the State or United States governments. There was an additional bounty offered in June, 1864, of one hundred and twenty-five dollars. In the year 1871 a granite monument was erected on the "Common" in memory of those losing their lives during the four years' contest with the Southern States. An iron railing surrounds this shaft, and within the inclosure there are four cannon donated by Congress. On this shaft are the names of twenty-one of our soldiers who died by reason of the Rebellion.

On June 14, 1865, the town celebrated the centennial of its incorporation. There was a large assemblage of the sons and daughters of the town on that occasion. There was a public meeting in the church, at which Hon. George W. Livermore, of Cambridge, Rev. John F. Bigelow, D.D., of Brooklyn, Prof. George N. Bigelow, also of Brooklyn, and Rev. George G. Phipps, now of Newton Highlands, delivered addresses. They were all natives of this town. A public dinner was served on the "Common," opposite the church, of which many hundreds partook. It was a grand gala occasion, and the reunions were many and most cordial, and the memory of them is as a sweet savor to all participating.

In 1888 the town erected a new town hall, in part out of the proceeds of the estate of the late Simon Allen, who left by will his entire property in trust to the town, which was to be used in the building of a town hall, the same to be called Allen Hall. The amount of his estate was twenty-two hundred dollars, but the prolonged illness of his widow reduced this amount to fifteen hundred dollars. During the lifetime of his widow the property could not be used for the purpose designated by the testator, but on her decease, which occurred in 1887, the Allen fund was turned over to the town treasurer, and at the annual meeting of the town in March, 1888, it was voted to add a thousand dollars to the Allen fund and go forward with the building, the town appointing the following persons as a building committee, viz.: L. Bill, William Brown, A. S. Graton, E. P. Keep and H. H. Pike.

The land for the location was given by the writer, and in the following July the contractor began his work, and by the 20th of the following October the building was completed, and was formally dedicated on November 1, 1888. The dedication address was delivered by Col. William B. Harding, of Worcester, the poem by George Maynard, also of Worcester, with remarks by Rev. George H. Gould, D.D., and Scripture reading and dedicatory prayer by Rev. Alpha Morton.

The chairman of the selectmen,[1] Ledyard Bill, received the keys from H. H. Pike on behalf of the building committee. The church choir, under the leadership of Oliver Goodnow, who for over fifty years has been connected with church music here, gave choice selections; the exercises in the main hall closing with America, in singing which, all joined. A public dinner was served in the lower hall by the Ladies' Union, of which Mrs. Nathaniel Clark is president. The building stands on the west side of the Barre Road, opposite the "Common." It is a plain appearing structure, but inside it is all that will be required for years to come. The total cost will not be far from forty-five hundred dollars. Simon Allen was born in 1806, in Holden, in the house near the foot of the big hill, on the Paxton and Holden Road, on the south side of the highway, and east of Mr. Metcalf's. He attended the Northeast School in Paxton a portion of his youth. He moved to Shrewsbury, where he married Miss Fannie Norcross. He was a boot and shoe-maker, and followed that trade while in Shrewsbury. He moved to Paxton in 1840, and bought a farm of the elder John Slade, on the Rutland Road, where George A. Brown now lives. He was a plain, unassuming, honest man, and respected by all who knew him. He died December 29, 1880, and was buried by the side of his first wife, near the west entrance to the Public Cemetery. He was twice married, but left no children.

[1] The first board of selectmen chosen in 1765 was Oliver Witt, Ephraim Moore and Samuel Brown, while the last board chosen in 1888 was Ledyard Bill, A. S. Graton and L. T. Kirby.

CHAPTER LXXXIII.

WEST BOYLSTON.

BY HORATIO HOUGHTON.

WEST BOYLSTON is situated seven miles from Worcester, by which it is bounded on the south, and is about forty miles from Boston. Its territory extends about five miles from north to south and about three and a half miles from east to west. In shape it very much resembles an Indian tomahawk without a handle. Its territory has been covered in part by the organization of six other towns, previous to its incorporation as the town of West Boylston in January, 1808. At the first incorporation of Lancaster, in 1653, its southwesterly corner boundary did not touch the present limits of West Boylston, it being near the house on the Robert Andrews place in Boylston. The extension of Lancaster in 1711 covered all of the territory of this town lying east of the Stillwater River and north of a line drawn from near the present central bridge, nearly east to near the southwest corner of the first Lancaster grant in Boylston.

At the incorporation of Worcester, in 1722, it included the territory afterwards set off as Holden in 1741. Shrewsbury was incorporated in 1727 and included all the territory lying between Lancaster and Worcester, the strip of land lying between the Stillwater River and what was afterwards Holden, of about a mile in average width and about four miles in length, receiving the name of "Shrewsbury Leg." That part of this strip now within the town of Sterling still retains the name of "The Leg." In 1768 all of this leg lying north of the Quinnepoxet River and covering the present village of Oakdale was ceded to Lancaster.

"A petition, dated May 15, 1780, asking to be set off from Lancaster to Shrewsbury, was sent to the General Court, signed by the following persons:—Aaron Sawyer, Nathaniel Lamson, Silas Hastings, John Glazier, John Dunsmore, Ezra Beaman, Nathaniel Davenport, Wm. Dunsmore, Silas How, Joseph Sawyer, Robert Andrews, Jr., Nathaniel Hastings, Oliver Sawyer, Frederick Albert, Micah Harthan, Elijah Ball, Hugh Moor, Levi Moor, Josiah Bennet, Sam'l Bigsby, Phineas How, Jacob Winn, Edmund Larkin."

Several of these men were then living within the limits of Shrewsbury, but it is probable that some of their landed estates extended into Lancaster; a part, too, were residents of territory now in Boylston and part in West Boylston. This petition was granted February 2, 1781, making a new line between Lancaster and Shrewsbury; but just where this line was located cannot now be given.

Sterling was incorporated the same year, 1781, and covered all the territory belonging to Lancaster then lying within the present limits of West Boylston. Boylston came next as a town, in 1786, and took a part of this territory from Sterling. In 1796 the "Second Precinct of Boylston, Sterling and Holden" was formed, taking from Sterling about two thousand three hundred acres, from Holden a strip of land about sixteen hundred rods long, one hundred rods wide at the north end and about one mile wide at the south end, and from Boylston all the rest of the territory was taken, now embraced in West Boylston, except the long neck of land extending to the line of Shrewsbury. This neck, which is about a mile wide at its northern end and about one hundred rods at its southern extremity, is about two miles long and covers about one-half of the grant of one thousand acres made to the town of Malden in 1665, by the colonial authorities of Massachusetts, and which is more particularly described hereafter, was added to the said precinct territory, when the town was incorporated in 1808.

It will be thus seen that all that part of the "Shrewsbury leg," lying north of the Quinnepoxet River, now embraced in the limits of this town, and covering the village of Oakdale, has been within the limits of five different towns,—first to Shrewsbury, from 1727 to 1768; then to Lancaster until 1781; then to Sterling, until 1786; then to Boylston, until 1808, when it became a part of West Boylston. Several other portions of the town have been within the limits of four different towns, and there are no portions of it which have not been in three different ones.

The natural scenery of the town is multiform, and in many places somewhat romantic in appearance, as it strikes the eye of a stranger, being diversified with hills and valleys, and in all directions interspersed with streams and springs of water, suited to the needs and wants of its inhabitants. Much of its soil is fertile, and with good management and cultivation well repays the labor of the skillful and industrious husbandman. Legendary history points to the fact that before its occupation by white men it had been peopled by Indians, and many places have been pointed out as the location of their corn-fields and dwellings, its first white settlers often finding specimens of Indian stone implements. The first white persons, of whom we have any history, locating within its territory were Jacob Hinds, Joseph Wooley, Ebenezer Frizzol, Benjamin Bigelow, Jonathan Fairbank, Aaron Newton, Ezekiel Newton, Edward Goodale, Stephen Belknap, William Whitney, Phineas Bennett, Jonathan French, Jonathan Lovell and Josiah Wilder, who came here from older towns below about 1720. These men, with their families, settled in the southeastern part of the town, and to protect themselves from any possible trouble from their Indian neighbors they built a garrison, or block-house, to which they could repair for the night as a place of security when danger was apprehended. This block-

house was situated about forty rods north of the line of the Worcester and Nashua Railroad, and about half a mile from Boylston town line. A well, connected with this fort, is still in excellent preservation, and the outlines of an old cellar are plainly to be seen. Other families soon followed these first spoken of, and within a few years are known to have had settlements in nearly all the parts of the town. There are no accounts that any of these early settlers were troubled by the Indians, and it is not known that any lived within the town limits after its first settlers located here.

The circumstances which finally led to the formation, first, of the Second Precinct, and afterwards of the town, are given in the sketch of the life of Major Ezra Beaman on other pages of this history.

At the time of the incorporation of the town there were in it ninety-eight dwelling-houses and about the same number of families, one hundred and sixty ratable polls and one hundred and five legal voters. There were three school-houses, one church, one cotton-mill, two grist-mills, two saw-mills, one clothiers-mill, one tannery, four blacksmith and one cabinet-maker's shops, two book-binderies, three stores and one tavern. There were sixty farmers, ten or twelve mechanics, several laborers, one clergyman and but one person of foreign birth.

At the first election in West Boylston, held on the first Monday in March, 1808, the following town officers were chosen: Moderator, Silas Beaman; Town Clerk, Robert B. Thomas; Selectmen, Ezra Beaman, Jonathan Plimpton, William Fairbank, Silas Beaman and Amos Lovell; Assessors, Robert B. Thomas, Silas Newton and Moses Perry; Treasurer, Ezra Beaman; Constable, Silas Beaman. At the first election for State officers, in April, 1808, there were eighty-five votes cast for Governor—Christopher Gore had sixty-six; James Sullivan had eighteen; and Levi Lincoln had one.

Since 1840 the candidates for President have received votes as follows in this town: In 1840, Whig, 169; Democratic, 36; Liberty, 17. 1844, Whig, 138; Democratic, 37; Liberty, 66. 1848, Whig, 56; Democratic, 27; Liberty, 201. 1852, Whig, 47; Democratic, 41; Republican, 184. 1856, Whig, 3; Democratic, 27; Republican, 296. 1860, Whig, 5; Democratic, 66; Republican, 326. 1864, Lincoln, 287; McClellan, 48. 1868, Grant, 279; Seymour, 18. 1872, Grant, 300; Greeley, 40. 1876, Hayes, 304; Tilden, 88. 1880, Garfield, 290; Hancock, 51. 1884, Blaine, 231; Cleveland, 110. 1888, Harrison, 221; Cleveland, 88.

The population of the town in 1885 was 2927; voters, 506; valuation, $1,173,443.

The town is made up of seven different villages, West Boylston proper covering the Central, Valley, Lower Factory, Depot and Old Common villages, and comprises about three-fifths of the town, with its outlying farm population. Oakdale, covering the village of Harrisville, makes the other two-fifths of the town. The Worcester and Nashua Railroad passing from south to north, and the Central Massachusetts Railroad passing from east to west through the town, crossing each other's tracks at Oakdale, gives the town full and constant connection of travel to all parts of the country. There are also lines of telegraph and telephone wires connecting with the main lines throughout the continent.

At the time when the precinct was incorporated, by a provision in the act, any persons, with their families, living within its limits, and who did not sign the petition for it and preferred to retain their connection with the old parishes, were allowed to do so by notifying the clerk of said Second Precinct within six months after the passage of the said act. The following-named persons availed themselves of this privilege: Jonas Temple, Jacob Hinds, Thomas Keyes, Thomas Keyes, Jr., Micah Harthan, Elijah Goodnow, Aseal Partridge, and Jesse Dana, of Boylston; Saul Houghton, Joshua Houghton, Jonas Mason and Jonathan Prescott, of Sterling.

At the incorporation of the town in 1808, three of these individuals were allowed to retain their citizenship, and pay taxes on their estates in the old town to which they belonged. They were Jonas Temple and Thomas Keyes, to Boylston, and Jonas Mason, to Sterling; and they tenaciously adhered to the privilege, so liberally granted, until their decease, when their real estate, within the limits, came under the jurisdiction of West Boylston.

The town officers for 1888 were as follows:

Town Clerk, Horatio Houghton; Selectmen, H. E. Morton, D. P. Waite, J. E. Peirce; Assessors, S. P. Hallock, J. E. Peirce, J. L. Howe; Overseers of Poor, Silas Newton, Wm. R. Walker, Francis Merriam; Treasurer, Geo. F. Howe; Collector, F. H. Baldwin; School Committee, Rev. W. W. Parker, Geo. F. Howe, S. S. Russell, J. E. Peirce, S. P. Hallock, J. M. Lord, Henry Boynton, Geo. E. Dana, Warren Howe, E. B. Berry, A. H. Murdock, Geo. B. Newton; Constables, F. H. Baldwin, James Doyle, E. A. Newton; Library Directors, Geo. L. Hyde, H. E. Morton, H. O. Sawyer, Geo. B. Johnson, H. Houghton; Auditor, Geo. L. Hyde.

MODERATORS.—The following persons were severally moderators of the annual March Meeting, for the first fifty years, from 1808 to 1858: Silas Beaman, Silas Newton, Paul Goodale, William Fairbank, Robert B. Thomas, Dr. John M. Smith, Andre Taft, J. F. Fay, E. M. Hosmer, D. C. Murdock, Benj. F. Keyes, J. C. Lovell. Since 1858 the position has been filled by D. C. Murdock, J. C. Lovell, W. N. White, Geo. H. Jefts and Geo. F. Howe, Mr. Howe having presided for twenty-one years.

CHAIRMAN OF SELECTMEN.—The following gentlemen served as chairman of the Board of Selectmen in the years from 1808 to 1858: Ezra Beaman, four years; William Fairbank, one year; John Temple,

six years; Robert B. Thomas, three years; Ezra Bigelow, three years; Joseph Hinds, four years; Francis Davis, one year; Joseph White, four years; Silas Newton, one year; Asa Bigelow, one year; Dennis Harthan, two years; Benj. F. Keyes, two years; Thomas Holmes, one year; E. M. Hosmer, three years; Lotan Cleveland, five years; D. C. Murdock, four years; Addison Lovell, one year; Jonathan Peirce, one year; L. M. Harris, one year; John Prentiss, one year; Samuel Lawrence, one year. Since 1858 the position has been held as follows: Levi Goss, one year; W. N. White, one year; C. H. Baldwin, one year; D. C. Murdoch, five years; E. F. Brigham, four years; W. B. Harris, two years; Stephen Holt, four years; L. M. Harris, one year; S. H. Smith, seven years; S. F. Hemenway, two years; Aaron Goodale, one year; H. E. Morton, two years.

The office of treasurer of the town was held during the first fifty years by the following persons: Ezra Beaman, Ezra Beaman, Jr., Barnabus Davis, Jonathan Plympton, Andre Taft, Francis Davis, John Lees, Seth White, Thomas Holmes, Ezekiel Peirce, A. E. Winter, E. B. Newton, Moses Brigham, Samuel Brown, E. W. Holbrook, Dennis Harthan, Oliver B. Sawyer, who continued to hold the office until 1862. Since that year George F. Howe has served as treasurer 22 years, and Henry A. Sawyer, 5 years.

From 1808 to the present time the office of town clerk has been held by the following persons: Robert B. Thomas, 1 year; Joseph Hinds, 4 years, Ezra Bigelow, 10 years; Francis Davis, 2 years; Seth White, 5 years; Ephraim Bigelow, 7 years; B. F. Keyes, three years; Barney Howe, 10 years; O. B. Sawyer, five years; H. F. Holt, 1 year; Edward Howe, 3 years; H. O. Sawyer, 1 year; H. Houghton, 29 years.

Representatives to the General Court.—The following persons represented the town in the House up to the year 1857, after which the district system went into operation: Ezra Beaman, 4 years; Barnabus Davis, 6 years; Joseph Hinds, 5 years; Robert B. Thomas, 5 years; Silas Newton, 1 year; Thomas White, 1 year; Silas Walker, 1 year; Dennis Harthan, 1 year; B. F. Keyes, 1 year; Levi Pierce, Jr., 1 year; Samuel Brown, 1 year; Brigham Prescott, 3 years; Addison Lovell, 1 year; Amos Child, Jr., 3 years; Eli W. Holbrook, 2 years; E. M. Hosmer, 2 years; O. B. Sawyer, 1 year; D. C. Murdoch, 2 years. The Fourteenth District of Holden, Paxton and this town, was represented in 1859 by Winson N. White; in 1862 by L. M. Harris, and in 1864, by D. C. Murdoch. The Eighth District, of Sterling, Boylston and this town, was represented in 1867 by W. McFarland; in 1870, by Stephen Holt; in 1872, by Rev. J. W. Cross; in 1875, by Geo. F. Howe. The Sixteenth District, of Boylston, Northboro, Shrewsbury and this town, was represented in 1876 by Henry Pierce; in 1880, by H. O. Sawyer; in 1884, by H. Houghton. For the Thirteenth District, composed of seven towns, and entitled to two representatives, H. E. Morton went from this town for two years, 1886 and 1887.

At the date of the incorporation of the town there were within its limits three school-houses. The first year the town voted fifty dollars as an appropriation for schools. In December, 1808, the town voted to "divide the town into four school districts, two south of the river and two north." These houses were located, one near where the present South Schoolhouse stands; the second, about eighty rods northwest of the old Common; the third near the present location of the double house in the Northeast District; and the fourth above the village of Oakdale, or near the house of Pliny W. Stearns. A fifth one was built soon afterwards on "French Hill," at the Lower Factory village. The sixth house was built in 1843, and the seventh and eighth within the next eight years. For several years the town used the schoolroom in "Thomas Hall" for a high school. It was not until after the close of the late Civil War that the town took decided steps to relieve the overcrowded condition of our schools. Four two-story and one single-story house were built, and the town now has fourteen fine school-rooms, several of which have extra recitation and play-rooms attached. There is one high school and one grammar school, both in the same building, which have sessions of about forty weeks in the year. This building has, within the past two years, been much enlarged, with additional recitation and other rooms, making it a model house. A valuable apparatus for illustrations has been collected and is being added to from year to year. A valuable library of scientific, historical, biographical and mechanical works has been started, and now numbers over two hundred volumes.

Besides these two schools, there are three intermediate, one mixed and seven primary schools, holding sessions of thirty-three weeks each during the year.

Previous to 1840 the schools had not probably averaged sessions of more than twenty to twenty-four weeks in the year. To show their gradual increase, a few items are given, and as a further contrast of causes and effects, pauper expenses for the same years are given.

In 1810 the town made an appropriation of $150 for schools. In 1840 the sum was $600. In 1888 the appropriation was $5000. In 1810 the town appropriated for the support of paupers $290. In 1840 the amount was $500, and in 1888 the sum was $2000.

The population of the town in 1810 was about 600, in 1840 about 1600, and in 1888 about 2950.

The Public Town Library was established in 1878. Previous to that year some individuals had endeavored to start an interest in such an institution, but up to that time no action had been taken by the town in the matter. To David Childs, of Wayland, a native

of the town, and his widow, Lydia Maria Childs, are we indebted for the starting influence which finally established this valuable addition to the town's property. Mr. Childs, in his will, left the sum of one hundred dollars for the town library of his native town, supposing no doubt that the town had one. His widow, who was the executrix of the will, proposed to pay this sum over to trustees provided the town would take steps to establish a library. She afterwards added a collection of about one hundred volumes to this bequest. By individual efforts and several other donations, with an appropriation by the town of six hundred dollars, the sum of over twelve hundred dollars was raised, and the institution was successfully started on a small scale. Since that year it has constantly grown, and at the present time has a valuable collection of over three thousand volumes. It has a fine, large room, as a book and reading-room, large enough for its needs for many years to come.

The vital statistics of the town since its incorporation are as follows: The number of births for the first fifty years, from 1808 to 1858, were 1694; from 1858 to 1888, 2554, making the whole number 4248. The number of marriages from 1808 to 1858 were 693; from 1858 to 1888, 1236, making the whole number 1929. The number of deaths from 1808 to 1858 were about 1100; from 1858 to 1888, 1549, making the whole number 2649. This does not include the statistics for 1888.

Over the large streams the town has five bridges. Of these, one is built of stone, with three arches, over the Nashua River at the Valley village, and was built in 1856 at a cost of about four thousand dollars. The river at this point rendered it difficult to build a permanent structure, owing to curves in the banks and of quicksands at the bottom. Much expense has been laid out since the bridge was built, in walling the banks and in flagging the bottom of the river. It is now considered a substantial and enduring structure, likely to withstand all action of the water for centuries to come. This bridge is known as the "Beaman Bridge," and is the lowest one on the river.

The next one above, at the Central village, is an iron bridge of one hundred feet span, built in 1875, at a cost of about three thousand dollars, and is considered a strong and substantial structure. This bridge is also over the Nashua River.

The third bridge is over the Stillwater River at Oakdale, and was built in 1879, of fifty feet span, and another of the same span was built over the Quinnepoxet River, at Harrisville, in 1880. Both these bridges are of iron, and believed to be strong and durable ones, certainly great improvements over the old wooden bridges of former times.

The fifth bridge is a wooden one over the Quinnepoxet River in Harrisville. It has been built but a few years, but shows evidence that it must be replaced ere many more years pass.

During the past five years the town has made two decided improvements to their streets—first, by naming and erecting the signs at the principal crossings, and second, by putting up of lamps for lighting the streets by night, on all the streets of the villages.

There are in the town a Masonic Lodge, one of Odd Fellows, a Grand Army Post, a Grange of Husbandry, a Council of Royal Arcanum and five different religious societies.

A Masonic Lodge, "The Boylston," was instituted in this town March 8, 1876, and has kept in good condition to the present time. A very neat and pretty lodge-room was fitted up for its use over the Baptist Church, where all its meetings are held.

The Centennial Lodge of Odd Fellows was organized here October 24, 1876, and holds its meetings also in the Masonic Hall. This hall was formerly a difficult one about getting an easy access to; but by the remodeling of the church, a few years since, the way to it was made much more easy, and possibly access to a membership to the two lodges has also become less difficult.

A "Grand Army Post" was organized here soon after the close of the war,—the "George D. Wells Post, No. 28,"—and has been kept in a flourishing condition ever since. An auxiliary society, "the Ladies' Relief Corps," was connected a few years since, and the two societies are doing a large amount of relief work for soldiers and their families. They have a very neat and convenient hall for their use, located at the Valley station.

A Grange, No. 106, was instituted here a few years ago, and has kept up a good-working lodge,—holds its regular meetings with full numbers and no abatement in the interest manifested at the time of its start. Thomas Hall has been fitted up for its use.

Beaman Council, No. 964, Royal Arcanum, was instituted here in 1887, and holds its regular meetings in the Grand Army Hall.

The first church (Congregational) in the territory now West Boylston was formed in 1796, consisting of thirty-three members, embracing widely different opinions relative to religious doctrines. The majority favored Arminian sentiments, while a minority were decidedly Calvinistic. Rev. William Nash, the first minister, favored the Arminian side, and on that account was opposed by the minority, who were never satisfied with his preaching. In 1802 religious conference meetings were originated and regularly held once a month by a respectable portion of the church, the meetings being open to all who wished to participate in them. "Mr. Nash, although urged to participate, refused to favor or in any way afford aid and assistance in their maintenance, the majority of the church also refusing any assistance or countenance therein."

In 1809 the first religious revival in this town occurred, and continued with great interest for several months. It caused much excitement and severe opposition, although a large portion of the people were

favorably affected thereby. The meeting-house of this society had been built in 1794, and "was dedicated to the service and worship of God January 1st, 1795," the sermon on the occasion being preached by Rev. Daniel Grosvenor, of Paxton. Several candidates were successively heard, and it was not until March, 1797, when the call was extended to Mr. Nash to settle. He was a graduate of Yale College and a native of Williamsburg, Mass. He was not ordained until October 11, 1797, with a stipulated salary of $333.33. Mr. Nash understood that a portion of the society was opposed to his becoming its minister, and in his letter of acceptance he wrote regretting "the want of unanimity," and further says: "Those gentlemen to whom my services have not been as acceptable as I could wish, I respect." "In acting agreeably to their own best judgment, they have exercised a right which belongs to every Christian, and ought not, on that account, to receive the censure or dissatisfaction of any." This opposition to Mr. Nash seemed for a while to remain dormant, but was never extinguished, and in 1812 it became so great that an attempt was made to dismiss him. In 1814 his health became seriously impaired, rendering him unable to preach or discharge parochial duties. In 1815 he was dismissed at his own request. Mr. Nash had purchased the large farm in the south part of the town, which had been known as the "David Childs Place," where he continued to reside to the time of his decease, in 1829, aged sixty years. Mr. Nash married Elizabeth Doubleday in 1801. One son and a daughter—Charles and Elizabeth—are still living in the city of Worcester.

After the dismission of Mr. Nash various candidates preached here, but it was not until December, 1820, that Rev. John Boardman, from Newburyport, was invited to settle by a vote of sixty-five to twenty-eight, and he was ordained February 28, 1821, with an annual salary of five hundred dollars. In 1834 Mr. Boardman was dismissed at his own request, and he afterwards settled in East Douglas, where he died in 1842. It was during the pastorate of Mr. Boardman that the meeting-house on the old Common, the first one built, was burned in 1831. Mr. Boardman, with a majority of the church, being of the Calvinistic faith, left that location and built the brick house on the north side of the river, where the church and society have since continued to worship.

In September, 1834, Rev. Elijah Paine, a native of Ashfield, Mass., and who had been a settled minister at Claremont, N. H., accepted an invitation to settle over this church and society, and was installed November 3d, of that year, at a salary of six hundred dollars. Mr. Paine died here very suddenly September 14, 1836, aged thirty-eight years.

In 1837 Rev. Brown Emerson was ordained as Mr. Paine's successor, at an annual salary of six hundred dollars. He was dismissed at his own request November 6, 1839.

Rev. Joseph W. Cross, who had been settled in Boxboro', Mass., was installed over this church and society March 11, 1840, at an annual salary of seven hundred dollars. He remained as pastor until March 16, 1859, when he was dismissed. Mr. Cross still remains a citizen of the town, having just passed the eightieth anniversary of his birth, being active and vigorous for one of his age. Mr. Cross has been followed by Rev. Messrs. H. M. Hitchcock, James H. Fitts, Wilbur Johnson, William W. Parker, Francis J. Fairbanks and Millard F. Hardy, who is the present pastor.

The Baptist Church and Society can date their origin back about eighty years, or about the year 1810, from which time the denomination has gradually increased to the present time. They formed their first society organization in 1813, but had no regular preaching until 1819, when a church was organized of about fifty members. Their first minister was Rev. Nicholas Branch, who has been followed by Rev. Messrs. Allen Hough, C. C. P. Crosby, Abiel Fisher, Joseph G. Binney, Lorenzo O. Lovell, Sewell S. Cutting, Leonard Tracy, Kazlett Arvine, Timothy C. Tingley, Zenas P. Wild, George R. Darrow, J. M. Follett, Charles F. Holbrook, Edwin Bromley, George Colesworthy, Isaac Sawyer, Alvan M. Crane, J. W. Brigham and L. W. Frink, who is the present pastor.

For several years this society worshipped in a small church, located in what is now the village of Oakdale. Their present meeting-house was built in 1832. About five years since this house was entirely remodeled, the old pews taken out, new windows put in, and the whole inside changed, making the house very neat, pretty and convenient. At the present time the society is engaged in building a parsonage-house in near proximity to their meeting-house.

The Methodist Society began to hold meetings here, first in different halls, then in the meeting-house of the Liberal Society, on the old Common, then in Freedom Hall at Oakdale. In 1858 they built their present neat and convenient house at Oakdale, and have, up to this day, maintained a strong and flourishing society. In 1854 Rev. David Higgins was their pastor. He has been followed by Rev. Messrs. J. H. Gaylord, I. B. Bigelow, J. W. Coolidge, S. J. Abbott, Daniel Atkins, Burtis Judd, Walter Wilkie, Wm. P. Blackmer, L. A. Bosworth, William Pentacost, William Gordon, Elias Hodge, C. A. Merrill, Wm. J. Hambleton and S. L. Rogers, who is now the pastor.

The Liberal Congregational Society was an outcome from the first religious society formed in town. There had all the time, from the first starting of that society in 1794, been in it several grades of belief, and when the first meeting-house was burned, by being struck by lightning, August 23, 1831, a permanent separation occurred.

The Calvinistic portion built the present brick house at the Valley, and the remaining portion organized a Unitarian Society and rebuilt a neat and

pretty house nearly on the spot where the old one was burned. This house, together with the brick and the Baptist house, were all completed in 1832. After this time the society never settled a minister, but for several years employed different clergymen, both of Unitarian and Universalist sentiments, to supply their pulpit. In 1859 Rev. J. H. Willis, Universalist, came here and preached until 1862, when, principally owing to many of its members going into the army, the meetings were discontinued and Mr. Willis removed to Worcester. With this exception the society had had no stated preaching for over thirty-five years. Other denominations have used the house for a few months at a time, and the society has kept up its organization to the present time by the annual choice of parish officers. The house stands in by far the best location for a public building of any one in town, fronting, as it does, on a public common.

The Catholic Society was formed here some thirty years since, and just before the Civil War built their first house of worship. For several years they had no resident pastor, priests from abroad supplying for their needs until about 1873, when Rev. Father Anthony J. Derbuel came here and remained until his decease, May 21, 1886, aged forty-nine years. He was a very genial and intelligent man, a native of France, and was liked by every one making his acquaintance. The next year Rev. Father Daniel F. Feehan came, and remained until November, 1888, when he removed to Fitchburg. Rev. Father J. V. Campeau has located here as his successor. The first church built by this society had only a seating capacity of about three hundred, and they, having outgrown its size in 1882, built their present large and commodious house near the Baptist meeting-house, it being much the largest church building in the town.

For the past year meetings have been held by the Episcopalians in a hall at the Valley, and it is said there is some talk of building and forming a permanent society here in the near future.

The town is favored with a large water-power, afforded by two streams which unite in this town, and form the south branch of the Nashua River. The first of these is the Quinnepoxet River, coming from the west through Holden, and on this stream are situated three cotton-mills and a small shoddy-mill, described hereafter.

The second stream is the Stillwater River, flowing from the north through Sterling, on which are situated the cotton-mills of the West Boylston Manufacturing Company, the most extensive one within the town. At a short distance below these mills the two streams unite, and after flowing for about two miles enter the town of Boylston. On the main river at the central village is a cotton-mill on one side of the stream and a large grist-mill on the other. About sixty rods below the last mill, the water is turned into an artificial canal and carried nearly half a mile to a large artificial basin or pond, creating the power to operate the extensive works of the Clarendon Mills, the water then flowing through a canal for about a mile before it again unites with the main river. Besides the power afforded by these large streams, there is a small stream called "Malden Brook," on which there are at present two small privileges—the first operating machinery for making excelsior and also some basket machinery; the second, a saw and shingle-mill, being the only one now operated by water-power in the town. Many years since, there was another small mill on this stream used for mechanical purposes, which was burned. On this privilege no mill has since been erected. Still another mill was erected and used for making shoddy for a few years, when it was burned, about twelve years since, and about the same time a freshet carried away the dam, and although some attempts have been made to rebuild, no work has been started up to the present time. Many years since there was a small privilege operating a small mill on Gates Brook for various mechanical work, but mill and dam were torn away about twenty years ago. Another small power was obtained by carrying the water by a canal from this brook about half a mile to the Brimhall Place, on Worcester Street, but this establishment disappeared several years ago.

The first cotton-mill to be described is that of Samuel R. Warfield, on the Quinnepoxet River, and near the line of Holden. On this privilege a saw-mill had been erected, and operated for about forty years. In 1868 Mr. Warfield, having bought the mill and other buildings, with the farm connected, put up a small building of wood, with machinery of 1500 spindles capacity, which was ready and put in operation for the manufacture of satinet warps the same year, employing about fifteen hands. This was intended as merely a temporary arrangement, as the first building was so built and arranged as to be easily changed into tenements at any time when a larger factory building of brick should be erected. In 1881 this contemplated work was done; the dam was raised, so as to increase the capacity of the pond, and a brick mill, of two stories, with the dimensions of 120 by 70 feet, was finished in 1882. Its capacity is 3200 spindles, and used for the manufacture of yarn and satinet warps, employing twenty-seven hands and using about 700 bales of cotton during a year. Mr. Warfield also erected, about the same time, a small shoddy-mill, on the wasteway below the first mill, which was burned in 1885. It was immediately rebuilt, and has been run most of the time since, giving employment to about three men.

The second cotton-mill is also on the Quinnepoxet River, and is a substantial building of stone, with brick trimmings, finished and put in operation in October, 1874, by L. M. Harris & Company. The dam for this mill was built the previous year, the whole making a new establishment, has the capacity of 5540 spindles, and it is known as the "Whiting

Mill." The third mill, on the same stream, is also owned by L. M. Harris & Company, and is of the capacity of 3790 spindles, and is known as the Harris Mill. They are used for the manufacture of light sheetings and shoe drills, using about 1200 bales of cotton yearly, and employing about 100 hands. The water-power of the two mills is rated at 213 horse-power, and within the past few years the owners have put in steam-engines of 125 horse-power, enabling them to run all their machinery at such times as water may fail. At the point where the last-named mill now stands, a saw-mill was built by Henry Holt, about sixty years ago. After a few years he enlarged his building, and put in machinery for making cotton yarn. In 1845 the Messrs. Harris bought the mill, farm and houses, and continued the manufacture of yarn for about two years. In 1847 they commenced the manufacture of cloth, and followed it until 1853, when the mill was burned. This building was of wood. Steps were at once commenced for rebuilding, and the present building of stone, on a larger scale than the one burnt, was finished, the machinery all in and was put in operation in just one year after the fire. At the time when the Messrs. Harris came here, in 1845, there were only the mill and two houses at this point. Now, in connection with the two mills, there are about twenty-five houses, several of them being tenement houses, the whole making what is known as the village of Harrisville.

The fourth establishment for the manufacture of cotton goods is situated in the village of Oakdale, on the Stillwater River, and is owned and operated by an incorporated company, known as the West Boylston Manufacturing Company, and it is much the largest establishment in the town, being of the capacity of 17,000 spindles, employing 375 persons, and using about 4,000 bales of cotton yearly in the manufacture of various fine cotton goods or fabrics.

The company was first incorporated in 1814 for the making of wire and cotton goods. The manufacture of wire was never started, and it would seem that no business was very energetically entered into, as the company charter was lost by neglecting to make the annual choice of officers. Up to this time the mill had been only a small one, built of wood. In 1823 the company was re-chartered and commenced the building of their first brick mill, finishing it in 1824.

In 1825 the first looms for weaving cloth were put into the mill, after which time all the several parts of the work of making cloth was done by machinery, and the business proved very successful for several years. About the last of the year 1839 the mill was completely destroyed by fire. In 1840 the mill was rebuilt on about the same scale and capacity. In 1868 the company built a dam of great strength and several feet higher than the old one, increasing their pond to several times its previous capacity and increasing greatly their water-power, and built an additional mill of stone. On September 7, 1871, the whole establishment was destroyed by fire, being the most disastrous fire which has ever occurred in the town. The company rebuilt the present mill in 1872. The company, during the late Civil War, changed a part of their works and made the manufacture of army blankets a very successful business. After the war they used five setts of woolen machinery in making satinets. At present nothing but cotton goods are made, and the company have commenced putting in foundations for quite an extensive addition to the main part of the mill. Besides the mills, the company owns thirty-two houses, many of them large tenement houses, a large brick store-house, store, barns, etc. Besides the waters of the Stillwater River, this company controls the waters of the Quinnepoxet River by a dam built below Harrisville, which turns the water into a canal by which it is carried into their large pond. The company also control the waters from the Washacum Lakes in Sterling, the waters of which can be raised about four feet above their natural level by a short dam, and thus creating a large reservoir, to be drawn from in time of low water. The company have also a large steam-engine for use when needed to increase their motive-power. Another great addition made to their facilities for dealing with fires was the building of a large reservoir for holding water, of the capacity of 60,000 gallons, situated on a hill much higher than their building, which is kept constantly full by pumping, and can be used at a few moments' warning in extinguishing fires in any part of their buildings, or of the village of Oakdale.

The fifth cotton-mill is situated on the Nashua River at the Central Village, and on the south side of the stream. This is the mill of E. W. Holbrook, which has a capacity of three thousand six hundred and forty-eight spindles, and employs fifty hands. On the north side of the stream is the large grist-mill of Edward A. Cowee, each party owning one-half of this privilege and power.

In the place where the cotton-mill now stands, a saw-mill was first erected several years before the incorporation of the town, and was one of the saw-mills in use at that date. A few years afterwards Ezekiel Peirce and his brother erected here a scythe-factory, putting in the first trip-hammer used in this section. This trip-hammer, with its noise and operation, for a long time was a wonder not only to the people within hearing of it, but often brought strangers from a distance to witness its wonderful performances. This scythe-factory was run until 1831, when Dr. John M. Smith and Ephraim Bigelow bought out the works and erected a small cotton-mill, which they put into operation the following year. Mr. Bigelow had previously made cotton yarn in a room over the saw-mill for several years previous to that date. Mr. Bigelow was a man of considerable mechanical ingenunity, and it was while here that was first started the germ of the remarka-

ble machines afterwards perfected by his two sons, Erastus B. and Horatio N., after their removal to Clinton (then Lancaster), about 1836, for the weaving of coach lace, counterpanes, carpets, etc.

In 1841 these mills passed into the hands of Mr. Holbrook and Oliver Eldridge, and they were run under the superintendence of Mr. Holbrook until January 9, 1848, when they were entirely destroyed by fire.

Nothing was done towards rebuilding until 1853. In that year Mr. Holbrook erected the first part of the present mill, starting it into operation the following year, in company with L. M. Harris, making light cotton sheetings, and continuing their successful manufacture up to the present time. He has, from time to time, made additions and improvements in buildings and machinery, until both are of about double their capacity from the time of their starting. He put in an engine of seventy-five horse-power in 1883.

Within the past five years Mr. Holbrook has also built a large reservoir of thirteen thousand five hundred gallons capacity above his building, to which water is pumped and kept constantly filled to be used in cases of fire. Its great utility was remarkably demonstrated during the past year, when, the grist-mill on the opposite side of the river getting on fire, with little prospects of any part of the buildings or contents being saved, the attachment of hose to this reservoir and running the same to the mill sufficed in a few minutes to subdue the flames and save nearly the whole contents of the buildings.

On the north side of the stream was erected both a grist-mill and a clothier's mill previous to or about 1761. The river at this point at that date was no doubt the dividing line between Lancaster and Shrewsbury. Micah Harthan, according to the military record of Lancaster, was engaged as a soldier in the expedition against Ticonderoga in 1758, and on his return from that unfortunate expedition no doubt engaged in the running of the two small mills at this point, and probably they were built by him. They have been widely known as the Harthan Mills, and were owned for nearly a century by the Harthans, the sons and grandsons of Micah.

Micah Harthan was born probably in Marlboro' in 1735. In the time of the Revolution his name does not appear among those enrolled as subject to do military duty, it probably being considered that his business as a clothier was of too much importance to take him away from it. He died in 1803, when the business of the grist-mill went to his son David. Both the grist and clothier's mills were burned in 1801. A new grist-mill on improved plans was erected at once, and a small fulling-mill was also built and run for a number of years by Oliver Moore, who ran this mill until his death in 1831. It was afterwards used for a few years by Samuel Flagg & Co. as a machine-shop. In 1842 Charles M. Harris came here from Rhode Island, and in company with Mr. Wilder used this mill for the business of making cotton-yarn, which was continued until 1847, when this and the grist-mill were burned. At the time of this fire machinery had been put in the upper story of the grist-mill for making twine and wicking; both this and the grist-mill being run by Childs & Dinsmore.

The cotton-mill was never rebuilt, and for about three years nothing was done towards rebuilding the grist-mill. During this time a run of stones was put into the machine shop of Mr. Holbrook, on the opposite side of the river, by James E. Wood, who run it until the new mill on the old site was started in 1851. In 1850 Mr. Ruel G. Cowee came here from Gardner and built the present mills, which have the best reputation for making flour and grinding all kinds of grain of any mill in the region.

For several years the upper story of the mill was used for mechanical purposes, making weather-strips &c., but for the last twenty years the whole of the first buildings, with many additions, have been used for the greatly increased business. Mr. Cowee died October 5, 1882, since when the business has been carried on by his grandson, E. A. Cowee.

The sixth establishment, or cotton-mill, is what is now known as the "Clarendon Mills," situated at what is known as the Lower Factory village. The waters of the Nashua River at this point were turned into a canal and carried about half a mile from their natural course into a large artificial basin, and, after driving the machinery of this mill, flow in a canal about a mile before again uniting with the main stream. This work was first started by Major Ezra Beaman about 1793, to operate a saw and grist-mill. The saw-mill remained in operation until about 1872. The grist-mill was in a few years removed, and the first cotton-mill was started in the town; just the date of its starting cannot be learned, but it had been in operation several years before the incorporation of the town, in 1808. Up to 1819 nothing had been done beyond making yarn by machinery. All of the weaving had been done by hand-work on the old looms, worked by females at their homes, and yarn from this mill was carried many miles away from the mills, was woven in the looms by the fireside of many a country home and returned as cloth to the mill. In 1819 twelve looms were put into operation in this mill, and from that date there was a rapid increase or growth of the cotton manufacture in this town, and which made it the leading industry, as it will long continue the leading one of the town. About that date a company was incorporated for this mill, under the name of the "Beaman Manufacturing Company," and continued its existence until 1873.

In 1847 and '48 the company enlarged the capacity of their pond or basin to more than double its first condition, removing the old wooden building, working it over into several tenements, and built the main part of the present mills of brick. This was only one

story above the basement. The two wings, of two stories—also of brick—were added in 1854. In 1874 a change was made in the ownership, and the company was reorganized under the name of the "Clarendon Mills." This mill has a large steam-engine attached, of sufficient power to run one-half of the machinery in times of low water, or when otherwise needed. In 1881 they added a building for a bleachery of thirty-two by sixty feet, and two stories high, thus enabling them to finish the goods made ready for the market. They manufacture at present counterpanes, sheetings, corset-jeans and sateens, making ladies' fine dress goods from Nos. 30 to 50 yarn. The mills are of the capacity of 10,950 spindles, and give employment to one hundred and ninety operatives. For many years they have been under the superintendence of Mr. George M. Lourie as resident agent. They are delightfully situated in what has ever proved to be a very healthy part of the town; and, with its pretty pond, buildings and avenues lined and shaded by several varieties of trees, many of them planted near a century since, it presents to the eye a view both beautiful and romantic. Passing travelers, at about sunset of a pleasant day, often remark this pleasing appearance as their eyes take in this view from the upper railroad station in this town. A pleasing item in connection with these mills is worth recording. Miss Parney Underwood began work in them in 1822, and worked constantly for a period of about sixty-three years. She has not worked in them for three years past, but still remains hale and vigorous for one of her age.

Next to the cotton manufacture, the bottoming of boots has for many years been the leading industry of the town. This business had become one of importance in 1842, at which time there was probably about two or three hundred pairs of boots bottomed per day for Worcester manufacturers, in this town. This business continued to increase until, a few years before the Civil War, there were over two thousand pairs of boots so bottomed daily for Worcester parties, and continued with about the same amount of work until about ten years ago, when the business began to decrease, and now but few boots are bottomed here for Worcester men.

In the year 1850 a boot manufactury was erected near the upper railroad station in this town, and was in operation about twenty-three years, making some fifty cases of boots per day. Since 1875 it has been vacant. In 1856 another establishment was started on the north side of the river, making from fifty to one hundred cases per day until January 23, 1866, when the shop was burned.

A still larger shop was erected the same season, and steam-power was added. After that time they increased their business, making some seasons as many as two hundred cases per day up to 1878. Since that time a much smaller number of boots has been made in this shop, but the business has been regularly carried on.

About 1860 an establishment was commenced at Oakdale for the manufacture of ladies' shoes, employing some twenty hands, with steam-power. This business was continued until 1878, when the shop was closed. Since that year the shop was used, a year or more, for making men's shirts. The business was afterward moved to Leominster.

In former years the manufacture of grain-cleaning and fanning mills was carried on here to a small extent.

The manufacture of hand-made oak baskets has been carried on in this town for more than seventy years. Formerly a two-bushel basket was as large as was made or wanted. Now they are made of the capacity of thirty bushels for factory use, and machinery is used to work out some of the larger parts of the baskets. At this time from ten to twelve persons are employed in this business.

The manufacture of school apparatus was begun here over sixty years ago, and a few years afterwards the manufacture of a small machine called a "Warper Stop Motion" was begun by the same parties, and carried on until about one year ago, when the business was removed to Clinton. The making of school apparatus had been given up for many years previously.

Another business followed for the past twenty-five years has been the manufacture of whatnots, brackets, and a variety of house ornaments, in which both steam and water-power have been used. The same parties have built a few church and parlor organs within a few years.

A steam mill, for sawing lumber, planing and matching boards, and the manufacture of packing-boxes, was started at Oakdale about five years since, and employs five or six men all the year.

The following histories of individuals are of those men who have for their lifetime been connected with the growth and prosperity of the town, and to whose energy, thrift and plans it owes its existence and present standing:

Ezra Beaman, Esq., more generally known as Major Beaman, was the eldest son of Jabez Beaman, and was born in Bolton, October, 1736. The father, having purchased a large tract of land, removed here with his family in 1746, where he lived until his death in 1757. Major Beaman then became proprietor of the homestead and began that career of usefulness and success which contributed so much to the formation of the town. In 1758 he married Persis, daughter of Deacon Cyprian Keyes, of Shrewsbury, with whom he lived about thirty years. She died in 1788, leaving six children—Jabez, Ezra, Levina, Persis, Betsey and Eunice. He afterward married Mary Boylston, of Charlestown, who survived him and died June 6, 1813, aged sixty-two years.

Major Beaman was endowed by nature with a strong mind, possessing a remarkable spirit of enterprize, together with great energy and resolution,

which enabled him to devise and execute various schemes and plans, not only for his own prosperity, but also for the interest and advantage of the community around him. His designs seldom failed to result auspiciously and in accordance with his desires and anticipations. He possessed and held a large amount of real and personal property, thereby constituting him by far the wealthiest man of the then inhabitants of the town. He was not only an active, leading man in his own vicinity, but sustained a prominence and wielded an extensive and controlling influence in the community at large. Whenever a project of a public nature, having the benefit of the community as its object, was originated and brought up for consideration, he was the first to be consulted as to its importance and practicability, when his judgment and expressed opinions generally had the effect to cause the adoption of the scheme or its rejection and abandonment, thus clearly demonstrating and unmistakably manifesting the high estimation in which he was held by the leading portion of his fellow-citizens for his practical wisdom and sound judgment. Many of the public roads in this vicinity were projected by him, and although it has been handed down that he met with a strong and determined opposition, time has shown that most of these highways were located where they have proved to be of the most advantage to the after-growth of the town and county. Major Beaman was a patriot, a firm and ardent friend to his country, being one of the active and unflinching spirits of the American Revolution. He early took a decided stand against tyranny and oppression, taking up arms in favor of the rights of his country, marching to the battle-field to resist the encroachments of the enemy. He was with the American army at Cambridge in 1775, and performed a conspicuous part during that memorable period. He was ever ready to render aid and assistance in any emergency, not only by his influence, but when circumstances required, he promptly devoted his time, his property and his personal exertions for the purpose of sustaining and pushing forward the arduous struggle for American independence. It would seem that he was one with many others who had virtually pledged their lives, their property and their sacred honors in favor of obtaining liberty, justice and equal rights for themselves and their posterity.

In looking back and judging at this day, it seems to the writer that the leading trait in his mind and character was thoroughness and durability—everything was done to last for many generations.

He began in early life to set, in and along the highways adjacent to his own lands, a variety of shade trees,—elms, maples, buttonwoods and others. One of these buttonwood trees, set when he was thirteen years of age, is now an enormous one of its kind, measuring at its base over twenty-two feet in circumference. The many trees set by him now form one of the great beauties of our town, especially of that part of it in and around what are now the grounds of the Clarendon Mills corporation. In the highway, and against lands formerly owned by the Beamans, stands an enormous "White Oak" tree, which must be now several centuries old. Tradition says it was an ancient boundary tree, some believing that it was on the line of the extension of Lancaster in 1711, and of the Davenport farm. Certainly Major Beaman made it a boundary tree in selling land, and having the wish to preserve and insure its existence against the axe of any future vandal, he filled its trunk with large spikes, driving many pounds of iron into it. This tree is still thrifty and growing, and measures around its base twenty feet eight inches, and at six feet from the ground about fifteen feet in circumference.

In 1764, Major Beaman built the large and commodious dwelling-house on what is now called East Main Street, at the Valley, in this town. This house was built in a thorough and substantial manner, of the best materials, and was at the time, no doubt, one of the best houses in its vicinity. It was designed for a public-house and, as a remarkable fact, it was kept as such by the two Ezra Beamans for about a century.

About sixteen years since, the main part of this establishment, being in the way of the line of one of our streets, was moved about thirty rods away and fitted up as a separate house; all of its timbers being sound and in good condition, it promises to last another century if properly cared for. The large "Ell" of the old house was fitted up in its old location and makes a good substantial farm-house. One of the barns, eighty feet in length, has also been moved across the street and fitted up for tenement-houses, and thus changing very much the appearance of the old place.

Another feature of the old place was a large stone watering trough, erected over a century ago by Major Beaman, supplied by an aqueduct leading from a spring about forty rods away, with a constant stream of cool water, coming from an iron spout in a stone column towering above the trough, on which was ever found hung a dish from which the traveler could slake his thirst. This trough has been moved from its former location across the street, and still remains as a noted resort for thirsty horses and other beasts, but the old time "dipper" for man's use has long been missing.

To Major Beaman is the town indebted, more than to all others, for its existence as a town. The inhabitants of Boylston having decided to build a new meeting-house, a difficulty arose in regard to its location. The majority were in favor of building near the location of the old house, while a large minority, led by Major Beaman, wished to build about half a mile northwest of the old house, and nearer the centre of the territory of the town. It becoming apparent that no compromise could be effected, the minority

seceded and built a new house on what is now known as the "old Common" in West Boylston, in 1793 and 1794, and petitioned the Legislature for an act of incorporation as a town. In this effort they were joined by persons both from the towns of Sterling and Holden. Each of the three towns strongly opposed the movement, and it was defeated. They then applied for incorporation as a precinct, or parish, and this was granted in June, 1796, and it was made the "Second Precinct of Boylston, Sterling and Holden." In the survey, by Silas Holman, of the territory at the time of the first application, 4075 acres were claimed as being in Boylston, 2367 acres in Sterling, 3646 acres in Holden and 1392 acres in Worcester. The petition for a separate precinct was signed by forty-three voters of Boylston, twenty-three from Sterling, nineteen from Holden and three from Worcester. The act of incorporation did not include any of the territory from Worcester. At a meeting held by these people, December 17, 1792, it was first decided to build a meeting-house, and in order to raise funds for the purpose, it was voted to sell the projected number of pews at auction, and sixty-six pews were thus sold for the amount of $1938.25. Of these, Major Beaman bid off thirty-one. At an adjourned meeting, held February 4, 1793, it was decided "to build a belfry to their house," and on the 13th, 14th and 15th days of June, 1793, the frame of the house was raised. About this time Major Beaman proposed that, for the amount realized for the pews sold, and the ownership of those unsold, he would finish the house. The language of the record gives this account of the result:

"This" proposition "was agreed to, and within the term of about eighteen months from the time it was raised he accomplished the work in a very decent and faithful manner, and at an expense far exceeding any pecuniary compensation which he can expect or hope for in return." Major Beaman also projected and built the dam on the Nashua River, with the canal, of near a half-mile in length, into which the water is turned and taken to the artificial pond, now owned and used by the Clarendon Mills Company, making it one of the most valuable water-powers in the town. On this he erected a grist-mill and a saw-mill, which were used as such until after his death. At the incorporation of the town, in 1808, Major Beaman, at the meeting held the first Monday in March, was chosen chairman of the Board of Selectmen and treasurer. He was also chosen as the town's first Representative to the General Court, and he was, each following year, re-elected to these offices, holding them to the time of his death, June 4, 1811, in the seventy-fifth year of his age.

At his death all of his children were living, and his property was equally divided, after his widow's dower was set off. She only survived him about two years, when all of his property came into the possession of his children. Jabez, his eldest son, who left no issue, died in 1812, about one year after his father. In the settlement of the real estate left by Major Beaman, three commissioners, consisting of Silas Holman, of Bolton, with James Longley and Jotham Bush, of Boylston, were appointed to appraise and divide the real estate, and by a reference to their report, the following facts are gathered. There were twelve parcels of real estate, consisting of 819 acres, with buildings, all valued at $35,765; thirty pews in the meeting-house on the old Common, valued at $1212; two horse-sheds, $48, and one pew in Boylston meeting-house, $30.50. None of this real estate was sold, but after one-third of it was set off as the widow's dower, some parts of it were set off to each of the six children, the largest proportion to Ezra Beaman, Jr., who was to make each one's portion equal by the payment of money. By the death of the widow and of the eldest son, Jabez, within two years after this division, Ezra Beaman, Jr., came into possession of the homestead and the greater proportion of the landed estate, which he held during his long life.

The last Ezra Beaman never married, but lived to the good old age of ninety-two years and seven months, his decease occurring July 24, 1863. In many respects he was like his father, and always seemed to have his father's life and example before him; often quoting his words and telling of his acts, and priding himself in "doing everything just as his father did." He was a generous man, a good and useful citizen, respected and liked by every one. At his death the name of Beaman became extinct in this town. He was the last one of his name, and since that time one thing after another has been changed until very little is left to remind us of the name. A number of years before the death of the last Ezra a movement was started to have the name of the town changed to "Beaman," and by a large majority, at a meeting called to act on the matter, a vote was passed in its favor; but finding that the then only representative of the name was strongly opposed to it, the matter was dropped. The first incorporated cotton-mill in town was for many years known as "The Beaman Manufacturing Company," but in its reorganization, a few years since, it took the name of the "Clarendon Mills." The old farm was cut up and sold to many different parties, leaving only one hundred and forty-five acres, with a remnant of the old buildings, as the only portion of the old place now intact. In naming the streets of the town, three years ago, one short street received the name of "*Beaman.*"

William Thomas was one of the early settlers in this town, on a small farm on what was then called "Shrewsbury Leg," now owned by J. B. F. Prescott, in the village of Oakdale, where he lived until his decease in 1810, aged eighty-five years. He possessed a peculiar relish for literature and science, and devoted much time to reading and study. He had a

peculiar taste for astronomical research and calculation, and this no doubt had a great influence in shaping and forming the character of his eldest son, Robert Bailey Thomas, Esq., born in 1766 and died in 1846, aged eighty years. He resided in the house in Oakdale now occupied by Charles M. Harris. He was a prominent man in the town, was its first town clerk, several times chairman of the Board of Selectmen, represented the town in the State Convention of 1820 for revising the Constitution, and was several years a member of the State Legislature. He was a justice of the peace, and for many years did all the conveyancing and other legal writing for his townsmen. He originated and established the *Farmers' Almanac* in 1793, annually preparing and furnishing the matter for that popular and widely-known manual to the end of his life. He accumulated a large property, and being very liberal and public-spirited, contributed much towards the welfare and growth of the town. He was the largest contributor towards the building of the largest hall in the town, and it was named "Thomas Hall" as a compliment to him. This hall was intended for school and religious purposes, and it has been used by the town for over forty years for all of its public meetings. Mr. Thomas leaving no children, and dying intestate, his property was divided between his widow and two children of a brother. He married Hannah Beaman, of Princeton, who survived him and died in 1855, aged eighty-one years.
